out of this resolution as to adopt the amendment offered by my distinguished and beloved colleague, the gentleman from Texas [Mr. BURLESON]. These people have been led to believe that we are going to do something about this. If they had not been led to believe a thing like this, it would be another matter. But these people in South America with the blood that flows through their veins are a proud people. They are a little suspicious at times, I will agree, but they are a proud people and they believe that through our administration, and there is only one administration of foreign affairs at a time, that before the next American conference takes place, we must have something like this to offer to the people of South America to prove to them that we are interested in them—whether they have a democracy in name or even whether they have a democracy at all. They have the best that they can afford. I remember President Roosevelt was telling me one time that Mr. Vargas, the President of Brazil, was up here—President Roosevelt said to him, "You are a dictator." He said, "Of course, I am a dictator. You cannot govern a country where only 5 percent of the people are literate under what you call a democracy because they do not understand it."

It is going to take them years to learn what democracy is and what democracy means.

The Secretary of State called me on the telephone and he expressed his deep interest in this thing, hoping that we would not be misunderstood by our neighbors to the south who, I think, in the years to come are essential to our retaining our way of life.

So I do trust that this committee will vote down this amendment and let us go on and do what we are expected to do.

Mr. GROSS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. GROSS moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. GROSS. Mr. Chairman, I just listened to the distinguished Speaker of the House. I thought surely he would shed some light on how this $500 million would be spent, but he provided no light. In other words he, too, is asking us to hand over a blank check to those emissaries who will go to the Bogota Conference. The distinguished Speaker says the South Americans have been led to believe thus and so. Who led the South Americans to believe thus and so? Are we rubberstamps in the House of Representatives? Are we to be ignored in these deals that have been made on the basis of spending half a billion dollars?

The Speaker mentioned dictatorships in South America. Will the price tag on this bill eliminate the dictatorships in South America? You know the answer.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Florida.

Mr. HALEY. Have we not heard for years, and years, and years, this giveaway talk: Unless we go ahead and appropriate this money, this country or that country is going to fall to the Communists? Have we not poured $100 billion of the American taxpayers' money out to the far reaches of the earth? And apparently we are today in worse shape than when we started this giveaway program.

This is never going to help anybody, and it is not going to make us any friends. You cannot buy friendship. People must in the first place want something and want to work for it. American dollars will never buy friendship.

Mr. GROSS. Certainly, the $100 billion we have sent across the oceans ought to indicate who is standing with us and who is not standing with us. The Speaker implies that unless this bill is approved there will be no nation standing with the United States. Where are these nations today?

In Korea, for instance, we have two full divisions and are augmenting our forces, and we are maintaining the 7th Fleet in Far Eastern waters at terrific expense to this Nation. Who is standing by us in Korea? Turkey has had 5,000 men in Korea. They are withdrawing all but about 500 of these troops. The British maintain in Korea an honor guard. Australia and Canada have only token forces stationed there. Who is standing by us in Korea and elsewhere? And yet we are asked to spend still another half billion dollars, and for what? We ask the question and we get no answer.

Mr. Chairman, I yield back the balance of my time.

Mr. HALLECK. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, matters such as this, of course, have been the subject of debate and controversy here in the Congress of the United States through the years. I know the attitude, the persistent attitude, of some like the gentleman from Iowa. I do not deny to him the right to have his views about these matters, but I must say that I was impressed with the remarks of the Speaker of the House.

This program that we are now considering, like many others that we have considered, I believe is vital to the defense and the security of our own country. I know there are some who still believe that the United States of America can just go it alone; but I do not believe the enlightened opinion, majority opinion of the people of this country feels that way about it. I do not feel that we can, and that is the reason I have supported so many of these programs, believing that they were in the best interests of our own country.

I am going to vote against this amendment for that reason.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from Iowa.

The motion was rejected.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Texas [Mr. BURLESON].

The question was taken; and on a division (demanded by Mr. HALEY) there were—ayes 39, noes 119.

So the amendment was rejected.

Mr. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENTLEY: On page 5, line 9, strike out the word "expended" and insert in lieu thereof "June 30, 1962."

Mr. BENTLEY. Mr. Chairman, I do not believe I will take the 5 minutes to explain the amendment, which is very simple. It merely puts a time limit on the authorization. As the language in the bill now reads, the authorization is indefinite; in other words, "available until expended."

The purpose of my amendment is to terminate the authorization at the end of fiscal 1962. It would require the executive branch to come up with plans and programs and to justify a new authorization by the end of fiscal 1962, which I believe will constitute a safeguard on the part of the Congress and at the same time would provide no limitation on the authorization at this moment.

I sincerely think an authorization is desirable. I intend to vote for the authorization, but I do think we should have some time limitation so that the executive branch can come back to the Committee on Foreign Affairs and present new plans and programs when they are devised so that the Congress may know what is going on.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

Mr. Chairman, I feel this amendment is not necessary to protect the Congress. No appropriation can be made under this authorization without the approval of the Appropriations Committee, and a vote by the Congress. On the other hand, the limitation the gentleman offers in his amendment will take some of the edge off of our position at the conference in Bogotá, and will be interpreted, I am sure, as indicating some doubt on our part and a reservation with reference to our position.

Mr. Chairman, I trust the amendment will be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

The amendment was rejected.

Mr. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENTLEY: Page 5, line 13, strike out the period after "specify", insert a colon and the following: "*Provided*, That none of the funds made available pursuant to this section shall be used to furnish assistance to any country in Latin America being subjected to economic or diplomatic sanctions by the Organization of American States."

Mr. BENTLEY. Mr. Chairman, the purpose of this amendment is merely to strengthen any action that may have been taken or may be taken in the future by the Organization of American States against any member countries. I am sure that all Members of the House have certain countries in mind in this respect. I understand this amendment is acceptable to the administration. I understand it is acceptable to the Foreign Affairs Committee, and I do not believe it

is necessary to take any more time. So, unless there is some question on the amendment, I yield back the remainder of my time.

Mr. MORGAN. Mr. Chairman, the chairman is not opposed to the amendment. He feels the amendment strengthens the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

The amendment was agreed to.

The Clerk read as follows:

SPECIAL AUTHORIZATION FOR CHILEAN RECONSTRUCTION

SEC. 3. There is hereby authorized to be appropriated to the President not to exceed $100,000,000, which shall remain available until expended, for use, in addition to other funds available for such purposes, in the reconstruction and rehabilitation of Chile on such terms and conditions as the President may specify.

MUTUAL SECURITY CONTINGENCY FUND

SEC. 4. (a) Section 451(b) of the Mutual Security Act of 1954, as amended, which relates to the President's special authority and contingency fund, is amended by striking out "$150,000,000" in the first sentence and substituting "$250,000,000".

(b) Section 551 of the Mutual Security Act of 1954, as amended, which relates to limitation on the use of the President's special authority, is amended by inserting before the period ": *Provided, however,* That the aforementioned authority may be used during the fiscal year 1961 to finance activities which normally would be financed from appropriations made pursuant to sections 411 (b) and 411(c) of this Act".

Mr. MORGAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MORGAN: On page 6, strike out line 1 and all that follows down through line 6; and on page 6, line 7, strike out "(b)" and insert in lieu thereof "SEC. 4.".

Mr. MORGAN. Mr. Chairman, this amendment simply strikes out the request for increased authorization in the contingency fund. I ask for its adoption.

Mr. O'HARA of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Illinois.

Mr. O'HARA of Illinois. May I ask why this is done, Mr. Chairman?

Mr. MORGAN. Well, the gentleman knows that the Committee on Appropriations has already approved the increase in the contingency fund. They increased it from $150 million to $250 million, and the authorization is no longer necessary.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MORGAN].

The amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. THORNBERRY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 13021) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes, pursuant to House Resolution 637, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. ADAIR. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ADAIR. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ADAIR moves to recommit the bill H.R. 13021 to the Committee on Foreign Affairs.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes had it.

MR. HALEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will count. [After counting.] Two hundred and eighteen Members are present, a quorum.

Mr. GROSS. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were refused.

So the motion to recommit was rejected.

The SPEAKER. The question is on passage of the bill.

Mr. WILLIAMS. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were refused.

The bill was passed.

A motion to reconsider was laid on the table.

Mr. MORGAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3861) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes, a similar bill to the one just passed by the House.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. GROSS. Mr. Speaker, I object.

PRICE SUPPORT FOR MILK AND BUTTERFAT

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 636 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 2917) to establish a price support level for milk and butterfat. After general debate, which shall be confined to the bill, and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. COLMER. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Ohio [Mr. BROWN], and pending that I yield myself such time as I may require.

Mr. Speaker, as the reading of the rule indicates this is a rule making in order the consideration of the bill S. 2917, to establish a price support level for milk and butterfat. The rule provides for 1 hour of general debate and is an open rule. The bill will be explained when we go into the Committee of the Whole.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may use, and ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BROWN of Ohio. Mr. Speaker, as the gentleman from Mississippi has said, this resolution makes in order the consideration of the bill S. 2917, a bill which will change slightly the price supports for milk and butterfat for the period which will expire on March 31, 1961. The members of the Committee on Agriculture, from which this measure was reported, and I understand was unanimously reported, will of course explain in full the exact content and purpose of this measure.

Mr. Speaker, I have asked permission to speak out of order at this time so I may, as the oldest member of the Ohio Republican delegation, in point of service, at least, call the attention of the House to the fact that three very distinguished Members of this body, three very distinguished Ohioans, will leave the Congress voluntarily when the Speaker's gavel falls for the sine die adjournment of this session.

These three gentlemen I have mentioned include, first of all, a man who has served with great distinction 28 years in this House, Representative WILLIAM E. HESS, of the Second Congressional District of Ohio. Mr. HESS originally served, as you will recall, on the Committee on Military Affairs, and then later has served his country just as ably and well as a member of the important House Committee on Armed Services.

It has been my pleasure to know Representative HESS, BILL HESS, as we all know him and love him, since he was a small lad. His father, also named William E. Hess, was long one of the outstanding citizens of Ohio. He was one of my warmest personal friends, and

helped start me on my political career some 43 years ago.

BILL HESS, as a member of the Committee on Armed Services, has saved this country untold millions of dollars. Many of you will recall that as chairman, and as ranking member, of a special subcommittee investigating defense contracts and military spending he and his colleague, the gentleman from Louisiana [Mr. HÉBERT], working together exposed a great deal of waste and extravagance in military procurement, and brought about economies which saved millions, even hundreds of millions, of dollars of the taxpayers' money.

WILLIAM E. "BILL" HESS retires from Congress of his own volition, although the people of his own congressional district and those of us who have served with him here urged him to continue his service here. It will be difficult to fill his place in the Congress of the United States, or in the hearts of those of us who learned to know him and to love him for the real gentleman that he is, and always has been.

Then, Mr. Speaker, we will lose from this Congress, when the final gavel falls, another Ohioan, A. D. BAUMHART, JR.—DAVE, as we call him—from the 13th Congressional District of Ohio. He has served 8 years in the Congress of the United States. He was first elected to the 77th Congress, from which he resigned to enter the service of his country in the United States Navy, where he had a brilliant career as a naval officer and true patriot.

DAVE BAUMHART also served his party well in the State Republican organization of Ohio, and in the Republican National Committee here in Washington. He was, for a great while a member, and still is, a Member of the Committee on Merchant Marine and Fisheries, and also of the Committee on Space and Astronautics, where he has served ably and well. He is a man, as you all know, of charming personality and of great ability. He is in the prime of life. I am sure he will soon take an important place in the business and industrial life of our country. We all regret to see him make the decision, of his own volition, to retire from these legislative halls.

Then, Mr. Speaker, I call attention to the retirement of a third Member of our Ohio delegation, JOHN E. HENDERSON, of the 15th Congressional District, and of Cambridge, Ohio. JOHN E. HENDERSON, or "JACK," as we all know him, has served three terms in the House of Representatives. For a time, he was a member of the important Committee on Banking and Currency and, more recently, of course, has served with great distinction on the Committee on the Judiciary of the House. JOHN HENDERSON is a very able lawyer. He has a fine and wonderful family. We all regret that he has determined he should return to the private practice of law, rather than to continue his labors and service here in the Congress of the United States where he has served so ably and so well.

Mr. AVERY. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Kansas.

Mr. AVERY. Mr. Speaker, I thank the gentleman from Ohio for yielding. On this side of the aisle, and I am sure on both sides of the aisle, we will miss all the Members that the gentleman from Ohio [Mr. BROWN] has spoken of who will not return to the Congress next year.

Mr. Speaker, I would particularly want to pay tribute to our colleague of the Ohio delegation, JACK HENDERSON. JACK came to the Congress the same year I did, in the 84th Congress. We have been close friends both socially and legislatively since that time. The gentleman from Ohio remarked about Mr. HENDERSON retiring from the Congress to return to his native State of Ohio to practice law. Mr. Speaker, this is a departure from the usual proverb, on Capitol Hill that is the the only way to leave the Congress is to die or to be defeated. But here we have an outstanding young Member of the Congress who has performed yeoman service for his country and for his party, and by his own volition, he has elected to return to his native State of Ohio. Certainly, the great loss that will be sustained by the Congress, we hope, will be recaptured by his native State of Ohio.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. I am glad the gentleman from Ohio [Mr. BROWN] has taken this occasion to speak of these three Members, my colleagues in the House from the great State of Ohio, who are leaving this year from the Congress of the United States. Time does not permit me to speak of them individually, but I just want to say to each one of these colleagues who is retiring that my association with them through all the years has been most pleasant. They have been able, effective Members of the House of Representatives. They have been conscientious representatives of the people of their districts, of the great State of Ohio, and of the United States of America. I am sorry to see them leave, but upon their determination to leave, which seems to be final, I wish them the best in all the years to come.

Mr. BROWN of Ohio. I thank the minority leader very much and yield to the gentlewoman from Ohio [Mrs. BOLTON].

Mrs. BOLTON. Mr. Speaker, we Ohio Republicans are losing three of our most useful and beloved Members. Each has his own legitimate reasons for leaving this body, but we let them go very reluctantly. Indeed, our delegation will be longing for them in the succeeding sessions.

JOHN HENDERSON—Judiciary Committee—is a quiet fellow but such a firm, strong pillar of loyal Americanism. It is hard to part with him. Our loss will be his family's gain. His charming wife leaves her own mark on our delegation. May many years of joyous companionship be theirs.

DAVE BAUMHART—Merchant Marine and Fisheries, and Science and Astronautics—is another one of our stalwarts. In between his services here in this House he served us all through the Republican National Committee, and what an understanding person we always found him to be. But good luck to you in all you do, DAVE.

To me, to have BILL HESS—Armed Services—leave this body is a peculiarly poignant regret. He and his lovely wife were in and out of our home in the years when my good husband represented the 22d District of Ohio. In these 20 years of my incumbency he has been a tower of strength and a wonderful friend. We in the delegation will miss his stories, his guitar, and his songs. Here in the House we shall be wishing for his forceful, quiet opinions and his smiling sanity. To you and Stella, BILL, my warm and affectionate good wishes. May long years of satisfying memories and pleasant living lie ahead of you.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio [Mr. BETTS].

Mr. BETTS. Mr. Speaker, the State of Ohio is extremely unfortunate in losing the services of three of its Members of Congress, WILLIAM HESS, A. D. BAUMHART, Jr., and JOHN HENDERSON. Each of these men is retiring voluntarily after rendering distinguished service to their respective districts as well as to the Nation.

BILL HESS has been a respected and valuable member of the Armed Services Committee for many years and has contributed much to the solution of difficult and complex problems of defense.

DAVE BAUMHART, whose congressional career was interrupted by military service during World War II, has been an outstanding member of the Committee on Merchant Marine and Fisheries as well as the recently formed Committee on Science and Astronautics.

JOHN HENDERSON'S abilities while serving on the Banking and Currency and Judiciary Committees was recognized by his colleagues of both parties.

All of these men are capable public servants—admired and respected by everyone who has known and worked with them over the years. As one who has been a close personal friend of each of them, I want to express my affection for them as well as my sadness at their departure from Congress. I join all of our colleagues in wishing them the very best of everything in the future.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio [Mr. SCHERER].

Mr. SCHERER. Mr. Speaker, unfortunately, the Ohio delegation is losing three outstanding Members of the Congress who, for different reasons, have decided to retire. However, there may be others of us who, after the November 8 elections, will wish that we had followed their example and retired voluntarily. I am confident, however, that BILL HESS, DAVE BAUMHART, and JACK HENDERSON, because of the outstanding service they have rendered and the high esteem in which they are held by their constituents, would have been returned to the 87th Congress by overwhelming majorities had they decided to seek reelection.

While I have known DAVE BAUMHART and JACK HENDERSON since I came to the Congress, and there are no two finer men who ever served in this body, the Hess and Scherer families were friends and

neighbors before I was born. We lived on the same street in the same precinct.

No man had finer parents than BILL HESS. His father was a stalwart uncompromising Republican but one of the most universally liked men I ever had the privilege of knowing. I do not believe that I would be in the Congress of the United States if it were not for the late William Hess, Sr. It was he who encouraged me and gave me my first opportunity in political activity. BILL HESS has all of the same fine qualities, character, and personality as did his parents. He, too, is universally liked and respected, not only by the people of the Second Congressional District who have returned him to this Congress time and time again over the last 30 years but also by his colleagues in the Congress and the many friends he has made in all parts of the United States during his many years of outstanding, dedicated, and unselfish service to his country.

The districts which BILL HESS and I represent in the Congress include the greater Cincinnati area. In one sense it might be said that they overlap. This creates problems political and otherwise that sometimes are difficult to resolve. As I have said and acknowledged many times before, ever since I came to the Congress 8 years ago BILL HESS has been a tremendous help to me. In all that time there has not been a single instance of animosity or ill-will. There has not been one instance when problems and difficulties have not been resolved without rancor and with the utmost mutual understanding and respect. This has been possible because BILL HESS is the kind of a man his colleagues here in the House know him to be. For this relationship, I am deeply and profoundly grateful.

By BILL HESS' retirement not only the people of Cincinnati but the country are losing an able, dedicated, and conscientious Representative in the Congress of the United States.

I join with all of you in wishing BILL and his good wife Stella many years of a well-deserved and happy retirement.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio [Mr. MCCULLOCH].

Mr. MCCULLOCH. Mr. Speaker, Ohio will be without the able, effective, and experienced services in the next Congress, of three of its outstanding Members, who are voluntarily retiring.

WILLIAM E. HESS, dean of the Ohio delegation in years of service and chairman of the Republican delegation in the House was really a young Republican when he was first elected to Congress in 1928.

He came from a family schooled in public affairs and even before 1928 he had been off to the war and had had 4 years' service on the Cincinnati City Council.

He was the young friend and protege of the late great Nicholas Longworth, long-time Speaker of the U.S. House of Representatives. His work on the several committees on which he served was always most carefully done but his work on the old Naval Affairs Committee throughout World War II, and in the meantime, with the exception of 2 years when he was not a Member of Congress, as a member of the Committee on Armed Services, has been outstanding.

His calm and persuasive approach to some of the most difficult and important problems of our times will be remembered a long, long time.

A. D. BAUMHART, JR., is voluntarily leaving us, too. I have known DAVE favorably and well for almost a quarter of a century.

DAVE was a handsome young State senator when I was a member of the Ohio House of Representatives in the late thirties. He was an able State senator and was soon sent to the U.S. House of Representatives. Soon thereafter we were in World War II and DAVE resigned to enter the Navy where he served more than 50 months with courage and distinction.

He was again elected to the House in 1954, was the State and regional whip and he leaves a record of the best. We will sorely miss his able appraisal of the trend of the times, and the courage of his nonconformity with the majority, when his conscience so dictated. Do visit and advise us often.

And JOHN E. HENDERSON is voluntarily leaving us at the very beginning of what would have surely been a long and effective tenure in the House of Representatives.

He too was schooled in the general assembly of Ohio and his influence was felt from the very first meeting of his first committee.

Near the end of the 85th Congress he became a member of the House Committee on the Judiciary. His wide knowledge of the law, his logical and just thinking, along with his courage marked him as an able lawyer and a dependable legislator from the very first.

He will be sorely missed by every one of his colleagues on the Judiciary Committee and his district; his State and his Nation will miss his good services with the end of the 86th Congress.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio [Mr. BOW].

Mr. BOW. Mr. Speaker, I join with my colleagues in paying tribute to the three gentlemen from Ohio who are leaving Congress this year.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Ohio [Mr. SCHENCK].

Mr. SCHENCK. Mr. Speaker, I wish to associate myself with the very fine remarks about our colleagues who are retiring this year.

Mr. Speaker, it has been a great privilege and one for which I shall always be grateful to serve here in the Congress of the United States alongside some really great and stalwart Americans. I refer, of course, to many, but more especially my colleagues from the great State of Ohio.

Somehow, Mr. Speaker, the members of our Ohio delegation are really quite special and our association together has not only been really pleasant but my colleagues from Ohio have performed very outstanding service in the best interest of our entire Nation. Fortunately, members of the Ohio delegation have each been assigned to most of the major committees of the House. There is a spirit of close friendship and a willingness to help each other in every possible way.

Mr. Speaker, no Member of the House from the State of Ohio, to the best of my knowledge, has ever told another Member from Ohio how he should vote on any issue but to the contrary has always been willing to furnish any and all information possible to any colleague upon request. This has been extremely helpful to each of us many times and has enabled us to better understand the measures recommended by the various legislative committees.

Mr. Speaker, three of the very valuable and highly respected Members of the House from the State of Ohio are voluntarily retiring this year. I refer, of course, to the Honorable WILLIAM HESS, the Honorable DAVE BAUMHART, and the Honorable JOHN HENDERSON. It has been a real privilege and honor to serve with them. We shall miss each and every one of them. Not only because they are strong and great legislators who have always placed the good of our Nation first in their thinking, their actions, and their decisions, but they have also been understanding and true friends to each of us.

Mr. Speaker, I shall miss them very much personally. I want to express to each of them my deep personal appreciation for their friendship and to express the very sincere hope that each of them and their families have many more happy, healthful, and fruitful years.

Mr. BROWN of Ohio. Mr. Speaker, I yield to the gentleman from Illinois [Mr. ALLEN].

Mr. ALLEN. Mr. Speaker, I wish to join the many friends of BILL HESS, JOHN HENDERSON, and DAVE BAUMHART. They are all men possessed of ability and imagination. All three have been industrious and accomplished a great deal of good for their districts, the States, and the Nation. We shall miss them, but we wish them continued success in whatever fields they enter upon their retirement.

Mr. COOK. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. COOK. I, as a Democratic Member, am glad to join my colleagues on the other side of the aisle in paying well-deserved tribute to these three colleagues from Ohio who are leaving. I wish them well throughout the future. I am sorry to see them leave—in a certain sense, at least.

Mr. HECHLER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield.

Mr. HECHLER. Mr. Speaker, coming from the neighboring State of West Virginia across the river from Ohio, I would like to join with my good and able friend [Mr. BROWN], in paying tribute to our three retiring colleagues from the Buckeye State—Representatives HESS, BAUMHART, and HENDERSON. DAVE BAUMHART served with me on the House Committee on Science and Astronautics, and helped us write the record which resulted in the choice of this group as the Committee of the Year by nationally syndicated columnist Holmes Alexander.

I would like to speak a particular word or two about JOHN HENDERSON. Not only does he represent the congressional district directly across the Ohio River from the northern section of my own West Virginia district, but his office for the past 2 years has been directly across the hall from mine. I would like to thank JOHN HENDERSON and his fine staff for all of the help which they have given me and my own staff. I recall the first day I came to the Old House Office Building, before my own office was open or available, and I stumbled into JOHN HENDERSON'S office. There I was warmly greeted by Representative HENDERSON'S top assistant, L. Vincent Monzel, who gave me office space until such time as I could get settled in my own office. It was one of those fine gestures of courtesy which one always associates with Congressman HENDERSON'S staff personnel.

Yes, Mr. Speaker, we shall miss these fine members in the years to come, and I hope the gentleman from Ohio [Mr. BROWN] will allow me to make the observation that I trust I shall be here in this body next January to greet their successors.

Mr. BROWN of Ohio. Mr. Speaker, I believe the many statements we have heard from various Members of the House testify to the love and affection we all hold for the three retiring Members from Ohio, BILL HESS, DAVE BAUMHART, and JACK HENDERSON.

I believe that I express the wish of each and every one of us when I say, godspeed to all of you, may you have good health and many long years of happy and successful life.

Mr. MINSHALL. Mr. Speaker, I am delighted to have this opportunity to have a few minutes to pay tribute to our three distinguished colleagues, BILL HESS, DAVE BAUMHART, and JACK HENDERSON, who are retiring from the Congress. Delighted as I am to have this oportunity to say a few words, it is not without a deeper feeling of such sadness and regret at losing from our daily midst three wonderful friends.

Mr. Speaker, the House of Representatives will suffer a serious loss in their retirement. Not only their respective congressional districts, but all America will lose valuable public servants, men whose dedication to their country's welfare has always been foremost. The plaudits that one could say about any one of these fine gentlemen would fill many pages of this RECORD. Each possesses many wonderful attributes and exemplary qualities that words cannot adequately describe.

Mr. Speaker, we are proud of our Ohio Republican delegation in the Congress. It possesses an esprit de corps of which we are all justly proud. Our delegation meetings are punctuated with goodhearted joking and raillery. We have a motto in our delegation, "When you've got a man down, kick him." We have all had our share of kicks and will miss having these three distinguished Congressmen around to be the recipients of our motto, but wish them godspeed and the best of luck in their future endeavors.

Mr. FEIGHAN. Mr. Speaker, my colleague JOHN HENDERSON has decided to retire from Congress and return to the practice of law in Ohio. Although I well understand the many personal problems which beset one with growing children, who has to live most of his life away from home, I am sorry to see JOHN HENDERSON leave the Congress. It is my hope that he will enjoy the rewards which his diligence merits. I have enjoyed his friendship and I extend my best wishes to him and his family.

Mr. Speaker, the 13th District of Ohio has been well represented by my colleague and good friend, DAVE BAUMHART, who has decided to pursue a career in private industry. DAVE and I served together in the Ohio State Legislature many years ago and I have enjoyed his friendship over a long period of time. He is a gentleman of integrity, exceptional ability, and friendly personality. DAVE BAUMHART has always carried the best interests of his constituents close to his heart and he has served them with fidelity and loyalty. As my colleague and friend leaves the Halls of Congress to reenter private industry, he has my best wishes for happiness, good health, and many years of success.

Mr. Speaker, the decision of my able and distinguished colleague, WILLIAM E. HESS, to retire from Congress will be regretted by many of his colleagues. He has enjoyed conspicuous success and is a gentleman of complete good will even to those opposing his viewpoints. As BILL turns to the tranquillity of private life, I express for him the high regard in which I hold him. Many deserving words of praise have been said of our able colleague, who has been a conscientious legislator, and who leaves many warm friends in Congress. I am sure BILL HESS will take with him the kind thoughts and good wishes of his colleagues, and I am happy to add mine to those already expressed.

GENERAL LEAVE TO EXTEND

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the public service of Mr. HESS, Mr. BAUMHART, and Mr. HENDERSON.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

INCREASING DAIRY PRICE SUPPORTS

Mr. BENTLEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BENTLEY. Mr. Speaker, I should like to include and make a part of the CONGRESSIONAL RECORD the following letter which I received from the Michigan Milk Producers Association, signed by Glenn Lake, president:

MICHIGAN MILK PRODUCERS ASSOCIATION,
Detroit, Mich., August 24, 1960.

The Honorable ALVIN M. BENTLEY,
House Office Building,
Washington, D.C.

DEAR MR. BENTLEY: On August 19, the Senate passed bill S. 2917 to increase dairy price supports for the balance of this marketing year from the present $3.06 to $3.22 per hundredweight for manufacturing milk. A companion bill, H.R. 12238, is now before the House Agricultural Committee.

In urging your support of H.R. 12238, we wish to call your attention to the following facts:

1. For a number of years dairy farmers have been the victims of rapidly rising costs and lower milk prices.

2. Lower milk prices paid to farmers have not brought about a reduction in milk production. From 1952–59 minimum price supports have been reduced from $3.74 to $3.06. In 1952 dairy farmers marketed 97.7 billion pounds of milk for total cash receipts of $4.6 billion. In 1959 dairy farmers were compelled to market 112.6 billion pounds in order to get the same $4.6 billion cash receipts.

3. While prices paid to dairy farmers have been forced down, prices to consumers have gone up. In 1954 the national average retail price for a quart of milk was 22.5 cents—in 1959 it was 24.9 cents, an increase of $1.104 per hundred pounds to the consumer, while price supports to dairy farmers were reduced $0.68 per hundredweight.

4. Increasing support levels to $3.22 would cost the Government only 3.5 million additional dollars for the same amount of dairy products as purchased by the CCC last year. However, this would mean an additional $180 million to the Nation's dairy farmers, $8 million to Michigan.

For these and other reasons we urge you to request the Agricultural Committee to report the bill out and we earnestly solicit your favorable support on passage of the bill.

Sincerely yours,

GLENN LAKE,
President.

Mr. COLMER. Mr. Speaker, I move the previous question.

The previous question was ordered.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 201]

Alger	Forrester	Miller, N.Y.
Anderson, Mont.	Grant	Mitchell
Ashmore	Green, Oreg.	Moore
Auchincloss	Hargis	Murray
Ayres	Hays	Powell
Barden	Hébert	Preston
Baumhart	Hess	Rains
Bolling	Holifield	Riley
Brooks, La.	Irwin	Rogers, Colo.
Buckley	Jackson	Rogers, Mass.
Canfield	Johnson, Md.	Shipley
Cederberg	Kilburn	Sikes
Celler	Kluczynski	Sisk
Chamberlain	Lafore	Smith, Kans.
Davis, Tenn.	Landrum	Springer
Dawson	Lipscomb	Taylor, N.Y.
Diggs	Loser	Thompson, La.
Dooley	McDowell	Thompson, N.J.
Doyle	McSween	Udall
Durham	Macdonald	Vinson
Evins	Machrowicz	Whitener
Fogarty	Magnuson	Willis
Ford	Martin	Wilson
	Mason	Withrow

The SPEAKER. On this rollcall, 359 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PRICE SUPPORT FOR MILK AND BUTTERFAT

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. COOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 2917) to establish a price-support level for milk and butterfat.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill S. 2917, with Mr. KEOGH in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from North Carolina [Mr. COOLEY] will be recognized for 30 minutes and the gentleman from Ohio [Mr. HOEVEN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina [Mr. COOLEY].

GENERAL LEAVE TO EXTEND

Mr. COOLEY. Mr. Chairman, I ask unanimous consent that all Members desiring to do so may extend their remarks in the RECORD at this point.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. McGOVERN. Mr. Chairman, as the House sponsor of the measure before us, I hope that the House will speedily adopt this bill. It is designed to stabilize dairy prices so that our farmers can be spared a drop in prices for the balance of this marketing year.

This is not an unreasonable bill. It sets price supports on manufacturing milk at $3.22 per hundredweight instead of the present $3.06. It sets the price level on butterfat at 59.6 cents per pound instead of the present 56.6 cents.

Actually the price support levels proposed in this bill represent the average market prices of the past marketing year. The legislation will simply make certain that a price drop does not happen for the balance of the marketing year.

During the hearing before the Rules Committee on our dairy bill yesterday, the gentleman from Massachusetts [Mr. O'NEILL] asked me if this bill would raise milk prices to consumers. I pointed out to him that milk producers today are receiving 18 percent less than they were in 1952. Yet, consumers are paying 5 cents a quart more. In other words, there is very little relationship between the prices farmers receive and the prices paid by consumers.

Mr. Chairman, few people work as hard as our dairy farmers do for so little income. Furthermore, the costs of operating a dairy farm are one-third higher today than they were 10 years ago.

Let us pass this modest effort to protect our dairy farmers. It is not a solution to the farm problem, but it is a worthwhile step related to one commodity.

What is needed is a comprehensive family farm income bill of the kind some of us fought to have passed throughout this congressional session. We were fought every step of the way by all the power and propaganda the administration and the Department of Agriculture could muster.

Mr. Benson has instructed the President to veto five major bills passed by the Congress in the last 5 years. The President vetoed comprehensive legislation to set price support levels at 90 percent of parity in 1956. He vetoed a milk price support bill in 1957 that would have set support levels at $3.25 per hundredweight. He vetoed a bill in 1958 to prevent farm prices from falling below 1957 levels. He vetoed the 90 percent parity wheat bill in 1959.

Now, Mr. Benson is opposed even to this bill that simply holds dairy prices from falling below average market prices. If we pass this bill and the President signs it, that will be the kind of clear-cut repudiation of Mr. Benson by both the Congress and the White House that is long overdue.

Mr. KASTENMEIER. Mr. Chairman, I rise in support of the bill, S. 2917, as passed by the Senate and reported by the House Committee on Agriculture. I am a sponsor of a similar bill, H.R. 12364.

The announced support prices for the 1959–60 marketing year are $3.06 a hundredweight for manufacturing milk and 56.6 cents a pound for butterfat. These prices are 77 percent of the parity equivalent as of the beginning of the marketing year.

The average prices received by farmers for the previous marketing year, ended March 31, 1960, were $3.23 for manufacturing milk and 59.5 cents for butterfat.

This average can give us little comfort, because many farmers actually received only the farm lower support price paid by the Government. In fact, nearly 10 percent of the nonfat milk solids marketed by farmers during the year were bought by the Government at its low prices. During the 1959–60 marketing year the Commodity Credit Corporation purchased 136 million pounds of butter and 50 million pounds of cheese. The Agriculture Department also purchased 857 million pounds of nonfat dry milk. Additional purchases of milk were made to supply the school milk programs and the military. Clearly a substantial number of farmers received only 77 percent of the parity price for their production.

Under this administration the dairy farmer has been caught with rising costs and decreasing returns for his efforts. Farm income has dropped almost 25 percent while the cost of living has risen 6 percent during the past 8 years.

This price situation is having a long-range effect on American farming which could be disastrous to our future food supply. Recent 1960 agriculture census figures provided me by the Department of Commerce demonstrates my point.

For example, the figures for Dodge County, a dairy producing county, as is my entire district, show that the total number of farms decreased from 3,954 in 1954 to 3,641 in 1959 and the number of milk cows decreased from 73,002 to 70,524 over the same period. Dane County farms decreased from 5,094 to 4,614 in number, Jefferson County from 2,782 to 2,414, Columbia from 2,615 to 2,309 and Waukesha County from 2,669 to 1,883 in number over the 5-year period. The population of milk cows decreased in Dane County from 87,967 in 1954 to 83,963, in Jefferson County from 42,814 in 1954 to 38,756 in 1959, in Columbia County from 29,642 in 1954 to 27,392 in 1959 and in Waukesha County from 35,744 to 25,978 during the 5-year period.

This clearly demonstrates a trend away from the farm. The cost-price squeeze is driving people away from the farm. This not only causes the uprooted farmer the economic hardship of leaving his calling to learn another trade or business, but it also has serious repercussions in the small towns where the merchants see their customers leaving the farm to live, work, and shop in the city.

I also want to call your attention to the warning signal provided by the statistics showing that our average farm population is growing older. For example, the average age of Dodge County farmers rose from 46.4 to 47.3 years of age between 1954 and 1959. This reflects the fact that young people are not going into farming. There is no future for the young man raised on the farm to stay on the farm and take over when his father has to retire. The return for his effort is too small. When this generation of farmers is gone the United States will be hard put to find the know-how necessary to keep the Nation's and the world's granaries and food bins filled.

Similar statistics can be cited for each of the other four counties in my district and, I am sure, for other areas across the Nation.

This is what we are concerned with in considering this measure to increase support levels to approximate the average prices received by the farmer over the past year. We can and must act now to stop the tide carrying farmers away from the land. In the years ahead we will need an adequate and continuing supply of dairy products to meet all domestic needs and the needs of the food for peace program in crucial areas abroad.

This bill will provide the dairy farmer with a slightly better return for his efforts and also will serve as a floor to prevent his prices from slipping further during this marketing year.

I urge you to vote in favor of this bill.

Mr. FOGARTY. Mr. Chairman, I rise in objection to this bill and hope that it will nct pass. I will vote against the bill. As I understand the situation at the present time is this:

First. Price support 75 percent parity or about $3.05 per 100 pounds.

Second. Market price about $3.25 per 100 pounds.

Third. Small volume of dairy products going into CCC stocks.

Fourth. Market is strong for milk and dairy products.

Fifth. The feed milk ration is favorable.

If this legislation is enacted my understanding is that the future situation will be as follows:

First. Price supports will be increased to about $3.22 per 100 pounds up to about market.

Second. The support price will cause increased stocks to go to CCC, thus increasing cost of farm program.

Third. It will mean very little to dairy farmers but will be a windfall to processors who happen to have stocks of butter, cheese and dried milk, and other products.

This is a poor time, with conditions as good as they are under the present situation to be monkeying with the farm program. As I understand it, if this bill passes, this is what will happen.

This is bad legislation. It is not good for the farmer and I am sure it will cost the consumers more and also will raise the cost of the farm program by millions of dollars as far as the Federal Government is concerned.

Mr. STRATTON. Mr. Chairman, I rise in support of this legislation to increase the support price for milk. I am delighted to see this Congress take action which recognizes the need of our dairy farmers. I have the honor to represent one of the most important dairy farming districts in the Nation, the 32d of New York. Dairy farming is today the single most important business in the great industrial State of New York.

Yet, for months, Mr. Chairman, I have been wondering whether, when we talk about farming and the farmers, we have not been forgetting about the dairy farmers of upstate New York. We have been anxious to raise the price of grains, which only serve as added costs to the dairy farmer. And while this has been going on, the income of the New York State dairy farmer has been steadily going down. According to a report recently issued in my State, and confirmed by the Department of Agriculture in a letter to me, the blend price of fluid milk in the New York milk marketing order area is expected to drop by some 19 cents per hundredweight below the price paid to farmers in 1959. I think it may well prove, judging by the way events are moving, that the ultimate price paid to our farmers will be even less than that before the year is out.

Needless to say, such a drop spells real trouble for our dairy farmers. Action must certainly be taken to help the dairy farmers, and it should be taken quickly.

This bill is a step in the right direction. It raises the floor under milk prices at a most critical time. I am hopeful that by passing this legislation we may set in motion a chain that will arrest the current skid of milk prices in New York State and begin to secure some measure of justice for our dairy farmers. We must set the price of milk back up where it will begin to cover the farmer's costs of production. This we must do promptly.

I therefore am glad to join in support of the bill and urge its adoption by a substantial majority.

Mr. WOLF. Mr. Chairman, I am supporting this bill. I would like to submit my statement before the Dairy Subcommittee, Committee on Agriculture, House of Representatives, Washington, D.C., June 8, 1960, in support of this bill:

Mr. Chairman, I am honored to appear before your subcommittee in behalf of my bill (H.R. 12394) to benefit Iowa milk producers by increasing the support price of manufacturing milk to $3.25 per hundredweight and butterfat to 59.6 cents per pound. At the present time, milk is supported at $3.06 per hundredweight and butterfat at 56.6 cents a pound, which is 77 percent of parity. I would like to see dairy supports returned to the 90 percent of parity level, and feel that dairy farmers are entitled to this support price, but agree with many of my colleagues that it is not realistic to press for that figure at this time.

Our dairy farmers cannot continue in business when their income has dropped almost 25 percent and their cost of family living items has gone up 6 percent during the last 8 years. An adequate supply of dairy products for domestic and foreign needs is jeopardized as more and more dairy farmers are caught in the cost-price squeeze and are forced out of business.

Dairy farmers and processors make an important contribution to our national economy, and they deserve a fair return on their investment and labor. In many areas today, dairy farm families are required to labor 3,300 hours each year to earn 56 cents an hour on an investment of $32,000 in plant and equipment.

It is significant to state, Mr. Chairman, that the census recently taken in Iowa showed that the small towns and rural areas are losing population very rapidly. The stability of these communities in my district, as in many others, hinges very much on the economic well-being of the dairy farmer because the dairy farmer produces the monthly milk check or cream check, and the protection of his investment in plant requires constant improvement or repair.

While the retail price of milk has been increasing, the farmer's share of the retail price has been decreasing. In 1952 the farmer's share of the retail price was 51 percent. In 1959 it was only 43 percent, a decrease of 8 percent during the 7-year period.

In 1959 an urban worker's family of three paid $195 for the same quantity of dairy products—milk, butter, cheese, and ice cream—that it bought in 1952 for $191. But farmers in 1952 received $100 for these dairy products as compared with only $88 in 1959. Processors and distributors, however, increased their take for their services from $90 in 1952 to $107 in 1959.

The dairy industry is made up of some 1,200,000 farmers and over 10,200 creameries, milk-drying plants, condenseries and other processing and distribution firms. The dairy plants employ more than 250,000 workers and carry an annual payroll of over $500 million.

I believe that the small increase in support levels provided for in my bill would enable many of our dairy farmers to remain in business by providing a realistic floor to dairy income, and thereby assure the production of sufficient dairy products to meet domestic and foreign needs. It has been shown that the support level of manufacturing milk prices and fluid milk prices fall very closely along with each other; when one goes down, they all go down, when one goes up they all go up.

Our dairy farms carry a tremendous potential for good will in this tension-torn world. CARE packages have given a new lease on life to countless people in the free world; and milk has been introduced to schoolchildren in many foreign countries through the school milk programs carried out under Public Law 480. However, we have made only a beginning in sharing our food with the underprivileged people abroad.

In our own country we still have citizens who are inadequately fed to whom a greater distribution of dairy products should be made.

Another factor which we must consider is that the public is constantly demanding higher quality milk and dairy products—greater cleanliness and better flavor. Today, therefore, the dairy farmer attends schools, learning what diets to feed his cows so that the production will have the best flavor. Disease which used to be spread through the use of dairy products has been practically eliminated. All of this means that our dairy farmers have to make higher and higher investments and incur greater and greater costs of production.

It has been estimated that to maintain America's high standard diet, our dairy farmers by 1975 must produce 48 percent more dairy products than they are producing now.

To enable our dairy farmers to meet the higher costs of living and of production, to insure the continuance of a strong dairy industry, and to assure the production of enough dairy products to meet domestic and foreign needs, Mr. Chairman, I believe that the small increase in the support price for manufacturing milk called for in my bill is essential, and I hope that this subcommittee will see fit to report this legislation to the full committee.

Mr. Chairman, I hope the bill will pass and be signed by the President.

Mrs. PFOST. Mr. Chairman, I heartily endorse this legislation which would give security to the Nation's dairy farmers. I am proud to say that I introduced a bill, H.R. 3349, in January of 1959, practically identical to the one now being debated here on the floor today.

Dairying is one of the basic industries of Idaho and it forms a small but highly important part of the Nation's agricultural economy.

While I was in Idaho earlier this month, I was able to visit with a number of dairy farmers in the First Congressional District. Some of them were doing well, but the great bulk of them—mostly the small operators, who are the backbone of the industry—were caught in the same cost-price squeeze that has been draining the American farmer everywhere.

The prices these dairy farmers are receiving for their products in the marketplace are, relatively speaking, very low. The dairy farmer has had good years but I can say emphatically this is not one of them. While he has been getting these low prices, the cost of operating his farm and of feeding and clothing his family has increased many times over. In the end, and I have seen it happen all too often, he is forced to leave the land—to sell his farm and go to the city to compete there in an ever-dwindling job market.

I think the dairy farmers in Idaho and in the Nation deserve a fair shake. We can take a big step forward in helping them by passing this legislation which provides support prices on milk for manufacturing purposes at $3.25 per hundredweight and 58.6 cents per pound for butterfat.

We must not adjourn tonight without adopting this measure. I hope that next January there will be other, constructive legislation relating to our dairy farmers which can be debated more carefully, earlier in the session. I hope such new legislation will go even farther in alleviating the conditions which now trouble the industry. I urge all of the members, therefore, to support the bill now under

debate which would raise the basic support prices for milk and butterfat to a more realistic level, one more in tune with the economy.

Mr. COAD. Mr. Chairman, on this last day of the session we are considering a farm bill which will give some assistance in helping the farmers who need assistance so desperately. This bill will raise dairy price supports from $3.06 to $3.22 per hundredweight. This level of price support serves to raise the floor under the market for the market price of milk is presently higher than this figure. However, this will effectively raise the floor level and in this manner serve to stabilize the dairy industry at a higher price level and for this urgent reason this bill should be enacted.

Mr. Chairman, the farm situation is so critical in the Midwest that farm auctioneers are already booked up months ahead. They are going to sell out the family farmers who have struggled so valiantly against the harsh economics of increasing production at lower prices. This philosophy which has been espoused and practiced by the Republican administration has brought economic ruin to many of our farm people. This I say is cruel treatment to some of the finest of American citizens. I am told that in some communities up to 25 percent of the family farmers are going to be liquidated. This is a great tragedy. It is a useless and a needless tragedy. It need not have happened and it should not have happened.

Mr. Chairman, it is my sincere hope that Preisdent Eisenhower will sign this bill. It is the last opportunity the President has to redeem, if in such a small way, the glowing campaign promises which he made while a candidate for office in 1952. In 1952 Mr. Eisenhower promised 100 percent of parity in the marketplace by pledging himself to the continuation of the 90 percent supports. We know that during the eight sessions of the Congress Mr. Eisenhower has never lived up to any of the promises he made to the farmers of America. But now, as one of his last official acts of signing farm legislation he has this opportunity of doing a little for the American farmers who are engaged in dairying.

But if Mr. Eisenhower vetoes this bill, as he has vetoed five other farm bills, he will have a record of 100 percent against our farmers. It will prove that what he said earlier this year about relaxing his demands on farm legislation were just so many words spoken in the arena of politics.

Mr. Chairman, our farmers cannot afford the luxury of having their livelihoods cast about as the whim of politics may choose. Our farmers need assistance. They need assistance in balancing production at a fair price so that their families can live as first-class citizens. It is not fair that the American people should expect the farmers of our land to subsidize the grocery bill forever. The American farmer deserves the best, but he has been receiving only crumbs. By passing this bill and by the President signing this bill will be a step in the right direction.

Mr. COOLEY. Mr. Chairman, I yield 4 minutes to the gentleman from Wisconsin [Mr. JOHNSON], the chairman of our Subcommittee on Dairy and Poultry.

Mr. JOHNSON of Wisconsin. Mr. Chairman, I am very glad the House will have the opportunity to vote today on S. 2917, to raise the support price for milk for manufacturing purposes to $3.22 per hundredweight and for butter to 59.6 cents per pound. The present floor under dairy products is $3.06 per hundredweight for milk and butter at 56.6 cents a pound.

I was delighted to see the bipartisan support given the bill when it was introduced, debated, and passed in the Senate. The Senate bill was introduced by my Wisconsin colleague, Senator WILLIAM PROXMIRE, and was cosponsored by the ranking Republican member of the Senate Agriculture Committee, Senator AIKEN, of Vermont. The following Senators also cosponsored the bill: Senator YOUNG and Senator BURDICK, of North Dakota; Senator MUNDT, of South Dakota; Senatory KENNEDY, of Massachusetts; Senator HUMPHREY and Senator MCCARTHY, of Minnesota; Senator SYMINGTON and Senator HENNINGS, of Missouri; Senator MAGNUSON and Senator JACKSON, of Washington; Senator PROUTY, of Vermont; Senator MORSE, of Oregon; Senator CARLSON, of Kansas; Senator MCNAMARA, of Michigan; and Senator WILEY, of Wisconsin. These 18 Senators represent 10 States from the Atlantic to the Pacific.

In the House, a similar bill was introduced by me, and by the following Congressmen: HOGAN, of Indiana; KASTENMEIER and FLYNN, of Wisconsin; WOLF, of Iowa; and BREEDING, of Kansas. In addition, last session similar bills were introduced by Congresswoman PFOST, of Idaho; Congressmen REES of Kansas, and MCGOVERN, of South Dakota.

This is not a sectional bill, nor is it a one-party bill. It benefits all parts of the country and is advocated by Democrats and Republicans alike. The names of its sponsors show that. I also say in all sincerity that this bill, if enacted, will benefit our entire Nation and the free world abroad in helping assure an adequate supply of healthful, nutritious dairy products. We want to make certain that our own schoolchildren, many of whom are returning to their desks this week, will have a steady supply of milk, butter, and cheese under the school lunch programs. We want to assure our unfortunate needy at home that they can count on these nutritious foods in their diets on a year-round basis. They are not getting that now.

In addition to the people of this country who need more milk and dairy products, there are starving people around the world, with no dairy products. They die of malnutrition; they die of diseases caused by inadequate food. If we do not help them, many of these people will die or they will be forced to turn to Communist countries for assistance. That is what we mean by "food for peace."

Communist victories resulting from the U–2 incident, the summit breakup, the Cuban revolution, the overthrow of governments in Africa and Asia—all these are headline news. These problems are complicated and difficult to solve. But the strongest protests we received resulted not from these world-shaking events, but from the cutbacks in the availability of powdered milk last fall. The ambassadors of the United States to 92 countries protested. State departments of education and welfare from all parts of this country protested. The voluntary agencies, primarily religious groups, protested against cutbacks of nonfat dry milk to the people of this country and to the people of abroad. By the simple method of raising the price supports to a specified level which will stay the same throughout the season, we can prevent these cutbacks and we can assure an adequate supply of milk and dairy products to meet the most urgent needs in our States, in our armed services, wherever they may be, and among the freedom hungry people whose friendship we must have to survive against Communist competition.

The price supports provided in S. 2917 are exactly the same as the average actual market price received by farmers for the entire 1959–60 marketing year. This bill simply guarantees the dairy farmers a higher floor on a year-round basis and assures minimum supply requirements with little or no added cost to either the consumer or the taxpayer. There need be no additional cost to the taxpayer because the milk and dairy products can be moved quickly from dairy plants to consumers without expensive storage costs. There need be no additional cost to consumers because the national level of prices to the farmers are approaching the price support level which this bill would provide for a year-round basis. What this bill will do, in effect, is to stabilize the price to the farmer from day to day and month to month on a year-round basis.

In this way the farmer knows what he can count on, in and out of season, just as the minimum wage legislation puts a year-round floor under salaries and wages.

Personally, I would like to see dairy farmers receive considerably higher prices and income. The reason this bill does not ask for that is the time element. We offer for your approval today a level of dairy price supports which is so moderate that it should not result in added taxes or added prices to consumers. Its twin purposes are to assure the farmers of a definite dollars-and-cents minimum price and to assure the Nation that we will have enough dairy products to meet our most urgent needs in all of the 50 States and in the most crucial parts of the world.

In view of the modest and simple nature of the bill, in view of the bipartisan support it has received in Congress, and in view of the speed and unchallenged voice vote with which this bill passed the Senate, I now urge the Members of the House to vote for the adoption of the identical text of the measure as approved by the Senate without any amendments, so we can send the bill to the President immediately.

Mr. HOEVEN. Mr. Chairman, I rise in support of the bill S. 2917, which is temporary legislation. It only estab-

lishes the support level for manufacturing milk and butterfat at approximately present market levels for the remainder of the milk marketing year ending March 31, 1961. The average price received by farmers for the marketing year ending March 31, 1960, was $3.23 for manufacturing milk and 59.5 cents for butterfat. The bill would tend to stabilize prices at about this level by establishing the support price at $3.22 and 59.6 cents for manufacturing milk and butterfat, respectively; thus preventing the possibility of a price decline which, in view of cost increases since April 1, 1958, would present a different problem to dairy farmers.

The Department of Agriculture is opposed to the bill contending that it is not advisable to fix by law a specific support price for a particular marketing year without regard to current production and consumption conditions. There may be some merit in this contention, but the fact remains that our entire farm population, including the dairy farmer, are in a tough price-cost squeeze at the present time. We all know that farm income has been declining while the costs of farm operations continue to rise.

Representing a great agricultural district, I want to vote for legislation which will protect the farmer's income whenever I have an opportunity to do so. The American farmer is entitled to his fair share of the national income and I shall continue to do my part in affording him that fair share to the best of my ability. Hence I fully support S. 2917.

Mr. HOEVEN. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. PIRNIE].

Mr. PIRNIE. Mr. Chairman, I rise in support of the pending measure and wish to associate myself with the remarks that the distinguished ranking minority member of the Committee on Agriculture made.

Mr. HOEVEN. Mr. Chairman, I yield such time as he may desire to the gentleman from Washington [Mr. WESTLAND].

Mr. WESTLAND. Mr. Chairman, I am very much interested in any program that could benefit the dairymen, and I believe S. 2917 will benefit not only the dairymen of my own congressional district, but will also benefit the dairy farmers of the Nation.

This is a simple and moderate piece of legislation. S. 2917 seeks to increase the basic support for manufacturing milk from the present $3.06 to $3.22 a hundredweight and to increase the basic support for butterfat from 56.6 to 59.6 cents.

The proposal would be effective only through the present marketing year. Its principal effect would be simply to prevent dairy prices from going lower than the market. It would mean an increase in the present income of dairymen and would prevent these dairymen from suffering further drops in their incomes.

The average price received by farmers during the past marketing year was $3.23 for manufacturing milk and 59.9 cents for butterfat. This bill would tend to stabilize prices at about this level and prevent the possibility of a price decline. Because the support level that would be established by this legislation is so near to the average price received by the farmers there would be little if any additional costs.

Mr. Chairman, let me quote from letters I have received during the past few weeks to show the problems the dairy farmers of my district face. One farmer wrote:

> There has been a squeeze put on the dairy farmer the past few years that is getting worse all the time. The cost of living and the cost of almost everything we buy has increased, but the price of milk is as low as ever.

From another letter I quote:

> As you know, the cost of producing milk has been going up for several years as has the cost of living, farm machinery, most of our feed supplies and all other equipment. In the meanwhile, the prices we get for our product has declined considerably during the past 8 years.

Another farmer wrote:

> I am writing you because I'm a dairy farmer and am having a very hard time paying our bills from the price of milk. The cost of operating our farm is so high.

These are a few examples of the hardships faced by dairymen in my district. I believe S. 2917 will help these dairy farmers in a small way to meet the economic squeeze they find themselves in today. It is for this reason I support this legislation.

Mr. HOEVEN. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Chairman, I confess I speak more in dismay over what is happening here, and more for the record, than in the hope of changing the outcome of the vote on this bill.

I have a deep conviction which I have often expressed that it will be impossible to solve our pressing and urgent farm problems unless we can somehow manage to keep politics out of farming.

Every Member present knows that we have gone so far in the direction of political intervention in agriculture that the main political effort is no longer directed toward the solution of the farmers' problems. It is aimed at achieving the maximum political benefit in partisan politics.

That is the tragedy and failure of this bill. It is politics, pure and simple. It is not aimed at the solution of the dairy problem. It is aimed at November 8. It is not aimed at the economic well-being of the dairy farmer. It is aimed at the dairy farmer's vote.

This bill was born in politics. It is brought forth here, in an atmosphere heavy with the politics of a presidential campaign, in a session where politics predominates, with all of the haste and confusion which characterizes political measures. No bill so conceived and so considered can bring lasting benefit to American farmers.

I trust Members will listen when I say that I know of no industry more complex, where the factors which enter into the price structure are so many and varied, than the milk industry. Yet this bill, if it has any meaning at all, puts the U.S. Congress squarely in the business of establishing dollar and cent levels of minimum milk prices. It puts Congress in that business, not when a calm study of the entire problem is possible, but at the tag end of an unprecedented session when the mind of every Member is directed toward the political campaign even now under way. It puts the Congress in the business of setting a price in a complex industry for political reasons and with the hope of political gain. The precedent we establish here today carries the promise of untold mischief for the future.

Moreover, while the political timing of this bill may be excellent, its economic timing is bad. Milk prices are now, more than ever before in our recent history, being set in a comparatively free market. There is competition for milk in numerous markets. Milk prices are above current support levels. This bill is political tinkering with a market which, if it needs anything, needs freedom from the heavy hand of a Congress bent on getting out of Washington at the earliest possible time.

Finally, this bill is meaningless as far as current prices to dairy farmers in the great producing areas are concerned. In Wisconsin, milk producers today are being paid in excess of the present support level. Even under this bill, the best estimate I have indicates that Wisconsin farmers are receiving more than 12 cents above the support level it provides. The only excuse for this bill is the expectation that it will convince the farmer that something is being done for him. It will not, however, affect his milk check.

I cannot support a meaningless bill. I cannot support a political gesture. I refuse to be party to legislation which can only place the farmer deeper and deeper in the mire of politics. I look toward the day when we can move in the other direction—away from political intervention and toward a real solution to the dairy and other farm problems.

Mr. COOLEY. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, the gentleman who has just addressed the House says he is amazed at the situation now confronting the House. I want to say to him that I am amazed that he should take the well of the House and indict so severely his own colleagues in both Houses of the Congress, charging them with playing politics in connection with this bill. I suppose the gentleman who addressed the House is up and above politics. If that was not a political speech that you have just heard, I have never heard one. What reason is there for you to indict the Republican members of the House Committee on Agriculture and the distinguished Senators who represent the gentleman's party in the other end of this Capitol by saying that they are playing politics with the welfare of the farmers of America? Are we playing politics when we bring out a bill here that puts a floor under the price that the farmers are now receiving? You have admitted that we are not increasing the farmer's check. The bill does not pretend to incease the farmer's check.

It only pretends to do what it says, to put a floor under the price. The gentleman has a perfect right to vote against this bill and tell the farmers that he is voting against this bill, but do not indict the whole membership of the House and the other body.

In opposing this bill the gentleman, of course, is again placing his stamp of approval upon the program of Ezra Taft Benson whose program will lead irresistably and inevitably to bankruptcy and ruin for the farmers of America. Go back to your district and tell your farmers that you are proud of Benson's record, which you have helped him to write. I think it will be a very difficult thing for you to do. You will have to sit down on the "tongues of all the wagons" of your district and explain to your farmers the record you have helped to write here in the Congress of our great country.

Mr. Chairman, I do not believe that any member of the House Committee on Agriculture is a political demagog nor do I believe that those who are supporting this bill are prompted by partisan politics. May I say to the gentleman from Wisconsin, perhaps your farmers will agree with the position you are here taking. That is their privilege. If the President signs this bill he will, from the White House, repudiate Mr. Benson and all that he stands for. If he does not sign it he will turn his back on all the dairy farmers of the country.

Mr. HOEVEN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. QUIE].

Mr. QUIE. Mr. Chairman, I am going to support this bill. It should not do much harm and it might do some good.

I heard it spoken so many times that this bill is not going to have any effect on producers dairy prices. Also we have heard that the farmers' prices are made in Washington, but somehow or other we find that the dairy farmers' prices are not made entirely in Washington. The support level is at 77 percent of parity, but the market price is considerably higher. So now we have to move support prices to the market level. This is not going to mean that everybody is going to get the support level, and, Mr. Chairman, I have a number of tables which will show you where each State stands in relation to the support level:

TABLE 1.—*Prices paid producers for milk of manufacturing grade, by States, 1959, compared with U.S. average prices and price-suppor levels for manufacturing milk*

State	Average price paid	Average test	Price per point of test	Price per hundredweight at U.S. average test	Deviation from U.S. average price	Deviation from U.S. support price [1]	Price per 3.5 test milk	Deviation from U.S. average price (3.5)	Deviation from U.S. support price at 3.5 [2]
New York	$2.99	3.84	$7.79	$2.94	−$0.23	−$0.12	$2.73	−$0.21	−*0.11
Ohio	3.32	3.97	8.36	3.16	−.01	+.10	2.93	−.01	+.09
Indiana	3.40	4.01	8.48	3.20	+.03	+.14	2.97	+.03	+.13
Illinois	3.21	3.73	9.60	3.25	+.08	+.19	3.01	+.07	+.17

Alabama	3.27	4.32	7.57	2.86	−.31	−.20	2.65	−.29	−.19
Mississippi	3.37	4.38	7.69	2.91	−.26	−.15	2.69	−.25	−.15
Arkansas	3.32	4.26	7.79	2.94	−.23	−.12	2.73	−.21	−.11
Oklahoma	3.36	4.09	8.22	3.11	−.06	+.05	2.88	−.06	+.04
Texas	3.39	4.30	7.88	2.98	−.19	−.08	2.76	−.18	−.08
Montana	2.86	3.80	7.53	2.85	−.32	−.21	2.64	−.30	−.20
Idaho	3.23	3.77	8.57	3.24	+.07	+.18	3.00	+.06	+.16
Wyoming	2.99	3.45	8.67	3.28	+.11	+.22	3.03	+.09	+.19
Colorado	3.10	3.71	8.36	3.16	−.01	+.10	2.93	−.01	+.09
Utah	3.04	3.64	8.35	3.16	−.01	+.10	2.92	−.02	+.08
Washington	3.10	4.24	7.31	2.76	−.41	−.30	2.56	−.38	−.28
Oregon	3.65	4.39	8.31	3.14	−.03	+.08	2.91	−.03	+.07
California	3.28	3.84	8.54	3.23	+.06	+.17	2.99	+.05	+.15
United States	3.17	3.78	8.39	3.17	0	0	2.94	0	(2.84)

[1] U.S. support price=$3.06 for U.S. average test milk.

[2] U.S. support for 3.5 percent milk=$3.06÷3.78=8.10×3.5=$2.84.

In Minnesota we are fortunate in receiving for manufactured milk 20 cents a hundred higher than the support level. There is only 1 State higher than that, Wyoming. But now let us look at the State of Washington. They receive 30 cents a hundred less than the support level. That means we are getting 50 cents a hundred more than the State of Washington. And, you can go down the line where Illinois is getting 19 cents more, Idaho 18, California 17, but then you go down to the State of New York it is 12 cents below the support level, and going down further into North Carolina it is 15 cents below the support level; Alabama 20 cents below the support level, Montana 21 cents below the support level, and Georgia 23 cents below the support level:

United States	59.1	0	0

Now, this is where the problem comes, and I think even though this bill is not going to hurt anything, we must be careful that we do not force the price of butter too high, because we can lose some markets.

Last year the price of butter went up a little bit and we lost markets to oleomargarine. But, lo and behold, when prices dropped a little bit we never got the market back again. So let us be sure that we do not force dairy farmers to lose their market for butterfat.

Referring again to these prices, Minnesota stands at the highest, paying 7.4 cents more than the support level. Tennessee is at the bottom. Kentucky is at 11.6 cents below the support level.

TABLE 4.—*Ranking of States in prices paid producers for butterfat in cream, 1959, as compared to U.S. average price and price support level for butterfat*

State	Price paid as compared to U.S. support level

Tennessee	−11.6

I should like also to point out how the parity equivalent of manufacturing milk is set. This is interesting and if we are to understand price supports on dairy products we should understand this, since the parity equivalent has been going down until this year. In "Agricultural Prices," January 1960, it states:

AGRICULTURAL PRICES, JANUARY 1960

PARITY

Current procedure for computing the parity equivalent for manufacturing milk as approved by the Secretary of Agriculture provides that (1) the parity equivalent for manufacturing milk shall be determined on the basis of the relation of (a) the average price received by farmers for all milk sold at wholesale to plants and dealers for the period July 1946 through the December preceding the date of computation to (b) the average price paid f.o.b. plant by processors for all milk sold by farmers for use in production of American cheese, evaporated milk, and butter and byproducts during the same period; (2) data for each year are to be added annually until 10 full calendar years are included in the comparison; (3) thereafter the parity equivalent during any calendar year will be determined on the basis of the relation between the averages of the respective series for the 10 calendar years immediately preceding.

The factor to be used during a particular calendar year is computed in January of that year using price data available at the date of computation. The factor to be used during 1960 is 80 percent, which compares with 80.2 percent during 1959. The parity price for all milk wholesale, $4.99 per hundredweight based on data for January 1960, multiplied by 80 percent, results in $3.99 per hundredweight, the parity equivalent for milk for manufacture based on data for January 1960. This parity equivalent applies to the national average price for all milk of average milkfat content used for the principal manufacturing purposes, calculated on an annual basis. It should be noted that the parity equivalent for milk for manufacturing is not in itself a parity price but rather is an administrative determination of an operating differential which is subject to revision as additional data become available or as experience indicates that the same purpose might better be achieved by calculating and applying revised differentials.

I shall not go any further with these statistics, but I invite Members to read them.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to my colleague, the gentleman from Pennsylvania [Mr. KEARNS].

Mr. KEARNS. Mr. Chairman, I want to say to my colleague that I admire his courage. He is a member of the Committee on Labor, with me. He still has his interest in labor problems as well as farm problems, and we appreciate so much what he has given to the Committee on Labor along with his interest in agriculture.

Mr. QUIE. I thank the gentleman. I wish we were as successful in getting $1.15 as a minimum wage as we are now in getting $3.22 for milk.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman.

Mr. PELLY. The gentleman referred to the situation in the State of Washington. I would like to ask, if this bill passes whether it will mean an increase in price to the milk consumers in my State of Washington.

Mr. QUIE. I do not think it will. The processor does not have to pay the support level, and I doubt that fluid milk prices in the State of Washington will be affected by this bill. I attempted to add an amendment which would have made each processor who sold to the Government certify that he paid the support level to the producer, but my amendment did not carry in the committee.

Here is my amendment:

Provided, That the lender upon or vendor of any milk, butterfat, and the products of such commodities shall certify that during the previous twelve-month period such lender or vendor has actually paid all producers from whom any such commodities were purchased not less than the support price established pursuant to this subsection.

The purpose of this amendment is to require that any handler selling to or obtaining loans upon manufactured milk products must pay the minimum support price to farmers from whom he obtained these commodities. In order to be eligible for CCC loans or purchases, the handler would be required to sign a certificate that he paid the minimum support price on all dairy products he purchased from farmers.

I am not going to offer it here because I think it will hamper the bill, since I understand this is the last day of the session. But the only way we are going to make sure the producer will get the support level is to put an amendment of this nature onto the bill.

Mr. HOEVEN. Mr. Chairman, I yield such time as he may require to the gentleman from Utah [Mr. DIXON].

Mr. DIXON. Mr. Chairman, provisions of S. 2917, Senate Report No. 1592, which would increase dairy price supports for the remainder of the current marketing year to $3.22 per hundredweight for manufacturing milk and 59.6 cents per pound for butterfat would tend to reverse the trend of recent years toward a more favorable balance between milk production and the consumption of dairy products.

First. Higher prices would increase milk production: Higher support prices would be a stimulus for increasing milk production. More reasonable supports have encouraged milk production to level off at around 125 billion pounds during the past 4 years. In the early fifties, under a high guaranteed support price, milk production shot upward creating the serious dairy surplus problem. High support prices set the stage for milk production to increase from 116.6 billion pounds in 1952 to 125.5 billion pounds in 1956. The market could not absorb this added production and it was taken off through purchases of dairy products under the support program.

Second. Higher support prices could reduce consumption, increase food costs: Higher support prices very likely would reverse gains that have been made in increasing the consumption of dairy products. This would result in substituting Government purchasing for consumer buying of dairy products. Butter which faces strong competition from

lower priced spreads could be seriously damaged.

Third. Higher support prices could increase Government purchases and costs: Overall dairy purchases under price support during the last 2 marketing years have gone down. Higher support prices bringing increased production and reduced consumption could push purchases up.

Even if purchases were not increased as a result of the dairy support increase, Government costs would go up $5 to $10 million on the basis of current purchasing levels because of higher purchase prices.

Fourth. Fixed support price by legislative action bad precedent: Fixing a specific level of dairy price support by law for a marketing year without regard to current production and consumption conditions is highly inadvisable. The law now requires the Secretary of Agriculture to support prices to producers for milk and butterfat at such level from 75 to 90 percent of parity. The law now leaves to the Secretary the determination of a support level within the authorized range that will accomplish the objectives of the act. The support prices of $3.06 for manufacturing milk and 56.6 cents per pound for butterfat—both reflecting about 77 percent of parity—for the current 1960–61 marketing year were set after taking into consideration the production and consumption pattern for the year.

Fifth. Cash receipts from milk and butterfat estimated record for 1960: At current support levels, estimates are that cash receipts from farm sales of milk and butterfat in 1960 will reach $4.7 billion, the highest on record.

Sixth. Increased Government activity robs free market interplay: With reduced purchases of dairy products by Government under support, the market operates more freely in performing various functions of storage, pricing, and inventory holding. Any increase in Government activity through larger purchasing tends to rob the market of these functions and destroy prices.

Seventh. Other crops would like a guarantee of 80½ percent of parity.

I am privileged to include a statement from our Secretary of Agriculture:

STATEMENT BY SECRETARY OF AGRICULTURE EZRA TAFT BENSON, AUGUST 6, 1960

S. 2917 to arbitrarily raise dairy supports is based on political expedience and not sound economics. Since adjusting price supports to more realistic levels in 1954, the industry has been moving steadily forward to a balanced position which will make 1960 the best year in history for dairying. Farmers are now getting 85 percent of parity for all milk.

This legislation is a step backward. If enacted it will lose market for farmers, increase prices to consumers and pile up surpluses in Government warehouses at heavy costs to farmers and other taxpayers.

It is inconceivable that legislation would be sponsored to repeat the price-depressing buildup of surplus from which we have just emerged. Congress should quit tinkering with the dairy industry.

S. 2917 should, in the best interests of farmers and the entire dairy industry be decisively defeated.

FACTS REGARDING PROPOSED INCREASE FOR DAIRY PRICE SUPPORTS

First. Cash receipts for the current marketing year are expected to be the highest on record—$4.7 billion. This improvement in the dairy situation is a reflection of many constructive factors.

Second. Dairy producers as of the middle of July were receiving 85 percent of parity on all milk sold at wholesale. The average price received was $4.90 per hundredweight. It should be noted that there are no controls of dairy production.

Third. With the needed adjustments in price support levels, which occurred under this administration, the situation improved dramatically. As output has come more nearly in line with commercial demand, price support purchases fell sharply.

Fourth. The price support is not necessarily the market price. It is only true when the price support level is unrealistic and market destroying. For example, during 1959 the average market price for manufacturing milk was $3.23 per hundredweight compared with a price support of $3.06; for butterfat the average price received was 59½ cents per pound compared with a price support of 56.6 per pound. During the first 4 months of the current marketing year prices have been above that received a year earlier.

Fifth. Currently cheese is selling in Wisconsin for 34.9 cents per pound. Even if this price support proposal became law the current price is about 1 cent above the indicated support price. Thus farmers who sell to cheese plants will not get more under this proposal. On the other hand it will have adverse effects. It will stimulate increased production which will go into Government storage and once more place the dairy industry in a surplus position. Farmers need markets not more warehouses in which to store dairy products. The present prices above the support level indicate that the current program is working and that production is going into markets.

Sixth. It should be noted that in addition to the direct price support program, legislation is in effect which authorizes expenditures to increase the consumption of whole milk among schoolchildren in the United States. The Government pays the cost of milk consumed by the children over and above the quantities included as part of the lunches served under the school lunch program. This program has grown from approximately 500 million pounds in 1955 to 1.2 billion pounds in 1959. It is expected to be even higher in 1960.

Seventh. Also, a program was inaugurated to increase the consumption of fluid milk by personnel in the military services and Veterans' Administration hospitals. The legislation was broadened in 1958 to include the Coast Guard and Merchant Marine Academy. The CCC has reimbursed these agencies for part of the cost of milk used over their normal purchases. The reimbursement rate has been approximately the amount which CCC otherwise would have spent to purchase, store and handle butter and nonfat dry milk under the price support program. The total milk used by these services has more than doubled with the program.

Eighth. Contrary to the impression of many people the current level of price support for dairy products is not at the minimum permitted by law. The current level of price support was set at 77 percent of parity.

Mr. HOEVEN. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Chairman, before we vote on this bill, I would like to make several things very clear. First, we are voting on a bill which provides for $3.22 support level on manufacturing milk with a butterfat content of 3.86. Many people have said and many newspaper reports have carried stories in Wisconsin that this particular bill provided for $3.22 on the basis of Wisconsin pay prices. That is not the case. This assumption is not true. The pay price for manufacturing milk in Wisconsin is based on the 3.5 butterfat test and almost all milk producers and processors will find that fact clearly set forth on the pay receipt.

On the basis of this bill, for 3.5 milk, the support level will be raised from $2.77 to $2.92. This comes about through raising the price support on 3.86 butterfat content milk from $3.06 to $3.22.

How will this affect the price of cheese in Wisconsin? The cheese-pay price on the Green Bay board closed on Friday of this past week at 35 cents a pound. This is not assembled cheese and the Government buys only assembled cheese which would aid from seven-eighths cents to 1¼ cents per pound. Under the terms of this particular bill the price support level will be raised to 34¼ cents. It will be below the market price at Green Bay which was 35 cents as of the close of the market last Friday. And you add to that seven-eighths of a cent to 1¼ cents before the Government would get this unassembled cheese, which would make the price the Government would have to pay, according to the Green Bay market, 35⅞ cents to 36¼ cents.

I personally feel that action needs to be taken by the Congress in order to freeze the parity equivalent of manufactured milk. We have seen since 1946 the increase in fluid prices throughout the United States. The parity equivalent of manufactured milk has gone from approximately 88 percent to 82.5 percent. The manufactured milk producing areas have suffered tremendously. As far as the farmer is concerned the parity equivalent is the important think to keep in mind.

I have had legislation before the House Committee on Agriculture which would freeze the parity equivalent on manufactured milk so that we would have a constant parity equivalent. The dairy industry could make plans on a long-term basis only in this way. This would be a better way of attacking the problem facing the manufacturing milk producer. It would be a sounder solution to change the parity equivalent because of the

changes which have taken place in the milk market. My bill would have improved prices to farmers in Wisconsin. This bill does nothing for the pocketbook of my milk producers and for that I have deep regrets.

I am supporting the passage of this bill, but I do want farmers particularly back in my Wisconsin congressional district to understand that on the basis of the Chicago butter market, on the basis of the Green Bay cheese market, this particular bill is setting a floor which is much lower than the market price. It is much lower than the projections for the manufactured milk prices in Wisconsin through the period of time this legislation will be in existence. I think everyone realizes that this bill is only good until April 1 of 1961.

Below is a chart listing the present support prices, present Wisconsin pay prices, and the future price support levels under this bill:

	Present support level	Support level under this bill	Present Wisconsin market prices
Manufacturing milk:			
3.86 butterfat content	$3.06	$3.22	$3.41
3.5 butterfat content	2.77	2.92	3.10
Cheese	.32¾	.34¼	.35
Butter	.58	.604	.63
Dry milk, nonfat milk solids	.12	.12¼	.12½

Before a vote is taken on this short-term proposal, I think there are some basic facts which should be understood regarding the dairy industry.

First. Cash receipts for the current marketing year are expected to be the highest on record—$4.7 billion. This improvement in the dairy situation is a reflection of many constructive factors.

Second. The dairy industry through promotion and realistic assistance by the Government has continued its progressive advancement toward balancing its output with effective demand for dairy products.

Third. By the end of 1959, production was only a little in excess of the demand at market prices. This is a great change from the surplus position which existed in the dairy industry only a few years ago. This surplus was generated because dairy products were being priced out of their markets.

Fourth. There are many Members of the Congress who believe that the price support is necessarily the market price. This is not necessarily so. It is only true when the price support level is unrealistic and market destroying. For example, during 1959 the average market price for manufacturing milk was $3.23 per hundredweight, compared with a price support of $3.06; for butterfat the average price received was 59½ cents per pound compared with a price support of 56.6 cents per pound. During the first 4 months of the current marketing year prices have been above that received a year earlier.

Fifth. Some Members of Congress may vote for this bill on the mistaken assumption that farmers will get more for their dairy products. I wish to point out that currently cheese is selling in Wisconsin for 35 cents per pound. Even if this price support proposal became law the current price is more than 1 cent a pound above the indicated support price. Therefore, it is the sheerest political demagoguery to assume that farmers in my district will get more money for their milk next month or the months following because of the passage of this bill.

Mr. Chairman, if the majority party really wants to help the Wisconsin dairy farmer let them pass the free flow of milk bill introduced in this session of Congress by 10 members of their party and 10 members of my party. This legislation would be a major accomplishment and would be truly meaningful to the farmers of Wisconsin. Our Wisconsin farmers must move 85 percent of our milk production outside our State boundaries. At the present time only 15 percent of our milk production can move outside our State in the form of fluid milk because of the unrealistic sanitary standards established as milk barriers against the free flow of USPHS Code approved milk.

The Republican and Democratic platform committees, meeting in Chicago and Los Angeles, respectively, were asked to include in their platforms a pledge endorsing the free movement of milk bill. What happened? The Democratic platform committee turned its back on the midwest dairy farmer and rejected any mention of support for this important legislation.

What did the Republicans say in Chicago? The Republican platform says: "We pledge free movement in interstate commerce of agricultural commodities meeting Federal health standards."

Mr. Chairman, the point I make is quite clear. The free-movement-of-milk bill not only had the support of the Eisenhower administration through a favorable report from HEW, it was supported by the Republican Party in its platform. It is a great disappointment to Wisconsin dairy farmers that this legislation has not been acted on in the Congress with its 2 to 1 Democratic majority.

Mr. HOEVEN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, our lovable and good friend from North Carolina, the chairman of the Agriculture Committee, just reached the height of absurdity when he said, believe it or not, that we were here talking politics. What did the leaders call us back for? To get a start on the campaign.

Mr. COOLEY. I did not call you back.

Mr. HOFFMAN of Michigan. Oh, well, who did? Your leaders, your candidates for President. Get up and answer instead of grumbling. Politics? Of course they were talking politics. Obtaining political advantage was the purpose of our return. But who is the gentleman from North Carolina, the chairman of the Agriculture Committee, Mr. COOLEY, to criticize the gentleman from Wisconsin, JOHNNY BYRNES? Did we ever have a more able, conscientious, patriotic, and effective legislator here on either side than JOHNNY BYRNES? Not since I came here in January of 1935. You know that and my lovable friend from North Carolina, who grows tobacco in such large quantities—you remember when he had his picture in that expensive brochure with Walter Reuther paid for by the union. The gentleman does not talk politics? Neither does his party. Little else has been talked this session. Reuther gives the orders to KENNEDY and KENNEDY sends them on to JOHNSON, and the instructions or rather the requests follow on down to us, to the Speaker and the gentlemen over there. Politics? Nobody is engaged in politics. Oh, no.

Yes, boo some more. It always hurts you when you get the truth.

Mr. HOEVEN. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota [Mr. ANDERSEN].

Mr. ANDERSEN of Minnesota. Mr. Chairman, first I want to say I am in support of this bill to increase the level of price supports for milk and butterfat, Although I do not feel it will have much effect one way or the other in helping to make that essential boost so badly needed in the farm economy in the Midwest, every little bit helps and we are grateful for small favors.

Mr. Chairman, here we are in the last night of this session of the 86th Congress. We are getting ready to quit. What have we done to solve one of the great domestic problems in this Nation of ours? Both Mr. KENNEDY and Mr. NIXON claim the farm problem is the greatest one domestic problem facing us today, and I fully agree. But we are getting ready here today to run out on the farmers before our job is done. Why can we not stay here another week and do something for the farm economy of the Nation? I say that in all seriousness. Here we are expending $600 million a year in grain storage on a huge surplus which is worth nothing to anybody except, perhaps, what we can give away to feed our own people and to feed hungry people abroad. What is being done to help do something to whittle away that surplus—nothing. Why no farm bill this year? Might I ask now in all seriousness, Who is responsible for the fact that nothing has been done? There is no answer but the majority of this House is responsible. You cannot evade your responsibility for not doing anything to try to help boost up the Midwest farm economy of this Nation. You cannot escape that responsibility.

The fault is not all yours because we have had an unsympathetic Secretary of Agriculture standing in our way. But the American people will not, in my judgment, let you hide behind the alibi of a possible veto. After all, the President cannot veto a bill unless we pass it and, if the leadership in Congress is sincere, there is no excuse whatsoever for the failure to give the farmer his day in court. Who knows, the President might sign a good farm bill. It is our solemn duty to at least lay such a bill on his desk.

Responsibility for not having done something worth while for the farmers of America must rest squarely upon the

shoulders of the leadership now in control of the Congress. I say that in all seriousness. Yet, here we are getting ready to quit and walk out on the farmers of the Midwest and do nothing about our number one domestic problem. Oh, yes, we have had these brilliant campaign promises, especially at the convention at Los Angeles just last July. Why are you gentlemen not going to help me bring up the level of price supports? Yes, I was delighted to hear the Democrats had pledged themselves to bring up our farm economy to a level of 90 percent of parity. Yet, here you are, getting ready to quit tonight. We could stay here next week and do something on the green acres program which has already been adopted by the House of Representatives. Or, if you prefer, bring up some other equally good measure and I will support it as I always have in the past. You can and you should do something to improve our agricultural life. I tell you, my friends, you can get more votes by doing that than by going home and making a few speeches this coming week. The people want results, not alibis. They want action, not promises. Only the politicians want the issue, while the people plead for a solution.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSEN of Minnesota. I yield to my friend from Pennsylvania.

Mr. KEARNS. Do you not feel that the proposals made by Vice President NIXON might solve the problem?

Mr. ANDERSEN of Minnesota. I would say, inasmuch as Mr. NIXON is incapacitated for a couple of weeks, that it would not hurt if the Senator from Massachusetts [Mr. KENNEDY] and the other Members stayed here to try to do something to boost the farm economy and try to balance off the campaign.

I have found from experience, 22 years of it here in the Congress, that if a man does his job the folks back home will take care of his campaigning. We must try always to keep partisan politics out of agriculture, but I can say very frankly here tonight that regardless of which side of the political aisle you sit on it will be to your advantage to bring out and pass a good farm bill. But if you do nothing, the people back home will hold you accountable and properly so.

At this late hour I implore you to not forsake the people of rural America whose economic future rests in your hands.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. JONES of Missouri. I was going to ask the gentleman from Minnesota to yield. I am on your side to try to help the farmers.

Mr. ANDERSEN of Minnesota. May I say that I have great appreciation for the splendid job the gentleman from Missouri has done through the years on behalf of the farmers. I regret I did not have time to yield to him.

Mr. JONES of Missouri. I wanted to tell the gentleman that if he would offer his green acres bill as an amendment to this bill I am sure that if he got half the support on his side that he would on our side we could get that bill passed tonight.

Mr. ANDERSEN of Minnesota. H.R. 12000, the green acres bill, is ready to go. Mr. JENSEN and I have tried to get it seriously considered.

Mr. JONES of Missouri. We do not have a rule on it. Offer it as an amendment to this bill. Let us go with it. I would like to see how many votes we could get over there. I do not know whether the gentleman realizes it or not, but this House has passed farm legislation that the President has vetoed. Will you not answer that question?

Mr. ANDERSEN of Minnesota. Yes; I will answer. The gentleman is partially correct.

Mr. JONES of Missouri. Has not the President vetoed farm legislation he voted for?

Mr. ANDERSEN of Minnesota. Let me say to the gentleman that it is our responsibility to pass legislation. Yes, the President has vetoed farm legislation I have voted for. That is his decision.

Mr. JONES of Missouri. I insist: Has not the President vetoed some legislation the gentleman from Minnesota voted for that would help the farmers? Answer that question.

Mr. ANDERSEN of Minnesota. I am answering your question. After we discharge our duty in passing legislation, then it is up to the President to sign or veto the bill.

Mr. JONES of Missouri. I am not going to yield for any other purpose.

Mr. ANDERSEN of Minnesota. It is our responsibility to pass farm legislation, I repeat to my good friend from Missouri. That comes first. What the President does is then his responsibility, not ours.

Mr. JONES of Missouri. We passed it. Get your President on the right side; we are ready to go.

Mr. Chairman, I yield back the balance of my time.

Mr. COOLEY. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446), as amended, is further amended by adding the following new sentence to be inserted immediately after the first sentence: "Notwithstanding the foregoing provisions, for the period beginning with the enactment of this sentence and ending March 31, 1961, the price of milk for manufacturing purposes and the price of butterfat shall be supported at not less than $3.22 per hundredweight and 59.6 cents per pound, respectively."

The CHAIRMAN. There being no amendments, under the rule the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (S. 2917) to establish a price support level for milk and butterfat, pursuant to House Resolution 636, he reported the bill back to the House.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the third reading of the Senate bill.

The bill was read a third time.

Mr. ANDERSEN of Minnesota. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ANDERSEN of Minnesota. Would it be possible by unanimous consent to return to the amendment stage?

The SPEAKER. It would not. The previous question has already been ordered. All amendments and all debate are exhausted.

The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. FULTON) there were yeas 171, noes 32.

So the bill was passed, and a motion to reconsider was laid on the table.

SPEAKER EMPOWERED TO DECLARE A RECESS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that during this legislative day it may be in order for the Speaker to declare a recess, subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PROVIDING FOR EDUCATION AND TRAINING FOR THE CHILDREN OF VETERANS

Mr. THORNBERRY. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4306) to provide education and training for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service, with Senate amendments thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert the following: "That paragraph (1) of section 1701(a) of title 38, United States Code, is amended—

"(1) by striking out in the first sentence of such paragraph 'or the Korean conflict' and inserting in lieu thereof 'the Korean conflict, or the induction period';

"(2) by inserting in the second sentence of such paragraph immediately after 'disability' the following: 'arising out of service during the Spanish-American War, World War I, World War II, or the Korean conflict'; and

"(3) by adding at the end of such paragraph the following new sentence: 'The standards and criteria for determining whether or not a disability arising out of service during the induction period is service-connected shall be those applicable under chapter 11 of this title, except that the disability must (A) be shown to have directly resulted from, and the causative factor therefor must be shown to have arisen out of, the performance of active military, naval, or air service (but not including service described under section 106 of this title), or (B) have resulted (i) directly from armed conflict or (ii) from an injury or disease

received while engaged in extrahazardous service (including such service under conditions simulating war).'

"SEC. 2. Subsection (a) of section 1701 of such title is amended by adding at the end thereof a new paragraph as follows:

"'(9) The term 'induction period' means (A) the period beginning September 16, 1940, and ending December 6, 1941, and the period beginning July 26, 1947, and ending June 26, 1950, and (B) the period beginning on February 1, 1955, and ending on the day before the first day thereafter on which individuals (other than individuals liable for induction by reason of a prior deferment) are no longer liable for induction for training and service into the Armed Forces under the Universal Military Training and Service Act.'

"SEC. 3. Subsection (d) of section 1701 of such title is amended by striking out 'or the Korean conflict' and inserting in lieu thereof the following: 'the Korean conflict, or the induction period.'

"SEC. 4. Subsection (c) of section 1723 of such title is amended—

"(1) by deleting 'television' and inserting in lieu thereof 'open circuit television (except as herein provided)'; and

"(2) by adding at the end thereof the following sentence: 'The Administrator may approve the enrollment of an eligible person in a course, to be pursued in residence, leading to a standard college degree which includes, as an integral part thereof, subjects offered through the medium of open circuit televised instruction, if the major portion of the course requires conventional classroom or laboratory attendance.'

"SEC. 5. In the case of any individual who is an 'eligible person' within the meaning of section 1701(a)(1) of title 38, United States Code, solely by virtue of the amendments made by this Act, and who is above the age of seventeen years and below the age of twenty-three years on the date of enactment of this Act, the period referred to in section 1712 of title 38, United States Code, shall not end with respect to such individual until the expiration of the five-year period which begins on the date of enactment of this Act."

Amend the title so as to read: "An Act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes."

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

DETERMINATION OF RETAIL PRICE FOR PURPOSES OF EXCISE TAX ON CIGARS

Mr. MILLS. Mr. Speaker, I call up the conference report on the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2214)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendment of the Senate numbered 1 and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: On page 3 of the Senate engrossed amendments, line 17, strike out "SEC. 5" and insert "SEC. 4"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: On page 9 of the Senate engrossed amendments, line 5, strike out "SEC. 6" and insert "SEC. 5"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with the following amendments: On page 11 of the Senate engrossed amendments, line 2, strike out "SEC. 7" and insert the following: "SEC. 6".

On page 11 of the Senate engrossed amendments, line 12, strike out "marle" and insert the following: "marl".

On page 11 of the Senate engrossed amendments, strike out lines 16, 17, and 18, and insert the following:

"(b) LAND USED IN FARMING.—For purposes of subsection (a), the term 'land used in farming' means land used (before or simultaneously with the expenditures described in subsection (a)) by the taxpayer or his tenant for the production of crops, fruits, or other agricultural products or for the sustenance of livestock."

And the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: On page 15 of the Senate engrossed amendments, line 20, strike out "SEC. 8" and insert "SEC. 7"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: On page 15 of the Senate engrossed amendments, line 18, strike out "SEC. 9" and insert "SEC. 8"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: On page 17 of the Senate engrossed amendments, line 7, strike out "SEC. 10" and insert "SEC. 9"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: On page 18 of the Senate engrossed amendments, line 5, strike out "SEC. 11" and insert "SEC. 10"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 11. The Pension Fund, Plumbers' Local Union Numbered 775, which was created May 1, 1957, as a result of an agreement between Plumbers' Local Union Numbered 775, of Suffolk County, New York, affiliated with the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, and the Suffolk County Plumbing and Heating Contractors Association, Inc., and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a), for the period beginning May 1, 1957, and ending May 11, 1959, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same.

W. D. MILLS,
AIME J. FORAND,
CECIL F. KING,
NOAH M. MASON,

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

CERTAIN DIVIDENDS FROM CERTAIN CORPORATIONS

Amendment No. 1: This amendment adds a new section to the bill as passed by the House which amends section 243 of the Internal Revenue Code of 1954 by adding a new subsection (d). Under the new subsection (d), the 85 percent intercorporate dividends received deduction is to apply with respect to dividends paid by a foreign corporation out of its earnings and profits if such earnings and profits were accumulated by a predecessor domestic corporation which was subject to the income tax under chapter 1 of the 1954 Code (or corresponding provisions of prior law). The new section of the bill also contains a technical amendment to section 861(a)(2) of the 1954 Code. These amendments apply to dividends received after December 31, 1959, in taxable years ending after such date.

This new section added by Senate amendment No. 1 is substantially the same as H.R. 12036 as passed by the House.

The House recedes.

DEFINITION OF BUSINESS LEASE

Amendment No. 2: Senate Amendment numbered 2 would add a new section to the bill, relating to exceptions to the definition of business lease.

The new section would add a sentence at the end of section 514(b)(3)(A). This sentence provides that a lease to a medical clinic by a scientific organization engaged in medical research of premises adjacent to those

occupied by such scientific organization shall be considered a lease entered into primarily for purposes substantially related to the organization's exempt purposes and functions (and thus shall not be considered a business lease), if the treatment of patients of the medical clinic, their medical histories, and donated services of doctors of the medical clinic are utilized by the scientific organization for medical research purposes.

The Senate recedes.

PROVISIONS RELATING TO POSSESSIONS OF THE UNITED STATES

Amendment No. 3: This amendment adds a new section 5 to the bill, relating to limitation on reduction in income tax liability incurred to the Virgin Islands and to the estate and gift tax treatment of certain citizen residents of possessions. Except as noted below (and except for technical clarifying amendments), the text of Senate amendment numbered 3 is the same as H.R. 5547, as passed by the House.

Both H.R. 5547 and the Senate amendment, with two exceptions, provide that tax liability incurred to the Virgin Islands pursuant to the income tax provisions equivalent to those of the United States, as made applicable in the Virgin Islands by the Naval Appropriations Act, approved July 12, 1921, or pursuant to section 28(a) of the Revised Organic Act of the Virgin Islands, is not to be reduced or remitted in any way, directly or indirectly, whether by grant, subsidy, or other similar payment, by any law enacted in the Virgin Islands.

The first exception relates to United States and Virgin Islands corporations and, in general, provides that subsidies can be paid to these corporations under much the same conditions as those under which income tax exemptions are presently available in the case of U.S. corporations carrying on a trade or business in most other U.S. possessions (sec. 931 of the Code). The second exception relates to citizens of the United States (both those who are citizens by reason of the special Act of Congress relating to the possession, and those who are citizens by reason of birth in the continental United States, naturalization, etc.) who are bona fide residents of the Virgin Islands and permits the granting of subsidies in much the same manner as bona fide residents of Puerto Rico may claim an exemption from U.S. income tax with respect to their income derived from sources within Puerto Rico (sec. 933 of the Code). With respect to this second exception, the Senate amendment contains a provision (not in the House bill) under which gain or loss from the sale or exchange of any security (as defined in section 165(g)(2) of the Code) shall not be treated as derived from sources within the Virgin Islands.

Both H.R. 5547 and the Senate amendment provide (in effect) that United States citizens who are residents of a possession, and whose citizenship is derived from citizenship of that possession, are to be subject to the estate and gift tax imposed by the United States, in general, to the same extent as in the case of nonresidents not citizens of the United States.

The effect of this, in the case of the estate tax, is to impose the U.S. estate tax with respect to the portions of the gross estate of these citizens of U.S. possessions who are residents of the possessions at the time of their death, only with respect to that part of their gross estate which at the time of their death is situated in the United States. The effect, in the case of the gift tax, is that one of these citizens and residents of a U.S. possession at the time he makes a gift will be subject to the gift tax if, but only if, the property transferred is situated within the United States. For this purpose stock issued by a corporation is considered property situated within the United States only in the case of domestic corporations, but the making of a gift of stock of a domestic corporation, or any other intangible property with a situs within the United States is subject to the gift tax only if the donor resident of the possession is engaged in business in the United States at any time during the year in which the gift of the stock is made.

The House recedes with a clerical amendment.

MODIFICATION OF FILING REQUIREMENTS FOR DECLARATIONS OF ESTIMATED TAX BY INDIVIDUALS

Amendment No. 4: Senate Amendment numbered 4 adds a new section to the bill, relating to requirement of declaration of estimated tax by individuals.

Present law (sec. 6015 of the Code) provides that, for an individual with no more than $100 of gross income from sources other than wages or salaries, a declaration is required if his gross income is expected to be more than $5,000; however, no declaration is required by a married person if the gross income of the married person and his spouse is expected to be not more than $10,000 (nor from a head of a household or a surviving spouse if his gross income is expected to be not more than $100,000). For an individual with more than $100 of income not subject to withholding, a declaration is required if his gross income from all sources is expected to be more than $600 per exemption plus $400.

Under Senate amendment numbered 4, section 6015(a) is amended so as to (1) provide that no declaration is to be required if the estimated tax can reasonably be expected to be less than $40, (2) eliminate the gross income test of $400 plus $600 times the number of exemptions, and (3) increase from $100 to $200 the minimum gross income which can reasonably be expected to be received from sources other than wages without becoming liable to file a declaration.

The House recedes with a clerical amendment).

EXPENDITURES BY FARMERS FOR FERTILIZER

Amendment No. 5: This amendment adds a new section to the bill as passed by the House which adds a new section 180 to the Internal Revenue Code of 1954. Under the new section 180 a taxpayer engaged in the business of farming may elect to treat as expenses which are not chargeable to capital account expenditures (otherwise chargeable to capital account) which are paid or incurred by him during the taxable year for the purchase or acquisition of fertilizer, lime, ground limestone, marl, or other materials to enrich, neutralize, or condition land used in farming, or for the application of such materials to such land. The expenditures so treated are to be allowed as a deduction. For this purpose, "land used in farming" means land used (before or simultaneously with the expenditures described in the preceding sentence) by the taxpayer or his tenant for the production of crops, fruits, or other agricultural products or for the sustenance of livestock.

The House recedes with clerical amendments and with a technical amendment clarifying the definition of the term "land used in farming".

CHARITABLE CONTRIBUTIONS FOR CERTAIN STUDENTS MAINTAINED IN TAXPAYER'S HOME

Amendment No. 6: This amendment adds a new section to the bill as passed by the House amending section 170 of the Internal Revenue Code of 1954 (relating to charitable contributions and gifts). Subsection (a)(1) of the new section of the bill amends section 170(c) of the 1954 Code so as to include within the definition of "charitable contribution" amounts treated as paid under the new subsection (d) (described below) for the use of organizations described in section 170(c) (2), (3), or (4), i.e., religious, charitable, scientific, literary, educational, veterans, fraternal, etc., organizations.

Subsection (a)(2) of the new section of the bill inserts a new subsection (d) in section 170 of the 1954 Code and redesignates the present subsections (d) and (e) as (e) and (f), respectively. Under paragraph (1) of the new subsection (d), amounts paid by a taxpayer to maintain an individual (other than a dependent or a relative) as a member of his household during the period that the individual is a full-time student in the twelfth or any lower grade at an educational institution located in the United States and is a member of the taxpayer's household under a written agreement between the taxpayer and an organization described in paragraph (2), (3), or (4) of section 170(c) of the 1954 Code to implement a program of the organization to provide educational opportunities for students in private homes are to be treated as amounts paid for the use of the organization (and thus will be treated as charitable contributions).

Paragraph (2) of the new subsection (d) contains two limitations on the amounts paid within the taxable year to which paragraph (1) applies. First, the amounts to which paragraph (1) applies are limited, for each taxable year, to an amount equal to $50 times the number of calendar months during the taxable year which fall within the period in which the student is a member of the taxpayer's household under the agreement described above. Second, paragraph (1) does not apply to any amount paid by the taxpayer within the taxable year if the taxpayer receives any money or other property as compensation or reimbursement for maintaining the student in his household during such period.

Under the Senate amendment these new provisions apply with respect to taxable years beginning after December 31, 1959.

The House recedes with a clerical amendment.

CAPITAL CONTRIBUTIONS TO FEDERAL NATIONAL MORTGAGE ASSOCIATION

Amendment No. 7: This amendment inserts in section 162 of the Internal Revenue Code of 1954 (relating to trade or business expenses) a new subsection (d), relating to capital contributions to the Federal National Mortgage Association. The new subsection provides that, for purposes of subtitle A of the 1954 Code, whenever the amount of capital contributions evidenced by a share of stock issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act exceeds the fair market value of the stock as of the issue date of such stock, the initial holder of the stock is to treat the excess as ordinary and necessary expenses paid or incurred during the taxable year in carrying on a trade or business.

Amendment numbered 7 also amends the 1954 Code to insert a new section 1054 in the provisions of such Code relating to special rules as to the basis of property. The new section 1054 provides that, in the case of any share of stock described above, the basis of such share in the hands of the initial holder is to be an amount equal to the capital contributions evidenced by such share, reduced by the amount (if any) required by the new section 162(d) to be treated (with respect to such share) as ordinary and necessary expenses paid or incurred in carrying on a trade or business.

These amendments are to apply with respect to taxable years beginning after December 31, 1959.

The substance of this amendment is the same as the substance of H.R. 7885, which passed the House of Representatives on June 27, 1960.

The House recedes with a clerical amendment.

MECHANICAL LIGHTERS FOR CIGARETTES, CIGARS, AND PIPES

Amendment No. 8: Section 4201 of the Internal Revenue Code of 1954 (relating to tax on pens and mechanical pencils and lighters) imposes, upon the sale by the manufacturer, producer, or importer of mechanical lighters for cigarettes, cigars, and pipes, a tax equal to 10 percent of the price for which so sold.

This amendment provides that the tax on the sale by the manufacturer, producer, or importer of the mechanical lighters described above is to be 10 cents for each lighter but not more than 10 percent of the price for which so sold.

This change in tax is to apply only with respect to articles sold by the manufacturer, producer, or importer thereof on or after the first day of the first month which begins more than 10 days after the date of the enactment of this Act.

The House recedes with a clerical amendment.

REAL ESTATE INVESTMENT TRUSTS

Amendment No. 9: This amendment amends the Internal Revenue Code of 1954 to provide substantially the same tax treatment for real estate investment trusts as present law provides for regulated investment companies. Real estate trusts are organizations specializing in investments in real estate and real estate mortgages, while the regulated investment companies specialize in investments in stock and securities.

Under present law, regulated investment companies which distribute 90 percent or more of their ordinary income are taxed only on their retained earnings. Thus, the distributed earnings are taxed only to the shareholders. This same general type of tax treatment is accorded by amendment numbered 9 to real estate investment trusts, effective with respect to taxable years of real estate investment trusts beginning after December 31, 1960.

The substance of this amendment is the same as the substance of H.R. 12559, which passed the House of Representatives on June 29, 1960.

The House recedes with a clerical amendment.

PENSION FUND, PLUMBERS' LOCAL UNION NUMBERED 775

Amendment No. 10: This amendment adds a new section to the bill as passed by the House which provides that the Pension Fund, Plumbers' Local Union Numbered 775, shall be held and considered to have been a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to have been exempt from taxation under section 501(a) of such Code, for the period beginning May 1, 1957, and ending May 11, 1959.

The House recedes with an amendment. Under the conference agreement, the trust is to be deemed to constitute a qualified trust (and to be exempt from tax) for the period specified, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

W. D. MILLS,
AIME J. FORAND,
CECIL R. KING,
NOAH M. MASON,
JOHN W. BYRNES,
Managers on the Part of the House.

Mr. BYRNES of Wisconsin. Mr. Speaker, the conference agreement on H.R. 10960 merits the support of the membership of the House. The House passed version of this bill contained a provision dealing with the determination of the tax base for purposes of the importation of the Federal excise tax on cigars. Under the bill State or local taxes imposed on cigars as a commodity were to be excluded from the tax base. The Senate in acting on this legislation added 10 substantive amendments. Many of these amendments were provisions that had been contained in bills previously passed by the House.

The first amendment added a new subsection (d) to section 243 of the Internal Revenue Code so that the 85 percent intercorporate dividend received deduction would apply with respect to dividens paid by a foreign corporation out of its earnings and profits, if such earnings and profits were accumulated by a predecessor domestic corporation. This Senate provision is substantially the same as the House passed version of H.R. 12036. The House accepted the Senate amendment.

The second Senate amendment dealt with unrelated business income of a tax-exempt organization and would have provided that a lease to a medical clinic by a medical research organization of premises adjacent to those occupied by the organization would be considered as an activity related to the organization's exempt purpose and function under certain conditions. In the consideration of this Senate amendment the conferees were informed that certain matters of tax administration that would be corrected by this amendment could still be remedied by administrative action. The Senate receded from its position on this amendment.

The third Senate amendment pertained to the limitation on reduction of income tax liability incurred to the Virgin Islands and to the estate and gift tax treatment of certain citizen residents of possessions. The text of this Senate amendment is the same as H.R. 5547 as it passed the House except for certain technical and clarifying amendments. The House conferees accepted the Senate amendment.

The fourth Senate amendment related to the requirement for declaration of estimated tax by individuals. The purpose of the amendment is to relieve taxpayers with only small amounts of income from the burden of filing such estimates. It is anticipated that this amendment will help both the taxpayer and the Government. The House accepted the Senate amendment with a clerical amendment.

The fifth Senate amendment clarifies the law as to whether farmers are required to capitalize or expense certain soil treatment processes. The Senate amendment makes it clear that these expenditures are to be allowed as a deduction. The House conferees accepted the Senate amendment with certain clerical amendments and with a technical amendment clarifying the definition of the term "land used in farming."

The sixth Senate amendment pertains to the provisions of the Internal Revenue Code controlling the deductibility of charitable contributions and gifts so as to allow the deductibility of amounts paid for the maintenance of certain children in the taxpayer's home during the time the children are attending school in the United States. The House accepted the Senate amendment with a clerical amendment.

The seventh Senate amendment pertains to capital contributions to the Federal National Mortgage Association and is the same as the substance of H.R. 7885 as it passed the House. Under the amendment whenever the amount of capital contributions to FNMA exceeded the fair market value of the stock as of the issue date of such stock, the initial holder of the stock is to treat the excess as ordinary and necessary expenses incurred in the conduct of a trade or business. The House accepted the Senate amendment with a clerical amendment.

The eighth Senate amendment pertains to the Federal manufacturers excise tax applicable to mechanical lighters and would change the existing tax of 10 percent of the price for which sold to a tax of 10 cents for such lighter but not more than 10 percent of the price for which sold. The House accepted the Senate amendment with a clerical amendment. I should add as a personal view that I think this is a bad amendment and I opposed it in the conference.

The ninth Senate amendment is the substance of H.R. 12559 as it passed the House and pertains to the income taxation of real estate investment trusts. The amendment would provide substantially the same conduit tax treatment for real estate investment trusts as present law provides for regulated investment companies. The House accepted the Senate amendment with a clerical amendment.

The 10th Senate amendment pertains to the status of the pension fund of the Plumbers Local Union No. 775 in terms of whether or not it is a qualified trust under the applicable provisions of the Internal Revenue Code. The House accepted the Senate amendment with an amendment.

Mr. Speaker, for the most part the amendments approved in the conference agreement are meritorious and for that reason we present to the House a unanimously approved conference report on the part of the House conferees.

Mr. MILLS. Mr. Speaker, your House conferees have reached agreement with the conferees of the other body on the bill H.R. 10960, which, you will recall, related to the determination of the retail price for the purposes of the Federal excise tax on cigars. The material contained in the House bill dealing with this subject was accepted by the other body and was not in conference. The other body did, however, add 10 substantive amendments to the bill unrelated to the specific subject of H.R. 10960, and these amendments were in conference.

The first of these amendments provided that a dividend received from a foreign corporation out of earnings and profits inherited from a predecessor corporation which was a taxable domestic U.S. corporation shall be subject to the regular intercorporate dividends received credit applicable to dividends received from a domestic U.S. corporation. This amendment is identical with H.R. 12036,

which passed the House under unanimous consent on August 24, 1960. Under the conference agreement, this amendment was retained.

The second amendment added by the other body provided that a lease by a medical research organization to a medical clinic on premises adjacent to those occupied by the research organization shall be considered as being primarily for the basic purpose of the research organization if treatment of patients in the clinic, their medical history, and donated services of doctors in such clinics are used by the scientific organization for medical research purposes. This amendment was retroactive to years beginning after December 31, 1950.

Under present law rental income received under certain of such leases is taxable to the otherwise tax-exempt medical research organizations unless the leased property is used for a purpose which is related to the functions of such exempt organizations. However, whether or not the leased property is used for such a related purpose is determined by the facts and circumstances of each case and this amendment was designed to overcome what was considered by the other body to be too narrow an interpretation of the term "related" in the case of medical research organizations and their associated clinics.

The Treasury Department objected to this amendment on the ground that the determination of related purpose was essentially a factual determination which should be made on a case-by-case basis by field representatives of the Internal Revenue Service. The conferees deleted this amendment. However, the conferees were given assurance by the Treasury Department that it will expedite consideration of pending cases by the field representatives of the Internal Revenue Service so that the taxpayers involved may avail themselves of the administrative remedies provided by law and obtain a prompt decision in the matter.

The third amendment made by the other body corresponds substantially to the language of H.R. 5547 which was passed by the House on September 9, 1959. That bill was designed to limit certain tax advantages applicable to the Virgin Islands under the income tax laws and the estate tax laws. The House bill had been reported by the Finance Committee with several amendments relating to the Virgin Islands income tax provisions: First, a later effective date—since Senate action on this bill has been held up for a year; second, the present amendment, unlike the House bill, provides that gain or loss from the sale or exchange of securities shall not be treated as derived from sources within the Virgin Islands—and thus would not be eligible for any credits which the Virgin Islands government might extend. This amendment was deemed desirable since the mere fact that some security transaction took place within the Virgin Islands would not prove that the gain arose from Virgin Islands business. The other two amendments were essentially technical. Under the conference agreement, this amendment was retained.

The fourth amendment made by the other body was one of several amendments originally proposed by the Treasury and contained in H.R. 9625, the Technical Amendments Act of 1960. This related to the requirements for filing a declaration of estimated tax. The major effect of this amendment is that no declaration is to be required if the estimated tax of an individual can reasonably be expected to be less than $40. Your conferees were of the opinion that this new provision would aid both the taxpayers and the Treasury in eliminating paperwork with respect to about 1.7 million annual declarations of estimated tax which show small or no tax liability. Under the conference agreement this amendment was retained.

The fifth amendment made by the other body adds a new section to the bill as passed by the House and provides that a taxpayer engaged in the business of farming may elect to deduct the cost of fertilizer and lime in the year in which it is paid or incurred rather than treating such cost as a capital expense to be prorated over the beneficial life of such items as the Internal Revenue Service has required in some recent cases. Your conferees were advised that this amendment is declaratory of the present practice of the field offices of the Internal Revenue Service. Under the conference agreement this amendment is retained with certain clerical amendments which clarify the definition of the term "land used in farming."

The sixth amendment made by the other body would allow taxpayers a charitable contributions deduction for amounts paid to maintain an individual—other than a dependent or relative—as a member of his household during the period that the individual is a full-time student in the 12th or any lower grade at an educational institution located in the United States provided such individual is a member of the taxpayer's household under a written agreement between the taxpayer and certain tax-exempt organizations, which implements a program of the organization to provide educational opportunities for students in private homes. Under this amendment, the amount of such charitable deduction is limited, for each taxable year, to an amount equal to $50 times the number of calendar months during the taxable year which fall within the period in which the student is a member of the taxpayer's household under the agreement described above. However, this amendment does not apply to any amount paid by the taxpayer within the taxable year if the taxpayer receives any money or other property as compensation or reimbursement for maintaining the student in his household during such period. A number of House Members have introduced bills providing $600 dependent's exemption for the taxpayer in these circumstances. The Senate amendment provides this as a charitable contribution deduction instead. If a taxpayer qualified for the full $50 for 12 months, he would get the $600 deduction.

Under the amendment made by the other body, these new provisions would apply with respect to taxable years beginning after December 31, 1959, and under the conference agreement this amendment was accepted.

The seventh amendment made by the other body related to nonrefundable capital contributions made to the Federal National Mortgage Association. This amendment has substantially the same effect prospectively as the bill that passed the Congress last year but was vetoed because of the retroactive effect resulting from an amendment made thereto by the other body. As amended by the other body, this amendment is prospective only and is substantially similar to H.R. 7885 which passed the House on June 27, 1960. Under the conference agreement, this amendment is retained.

The eighth amendment made by the other body provides that the present 10 percent manufacturer's sales tax on mechanical lighters shall be either 10 percent of the manufacturer's sales price or 10 cents per lighter, whichever is the lesser. Your conferees were advised that this bill would overcome a competitive disadvantage that domestic manufacturers of such lighters are under as compared to the manufacturers of imported lighters. Your conferees were advised that the Treasury Department has no objection to this amendment and, accordingly, under the conference agreement, this amendment is retained.

The ninth amendment made by the other body amends the Internal Revenue Code of 1954 to provide substantially the same treatment for real estate investment trusts as present law provides for regulated investment companies. Under present law, regulated investment companies which distribute 90 percent or more of their ordinary income are taxed only on their retained earnings and the distributed earnings are taxed only to the shareholders. The same type of tax treatment is accorded to real estate investment trusts with respect to taxable years of such trusts beginning after December 31, 1960.

The substance of this amendment is the same as that of H.R. 12559, which was passed by the House on June 29, 1960. Under the conference agreement, this amendment is retained.

The tenth amendment made by the other body provides that a certain union pension fund shall be held and considered to have constituted a qualified employees' trust under section 401(a) of the Internal Revenue Code of 1954, and to have been exempt from taxation under section 501(a) of such code for the period beginning May 1, 1957 and ending May 11, 1959. Under the conference agreement, the substance of this amendment is retained with an amendment along the lines provided for certain pension funds in the conference agreement on H.R. 12536 which conditioned retroactive qualification of such funds only upon a showing to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in the period in question been operated in a manner which would jeopardize the interests of its beneficiaries.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

EXCLUSION OF LOCAL ADVERTISING CHARGES FROM MANUFACTURERS SALE PRICE

Mr. MILLS. Mr. Speaker, I call up the conference report on the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2213)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses, as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1 and 3 and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 5. (a) The Iron Workers' Mid-America Pension Fund, which was established by an indenture executed on January 30, 1957, as a result of an agreement between various locals affiliated with the International Association of Bridge, Structural, and Ornamental Iron Workers and three employer associations, and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, for years ending on or after December 17, 1958, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a), for the period beginning on January 30, 1957, and ending on December 16, 1958, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

"(b) The Pattern Makers' Pension Trust Fund of Chicago, which was established by an agreement and declaration executed on April 28, 1958, between the Pattern Makers' League of North America, Chicago Association, and the Pattern Manufacturers' Association of Chicago and Vicinity, and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, for years ending on or after February 25, 1959, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a), for the period beginning on April 28, 1958, and ending on February 24, 1959, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

"(c) The Pipe and Refrigeration Fitters Local 537 Pension Fund of Boston, Massachusetts, which was created on September 1, 1955, as a result of an agreement between Local 537 of the United Association of Pipe Fitters and Refrigeration Fitters and the Heating, Piping, and Air Conditioning Contractors, Boston Association (now known as Mechanical Contractors Association of Boston), and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, for years ending on or after November 10, 1959, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a), for the period beginning on March 1, 1956, and ending on November 9, 1959, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

"(d) The Annuity Plan of the Electrical Switchboard and Panelboard Manufacturing Industry of New York City, which was created May 16, 1956, as a result of an agreement between Local Union Numbered 3, International Brotherhood of Electrical Workers, American Federation of Labor and Congress of Industrial Organizations, and the Electrical Manufacturers of New York, Incorporated, and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a), for the period beginning May 16, 1956, and ending May 22, 1957, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

"(e) The District Council No. 19 Welfare Fund, now known as Painters District Council No. 19 Welfare and Pension Fund, which was first created as of May 1, 1947, as a result of an agreement between Painters District Council No. 19, Brotherhood of Painters, Decorators and Paperhangers of America, of the State of New Jersey and painting contractors signatory to the union agreement, and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a) and under section 165(a) of the Internal Revenue Code of 1939, for the period beginning January 1, 1954, and ending August 6, 1956, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

"(f) The Local Union Numbered 377 Pension Fund, which was created October 13, 1952, as a result of an agreement between Local Union Numbered 377, Brotherhood of Painters, Decorators and Paperhangers of America, of the State of New Jersey and Painting and Decorating Contractors of America, Hudson County Employers Chapter, and which has been held by the Internal Revenue Service to constitute a qualified trust under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of such Code, shall be held and considered to have been a qualified trust under such section 401(a), and to have been exempt from taxation under such section 501(a) and under section 165(a) of the Internal Revenue Code of 1939, for the period beginning October 13, 1952, and ending April 1, 1958, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries."

And the Senate agree to the same.

W. D. MILLS,

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacurers sale price, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

ELECTION AS TO BASE FOR DETERMINING PERCENTAGE DEPLETION DEDUCTION IN THE CASE OF MINERALS USED IN MAKING CEMENT

Amendment No. 1: To determine the percentage depletion allowance under present law, it is necessary to multiply the percentage rate applicable to the particular mineral by the value of the mineral at the point at which the mining process ends. This point is referred to as the "cutoff point." In the case of many mineral industries, this cutoff point has been the subject of uncertainty and litigation. Included in this group is the cement industry.

In order to resolve the cutoff question for 1961 and future years, Congress in the Public Debt and Tax Rate Extension Act of 1960 modified section 613(c) of the Internal Revenue Code of 1954. As amended, this statutory provision established specific cutoff points for numerous minerals, including those used in the manufacture of cement. This cutoff point for cement-producing minerals (except for preheating of the kiln feed) occurs just prior to the introduction of the kiln feed into the kiln. This cutoff point is derived from a ruling published by the Treasury Department in 1953.

Although the recent legislation determines the cutoff point for the cement industry for future years, it does not settle this question for any open years prior to 1961. Senate amendment numbered 1 permits taxpayers mining minerals used in making cement to elect to apply, for the years prior to 1961, the cutoff provisions adopted in the Public Debt and Tax Rate Extension Act of 1960. If a

taxpayer fails to make the election, the cutoff point in his case of these years would be determined under existing law.

Under the amendment, if the taxpayer makes the election, it will apply to all of his mineral properties used in making cement and, in general, to all of his taxable years beginning before 1961 which are open on the date of the enactment of the bill. However, the making of the election resolves only the point at which the cutoff occurs and does not deal with any other matters which may be in issue, such as the method of computing the gross income at that point. The election must be made by the taxpayer on or before the date which is 60 days after the date of the publication of final regulations on this provision. Once made, the election is irrevocable.

The House recedes.

INCOME TAX EXEMPTION AND DEDUCTIONS FOR CERTAIN PENSION PLANS

Amendment No. 2: Under present law, a pension trust is qualified for income tax exemption only if it meets certain requirements relating to coverage of employees and nondiscrimination of contributions or benefits. Where the pension trust is properly qualified, not only is it exempt from Federal taxation with respect to its income, but contributions paid to it by an employer on behalf of his employees are deductible for Federal income tax purposes. Senate amendment numbered 2 provides that certain pension trusts shall be deemed to constitute qualified trusts, and to be exempt from tax, under the Federal income tax laws for the period of time specified in the amendment with respect to each such trust. The trusts are as follows:

(1) The Iron Workers' Mid-America Pension Fund.

(2) The Pattern Makers' Pension Trust Fund of Chicago.

(3) The Pipe and Refrigeration Fitters Local 537 Pension Fund of Boston, Massachusetts.

(4) The Annuity Plan of the Electrical Switchboard and Panelboard Manufacturing Industry of New York City.

(5) The District Council No. 19 Welfare Fund, now known as Painters District Council No. 19 Welfare and Pension Fund.

(6) The Local Union Numbered 377 Pension Fund.

Under the conference agreement, the House recedes with an amendment under which each trust specified in the Senate amendment is to be deemed to constitute a qualified trust (and be exempt from tax) for the period specified in the Senate amendment, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

LIMITATION ON ACCELERATION OF ACCRUAL OF TAXES

Amendment No. 3: This amendment adds a new subsection (d) to section 461 of the Internal Revenue Code of 1954 (relating to general rule for taxable year of deduction). Paragraph (1) of the new subsection (d) provides the general rule that, in the case of a taxpayer whose taxable income is computed under an accrual method of accounting, to the extent that the time for accruing taxes is earlier than it would be but for any action of any taxing jurisdiction taken after December 31, 1960, then, under regulations prescribed by the Secretary of the Treasury or his delegate, such taxes are to be treated as accruing at the time they would have accrued but for such action by such taxing jurisdiction.

Paragraph (2) of the new subsection (d) provides that, under regulations prescribed by the Secretary of the Treasury or his delegate, paragraph (1) is to be inapplicable to the extent that its application would (but for such paragraph (2)) prevent all persons (including successors in interest) from ever taking such item into account.

Amendment numbered 3 also provides that the new section 461(d) is to apply to taxable years ending after December 31, 1960. In this respect it is to be noted that the rule of law that a tax liability is accruable on a certain date such as the assessment or lien date has developed over a long period of years through court decisions and is a basic concept which the Internal Revenue Service has recognized in numerous rulings. Several States in recent years have changed this accrual date from January 1 to December 31 in order to provide an extra accrual date for State taxes. This amendment, which would be effective for years after 1960 and thus put the States and taxpayers on proper notice, would change the law to provide for only one accrual for State taxes in any one taxable year where the State legislature has changed the accrual date, and would thus eliminate the additional deduction available under existing law. This legislation is prospective so that taxpayers who have acted in good faith in taking such deductions in the past under existing law will be treated uniformly and not be subjected to retroactive action on the part of the Treasury Department.

The House recedes.

W. D. MILLS,
AIME J. FORAND,
CECIL R. KING,
NOAH M MASON,
JOHN W. BYRNES,
Managers on the Part of the House.

Mr. MILLS. Mr. Speaker, there are three amendments that were adopted to this particular bill which passed the House by unanimous consent. The first amendment is in the form of a legislative settlement of a situation existing in the limestone and cement manufacturing business. Over the years from 1951 through the year 1960 legislation was necessitated by the action of the Congress prior to the recess in passing the provision changing the cutoff point for depletion purposes. This is a very satisfactory settlement, I believe, and will eliminate a great number of court cases. This was recommended by the industry and by the Treasury.

Mr. BYRNES of Wisconsin. Mr. Speaker, I join in urging my colleagues in the House to support the conference agreement on H.R. 12536. This legislation as it passed the House dealt with the status of local advertising charges for purposes of the manufacturers excise tax. It provided that in the case of advertising arrangements under certain circumstances the charge for advertising was to be excluded from the tax base.

The Senate in acting on this legislation added three substantive amendments.

The first of these amendments pertained to the percentage depletion deduction in the case of minerals used in making cement. The amendment relates to the so-called cutoff point to which the statutory depletion rate is applicable. Congress has recently passed legislation dealing with this matter for taxable years after December 31, 1960, and the purpose of the Senate amendment is to provide a solution for open years prior to 1961 by establishing a similar cutoff point. It should be made clear that this tax treatment would be based on a taxpayer election and if the taxpayer desires not to make the election, the cutoff point in his case for open years would be determined under existing law. The House accepted the Senate amendment.

The second Senate amendment pertains to the provisions of the Internal Revenue Code affecting income tax exemption and deductibility of contributions with respect to certain pension plans. The House accepted the Senate amendment with an amendment.

The third Senate amendment arises from the fact that several States have recently enacted legislation which has enabled accrual basis taxpayers to claim that they are entitled to deduct in 1 taxable year property taxes for 2 taxable years. To deal with this situation the Senate amendment would deny an accrual basis taxpayer the right to deduct more than 1 year's State taxes in 1 Federal taxable year. The conferees in agreeing on this amendment have made it clear that the legislation is to be prospective so that taxpayers who have acted in good faith in taking deductions in the past under existing law will be treated universally and not be subjected to retroactive action. The House accepted the Senate amendment.

Mr. Speaker, the conference agreement should be adopted.

Mr. MILLS. Mr. Speaker, your House conferees have reached an agreement with the conferees of the other body on the bill, H.R. 12536, relating to the treatment of charges made for local advertising for purposes of computing the manufacturer's sales price in determining the base to which the manufacturers' excise tax is to be applied.

Mr. Speaker, all of the language of the bill that passed the House is in the bill that passed the other body and was not a subject matter in the conference. The other body did, however, add three substantive amendments to the bill unrelated to the specific subjects which were in the bill as passed by the House, and these were in conference.

The first of these amendments provides an election as to the percentage depletion cutoff point for years prior to 1961 in the case of limestone and other minerals when used in making cement.

The problem arose because of the uncertain status of present law following the Supreme Court decision in the case of United States against Cannelton Sewer Pipe Company.

In 1953 the Treasury published Revenue Ruling 76 which permitted in the case of minerals used in making cement the inclusion in the base for percentage depletion the value added by processes other than preheating of the kilnfeed which took place prior to the burning of the limestone in the kilns. These processes were primarily crushing and fine grinding. As you will recall, various lower court decisions, principally the Dragon Cement case, permitted in the case of certain limestones including the value of the finished cement in the depletion base. It was in respect to these

cases that the Congress adopted section 302 of the Public Debt and Tax Rate Extension Act of 1960 which provided a statutory cutoff point for minerals used in making cement which was substantially the same as that provided by the 1953 Treasury ruling.

Following the Supreme Court decision in the Cannelton case, there is considerable uncertainty as to the exact requirement of prior law. On one hand, the Dragon case might still be good law. On the other hand, following Cannelton the definition of mining in these situations might be held to include only crushing of the limestone and not the grinding that was allowed under the 1953 ruling and the 1960 legislation.

The amendment permits taxpayers entitled to depletion on minerals used in making cement to elect to calculate their percentage depletion deduction on the basis of the 1960 legislation for open years prior to 1960. This election, which is irrevocable, would foreclose the taxpayer from litigating the issue. Your conferees were advised that the Treasury Department favored this amendment on the basis that it was a reasonable settlement from the standpoint of the United States interests. It is estimated that under this amendment the industry would be required to make additional taxpayments in the neighborhood of $170 million. We have also been advised that 95 percent of the industry favors this amendment and could be expected to make use of the election provided. Your conferees accepted this Senate amendment.

The second amendment deals with six named pension plans which were established pursuant to the collective-bargaining negotiations and were in operation prior to the time that qualified status as tax-exempt employee plans was achieved. During this time of operation as nonqualified pension plans, the employers were not eligible for a deduction with respect to their contributions and the investment income of the pension trust was taxable. All of the six plans involved ultimately achieved qualified status. The amendment provides that the six plans will be treated as qualified pension trusts for periods varying in each case, but covering the time between the inception of such pension plans and the time when they received qualified status.

Under the conference agreement the substance of the amendment made by the other body is retained except that the language thereof has been changed in a manner which requires that it be shown to the satisfaction of the Secretary or his delegate that during the period from the inception of each of these pension funds to the date on which they qualified as tax-exempt employees' funds it is shown to the satisfaction of the Secretary or his delegate that each of these funds have not been operated in a manner which would jeopardize the interests of the beneficiaries of such funds. Under this language the trusts involved can achieve qualified status, and tax exemption, without meeting all of the formal requirements of sections 401, 503 and 504. Instead of the formal requirements it will only be necessary to show that the trusts have not been operated in a manner which would jeopardize the interest of its beneficiaries.

The third amendment added by the other body denies an accrual basis taxpayer the right to deduct more than 1 year's State or local taxes in one Federal tax year where the bunching arises because of an action of the taxing jurisdiction taken after December 31, 1960. This amendment deals with an abuse situation called to our attention by the Treasury in the bill which I introduced by request, H.R. 9625. The original Treasury proposal, unlike this amendment, would have applied to State or local action taken in 1960.

In the ordinary operation, the new rule would simply postpone the deduction to a later year. The amendment gives the Treasury regulatory authority to limit this new rule wherever its application would result in the complete denial of deduction for some item, such as, for example where the taxpayer goes out of business. Your conferees accepted this amendment.

It is my view, which is reflected also in the statement of managers, that this amendment is a change from present law and accordingly any double deduction to which a taxpayer may be entitled by reason of the acceleration of the accrual date of State or local taxes prior to December 31, 1960, will be considered as a proper deduction in those years. In many of these situations the taxpayers had Treasury rulings to this effect. The law, until it is properly amended, should apply equally to taxpayers with and to those without rulings.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

HEPTANOIC ACID

Mr. MILLS. Mr. Speaker, I call up the conference report on the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid, and I ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2212)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same.

W. D. MILLS,
AIME J. FORAND,
CECIL R. KING,
NOAH M. MASON,
JOHN W. BYRNES,
Managers on the Part of the House.

HARRY F. BYRD,
ROBT. S. KERR,
J. ALLEN FREAR, JR.,
RUSSELL B. LONG,
By HARRY F. BYRD,
JOHN J. WILLIAMS,
FRANK CARLSON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate amendment to the text of the bill adds a new section 2 providing that in order to insure a correct interpretation of the provision "waterproof cloth" in paragraph 907, Tariff Act of 1930, it is hereby declared that it was and is the true intent and meaning of paragraph 907 to limit the term "waterproof", when applied to cloth, "wholly or in chief value of cotton or other vegetable fiber, whether or not in part of India rubber," to cloths of a kind generally used in the manufacture of articles which are designed to afford protection against water to the extent expected in raincoats, protective sheeting, dress shields, umbrellas, and similar articles. The new section 2 also provides that even when cloth possesses water repelling characteristics, it is not classifiable as waterproof cloth within the meaning of paragraph 907, Tariff Act of 1930, unless it is of a kind generally used in the manufacture of articles of the class specified in the preceding sentence.

The House recedes.

Under the conference agreement the title of the bill is amended to read "An act to suspend for a temporary period the import duty on heptanoic acid, and for other purposes."

W. D. MILLS,
AIME J. FORAND,
CECIL R. KING,
NOAH M. MASON,
JOHN W. BYRNES,
Managers on the Part of the House.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Pennsylvania.

Mr. FULTON. Has there been added to this conference report on heptanoic acid anything in regard to velveteen imports?

Mr. MILLS. What this amendment has to do is a redetermination by law of what we mean by waterproof material. We are amending section 907 of the Tariff Act to make certain that only materials that are actually used here for waterproof purposes will come within the purview of that particular paragraph of the Tariff Act. There is a voluntary quota on the amount of velveteen that is shipped into the United States. This

would not have anything to do with the quantity of velveteen that would come in.

Mr. FULTON. So that then this conference report does not contain the amendment of the Senator from Rhode Island?

Mr. MILLS. Yes; it contains that amendment as agreed to in conference.

Mr. FULTON. That keeps velveteen from being considered as waterproof.

Mr. MILLS. No. It does not prohibit the importation of velveteen. This has to do only with the avoidance of duties. It does provide for velveteen to come in under the paragraph of the Tariff Act fixing the duty on velveteen if the waterproofing question is not involved.

Mr. FULTON. Then, I must object.

Mr. MILLS. Of course, paragraph 907 fixes the duty on waterproof material.

Mr. FULTON. Then, I must object.

Mr. MILLS. Well, there is no question of objecting. The question is on the passage or the adoption of the conference report by a majority vote.

Mr. BYRNES of Wisconsin. Mr. Speaker, I join with the able chairman of the Committee on Ways and Means in recommending to the House the adoption of the conference agreement on H.R. 12659.

It will be recalled that this legislation as it originally passed the House provided for the suspension of import duty on heptanoic acid for a period of 3 years. During the consideration of this legislation in the House we learned that this acid is produced as a byproduct of nylon manufacture and is used in the United States as a specialized lubricant primarily for military purposes.

The Senate in its consideration of this legislation amended the bill with a new section adopted to insure a correct interpretation of the provision "waterproof cloth" in paragraph 907 of the Tariff Act. The new Senate amendment in effect clarifies the meaning of the term "waterproof" when applied to certain cloths to cloths of a kind generally used in the manufacture of articles which are designed to afford protection against water to the extent expected of raincoats, protective sheeting, and so forth. The House conferees accepted the Senate amendment.

Mr. MILLS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

Mr. FULTON. A division.

The SPEAKER. What does the gentleman want a division for?

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present. Mr. Speaker, I object to the vote on the ground that a quorum is not present and I make the point of order that a quorum is not present.

The SPEAKER. Will the gentleman withhold that until the Chair receives a message from the Senate?

Mr. HOFFMAN of Michigan. Out of consideration for the Senate, I certainly will.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. McGown, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13161) entitled "An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to Senate amendments Nos. 3, 16, 23, 30, 34, 37, 56, 63, and 84 to the above-entitled bill.

The message further announced that the Senate recedes from its amendments Nos. 7 8, 9, 10, 11, 12, 13, 14, 15, and 62.

The SPEAKER. Does the gentleman from Michigan insist on his point of order?

Mr. HOFFMAN of Michigan. I must; I have been told to.

The SPEAKER. The gentleman from Michigan makes the point of order that a quorum is not present. Evidently no quorum is present.

Mr. MILLS. Mr. Speaker, I move a call of the House.

Mr. HOFFMAN of Michigan. At the request of the gentleman who asked me to make the point——

The SPEAKER. The Chair has already declared that a quorum is not present.

Mr. HOFFMAN of Michigan. I will make it later, then.

The SPEAKER. Without objection a call of the House is ordered. The clerk will call the roll.

CALL OF THE HOUSE

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 202]

Alger	Grant	Osmers
Anderson, Mont.	Green, Oreg.	Pilcher
Ashmore	Hays	Pirnie
Auchincloss	Healey	Preston
Barden	Hébert	Rains
Bass, Tenn.	Hess	Riley
Baumhart	Jackson	Rogers, Colo.
Boggs	Johnson, Md.	Rogers, Mass.
Bolling	Keith	Rogers, Tex.
Bowles	Kilburn	Shipley
Brooks, La.	King, Calif.	Sikes
Buckley	Kluczynski	Sisk
Canfield	Lafore	Smith, Kans.
Celler	Landrum	Taylor, N.Y.
Curtis, Mo.	Lankford	Teller
Davis, Tenn.	Loser	Thompson, La.
Diggs	McDowell	Thompson, N.J.
Dingell	McSween	Udall
Dooley	Macdonald	Vinson
Doyle	Machrowicz	Weis
Durham	Magnuson	Whitener
Evins	Martin	Widnall
Fisher	Mason	Willis
Ford	Minshall	Wilson
Forrester	Mitchell	Withrow
Gilbert	Moore	
	Murray	

The SPEAKER. On this rollcall 353 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HEPTANOIC ACID

The SPEAKER. The question is on the conference report.

Mr. KEARNS. Mr. Speaker, I would like to have some explanation of this matter.

Mr. MILLS. Mr. Speaker, I was in process of explaining that this is an amendment adopted in the Senate I believe by unanimous approval, to a bill that passed the House by unanimous consent.

The Senate amendment endeavors to correct an interpretation of the provision "waterproof cloth" which is contained in paragraph 907 of the Tariff Act of 1930. What we are doing is enacting a regulation of the Treasury Department, Bureau of Customs, with respect to what constitutes waterproof cloth. This matter was recomended to us by the Treasury Department and the Department of Commerce, this being necessary, so we were told, to plug a loophole in the Tariff Act in order to prevent materials from coming into the United States that are not to be used for waterproof purposes under the waterproof paragraph at a much less tariff duty that they would have to pay if they came through under the proper tariff paragraph. It is that simple.

It has nothing whatsoever to do with the quantity that may come in, but we are determined, as far as the conference committee is concerned, to insure that when things come into the United States from abroad, they must pay the rate of duty prescribed by law and that they should not be permitted to come in in violation of the intention of the law and the interpretation of the law by the Bureau of Customs.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. I have the utmost respect for the chairman of the Committee on Ways and Means, and may I say that I would like to just acquiesce in his program, if he feels this is for the best interests of this country.

I would like to interject that this is the birthday of Dick Simpson, who was formerly a Member.

Mr. MILLS. And we miss him greatly.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Pennsylvania.

Mr. FULTON. The question comes up on the type of procedure this is. This is an original bill covering heptanoic acid. Then it goes over to the other body and, late in the evening of Friday, with not many present, there is added an amendment offered by the gentleman from Rhode Island who puts in a provision with respect to velveteen and waterproofing.

Mr. MILLS. No. This is not a provision affecting velveteen.

Mr. FULTON. It changes the kind of listing on the ordinary waterproof cloth that comes into the country. This actually affects the district represented by the gentleman from New York, Mr. BECKER.

Mr. MILLS. Let me explain to the gentleman what it does. It has to do with the definition of "waterproofing." If material comes into the United States

for the purpose of being used for waterproof purposes, it will continue to come under this paragraph. However, if it is not to be used for that purpose—take gingham that is coming in here as dress material, and not to be used as a waterproof material at all, should it be permitted to enjoy a lesser rate of duty because they can smear something on it and make it possible to be classified as a waterproof cloth, as interpreted by the court? We do not think they should be permitted to make a shambles of provisions of the tariff law, and that the people who import these things into the United States ought to pay what the law requires them to pay and what it is intended they should pay.

Mr. FULTON. Then the question, Why was this put on as a rider by a Senate amendment to the House bill when it was not in the House bill?

Mr. MILLS. If the gentleman will pardon me, I introduced the bill some weeks ago at the request of the Treasury Department, and after the Treasury Department developed the language; and I was told that the Department of Commerce also recommended it. Although the State Department is against it, the other departments of the Government are for it. The Treasury Department, through the Bureau of Customs, is the one that has to collect the tariff duties, and we are trying to assist them through this legislation in collecting what the Congress has intended what shall be paid in the way of a duty on this particular kind of cloth.

Mr. FULTON. One more question. Did Congressman FRANK BECKER of New York have notice ahead of time that this was going to be put on suddenly tonight?

Mr. MILLS. I do not know that he did. I do not know that I did, but we operate here in a legislative body consisting of two groups, and certainly the other group has a right to pass judgment on matters of this sort, and if they want to amend our bills, we cannot deny them that opportunity. They have not called me to tell me when they are proposing an amendment, and I am sure they have not called anyone else over there. But, we have it before us, accepted unanimously by your House conferees in the spirit of trying to make the Tariff Act operate in the way it is intended to operate with respect to what is waterproof cloth and not let somebody import material into the United States in a way contrary to what is intended under the Tariff Act.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may extend their remarks on the conference reports just adopted.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, as it passed the House, the bill, H.R. 12659, simply provided for a 3-year suspension of the import duties on heptanoic acid. The Senate amended the bill by adding a new section relating to the definition of the term "waterproof cloth" as found in paragraph 907 of the Tariff Act of 1930. The purpose of this amendment is to close a loophole in the tariff laws, whereby certain cloth can today be imported as waterproof cloth and pay a lower rate of duty than that which would apply if the cloth were not able to be entered as waterproof cloth. The amendment would do this by providing that the term "waterproof cloth" shall be limited to cloths generally used in the manufacture of articles designed to afford protection against water, and by further providing that cloth possessing water-repelling characteristics shall not be classifiable as waterproof cloth unless it is of a kind generally used in the manufacture of such articles.

The House receded and accepted the Senate amendment.

ACQUIRING CERTAIN PUBLIC LANDS FOR RECREATIONAL USE

Mr. KING of Utah. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill—S. 2757—to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreational use.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, effective as of September 21, 1959, subsection (b)(1)(A) of the Act of June 14, 1926 (44 Stat. 741), as amended by the Acts of June 4, 1954 (68 Stat. 173, 174) and of September 21, 1959 (73 Stat. 571; 43 U.S.C. 869), is hereby amended by inserting after the word "State" the words "(including any agency or instrumentality thereof)" and by substituting a colon for the period at the end thereof and by adding the following thereafter:

"*Provided, however,* That should any State fail in any one calendar year to secure the maximum herein specified, other than small roadside parks and rest sites, additional conveyances may be made thereafter to that State pursuant to any application on file with the Secretary of the Interior on the last day of said year, to the extent that the conveyances would not have exceeded the limitations of said year."

With the following committee amendments:

Page 1, line 4, after "(A)" insert: "of section 1".

Page 1, strike out line 8, and insert: "words 'or the State park agency or any other agency having jurisdiction over the State park system of said State designated by the Governor of that State as its sole representative for acceptance of lands under this provision,'"

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEY CERTAIN LANDS TO MINERAL COUNTY, NEV.

Mr. BARING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill—S. 3212—to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev.

The clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Nevada?

There was no objection.

The clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior or the Administrator of General Services, if the lands described in paragraph (1) of this section come within his jurisdiction for disposal purposes, shall issue to the county of Mineral, State of Nevada, upon the payment by the county into the Treasury of the United States, not more than five years after the Secretary or the Administrator has notified the county of the purchase price, which shall be an amount equal to the sum of the costs of extinguishing any adverse claims to the lands to be patented, the costs of any necessary survey, and the fair market value of the lands as determined by the Secretary or the Administrator after the appraisal of the lands by contract appraisal or otherwise, a patent or deed for the following described lands, situated in the State of Nevada and comprising approximately two thousand and forty acres (all range references are to the Mount Diablo base and meridian):

(1) The south half of the south half of section 22; the southeast quarter of section 32; all of section 28; the northwest quarter, the northeast quarter, the southwest quarter, and the northwest quarter of the southeast quarter of section 33; the northwest quarter of the northeast quarter, the northeast quarter of the northwest quarter, and the northwest quarter of the northwest quarter of section 34, township 8 north, range 30 east, but the Administrator of General Services shall not issue a deed for the northeast quarter of the northwest quarter of section 34, township 8 north, range 30 east, until such time as this land shall have become available for disposal as surplus property as described by the Federal Property and Administrative Services Act of 1949, as amended.

(2) The northwest quarter of the northwest quarter of section 4; the northeast quarter, the west half of the southeast quarter, and the northeast quarter of the southeast quarter of section 5, township 7 north, range 30 east, but the Secretary of the Interior shall not issue a patent for the west half of the southeast quarter and the northeast quarter of the southeast quarter of section 5, township 7 north, range 30 east, until such time as this land shall be returned by the Department of the Navy to the Department of the Interior.

(3) The north half of the northwest quarter and the northwest quarter of the northeast quarter of section 10, township 7 north, range 29 east.

SEC. 2. The conveyance authorized by this Act shall be made subject to any existing valid claims against the lands described in the first section of this Act, and to any reservations necessary to protect continuing uses of those lands by the United States.

SEC. 3. Nothing contained in the preceding provisions of this Act shall be construed to preclude the county of Mineral, State of Nevada, from purchasing, in accordance with

such preceding provisions, only such portion or portions, by legal subdivision of the public land surveys, of the above described lands as such county elects, nor shall the purchase by such county of only a portion or portions of such lands be construed to constitute a waiver or relinquishment of any of its rights under this Act to purchase, in accordance with such preceding provisions and by legal subdivisions of the public land surveys, the remainder of such lands, or any portion thereof.

SEC. 4. All moneys received from the conveyance of lands under the terms of this Act shall be disposed of in the same manner as moneys received from the sale of public lands, except that moneys received as reimbursement for costs of appraisal, surveys, and extinguishing adverse claims may be used by the Secretary for said purposes without appropriation..

SEC. 5. The lands described in section 1 of this Act shall be segregated from all forms of appropriation under the public land laws including the mining and mineral leasing laws, from the date of approval of this Act until the Secretary shall provide otherwise by publication of an order in the Federal Register.

With the following committee amendment:

On page 3, strike out all of section 3.

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FEDERAL COAL MINE SAFETY ACT

Mr. BAILEY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill—S. 743—to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

Mr. SCHERER. Mr. Speaker, I object.

Mr. BAILEY. Mr. Speaker, I regret very much the objection of the gentleman from Ohio to the consideration of this legislation. I had hoped to come into the well of the House to plead the cause of one-quarter million miners who labor in underground darkness in order that we, of this Nation and of the world, might have light.

The proposed amendments to the mine safety law contained in S. 743 happen to be Republican proposals, approved in the other Body at the suggestion of Senator COOPER of Kentucky, which proposals are understood to be a compromise between the large and small coal operators on the extent to which we would remove the exemption in the present law effecting mines employing less than 15 men and apply this exemption to mines employing 7 men, or less.

S. 743 passed almost unanimously in the Senate. It was approved on a 29-to-1 vote in the House Labor Committee and certified to the Rules Committee. No rule was granted by this committee.

The legislation is predicated for the need of throwing greater safeguards around the 35,000 miners employed in these small mines.

The mine safety law passed in 1953 has resulted in reduction of one-half the fatalities and crippling injuries that took place in the industry prior to the approval of the mine safety law. At present, fatalities and injuries in the larger mines, subject to Federal inspection, are 1.08 fatality or injury to every million tons of coal mined; while in the small mines, employing less than 15 men, fatality or injury is 2.80 for 1 million tons of coal mined.

I submit, Mr. Speaker, that this additional authority granted the Federal mine inspectors may cost operators of these small mines an extra outlay covering the installation of proper safety devices but I also submit, Mr. Speaker, that you cannot measure the matter of safety in dollars and cents involved in making these changes to insure greater safety.

The gentleman making the objection to the amendments represents a District in the city of Cincinnati, Ohio. He has no miners in his District. He does have a handful of small operators carrying on mining activities in the bordering State of Kentucky.

The gentleman would put a dollar sign on this proposal in order to protect the profits of these operators at the expense of the lives and health of the miners working under unsafe conditions imposed by the operators.

If the gentleman of Ohio takes advantage of a technicality in the House procedure, he must accept full responsibility for himself and his political party in blocking legislation needed to afford the same degree of safety that other miners enjoy in the mines presently under Federal inspection.

Mr. FRELINGHUYSEN. Mr. Speaker, as a member of the Education and Labor Committee, I would like to comment on S. 743. First of all I must acknowledge that this legislation has been backed in principle at least by the administration. Nonetheless this bill is admittedly controversial, and needs most careful consideration.

This bill seeks to remove the exemption frequently granted to mines employing less than 14 persons from certain provisions of the Federal Coal Mine Safety Act. On the surface this may not sound controversial, but the effect of such a removal of this exception might be considerable. Certainly in the closing hours of this session this bill could not be adequately discussed, nor its merits fully debated.

As the report on this bill states, the intent is to promote safety in small mines. It has been rigorously argued, however, that pasage of this bill would have little or no effect on the safety of small mines. It has also been alleged that this bill might have a disastrous effect on those employed in these mines by depriving them of their livelihood.

Unfortunately these arguments and allegations have not been made before our committee, and there has been no opportunity to determine their validity. However, if these allegations are true, enactment of this bill might cause considerable numbers of mines to be thrown out of work. Such an outcome could hardly be called constructive, though the resulting unemployment might indeed bring about a reduction of the present accident rate.

Although I served as a member of the subcommittee which considered this bill, I am far from satisfied that the economic consequences might not be serious. I for one feel we should not add to the problems of the already ailing coal industry by legislation which has not been adequately considered.

This bill (S. 743) was discussed by only one witness, Marling Ankeny, Director of the Bureau of Mines. His testimony took only 17 minutes. No witness representing small coal mine operators was given the opportunity to discuss this bill, and, more particularly, the provisions which distinguish S. 743 from similar legislation under consideration in 1959.

The bill has a number of so-called "softening" provisions, which it is claimed would protect small mines from undue expense and hardship resulting from application of Federal regulations. Perhaps these provisions would have the desired result. On the other hand it surely would have been reasonable to hear testimony from those who might be thus protected.

Under these circumstances, Mr. Speaker, it is my feeling it is just as well that hasty action has been avoided.

Incidentally, Mr. Speaker, I have discussed this bill during the day, and indeed on previous occasions, with a number of my colleagues. I have found that a number of others, including perhaps more on the other side of the aisle than on my own, feel this whole question should be examined more thoroughly at a later date.

Mr. SCHERER. Mr. Speaker, I objected to the attempt to push S. 743 through the House of Representatives by unanimous consent on the very last day and during the closing hours of the 86th Congress without debate. This is important legislation but those who oppose it certainly have a right to be heard and present to the House their arguments in opposition instead of having it railroaded through the Congress in a few seconds. The proponents had 2 years to bring this measure to the floor and can not now complain about anyone who merely asks the right of the opponents to be heard. When the proponents of this bill in the House tell the people for whom they speak that a naughty Republican is responsible for this legislation being sidetracked they should also tell them about their own negligence in bringing this bill to the floor for 2 years especially since they have been in control of the House with almost a 2-to-1 majority.

SELECTION OF PHYSICIAN UNDER LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Mr. WIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill—H.R. 12574—to amend the Longshoremen's and Harbor

Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 7 of the Longshoremen's and Harbor Workers' Compensation Act is amended to read as follows:

"MEDICAL SERVICES AND SUPPLIES

"SEC. 7. SELECTION OF PHYSICIAN.—(a) The employer shall furnish such medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus, for such period as the nature of the injury or the process of recovery may require.

"(b) The employee shall have the right to choose an attending physician from a panel of physicians to be named by the employer subject to the provisions of subsection (c) of this section. If, due to the nature of the injury, the employee is unable to select his physician from a panel and the nature of the inquiry requires immediate medical treatment and care, the employer shall select a physician for him from the panel. Nothing contained in this section shall limit the right of the employee to make a second choice of physician from such panel. The deputy commissioner may, under rules prescribed by the Secretary, permit an injured employee to select a physician not on the panel when specialized services are needed or in unusual circumstances. The deputy commissioner shall have authority to determine the necessity, character, and sufficiency of any medical aid furnished or to be furnished and shall have authority to order a change of physicians or hospitals when in his judgment such change is desirable or necessary.

"(c) The deputy commissioner shall approve the qualifications of the panel of physicians named by the employer and shall determine the number of physicians to be named. In determining the size of the panel, he shall take into account the number of competent, suitable, and impartial physicians conveniently available to the community in which the medical service is required. Every employer shall post the names and addresses of the physicians on his panel in such manner as to afford his employees reasonable notice thereof.

"(d) If the employer fails to provide the medical or other treatment, services, and supplies required to be furnished by subsection (a), after request by the injured employee, or fails to maintain a panel of physicians as required by subsection (c), or fails to permit the employee to choose an attending physician from such panel, such injured employee may procure such medical or other treatment, services, and supplies and select a physician to render treatment and services at the expense of the employer. The employee shall not be entitled to recover any amount expended by him for such treatment or services unless he shall have requested the employer to furnish the same and the employer shall have refused or neglected to do so, or unless the nature of the injury required such treatment and services and the employer or his superintendent or foreman having knowledge of such injury shall have neglected to provide the same; nor shall any claim for medical or surgical treatment be valid and enforceable, as against such employer, unless within twenty days following the first treatment the physician giving such treatment furnish to the employer and the deputy commissioner a report of such injury and treatment, on a form prescribed by the Commission. The deputy commissioner may, however, excuse the failure to furnish such report within twenty days when he finds it to be in the interest of justice to do so, and he may, upon application by a party in interest, make an award for the reasonable value of such medical or surgical treatment so obtained by the employee. If at any time during such period the employee unreasonably refuses to submit to medical or surgical treatment, the deputy commissioner may, by order, suspend the payment of further compensation during such time as such refusal continues, and no compensation shall be paid at any time during the period of such suspension, unless the circumstances justified the refusal.

"(e) Whenever in the opinion of the deputy commissioner a physician has not impartially estimated the degree of permanent disability or the extent of temporary disability of any injured employee, the deputy commissioner shall have the power to cause such employee to be examined by a physician selected by the deputy commissioner and to obtain from such physician a report containing his estimate of such disabilities. If the report of such physician shows that the estimate of the physiscian has not been impartial from the standpoint of such employee, the deputy commissioner shall have the power in his discretion to charge the cost of such examination to the employer, if he is a self-insurer, or to the insurance company which is carrying the risk.

"(f) All fees and other charges for such treatment or service shall be limited to such charges as prevail in the same community for similar treatment of injured persons of like standard of living, and shall be subject to regulation by the deputy commissioner.

"(g) The liability of an employer for medical treatment as herein provided shall not be affected by the fact that his employee was injured through the fault or negligence of a third party not in the same employ, or suit has been brought against such third party. The employer shall, however, have a cause of action against such third party to recover any amounts paid by him for such medical treatment in like manner as provided in section 33(b) of this Act."

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. WIER. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. Mr. Speaker, I would like to concur in the request of the distinguished gentleman from Minnesota for the passage of this bill.

Mr. WIER. I thank the distinguished gentleman from Pennsylvania.

The SPEAKER. The question is on passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

COMPENSATION UNDER LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Mr. WIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill—H.R. 12777—to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Longshoremen's and Harbor Workers' Compensation Act, as amended (33 U.S.C. 906), is amended to read as follows:

"SEC. 6. (b) Compensation for disability shall not exceed $70 per week and compensation for total disability shall not be less than $18 per week: *Provided, however,* That if the employee's average weekly wages, as computed under section 10, are less than $18 per week, he shall receive as compensation for total disability his average weekly wages."

SEC. 2. Section 9(e) of the said Act is hereby amended to read as follows:

"(e) In computing death benefits the average weekly wages of the deceased shall be considered to have been not more than $105 nor less than $27 but the total weekly compensation shall not exceed the weekly wages of the deceased."

SEC. 3. Section 14(m) of the said Act is hereby amended to read as follows:

"(m) The total money allowance payable to an employee as compensation for an injury under this chapter shall in no event exceed in the aggregate the sum of $24,000: *Provided,* That this limitation shall not apply to cases of permanent total disability or death: *And provided further,* That in applying this limitation there shall not be taken into account any amount payable under section 908(g) for maintenance during rehabilitation or any amount of additional compensation required to be paid under this section for delay or default in the payment of compensation or any amount accruing as interest upon defaulted compensation collectible under section 918 of this title."

SEC. 4. The amendments made by the foregoing provisions of this Act shall become effective as to injuries or disability sustained on or after the date of enactment.

With the following committee amendments:

Page 1, line 3, after "That" insert "subsection (b) of".

Page 1, line 6, strike out "SEC. 6.".

Page 2, line 15, strike out "chapter" and insert in lieu thereof "Act".

Page 2, beginning in line 20, strike out "section 908(g) of this title" and insert in lieu thereof "section 8(g)".

Page 3, line 2, strike out "section 918 of this title" and insert in lieu thereof "section 18".

The committee amendments were agreed to.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. WIER. I yield to the distinguished gentleman from Pennsylvania.

Mr. KEARNS. Mr. Speaker, I would like to join the distinguished gentleman from Minnesota in support of this bill.

Mr. WIER. I thank the distinguished minority leader of the Committee on Labor for his cooperation.

Mr. ROONEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York.

There was no objection.

Mr. ROONEY. Mr. Speaker, I wish to commend the distinguished gentleman from Minnesota [Mr. WEIR], the distinguished gentleman from Pennsylvania [Mr. KEARNS] and the majority and minority members of the Committee on Education and Labor for favorably reporting the pending bill H.R.

12777 as well as the bill just passed by the House, H.R. 12574, amending the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes. Particular credit for this legislation goes to the author of both these bills, the distinguished gentleman from New York [Mr. ZELENKO] to whom the longshoremen and harbor workers in every port of the United States owe a deep debt of gratitude. Speaking for the Brooklyn longshoremen and port workers, I acknowledge that debt. I trust that before we adjourn sine die tonight the other body will act favorably on both these bills.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

DISTRICT OF COLUMBIA REDEVELOPMENT ACT

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3688) to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the District of Columbia Redevelopment Act of 1945 (60 Stat. 790), as amended (sec. 5–702, D.C. Code, 1951 edition), is amended—

(a) by redesignating the definitions designated "(b)" through "(r)" as "(c)" through "(s)", respectively;

(b) by inserting after the definition of "Agency" in such section the following new definition:

"(b) 'Blighted area' means any area, whether residential or nonresidential, or a combination of residential and nonresidential, which is substandard within the meaning of section 2 of this Act, regardless of whether the buildings in such area are used or will be used after redevelopment for human habitation.";

(c) by striking "an area" in the definition of "Project area" and inserting in lieu thereof "a blighted area"; and

(d) by inserting in the definition of "Redevelopment company" after the words "project area", the phrase "or part thereof".

SEC. 2. Subsection (a) of section 5 of such Act (sec. 5–704(a), D.C. Code, 1951 edition) is amended by striking "section 7(i)" and inserting in lieu thereof "section 7(h)".

SEC. 3. Paragraph numbered (2) of subsection (b) of section 6 of such Act (sec. 5–705, D.C. Code, 1951 edition) is amended by adding at the end thereof the following: "Such plan may provide for the redevelopment of areas which are residential or nonresidential in character, or a combination thereof, and such areas may be redeveloped for (i) residential uses, (ii) nonresidential uses, or (iii) a combination of residential and nonresidential uses, as the Planning Commission and the District Commissioners may determine appropriate to facilitate the proper growth and development or redevelopment of the community in accordance with sound planning standards and to afford maximum opportunity for the redevelopment of the project area by private enterprise."

SEC. 4. The second sentence of subsection (b) of section 7 of such Act (sec. 5–706(b), D.C. Code, 1951 edition), is amended (a) by striking "than publicly owned properties" and inserting in lieu thereof "publicly owned properties which are not to be devoted to public use"; (b) by striking the words "and District" in the last clause of said second sentence; and (c) by inserting immediately before the period at the end of subsection (b) the following: "; and the District Commissioners are authorized to transfer any real property owned by the government of the District of Columbia to the Agency for such sums or other consideration as may be agreed upon: *Provided,* That the District Commissioners may not transfer any such real property until the expiration of thirty days from the date upon which a report of the facts concerning any such proposed transfer is submitted to the Committees on the District of Columbia of the Senate and House of Representatives."

SEC. 5. The first section of the Act approved December 20, 1944 (58 Stat. 819), as amended (sec. 1–244, D.C. Code, 1951 edition), is amended by adding the following subsection:

"(1) To enter into leases of, or to grant revocable permits for the use of, the public space over or under the streets and alleys of the District of Columbia to an extent not inconsistent with the use of such streets and alleys by the general public for the purpose of travel, and in connection with any such lease or permit to impose such terms, including but not limited to the deposit of bond or other security, and to provide for the payment of such rents or fees as the Commissioners may, in their discretion, determine to be necessary or desirable, but the Commissioners shall, in connection with entering into a lease for, or granting a permit for, the use of public space over the streets and alleys of the District of Columbia, provide as a condition of any such lease or permit that such space shall not be used by the lessee or permittee in such manner as to deprive any real property not owned by such lessee or permittee of its easements of light, air, and access."

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That the first section of the Act approved December 20, 1944 (58 Stat. 819), as amended (sec. 1–244, D.C. Code, 1951 edition), is amended by adding at the end thereof the following new subsection:

"(1) To enter into leases of, or to grant revocable permits for the use of, the public space over or under Ninth Street SW. in the District of Columbia to an extent not inconsistent with the use of such street by the general public for the purpose of travel, and in connection with any such lease or permit to impose such terms, including but not limited to the deposit of bond or other security, and to provide for the payment of such rents or fees as the Commissioners may, in their discretion, determine to be necessary or desirable, but the Commissioners shall, in connection with entering into a lease for, or granting a permit for, the use of public space over said street in the District of Columbia, provide as a condition of any such lease or permit that such space shall not be used by the lessee or permittee in such manner as to deprive any real property not owned by such lessee or permittee of its easements of light, air, and access."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The title was amended so as to read: "An act to amend the act of December 20, 1944, with respect to certain powers of the Board of Commissioners of the District of Columbia."

A motion to reconsider was laid on the table.

DISTRICT OF COLUMBIA ALCOHOLIC BEVERAGE CONTROL ACT

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3258) to amend the District of Columbia Alcoholic Beverage Control Act.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

Mr. SPRINGER. Mr. Speaker, I object.

THE DALLES FEDERAL RECLAMATION PROJECT, OREGON

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 2195) to authorize the Secretary of the Interior to construct, operate, and maintain the western division of the Dalles Federal reclamation project, Oregon, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of furnishing water for the irrigation of approximately five thousand five hundred acres of arid land in Wasco County, Oregon, the Secretary of the Interior is authorized to construct, operate, and maintain the western division of the Dalles Federal reclamation project, Oregon. The western division shall consist of the following principal works: a main pumping plant to be located at a site on the Columbia River; a booster and relift pumping plants with reregulating reservoirs; and a distribution system.

SEC. 2. (a) In constructing, operating, and maintaining the western division of the Dalles project, the Secretary shall be governed by the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto).

(b) The period provided in subsection (d) of section 9 of the Reclamation Project Act of 1939, as amended, for repayment of construction costs properly allocable to any block of lands and assigned to be repaid by the irrigators may be extended to fifty years, exclusive of a development period, from the time water is first delivered to that block or to as near that number of years as is consistent with the adoption and operation of a repayment formula as therein provided. Costs allocated to irrigation in excess of the amount determined by the Secretary to be within the ability of the irrigators to repay within a fifty-year period shall be returned to the reclamation fund within a fifty-year period from the date of the first delivery of water from the facilities authorized by this legislation from net revenues derived by the Secretary of the Interior from the disposition of power marketed through the Bonneville Power Administration, which are over and above those required to meet any present obligations assigned for repayment from

such net revenues. The term "construction costs" used herein shall include any irrigation operation and maintenance costs during the development period which the Secretary finds it proper to fund because they are beyond the ability of the water users to pay during that period.

(c) Power and energy required for irrigation pumping for the western division of the Dalles Federal reclamation project shall be made available by the Secretary from the Dalles Dam powerplant and other Federal plants interconnected therewith at rates not to exceed the costs of such power and energy from the Dalles Dam taking into account all costs of the dam, reservoir, and powerplant which are determined by the Secretary under the provisions of the Federal reclamation laws to be properly allocable to such irrigation pumping power and energy.

(d) That portion of the cost of constructing the works authorized by this Act which the Secretary finds to be properly allocable to the conservation and development of fish and wildlife, in accordance with the Fish and Wildlife Coordination Act (48 Stat. 401, as amended, 16 U.S.C. 661, and the following), together with the portion of the operation, maintenance, and replacement costs allocated to this function, shall be nonreimbursable and nonreturnable under the reclamation laws.

SEC. 3. There is hereby authorized to be appropriated for construction of the works authorized by this Act not to exceed $6,000,000, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein.

With the following committee amendments:

Page 2, line 19, after "fund" insert "within a fifty-year period from the date of the first delivery of water from the facilities authorized by this legislation".

Page 4, strike out lines 3 through 5, inclusive, and insert:

"SEC. 3. There is hereby authorized to be appropriated for construction of the works authorized by this Act not to exceed $6,000,000, plus or minus such amounts, if any, as may be justified by reason of ordinary functions, in construction costs as indicated by engineering cost indices applicable to the type of construction involved herein".

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CITIZEN BAND OF POTAWATOMI INDIANS OF OKLAHOMA

Mr. ASPINALL. Mr. Speaker, I offer a resolution (H. Res. 640) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the Senate be requested to return to the House the bill (H.R. 7990) to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma, with the Senate amendments thereto, and the message of the House thereon.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CHEYENNE AND ARAPAHO INDIANS

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 816) to set aside certain lands in Oklahoma for the Cheyenne and Arapaho Indians, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert "That there are hereby eliminated from the Cheyenne and Arapaho subagency reservation at Concho, Oklahoma, approximately four thousand nine hundred acres of land considered excess to the present school and agency reserve needs. The Secretary of the Interior is authorized to convey to the Cheyenne and Arapaho Tribes a fee simple title to approximately three thousand nine hundred acres of such lands, together with the improvements thereon. Approximately one thousand acres of such land shall be transferred by the Secretary of the Interior to the Attorney General for use in connection with the El Reno Reformatory. The land transferred to the Attorney General shall be selected in a reasonably compact unit that will cause a minimum disruption in the agricultural program now conducted by the Bureau of Prisons. The title of the tribes to any land conveyed pursuant to this section shall be subject to no exemption from taxation or restriction on use, management, or disposition because of Indian ownership.

"SEC. 2. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission."

Amend the title so as read: "An act to convey certain lands in Oklahoma to the Cheyenne and Arapaho Indians, and for other purposes."

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

CONSTRUCTION OF CHENEY DIVISION, WICHITA FEDERAL RECLAMATION PROJECT, KANSAS

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1092) to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to construct, operate, and maintain the Cheney division, Wichita Federal reclamation project, consisting of a dam, reservoir, and related facilities near Cheney, Kansas, on the North Fork of the Ninnescah River, Kansas, for the purposes of furnishing water for municipal uses, controlling floods, facilitating irrigation, enhancing recreational opportunities, preserving and propagating fish and wildlife, and for related purposes.

SEC. 2. In constructing, operating, and maintaining the works authorized by this Act, the Secretary shall be governed by the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Act amendatory thereof or supplementary thereto), except as is otherwise provided in this Act.

SEC. 3. Construction of the project shall not be commenced, and no construction contracts therefor shall be awarded, until a contract or contracts complying with the provisions of this Act have been entered into with the city of Wichita under which it shall have obligated itself to repay to the United States, within a period of not more than 40 years from the time water is first made available from said works, those portions of the Federal costs of constructing, operating, and maintaining the works herein authorized which are allocated to municipal water supply, and interest on the unamortized balance of the amount of construction costs so allocated including interest during construction. If any net revenues are derived from temporary water supply contracts, prior to the end of the repayment period for water furnished from, by, or through the works authorized herein, the construction cost obligation of the city may be decreased by that portion of the amount of any such net revenues which bears the same proportion to the total amount of such net revenues as the amount of the project costs allocated to municipal water supply bears to the total Federal costs of constructing the project. Interest shall be at the average rate, which rate shall be certified by the Secretary of the Treasury, paid by the United States on its marketable long-term securities outstanding on the date of this Act and adjusted to the nearest one-eighth of 1 per centum. Upon the completion of the payment of the city's construction cost obligation, together with the interest thereon, the city shall have a permanent right to the use of that portion of the storage space in the project allocable to municipal water supply purposes.

SEC. 4. Contracts may be entered into with the city of Wichita pursuant to the provisions of this Act without regard to the last sentence of subsection (c) of section 9 of the Reclamation Project Act of 1939.

SEC. 5. The Secretary is authorized to transfer to the city of Wichita the care, operation, and maintenance of the works herein authorized and, if such transfer is made, to deduct from the obligation of the city the reasonable capitalized equivalent of that portion of the estimated operation and maintenance costs of the undertaking which, if the United States continued to operate the works, would be allocated to flood control and fish and wildlife purposes. Prior to taking over the care, operation, and maintenance of said works, the city shall obligate itself to operate them in accordance with criteria specified by the Secretary of the Army with respect to flood control and by the Secretary of the Interior with respect to fish and wildlife.

SEC. 6. The Secretary may make such reasonable provision in connection with the works of the Cheney division, Wichita Federal reclamation project, in accordance with section 2 of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended, 16 U.S.C., sec. 661, and the following), as he finds to be required for the preservation and propagation of fish and wildlife, and to acquire approximately 2,500 acres of land for wildlife management purposes within and adjacent to Cheney Reservoir. A minimum pool of approximately ten thousand acre-feet shall be maintained in said reservoir for fish life. An appropriate portion of the construction cost of the Cheney division of the project shall be allocated as provided in said Act and it, together with the portion of the construction cost allocated to flood control and the portions of the operation and maintenance costs allocated to these functions or the equivalent capitalized value thereof,

shall be nonreimbursable and nonreturnable under the Federal reclamation laws. Appropriate portions of the project area may be made available by the Secretary of the Interior to the Kansas Forestry, Fish and Game Commission for fish and wildlife management as provided in sections 3 and 4 of said Act.

SEC. 7. The Secretary may, upon conclusion of a suitable agreement with any qualified agency of the State of Kansas or political subdivision or agency thereof for assumption of the administration, operation, and maintenance thereof at the earliest practicable date, provide minimum basic public recreation facilities at or near Cheney Reservoir and the cost thereof incurred by the United States shall be nonreimbursable and nonreturnable under the Federal reclamation laws.

SEC. 8. Expenditures for Cheney Reservoir may be made without regard to the soil survey and land classification requirements of the Interior Department Appropriation Act, 1954 (67 Stat. 261, 266–267).

SEC. 9. There are hereby authorized to be appropriated such sums as may be required to carry out the purposes of this Act.

With the following committee amendments:

Page 2, line 6, strike out "Act" and insert: "Acts".

Page 5, strike out lines 16 through 18, inclusive, and insert:

"SEC. 9. There is hereby authorized to be appropriated for construction of the works authorized by this Act not to exceed $18,274,000, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks on the last two bills at the conclusion of the action taken thereon.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. ASPINALL. Mr. Speaker, S. 1092, to authorize construction of the Cheney division of the Wichita reclamation project, and S. 2195, to authorize the western division of the Dalles reclamation project, are both meritorious measures and I am glad to support their passage even though there has been no opportunity for debate. Normally I would not be agreeable to passing bills authorizing projects involving expenditures in the amounts involved in these bills under such a procedure because I believe every Member of the House should be fully informed on what is involved. However, because of the situation we find ourselves in with respect to time and the urgent need for immediate authorization of these projects, I am convinced that they should not be held up.

I want to assure my colleagues that the Interior and Insular Affairs Committee has given detailed and studied consideration to both of these measures and has recommended their enactment. The committee found both projects to be engineeringly and economically feasible, and the provisions of S. 1092 and S. 2195 are consistent with present law and policy relating to the authorization and construction of reclamation projects.

S. 1092 provides for construction of the $18,274,000 Cheney division in Kansas. Construction and operation of the Cheney Dam and Reservoir would provide an urgently needed supplemental water supply for the city of Wichita, a high degree of flood protection in the Ninnescah Valley and much needed fishing, hunting and recreational opportunities in the area.

S. 2195 provides for construction of the $5,649,000 western division of the Dalles project in Oregon. Water would be pumped from the Columbia River to provide a firm water supply for 5,420 acres adjacent to the city of The Dalles. Some 2,340 acres in valuable orchard crops now receive an inadequate water supply from ground water pumping. The area has been declared a critical ground water area by the State and unless a new source of water is obtained, the existing valuable orchard economy will be lost. More than 90 percent of the area will be in fruit production and the project will not contribute in any way to our agricultural surplus problems.

MINERAL RIGHTS IN CERTAIN HOMESTEAD LANDS, ALASKA

Mr. RIVERS of Alaska. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1670) to provide for the granting of mineral rights in certain homestead lands in the State of Alaska.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Alaska?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States hereby quitclaims as of the date of this Act or as of the date of issuance of patent, whichever is later, to the patentee or to his lawful heirs if title to the lands prior to the date of this Act had by devise or succession passed out of the patentee, all right, title, and interest of the United States in and to oil and gas deposits in lands in the Kenai Peninsula in the State of Alaska patented to homestead entrymen pursuant to homestead entries on which all requirements of the homestead laws had been complied with prior to July 23, 1957, except for the actual submission of acceptable final proof.

SEC. 2. Nothing in this Act shall affect the validity of any lease issued under the Mineral Leasing Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 181 and following), as amended, or any rights arising thereunder, or any of its terms and conditions except that quitclaim under the terms of this Act of any oil and gas deposit covered by such a lease shall vest in the grantee all right, title, and interest of the United States in and to such lease, including the right to all rentals, royalties, and other payments accruing after the date of quitclaim and including any authority that may have been retained by the United States to modify its terms and conditions.

With the following committee amendment:

Page 2, line 10, after "lease," insert "insofar as the lease pertains to the quitclaimed lands,"

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

DISPOSITION OF CERTAIN PUBLIC LANDS IN ALASKA

Mr. RIVERS of Alaska. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3267) to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Alaska?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of October 17, 1940 (54 Stat. 1191; 48 U.S.C. 353, note), is hereby amended—

(1) by striking out the words "$1.25 per acre" appearing in section 2 thereof and by substituting therefor the words "their fair market value as determined by the Secretary by appraisal or otherwise";

(2) by adding a new section 3 thereto reading as follows: "The State of Alaska may, with the approval of the Secretary of the Interior, select any of the lands described in section 2 of this Act in partial satisfaction of land grants made or confirmed by the Act of July 7, 1958 (72 Stat. 339, 340), subject to the terms and conditions of that Act."; and

(3) by adding a new section 4 thereto reading as follows: "Notwithstanding the provisions of section 2 of this Act, the Secretary of the Interior may sell to each of those persons who, on August 1, 1959, had on file in the Anchorage Land Office of the Bureau of Land Management, a valid application to purchase lands under this Act, the lands described in his application at the prices heretofore recommended by the Alaska Rural Rehabilitation Corporation but at not less than $1.25 per acre."

With the following committee amendment:

Page 1, line 7, after "value" insert "(but not less than $1.25 per acre)"

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HAWAII NATIONAL PARK ON MAUI, HAWAII

Mr. INOUYE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3623) to designate and establish that portion of the Hawaii National Park on the island of Maui, in the State of Hawaii, as the Haleakala National Park, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, effective July 1, 1961, the detached portion of the Hawaii National Park which lies on the island of Maui is hereby established as a separate unit of the national park system to be known as Haleakala National Park. The park so established shall be administered in accordance with the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535), as amended and supplemented, and in accordance with any other applicable provision of law relating to the Maui portion of Hawaii National Park.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MERCEDES DIVISION, LOWER RIO GRANDE REHABILITATION PROJECT, TEXAS

Mr. KILGORE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 10311) providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724) shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, in addition to the authority granted by Public Law 85-370, April 7, 1958 (72 Stat. 82), is authorized to act pursuant to the last sentence of section 1 of the Act of October 7, 1949 (63 Stat. 724), but subject to the exceptions therein contained, in the construction, rehabilitation, operation, and maintenance of the lower Rio Grande rehabilitation project, Texas, Mercedes division.

With the following committee amendment:

Page 1, line 7, strike out "therein contained," and insert "contained in the Act of April 7, 1958."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AGUA CALIENTE AND SEMINOLE RESERVATIONS, FLA.

Mr. ROGERS of Florida. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8712) to amend the Act of August 9, 1955, to authorize longer term leases of Indian lands on the Agua Caliente (Palm Springs) Reservation and the Seminole Reservation in Florida.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second sentence of the first section of the Act entitled "An Act to authorize the leasing of restricted Indian lands for public, religious, educational, recreational, residential, business, and other purposes requiring the grant of long-term leases", approved August 9, 1955 (25 U.S.C. 415), which is amended to read as follows: "All leases so granted shall be for a term of not to exceed twenty-five years, except leases of land on the Agua Caliente (Palm Springs) Reservation and on the Dania, Brighton, and Big Cypress Indian Reservation for the Seminole Indians in Florida, which may be for a term of not to exceed ninety-nine years, and except leases of land for grazing purposes which shall be for a term of not to exceed ten years."

(b) The third sentence of the first section of such Act of August 9, 1955, is amended by inserting after "residential, or business purposes" the words "(except leases the initial term of which extends for more than seventy-four years)".

With the following committee amendments:

Page 1, line 8, strike out "which".

Page 2, line 2, strike out "Reservation and on the Dania, Brighton, and Big Cypress Indian Reservations for the Seminole Indians in Florida," and insert "Navajo, Torres-Martinez, and Dania Indian Reservations."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended to read: "A bill to amend the act of August 9, 1955, to authorize longer term leases of Indian lands on the Agua Caliente (Palm Springs), Navajo, Torres-Martinez, and Dania Indian Reservations."

A motion to reconsider was laid on the table.

MEMORIAL TO THEODORE ROOSEVELT IN THE NATIONAL CAPITAL

Mr. BURLESON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8665) to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 1, after "by", insert "the living children of Theodore Roosevelt,".

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF ADDITIONAL COPIES "THE COMMISSION ON INTERGOVERNMENTAL RELATIONS"

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the concurrent resolution, House Concurrent Resolution 693, and ask for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. SCHENCK. Mr. Speaker, reserving the right to object, may I ask the gentleman what this resolution provides?

Mr. LESINSKI. Mr. Speaker, this provides for the printing of 4,600 copies of House Document No. 198 of the 84th Congress entitled "The Commission on Intergovernmental Relations."

Mr. SCHENCK. May I ask my colleague, the gentleman from Michigan, whether the resolutions he is calling up provide for the printing of this material in order to help the various committees of the House and the other body; that such material can now be printed as additional copies at a much lower cost; that each of these resolutions was brought up under unanimous consent, and I ask my colleague if these resolutions are being called up in accordance with our discussion.

Mr. LESINSKI. The gentleman has stated the situation correctly according to our discussion as to all bills reported out of the subcommittee.

Mr. SCHENCK. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. LESINSKI]?

There was no objection.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed four thousand six hundred additional copies of House Document Numbered 198 of the Eighty-fourth Congress, first session, entitled "The Commission on Intergovernmental Relations", of which four thousand shall be for the use of the House Committee on Government Operations, three hundred copies for the House document room, and three hundred copies for the Senate document room.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

U.S. DEFENSE POLICIES IN 1959

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution, House Resolution 545, and ask for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. LESINSKI]?

There was no objection.

The Clerk read the resolution, as follows:

Resolved, That the document entitled "United States Defense Policies in 1959" by

Charles H. Donnelly, Library of Congress, be printed as a House document.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GOVERNMENT PROGRAMS IN INTERNATIONAL EDUCATION

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution, House Resolution 578, and ask for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. LESINSKI]?

There was no objection.

The Clerk read the resolution, as follows:

Resolved, That there be printed for the use of the Committee on Government Operations two thousand five hundred additional copies of House Report Numbered 2712 of the Eighty-fifth Congress, second session, a survey and handbook of Government programs in international education.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMUNIST TARGET—YOUTH

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution (H. Res. 601) and ask for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. LESINSKI]?

There was no objection.

The Clerk read the resolution as follows:

Resolved, That there shall be printed fifty thousand additional copies of the report prepared and released by the Committee on Un-American Activities, Eighty-sixth Congress, current session, entitled, "Communist Target—Youth", for the use of said committee.

The resolution was agreed to.

A motion to reconsider was laid on the table.

1960 UNITED STATES CENSUS OF POPULATION

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution, House Resolution 604, and ask for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the resolution as follows:

Resolved, That there be printed additional copies of the State editions of the publication entitled "1960 United States Census of Population" so as to furnish twenty-five copies to each Member of the House of Representatives: *Provided*, That the copies received by each Member shall contain only the population figures of the State from which he is a Representative.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRICE SUPPORT AND PRODUCTION ADJUSTMENT ACTIVITIES

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution, House Resolution 641.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, which subcommittee did this resolution come from?

Mr. LESINSKI. It came from the subcommittee of the gentleman from North Carolina [Mr. FOUNTAIN].

Mr. HOFFMAN of Michigan. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. LESINSKI]?

There was no objection.

The Clerk read the resolution, as follows:

Resolved, That there be printed 16,000 additional copies of the report filed by the Committee on Government Operations entitled "Price Support and Production Adjustment Activities": *Provided*, That these additional copies be printed in conjunction with the regular press run of this report when ordered printed by the House.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF REVISED EDITION OF CONSTITUTION OF THE UNITED STATES

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (S.J. Res. 176) authorizing the preparation and printing of a revised edition of the "Constitution of the United States of America—Analysis and Interpretation," published in 1953, as Senate Document No. 170 of the 82d Congress, and ask for its immediate consideration.

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, there are a number of these bills, if I am right about it. A lot of it is political propaganda. Why does not the gentleman tell us what they will cost?

Mr. LESINSKI. I beg to differ with my colleague from Michigan. These are reports authorized by various committees of the Senate.

Mr. HOFFMAN of Michigan. Which committee does it come from?

Mr. LESINSKI. The Committee on House Administration. Our committee held hearings on it. As I understand we had completed the group of resolutions dealing with various committees of the House.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN of Michigan. If I have the floor.

Mr. GROSS. The gentleman from Ohio says this is beyond the control of the House. What if somebody should object to one of these bills coming from the other body?

Mr. HOFFMAN of Michigan. Mr. Speaker, I withdraw my reservation of objection.

Mr. BROWN of Ohio. Mr. Speaker, reserving the right to object, does the concurrent resolution now before us come from the Senate?

Mr. LESINSKI. It is a Senate joint resolution.

Mr. BROWN of Ohio. A joint resolution to do what? To reprint copies of the Constitution of the United States?

Mr. LESINSKI. For printing a revised edition of the Constitution of the United States of America.

Mr. BROWN of Ohio. That is an amazing thing to come from any body of Congress, especially from the other body.

I withdraw my reservation of objection if we are to make a reprint of the Constitution.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The Clerk read the resolution, as follows:

Whereas the Constitution of the United States of America—Analysis and Interpretation, published in 1953 as Senate Document Numbered 170, Eighty-second Congress, serves a very useful purpose by supplying essential information;

Whereas such document contains annotations of cases decided by the Supreme Court of the United States to June 30, 1952; and

Whereas many cases bearing upon the analysis and interpretation of the Constitution have been decided by the Supreme Court since June 30, 1952: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Librarian of Congress is authorized and directed to have prepared a revised edition of the Constitution of the United States of America—Analysis and Interpretation, published as Senate Document Numbered 170, Eighty-second Congress, which shall contain annotations of decisions of the Supreme Court of the United States after June 30, 1952, construing the several provisions of the Constitution. Such revised edition shall be printed as a Senate document, and three thousand and twenty-nine additional copies shall be printed, of which two thousand two hundred and five copies shall be for the use of the House of Representatives and eight hundred and twenty-four copies shall be for the use of the Senate.

SEC. 2. There are authorized to be appropriated such sums, to remain available until expended, as may be necessary to carry out the provisions of this joint resolution.

The resolution was agreed to.

DISTRIBUTION OF COPIES OF CONGRESSIONAL RECORD TO FORMER MEMBERS OF CONGRESS

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3036) to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies, and ask for its immediate consideration.

The Clerk read the title of the bill.

Mr. TABER. Mr. Speaker, reserving the right to object, has the committee which the gentlemen represents passed on this bill as to its merits and as to whether it should be done? It is not up to the House to pass everything that is put in front of it unless they think it is the right thing to do. I would like to

have that kind of explanation on every one of these bills and resolutions that are called up like this.

Mr. LESINSKI. I appreciate the remarks of the gentleman from New York. The Subcommittee on Printing of the House Administration Committee considered these resolutions.

Mr. TABER. Mr. Speaker, I object.

AUTHORIZING THE PRINTING OF ADDITIONAL COPIES OF THE HEARINGS ON EMPLOYMENT, GROWTH, AND PRICE LEVELS

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 86.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Joint Economic Committee one thousand additional copies of the hearings on employment, growth, and price levels, held by that committee during the first session of the Eighty-sixth Congress.

The Senate concurrent resolution was agreed to and a motion to reconsider was laid on the table.

AUTHORIZING THE PRINTING OF ADDITIONAL COPIES OF THE HEARINGS ON ENERGY RESOURCES AND TECHNOLOGY

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 88.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Joint Economic Committee one thousand additional copies of the hearings on energy resources and technology, held by that committee during the first session of the Eighty-sixth Congress.

The resolution was agreed to, and a motion to reconsider was laid on the table.

AUTHORIZING THE PRINTING OF ADDITIONAL COPIES OF THE FINAL REPORT AND INDEXES TO HEARINGS AND REPORTS OF THE SELECT COMMITTEE ON IMPROPER ACTIVITIES IN THE LABOR OR MANAGEMENT FIELD

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 90.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Committee on Government Operations not to exceed three thousand additional copies each of parts 2 and 3 of the final report of the Select Committee on Improper Activities in the Labor and Management Field (S. Rept. 1139, Eighty-sixth Congress, second session), pursuant to S. Res. 44 and S. Res. 249, Eighty-sixth Congress.

The Senate concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

Mr. KEARNS. Mr. Speaker, I would like to have an explanation on that.

Mr. LESINSKI. This authorizes the printing of not to exceed 3,000 additional copies each of parts 2 and 3 of the final report of the Select Committee on Improper Activities in the Labor or Management Field, at a cost of $2,597.

AUTHORIZING THE REPRINTING OF ADDITIONAL COPIES OF HEARINGS BEFORE THE SUBCOMMITTEE ON AGREEMENTS FOR COOPERATION OF THE JOINT COMMITTEE ON ATOMIC ENERGY

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 91.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be reprinted for the use of the Joint Committee on Atomic Energy two thousand additional copies of the hearings before the Subcommittee on Agreements for Cooperation of the Joint Committee on Atomic Energy on Amending the Atomic Energy Act of 1954 with respect to exchange of military information and material with allies during the second session of the Eighty-fifth Congress.

The Senate concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

AUTHORIZING THE PRINTING OF ADDITIONAL COPIES OF A COMMITTEE PRINT CONTAINING THE REPORTS OF THE STATES TO THE SENATE SELECT COMMITTEE ON NATIONAL WATER RESOURCES ON THEIR WATER RESOURCES AND PROBLEMS.

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 94.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. TABER. Mr. Speaker, reserving the right to object, has the gentleman's committee had hearings on this?

Mr. LESINSKI. Personally I did not, but the Subcommittee on Printing did.

Mr. TABER. Mr. Speaker, I object.

AUTHORIZING THE PRINTING OF A REVISED EDITION OF THE INTERNAL SECURITY MANUAL

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 96.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. TABER. Mr. Speaker, reserving the right to object, is there any limitation on the number of copies that are to be printed?

Mr. LESINSKI. Five thousand additional copies at a cost of about $3,000.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the Senate concurrent resolution as follows:

Resolved, by the Senate (the House of Representatives concurring), That there be printed as a Senate document a revised edition of the Internal Security Manual; and that five thousand additional copies be printed for the use of the Committee on the Judiciary.

The Senate concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

AUTHORIZING FOR USE OF JOINT COMMITTEE ON ATOMIC ENERGY 6,000 ADDITIONAL COPIES OF COMMITTEE PRINT

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 97.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. GROSS. Mr. Speaker, reserving the right to object, I wonder if the gentleman can tell me whether this is going to keep the Government printing presses busy until the next session of the Congress.

Mr. LESINSKI. The Senate has passed on this already. This is simply concurrence.

Mr. GROSS. What is the gentleman's opinion? Does he think this will keep the plant busy over there until the next session?

Mr. LESINSKI. These are very important.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be reprinted for the use of the Joint Committee on Atomic Energy six thousand additional copies of the Joint Committee print entitled "Summary-Analysis of Hearings,

June 22–26, 1959, on Biological and Environmental Effects of Nuclear War" printed for the use of the Joint Committee on Atomic Energy during the Eighty-sixth Congress, first session.

The resolution was agreed to.

A motion to reconsider was laid on the table.

STUDIES ON UNITED STATES-LATIN AMERICAN RELATIONS

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (S. Con. Res. 99) to print as a Senate document a compilation of studies on United States-Latin American relations.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. GROSS. Mr. Speaker, reserving the right to object, in view of the half billion dollars this afternoon that went to this cause, I wonder if the gentleman could tell me how many copies will be printed and the cost of it.

Mr. LESINSKI. Ten thousand copies at an estimated cost of $12,077. The gentleman understands we appropriated money this afternoon and we should have some place to work from, and I think this will furnish the way.

Mr. GROSS. Could you tell us where this $500 million will go?

Mr. LESINSKI. No; I could not say.

Mr. GROSS. We could not find out this afternoon. When will those be available, do you know?

Mr. LESINSKI. They should be available, I imagine, in a month or two.

Mr. GROSS. In a month or so. Well, that will be a little late for the campaign, will it not?

Mr. LESINSKI. That will be November 8.

Mr. HOFFMAN of Michigan. Mr. Speaker, if the gentleman will yield, will they be available for members of both parties?

Mr. LESINSKI. Yes; to the members of both parties.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the resolution as follows:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed as a Senate document a compilation of the studies on United States-Latin American relations prepared under the direction of the Subcommittee on American Republics Affairs of the Committee on Foreign Relations, pursuant to S. Res. 330, agreed to July 31, 1958, as amended by S. Res. 31, agreed to February 2, 1959, and S. Res. 250, agreed to February 9, 1960.

SEC. 2. There shall be printed ten thousand additional copies of such Senate document. Such additional copies shall be for the use of the Committee on Foreign Relations and the Subcommittee on American Republics Affairs.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMPILATION OF STUDIES ON U.S. FOREIGN POLICY

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (S. Con. Res. 100) to print as a Senate document a compilation of studies on U.S. foreign policy.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. GROSS. Mr. Speaker, reserving the right to object, how many copies of this will be printed, and what is the cost?

Mr. LESINSKI. Ten thousand; $19,000.

Mr. GROSS. This went up, then, to about $2 a copy; is that right?

Mr. LESINSKI. Yes.

Mr. GROSS. I object, Mr. Speaker.

PUBLICATIONS OF INTERNAL SUBCOMMITTEE

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (S. Con. Res. 107) printing for the use of the Senate Committee on the Judiciary additional copies of certain publications of its Internal Security Subcommittee.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, what will that cost?

Mr. LESINSKI. Five thousand four hundred and fifteen dollars.

Mr. HOFFMAN of Michigan. How many copies?

Mr. LESINSKI. I have not the number of additional copies.

Mr. HOFFMAN of Michigan. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed, for the use of the Senate Committee on the Judiciary, the numbers of copies specified of the following publications of its Internal Security Subcommittee:

(1) The Effect of Red China Communes on the United States (Hearing before the Subcommittee To Investigate the Administration of the Internal Security Act and Other Internal Security Laws of the Committee on the Judiciary, United States Senate, March 24, 1959), five thousand copies;

(2) Statement by J. Edgar Hoover (S. Doc. 80, Eighty-sixth Congress, second session), ten thousand copies;

(3) The Revival of the Communist International and Its Significance for the United States (Committee Print, Eighty-sixth Congress, first session), five thousand copies;

(4) Contradictions of Communism (Committee Print, Eighty-sixth Congress, first session), twenty thousand copies;

(5) Report of the Subcommittee To Investigate the Administration of the Internal Security Act and Other Internal Security Laws to the Committee on the Judiciary, United States Senate, for the Year 1958 (Committee Print, Eighty-sixth Congress, first session), ten thousand copies; and

(6) The Communist Party of the United States of America—A Handbook for Americans (S. Doc. 117, Eighty-fourth Congress, second session), twenty thousand copies.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ROGER WILLIAMS NATIONAL MONUMENT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3830) to provide for the establishment of the Roger Williams National Monument.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, reserving the right to object, may we have some information as to where the monument will be established?

Mr. McCORMACK. Yes. Might I say before answering the question, I received a letter from that grand gentleman and American and statesman, Senator THEODORE GREEN, on August 29, in which he said:

As this is the last bill which I will sponsor as a Member of the U.S. Senate, I am very much interested in having the measure considered by the House of Representatives before adjournment.

Now, the report of the Senate committee shows that it will be located on four acres of land. The development would include razing of unsightly structures, landscaping, and the construction of a small museum in honor of Roger Williams.

Mr. GROSS. Where?

Mr. McCORMACK. That will be in Providence.

The location selected for the national monument by the local sponsors, as described in the published "College Hill Demonstration Grant Study" report, conducted by the Providence City Plan Commission in cooperation with the Providence Preservation Society and the Housing and Home Finance Agency, is in the oldest part of the city of Providence in an area proposed for urban renewal and redevelopment.

Mr. GROSS. And the cost, if the gentleman will be good enough to tell us?

Mr. McCORMACK. The proposed area is about 4 acres in extent and according to the Senate report the cost of land acquisition is estimated at about $900,000 and the development at $1,100,000.

Mr. GROSS. In other words, this is a $2 million bill?

Mr. McCORMACK. According to the report of the Senate committee.

Mr. GROSS. Two million dollars?

Mr. McCORMACK. According to the report of the Senate committee.

Mr. GROSS. Mr. Speaker, I do not want to take up the time of the House this evening, but I think an expenditure of $2 million ought to be discussed and therefore I am going to have to object.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, I object.

EXTENSION OF REMARKS

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the following Members be permitted to extend their remarks in the CONGRESSIONAL RECORD and to include extraneous matter:

Mrs. DWYER.
Mr. DEROUNIAN.
Mr. VAN ZANDT.
Mr. CUNNINGHAM.
Mr. ARENDS.
Mr. HALPERN.
Mr. MILLER of New York.
Mr. QUIE.
Mr. MOORE.
Mr. NELSEN.
Mr. CHIPPERFIELD.
Mr. WEAVER in three instances.
Mr. CURTIS of Missouri.
Mr. JENSEN.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object—and I will object unless the gentleman includes all the Members of the House. Why discriminate?

Mr. HALLECK. Mr. Speaker, will the gentleman yield to me?

Mr. HOFFMAN of Michigan. Yes; I will.

Mr. HALLECK. These requests were submitted to me as the leader on our side for submission to the Chair. I trust the gentleman will not object.

Mr. HOFFMAN of Michigan. Will the gentleman include all of us? I want to be included, too, and my friend from Iowa, Mr. GROSS.

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. HOFFMAN] have permission to extend his remarks in the CONGRESSIONAL RECORD and to include extraneous matter; and I make the same request in behalf of the gentleman from Iowa [Mr. GROSS].

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

HOMELAND DAY

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Tennessee [Mr. REECE] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana.

There was no objection.

Mr. REECE of Tennessee. Mr. Speaker, on this coming Saturday, September 3, delegations of members of the diets of all Lander of the West German Federal Republic are going to join in Berlin the chosen representatives of the East German Landsmannschaften, representing the more than 12 million people expelled at the end of World War II from the part of Germany east of the Oder-Neisse line now under Communist Polish and Soviet Russian administration as well as the people living under Communist rule in the so-called Soviet occupied zone of Germany.

The delegates are convening in the big Berlin assembly hall named in honor of the late Berlin Mayor Reuter.

I have been invited to address this meeting. Other speakers, who will address this truly all-German preliminary parliament are going to be the Minister President of the land Schleswig-Holstein, Herr von Hassel, who is one of the leading younger members of Dr. Adenauer's party.

Due to a heavy schedule of official duties I found myself unable to go abroad at this particular time and have, therefore, sent a message to the meeting in Berlin. Under unanimous consent, I am presenting this message included in the RECORD.

AUGUST 31, 1960.

HERR HANS KRUGER, M.D.B.,
Berlin-Lichterfelde,
Wildenow Str., Germany.

DEAR PRESIDENT KRUGER: Upon the festive occasion of your Homeland Day I ask you to convey to the chosen delegates of the people of all Germany my personal greetings. I sincerely rejoice in your commemoration and in the principles which you emphasize, because we Americans share and uphold these same principles.

We Americans are a people whose hearts are filled with an all-consuming love of our country, not merely the original 13 Colonies, not merely the Midwest or the Pacific coast, but all of these United States of ours.

We Americans cherish freedom because we once offered our lives to win freedom. And we cherish unity because we once fought a bloody Civil War to preserve unity. The words which our great Daniel Webster spoke 130 years ago: "Liberty and Union, now and forever, one and inseparable," are known by heart to every American and are as valid today as a century ago.

I believe, your people too cherish these ideals and, if I am not mistaken, your Prussian anthem states that your fathers died for the cause of liberty.

It is 40 years ago this summer that the people of East Prussia by exercising their elementary right, to speak for themselves, proved their maturity as patriotic citizens of a free commonwealth. Their position showed a marked kinship to American political ideals. For the United States will always be for the right to national and individual freedom of all peoples. This includes the right to self-determination.

Furthermore, the United States by the Treaty of Rio de Janerio of 1933 and by the Principles of Inter-American Solidarity adopted at Buenos Aires in 1936 has solemnly proclaimed "the proscription of territorial conquest" and that, in consequence, they "will not recognize any territorial arrangement which is not obtained by pacific means, nor the validity of the occupation or acquisition of territories that may be brought about by the force of arms."

These principles are neither empty words nor pious protestations; they are part and parcel of U.S. foreign policy. They have been reaffirmed in the Atlantic Charter of 1941 and by incorporation into the United Nations Declaration of January 1, 1942, have assumed international character. The latter declaration has been sworn and subscribed to by the plenipotentiaries of 26 nations, including Soviet Russia and Poland.

We should not and we cannot recognize the illegal annexation through violence by Soviet Russia of Estonia, Latvia, and Lithuania; and, therefore, as to the part of Germany east of the Oder-Neisse line likewise, we should not recognize "the validity of occupation or acquisition of territories * * * brought about by the force of arms."

It is conformity with this as well as in harmony with an opinion of our greatest Chief Justice, John Marshall, stated as early as 1828, that the holding of territory is a mere military occupation, "until its fate shall be determined at the treaty of peace," that this Government has on July 20, 1960, again declared that "the final delimitation of the western frontier of Poland shall await the peace settlement" and has insisted as "an obvious prerequisite for the peace settlement" upon "the reestablishment of a representative and responsible German Government capable of negotiating and concluding a peace treaty on behalf of the entire German people and of assuring fulfillment of such a treaty."

In the meantime, I feel certain that you will not sleep upon your rights. "Vigilantibus et non dormientibus jura subveniunt"—"the laws aid those who are vigilant, not those who sleep upon their rights"—and that you will firmly insist, time and again, that the rule of law shall ultimately prevail.

The foremost Berlin-born American citizen in our entire history, Francis Lieber, who contributed more than two-thirds of the articles to the Hague Convention on Land Warfare, wrote over a century ago: "The supremacy of the law is an elementary requisite of liberty." And your great philosopher, Immanuel Kant, inspired one of the most eminent legal minds of our day, Roscoe Pound, to these words: "The law is the highest inheritance the sovereign people has; for without the law there would be no sovereign people and no inheritance."

Sincerely yours,

CARROLL REECE.

THE AMERICAN BAR'S STRANGE POLITICAL ACTION

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, there seems to be a growing tendency on the part of certain people in our country to wish to avoid actions which they feel might be construed to be political. I am not certain what their concept of "political" is, but I am aware of the fact that their failure to take action because of political consideration where, by any fair standards, they are required to take action can amount to the worst sort of politics.

I am distressed to learn that the Labor Relations Panel of the American Bar Association last Sunday decided to postpone a decision on a serious matter of alleged unethical conduct on the part of a politically prominent lawyer until

their midwinter session so that they would not be interfering in the fall political campaign.

What is the matter at hand? The American Weekly of July 17, 1960, contained an article entitled "For the Defense," by Neil Hickey. In this article is the following statement:

ROBERT KENNEDY, author of the recent rackets exposé, "The Enemy Within," once was a close friend of Williams, but their careers since have forced them into opposing camps. "I think the 200 lawyers who take their money from the Teamsters are legal prostitutes," KENNEDY told the American Weekly. "Most of them are criminal lawyers. They spend their time trying to keep Mr. Hoffa in office rather than representing the union membership."

Now Mr. Speaker, I think everyone knows that the Teamsters leadership under James Hoffa has been no political friend of mine. Indeed I am on their purge list and it has sought to defeat me by financing whomever my opponent may be in almost every election I have been in. However, I know several lawyers who represent the Teamsters Union and I know they are not "prostitutes" in any sense of the word. They are honorable members of an honorable profession.

It is difficult enough to keep impressed upon the American public the importance to our personal liberties of the principle that good lawyers should represent people and groups accused even of the most reprehensible of crimes without members of the bar undermining this important public concept by ill-considered public statements. It is a basic part of our concept of justice that every person and every organization whatever they may be accused of should be ably represented by counsel. Where would this concept be if lawyers felt that they were going to be judged by the clients they represented rather than by their own conduct in representing, whomever might be their clients, ethically and to the best of their abilities? Such a statement as that attributed to Robert Kennedy is more than ill considered. It is both libelous and unethical.

When a section of the American Bar Association chooses to duck its responsibility of clearing up an allegation of unethical conduct of a member of the bar, in this instance Robert Kennedy, simply because Mr. Kennedy has a brother running for President of the United States in the November elections we have a very dangerous situation. Far from this group of the American Bar Association avoiding politics by this decision they have involved themselves deeply in politics. But for politics they would have taken action; because of politics they fail to take action.

In concluding these remarks I want to make it quite clear that I do not know whether Mr. Kennedy made the libelous and unethical remarks attributed to him or not. I know it should be quite easy to determine whether he did or he did not. If he did not make them let that be publicly established. If he did make them he certainly should be called sharply to task immediately by those in the legal profession who are elected or appointed by their fellow lawyers to preserve the fine name and the ethics of a noble profession.

DEMOCRATS KILL CONSERVATION RESERVE

Mr. HOEVEN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. HOEVEN. Mr. Speaker, one of our most valuable and effective farm programs is about to expire without congressional action. I am referring to the conservation reserve program. On December 31, 1960, the Department of Agriculture will no longer have the authority to enter into new contracts for the retirement and conservation of productive farmland. For all practical purposes, this authority has now ended because contracts for next spring's crops should be made this fall.

The conservation reserve is the long-range program under which farmers voluntarily contract to take general cropland out of production and devote it to the conservation of soil, water, and wildlife for periods of from 3 to 10 years. The national average payment for these conservation practices is $13.50 per acre per year.

We all know that during World War II farmers were urged to step up production. They responded magnificently. After the war, the wartime supports were continued and surpluses began to build up. Government controls for the main part have failed to balance supply and demand. Surpluses continue to mount. After the war, farmers were caught in a vicious cost-price squeeze which still continues to plague them and makes the transition to a prosperous market economy even more difficult. The conservation reserve program, though no cure-all or magic answer, has been a sound and constructive attempt to improve the farm surplus and income problems.

This is one farm program that makes sense. It has proved itself in operation. It has reduced surpluses, thus helping the taxpayer. It has benefited the general public by preserving for future generations the productive capacity of our soil, by conserving our water resources, and by establishing favorable conditions for our wildlife and game. The farmer has found this program extremely beneficial. Since it is completely voluntary, the farmer is not burdened with compulsory bureaucratic controls. Individual farmers can scale down their own particular operations to fit their own labor and cost needs. Farm income has been improved not only by rental payments, but by improved market prices. Soil erosion is being checked, farm ponds and waterways are being erected and better hunting and fishing are being provided. All these advantages make the program attractive.

If it were not for the conservation reserve program we would have right now another 183 million bushels of corn, another 61 million bushels of wheat and another 490,000 bales of cotton. On the basis of data from contracts, performance reports, and applications, the Department of Agriculture has computed the former cropping use of the total 1960 acreage and the production that would be expected at average yields appropriate for the quality and location of the land. The following table shows these acreage and production estimates for the leading crops:

Former cropland use	Estimated former acreage	Estimated normal production
Corn	4,600,000	183,200,000 bushels.
Wheat	3,100,000	61,600,000 bushels.
Cotton	660,000	490,000 bales.
Peanuts	148,000	132,000,000 pounds.
Tobacco	15,000	23,300,000 pounds.
Oats	4,100,000	139,600,000 bushels.
Barley	1,600,000	42,500,000 bushels.
Soybeans	1,100,000	21,200,000 bushels.
Sorghum grain	3,800,000	109,000,000 bushels.
Flaxseed	600,000	4,400,000 bushels.
Cropland hay and pasture.	5,000,000	7,600,000 tons (hay equivalent).

There are now nearly 28½ million acres of crop land in the conservation reserve. Some 75,432 farm families throughout the Nation participate in the program. In my home State of Iowa alone there are 7,690 such families who are retiring and conserving 656,221 acres. Total rental payments in Iowa since the beginning of the program through the 1959 crop year have been $11,342,737.14.

Payments to Iowa's sister-States in the Midwest have been as follows: Kansas, $30 million; Michigan, $10.8 million; Minnesota, $39.8 million; Wisconsin, $11.3 million; Illinois, $8.1 million; Indiana, $9.6 million; Ohio, $8.1 million; Nebraska, $13.6 million; Kentucky, $8.9 million; North Dakota, $37.9 million; and South Dakota, $28.7 million.

Early this year I introduced legislation which would have extended and expanded this valuable program. In addition, my bill would have allowed the Department of Agriculture to use our surplus grain for Federal rental payments. To date, there has been no action to extend the program. The Democratic-controlled Committee on Agriculture has refused to act and the Democratic-controlled House of Representatives defeated a conservation reserve amendment to the ill-fated wheat-feed grains bill on June 22, 1960, by a voice vote. This Republican supported amendment would have extended and expanded the program along with authorizing payments-in-kind, limiting payments to $7,500 per year and limiting to 25 percent the amount of land any county or community could retire.

The record then speaks for itself. In spite of their two-to-one majority in the Committee on Agriculture and in the House and the Senate, the Democrats have refused to act. In spite of their own 1960 platform which pledges "an orderly land retirement and conservation program" congressional Democrats have declined to act. In spite of the fact that the administration has repeatedly asked for action, and in spite of 11 bills to extend this program that have been introduced by Members from both sides of the aisle, and in spite of many moans, groans, and crocodile tears about the

farm problem, this Democratic controlled 86th Congress has failed to act.

The outright failure and the downright refusal of this Democratic-controlled Congress is just one more example of the Democrat Party's fundamental attitude toward agriculture during the last 6 years: There was no action, there is no action, there will be no action.

DILLON RESERVOIR IN MUSKINGUM COUNTY, OHIO

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. HENDERSON] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HENDERSON. Mr. Speaker, as this congressional session approaches its closing days, I take particular pleasure in noting that final action has been taken by the Congress to appropriate the fund required to complete the construction of the Dillon Reservoir on the Licking River in Muskingum County, Ohio. This action marks the last chapter of a stormy legislature history.

During my first campaign for Congress in 1954, I had the temerity to suggest to the people of the 15th District of Ohio that if they would send me to Washington as their representative, I would work for the completion of this much needed project and would see that it was completed. This was a particularly ambitious undertaking in view of the fact that the project, though authorized in 1938, had received cool and even hostile treatment through the years.

The first funds were appropriated in the early 1940's followed by other appropriations in succeeding years until 1951 during the Korean incident when Congress authorized additional money. There was a progressive decrease in the congressional enthusiasm for the project in these years. When I came to the 84th Congress in 1955 the project, with about $9 million already expended, was in a state of deteriorating suspended animation. Materials were rusting in storage. Wind and weather had washed and eroded earthworks that had been built in former years. The increasing indecision of the years had intensified differences of opinion as to the propriety of the project. In 1954, the Congress failed to act on the budget recommendation, and consequently in 1955, and 1956 the measure was omitted from the budget. Dillon's prospects were dark, indeed.

In 1956, a ray of sunshine appeared. It was in that year through the approval of an unbudgeted item in the public works appropriations bill that the Congress included an appropriation of $1,500,000 to resume construction. It was a great moment for the people of the Muskingum Valley. I want to point out that although I had worked unceasingly to obtain funds for the project and had expended much effort in that direction, it required coordinated assistance and cooperation from many sources to obtain this breakthrough. Legislation is more than a one-man undertaking. A Member must call upon his colleagues to help him. Many Members of the House, and many Members of the Senate, from Ohio and elsewhere, demonstrated their friendship and their interest in southeastern Ohio and its serious flood control problems. Their interest was inspired, not by my efforts alone, but by the tremendously convincing arguments advanced by private citizens, civic and business organizations of the 15th District. Seldom has a community effort been so well coordinated and so effective in conveying the facts about a problem affecting the property and lives of people in a given area.

In each succeeding year, the Congress has reaffirmed its action and appropriated additional funds, concluding with the final appropriation of $4,223,000 this year. This makes a total of approximately $23 million appropriated for this feature since I came to Congress.

The reservoir is nearing completion. Many details remain to be worked out, but the dam and the other major structures are about finished. On October 2, 1960, this great project is scheduled to be formally dedicated. It will mark a new milestone in the flood control of the Muskingum River. Fourteen other dams had brought under control all of the Muskingum tributaries except the Licking River. Dillon will tame its angry torrents, protecting some 90 miles of Muskingum Valley from Zanesville to Marietta. The protection thus afforded the Muskingum Valley adds too to the control of floods in the valleys of the Ohio and Mississippi. We of southeastern Ohio are proud that the promise and hope which the Congress held out to us so many years ago has been fulfilled.

For myself, and for the people I represent, I wish to express our most profound appreciation to those of my colleagues in the House and the Senate who have cooperated with me in making the realization of this project possible. It will stand as a lasting monument to the responsiveness and genuine sympathy of our Government for the needs of its people.

THE KINZUA DAM

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. GOODELL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GOODELL. Mr. Speaker, I rise today to mark the end of a long and tragic struggle. I refer to the battles which I and others in the Congress have waged to save the Seneca Indians from the so-called Kinzua Dam on the Allegheny River.

In the past 21 days, three last ditch assaults have been made on the ramparts of an intrenched opposition. The final effort has now expended itself. The momentum of Congress on this issue is today clearly irreversible. The time has come to lay down our arms and devote ourselves to minimizing the suffering. And let no one doubt that within a short time the wheels of progress will grind upon the Seneca nation of Indians in western New York, and that these stalwart people will suffer exceedingly.

It is not my intention here to call up the merits of the case once again. They have been often discussed in the Chambers of this House, pro and con, according to the good order of government. And had the will of the House of Representatives prevailed over the U.S. Senate, the last chapter of this story might have contained a happy ending. I thank each of you who supported me on this issue.

Standing here in this great Capitol Building, which is a shrine to freedom and justice, my mind moves across the rolling hills and valleys of Pennsylvania into the southern tier of New York State where stands, for yet a while, the reservation of the Senecas. These happy lands, whether sparkling in the late summer sun, shrouded with the mists of autumn, or buried under the deep snows of winter, are hallowed grounds to the Seneca. It is the land itself which is the symbol of their heritage and the last one vestige of what was originally theirs.

And yet, for all their heritage which called them to be a people unto themselves, the Senecas have become citizens of the highest order. They have demonstrated their loyalties a thousand times over. Their dedication to service during the armed conflicts in which this country found itself engaged was an example of sacrifice on the highest plane. Loyalty and bravery, those natural virtues of the Seneca, made of him an exemplary soldier. Many of the sons of the Seneca Nation won from our country the highest awards that any nation could give. They thereby enriched and broadened the meaning of their own culture and their own history.

And now, against a backdrop of historic invulnerability assured by the father of our Nation, George Washington himself, comes the bulldozer, the grader, the modern machine to strip from this sacred land of the Senecas the last traces of their valued legacy and to flood it with the waters which our modern civilization must have to quench its thirst.

I ask you to have no pity for the Seneca for he would countenance none himself. In the months and years that I have fought this matter, never has a Seneca asked me for pity for his situation. Rather, in every instance, he has sought to find a valid means to solve both problems: his own and that of the demanding rigors of the industrialized nation in which we live. He has asked only for a fair and complete study of those alternatives. The matter is closed now without that opportunity.

Let those who speak on behalf of modern progress realize at least what the sacrifice must be to those who will lose their homes. A home because it is modest is no less valued by him who lives there. Indeed, it is all the more cherished, especially when it represents to him the great history of his forefathers.

Could we stand by while Plymouth Rock was heaved onto a pile to construct a breakwater? Could we gracefully step aside to have the monument to George Washington razed to make way for a limited access highway? Could we remain silent while Yellowstone National Park was subdivided for low-cost housing? I, for one, would not. And so I acknowledge the magnificent efforts of the Senecas to preserve, in the most orderly fashion available, that which is much more important to them—the land.

Kinzua will be erected. There will be flood protection. Downstream cities will have their water. The Seneca lands of history will be no more.

But over the entire episode will hang the cloud of doubt and uncertainty—the realization that while millions are being spent, there might have been a better way, there might have been another method, to accomplish the same thing without destroying a portion of this Nation's legends. We will now never know. It is too late, the demands were too great and the arguments, carefully avoiding any reference to what goes on in the minds of these quiet Senecas, too strong.

I, for one, must go on record, Mr. Speaker, as the Representative of these people, to state that the doubts will linger in my mind. Although this file is closed, it will be forever stamped with the question mark of what might have been.

We must turn now, as the Senecas have already done, to the future. We must seek to alleviate, in a small fashion, the great transition which must now take place.

The Kinzua Dam will come. Let it come, then, in an atmosphere charged with the spirit of brotherhood and cooperation that can demonstrate that this Nation, in the face of modern progress, will not forget the people who first called this Nation theirs. Let us not, either here assembled or in our own hearts, forget that our actions have no value unless they result in the great good of the individual human being on both sides of each controversy.

THE MINIMUM WAGE

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. GOODELL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GOODELL. Mr. Speaker, as a member of the Education and Labor Committee, I must rise today to comment on the breakdown of the minimum wage conference. Some facts might add perspective to the picture. The original Roosevelt and Kennedy bills would have caused widespread unemployment and put many small operators out of business. After our committees carved those bills up and eliminated many of the inequities, there remained only one major issue to be resolved: Should the Federal Government be given jurisdiction over businesses which operate purely within a single State?

It would appear that Mr. KENNEDY, with fine and impartial scorn, will accept no bill which does not, in principle, expose all small businesses to the eventual heavyhanded jurisdiction of the Federal Government.

This apparently was dictated by the little collection of national labor leaders with which he consults on such matters, but I do not think it represents the opinion of either the American laboring people or our small business operators who are having enough trouble as it is with interference from Washington.

The Democrats have, by their insistence on such broad Federal responsibility, denied affected workers a 15 percent increase in pay and eliminated any extension of coverage for this year.

I hope we can now close up the Congress and spare the American people any more political maneuvering at the taxpayer's expense.

U.S. ADMINISTRATION OF THE RYUKYU ISLANDS

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Minnesota [Mr. JUDD] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the genleman from Indiana?

There was no objection.

Mr. JUDD. Mr. Speaker, I have today introduced a bill to authorize a contribution to the Government of the Ryukyu Islands for the purpose of providing compensation for use of private property and damage to persons and property arising from acts of the U.S. forces before the entry into force of the Japanese Peace Treaty.

This bill is designed to clear up the last major outstanding problem in the U.S. administration of the Ryukyu Islands. Since 1958, the use of land in the Ryukyus by our forces has been conducted on a basis which is mutually acceptable to the people of Okinawa and to our administration. This Congress has just enacted Public Law 86–69, which for the first time places a proper legal foundation under the annual appropriations which this Congress has made for expenses connected with the U.S. administration of these islands. The present bill authorizes a contribution by the United States to the indigenous Government of the Ryukyu Islands to enable it to provide equitable compensation to the inhabitants of Okinawa for the period prior to the treaty of peace with Japan.

The bill is introduced at this late date in the proceedings of the 86th Congress in order that it may be referred to the Foreign Affairs Committee and, by that committee, to the interested agencies of the executive branch for comment. The sponsors intend to reintroduce a bill along these lines early in the next Congress, at which time they hope to have the benefit of the views of the executive agencies. It is the full intention of the sponsors that when the bill is reintroduced a ceiling amount for the contribution to be made by the United States shall be inserted.

Since this matter will be taken up in greater detail in the next Congress, the background is set forth only briefly at this time.

Between the termination of hostilities with Japan in 1945 and the entry into force of the treaty of peace with Japan on April 28, 1952, the United States exercised exclusive powers of administration in Okinawa as a military occupation under the laws of war. Unlike the situation in Japan, however, it was solely a unilateral and not an interallied occupation, and also unlike the situation in Japan, it was a direct military government, and the Government of Japan was allowed to exercise no authority whatever. During this period, land and buildings required by the Allied Forces in Japan was requisitioned through the Japanese Government, and the Japanese Government made compensation to the owners. In the Ryukyus, however, extensive requisitions of land were made without compensation by any authority. Finally, after the peace treaty, some compensation was effected for the period beginning July 1, 1950, but this was on an inadequate basis.

It has never been questioned that, in justice, the inhabitants should be compensated by some authority for the use of their property during the pretreaty period. Compensation has been delayed by uncertainty with respect to legal responsibility and the urgency of other problems. The theory of this bill is that, independent of and apart from any question of legal responsibility, the United States should make the resources available to the local government of the Ryukyu Islands to settle this matter on an equitable basis.

When a ceiling amount is determined for the sum to be contributed by the United States, the sponsors of this bill intend that it shall not include any sums for the initial period that our forces were in the Ryukyus, which resulted from the war against Japan. However, we stayed in the Ryukyus and, commencing long before the Japanese Peace Treaty went into effect, built vast bases there in order to protect our own long-range security interests. For that period it is equitable—assuming that the United States could not be found legally responsible—that we furnish the funds necessary for fair compensation.

Included also in the contribution authorized by this bill are so-called tort claims—injuries and losses resulting from accidents and acts of U.S. personnel. The amounts are small, but there are a number of cases that are very important from the human point of view, involving, for instance, civilian deaths and dismemberments in a munitions explosion and the crash of a U.S. bomber.

We have spent vast sums in Okinawa in the interest of our security. Our bases there would be greatly weakened or even made useless by a disaffected population. We would be pennywise and pound foolish if we did not make possible the satisfaction of the reasonable and equitable requests of the people to

be compensated for their losses resulting from the actions of our forces well after hostilities had ceased.

POSTAL OFFICIALS' PROPAGANDA RELEASES

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from Nebraska [Mr. CUNNINGHAM] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, a few days ago I informed the House of Representatives that I was directing a letter to the Postmaster General asking him under what authority various postal officials were issuing propaganda releases urging that people write to Members of the U.S. Senate and urge that they vote against the bill H.R. 12595. This bill passed the House overwhelmingly and has to do with the illegal practice of moving 4-cent letter mail by air. I called the Postmaster General's attention to section 401, Public Law 86–561, which makes it illegal for any person or agency in the Post Office Department and other branches of the Government to use any time or money in an effort to promote or defeat legislation pending before the Congress. A copy of my letter to the Postmaster General follows:

AUGUST 19, 1960.

The Honorable ARTHUR E. SUMMERFIELD,
Postmaster General,
Washington, D.C.

DEAR GENERAL SUMMERFIELD: A number of persons from various sections of the country have written me about the lobbying activities of postal officials, particularly postmasters and regional office officials, in opposition to H.R. 12595.

This activity is in direct violation of section 401, Public Law 86–561.

I would appreciate knowing if this illegal lobbying has been carried out with the permission of your staff or at their direction.

I would also appreciate knowing what steps are being taken to inform postal officials of the fact that they are in violation of section 401 when they engage in lobbying activities against legislation pending before Congress.

This is a matter of great concern to me, and I regard it as a very serious situation that these employees have engaged in this illegal action. I would appreciate an early reply.

Sincerely yours,

GLENN CUNNINGHAM,
Member of Congress.

A reply to my inquiry was received from Mr. Herbert B. Warburton, General Counsel for the Post Office Department, as follows:

POST OFFICE DEPARTMENT,
OFFICE OF THE GENERAL COUNSEL,
Washington, D.C., August 22, 1960.

Hon. GLENN CUNNINGHAM,
House of Representatives,
Washington, D.C.

Dear CONGRESSMAN CUNNINGHAM: Postmaster General Summerfield is out of the city and therefore I am taking the liberty of replying to your August 19 letter to him. Your inquiry apparently stems from the circumstance which you referred to in your August 17 telegram to the West Palm Beach, Fla., postmaster; namely, that he had distributed a mimeographed letter to some of that office's patrons concerning the movement of first-class mail by air on a space-available basis.

Postmaster McLester advised you in his August 18 letter that he based his action on section 844.131g of the Postal Manual. That section provides:

"Conduct on his own initiative a positive patron relations program. He shall extend every reasonable assistance to the press and other public information media in the gathering of news about the Postal Service in his community. As the spokesman for the Post Office Department in his community, he shall develop and disseminate information promoting patron understanding of the Postal Service so that they may realize the maximum benefits of good mailing practices. He shall make himself available to civic and community organizations as a speaker, and in other capacities, to promote public understanding of available postal services and facilities, thereby helping patrons to use the Department's facilities and services most economically and effectively for them and for the Department."

Postmaster McLester already has informed you that he was not acquainted with the provisions of Public Law 86–561, and while this headquarters' staff has not directed any of this Department's field service personnel to conduct an activity in violation of that restriction, and certainly has not allocated any portion of its funds "for publicity or propaganda purposes designed to support or defeat legislation proposed or pending before Congress," it is immediately taking action to clarify the meaning of that restriction to its field personnel.

The following instruction will be placed in the next Postal Bulletin which will be issued on August 25, 1960, with respect to the restrictive provision of Public Law 86–561:

"DRAFT OF BASIC INSTRUCTION TO POSTAL FIELD SERVICE

"In view of widespread public interest recently expressed in the Post Office Department's program to airlift first-class mail, your attention is called to the following provision of Public Law 86–561:

" 'No part of any appropriation contained in this Act, or of the funds available for expenditure by any individual, corporation, or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation proposed or pending before Congress.'

"When acquainting the public with the Department's position on postal service matters you should not employ any postal funds for publicity or propaganda for the purpose of requesting postal patrons to influence Members of Congress with respect to their votes on any pending legislation."

Sincerely yours,

HERBERT B. WARBURTON,
General Counsel.

A copy of the general order calling attention to section 401 of Public Law 86–561 to which Mr. Warburton refers in the above letter follows:

[From the Postal Bulletin, Aug. 25, 1960]

ALL POSTAL INSTALLATIONS—AIRLIFT, FIRST-CLASS MAIL

In view of widespread public interest recently expressed in the Post Office Department's program to airlift first-class mail, attention is called to the following provision of Public Law 86–561:

"No part of any appropriation contained in this act, or of the funds available for expenditure by any individual, corporation, or agency included in this act, shall be used for publicity or propaganda purposes designed to support or defeat legislation proposed or pending before Congress."

When acquainting the public with the Department's position on postal service matters, postal employees should not employ any postal funds for publicity or propaganda for the purpose of requesting postal patrons to influence Members of Congress with respect to their votes on any pending legislation.—Bureau of Operations, August 25, 1960.

After receiving the above letter from Mr. Warburton, my office personally contacted him to make certain that he would specifically instruct various post office officials in this matter and that the instructions would include a prohibition against any time, even a visit to the editor of a local newspaper, being spent by employees for propaganda purposes. I am sorry that the above general order is not specific, as I was hopeful it would be.

So that the Congress might know of the propaganda effort carried on by the Post Office Department in violation of Public Law 86–561, I am including here several illustrations of how the law has been violated:

First. Regional post office officials have directed official memorandums to all of the postmasters urging that they lobby against this bill, as illustrated by the following office memorandum, Post Office Department, under date of August 5, 1960, from the Acting Regional Operations Director, Wichita, Kans., to all postmasters within that region:

AUGUST 5, 1960.

OFFICE MEMORANDUM, POST OFFICE DEPARTMENT, FROM ACTING REGIONAL OPERATIONS DIRECTOR, WICHITA, KANS., TO POSTMASTERS

I am sure you have heard of the controversy going on at this time over the so-called Cunningham bill, H.R. 12595. This, as you are aware, will deliver a crippling blow to the entire distribution system of the Post Office Department, if it is passed by the Senate and becomes law.

Please look over the enclosed material very carefully just as soon as possible, then go to the editor of your local newspaper and discuss this subject with him, suggesting it would make a timely editorial for your newspaper. If the editor does not see fit to run an editorial, perhaps he would run a news item and quote you as the source of the material.

Anything you can do to get this information to the public will be appreciated. Please send clippings of any publicity that is given on this to me promptly.

Second. A similar lobbying effort originating in the Boston regional office of the Post Office Department:

POST OFFICE DEPARTMENT, RELEASE, BOSTON REGIONAL OFFICE, BOSTON, MASS.

Since 1953, the Post Office Department has been transporting 4-cent letter mail between certain areas of the country on an experimental basis. The airlines have been carrying this mail when and to the extent that space is available.

This has meant that an ever-growing volume of ordinary first-class mail has been delivered to its destination up to 48 hours earlier than would otherwise have been the case. Since business mail comprises about 80 percent of all first-class mail the boon to businessmen is readily apparent. About 5 million regular first-class letters are now being "airlifted" each day.

This is progress toward the Post Office Department's announced goal of next-day delivery of first-class mail anywhere within the continental United States.

Realization of this goal will be prevented if a bill, which passed the House of Representatives last July, should achieve passage

in the Senate and should escape or overcome the Presidential veto. The Cunningham bill, H.R. 12595 would specifically forbid the transportation of regular first-class mail by air. The basis for this action was alleged loss of revenue to the railroads, a specious argument as the Post Office Department pays the railroads $340 million annually in transportation costs and less than $3½ million annually to the airlines for this service.

Airlifting of first-class mail in New England began in mid-June 1960 giving service for Boston mailers to Cleveland and Chicago. It can be expected that this service will be expanded to include other larger cities in New England if the Department is allowed to continue and expand this service.

In addition many large users of the mail have been benefiting by the airlifting of first-class mail between New York and various points in the country.

We urge all those who are interested in providing quicker and better mail service to communicate with their Senators in opposition to the passage of the Cunningham bill, H.R. 12595.

Third. A bulletin originating in West Palm Beach, Fla., under the date of August 7, 1960, having only the signature "Your Postal Employees," and the content of this bulletin follows:

WEST PALM BEACH, FLA.,
August 7, 1960.

DEAR PATRON AND FRIEND: Would you pay for two seats aboard an airliner and use only one?

Of course you wouldn't but that's just what Congress will ask you to do should it enact the Cunningham bill, H.R. 9488.

For some 7 years the Post Office Department has placed ordinary first-class mail aboard airliners whenever the volume of airmail failed to fill that space already paid for. This resulted in improved mail services for 1½ billion pieces of mail per year without additional cost to our taxpayers.

The proposed legislation would require your postal service to abandon this space—even though paid for in advance resulting in a slower movement of your mail at a possible increased cost.

Won't you write or wire your Senator, urging his opposition to this bill—H.R. 9448. Your postmaster would appreciate a copy of your efforts, that he might show his postal people that others do care for improved mail service.

The need is for immediate action as the Senate may have bill under consideration in next day or two.

Please help us to help you.

YOUR POSTAL EMPLOYEES.

DEAR SIR: I do not wish to get my mailman into trouble, so I will not mention my name and address, but I am wondering if he is permitted to engage in preparing and distributing this sort of information during his working hours.

Sincerely,

AN INQUISITIVE TAXPAYER.

When I received this propaganda piece from a citizen in West Palm Beach, Fla., I wired the postmaster at West Palm Beach, as follows:

I have received a copy of a mimeographed letter headed "West Palm Beach, Fla., August 7, 1960" and addressed "Dear Patron and Friend" and signed "Your Postal Employees" which was apparently distributed by post office employees to homes and businesses in the West Palm Beach area in the course of their Government duties. This letter contains grossly inadequate and wrong information in urging recipients to write their Senators and express opposition to H.R. 9488. It states "your postmaster would appreciate a copy of your efforts." By what authority are employees engaging in this propaganda effort which is clearly in violation of Public Law 86–561?

I received a reply under date of August 18, 1960, which was signed by R. L. McLester, postmaster, West Palm Beach, Fla. Mr. McLester's reply is as follows:

U.S. POST OFFICE,
West Palm Beach, Fla., August 18, 1960.

Hon. GLENN CUNNINGHAM,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN CUNNINGHAM: I have your telegram of August 17 in which you raise the question regarding the dissemination of information to postal patrons of the West Palm Beach area concerning the movement of first-class mail by air on a space available basis.

The authority under which this information was made available to the patrons of the West Palm Beach Post Office is contained in the Postal Manual, section 8844.131 which contains the following statement:

"It shall be the direct responsibility of the postmaster to conduct on his own initiative a positive patron relations program. He shall extend every reasonable assistance to the press and other public information media in the gathering of news about the postal service in his community. As the spokesman for the Post Office Department in his community, he shall develop and disseminate information promoting patron understanding of the postal service so that they may realize the maximum benefits of good mailing practices."

With respect to the question you raised concerning violation of Public Law 86–561, I am not acquainted with the detailed provisions of this law. Accordingly, I am referring this question to the Office of the General Counsel, Post Office Department, Washington, D.C., and to other top officials in the Post Office Department in Washington and they will respond to your question.

I trust this information is that which you desire.

Sincerely yours,

R. L. MCLESTER,
Postmaster.

Mr. Speaker, these are flagrant violations of the law as contained in section 401, Public Law 86–561. Furthermore, these are flagrant violations of the intent of Congress. This is positive proof that various officials of the Post Office Department have used appropriated funds with which to lobby against legislation pending before the Congress. This violation of the intent of Congress is bad enough in itself, but equally shameful is the misinformation that is contained in these various bulletins. The information contained in the propaganda piece issued by the West Palm Beach, Fla., Post Office is especially nauseating to those of us who know that the statements are not in the least accurate. In the other bulletins no attempt has been made to be fair and only a one-sided argument is given. The facts in the matter have not been placed before the American people by the Post Office Department and only their side of the story has been told, which all of us know is a weak defense of an illegal practice of airlifting 4-cent mail, which they have no legislative authority to engage in.

The overwhelming sentiment in the House of Representatives is that the Post Office Department stop this illegal practice, as shown by the tremendous vote in favor of the passage of H.R. 12595. I would presume that an overwhelming number of the Members of the House of Representatives would also be opposed to the propaganda efforts engaged in to defeat this legislation in the other body, in violation of the intent of Congress as clearly stated in section 401, Public Law 86–561.

Mr. Speaker, I am referring this material to the Department of Justice and to the Comptroller General and I am asking that they take appropriate action which is so clearly called for. Section 401, Public Law 86–561 has been violated freely by Post Office Department officials and I trust that the Department of Justice and the Comptroller General will take speedy action in this matter.

HON. JOE HOLT

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. LIPSCOMB] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. LIPSCOMB. Mr. Speaker, my California Republican colleagues have asked me to express for all of them our best wishes to Congressman JOE HOLT as his service in the House of Representatives draws to a close. We know that whatever he chooses to do in the future he will accomplish with the same keen zest and outstanding ability that has characterized his faithful service in this body.

Congressman JOE HOLT deserves the thanks of all the citizens of the Los Angeles and entire southern California area for his untiring efforts on their behalf. JOE HOLT came to Congress as the youngest Member, fresh from the Korean battlefield where he served as a Marine Corps combat veteran.

He has proven after 8 successful years that he has the ability to legislate and get things done. He has been a leader in the House of Representatives, and was elected to the office of secretary of the Republican Policy Committee of the House of Representatives.

His work on the Education and Labor Committee has brought a great deal of benefit for better education in California and America. He has fought for labor legislation that is fair to both employer and employee; and above all, to protect the general public.

On the Military Operations Subcommittee, he has worked hard for better defense for America and has always demanded that Los Angeles get its fair share of defense contracts to protect the jobs of our citizens.

He was the leader—and got results—during the recent campaign against narcotics to improve the coordination between Federal departments involved in the enforcement of narcotics and local governments. Due to his diligent work, a stronger and more friendly relationship exists between the United States and Mexico; and our border relations

have been strengthened and improved. Thank to him, a more alert, intelligent, and antinarcotics enforcement program is in effect.

Representative JOE HOLT has earned the respect and admiration of his colleagues by his courage of convictions and dedication and service to the community and country.

We regret his decision not to seek reelection which we know he would have won handily. His service to the Nation will be missed in the 87th Congress.

HON. DONALD L. JACKSON

Mr. HALLECK. Mr. Speaker, I ask that the gentleman from California [Mr. LIPSCOMB] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana.

There was no objection.

Mr. LIPSCOMB. Mr. Speaker, in behalf of the Republican delegation from California, I wish to pay tribute to an outstanding Member of the House of Representatives, Congressman DONALD JACKSON, who is retiring from office at the conclusion of this session of Congress.

Congressman DON JACKSON has served his country with distinction for many years. He came to the House in 1946, shortly after having concluded 5 years of service in the U.S. Marine Corps during World War II.

In Congress, Congressman JACKSON distinguished himself by his outstanding work on such assignments as the House Foreign Affairs Committee and the House Un-American Activities Committee. He is a stanch foe of communism and the menace it represents. He has acted with clarity and force on many matters of importance before the Congress.

It was with regret that we learned of his decision to retire from the House of Representatives for he has been a tireless worker in behalf of the welfare of our country and for the residents of the 16th District of California whom he served so ably.

We shall miss having Representative DON JACKSON as a colleague. We will miss his day-to-day friendship. We wish him well in the years ahead.

REPEAL OF TELEPHONE EXCISE TAX

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. RANDALL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. RANDALL. Mr. Speaker, during the July recess, I was asked again and again by constituents, "What happened to the repeal of the telephone excise tax?" Frequently, I would hear the comment, "You fellows ran out on us," and such expressions as "You fellows promised to get rid of this tax, and then reneged." The answer to these questions is that not all of us here in Congress "reneged" because the first vote on this Tax Rate Extension Act of 1960 was 204 yeas to 181 nays, and the vote on final passage was 229 yeas to 174 nays. While the bill passed, a little computation will show that in one case 53 percent was for—and 47 percent against the bill. In the final vote 57 percent was for and 43 percent was against. This high percentage of protest shows not all of us forgot what we had said in the letters to our constituents.

Preliminary to these remarks, I think I should say that during 1959, I received over 3,000 letters urging the repeal of all emergency wartime taxes, including local and long distance telephone excise taxes and all excise taxes on the transportation of persons. I answered this mail saying I was in favor of repeal.

We all knew these were wartime taxes, enacted in 1942 after Pearl Harbor. Yet I was afraid these measures, if continued year after year, might come to be regarded as a permanent part of the tax structure. It began to look like we were never going to run out of emergencies. It even appears that telephone service was classed as a luxury, or at least, for some reason, was put along side club dues, nightclub entertainment, liquor and tobacco. The truth of the matter is that the telephone is a daily necessity and the only household utility so taxed by the Government.

Previous Congresses in years gone by had promised to repeal the tax and now after nearly 15 years since the cessation of hostilities, an excise tax still remained. The public accepted the tax without complaint during World War II because money was needed to execute the war effort and abnormal taxes were needed. A second purpose was served in discouraging telephone use, because the Government needed the communication lines clear and open for essential calls.

Congress finally—in 1959—repealed the tax on general or local telephone service and part of the tax on transportation of persons—to become effective July 1, 1960. Then on June 8, 1960, about 20 days before the effective repeal date, there came before the House the Public Debt and Tax Extension Act of 1960, which had as one of its provisions the continuance or reinstatement of the telephone tax.

In the floor debate by members of the Rules Committee—and other Members, it was very clearly pointed out that this measure was served up to the House under an arrangement which would preclude or prohibit the offering of any amendments. It came to us under a gag rule because the provision about the extension of telephone taxes and transportation taxes was served up to us in a package, along with the increase of the debt limit and corporate tax provisions. There was no way to get a separate vote on the repeal question. The House was placed in the position where it would have to swallow the pill all at once. In order to vote against the telephone excise tax and other emergency taxes, we had to vote against the whole bill. Had we been permitted to offer amendments, certainly there would have been many amendments to make the repeal of the local telephone tax permanent and against its extension.

What happened on June 8 was that the will of the House was never separately tested on the repeal of the telephone excise tax. It is my opinion that it is wrong to have such a gag rule on any tax bill. But even if at times it is necessary, then because of the promise of repeal made in 1959, these particular excise taxes should have been brought out in a separate measure so the Members could express their views, and could vote the will of their constituents.

Mr. Speaker, I asked for this time today to use this medium to make it very clear to the people of Missouri, and to the people of the eight counties of the Fourth Missouri District that their Congressman on June 8, 1960, voted against the gag rule, as is shown on page 12123 of the CONGRESSIONAL RECORD—and thus voted against the extension or revival of the telephone excise tax. On paper, the vote appears in the "Nays" column in black and white; but on the floor of the House, it was loud-shouting "No." There is no doubt but that the closeness of the vote can be interpreted as a clear expression of strong protest against the closed or gag rule; or the "take it or leave it" package deal, which included the reinstatement or extension of telephone excise taxes.

It was suggested during the debate that if one voted against the extension of such excise taxes, he might be guilty of fiscal irresponsibility. My answer is that in addition to fiscal responsibility, another responsibility exists, and it may be called personal responsibility. Personal responsibility transcends fiscal considerations because it encompasses or included an obligation to stand by and to keep our pledges or promises—both expressed or implied.

By its vote of June 8 the House can be observed doing a right-about-face, because the people had lived in anticipation or expectation for almost a year, waiting for the repeal date of July 1, 1960; and I can report to you that the people of my district are not only disappointed—they are disgusted at the turn of events.

Yes, July 1, 1960 has come and is past. That was the day the people had been promised a reduction in excise taxes would become effective. But did they get it? Look at your own phone bill for the answer. Included in every June telephone bill of the Southwestern Bell Telephone Co. was a little leaflet which contained the following:

> If you think it is unfair to pay an extra $1 on every $10 worth of telephone service, write your Congressman now.

Sadly enough, this suggestion is just a little late. Now that we are adjourning, it would do little good for the folks back home to write at this time, but I, for one, hope they will write during the next Congress and so inundate each Congressman with such a deluge of protests against this telephone tax that there will be no

more gag rules and that this discriminatory excise tax will be forever repealed.

EXTENSION OF REMARKS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the following Members be permitted to extend their remarks in the CONGRESSIONAL RECORD and to include extraneous matter:

Mr. ROGERS of Florida in two instances.
Mr. GEORGE.
Mr. ZABLOCKI.
Mr. PHILBIN in two instances.
Mr. O'BRIEN of New York.
Mr. KOWALSKI.
Mr. BAILEY.
Mr. FLOOD, to include extraneous matter in his special order, today.
Mr. BURKE of Massachusetts.
Mr. WOLF.
Mr. BARR.
Mr. PROKOP.
Mr. McDOWELL in two instances.
Mr. ZELENKO.
Mr. McFALL.
Mr. MOELLER.
Mr. McGOVERN.
Mr. IKARD.
Mr. DULSKI.
Mr. DELANEY.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

Mr. HALEY. Mr. Speaker, reserving the right to object, I would like to ask the distinguished majority leader if he has any idea how much these extensions are going to cost the taxpayers of America, and if we have enough paper on order to bundle this stuff all up, and what great subject it is that we are going to tax the taxpayers approximately $1,500 for insertions in the RECORD. If he can give me that information, I would be very glad to have it.

Mr. McCORMACK. Of course, the gentleman knows that the gentleman from Massachusetts is simply making requests for Members on the Democratic side. The distinguished minority leader made a number of similar requests. I am unable to give my colleague the information he seeks except to say that this is the ordinary procedure. This is probably the last night of the session and that is why there are an unusual number of requests.

Mr. HALEY. Can the gentleman tell me what the subject matter is that is to be put in the RECORD at a cost, I believe, of $1,500?

Mr. McCORMACK. Of course, my colleague knows that I am simply a conduit through which the unanimous-consent requests of Members on my side are put before the House. I am not quite sure, but I would venture to assume that during the course of the year I may have asked such permission for the gentleman from Florida himself. Of course, I cannot say that definitely, as I do not know. But, with reference to the question asked by the gentleman, I am unable to answer that. I am only too glad to act as a conduit for the Members who have asked me to do so.

Mr. HALEY. I might say to the distinguished majority leader that he has never had to make any such requests for the gentleman from Florida because I think I can always take care of my own requests.

Mr. McCORMACK. That is true, of course, but the gentleman from Massachusetts would consider it a great honor if he had the opportunity to make such a request sometime for the gentleman from Florida.

Mr. HALEY. I wonder then if the gentleman from Massachusetts would do this. As long as we have put everybody in the book, so to speak, why does the gentleman not ask unanimous consent that all Members have 5 legislative days or 5 weeks to extend and to revise their remarks and let us get it all in at one time.

Mr. McCORMACK. May I say to the gentleman in all seriousness that there will be a number of resolutions offered later which are necessary in connection with the adjournment sine die. One of the resolutions in connection with extensions in the RECORD, after the Congress adjourns, will provide for certain limitations, in other words, that matters inserted in the RECORD must be confined to matters that took place prior to adjournment and, of course, that is necessary to protect Members. I would assume that Members who are getting that permission now recognize the fact that the resolution permitting insertions in the RECORD after the adjournment of the Congress, until the last RECORD is printed, contains of necessity certain words of limitation as to what matters such insertions may cover and that they must be confined, as I understand, to incidents or matters that have happened prior to the adjournment of Congress.

Mr. HALEY. I might say to the distinguished majority leader that the gentleman from Florida is well aware of that situation. I withdraw any objection I had, Mr. Speaker. In view of the fact that we have spent billions of dollars here today I think that spending $50,000 for Members to put their remarks in the RECORD might be worth while. I think it would perhaps take that to cover what we have done.

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to inquire from the distinguished majority leader if it is not most unusual for a Member to ask to insert his remarks in the RECORD at an added cost of $1,300 to $1,500, whichever it was? I am amazed that such a request should be made. I do not recall in my 12 years of service here of hearing a single Member asking that his remarks be inserted in the RECORD at an added cost of $1,300 to $1,500, whichever it was.

Mr. McCORMACK. In reply to the gentleman from Florida I said that I, like my friend from Indiana, am just a conduit through which are funneled the requests of Members on my side, as the gentleman from Indiana is on his side.

In relation to the specific inquiry made by the gentleman from Iowa, I cannot answer for any Member, and I would respectfully suggest that he ask the Member for whom I submitted the request the question that he asked me.

Mr. GROSS. The question I would like to ask the gentleman is whether during his long years of experience here this is not most unusual?

Mr. McCORMACK. I am not, of course, going to answer any question which constitutes a reply in connection with another Member's actions. I would answer if it had been my own action, were I making the request for myself; but I do not intend to get into a colloquy with the gentleman from Iowa or any other Member over the request of a Member on either side to extend his remarks in the RECORD at a cost estimated by the Government Printer.

Mr. GROSS. I just want to say to the gentleman from Massachusetts——

Mr. McCORMACK. The gentleman can have his opinion; he has a right to it.

Mr. GROSS. Yes; I understand.

Mr. McCORMACK. But I do not think the gentleman should ask me to answer for somebody else.

Mr. GROSS. Just let me say that if I come back to the House next session I shall offer a resolution to curb this sort of practice, because it cannot be condoned, in my opinion. The gentleman does not have to answer that. It is an abuse of the prerogatives of a Member of Congress and should not be tolerated by the House.

The SPEAKER pro tempore. Is there objection?

Mr. CORBETT. Mr. Speaker, reserving the right to object, might I ask the majority leader if he can reply as to whether or not my name is included on the list of extensions of remarks?

Mr. McCORMACK. I am thoroughly acquainted with my friend. Do you want me to ask for you? Why do you not ask for yourself? I will yield to you to ask for yourself.

The SPEAKER pro tempore. There is one consent request already pending.

Mr. COLMER. Mr. Speaker, reserving the right to object, during this colloquy my attention has been called to the fact that one of the outstanding Members of this House, a man who is very much interested in the welfare of the taxpayer, a man who is the cloakroom favorite candidate for President of the United States, placed in the RECORD or asked that there be placed in the RECORD, a certain extension of remarks; but when he found out, and I have it here now, that it cost $540, he just said he would not burden the taxpayers with that additional amount; and withdrew his request to insert the remarks in the RECORD.

The gentleman to whom I refer is a a very distinguished Member of this body and I think he ought to get credit for this. As I said, at one time I had considered, and I hope he does not misunderstand me, recommending him to be nominated for President of the United States. He is a man of great discrimination, a man who really has the welfare of the country at heart, a man with political courage.

I recall when one of these civil wrongs bills, whatever it was, was up here, the gentleman was one of the few Members of my party, if not the only one north of the Smith & Wesson—I mean, the Mason-Dixon line—who voted against that bill.

I think he ought to get credit now for saving the taxpayers $540 for not putting this in the RECORD.

I refer, of course, to the distinguished gentleman from Indiana [Mr. HARMON], "the man who brought the front porch back."

The SPEAKER pro tempore (Mr. THOMPSON of Texas). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

BEEF AND PORK IMPORTS

Mr. WOLF. Mr. Speaker, I ask unanimous consent that additional remarks be included in the permanent RECORD along with those which I made in the House on August 29, 1960, page 18217.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

FEDERAL-AID HIGHWAY PROGRAM

Mr. SCHWENGEL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SCHWENGEL. Mr. Speaker, the Special Subcommittee of the Federal-Aid Highway Program, of which I am a member, has been in existence for almost 1 year now. During this time, the staff of a dozen or so counsel and investigators, under the direction of the chairman, the gentleman from Minnesota, has been combing the country for scandals in the multi-billion-dollar Interstate Highway System. While getting the crooks is important and I am in favor of it, this is not the only thing this committee ought to be doing. Then, too, it should be noted that what our subcommittee has done to date would convince even a man from Mars that it has not borne out the charges yet, made in some of the press and some of the Democratic colleagues' press releases, that our exposes would make Teapot Dome seem like a child's game of marbles and would dwarf in comparison the sordid Dave Beck-Jimmy Hoffa episodes uncovered by the McClellan Labor Rackets Committee of the Senate.

Thus, far, we have held two hearings: one of them involving vertical bridge clearance and another dealing with fraud in Oklahoma, which case admittedly was not completely investigated. Also, it should be noted that, just when it appeared that the subcommittee could get its teeth into a real meaty scandal involving alleged millions of dollars of right-of-way irregularities in the State of Massachusetts, the chairman has unilaterally decided that there will be no more hearings until after the November election in order to keep any "political considerations" out of the probe.

Now this decision represented a complete reversal of the Chair's earlier position, for we Republican members of the subcommittee had been informed that there would be further hearings after the conventions of the two political parties but before the November elections.

What occurred between early May and June 20 that would account for this press release indicating a complete change from earlier positive assurance to the committee? I suggest a clue can be found in the Boston Traveler, dated May 13, 1960, which first broke the news that the Bureau of Public Roads had "uncovered evidence of hundreds of thousands of dollars in our appraisals in Massachusetts' Federal-aid highway program." Carried under the headline "U.S. Probes Appraisals for Massachusetts Roads," this story was front-page stuff in the Boston Traveler. I include at this point in the RECORD, the article referred to above:

[From the Boston Traveler of May 13, 1960]

U.S. PROBES APPRAISALS FOR MASSACHUSETTS ROADS

(By Tom W. Gerber)

WASHINGTON.—The U.S. Bureau of Public Roads has uncovered evidence of hundreds of thousands of dollars in overappraisals in Massachusetts' Federal-aid highway program.

And the Bureau has launched a two-pronged investigation of the Massachusetts Department of Public Works' land value estimates for rights-of-way for Federal-aid highways.

BUREAU CUT OFF PAYMENTS FOR LAND TAKINGS HERE

Atop this, the Traveler learned today the Bureau in January cut off payments to the State for right-of-way land takings based on DPW appraisals.

This action was taken pending exhaustive audit of each suspected overappraised land parcel in highway rights-of-way.

A top source said the Bureau has made no payments to the State for acquiring rights-of-way since Federal funds were shut off 4 months ago.

And it was learned Massachusetts is the only State in the Nation currently under this restriction.

Under normal practice, the Bureau makes progress payments for acquiring needed highway rights-of-way without audit.

This helps speed construction of the Nation's $37 billion, 41,000-mile highway program. Audits normally are conducted later.

Engineer-appraiser-accountant teams from the Bureau's project examination division have been investigating the Massachusetts DPW's right-of-way land appraisals for several months.

More than 100 suspected swollen appraisals are under scrutiny.

And only last week, the Bureau hired the Washington, D.C., valuation engineering firm of Beasley & Beasley, to doublecheck the Bureau's findings.

This professional appraising firm often has worked under Government contract. It has been hired in the past by the Navy and the Army Corps of Engineers in addition to the Bureau of Public Roads.

Three years ago, some of the evidence uncovered by this concern led to Federal indictments in the Indiana highway scandals.

The Traveler learned three land parcels in eastern Massachusetts, valued by State-hired appraisers at about $100,000 each, only were worth between $30,000 and $40,000 in the opinion of Government appraisers.

The Department of Justice here has been informed of these preliminary findings, the Traveler learned. It was reported "watching" the investigation.

OVERAPPRAISALS IN TWO CATEGORIES

Bureau agents discovered what they considered to be overappraisals both in the costly Interstate Highway System and in the so-called primary, secondary, and urban program in Massachusetts.

The Federal Government pays 90 percent of the costs under the interstate program and splits the costs 50–50 with the State for primary, secondary, and urban projects.

The Traveler learned the Bureau's systematic analysis of the State's right-of-way land appraisals done on a sample basis.

Bureau agents, including former FBI men, are examining more than 10 percent of roughly 1,000 right-of-way land appraisals accomplished by the State last year.

However, one source said the sampling included the three in the $100,000 bracket. He said the State's questionable appraisals generally appear to be between 25 to 50 percent too high according to Federal standards.

Two separate sources told the Traveler many of the State's appraisals were "unreasonable, unsupported, and erroneous." Both sources used the same words.

The investigation was touched off late last year when the State failed to provide satisfactory documentation for land appraisals required for highway rights-of-way.

A Traveler source said it soon was "obvious" much of the data in the State appraisals was erroneous.

However, this source refused to rule out the possibility the bloated appraisals represented merely errors of judgment.

But he pointed to the fact some estimated land values in the DPW appraisals failed to coincide with appraisals of similar nearby land.

PROFESSIONAL PROBERS COSTLY TO GOVERNMENT

He also pointed to the fact the Bureau had hired the firm of professional appraisers "at considerable cost to the Government."

He said this wouldn't be done unless "substantial sums" were involved.

It was reported the investigation had not yet reached the point where appraisers, property owners, and DPW employees were being questioned, with a view toward more drastic action by the Government.

The Massachusetts DPW usually hires private appraisers to make land value estimates. They are paid from $500 to $1,000, depending on the scope of the appraisal job.

If the land is believed to be worth more than $25,000, two appraisers are hired. For the most part, these appraisers are local real estate operators.

PROBE REPORTED PLANNED IN TWO STAGES

The investigation was reported to be planned in two stages.

Now under way is the first stage to determine the basis for the suspected high appraisals.

The second stage would be to make certain that none of the appraisals was set before the right-of-way land was examined.

While the Bureau has shut off payments to the State for acquiring right-of-way land, construction progress payments still are being made.

It was reported this part of the highway program in Massachusetts was not under unusual examination.

In previous years, all Federal payments under the cooperative highway construction program were cut off in Indiana and Arizona when scandals racked their State highway departments.

DI NATALE AWARE OF FEDERAL PROBE

State Public Works Commissioner Anthony N. Di Natale issued a statement Sunday suggesting he was aware of the Bureau double-barrelled inquiry.

He announced he would "cull out and fire incompetents" hired by the DPW as property negotiators and appraisers on highway projects.

This subcommittee, authorized by the House to investigate irregularities in the Interstate System has proved to be a

most reluctant dragon, when Massachusetts is concerned. This alarming situation has been known by the subcommittee since January of 1960, when the Bureau of Public Roads first learned of it, cut off all payment on all Massachusetts Federal-aid projects, and began a vigorous investigation on its own initiative. And as noted above, it has been noted in the Boston press since May 13, 1960. Yet, even though the staff independently determined that there was substance to these allegations of a conspiracy to defraud the Government, this subcommittee had made no move to have the staff, assisted by the Bureau of Public Roads, prepare this case for hearing.

This inaction should be contrasted with the alacrity with which this subcommittee pounced upon some newspaper clippings exposing alleged irregularities in Tulsa, Okla., and which resulted in a series of hearings during the first week of May of this year. So eagerly was the Oklahoma matter pushed, that the grand jury evidence was presented in open hearings shortly after several contractors were indicted and even before they could be given a fair trial in a court of law. It is also interesting to note that the present Governor of Oklahoma, whose presence as a witness was demanded by me to explain why he had rewarded unfaithful State highway officials with increased pay and job security, was not called as a witness.

May came and went and still there was little interest in Massachusetts. So did June and July. But, in the words of a familiar song, "The days grow short as we reach September." On August 16, 1960, the Bureau of Public Roads, in a letter from Mr. Ellis L. Armstrong, Commissioner, referred the results of their investigations to the subcommittee and to the Department of Justice for "its review and any action it may deem to be appropriate." This letter has been released to the press and reported in the Boston Traveler on August 17, 1960. I therefore include it in the RECORD at this point in my remarks:

[From the Boston Traveler, August 17, 1960]

LETTER TO HOUSE UNIT DETAILS ROAD PROBE

(Traveler Washington Bureau)

WASHINGTON.—Following is the text of a letter transmitting reports on the Massachusetts Federal-aid highway program from the Bureau of Public Roads to the House Subcommittee on the Federal-Aid Highway Program:

Hon. JOHN A. BLATNIK,
Chairman, Special Subcommittee on the Federal-Aid Highway Program, House of Representatives, Washington, D.C.

DEAR MR. BLATNIK: Reference is made to the review by this Bureau of certain appraisal practices in the State of Massachusetts which has been continuing since the beginning of this year and with certain aspects of which members of your staff are familiar. As a result of information that fee appraisers retained by the State of Massachusetts, in connection with Federal aid projects, were submitting inadequate or misleading information in appraisal reports to justify appraisals far in excess of true market value, the Project Examination Division of this Bureau in cooperation with your field offices undertook a special review in January of this year. In addition, at that time the Bureau required that no payments be made to Massachusetts reimbursing it for the cost of the acquisition of right-of-way on Federal-aid projects, except after final audit of such property involved.

BUREAU CONTINUES SPECIAL REVIEW

After several months of review, the Bureau retained the firm of Beasley & Beasley, of Washington, D.C., to make new appraisals of certain selected projects in Massachusetts, including a primary Federal-aid project in Wakefield and an interstate project in Attleboro. At the same time the Bureau continued its own special review. The firm of Beasley & Beasley has now submitted its first reports containing its appraisals in Wakefield and the southerly part of the interstate project at Attleboro. Copies of these reports are forwarded herewith.

An analytical and comparative review of these Beasley appraisals and those of independent fee appraisers retained by the State is now under way. This analysis to date reveals that certain fee appraisers retained by the State, by using misleading information and ignoring available data, placed values on selected properties far in excess of values that could be supported by available true market data. For example, sales of improved properties were reported as unimproved and were used to support prices in land far in excess of the true land value. At the same time, the appraisers ignored pertinent sales of unimproved property in the immediate vicinity of the subject properties which, if used, would have justified the assignment of much lower values.

CASES INVOLVE LARGE SUMS

For the most part these selected cases involved extensive properties and large sums of money. The Bureau has made no payments in reimbursement to Massachusetts on any of these properties.

A preliminary detailed analysis of these selected cases is now in our files and available to your committee. This analysis, together with other independent information which has come to the attention of this Bureau, support a conclusion that certain fee appraisers employed by the State have been subjected to pressures which comprised their independence. Such analysis and such other information have been and are being submitted to the Department of Justice for its review and any action it may deem to be appropriate.

If there is any further information on this subject which you desire, please do not hesitate to call us.

Sincerely yours,
(Signed) ELLIS L. ARMSTRONG,
Commissioner of Public Roads.

On August 17, 1960, the Boston Traveler carried an article written by its correspondent Tom W. Gerber, under such headlines as "Land Appraisals Boosted 300 P.C.," "Excesses Run Into Millions of Dollars," and "High State Official Is Under Suspicion," I ask that this article dated August 17, 1960, also be printed at this point in the RECORD, as well as similar articles appearing in the Boston Herald, dated August 18, 1960, entitled "U.S. Pledges Complete Probe of Massachusetts Highway Land Cost"; in the Boston Traveler on August 18, 1960, entitled, "Massachusetts Highway Scandals Worst Yet"; in the Boston Herald dated August 19, 1960, entitled, "FBI to Probe State Scandal in Land Taking"; and in the Boston Traveler, dated August 19, 1960, entitled "GOP Demands Action in Massachusetts Roads Probe."

[From the Boston Traveler, August 17, 1960]

MASSACHUSETTS HIGHWAY SCANDAL

(By Tom W. Gerber)

WASHINGTON.—Excessive land appraisals in the Massachusetts Federal-aid highway program run into the millions of dollars, the Traveler learned today.

A high State official is under suspicion in the racket, believed the largest yet in the Nation's $50 billion highway construction program.

These facts came to light as the U.S. Bureau of Public Roads filed a preliminary report to Congress on a 3-month investigation of highway land takings in Massachusetts.

The results of this inquiry and other data already have been turned over to the U.S. Justice Department for "any action * * * it may deem appropriate."

The preliminary investigation report was prepared by Beasley & Beasley, an independent Washington valuation engineering firm retained by the Bureau of Public Roads to look into the Massachusetts situation. Its inquiry is continuing.

Three years ago, evidence uncovered by this firm in another BPR investigation led to Federal indictments in the Indiana highway scandals.

The current report does not name the Massachusetts official under suspicion in the land appraisal racket.

However, the Traveler learned the official and certain accomplices subjected highway right-of-way land appraisers employed by the State to "pressures which compromised their independence."

These appraisers were hired by the State, mostly last year, to set values on land the State would take for construction of Federal-aid highways.

In some cases, their appraisals were up to 300 percent higher than detailed valuations determined by Beasley & Beasley. These cases involved extensive land tracts.

THREATS GO WITH BLOATED APPRAISALS

The Traveler learned the bloated appraisals were submitted in some cases under threat of losing the State's business if the fee appraisers failed to comply.

However, the Federal Government will not have to pay for these excessive land-taking costs.

The BPR in January cut off payments to Massachusetts for highway right-of-way takings based on State department of public works appraisals.

The Federal Government usually reimburses the State for 90 percent of the costs of land taking and construction of the vast Interstate Highway System within the State.

It also pays the State half the cost of land taking and construction under the so-called primary, secondary, and urban highway construction program.

Most of these facts were contained in a Beasley & Beasley report forwarded by the BPR to the House Special Subcommittee on the Federal-Aid Highway Program.

Two thick volumes of investigation results and an accompanying letter were sent to the subcommittee that has been investigating reported abuses in the interstate highway program nationwide.

The report dealt with alleged land appraisal excesses in Wakefield and part of an Interstate Highway 95 project in Attleboro and North Attleboro.

Two additional volumes were expected to be sent to the subcommittee within a few days with additional details on the Attleboro-North Attleboro project.

The valuation engineering firm, which previously has worked under contracts with the Army, the Navy, and the BPR, is expected

to complete a study of the Gardner area next month.

In addition to this study, the Bureau's project examination division has been investigating suspected land valuation excesses in Massachusetts since January, when Federal payments were halted.

The Bureau's agents still are operating within the State.

The letter transmitting the reports to Rep. JOHN A. BLATNIK (D-Minn.), subcommittee chairman, told how some excess appraisals were devised.

The letter said "certain fee appraisers retained by the State" used misleading information and ignored available data that would have supported lower valuations.

Thus, the letter said, sales of improved properties were reported as unimproved and were used to support prices for unimproved nearby land far in excess of true value.

The letter continued:

"At the same time the appraisers ignored pertinent sales of unimproved property in the immediate vicinity of the subject properties which, if used, would have justified the assignment of much lower values."

Thus, if there was a $30,000 house on a lot worth $10,000, the land alone would be appraised for $40,000 to justify an excessive valuation for a property to be taken in the vicinity.

The Traveler learned the puffed valuations were on only a small percentage of the properties involved in land takings in the Wakefield and Attleboro-North Attleboro areas.

The investigation showed land appraisals were reasonably accurate on smaller properties.

Yet, the Traveler's sources said the excessive valuations would run into "millions of dollars"—considerably more than originally suspected when the investigation first was undertaken.

And the State already has paid for some land takings based on these overvaluations, the Traveler learned.

But no Federal money has reached the hands either of the State official or the appraisers involved. The appraisers are paid fees based on their work.

Normally, the Federal Government would reimburse the State half of the highway improvement cost under the primary, secondary, and urban Federal highway program.

The project in Wakefield, now in the construction stage, involved a widening of Route 128.

It is a 3.3-mile stretch skirting Wakefield's northern boundary from North Avenue to the Saugus River, including the Lowell Street interchange.

It originally was planned in 1956, designed in 1957 and authorized for acquisition in 1958 and 1959. The State filed its required declaration of land taking in August 1959.

The Attleboro project on which the investigation still was incomplete, involved two stretches of interstate highway totaling 6.6 miles.

The first part extended 4.5 miles from the Rhode Island line in South Attleboro through industrial-commercial property to a point north of Thacher Street.

The second stretch was 2.1 miles from just north of the proposed Commonwealth Avenue interchange to a point north of Kelley Boulevard.

Hundreds of land tracts are involved in the land-taking process that will clear the way for the new highways. The exact number still is undetermined as the investigation continues.

The precise number of fee appraisers involved in the overvaluations also was undetermined. It was believed to be a comparatively small number.

A Traveler source said some of the appraisers apparently worked actively with the State official while others were "coerced."

Since Federal money didn't change hands, any official charges against these persons, based on Justice Department investigation, probably would be something like conspiracy.

Under State procedure, appraisals approved by the State department of public works are sent to a five-member real estate review board for review.

However, this group meets only once weekly and lacks facilities for investigating the basis on which the submitted appraisals were determined.

[From the Boston Herald, August 18, 1960]

U.S. PLEDGES COMPLETE PROBE OF MASSACHUSETTS HIGHWAY LAND COST

(By Tom W. Gerber)

WASHINGTON.—The chairman of a Federal highway investigating subcommittee Wednesday pledged a "complete rundown" on excessive appraisals in Massachusetts' Federal aid highway program.

Representative JOHN A. BLATNIK (Democrat, of Minnesota) told the Herald his group was "going to find out" about U.S. Bureau of Public Roads' evidence that overvaluations totaled "millions of dollars."

GOP MEMBER WANTS FASTER ACTION

BLATNIK, whose subcommittee was formed to watchdog the biggest construction undertaking in world history, said he hoped to send investigators to Massachusetts "within a month."

But the ranking minority member of the subcommittee, Representative GORDON H. SCHERER (Republican, of Ohio), told the Herald the investigation should be started immediately.

"There's no reason why the subcommittee staff should not conduct a complete investigation at this time," SCHERER said.

SCHERER, reached Wednesday night soon after his return from Cincinnati said the Massachusetts highway scandals were "far worse than in Oklahoma."

SCHERER said he expected to have a further statement on the Massachusetts highway scandals after he had studied BPR reports sent to the subcommittee.

The subcommittee in May held hearings on the Oklahoma highway scandal. Evidence was developed on falsified reports, payments for work not done, death threats, and juggled claims.

MEETING AUGUST 24

BLATNIK said the subcommittee would discuss the evidence of bloated appraisals for right-of-way land in the Massachusetts highway program at an executive session August 24.

The Minnesota Congressman said subcommittee experts would evaluate data obtained by the independent valuation engineering firm of Beasley & Beasley and other material in BPR files before investigators were sent to the Bay State.

"I want to make this perfectly clear," BLATNIK said. "The situation in Massachusetts will be given a complete rundown."

However, he said hearings on highway right-of-way appraisals in Massachusetts certainly would not be held before Thanksgiving.

BLATNIK said no hearings would be held until after the November elections.

POLITICS CHARGE FEARED

"We could be accused of playing politics," he said.

But SCHERER disagreed. He noted the Beasley & Beasley reports and BPR-developed information already had been turned over to the U.S. Justice Department for "appropriate action."

"The committee would be more justified going into Massachusetts before any possible indictments are returned than afterward," he said.

The BPR reports to the subcommittee and other information obtained by the Herald implicated a high Massachusetts official in the excessive appraisals racket.

However, the official was not named in the reports.

But it was learned he exerted "pressures" on State-hired fee appraisers to "compromise their independence," in making true market value appraisals.

UP 300 PERCENT

Some of these appraisers actively cooperated in the puffed-appraisal racket while others were coerced by the threat of losing State business if they failed to cooperate, the Herald learned.

Some appraisals for large land tracts were as much as 300 percent over subsequent appraisals by Beasley & Beasley, it was learned.

The valuation engineering firm from Washington, D.C., was hired by the BPR in May to investigate and doublecheck information developed by the BPR's project examination division since January.

That was when the Federal Government shut off land-taking reimbursements to the State under the Interstate Highway program and the so-called primary, secondary, and urban program pending a full audit.

The Federal Government pays the State 90 percent of the land-taking and construction costs under the $50 billion Interstate program and half the land-taking and construction costs under the primary, secondary, and urban system in the State.

TWO AREAS COVERED

However, despite this 8-month holdback of Federal funds, the Herald learned the State already has paid for some of the land that was excessively appraised.

The BPR report to the subcommittee, prepared by Beasley & Beasley, covered Federal aid highway projects in two Massachusetts areas—Wakefield and Attleboro-North Attleboro.

The Wakefield project was a widening of Route 128 along a 3.3 mile stretch around the community's northern bulge. This is under the primary road program.

The Attleboro-North Attleboro project was in two parts of proposed Interstate Route 95.

NO COMPARISON

The first stretched for 4.5 miles from the Rhode Island line in South Attleboro through costly industrial and commercial property to a point near Thacher Street.

The second was a 2.1 mile segment from north of the proposed Commonwealth Avenue interchange to a point just north of Kelley Boulevard.

However, the Beasley & Beasley reports on these projects contained only painstaking appraisal of each land parcel involved in the highway construction.

There was no comparison with State appraisals.

This was contained in other BPR data not sent to the subcommittee, but to which the subcommittee was given access.

A Herald source said two additional volumes covering other land appraisals in the Attleboro area would be sent to the subcommittee of a later date.

MANY VALUES UPHELD

In addition, the Herald learned another Federal-highway project in the Gardner area also was under BPR and Beasley & Beasley review.

Study and analysis of this area was expected to be ready next month.

The Herald's source said hundreds of land tracts were involved in the two 4-inch

thick reports sent to the subcommittee. However, he said only "a small percentage" of the appraisals erceived by Beasley & Beasley had been found to be valued excessively.

Generally, he said, the larger tracts were overvalued while smaller plots taken under eminent domain were appraised with reasonable accuracy.

Nevertheless, the Herald was told authoritatively the total overvaluation in Massachusetts would run into "millions of dollars."

At the outset of the investigation this spring, it was believed the overvaluations would range only in the hundreds of thousands of dollars.

HOW WAS IT DONE

In a letter transmitting the report to the subcommittee, Public Roads Commissioner Ellis L. Armstrong told how fee appraisers justified excessive valuations.

The letter to BLATNIK said State-hired appraisers used "misleading information" and ignored "available data" that might support a true valuation.

"For example, sales of improved properties were reported as unimproved and were used to support prices in land far in excess of the true value," the letter said.

And the Herald learned these appraisers sometimes ranged as far as several miles from the property they were supposed to be appraising to find more costly land they could cite to support an inflated appraisal.

UP TO LAWYERS

The Herald's source emphasized the suspected appraisers and the State official involved never collected Federal funds. This money was shut off in January.

However, intentional overappraisals submitted in expectation the State would be reimbursed with Federal funds possibly could be considered conspiracy.

But this was up to the Justice Department to determine.

Meanwhile, both the BPR and the Beasley & Beasley investigations continued.

[From the Boston Traveler, August 18, 1960]

MASSACHUSETTS HIGHWAY SCANDAL WORST YET

(By Tom Gerber)

WASHINGTON.—Preliminary evidence indicates the Massachusetts highway scandal is bigger than all six under congressional investigation in other States put together, an informed source said today.

The source, which is close to the investigating subcommittee, would not name the other six States currently under probe.

However, he said the Massachusetts situation also involved more money than scandals previously uncovered in Arizona, Indiana, and Oklahoma.

The Executive Council today rejected a proposal to halt State land-damage payments during the Federal investigation of the Massachusetts highway scandal.

Councilor Augustus Means, sole Republican member, proposed the freeze and cast the only vote recorded in favor.

He called attention to the Federal Bureau of Public Roads investigation of Massachusetts land appraisals in the Federal-aid highway program.

"Something is apparently brewing in the Department of Public Works and the U.S. Government," he said. "This body should not continue to approve any more land damages until the matter is cleared up."

Councilor Joseph R. Crimins, one of seven Democrats voting against the motion, said a halt in payments would hurt small property owners whose homes had been taken for new highways.

Democratic Councilor Patrick J. McDonough bitterly attacked Senator LEVERETT SALTONSTALL (Republican, of Massachusetts) and the Herald and Traveler.

He said the newspaper's stories about the Federal investigation were "phony and padded" for the benefit of SALTONSTALL.

"SALTONSTALL will have all kinds of Federal men here to produce phony headlines," he said.

He told the council that similar Federal investigations are going on in every State of the Union. No single State is being singled out, he said.

Representative JOHN A. BLATNIK (Democrat, of Minnesota), chairman of the highway investigating subcommittee, said his group will make a complete rundown on evidence that excessive land appraisals in the Massachusetts Federal-aid highway program totaled millions of dollars.

BLATNIK said he hoped to send subcommittee investigators to Massachusetts within a month.

ASKS PROBE RIGHT NOW

But the ranking subcommittee's minority member, Representative GORDON H. SCHERER (Republican, of Ohio), suggested the investigation should begin immediately.

In an exclusive story in yesterday's Traveler, the U.S. Bureau of Public Roads reported it had evidence of bloated appraisals for right-of-way land in the Massachusetts highway program.

The BPR report to the subcommittee covered Federal-aid highway projects in Wakefield and Attleboro-North Attleboro. The report was prepared by Beasley & Beasley, a valuation firm from Washington, D.C.

The report and other information obtained by the Traveler implicated a high Massachusetts official in the excessive appraisals racket. The official, however, was not identified by name.

PRESSURES EXERTED

But it was learned he exerted pressures on State-hired fee appraisers to compromise their independence in making true market value appraisals.

Some of these appraisers actively cooperated in the puffed-up appraisals, while others, it was learned, were coerced with threats of losing State business if they didn't cooperate.

Some appraisals for large land tracts were as much as 300 percent higher than appraisals subsequently made by Beasley & Beasley, it was learned.

The firm was hired by the BPR in May to probe into information developed by the Bureau's project examination division since January.

During January, the Federal Government suspended land-taking reimbursements to the State under the interstate highway program and the so-called primary, secondary, and urban program pending a complete audit.

The Federal Government pays the State 90 percent of the land-taking and construction costs under the $50 billion interstate program. It pays half the land-taking and construction costs under the primary, secondary, and urban system in the State.

BLATNIK told the Traveler his subcommittee will discuss the evidence of bloated appraisals in Massachusetts at an executive session August 24.

Subcommittee experts will evaluate it before investigators are sent into the State, he added:

"I want to make this perfectly clear," he said, "the situation in Massachusetts will be given a complete rundown."

But he surmised that hearings on the evidence would not be held before the November elections. Otherwise, he added, "we could be accused of playing politics."

SCHERER disagreed, noting that the Beasley & Beasley reports already have been turned over to the U.S. Department of Justice for appropriate action. He said:

"The subcommittee would be more justified going into Massachusetts before any possible indictments are returned than afterward."

In addition to the Wakefield and Attleboro-North Attleboro projects, the BPR also is reviewing another Federal-highway project in the Gardner area, it was learned.

Study and analysis of this area is expected to be ready next month.

Hundreds of land tracts were involved in the two 4-inch-thick reports sent to the subcommittee. But only a small percentage of the appraisals received by Beasley & Beasley had been found to be valued excessively, a source said.

In general, he explained that the larger tracts were overvalued while smaller plots taken under eminent domain were appraised with reasonable accuracy.

Nevertheless, the total overvaluation in Massachusetts would run into "millions of dollars," it was reported.

[From the Boston Herald, Aug. 19, 1960]

FBI TO PROBE STATE SCANDAL IN LAND TAKING

(By Paul Costello)

The FBI will be called in within 1 week to investigate the alleged millions of dollars in excessive appraisals for rights-of-way in the Massachusetts Federal-aid highway program.

The Herald learned Thursday night that the U.S. Justice Department has been kept informed of the preliminary investigation of large-scale land damage frauds by the U.S. Bureau of Public Roads and it has decided to call the FBI into the case.

THREE INVESTIGATIONS

The FBI inquiry will be conducted separately from the Bureau of Public Roads investigation and from the investigation being conducted by the independent valuation engineering firm of Beasley & Beasley.

All that remains to be completed before the FBI steps in is the filing of a formal request by the Justice Department and the completion by the Bureau of Public Roads of its final draft of the preliminary report based on its 7-month Massachusetts study.

The BPR broke the scandal Wednesday in a letter to a special House subcommittee set up as a watchdog on the billion dollar Federal-aid highway program throughout the Nation.

The FBI entrance into the scandals comes on the heels of announcement Wednesday by subcommittee chairman, Representative JOHN A. BLATNIK (Democrat, of Minnesota), that preliminary reports of BPR and Beasley & Beasley warranted a "complete rundown" on excessive appraisals in Massachusetts' Federal-aid highway program.

BLATNIK said then that he hoped to send committee investigators into Massachusetts within a month.

TURNS OVER FILES

However, the ranking minority member of the subcommittee, Representative GORDON H. SCHERER (Republican, of Ohio), told the Herald that there was no reason why staff investigators shouldn't start on the case at once.

The Bureau of Public Roads turned over its files in the case to the Justice Department Wednesday. The Justice Department, on the basis of BPR information, decided to call in the FBI.

The evidence presented by the BPR showed that at least one high State official has been implicated in the right-of-way scandal.

This official has not been identified pending submission of evidence to a Federal grand jury, but the Herald learned he exerted "pressures" on State-hired fee appraisers to "compromise their independence," in making true market value appraisals.

Beasley & Beasley, which was hired by the BPR in May to doublecheck and develop evidence uncovered by BPR investigators

since January, has reported some appraisals were inflated by as much as 300 percent.

STARTED IN JANUARY

The BPR launched its review of the Massachusetts phase of the Federal highway program in January after shutting off land-taking reimbursements to the State as the result of reports of widespread abuses here.

The Federal Government reimburses the States for 90 percent of the cost of land taking and construction under the $50 billion interstate program and pays 50 percent under the primary, secondary, and urban road construction program.

The preliminary BPR report, which is the basis for the FBI being called in, covered Federal-aid projects in Wakefield along Route 128 and in the Attleboro-North Attleboro area on Interstate Route 95.

The investigation by the FBI will be a brand new study. The BPR material will be used only to supply leads for FBI agents to follow.

Under usual procedures the FBI would turn over the results of its investigation to the Justice Department, which then must decide whether to seek indictments before a Federal grand jury.

STORMY SESSION

In a stormy session of the executive council on Beacon Hill yesterday as Democratic councilors defended the department of public works and the Furcolo administration in the right-of-way scandal.

The storm broke when the lone Republican on the council, Augustus G. Means, of Essex, introduced a mild motion requesting that the council refrain from acting on pending land-taking cases until the Federal investigation has been completed.

The council defeated the motion 7 to 1 and then approved 39 land-taking damage awards.

Means, who reminded the councilors that "it is this honorable body" that must in the last analysis pass on all land takings, said "something is brewing in the department of public works * * * and I urgently request that we suspend action until it is apparent these land takings are in order."

Councilor Joseph Ray Crimmins (Democrat, of Somerville) seconded Means' motion "just to get this out in the open," and then challenged Means to produce evidence of wrongdoing in the DPW.

The strongest comments came from Councilor Patrick J. McDonough (Democrat, of Boston), who charged the published stories out of Washington on the Massachusetts investigation are "phony, padded stories for the benefit of one LEVERETT SALTONSTALL."

[From the Boston Traveler, Aug. 19, 1960]

GOP DEMANDS ACTION IN MASSACHUSETTS ROADS PROBE

(By Tom W. Gerber)

WASHINGTON.—Republican Members will seek a showdown Wednesday on their demand that a congressional subcommittee begin an immediate investigation of the Massachusetts highway scandal.

They will press their demand in an executive session of the House Highway Investigating Subcommittee headed by Representative JOHN A. BLATNIK (Democrat, of Minnesota).

WANT TO DEFER PROBE UNTIL AFTER ELECTION

BLATNIK and the other 12 Democratic members of the 19-man group want to put off any inquiry until after the November election. They don't want to embarrass the Massachusetts Democratic administration and thus indirectly Democratic presidential nominee Senator JOHN F. KENNEDY.

Representative GORDON H. SCHERER (Republican, Ohio) is expected to lead the minority fight for an immediate inquiry.

Senator LEVERETT SALTONSTALL (Republican, of Massachusetts) said the BPR's "shocking charges * * * must be investigated to the fullest."

"This, I am confident, responsible Federal authorities will do," he said.

"Personally, I know nothing more of this matter than what I have read in the newspapers. But to pass this matter off merely as election-year politics demonstrates careless disregard for the taxpayers' interest and public trust."

Although the subcommittee has not yet sent its investigators to Massachusetts, the Federal Bureau of Public Roads is pressing ahead with its inquiry. Moreover, the FBI is expected to launch an independent investigation next week.

The BPR investigation already has turned up evidence that Massachusetts appraisers inflated right-of-way land appraisals for Federal-aid highways by millions of dollars.

The BPR turned over its preliminary files in the case to the Justice Department on Wednesday for "appropriate action." The Justice Department, in turn, decided to call in the FBI.

HIGH STATE OFFICIAL UNDER SUSPICION

A high State official is under suspicion, it was learned, of pressuring State-hired appraisers to "compromise their independence" by inflating their estimates of land values.

The independent appraisal firm of Beasley & Beasley, hired by the BPR to check the right-of-way properties, has indicated some values were ballooned by as much as 300 percent.

The Federal Government reimburses States for 90 percent of the cost of land taking and construction under the $50 billion Interstate Highway program, and 50 percent under the primary, secondary, and urban road construction program.

Since the BPR shut off reimbursements to Massachusetts last January, however, no Federal money has been paid out for the inflated appraisals.

Federal courts nevertheless could prosecute participants in the inflated scheme for conspiracy to defraud.

And while the subcommittee is investigating these alleged right-of-way irregularities in the Bay State, I commend to its attention the possibility that there may be some liberties taken with the Federal purse in the awarding of contracts for consulting engineering work by the Massachusetts Public Works Department. I especially would like the subcommittee to investigate the possibility that these contracts may have been awarded on a political patronage basis to J. L. Hayden Associates and to Thomas Worcester, Inc., both Massachusetts firms. Of prime concern should be: Are any of these moneys and large funds being returned to the campaign coffers of the party faithful? The basis for my information and concern are some recent newspaper clippings from the crusading Boston Herald, which some good public-spirited citizen of the State of Massachusetts recently sent to me. Because some Members of the House do not read the Boston papers and because I want to be helpful to the chairman of my subcommittee, I request that the newspaper articles just mentioned also be printed at this point in my remarks. They are articles entitled: "Parkway Brochure Cost $46 Each," in the Boston Herald dated August 23, 1960; "'No Comment,' Says Ricciardi", in the Boston Herald on August 23, 1960; "Thomas Worcester Charged With $180,784 Tax Evasion" in the Boston Herald on August 23, 1960; "Company Made Payments on Bogus Bills, Trial Told" in the Boston Herald on August 25, 1960; "$23,000 Brochure Job Sublet for About $5,000," in Boston Herald on August 25, 1960.

[From the Boston Herald, Aug. 23, 1960]

PARKWAY BROCHURES COST $46 EACH

(By David Farrell and Wayne Hanley)

The Furcolo administration paid $46 per copy for 500 "Commemorative Brochures" on the proposed President Adams Parkway, the Herald learned last night.

STUDY STILL GOING ON

Some $23,000 of the taxpayers' money was shelled out to J. L. Hayden Associates, Inc., one of the administration's pet consulting engineering firms, for preparing the 44-page, 9-inch by 12-inch brochure.

The money was spent by the Massachusetts Department of Public Works at the suggestion of Governor Furcolo despite the fact that the Federal Government is spending $25,000 for a study of the feasibility of establishing such a parkway.

Furcolo and his newly appointed commissioner of public works, Jack Ricciardi, announced last week that a parkway from Faneuil Hall, Boston, to Plymouth was being considered. The existing portions of the Southeast Expressway from Boston to Quincy as well as the Plymouth Bypass would be incorporated in the new roadway that calls for construction between Quincy and Kingston, according to the Governor.

Just why the souvenir booklet which is largely a collection of pictures and facts researched from various historical books and societies, was not put together by the DPW's regular staff of public relations consultants has not been explained.

Ostensibly the brochure was prepared to help influence the Federal Government on the necessity of constructing another parkway through the South Shore to Plymouth in addition to the expensive Southeast Expressway and Route 3A.

More likely, according to one leading Democrat, the huge outlay was made to supply Governor Furcolo with some publicity aimed at garnering votes for him along the South Shore in his bid to unseat Senator Saltonstall. The timing of the announcement during the current political campaign would seem to bear this out, especially since the brochure was prepared last winter.

Most State House and Capitol Hill observers see little or no chance of an additional highway—which by the DPW's own conservative estimate would cost a staggering $76 million—being built by the State or Federal Government along the South Shore in the foreseeable future.

"IF APPROVED" CLAUSE

That the State has no intention of spending a dime of its own for construction of the parkway is manifest from the tenor of the statements by Furcolo and Ricciardi when they launched the trial balloon about the road last week. Both officials qualified their statements about the proposed parkway with a handy "if approved by the Federal Government" escape clause.

The Federal officials who are studying the feasibility of establishing (not necessarily constructing) a President Adams Parkway were in Boston the last week of July conferring with representatives of the Boston office of the Federal Bureau of Public Roads and the State public works department.

One official at the Bureau of Public Roads told the Herald he was sure the Federal Government would balk at constructing any

great amount of new roadway for the parkway and would insist on using existing roads like Route 3A or the entire length of the Southeast Expressway when it is completed through Hingham, Norwell, Hanover, Pembroke, and Kingston to the Plymouth Bypass.

He pointed out that a freeway to the western suburbs, as recommended in the 1948 master highway plan, would have to be built before the South Shore gets another new highway, especially if the Massachusetts Turnpike Authority is unable to finance extension of the turnpike from Weston to Boston.

STARTED IN 1959

The firm which authored the expensive brochure is one of the up and coming professional engineering firms in Massachusetts. J. L. Hayden Associates, Inc., doing business at 1340 Soldier's Field Road, Brighton, was incorporated on April 9, 1959.

The firm's incorporation papers, on file at Secretary of State Joseph Ward's office, show that John L. Hayden, of 14 Richland Road, Wellesley, is president and treasurer. Clerk is Philip A. Brancucci, lawyer, of 10 Arlington Street, Cambridge. The corporation's three directors are listed as Hayden, Brancucci, and Alice P. Kavanaugh, of 54 Kenmore Road, Medford.

J. L. Hayden Associates is only one of four related firms whose president is Hayden and whose offices are at 1340 Soldier's Field Road. Other corporate papers on file at the statehouse reveal that Hayden is also president of Hayden, Harding & Buchanan, Inc.; Hayden, Harding & Buchanan Engineers, Inc.; and Polytechnical Engineering, Research & Sales Co., Inc. This latter firm is known as Persco.

All of these firms, with the exception of Persco, have been the recipients of several lucrative consulting engineering contracts from the Furcolo administration in recent years.

MANY CONTRACTS

There are many consulting engineering firms doing business with the Department of Public Works which lets the vast majority of its engineering work out on contract to private firms on the grounds that the department does not have enough qualified engineers to handle the tremendous work load occasioned by the State's huge road program.

A check of the DPW's contracts with these firms shows that the Hayden companies have been unusually successful in convincing State officials not only of the value of their work but also of the diversity of their capabilities.

Following is a rundown of some of the Hayden firms' contracts with the DPW and its division of waterways:

1. A $921,000 lump sum contract to Hayden, Harding & Buchanan, Inc., and Charles A. Maguire & Associates for consulting engineering work on the Inner Belt. The two firms presumably are splitting the work.

2. An $878,000 contract to Hayden, Harding & Buchanan Engineers, Inc., for consulting engineering on a portion of Interstate Route 195 which runs between the Rhode Island border at East Providence and New Bedford.

EIGHTEEN-MILLION-DOLLAR COST

The firm's slice of this roadway is a segment between Fall River and Westport. Estimated construction cost of this piece of roadway is $18 million and the engineering fee granted H., H. & B. Engineers, Inc., amounts to 4.88 percent of this or $878,000. Through last May the firm had received a half million dollars for the work it had done to date. Although consulting engineering fees for highway construction jobs generally run about 4½ percent, the 4.88 percent fee to the Hayden concern is not unusual.

3. A $225,000 consulting engineering fee for work on a $6 million construction segment of the same road, Interstate Route 195, between Seekonk and Swansea. This contract also involved H., H. & B. Engineers, Inc.

4. A $148,000 contract for J. L. Hayden Associates for an extensive study of the State's highway needs as well as recommendations for a detailed program of future construction in Massachusetts. This presumably was the study that resulted in the billion-dollar-highway program that Furcolo unsuccessfully recommended to the legislature this year.

5. An $84,000 contract for J. L. Hayden Associates to review and study for possible revision and rewriting the DPW's manuals, guides, and specifications.

WATERWAYS PROJECTS

6. A contract between the division of waterways and J. L. Hayden Associates for consultant services on certain waterways projects. As of last January the Hayden firm was paid $8,811 for its work, principally survey work, on Quequechan River in the Fall River area where the river's channel was being relocated.

Hayden, Harding & Buchanan, Inc., and Polytechnical Engineering, Research & Sales Co. were incorporated on April 7, 1955. Hayden, Harding & Buchanan Engineers, Inc., was incorporated April 30, 1957, while J. L. Hayden Associates was formed on April 9, 1959.

[From the Boston Herald, Aug. 23, 1960]

NO COMMENT, SAYS RICCIARDI

State Public Works Commissioner Jack Ricciardi, of Wellesley, late yesterday gave a "no comment" answer to State Auditor Thomas J. Buckley's 154-page report sharply criticizing the DPW.

Ricciardi, a former deputy commissioner, said he had just received the bulky document and asked for time to study it.

CONTRACTS CITED

Buckley's report made mention of a deputy commissioner who received an average of $14,000 annually as a consultant for more than 2 years.

It also singled out for criticism the granting by the DPW of 44 separate under-$1,000 contracts to a single painting contractor as a "device to circumvent the laws."

It was pointed out that under State law only contracts of $1,000 or more require competitive bidding. The 44 contracts referred to in the audit of the highway division of the DPW were "each for $125 less than the statutory limit of $1,000."

Buckley reported they went to one painting contractor for work confined to a single section of the East Boston Expressway.

The report also criticized payment of $775,812 for corrective construction at the Roy C. Smith Bridge on the Southeast Expressway near the Neponset Interchange in Dorchester. The payment was made, the report said, despite a ruling from the attorney general that the contractor was at fault.

Buckley also questioned the award of a lump sum contract for $84,000 for professional engineering services which should have been performed on a cost-plus basis; "overruns" on construction projects due to consistent failure of preliminary plans to show either the terrain or the makeup of the area with any degree of accuracy; changes in a connecting roadway contract on a road in Philipston at a cost of $83,000 despite the attorney general's disapproval, and failure of leases for gas stations and restaurants to spell out responsibility for local real estate taxes.

PAYMENTS HELD UP

The Buckley report did not identify the deputy commissioner involved as a consultant, but Ricciardi readily admitted the State auditor had him in mind.

The audit also charged the Federal Bureau of Public Roads has held up payments of $6,721,817 on land damage cases, pending the outcome of its probe into claims of overpayment for land taken for federally aided roads.

The same Federal agency, the report said, has withheld approval of a bridge at Fall River due to a question concerning the safety of steel girders. The report says welding problems have arisen and that as a result the Bureau has not been billed for $655,396 for this project.

Buckley's report contends that specifications for highway construction failed to properly identify the type of terrain. It said many examples were shown of ledge being found instead of earth and other variances.

Because of the varying charges for removal of peat, earth or rock, Buckley said the overrun charges on one contract in Methuen amounted to $76,000.

The report also cited a Middleboro contract where overrun charges of $222,778 were made on one contract for gravel borrow alone. In the same contract, Buckley said the overrun for digging out peat came to $44,500.

REVIEW AUDIT CITED

The State auditor also took issue with payment of $9,894.48 to a consultant for a review audit of one of Buckley's own audit reports on the department.

Buckley pointed out that his previous criticism of leasing of parking lots without bids resulted in the DPW's cancellation of contracts and the advertising for bids.

A comparison of the bids, he said, showed the high bids will amount to $70,578.60 annually, whereas the negotiated leases on the same lots amounted to $7,020 per year.

[From the Boston Herald, Aug. 23, 1960]

THOMAS WORCESTER CHARGED WITH $180,784 TAX EVASION

Thomas Worcester, 63, president of Thomas Worcester, Inc., Boston engineering and construction firm, went on trial before Judge Charles E. Wyzanski, Jr., and a jury in U.S. district court yesterday charged with evading income taxes totaling $180,784.

Worcester, of Putnam Street, Waltham, is charged with evading personal taxes totaling $74,582 for 1950, 1951 and 1952, also taxes of $106,202 allegedly owed by his firm for the fiscal years 1950 and 1951. The Government alleges he filed false returns understating his own and the corporation's income.

It is charged that his personal net income during the 3 years involved totaled $263,156 but that he reported only $112,162 in his returns.

Also, that the company's net income for the years 1950 and 1951 amounted to $209,114, but that only $48,457 was listed in the returns.

Assistant U.S. Attorney Norman A. Hubley, in his opening to the jury, said the Government would show that Worcester channeled large sums out of the firm and into his own hands. He said the funds were diverted to two other concerns through fictitious expense charges.

[From the Boston Herald, Aug. 25, 1960]

COMPANY MADE PAYMENTS ON BOGUS BILLS, TRIAL TOLD

Philip W. Murphy, former comptroller of Thomas Worcester, Inc., Boston engineering and construction firm, testified in U.S. district court yesterday that the company made large payments to another firm on the basis of "fictitious" bills and vouchers.

Asked by Lewald the purpose of the Ross Turner concern, Murphy said, "Mr. Worcester needed to have a considerable sum of money and the partnership was formed in

order to bill the Worcester company for services, and the Worcester company in turn would make checks payable to Ross Turner & Co."

Murphy, a resident of East Bridgewater, was called as a Government witness at the trial of Thomas Worcester, head of the engineering and construction firm, on income tax evasion charges.

SAY $180,784 EVADED

Worcester, 63, is charged with evading taxes to totaling $180,784 by filing false returns for himself and his firm. Included are personal taxes of $74,582 allegedly owed for 1950, 1951, and 1952, and $106,202 allegedly owed by Thomas Worcester, Inc., for 1950 and 1951. Judge Charles E. Wyzanski, Jr., is presiding at the jury trial.

Murphy, under questioning by Assistant U.S. Attorney George H. Lewald, testified that payments totaling $105,240 were made by the Worcester company in 1949 to a newly organized firm called Ross Turner & Co., which had been set up in an office on State Street.

The firm was a partnership whose members comprised Worcester, Murphy, and two other employes of the Worcester firm. Murphy, who worked as comptroller directly under Worcester, said the payments were made purportedly for "engineering services" rendered to the Worcester company by Ross Turner & Co., but that actually no services were made. The checks covering the payments, said Murphy, were signed by Worcester and himself.

[From the Boston Herald, Aug. 25, 1960]

$23,000 BROCHURE JOB SUBLET FOR ABOUT $5,000

(By David Farrell and Wayne Hanley)

The consulting engineering firm which was handed a $23,000 contract for preparing 500 commemorative brochures on the proposed President Adams Parkway sublet the job to a Boston advertising agency, the Herald learned last night.

JOB TURNED OVER TO AD AGENCY

J. L. Hayden Associates, which was paid $46 a copy for each of the brochures, turned the job over to Parsons, Friedmann & Central Advertising Agency of 69 Newbury Street almost immediately after signing the contract with former State Public Works Commissioner Anthony DiNatale.

DiNatale quit his post as head of the DPW recently but was commissioner on December 8, 1959, when the agreement between the State and the Hayden firm was set up.

Although mystery continued to shroud some aspects of the brochure, several developments were uncovered by the Herald.

Here are the known facts in the strange case:

Commissioner DiNatale and John L. Hayden of Wellesley who is president of J. L. Hayden Associates and two other firms which have been paid hundreds of thousands of dollars in the past year for consulting engineering work in a variety of DPW projects, including the updating of DPW manuals and publications, signed a contract December 8 providing for the parkway brochure.

Shortly thereafter Hayden or one of his representatives called Robert Friedmann, treasurer and account executive of the advertising agency, and requested the agency to go to work immediately on the project.

It is not clear whether Hayden made the call because his secretary reported that he had "gone on vacation" and she "didn't know when he would be back" when the Herald attempted to question him about the brochure.

At any rate, the agency contacted Winthrop Printing & Offset Co., of 141 West Second Street, South Boston, and asked the firm to quote a price on the job.

It was explained the job had to be done as fast as possible even if it involved overtime.

The firm submitted a price somewhere in the vicinity of $2,000 and was given the job.

Roy E. Orrall, an executive of the printing firm, said his company printed the brochure but referred all questions about it to Friedmann.

Raymond E. Parsons, of South Weymouth, president of the advertising agency, said he was not familiar with all of the details of the brochure.

ABOUT $5,000

He did say the total value of the job was "about $5,000" and this included the printing of the brochures as well as the creative work the agency put into the preparation of the original copy.

Parsons indicated he thought his agency was given the job because the firm had considerable experience in producing historical material. The famous folder on Boston's "Freedom Trail," was considered an outstanding guide on the city's historic sites, was prepared by his agency.

"I can say that we were entirely ethical," Parsons said. "We prepared the brochure at a price customary for such work. It was within the normal price range that any agency would have charged."

Parsons indicated that the total cost for the agency and printing company's efforts did not exceed $5,000.

SEVERAL MYSTERIES

Several mysteries still remain in the strange case of the parkway brochure:

1. Why did the Furcolo administration pay Hayden Associates $23,000 for a job that apparently was worth considerably less?

2. Why the tremendous Christmas rush to complete the job "as fast as possible," even if it meant overtime? The brochure was not released to the press until last Friday, August 19—some 8 months after it was completed.

3. Why do DPW records show that the work on the brochure was done between January 11, 1960, and February 3, 1960, when it now has been established that the work was jammed through in December 1959?

4. Why was a professional engineering firm that was busy with a multitude of other department of public works contracts chosen to do a brochure that was primarily a historic and scenic guide that was more properly the work of an advertising agency?

[From the Washington News, Aug. 23, 1960]

HIGHWAY CHARGES FLY ON HILL

Representative GORDON H. SCHERER (Republican, of Ohio) today charged a Democratic-controlled investigation committee is deliberately covering up a Massachusetts road-building scandal which is "the granddaddy of them all."

Representative SCHERER, ranking minority member of the House Highway Investigating Committee, said the road building skullduggery being investigated by the committee "looks like peanuts" compared with the Massachusetts situation.

He flatly accused Committee Chairman JOHN A. BLATNIK (Democrat, of Minnesota) of arbitrarily deciding to stop "all further hearings because the Massachusetts scandals had to be kept under cover until after the election."

"He's a liar," Representative BLATNIK retorted. "We've been in touch with the Massachusetts situation all the time. There's no change in tune."

I do not know if the "political considerations," referred to by the Chair, means that to expose this Massachusetts matter prior to election would be embarrassing to some Democratic politicians in the Bay State who are offering their credentials to the voters this fall. Nor do I know if exposure would prove to be a Teapot Dome or another Hoffa-Beck episode. But I find this forbearance is a remarkable thing under the circumstances and, I fear, it will serve no worthy cause other than to obscure the true facts which the public ought to know and to undermine public confidence in the objective of an important committee of Congress. Accordingly, I urge our subcommittee to move into Massachusetts forthwith and prepare this hearing as soon as possible, letting the chips fall where they may. This alleged scandal has been known since January and further delay cannot be justified on any ground other than narrow political expediency.

OTHER UNFINISHED BUSINESS

There are also other areas of our highway program which I have long urged in vain that our subcommittee investigate and inform the Congress. These areas raise the questions of whether congressional policies are sound and are being administered properly by both Federal and State officials. It may be that these matters are not as "glamorous" as exposing corruption and laying hold of some scandals whose perfidy is rightly aired before the bar of public scrutiny, but they are nonetheless important. Without being exhaustive, the following list of objectives ought to engage the attention of our forum:

1. The reevaluation of the provisions for extending the Interstate System beyond 40,000 miles; and, if this policy is sound, establishment of a standard to determine when and where such extensions shall be made.

2. A reevaluation of the decision that the system shall serve both local needs and through traffic as well, together with some clarification of the policy vis-a-vis the location of interchanges.

3. A review and clarification of the policy regarding design standards relating to the use of multiple-lane highways as opposed to two-lane highways and design standards of interchanges.

4. Review and clarification of the policy regarding construction of the Interstate System between population centers, and connecting links into population centers.

5. Review and clarification of the policies regarding route locations as such decisions are related to the economic impact of the highways on the affected community.

6. Review and clarification of the policies relating to promotion of an integrated highway system and their implementation in the system's projects to date.

7. Reevaluation of the present policies relating to highway bridges over navigable waters with the view to developing different but adequate standards for bridge construction under the Federal Bridge Act.

8. Reevaluation of the policy providing for payment of the costs of relocation of utilities on highway right-of-way on to highway construction.

9. Clarification of reasons for the wide variation between the cost estimate of

1955, upon which the 1956 act was based, and the revised cost estimate submitted to Congress in 1958.

10. Investigation of the extent to which defense needs become the determining factor in route location and mileage.

Mr. Speaker, this entire highway program will be up for reappraisal by the Congress early in the next year. Unless some of these areas indicated above are explored, there simply will not be any record of facts and evidence which can form a solid foundation for the Congress to legislate upon or to base an informed examination of the present laws. If the new Congress is to raise some $13 billion in new revenue to help this Interstate System out of its financial dilemma, such inquiries as I have suggested must be answered. I would feel that I have failed to protect the best interests of all Americans, including my own constituents in the First District of Iowa, if I did not take this last opportunity in the waning days of this Congress to renew my demands, voiced on the floor of the House on May 26, 1960 (see CONGRESSIONAL RECORD, pp. 11322–11325) and often in committee hearings, that these areas be timely explored. I sincerely hope that this can and will be done and that when the new Congress returns in January, we can have the benefit of such investigations.

PUBLIC FINANCE

Mr. SCHWENGEL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SCHWENGEL. Mr. Speaker, the gross public debt of the United States now stands at $288½ billion. The manner in which this huge public debt is managed means a great deal to the American people. If it is managed wisely, the prospects for healthy and sustained economic growth will be enhanced; if it is managed improperly, all of us will suffer.

Because debt management is so important to the American people, it is indeed unfortunate that some of the Members of this body have seen fit to strike out, irresponsibly and emotionally, at the efforts of the Treasury to handle our $288½ billion debt in a sound and sensible manner. On August 25, the gentleman from Wisconsin [Mr. REUSS], assisted by some of his associates on the other side of the aisle, presented a lengthy discourse on recent and prospective debt management actions. The statements made by these gentlemen cannot be allowed to go unanswered.

My sole purpose today is to separate fact from fancy, truth from fiction. Several volumes would be required to give full treatment to all the erroneous points made by the gentleman from Wisconsin. Thus I shall have to content myself with a brief discussion of some of the more flagrant errors and misrepresentations.

But before I do that, it is important to point out that, as usual, the gentleman from Wisconsin and his associates continue to play the old tune of their Party—they are unhappy with the higher earnings that peoples' savings naturally earn in a prosperous economy. To hear these gentlemen talk, we would have to conclude that the millions of Americans who own some $42 billion of Savings Bonds should not be receiving 3¾ percent on their savings, as contrasted with less than 3 percent a few years ago. We would have to conclude that the American citizens who hold 22 million accounts in mutual savings banks, 25 million accounts in savings and loan associations, and over 37 million accounts in savings accounts at commercial banks should not receive the higher earnings on their savings that they have been receiving in recent years. We would have to conclude that the 112 million people with savings in the form of life insurance should not benefit from the higher interest rates that reduce the premiums on their policies. And we would have to conclude that the many millions who have savings in private pension plans and in Social Security should not benefit from the higher interest earnings that will add to their comfort in their years of retirement.

The fact is, of course, that interest rates rise in a prosperous economy simply because the demand for credit rises at such times. We might for a time be able to keep rates from rising by creating new money—by forcing the Federal Reserve to pump new bank reserves into the system—but the ultimate cost would be disastrous inflation and a precipitate rise in the cost of living. And when the gentleman from Wisconsin refers to the rapid rate of economic growth in Western Europe, he conveniently fails to point out that the most rapid growth has been experienced by precisely those countries which have permitted interest rates to respond to the forces of demand and supply and the impact of appropriate monetary policies. West Germany, which effectively stabilized her currency in 1948, is the prime example, but many others could be listed.

The first major point the gentleman from Wisconsin makes about debt management (CONGRESSIONAL RECORD, August 25, pp. 17710–17719) is that the Eisenhower administration has failed to take advantage of "golden opportunities" to lengthen the maturity of the public debt, which he admits is too short. The debt is indeed too short in maturity, and to postpone effective actions to lengthen it can only lead to severe difficulties later on, as more and more of the Government's outstanding securities get closer and closer to maturity.

But the gentleman fails to point out that most of the dangerous shortening of the public debt occurred between 1946 and 1952, when an earlier administration took almost no advantage of the artificially low interest rates then prevailing to put the debt in better shape. In that period, only $5 billion of marketable securities maturing in over 5 years were sold. From 1953 to the present, the Treasury has sold $51 billion of such securities, or 10 times the amount under the previous administration. The facts speak for themselves.

The gentleman strikes out at the administration's request for removal of the harmful and capricious 4¼ percent interest rate ceiling, which prevented the Treasury from engaging in any debt lengthening at all for almost a year. He states that "committees of the Congress, including the Joint Economic Committee, reviewed the merits of the administration's plea for a free hand and came out confirmed in the conclusion that there was no persuasive need for the elimination of the 4¼ percent statutory ceiling * * *."

What are the facts? The responsible legislative committee, the Ways and Means Committee of this body, did indeed review the need for removal of the ceiling, and on February 29, 1960, favorably reported a bill (H.R. 10590) which, for all practical purposes, would permit the ceiling to be exceeded. The gentleman knows very well why this bill never received consideration on the floor of the House; it was blocked by the militant liberal group of which he is a member. But it is a flat misrepresentation to state that committees of the Congress turned down the administration. The only responsible legislative committee in fact saw clearly the need for action and reported out a bill to this end.

The most surprising of the statements of the gentleman from Wisconsin are those directed at the new and promising debt management technique referred to as "advance refunding," in which investors holding Government securities with some time to maturity are induced to exchange for new long-term securities. Observers who have genuine interest in sound restructuring of our huge public debt, and who are not motivated by partisan considerations, agree that this technique provides the best method for achieving some meaningful debt extension.

Indeed, one would think that the gentleman himself thought so, if his past actions are indicative of his beliefs. Just short of a year ago, on September 4, 1959, the House was considering H.R. 9035, which included an amendment to the Internal Revenue Code for the express and declared purpose of facilitating advance refunding. What were the gentleman's remarks concerning this legislation? His precise words were: "* * * this is a good bill." (CONGRESSIONAL RECORD, vol. 105, pt. 14, p. 18169.)

What are the gentleman's objections to advance refunding? He stoutly maintains that it would be far preferable to achieve needed debt extension by selling new long-term bonds for cash, and he roundly criticizes the Under Secretary of the Treasury for pointing out, in a recent speech, the elementary fact that long-term bond sales for cash absorb funds that would otherwise be available for other types of long-term securities. He refers to the Under Secretary's remarks as a "kind of midsummer madness."

I suggest that the shoe is on the other foot; if there is any "midsummer madness" involved, it is not on the part of the able Under Secretary of the Treasury, but the gentleman who so rashly and immaturely criticizes him. What the Under Secretary said, in essence, is that heavy cash sales of long-term bonds

should not be used to achieve all of the debt extension that is clearly desirable. While some debt extension should surely be achieved in this way, the massive job to be done requires use of new and less disruptive techniques. When a new long-term bond is sold for cash, new savings are absorbed; if large amounts are sold, the effect is to deprive home-building, State and local governments, and other borrowers of the long-term savings they need—and which the economy needs.

An advance refunding would not, however, absorb long-term savings, because the technique would involve the exchange of one Government security for another. A long-term investor would simply replace one security which he now owns, and which has 5 to 10 years to run, with a new security with 20 to 30 years to run. The debt would indeed be extended, but without robbing residential construction, State and local governments, and other long-term borrowers of the funds needed for their important projects.

But the gentleman is not content to stop with his unreasoned condemnation of the Under Secretary's remarks—he goes further, and recommends strongly that the Treasury sell large amounts of long-term bonds for cash in periods of recession. This would indeed be a foolish and dangerous thing to do. It is precisely at such times that, although interest rates are of course low, the construction industry and State and local governments should be receiving a maximum amount of long-term savings, to promote their own activities and thus to stimulate economic recovery.

The fact is that nothing worse could be done, to stunt recovery from a recession, than for the Treasury to flood the long-term capital market with bonds at such times. It is indeed very surprising to hear a member of the opposition party advocate such a course of action; in so doing, he is acting directly contrary to the advice of the party's leading economic advisers. For example, Professor Seymour E. Harris, of Harvard, who is reported to be one of Senator Kennedy's closest advisers, has said:

> Selling long-term Government securities in the midst of a recession is foolish and costly. * * These securities compete with private enterprise and keep rates up.

This statement was in testimony before the Senate Finance Committee in mid-April 1958.

Mr. Speaker, much more could be said about the economic fallacies, misrepresentations, and distortions in the remarks of the gentleman from Wisconsin before this body on August 25. But these few points which I have discussed today make it perfectly clear that partisan considerations have been permitted to cloud the discussion of a very important issue. If we are to achieve a high and sustained rate of economic growth, provide abundant employment opportunities, and prevent further rises in the cost of living, we shall certainly not be able to do so by engaging in shallow and misguided attacks on the very policies which are necessary to achieve these vital goals. Sound debt management is only one of these policies, but it is an important one. It is toward clarifying this important issue that my remarks have been directed today.

WILDLIFE, FISH, AND GAME CONSERVATION IN MILITARY RESERVATIONS

Mr. BONNER submitted the following conference report and statement on the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations:

CONFERENCE REPORT (H. REPT. No. 2222)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, and 4.

That the House recede from its disagreement to the amendments of the Senate numbered 5 and 6 and agree to the same.

HERBERT C. BONNER,
FRANK W. BOYKIN,
GEORGE P. MILLER,
THOR G. TOLLEFSON,
WILLIAM K. VAN PELT,
Managers on the Part of the House.

CLAIR ENGLE,
E. L. BARTLETT,
NORRIS COTTON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

Section 1 of the House bill provided for issuance of special State hunting and fishing permits and authorized the Commanding Officer of each reservation to administer such permits as agent for the State if the particular cooperative plan so provided. The Senate amendment struck out reference to the State. The conference accepted the House provision.

Section 3 of the bill as passed the House directed the Secretary of Defense to expend funds collected or transferred in accordance with agreed cooperative plans. The Senate amendment omitted the authority to transfer these funds. This provision referred to funds that already might be in the hands of local Commanding Officers under existing plans. It was the sense of the conference that the transfer of such funds could best be handled through provisions in the individual cooperative plans.

The Senate amendments to section 5 excluded application of the law to national forest lands and Taylor Grazing Act lands. The action of the conference accepted these exclusions from the operation of the act.

HERBERT C. BONNER,
FRANK W. BOYKIN,
GEORGE P. MILLER,
THOR C. TOLLEFSON,
WILLIAM K. VAN PELT,
Managers on the Part of the House.

Mr. BONNER. Mr. Speaker, I ask unanimous consent for the present consideration of the conference report on H.R. 2565, to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the statement.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

THE CAPTIVE NATIONS—KEY TO PEACE

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. DULSKI] may extend his remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. DULSKI. Mr. Speaker, during the official observance of Captive Nations Week in the third week of July, a number of significant addresses were made throughout the country. I should like to bring to the attention of Members of the House the address given by my friend and colleague, Mr. FEIGHAN, on July 20 in Buffalo, N.Y. This address was given before a civic luncheon in the Golden Ballroom of the Hotel Statler-Hilton, sponsored by the Kiwanis Club of Buffalo in cooperation with the Buffalo Citizens Committee to Observe Captive Nations Week.

The title of my colleague's address is a very fitting one, "The Captive Nations—Key to Peace." Congressman FEIGHAN, as one of the sponsors of the congressional resolution which established Captive Nations Week, presented a realistic analysis of the human elements involved in the cold war. He points out that the overwhelming majority of the people in the captive nations behind the Iron Curtain have not and will not support the men in the Kremlin in times of peace or war. This opposition by the common man behind the Iron Curtain is a powerful deterrent to war because no dictator will start a war in face of the prospect that his empire will rise in revolt and defeat him from within.

Congressman FEIGHAN calls for a hard-hitting political action program in support of the people of the captive non-Russian nations, and suggests six major guideposts as the outlines of his program. These suggestions are timely for all who understand that the cold war is fundamentally a political conflict and that political action is necessary if we are to regain our position of leadership in the free world community.

Under unanimous consent, I insert in the RECORD the address of my colleague, Mr. FEIGHAN:

THE CAPTIVE NATIONS—KEY TO PEACE

(Address of Hon. MICHAEL A. FEIGHAN, U.S. Representative, 20th Ohio District)

The great issue of our times is foreign policy and the conduct of our foreign affairs. This opinion is made self-evident by the realization that the question of a hot war or a just peace will be resolved by the kind of foreign policy we support and the manner in which we carry it out. There are, of course, other important national issues and grave domestic problems such as an ever expanding free economy, full employment, civil rights, health protection for the elderly, the strengthening of our educational systems, urban renewal, and the human upsets of automation. Important as all these problems are they stand in the shadow of the challenge to our survival as a nation, and as a civilization, presented by the determined forces of international communism. If we fail to face up to this challenge and thus lose the struggle with the Russian Communists, these domestic problems will have no importance or relevance whatever. They will be disposed of summarily by the ruthless dictatorship which awaits any free nation falling under the rule or domination of imperial communism.

The history of some 40 years of Communist aggression warns us that we are in a life or death struggle with the highly organized forces of tyranny. We did not create this contest. We were forced into it in 1947 when it became crystal clear that we had no other alternative—except gradual and peaceful surrender. It was then, you will recall, the Russian Communists were attempting the take-over of Greece and Turkey by armed aggression, when the subversive task forces of communism were gnawing away at the democratic governments of Western Europe, when Moscow was directing the Chinese Reds in the take-over of mainland China and when the Red Army stood guard over the ruthless imposition of alien regimes upon the nations of Central and North Europe. The Presidential decision to stand firmly in support of the freedom-loving people of Greece and Turkey was a far-reaching one. It went far beyond the immediate requirements of these two countries. That decision signaled a determination to hold back the Red wave of Russian aggression on all fronts. Hindsight gives perspective to the magnitude and the wisdom of that decision and the courage required to make it.

As a Nation we were ill prepared for this sudden shift to a wartime footing. We had dismantled the greatest military striking force in history within 12 months after the Japanese surrender. We had "brought the boys back home." Our defense industries had reverted to the all out production of consumer commodities and other nonmilitary products. We had gone back to doing business as usual, in both our domestic and international affairs. We had but recently won a world wide victory for freedoms cause, a war to end all wars. This victory promised our people a long and happy era of peace in which justice was assured for all nations and all people. All these promises were written into the Charter of the United Nations. These were the war aims of the United States. These were the war aims of all the allied nations except one—Soviet Russia. The strange alliance which admitted imperial Russia into the camp of free men was exposed as a massive deception of the hopes, the rights, and the aspirations of the common man the world over. In the stark reality of this awakening we, as a Nation, entered what the Honorable Winston Churchill so aptly termed "the cold war."

Many chapters of sacrifice and heroic action have been written since, by men and women and indeed by children who know the blessings of freedom. All Americans sense the importance and accomplishments of the Marshall plan, the stand on Greece and Turkey, the Berlin airlift, and the refugee assistance programs just as they honor the resolute Presidential actions taken in Korea, the Formosa Straits and in the Middle East crisis. The hard lessons of the past have brought home to us the imperative of the military shields against further Communist armed aggression which NATO, CENTO, and SEATO provide for ourselves and for all free people. Yes, we have learned a great deal in the days and years of the cold war. But I say we have not learned enough about the nature of the enemy who openly boasts that they will bury us, that they will communize the world and thus cast upon our children—if not ourselves—a mode of life which makes death a welcome visitor.

In our national efforts to build a defensive shield against Communist aggression, a matter of first priority, we gave more attention to armaments and alliances than we did to the basic human values and aspirations involved in the struggle. When we awakened to this shortcoming, we then limited our concern for the rights and the hopes of the common man to the free world community, thus neglecting in large measure the almost one-third of humanity behind the Russian Iron and Bamboo Curtains. By overly friendly relations and dealings with the Russian leaders and the various Communist regimes they have imposed upon once free people, we have cast serious doubts upon our willingness, our ability and our determination to weather the ideological storm which grips the world. The common man behind the Iron and Bamboo Curtains has been shaken in his confidence in the United States as the citadel of human freedom. All too many leaders in the free world community have become convinced that the destiny of their nation requires a flexible position somewhere between the United States and Imperial Russia, a position which will permit them to shift gears gracefully when the winner becomes reasonably apparent. The newly emerging nations on the African Continent, the newly independent nations of North, South, and Southeast Asia, and the Middle East demonstrate a restless uncertainty in setting their course toward maturity and secure sovereignty. It is this uncertainty in the camp of free men which emboldens the Russian Dictator Khrushchev to taunt, to insult, to threaten, and to pour infamy upon the United States of America.

The time has come for a deep and realistic revision of our foreign policy. The hour is late, but I believe we still have time not, a moment of which can be wasted on such meaningless catch phrases as "agonizing reappraisal," "realinement of relationships," and "flexible adjustments." What we need is a simple recognition of the fact that those who seek to wipe out civilization as we know it, are anchored with a vulnerability which they cannot overcome and which haunts the inner sanctum of the Kremlin. The Russian vulnerability is a deeply human one. It is caused by the aspirations of hundreds of millions of non-Russian people in the captive nations for freedom and national independence. No less than 20 once free and independent nations have been overrun and occupied by the Russian Communists during the past 40-odd years. The regimes imposed upon these nations do not and cannot represent the freely expressed will of the people. Representative government has been denied these people and the mode of life imposed upon them generates a revolutionary spirit which can burst forth with devastating violence and retribution against the oppressor. This vulnerability is compounded by the fact that the number of people who support the Communist empire falls far short of a margin of safety. There are no more than 70 to 80 million Russians in the empire, together with some 5 million non-Russians who are reliable members of the Communist Party. This is the mortar of the empire, just as it is a most realistic evaluation of the human resources at the command of the dictatorship which threatens to bury us. While we may and should regret the tragedy of history which has denied the Russian people a chapter of individual liberty and freedom, we must not allow our pity to cloud the honest judgment of history. Having had no experience with liberty and freedom, we must not expect the Russian people to rally to freedom's cause. Nor should we condemn them for their support of a regime which has brought greater glory to the concepts of a Russian empire than the wildest dreams of Czar Peter. Forgive them for they know no better. Political realism in this hour of terrible trial requires that we know the truth and face it with a feeling of compassion, accepting the duty of saving the Russian people from the evil leaders who see in them a tool to accomplish their selfish ends.

It was in this spirit that the Congress of the United States enacted Public Law 86–90, and made possible this national observance of Captive Nations Week. As sponsor of this law in the House of Representatives, I assure you that a long, deliberate, and careful study of all the evidence available, covering a span of 40 years, stands behind the language and spirit of this Federal law. The unanimous enactment of this law by Congress is eloquent testimony of its nonpartisan character and urgency. More than anything else, it carries a message of decision and the promise to enter a new phase of the cold war by carrying the political war into the heartland of the enemy.

Permit me to examine with you the language and intent of this law.

To begin with, this law takes official recognition of the fact that Communist aggression against free and independent nations began in the period of 1917–18 rather than in 1945, as all too many of our people have been led to believe. For it was during this period that a series of national independence movements, very much like that of our Founding Fathers, brought about the disintegration of the Russian czarist empire. Many nations long oppressed and exploited by the Russian aristocracy dissolved their political bonds with the empire and declared their national independence. The only nation of the empire failing to take such action was the Russian nation. In these circumstances the Bolsheviks seized control of the Russian nation and quickly consolidated their power. With the Russian nation as a base of operations and support, the Bolsheviks launched campaigns of subversion, terror and armed aggression against the newly independent nations. Between the years 1918 and 1921, the Russian Bolsheviks destroyed the national independence of White Ruthenia, Ukraine, Georgia, Armenia, Turkestan, Cossackia, and Idel-Ural.

The second wave of Russian Communist aggression took place in 1939. Soviet Russia then an ally of Hitler, destroyed the national independence of Estonia, Latvia, and Lithuania.

The third wave of Russian Communist aggression took place in the 1945 and thereafter, when in violation of the Atlantic Charter and the Charter of the United Nations, the national independence of Poland, Czecho-Slovakia, Hungary, Rumania, Bulgaria, Albania, and Yugoslavia was destroyed.

The fourth wave of Russian Communist aggression took place in 1948 when the Red regime was imposed by military force upon the people of mainland China.

The fifth wave of Communist aggression instigated by Moscow covers the enslavement

of East Germany, North Korea, North Vietnam, and Tibet.

Public Law 86–90 thus recognizes that all the once free and independent, non-Russian nations of this vastly expanded Russian empire have suffered a common fate. Time, in terms of the date of their captivity, no longer has any practical point. They all suffer a common captivity. None will be free until all are free. And all must be free if freedom is to be secure anywhere in this relatively small world in which we live. This is a reality of the life or death struggle in which we are engaged.

The spirit of this law recognizes that while these nations are now deprived of their independence, the hopes of their peoples have not been broken. The common man in these captive nations aspires for a return of his liberties, his freedoms, and the blessings of national independence. These aspirations stand as a powerful deterrent to war and the best hope for a just and lasting peace. The scheming despots in the Kremlin will not dare to launch world war III so long as these embers of freedom burn. We dare not fail to kindle this human fire because such failure is an invitation to the Russian tyrants to launch a hot war.

These are the outlines of a new and realistic foreign policy toward the Russian Communists. These are the outlines of a foreign policy of free people, who, knowing the power of their moral and political ideals, are confident of the future and fearless in defense of justice. Public Law 86–90 is a mandate from the American people to engage the enemy on his home grounds, to carry the political fight to the heartland of the Russian Communist empire and to exploit the human vulnerability of that empire as a positive action in support of world peace.

For all too long we have been on the defensive. Our Nation has grown weary of simply reacting to Communist actions. We have too often been second best in international political situations which demanded nothing short of unquestioned victory.

The summit conferences were initiated by the Russians. They needed a world propaganda platform and rigged the agenda to advance their evil purposes. We reacted to their initiatives, accepted the substance of their agenda rigging and ended up on the short and rather dirty end of the stick.

Personal diplomacy was initiated by Khrushchev as a means of securing a cloak of badly needed respectability. He arranged official visits to free countries and world tours for himself in order to demonstrate his contempt for the leaders of the free world. The State Department harangued and maneuvered President Eisenhower into this Russian bear-trap which, when sprung, found the subversive agents of Khrushchev showing contempt for President Eisenhower in Japan.

Khrushchev proclaims that the Monroe Doctrine no longer exists because the new Russian ruling class refuses to recognize its claims. By this he means that the entire world is his bowl of cherries and he will pick the cherry he feels is ripe regardless of in whose orchard it grows. What a contrast this is to the action taken by our State Department "Soviet Experts" at the time of the Hungarian Freedom Revolution. You will recall the revolution broke out on October 23, 1956, and that by October 28, the Hungarian patriots had rid their country of the Russian oppressors. A revolutionary regime took over and there was a political hiatus for 5 days. Then the State Department, allegedly concerned about the delicate feelings of the Communist dictator Tito, sent him the following cabled assurance of our national intentions in the late afternoon of Friday, November 2, 1956. "The Government of the United States does not look with favor upon governments unfriendly to the Soviet Union on the borders of the Soviet Union."

It was no accident or misjudgment of consequences which led the imperial Russian Army to reinvade Hungary at 4 a.m. on the morning of November 4, 1956. The cabled message to Tito was the go ahead signal to the Russians because any American school boy knows that Tito is Moscow's Trojan Horse. It took less than 48 hours for him to relay this message of treason to his superiors in the Kremlin. All the world knows the terrible consequences of that go ahead signal. This act of infamy was buried in the noise of the 1956 presidential campaign and the moral revulsion which followed in the wake of our failure to respond to freedoms call in captive Hungary. As we approach the promised new era in the conduct of our international affairs. I suggest the time is opportune for a full scale, bipartisan congressional investigation of this infamy. This would provide an appropriate answer to Khrushchev's rejection of the Monroe Doctrine.

No doubt you are asking yourself what, specifically, can be done to support and advance the cause of the captive nations without plunging the world into a hot war. This is a fair question that requires a straightforward answer.

I will take the last part of this question first because it rates the highest priority. Of one thing I am certain. That is the Russian Communists will launch a hot war when they believe they have a 50–50 chance of winning. They will not start 1 minute sooner or hesitate 1 second longer. There is nothing we can do to alter this basis of judgment while the Russian leaders adhere to what they call the doctrines of Lenin. While the Russians now appear to claim that war between communism and capitalism is not inevitable they have not abandoned war as an instrument of imperial policy. They are simply saying they now believe they can conquer the world without a hot war. Their belief is based upon a supposition that the free world, particularly the United States, is crumbling from within thus making a hot war unnecessary. Since I believe we are not breaking up from within, though we have slipped from a position of unquestioned military superiority, and I do not believe we can convert the Russian leaders from their belief in Marxism-Leninism, I propose the following courses of action as necessary to our survival.

The first is a high-speed rebuilding of our military defense capabilities. We must regain and hold a large margin of superiority over the Russians in all fields of defense preparations. This includes the immediate strengthening of our international treaty alliances. The 50–50 chance factor must never be attained by the Russian leaders.

The second is a hard hitting political action program in support of the people of the captive, non-Russian nations. I suggest the following specific actions be undertaken.

1. That the Voice of America be regarded as a political instrument, a mass media means of strengthening our alliance with all the captive peoples. Today it is nothing more than a nonpolitical news service, lacking color, imagination, and sympathy for the oppressed. The present overweighted broadcasting in the Russian language should be corrected, with major emphasis on the languages of the captive nations.

2. Our exchange of persons and cultural exchange programs must be revised and a note of realism interjected in their application to the captive nations. In particular, the exchange of persons program with the Soviet Union should be abolished because it is a fraud. They allow no one but hardcore Communists to visit the United States, most of whom are propaganda specialists rather than students, teachers, engineers, labor leaders or farmers. The public report of these so-called specialists issued upon their return to the Soviet Union are uniformly incorrect, incomplete, and generally slanderous of our free way of life. The people we send to the Soviet Union are no doubt well intended, but they tend to pose as experts on conditions of life under communism upon their return to the United States. Many of these 8-day or 6-week authorities have perpetrated dangerous misjudgments and illusions upon the American people. We need a rapid step-up in our exchange-of-persons program with the countries of the free world. I have observed these programs at work in the United States and in many countries of the free world and I am convinced of their merit. More funds are needed to expand these free-world programs and the money saved by abolishing the exchange programs with the Soviet Union could be used for this purpose.

3. The United Nations should be regarded as a sounding board to expose and espouse the legitimate aspirations of all the captive nations. The Security Council, the General Assembly, and all organs of this body should be regarded as tools to advance the cause of free men, including the emancipation of the captive nations.

4. The United States should test the power of sanctions held by the United Nations, the expulsion of nonconforming member nations, by causing the Russians to abide by the United Nations resolution on Hungary or be expelled from membership in the United Nations. The United Nations resolution on Hungary condemns the Russian aggression against Hungary and calls upon the Russians to evacuate their military, political, and economic forces from that country. To date the Russians have demonstrated a studied contempt for that resolution. It is time they were made to conform or be expelled from membership. The survival of the United Nations must never be regarded as more important than human rights and justice.

5. The next President of the United States should reverse the international road posts pointing away from Washington by convening a meeting of the leaders of all free nations there to discuss our common problems and to hammer out a program of action to save the world from a third war and to win a just peace. The formula of invitation should be simple. Only those who believe in and will support the aspirations of the common man for self-government and democratic institutions should be welcomed at the conference table. This would be freedom's summit conference. The next President of the United States would go a great distance toward recapturing the political initiative by swift action in this direction upon assuming responsibilities of leadership.

6. We must prepare the American people psychologically for the prospect of more freedom revolutions, like that launched by the Hungarians. This does not suggest that we can or should stimulate them. It merely recognizes that such total political revolutions are a natural outcome of the oppression and human exploitation going on behind the Iron and Bamboo Curtains. We may not know when or where the next will occur, but we must know that the destiny of free men demands that we be prepared to associate our Nation and other free countries with this healthy wave of the future. We must not be caught unprepared or stupefied by the power of revolt against tyranny, as we were in the case of Hungary. We are a nation born in the revolutionary spirit—we will live or die by the measure of our devotion to our political heritage.

As we face the challenge to our survival as free men, I leave you with this thought. In our daily lives we have learned that time and tide wait for no man. This same law of nature born with the divine order of the world, exercises a compelling influence upon the affairs of all nations. There are problems

which will not wait for determination, and there are situations which demand immediate and resolute decisions. We may not, we must not fail to keep our appointment with destiny. We are destined to lead the peoples of the earth out of the darkness which has fallen upon so many nations—to that golden era of peace with justice for all nations and all peoples.

THE CRUSADE FOR PEACE WITH JUSTICE

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FEIGHAN. Mr. Speaker, in the official observance of Captive Nations Week throughout our country, from July 17 through 23, many fine programs were arranged by public-spirited citizens. These programs served to alert the American people to the importance of the aspirations of the people in the captive nations for freedom and national independence toward the winning of a just peace. All these activities were in accordance with the spirit of Public Law 86–90, more popularly known as the Captive Nations Week observance law.

It was my privilege to take part in the weeklong program of activities planned by the Buffalo Citizens Committee to Observe Captive Nations Week. While in Buffalo I had the opportunity to see firsthand the outstanding work accomplished by the Buffalo committee. All the religious faiths conducted prayers and religious ceremonies in the respective churches and synagogues on the opening day of the week's program. A civic ceremony was held on Sunday, July 17, the highlights of which were the reading of Mayor Sedita's proclamation, the placing of the flags of 14 of the captive nations in a colorful array around two large American flags at McKinley Monument, and talks by several leading citizens of Buffalo. On the following Tuesday the Erie County Bar Association conducted a ceremony on the meaning of justice to free men in a special term of supreme court. On Wednesday the Kiwanis Club of Buffalo sponsored a civic luncheon in the ballroom of the Statler Hilton Hotel, where I was privileged to be the speaker. During the week public displays on the captive nations, the cultures of the peoples of those nations, and the true face of Russian communism were shown in several banks, department stores, the lobby of the city hall, and at the Ukrainian Home.

This fine program was climaxed by a freedom rally in Kleinhans Music Hall on Saturday evening, July 23. Mayor Frank A. Sedita was the speaker at this rally which also featured the native songs and dances of the captive nations.

Mayor Sedita has established himself as a real leader in the just cause of the people of the captive nations. He was the first mayor to establish an official city committee to observe Captive Nations Week. He urged similar action upon the mayors of some 18 metropolitan centers of the United States. The committee he appointed was chaired by Dr. Edward M. O'Connor, director of special projects at Canisius College, who is known well for his many years of leadership in government programs to assist the victims of Nazi and Communist tyranny, and to emancipate the captive nations from the yoke of imperial Russian communism.

The address delivered by Mayor Sedita at the freedom rally was a forceful call to the American people to launch a crusade for peace with justice. It set forth the basic causes of war and marked out the guideposts to peace. This address stands as a challenge to the American people to demand that our National Government be rid of those appeasers who seek a status quo with the Russians and that our foreign policy, together with its execution, be returned to a moral foundation which befits our national heritage.

Under unanimous consent I include the address of Mayor Frank A. Sedita in my remarks:

THE CRUSADE FOR PEACE WITH JUSTICE

(Address of Hon. Frank A. Sedita, mayor of Buffalo, delivered during Captive Nations Week observance at the freedom rally, Kleinhans Music Hall, Buffalo, N.Y., July 23, 1960)

What a fitting close this is to our weeklong observance of Captive Nations Week. How better could we end our program than with a freedom rally? The pleas to be made by individual spokesmen for many of the captive nations will give true voice to the feelings, the hopes, and the aspirations of our proven allies behind the Iron Curtain. The dances and songs of the captive people we will see and hear this evening will speak eloquently for cultures and a way of life which no tyrant, no dictator can remove from the hearts and minds of those oppressed by imperial Russian communism. And we, who enjoy the full blessings of human freedom, shall be reminded of our high moral obligation to those who look to us for emancipation from their present state of human bondage. I believe that we, as a nation, shall respond to this call, convinced of the obligations we carry as free men and confident of the victory which awaits our common cause.

The members of the Buffalo Citizens Committee to Observe Captive Nations Week which I had the honor to appoint have brought great credit to our city and have won well-deserved acclaim for themselves. I am proud of what Buffalo has done to observe Captive Nations Week and to serve as honorary chairman of this great committee. I say that what we have done to carry out the spirit and purpose of Public Law 86–90 is a solid and practical work of peace.

We cannot be satisfied with works which seek only the prevention of war. We must work with all the energy and ingenuity at our command to win a just peace. For only in the winning of a just peace can we prevent the outbreak of a hot war. Twice in the generation of many of those gathered here tonight, including myself, we have seen two world wars result from the limited and negative objective of simply preventing the outbreak of armed conflict.

Prior to World War I the prevention of war was governed by what I prefer to call the "peace of empires." This was the handiwork of the Conferences of The Hague. While the imperial powers attending those Conferences failed to reach full treaty agreements as to how this peace would be maintained, they did, nevertheless, arrive at an understanding of status quo.

This understanding of status quo held that the territories of the then existing empires, without regard to the freely expressed will of the people concerned, were inviolate—they were not subject to change. This understanding among the imperial powers lasted but a few years. Kaiser Wilhelm found this loose understanding uncomfortable and the world was thereby plunged into its first global war. It is interesting to note, in this connection, that the then Czar of Russia first proposed the concept of a "peace of empires" at the Hague Conference.

World War I brought about the demise of the German, Austro-Hungarian, czarist Russian and Ottoman Empires. The British, French, and Dutch Empires suffered mortal blows from which they have never recovered, nor can they expect to recover at this midpoint of the 20th century.

The Russian czarist empire, meanwhile, was reconstructed under the reactionary banner of communism. This was done at the expense of the national independence of Ukraine, White Ruthenia, Georgia, Armenia, Azerbaijan, Turkestan, Idel-Ural, and Cossackia.

In 1934 a new dictator arose who promised the people of Germany a new and vast empire which he claimed was destined to last a thousand years. When he set about creating this promised empire the cry was heard, "We must prevent war." The voices of morality in the affairs of nations cried out then for a just peace, a just settlement of disputes which accorded with the freely expressed will of the peoples involved. But these voices went unheeded. The Munich Conference followed—a black mark in history when the demands of the tyrant on the march were met by appeasement. Prime Minister Chamberlain returned to London, an umbrella in one hand and a useless piece of paper in the other hand—calling out to the British people "Peace in our times." The Munich appeasement of the Dictator Hitler prevented war—but for how long? A few short years thereafter all humanity was plunged into the most devastating war in all history.

Now what are the political results of World War II. The empire of Hitler is nothing more than a black mark in history. The British, French and Dutch Empires are dismembered for all times. But the empire of Russian communism is vastly expanded, stretching like an octopus over the newly occupied territories of Estonia, Latvia, Lithuania, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, Albania, mainland China, Tibet, East Germany, North Korea, North Vietnam, Croatia, Slovenia, and Serbia. The tentacles of the Russian octopus now reach out to seize and strangle every free nation in the world, including the United States. Here in the Western Hemisphere one of those tentacles hangs heavy over Cuba.

Faced with the full realities of this dismal record of mankind's failure to prevent war, who can deny that the relentless quest of a just peace must be our only goal? Who can say that the present Russian demand for the recognition of a status quo is nothing but the demand of Tzar Nicholas II for a "Peace of Empires," dressed up in 20th century stalking clothes? Who believes that a just peace can be won by appeasing dictators on the march—in this case Khrushchev?

We must put an end to the last remaining empire in the world. This we can do by working with all the power and skill at our command to bring about its peaceful dismemberment. This we must do or suffer the same fate as has befallen the score of once free and independent nations now jailed in the Russian prison of nations. The leaders in the Kremlin have made it clear they leave us no other alternative.

It is these beliefs which find me shocked at the revelation made by Congressman FEIGHAN on Hungary. I do not doubt for one moment the accuracy of the astounding charge he has placed on the doorstep of the State Department. He is a recognized authority on world communism and a keen student of the internal workings of the Federal Government. All who know him respect his courage and admire his fearless honesty.

But I ask you, what has happened to us as a people, as a great Nation, under God, to permit such an immoral action by our State Department to go unnoticed and unpunished? My heart aches when I think about those gallant people of Hungary, with little more than their bare hands, rising up against the Russia oppressor and in 5 heroic days driving the Red army from their beloved homeland. No one who loves liberty will ever forget those who paid the supreme sacrifice in winning that historic victory over the Russians. Think of the women, from aged grandmothers to school girls not yet in their teens, who fought side by side with the manhood of Hungary. I hang my head in shame to think that our Government would be a party to putting the Hungarian nation back in Russian chains. Only yesterday our friend, Dr. John Juhasz, reminded me that at this very hour there are hundreds of Hungarian youth who took part in that freedom revolution now languishing in the Communist jails of Hungary. There they await death by execution upon reaching their 21st birthday. Almost 4 years have passed since their incarceration so the whole world knows the tender age of all when they rose in support of freedom's cause.

No doubt you have thought of the full meaning of that message sent by the State Department to the Red dictator Tito for relay to Moscow. That cruel message said, and I quote Congressman Feighan, "The Government of the United States does not look with favor upon governments unfriendly to the Soviet Union on the borders of the Soviet Union." Permit me to analyze the full political meaning of that message.

First, it accords a finality to the geography of the U.S.S.R. It admits of no change in the status on the captive, non-Russian nations of the Soviet Union. Such great nations as Ukraine, Armenia, White-Ruthenia, Georgia, Turkestan, and Cossackia are condemned to permanent slavery.

Second, it accords de facto recognition to the Communist regime imposed by Moscow on Lithuania, Latvia, and Estonia. Our Government has said over and over again that we will never recognize the forced incorporation of the Baltic States into the Soviet Union. Yet the Government of the United States has done exactly that by this declaration of foreign policy cabled to Tito. Could anyone imagine a legally constituted government in any of the Baltic States, a government which represents the freely expressed will of the people, being friendly toward the Soviet Union? Of course not. Only a rump Communist regime such as exists today in all three of the Baltic States could hold out such friendship. Let us not forget that Estonia, Latvia, and Lithuania are on the borders of the Soviet Union. The State Department's declaration to Tito condemns the Baltic States to a permanent life under an alien Communist regime, despite promises to the contrary.

Next, what about Poland, Czecho-Slovakia, Rumania, Bulgaria, and mainland China? All these captive nations are on the borders of the Soviet Union. I do not mention Hungary here because the State Department's cable to Tito had clear and specific application to that captive country. All these nations were thus sentenced to a miserable life under Communist regimes which defy the will of the people involved and would not remain in power 1 hour without the Red Army standing guard over their reign of terror. No freely elected government in captive Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, or mainland China would have feelings less than utter contempt for those who rule over the Russian prison of nations nor would they stand idly by once enslavement of any nation by the Russians.

Now what about East Germany, North Korea, North Vietnam, Albania, Yugoslavia, and Tibet? They do not have common borders with the Soviet Union but they are part of the Russian Communist empire. Are they alone entitled to be free and independent? I think not, not by the language of the State Department policy cabled to Tito. Rather, I would read that cable to Tito to mean that our State Department had accepted a status quo with the Russian Empire, with Titoland remaining under the protection of Moscow.

Congressman FEIGHAN in his address before the civic luncheon last Wednesday, called for a full-scale bipartisan congressional investigation of our Government's response to the Hungarian freedom revolution, including the cable sent to the Red dictator Tito. I am convinced this must be done to clear away the dark clouds of doubt which hang heavy over our national honor. I hope you will agree with me and that you will raise your voices with the responsible leaders of Congress, urging them to take immediate action.

What we have done together this week to defend the human rights of the people of the captive nations is only a beginning. It is a significant beginning but our crusade does not end with this freedom rally tonight. Our fight for peace with justice for all nations and people must be maintained every hour of each day until we win through to victory. We are joined in our work by millions of Americans who have taken part in similar programs throughout our country during this week. We must spread this spirit of duty and dedication to freedom's cause, to every country of the free world. To this end I pledge to you my unwavering support.

I pray God's blessings upon our work, that we may have the strength, the wisdom, and the courage to continue the fight for true freedom and full justice for all men, for all nations, for all time.

PUBLIC LAW 86–90—FACT AND FICTION

Mr. FEIGHAN. Mr. Speaker, one of the most important and timely actions of the 86th Congress was enactment of Public Law 86–90, more popularly known as the Captive Nations Week Resolution. This past July hundreds of committees made up of public spirited citizens observed Captive Nations Week in accordance with the provisions of this law. The response of the American people to the high purposes of this law have been most gratifying, and harbor well for the future of freedom's cause.

It was to be expected that the leaders of the Kremlin and their agents everywhere in the world would level a blistering attack against the high purposes of this law. Khrushchev and company have not disappointed us in this respect. It will be recalled that Khrushchev opened the attack the day after the President signed the bill into law, which was the same day Vice President NIXON arrived in Moscow. These attacks by the Communist leaders have not ceased and we can expect them to continue.

It was my privilege to cosponsor Public Law 86–90 with our distinguished majority leader, the Honorable JOHN W. MCCORMACK. I have therefore followed the actions in support of this law throughout the United States as well as the Russian Communists' attacks against it.

A timely and highly informative article on Captive Nations Week appeared in the summer edition of the Ukrainian Quarterly, titled, "Public Law 86–90—Fact and Fiction." The author of this article is Dr. Edward M. O'Connor, director of special projects at Canisius College in Buffalo, N.Y., and a realistic student of the Russian problem. This article analyzes the reaction to Public Law 86–90 by Russians on both sides of the Iron Curtain. Attacks by Russians on the other side of the Iron Curtain were expected, but attacks by Russians living on this side of the Iron Curtain is another matter. Dr. O'Connor points out that the lines of Russian attack on both sides of the Iron Curtain have dangerous parallels which have raised a number of basic questions among well-informed observers of the Communist conspiracy. To correct these dangerous trends, he proposes the formation of an American Committee for the National Independence of Russia to provide a haven for political action by those Russian emigrees who are convinced of the inalienable right of all nations and people to liberty, freedom, and national independence.

Among the features of this article is an analysis of Vice President NIXON's reactions to the challenge made by Khrushchev on Public Law 86–90. As a highly skilled observer of international political events, his examination rises above the much publicized "kitchen debate" to analyze the broad implications of Khrushchev's challenge and the Vice President's response. This feature alone would qualify this article as a must reading for those millions of Americans who have been asking, Why is our policy toward the Russian Communists such a failure?

The article to which I have referred, written by Dr. O'Connor, is as follows:

PUBLIC LAW 86–90—FACT AND FICTION

(By Edward M. O'Connor)

Russians on both sides of the Iron Curtain are engaged in a concerted effort to discredit the Captive Nations Week resolution (Public Law 86–90), enacted last year by Congress. This assault against a Federal law, which does nothing more than officially recognize the importance of the national independence movements within the present-day Russian Empire as a deterrent to war and the key to peace with justice, was launched by none other than Nikita Khrushchev himself. Within a matter of hours after President Eisenhower signed the resolution into law, Khrushchev was confronting Vice President NIXON with the question: "How could you do this to us?" The Vice President had just arrived in Moscow, ostensibly to open the American Exhibition, to

find the Kremlin leaders in a state of shock as a result of the political bombshell launched by Congress. Time and time again, in the days which immediately followed, Khrushchev would call upon groups of Russians to bear testimony for the Vice President as to whether they considered themselves as captive. The response was always the same: "No. No. Peaceful coexistence."

This proved nothing new because Public Law 86–90 does not define the Russian nation as a captive nation. The spontaneous response Khrushchev got from the Russians did, however, confirm the common sense of not defining them by law as "captives."

The results would have been radically different if the Vice President had visited any of the captive, non-Russian nations of the Soviet Union and there had Khrushchev raise the same question among the native population. It was poor political judgment in the first place for the Vice President to restrict his visiting time in the Soviet Union to the Russian nation. In reality he did not tour the Soviet Union as claimed because Russia is not the Soviet Union, it is but one of the nations of the Soviet Union. This neglect of the majority peoples of the Soviet Union reduced the political impact of Public Law 86–90 and compounded the serious error of equating Russia with the Soviet Union. On the other hand it would have been an act of political wisdom and statesmanship if the Vice President had under these circumstances demanded a revision of his itinerary to allow for visits to several captive, non-Russian nations. The Khrushchev reaction to the Captive Nations Week resolution should have made this course of action self-evident. Here was a golden opportunity for the Vice President to publicly reject the Russian demands for status quo by officially assuring our proven allies in the captive non-Russian nations that the United States would never recognize the finality of their captivity. Lost opportunities such as this, where a logical followthrough was called for, are characteristic of the failure to understand the nature of the threat we face and a timid reluctance to use power of our political ideals in winning a just peace.

Nevertheless, the noisy and frantic efforts by Khrushchev to discredit Public Law 86–90 were helpful in making all the people of the Russian empire aware of its contents and purposes. The controlled press and other mass media of the empire featured the Khrushchev statements but in so doing gave excellent publicity to the fact that, at long last, we Americans had officially recognized the national independence movements as the most powerful political dynamic behind the Iron Curtain. In a very real sense the deep-rooted fears of the ruling class in Moscow were so aroused that they inadvertently violated their first rule of propaganda, which is, never to publicize the explosive political ideals of free men. Communist organs in the free world took the line from Moscow and gave additional propagation to the "Captive Nations" concepts of the public law. It is no exaggeration to estimate that Russian Imperial Communism suffered a severe net loss as a consequence of these initial reactions, based upon deep-rooted fears that the United States was about to stimulate the explosive dynamics of the national independence movements within the empire. The new aristocracy, the new elite class can never forget it was the national independence movements which contributed to the collapse of the Russian Empire of the Czars in 1917, that the national independence movements would have disintegrated the U.S.S.R. during World War II but for the racial policies and imperial intentions of the Nazis. Freedom riots in East Germany in 1953, in Poland during 1956, and the all-out efforts by the Hungarians to regain their national independence in 1956 serve to remind the Russians that they are sitting on a human powder keg many times more powerful than intercontinental missiles and hydrogen bombs.

The initial reaction of the Russian leaders to Public Law 86–90 was too useful to the cause of free men to expect them to continue it for very long. Their tactics have now shifted to a reliance on polemics as a means of propagating "Russian truths" with respect to the captive, non-Russian nations. Khrushchev laid down the new line in his propaganda article which appeared in the October 1959 issue of Foreign Affairs under the title of "On Peaceful Coexistence." Here Khrushchev introduces the techniques of confusion, false comparison and distortion of the language of the law. For example, he charges the law contemplates "rolling back communism" which language is not included in the law, nor does the language of the law express this intent. In fact, the law expresses the opposite conviction. Rather than the concept of "roll back" which carries overtones of a hot war the law recognizes the practical prospects of spontaneous, internal political explosions on a scale which can end the cold war and bring peace with justice to all humanity. Political realism dictates that we recognize the possibilities of a chain reaction should another full blown revolution break out anywhere within the empire. This almost happened during the Hungarian revolution as the Poles, Ukrainians and Slovaks demonstrated a restiveness which alarmed the Russians. Had the U.S. Government and other free world nations given any support, even political, to the Hungarians it is entirely possible the chain reaction of revolutions would have resulted. Once this chain reaction gets underway there will be no stopping it. The Red army will be of little use in these circumstances, it is multinational and as such will prove unreliable. The Hungarian revolution proved this basic Red army vulnerability as the non-Russians in it, particularly the Ukrainians, quickly went over to the side of the Hungarians, taking tanks, guns and ammunition with them.

There are not enough Russians in the Empire to hold it together in the face of internal revolutions reaching from the Baltic to the Caspian Seas. Dependable estimates on the number of Russians in the Empire range from 70 to 90 million but the more realistic figure is in the neighborhood of 70 million. World War II losses among the Russians were exceedingly heavy due to the fact the non-Russians refused to fight in support of communism. The latest population figure on the Soviet Union is 207 million, which means the non-Russians number not less than 117 and more likely 137 million. Added to this are some 90 million non-Russians in the more recently occupied nations of Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, and East Germany. One can readily understand how unpleasant it must be for the Russian aristocracy to contemplate the prospects of over 200 million non-Russians rising up in revolt, demanding their national independence. It is this haunting specter which causes Khrushchev and company to demand that the free world recognize a status quo, that is, to cause the people of the free world to join with the Russians in an all-out effort to preserve their prison of non-Russian nations.

Khrushchev resorted to the old trick of false comparison in his article which appeared in Foreign Affairs when he asked how Congress would react if the Mexican Parliament called for the "liberation" of Texas, Arizona, and California. Obviously he sought to compare favorably the status of the non-Russian nations of the U.S.S.R., with these States. There are absolutely no grounds for valid comparison. To begin with the people of Texas, Arizona, and California consider themselves as free, self-governing and loyal Americans. The people of Ukraine, Latvia and Armenia, for example, do not consider themselves as free or self-governing and to call them Russians, loyal or disloyal, would be a grave insult to their national heritage. If there is a national independence movement underway in Texas, California, or Arizona this is the best kept secret of the century. On the other hand it is a matter of common knowledge that the national independence movement is gaining momentum in every non-Russian nation behind the Iron Curtain. No one can deny that the people of Texas, Arizona, and California have full, popular representation in the Federal Government, unless they have never heard that a rugged Texan named Senator LYNDON B. JOHNSON is the majority leader of the Senate, and another son of Texas, SAM RAYBURN, is Speaker of the House, that a revered Senator named CARL HAYDEN from Arizona, has long been a powerful voice in our national affairs, or for that matter that Vice President NIXON is a native of California. No rational individual may claim that the people of Lithuania, Byelorussia, Estonia, Cossackia, and Idel-Ural, for example, have a representative voice in the affairs of the Russian Presidium or the Communist Party. These are but a few of the many pertinent comparisons which could be made if space permitted.

Khrushchev also claims that the Soviet People consider the passage of the Captive Nations Week Resolution by Congress as an act of provocation. Now, just who are the "Soviet People?" If such people do exist it is pertinent to ask, how and when did Khrushchev test public opinion on this vital issue? The fact is, however, that the false concept of "Soviet People" was created by the new ruling class as a means of disguising the realities of life within their empire. Khrushchev and company would like the people of the free world to believe that communism had purged the 207 million peoples of the Soviet Union of their ethnic diversity, of their respective native languages, of their individuality, of their centuries-long customs, traditions and aspirations. Such a distortion of reality would create the mirage of a homogeneous people, a united people working harmoniously and enthusiastically for the goals of communism. What communism has in reality failed to accomplish during forty some years of organized terror and oppression Khrushchev now seeks to hide under a propaganda rug labeled "Soviet People." The people of the captive, non-Russian nations of the Soviet Union would consider it an act of grave hostility if we referred to them as "Soviet People." So too would the Russian people because their national characteristics and aspirations have not changed during the course of the past two centuries and they are proud to be called Russians. At the time of Stalin's death in 1953 the triumvirate of Malenkov, Beria and Molotov took great pains in the funeral orations to distinguish the Russian people as the "superior people" of the Soviet Union, the people upon whom the government and Communist Party could always count for loyal support. The so-called Council of Nationalities which is part of the Government apparatus but which exercises no power is additional proof that the Kremlin is compelled to recognize the multinational character of the empire. So it is clear that Khrushchev seeks to create confusion when he makes reference to the existence of a "Soviet People."

The Captive Nations Week Resolution has also provoked a negative reaction from some Russian activists living in the United States. This was to be expected because there are covert individuals and organizations at work in our country for the preservation of the Russian empire no matter what form of government is in control of it. Some have no quarrel whatever with the present regime,

some would prefer a monarchy to the Communist Party, some would prefer more individual freedom for all the peoples of the Soviet Union but all have one thing in common—a determination to preserve the Russian empire no matter what the consequences may be.

The most articulate Russians living abroad who pose as spokesmen for the Russian emigration consider the national independence movement behind the Iron Curtain as a frightful heresy, as an invention of Hitler and the antithesis of everything Russian. It is a well-known fact that a harsh ideological discipline is exercised over many Russians living abroad which explains this unnatural state of affairs. This discipline is by no means exclusively Communist because doctrinaire groups of non-Communist Russians follow the same line as Khrushchev with respect to the non-Russian nations of the Soviet Union. Where Khrushchev regards the population of the U.S.S.R. as Soviet people, the doctrinaire Russians in the free world consider everyone in the U.S.S.R. as a Russian, more or less. Both points of view are imperialistic, seeking to conceal the true identity of the peoples of the submerged nations who are no more Russian than was Patrick Henry.

It is a startling fact that there is not one organization or committee in the United States or elsewhere in the free world working for the national independence of the Russian nation. On the other hand every captive non-Russian nation of the Soviet Union has at least one national organization or committee in the United States working in support of its national independence. Similar committees are established in Canada, Great Britain, France, Italy, Germany, Turkey, Indonesia, and other free countries. The obvious conclusion is that Russians on both sides of the Iron Curtain are unmoved at a time in history when the powerful human appeal of the national independence movement has changed the political complexion of South and Southeast Asia, the Middle-East and Africa. Subjugated people everywhere are demanding their national independence, viewing this course as the road to individual liberty, progress and human dignity. Great empires have collapsed before the tidal wave impact of this movement. Nor has the dynamics of this movement spent its full power against the resistance to change in the non-self-governing areas of the free world. Hard won victories have strengthened its forward motion to the point where cold logic requires us to recognize it as the wave of the future. It is only a matter of time before the remaining remnants of imperialism in the free world will give way to the popular demands for self-government. One fact of mid-twentieth century life must be clear to all responsible statesmen. That is, the alternative to granting genuine self-government to non-self-governing people is the use of armed force. Those who resort to this alternative have found that the results do more to strengthen the solidarity of the non-self-governing people than anything their leaders could possibly do in this direction. For every martyr in the cause there are hundreds of new political activists created. In these circumstances armed force is a weapon of tyranny and the answer of mankind to tyranny has invariably been revolt.

It would be a grave error to assume that the non-self-governing people behind the Iron Curtain, that is the people of the captive non-Russian nations, have been immunized from these rapidly moving political developments in the free world. No Iron Curtain, no power of the police state is able to seal out or filter great ideals or political movements, particularly those which now grip two-thirds of the population of the earth. These ideals find a fertile ground in all the captive, non-Russian nations behind the Iron and Bamboo Curtains because historical developments in all these nations have been moving steadily in the same direction. This historical process has been slowed down by czars and commissars but it cannot be disrupted or diverted from its course.

Articulate Russians in the free world, particularly in the United States, seem unwilling or unable to grasp the significance of these worldwide trends. They see the Russian Empire, whether it be the Soviet Union or some other forced and unnatural political arrangement of the Eurasian Continent, as divorced from the rest of the world, perhaps another world, and certainly not subject to the deep political reformation taking place in our world. Herein lies a great human tragedy for Russians on both sides of the Iron Curtain. It has been the ages-long role of émigrés from tyranny and oppression to work and sacrifice, in the countries of their adoption, for the emancipation of the people in the homeland, for the removal of both persons and systems which nourish tyranny, human degradation and suffering.

The Polish, Lithuanian, Armenian, and other émigrés living in the free world during the course of World War I played a major role in securing support for the national independence movements in their homelands, resulting in the national emancipation of these nations from the yoke of the old imperialism. Meanwhile Russians in the free world, that is, White Russians, were working and fighting for the restoration of the Czarist Russian Empire, thus preparing the way for the new imperialism of the Russian Bolsheviks. Now some 40 years later we find this same peculiar state of mind exists among the émigré Russians, even those who recently came to our shores, based upon the statements, charges, and writings of the articulate among them. The real victims of this political sterility among the émigré Russians are the Russian people behind the Iron Curtain. It is little wonder then that the Russian nation has failed to produce a national patriot, that imperial-minded tyrants have been able to employ the Russian people as tools in their schemes and that the Russian people have failed to undertake one, single uprising against the Communist regime during the past 40 years. In the absence of political stimulation from their compatriots in the free world, stimulation which is compatible with the hopes and aspirations of free people, it would be both unfair and unrealistic to expect the Russian people to oppose the Red imperial regime. Having had no experience with freedom and self-government as we know it, the Russian people should not be condemned for failure to demonstrate a strong yearning for their national independence. The Russian émigrés who have lived in and enjoyed the benefits of our free, open society, who have seen first-hand the full meaning of national independence, cannot be excused lightly for their failure to advocate national independence for the Russian people. Prudence requires a careful examination of the causes which impel the Russian émigrés to pursue a course of action which spells certain disaster for the Russian nation and grave consequences for the rest of humanity.

Turning to the reaction by Russian émigrés to Public Law 86–90 we find an abundance of evidence reflecting the political sterility of their thinking. The views made public in both the English and Russian languages can be broken down into these main categories:

(1) That Public Law 86–90 is the handiwork of skilled Nazi agents operating in the United States and holding a powerful influence over the Senate and House of Representatives. To support this charge it is claimed that many of the captive nations named in the law were nothing more than creations of Hitler's propaganda machine. Cossackia and Idel-Ural were singled out for special treatment as nonexisting nations.

The facts: All the nations named in the law as captives established their national independence during the period of 1917–18 or before. Concerning those nations which established their national independence during the period 1917–18, which seem to be more at issue than the others, documentary evidence on all may be found in two official sources: (a) the Reports of the Select Committee To Investigate Communist Aggression, 83d Congress, and, (b) Papers Relating to the Foreign Relations of the United States with Russia (1918), three volumes published by the Government in 1931.

Comment: Hitler and nazism were unheard of until the 1930's, making it difficult to understand how his propaganda machine could have been responsible for events of the 1917–18 period. It is understandable why official Russian history seeks to conceal the true identity of these submerged nations but we are not Russians nor are we subject to control by Russians. The official records of the U.S. Government are a far more reliable source on political questions relating to the Russian Empire. Such charges as Nazi agent influence on Congress are also a good example of "Russian truths," so well known to the natives of central-east Europe.

(2) That Congress indulged in racism by enacting Public Law 86–90. To support this charge it is claimed that some of the nations included in the law are primitive, tribal groups who lack national identity and having been under Russian domination so long must now be considered as Russians. The racism angle is developed in the context of inciting primitive, tribal groups to think they are not Russians.

The facts: In no manner, directly or indirectly, is racism referred to in the law. On the contrary the law is a sharp indictment of racism and those who attempt to impose their racial superiority theories and beliefs upon others. All the law does is identify clearly established nations which are held captive by Russian Communist imperialism.

Comment: It appears that on the basis of "Russian truths," to recognize the true identity and aspirations of any submerged people is to engage in racism. This is typical of the upside-down thinking which is so characteristic of Communist propaganda. It will be a sad day when free Americans hesitate to see oppressed people in their true lights for fear of being charged with racism.

(3) That Public Law 86–90 has for its objective the dismemberment of Russia and as such is an unfriendly act toward all Russians. To support this charge two claims are made. The first is that many non-Russian people do not want to be separated from "Mother Russia." The second is that any suggestion that the present geography of the U.S.S.R. is subject to revision will stiffen the support of the Russian people behind the Communist regime.

The facts: The law expresses no intent to dismember Russia. On the contrary the Russian nation as such is not even mentioned in the law. There is no reliable evidence to support a contention that it is "captive" and it could not in truth be so recognized. The logical assumption involved in this omission is that Congress studiously avoided any action which could be construed as interference in the internal affairs of the Russian nation.

Comment: In examining this charge a distinction between the Russian nation and the Russian Empire is imperative. Whereas the law recognizes the right of the non-Russian people to freely choose a national life to their own liking, it provides likewise for the Russian people. Here the basic question of the national independence movements in the

captive, non-Russian nations comes into proper focus. It is clear that the very nature of these independence movements herald the dismemberment of the Russian Empire. The political concept of national independence is the antithesis of the political concepts of empire and all forms of imperialism. Moreover, this historical process will eventually bring a form of national independence to the Russian nation. As the captive non-Russian nations emerge into national independence and freedom, separating their destinies from the present forced relationships with Moscow, the national frontiers of the Russian nation will be secured and the Russian people can live as they please behind those frontiers.

As to the claim that many non-Russian people do not want to be separated from "Mother Russia," it is pertinent to raise the question: "Why get so inflamed about Public Law 86-90 if this claim is true?" History teaches us that national independence movements are based upon the will of the people involved—if they don't want their political independence they won't fight for it. In this connection it should be noted that a political smokescreen has been organized by Russian activists and their collaborators called the "Federalists." This is a group of alleged non-Russians who want to preserve the Russian Empire through a vague system of federal union. Investigation has revealed that most of the members of this group are Russians, along with a handful of non-Russian opportunists, concerning whom a strong suspicion exists that they receive financial rewards for use of their names. This enterprise serves as a reliable barometer of the strength behind the national independence movements as the emigre Russians would not go to the trouble and expense involved in the "federalist" adventure unless a disruptive counteraction was sorely needed.

As to the second claim, the effect of which is that unless we accept the present geography of the U.S.S.R. as unchangeable the Russian people will stiffen their support of the Communist regime, a number of timely questions must be raised. The first is, should the American people desert their political and moral ideals in exchange for a dubious hope that the Russian people will be too strong in their support of the regime? What about the majority peoples of the Soviet Union, the non-Russians—how will they feel toward us if we turn our backs on their legitimate aspirations for national independence? Will bowing to the imperial sensitivities of the Russian people, which the emigres now claim they have, drive the captive non-Russian people into the hands of the enemy? In truth, can anyone claim that the ordinary Russian people would object to actions taken by the people of the captive, non-Russian nations which would lift from their backs the twin burdens of communism and imperialism?

(4) That Public Law 86-90 is essentially an anti-Russian law, an act intended to inflame the American people against the Russian people. This charge is based upon a claim that the United States has no right to blame the Russian people for the many Communist crimes against humanity, or for Communist aggressive policies of world conquest.

The facts: In no manner does the law blame the Russian people, as such, for either Communist crimes against humanity or Communist schemes directed toward world conquest. The law simply recognizes that the struggle of the peoples of the captive non-Russian nations of the U.S.S.R. central Europe and Asia for their national independence, liberties, and freedoms constitutes a powerful deterrent to war and one of the best hopes for a just peace. Common sense dictates that so long as these captive peoples are pulling in the opposite direction to that pursued by the Russian Communist leadership the dangers of war are reduced and the hopes for a just peace increased. No dictator, Communist or otherwise, can launch a successful war under conditions wherein the vast majority of the peoples under his control will seize upon the internal conditions war creates to destroy the very system which supports the dictator. This is as true today as it was 20 years ago, despite intercontinental missiles and hydrogen warheads, because in the final analysis wars are won or lost by people.

Comment: There is a tendency among the Russian emigration to give credit to the Russian people for everything behind the Iron Curtain which does not offend the conscience of civilized people and to disclaim Russian responsibility for all that is evil or offensive to free people. Frequently an effort is made to put all the blame of communism on the non-Russian peoples of the empire. They remind you Stalin and Beria were Georgians and Mikoyan is an Armenian. They forget that Lenin, Molotov, Malenkov, Suslov, Bulganin, Zhukov, Gromyko, and Khrushchev, just to name a few of the real leaders, are all solid Russian products. Over a century ago a French visitor to the Russian Empire, Marquis de Custine, was warned as he was about to depart for home that he should speak no evil about the Russians regardless of the truth of this statement else great calamities would befall him. We in our times are passing through the same experience, unless we praise the Russians, regardless of how untrue such praise may be, we are charged with being anti-Russian. A great loss to the current body of Western knowledge and thought on the Russian character would have occurred if Custine had been driven from the path of truth by threats of dire consequences. No American could display less courage or dedication to truth under the circumstances which prevail today. If being truthful makes us anti-Russian then let us accept the charge as a compliment to our heritage.

These are the reactions, in summary form, of the most articulate among the Russian emigres to enactment of Public Law 86-90. No claim is or can be made that these reactions reflect the thinking of all the Russian émigrés or for that matter a majority of them. In the absence of any positive public reactions to Public Law 86-90, or public objection to the position taken by the articulate Russian émigrés, the entire Russian emigration stands in the shadow of doubt created by those who represent themselves as the leaders. This is a situation which should bring forth the enlightened and realistic elements in the emigration, those who have grown weary of the constant embarrassments caused by the reactionary but articulate elements. Those among us who wish only the best for the Russian nation and people in the future would welcome the support of responsible individuals and groups in the Russian emigration.

Meanwhile, thought should be given to steps which could be taken to fill the gap in the ranks of the national independence movement by the failure of the Russian emigration to produce such leadership. Solidarity of purpose is the keynote of this movement and this solidarity could be strengthened by the cooperation of our Russian friends in the emigration. Therefore, consideration should be given to the establishment of an "American Committee for the National Independence of Russia." This would undoubtedly require initiative by well informed Americans to get the committee organized and functioning. With time, enlightened and responsible emigre Russians would gravitate to the committee and become active in its work. Eventually this committee would emerge as the true voice of the Russian people, working hand in hand with the national committees supporting the independence movements in the non-Russian nations behind the Iron and Bamboo Curtains. Thus a vital unity of purposes would be welded in a critical area of international political affairs which is now beset by confusion, uncertainty, and imperial mischiefmakers. The attainment of this goal of unity presents a real challenge to all thinking Americans. An American Committee for the National Independence of Russia therefore merits serious consideration.

MINIMUM WAGE BILL

Mr. KEARNS. Mr. Speaker, I would like to offer my praise to the Members on both sides of the aisle in upholding the conferees on the minimum wage bill that we had up. We did not acquiesce with the Senate, and I think the people of America will approve it.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manuel Jesus Carinhas;

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr.;

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951;

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont.;

H.R. 9715. An act for the relief of Otis Drinkard;

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corporation of the Church of Jesus Christ of Latter-day Saints;

H.R. 10841. An act to amend the Tariff Act of 1930 to place bamboo pipe stems on the free list;

H.R. 11322. An act for the relief of Col. Joseph A. Nichols;

H.R. 11380. An act for the relief of Mr. Joe J. Farmer;

H.R. 12458. An act to increase the amount authorized to be appropriated for the work of the President's Committee on Employment of the Physically Handicapped;

H.R. 12699. An act to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidence of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes;

H.R. 13021. An act to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes; and

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.

The message also announced that the Senate had passed, with amendments in

which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.;

H.R. 5132. An act to amend title 10, United States Code, with respect to active duty agreements for Reserve officers, and for other purposes;

H.R. 10548. An act to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States; and

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3846. An act to establish a National Armed Forces Museum Advisory Board of the Smithsonian Institution, to authorize expansion of the Smithsonian Institution's facilities for portraying the contributions of the Armed Forces of the United States, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934, in order to expand the Federal Communications Commission's regulatory authority under such section;

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard;

S. 1964. An act to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act; and

S. 3533. An act to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) entitled "An act to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations."

THE INFORMED CITIZEN WILL RULE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Indiana [Mr. MADDEN] is recognized for 30 minutes.

Mr. MADDEN. Mr. Speaker, the 86th Congress will adjourn this week. Since it convened a year ago last January, this Congress has legislated on highly important problems, both domestic and international. It can boast of some great accomplishments and unfortunately must answer to the people for a number of major legislative omissions and failures.

The American people are entitled to know the true facts concerning our present economic situation and our international problems if they are to make an intelligent decision on the course we should follow in the future.

A prosperous and expanding economy is absolutely necessary if our Nation keeps pace with its annual increase in population. Steel production is the No. 1 example of industry, generally. When the 4 months' strike terminated last November, the industry started to operate at 96 percent of capacity. The backlog and new orders were completed and the industry was back to normal in 3 months. Employment in steel has diminished monthly since last March. Reports now indicate the administration will order a speedup on defense orders. New car production will stockpile for the next 2 months to increase employment so as to restore confidence and optimism before the presidential election on November 8.

The true facts are that almost one-fifth of America's capacity to produce is now idle. The number of unemployed is about 5 percent of the labor force and an additional 2,500,000 workers are compelled to work part time because full-time jobs are not available. The head of a family who works part time is out of the purchasing market. Food, rent, clothing, and other of life's bare necessities consume his part-time check.

VETO AND THREATS TO VETO

There must be a large increase in our economic growth and production to meet our national needs. From 1947 to 1953—Truman administration—our average annual rate of economic growth was 4.7 percent. In contrast, from 1953 through 1959—Eisenhower administration—our average annual economic growth was reduced to 2.3 annually.

Republican leaders in Congress and the threat of Presidential veto have defeated or blocked numerous legislative programs. These projects if enacted into law would have restored full employment, purchasing power and prosperity to millions. Several billion dollars in additional Federal income tax would have enriched our U.S. Treasury. This additional industrial production would have given employment to many now unemployed or working part time.

These legislative programs were blocked or defeated by veto or threat of veto with the aid of Republican votes and some reactionary Democrats; to wit:

First. A practical farm program.

Second. Housing program.

Third. Flood control and natural resources projects.

Fourth. School construction programs for all American schoolchildren.

Fifth. Distressed area legislation.

Sixth. A highway construction program which is unhampered and inefficient.

Seventh. The Small Business Administration has been crippled by Executive appointments. Thousands of loan applications have been rejected by an unsympathetic Commission.

Eighth. Antistream and lake pollution projects.

Ninth. White House opposition curtailed an adequate old-age medical plan and threat of veto defeated adequate minimum wage legislation.

HIGH INTEREST—TIGHT-MONEY POLICY

One of the main reasons for lack of buying power by millions has been the high interest rate and tight-money policy started in March 1953 by former Secretary of the Treasury, George Humphrey. Billions of dollars have been siphoned from the consuming public throughout the Nation by the administration's high interest gouge. This includes the American farmer as well as the working men and women in the cities and towns. It has increased the interest burden on our $288 billion indebtedness as well as on all National, State, county, municipal, and township bonds. This is an example of the siphoning process that resolves to the benefit of the bankers, insurance companies, and money lenders. High interest rates increase all prices. They saddle an additional burden on the cost of raising a family, buying a house, automobile, household appliances, and the cost of capital to conduct a small business. Since the Eisenhower-Nixon administration has been in power, the cost of living has been on a steady upturn.

HIGH COST OF LIVING

The consumers of America too often hear the sad news from Washington that the cost of living has again risen. In 1957 and 1958, the cost of living ascended the scale each month for 17 consecutive months. When Members of Congress made efforts to investigate the reason for this inexcusable profiteering and rise in the cost of living, we were met with opposition from the White House advisers and the Eisenhower leadership in both Houses of Congress. Former Secretary Douglas McKay who was in the President's original Cabinet, speaking to the U.S. Chamber of Commerce convention in 1953, said and I quote:

Big business is now in the saddle.

AGRICULTURE

I do not need to remind the farmers of Indiana that their income and their economy started on the skids and declined immediately after the special interest groups succeeded in appointing Ezra Taft Benson as Secretary of Agriculture. Under the Roosevelt and Truman administrations, the farmer's prosperity was recognized as the major essential to maintain national prosperity. Under Eisenhower and Benson, the farmer soon discovered that the treadmill of rising costs and falling prices was leading to the complete bankruptcy of the small farmer throughout the country. Several bills have been passed by the Congress that would greatly benefit the small farmers of the Nation, but the Benson influence at the White House was effective in defeating or obtaining a veto of this legislation. The farmers of America cannot be prosperous when the agriculture policies of the U.S. Government are determined by food processors and speculators. They are succeeding in "farming the farmer" as in the regrettable days of 1921 to 1930. Several years ago, one of Secretary Benson's firstline assistants said that too many people are trying to farm who do

not understand the complex problems of agriculture. His inference was that they should leave the farms so that eventually our farm economy would be concentrated in expert farm organizations under the ownership of large corporate farmowners. When millions of farmers have ample purchasing power for automobiles, tractors, machinery, and other products, it soon reflects in factories and retail stores in cities and towns.

LABOR

One of the several unfortunate provisions of the Taft-Hartley Act gave States the right to supersede Federal law if State labor laws were in conflict. Since 1948, thousands of companies have closed their factories or industries and moved to low-wage States, especially in the South. Many new industries have located in these low-wage areas. The textile industry has almost abandoned the Eastern States and moved to the low-wage areas. Indiana has lost hundreds of old and new industries by reason of this low-wage "quirk"—section 14B in the Taft-Hartley law.

The American economy in the last session was rendered another crippling blow by the enactment of the Landrum-Griffin Act which turns back to the States control over vast areas of labor now covered by the Federal act. This in most States will destroy the fundamental protection of the worker's right to organize and bargain collectively. The present National Labor Relations Board is another example of repeal by appointment. Under the Eisenhower administration, this quasi-judicial agency has postponed and delayed numerous union cases and displayed extreme partiality to management. Several appointees to the board and to the post of General Counsel have come directly from the ranks of employer lawyers or labor-relation consultants.

The Landrum-Griffin bill is a union-labor destroying piece of legislation. It provides many expensive and nonessential mandates. For example:

Fifteen days prior to each union election, notice thereof must be mailed to each member at his last known address. This procedure is very expensive and serves no useful purpose.

Secret ballot even though the office is uncontested—another costly and useless procedure.

And, the union must obtain bonds for corporate surety approved by the Secretary of the Treasury. This gives a "bond fee bonanza" for certain privileged bonding and insurance companies.

Other useless provisions are intended to drain the union's treasury. The act has other conflicting procedures, such as, civil suits against unions in Federal courts by the Secretary of Labor, and, private individual members can be sued in State courts.

RIGHT-TO-WORK LAW

The voters in Indiana, Ohio, California, and other areas spoke with overwhelming majorities November 1958 against the antilabor laws like the phony named right-to-work legislation. In the 1959 Indiana legislature the Governor and Republican legislators succeeded in rejecting the voters' mandate.

Provision 14(b) of the Taft-Hartley Act sets out the only instance in our history where a Federal law provides that a State law shall be superior when each is in conflict. This provision was enacted by the antilabor forces so that low-wage States could shackle unions and pass so-called right-to-work laws. Thus in 19 right-to-work States workmen were denied protection against laws curbing labor unions and bargaining rights. Federal laws should not promote economic competition between States but instead should bring about national unity. Right-to-work laws passed in Indiana and other States, in general, curb internal operations of unions, curtail the right to strike, restrict picketing, limit labor management agreements, limit land and property leasing and purchasing by unions regardless of need, and contain other shackling limitations.

The Kansas Attorney General and Supreme Court in 1958, labeled the slogan of "right to work" is in itself a fraud. Heads of numerous industries have spoken out against the so-called right-to-work laws and I will quote a few:

The Southern Coal Producers Association head, Joseph E. Moody, told a New York panel:

> The best interests of the employers are served by strong, secure union leaders. The open shop could weaken that position.

John Snyder, head of U.S. Industries, Inc., declared:

> As an employer, I am firmly opposed to any so-called right-to-work law.

Missilemaker Dan Kimball, formerly Secretary of the Navy, and now head of Aerojet-General Corp., has stated:

> Right to work is bad for the employee, for the employer, and for the State—I am against it.

In the area of management, I have had a great industrialist say to me in a discussion of right-to-work laws:

> In steel we have great and well publicized differences with the union; but if unions did not exist we would have to invent them, for there is no way to deal with the great masses of persons, we employ. The only way in which unions can do a responsible job is for the unions themselves to be secure in their existence.

Numerous churches and church organizations have gone on record opposing the so-called right-to-work law, to mention a few: The National Council of Churches of Christ in the United States representing 38 million church members, and the 171st general assembly of the United Presbyterian Church; and also, the Board of Social and Economic Relations of the Methodist Church stated:

> Such laws are miscalled right-to-work laws since they do not oblige anyone to give an individual a job. Their real menace lies, however, in denying by law the possibility of increasing the quality of human freedom.

The Rabbinical Council of America holds that the so-called right-to-work laws are a camouflage, a gimmick to unionism.

The preponderance of Catholic Church opinion has spoken against these anti-bargaining laws. The Reverend Benjamin Masse, S.J., stated:

> The overwhelming majority of Catholics justify the union shop in theory and practice and oppose the present campaign to outlaw it.

Unfortunately, the State of Indiana is the only major industrial State whose legislators and Governor permitted these so-called right-to-work laws on our statute books.

I firmly believe that the great number of employers and employees in the Hoosier State will arouse this fall and elect legislators who will repeal this law in the 1961 session.

CIVIL RIGHTS

During the last dozen years, the Congress has made remarkable progress on civil rights legislation. In the 85th Congress, we passed the first civil rights bill in 82 years; in this session we made further progress. The Eisenhower-Nixon leadership in this field has been talkative but very slow on action. Any law to be effective must have enforcement in the executive department. Practical enforcement of the 1957 law would have avoided the unfortunate incident at Little Rock, Ark.

LABOR AND COMMUNISM

The American voters should realize that our taxpayers are spending billions each year to fight the cold war and curtail communism. After World War II, international Communist leaders concentrated on controlling American labor. It was great Americans like Phil Murray, William Green, George Meany, Walter Reuther, Dave McDonald, George Harrison, and other leaders who saved American labor from this Communist conspiracy. These labor leaders have also successfully spearheaded the drive to oust dishonest and racketeering officials from the labor movement. These men realize that an elected labor official is in conscience bound to exercise the same diligence and trust to union members as a public official owes to his constituents. These American labor leaders personally supervised, over the years, a program to help union labor in the free European nations to successfully resist the Soviets from taking over labor in these areas. For several years after World War II delegations from American labor unions have spent many months in these countries aiding in this fight against communism. The American people should realize that our greatest protection against Communist infiltration in their efforts to sabotage our economy is free and unhampered union labor in America. Lenin, years ago, stated that the most fertile field for Communist expansion and control was in the field of labor unions and the schools.

OLD-AGE MEDICAL CARE

Millions of our pioneer citizens can thank Senator KENNEDY and Senator JOHNSON, and the vast majority of Democratic Members of Congress for arousing public opinion on medical and hospital aid to the aged. Republican

congressional leaders supported legislation of this type only when forced by the vast majority of the American people. The White House threat of veto was the main reason for the failure of an even more extended medical bill for our older folks. In the last 7½ years, it has been demonstrated that the power of the President can spell success or defeat for legislation of this nature when it is considered in Congress. The failure of ample wage and coverage in the minimum wage legislation is an example.

OUR GREAT HIGHWAY BUNGLE

The above is a subtitle for a news story on page 45 of the July 1960 Reader's Digest. This article should be read by all taxpayers and unemployed workers because it partly explains our stagnant economy. The Congress passed the $31 billion national highway construction project almost 4 years ago. The Eisenhower brain trusters have curtailed and stalled this necessary undertaking so successfully that after 4 years, it is relatively not much further than the blueprint stage.

We in Indiana know of the graft, racketeering, and inefficiency identified with the project in the State. The Readers Digest article tells the facts in detail why it has been a gigantic bungle in Indiana and other States. This project should have been operating in full force over 2 years ago. Millions of workers could have found employment not only on the actual construction of highways but steel, cement, brick, excavation, lumber, and all kindred industries throughout the Nation. Imagine the enthusiasm, leadership, and immediate cooperation Presidents Franklin D. Roosevelt and Harry Truman would have applied to a mammoth project of this type.

FISCAL IRRESPONSIBILITY

When Candidates Eisenhower and NIXON were campaigning for office, they made many promises to the American people. Let us examine some of the discrepancies between word and deed. In 1952 Candidate Eisenhower promised to reduce taxes.

PERFORMANCE

The Library of Congress Research Department estimates this administration has collected 515 billion 727 million dollars in taxes, and that is almost as much money as all other Presidents from Washington to Truman combined, collected in taxes. Those 32 other Presidents collected a total of 586 billion 112 million dollars.

In 1952 and 1956 Candidates Eisenhower and NIXON promised to reduce Government expenditures.

To date this administration has spent more money than any other administration in the history of our country. The latest compilation shows that this administration has spent 533 billion 8 million dollars, and the Library of Congress estimates that by the end of this year, this figure will reach $579 billion. Truman spent $360 billion in 8 years, and Roosevelt spent $374 billion in 12 years, including cost of World War II. A Democratic Congress has cut the President's budget requests each session; at the present time, our cuts total $24.3 billion in 8 years.

He also promised to balance the budget:

The administration's total deficit now stands at $18¼ billion.

He also promised to reduce the national debt:

Since this administration has been in power, the national debt has increased from $266 to $288 billion.

REPUBLICANS ECONOMIZE AT EXPENSE OF PUBLIC INTEREST

This administration talks long and loud about economy when matters of benefit to the general public are involved. The White House tried to cut or defeat the vocational education program, funds for schools in federally impacted areas, medical research, Pure Food and Drug Administration, water pollution control, rural library service, housing, school construction, distressed areas, and flood control. On the other hand, when it comes to matters which benefit the privileged few, this administration has been anything but economical. The American people have spent $10 billion more for interest under the Eisenhower administration than they did under Truman's, and will be spending $13 billion more this year for interest on public debt than during the last year of Truman's administration. Those sums of money would more than pay for all the programs for the people which this administration calls extravagant. Recently, the administration tried for another increase in interest rates, but the Democratic Congress rejected the request. When it comes to waste in foreign aid and military procurement, economy goes out the window. Of course, waste in those areas benefits big industry, business, and the moneylenders. Indeed, it is ironical that a President who campaigned on a platform of economy should prove to have the most wasteful and extravagant administration in the history of our country.

FOREIGN AFFAIRS

Our unfortunate experiences during the last 7½ years in both hemispheres cannot be listed in one speech. We will read and hear volumes of political propaganda in the next 2 months in an effort to justify the Eisenhower-Nixon foreign policy. We have had political diplomacy starting with the President's campaign promises in 1952 to free the satellite nations; that was followed by his state of the Union message in January 1953 to unleash Chiang Kai-shek so that he could conquer the Chinese mainland. Americans remember the Aswan Dam fiasco which led up to the Suez Canal sacrifice—our failures and mistakes in countries throughout the world, particularly in South America and Africa, testify to the ineptness of our foreign policy—as of today the Soviet conspiracy has succeeded in taking over numerous countries including the establishing of a beachhead, in Cuba, just 90 miles from our shores.

Most newspapers hailed the Geneva Conference of 4 years ago as an Eisenhower triumph, 2 months later Khrushchev and Bulganin were traveling throughout the Middle East and Asia calling the United States leaders warmongers. Then came Vice President NIXON's unfortunate invitation to Khrushchev to visit our country; he was given the red carpet treatment to use our platforms for his insidious Communist propaganda. The aftermath of this visit was our President being insulted in Paris. Later his invitation to visit Japan was recalled. It is time that the American people became aware of the protecting umbrella spread out by most newspaper publicity and also some television and radio commentators tending to picture our procession of international bungling events as diplomatic victories.

WILL HISTORY REPEAT?

Older citizens recollect the penalty our Nation paid after 12 years of Republican policies in the 1920 period. Former Secretary of the Treasury Andrew Mellon was our economic and fiscal dictator during three Republican administrations. We remember the basic governmental philosophy was to disregard legislation affecting the lower income bracket citizen—legislate abundance to those who need it least. The result was a breakdown of purchasing power from the masses of people, both urban and rural. This led to closed mills, factories, retail stores, banks, farm foreclosures, and bankruptcies.

Those of us who lived through that regrettable period can detect the result of the same governmental policies on the economic horizon that brought disaster to our economy 30 years ago.

THE DEMOCRATS' REPLY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. PUCINSKI] is recognized for 2 hours.

Mr. PUCINSKI. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Montana.

Mr. METCALF. Mr. Speaker, I have been reading parts of Operation Veracity, and I was rather intrigued by reading the statement of the gentleman from Wyoming [Mr. THOMSON], who stated in his discussion, or in one of his discussions, on Operation Veracity that in 4 out of the last 7 years the Democratic controlled Congress has cut the President's budget request for water research and development. He also said the actual cost of converting sea water went down further and faster during the Eisenhower-Nixon administration than during all previous known history. This is a remarkable achievement.

Mr. Speaker, I had the pleasure of serving on the Interior Committee for 4

of the years that I served in the Congress. During the first year that I was on the Interior Committee, the original Saline Water Act was up for renewal. That act, incidentally, passed unanimously. All the Republicans and all the Democrats on the committee supported it. But, I can recall that during that period the then chairman, of the committee, Mr. ENGLE, and the now chairman of the committee, the gentleman from Colorado [Mr. ASPINALL], both chided the administration for the slowness by which they were making progress with the Saline Water Act.

Actually in 1955 it was a Democratic Congress that extended the program to 10 years with a total authorization of $10 million over this period. It was a Republican 83d Congress, with President Eisenhower in the White House, a Republican House and a Republican Senate, that appropriated only $800,000 for this program. That is the amount that was authorized. In three Democratic Congresses since 1954 the President requested $6,424,000 and Congress appropriated $6,555,000. I want to remind the gentleman from Wyoming [Mr. THOMSON], that he said:

> In 4 out of the last 7 years the Democratic-controlled Congress has cut the President's budget.

In all those years the Democratic-controlled Congress appropriated as much as or more than the President requested.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. METCALF. I yield.

Mr. HOFFMAN of Michigan. Was that good or bad?

Mr. METCALF. That was good, that was definitely good. This is one of the finest programs that is under way in the United States. We should have appropriated twice as much.

Mr. HOFFMAN of Michigan. You mean the Republicans did something good?

Mr. METCALF. The Democrats did something good by appropriating more money than the President requested. And they should have appropriated twice as much and we would have if we had not had opposition from your side of the aisle.

Mr. HOFFMAN of Michigan. Some of them over here wanted to save that money for foreign aid.

Mr. METCALF. This is a better program than foreign aid.

Mr. Speaker, I should be glad to yield to the gentleman from Wyoming, if he wishes.

Mr. THOMSON of Wyoming. Mr. Speaker, I had the feeling that we were getting a little afield. In the first place, I did not look up the total appropriation; I do not know whether the figure is correct, that the President requested $6,400,000 and that the Congress appropriated $6,500,000 in the last 6 years. I assume it is, because of the respect I have for the gentleman from Montana. Even so, all that would prove is that in some years you blow hot and others cold, just like in defense. When Sputnik goes up you appropriate a lot of money and think that that is going to take care of your past errors in cutting the same appropriations. Regardless of that, the statement stands, and it is proven by the gentleman's own words, that the statement in the Democratic platform that the Republicans have tended to scuttle this program is, to state it mildly—I do not want to be too severe—a misstatement of fact.

Mr. METCALF. The statement is accurate and, Mr. Speaker, if the gentleman will permit me, I shall ask unanimous consent to put in the RECORD the amount of the appropriations for every year that this program has been in effect.

Mr. THOMSON of Wyoming. Does the gentleman from Montana have at his fingertips the statement of the Democratic platform with regard to this?

Mr. METCALF. The statement is:

> We will support and intensify the research effort to find an economical way to convert salt and brackish water.

The Republicans discouraged this research which holds untold possibilities for the whole world. My statement was that back in those days when we passed the second authorizing act, many members of the committee, Democratic members, criticized the administration for doing just this, discouraging this research. My statement was that we have appropriated more money than the President asked for, and that the administration of this program has been discouraged by the people downtown under the White House.

Mr. THOMSON of Wyoming. I think it stands uncontroverted—and that is all I set out to show—that the statement and inference in the Democratic platform, that the Republicans had discouraged this work will not stand the test of close scrutiny. Actually, the Republicans and the Republican administration went forward with a very good program and one that has had good effect. The fact remains that in 4 out of the last 7 years the Democrat-controlled Congress has cut the President's budget requests for this program. The gentleman suggested that the gentleman from Wyoming was on the Interior Subcommittee that considered this appropriation, and that is true. As a matter of fact, I may have supported, and I think I did, some of the modest cuts, because I thought it was a way of encouraging progress, but progress with economy, to the taxpayers' benefit. The last 2 years our subcommittee's action under the chairmanship of the able gentleman from Ohio [Mr. KIRWAN] has been unanimous in this area, I believe. That does not change the fact that the Democrat platform writers indulged in fiction instead of fact, necessitating in the public interest Operation Veracity.

I am not, in my statement, trying to indict the Democratic Congress. But whoever wrote that platform tried to make it look as though the Republicans had dragged their feet and discouraged research and tried to stop it, and when they said that they simply were not staying within the facts, as the gentleman from Montana himself has recited them.

Mr. METCALF. The Republicans have certainly dragged their feet in developing this very important program. I should expect that the gentleman from Wyoming, having formerly been a member of the Interior Committee and very familiar with the program, probably supported it in its entirety in the Appropriations Committee, because he and I both know the value of the program.

Mr. THOMSON of Wyoming. I supported the program.

Mr. METCALF. If the gentleman will let me run along, and if the gentleman from Illinois will yield to me further, I will mention some of the criticisms that have been made of the administration in this program. The gentleman will recall that the man who is in charge of this program is the former chairman of the Interior Committee, an ex-Congressman from Nebraska, who has not been as wholehearted in spending enough money to put this program in operation as he could be. While a great deal of progress has been made in the water program since 1958, the Department of the Interior has been contented with gradual progress and has not regarded the program with the sense of urgency which Congress contends it should have.

I am reading from the report of the Committee on Government Operations, House Report No. 2551, which confirms the statement made in the Democratic platform, the study criticized by the gentleman from Wyoming.

> The Office of Saline Water has not taken full advantage of Federal scientific laboratories to perform research on saline water conversion problems.
>
> It is questionable whether adequate efforts are being made to obtain for the researches within the United States the full benefits which could be obtained from foreign researches.
>
> Private industry is keenly interested in the design and manufacture of desalinization equipment and would undoubtedly respond quickly and positively if encouraged to advance desalinization research, engineering, and plant construction on a large scale.

Mr. THOMSON of Wyoming. From what is the gentleman reading?

Mr. METCALF. I am reading from the 31st report of the Committee on Government Operations, 85th Congress, 2d session, House Report No. 2551. These are the conclusions, and, Mr. Speaker, I ask unanimous consent to put these in the RECORD at this point at greater length.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

Mr. THOMSON of Wyoming. Reserving the right to object, just so the record will be clear to the people of the country, we all know and the people of the country should know that the fact is that this Government Operations Committee is controlled by the Democrats in the Congress, the committee membership is 19 Democrats to 11 Republicans, and it is a majority report, and this committee one of the most partisan politically motivated committees in the House of Representatives. It is a self-serving statement of that committee.

Mr. METCALF. If I may renew my request, this report will be put in the RECORD.

Mr. THOMSON of Wyoming. I withdraw my reservation of objection, Mr. Speaker.

Mr. METCALF. If there are any minority views available they can be put in alongside this report, but I did not find any minority views, any criticism by the Republicans of the conclusions made by this subcommittee and adopted by the full Committee on Government Operations.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The material referred to follows:

CONCLUSIONS

1. The demand for water in many areas of the United States is expanding at an enormous rate, and unless these demands are met soon, our Nation is certain to face hardships and economic retardation so severe as to impair our national economy and security.

2. While a good deal of progress has been made in the saline water program since 1952, within the framework prescribed by the limitations of the Saline Water Act, the Department of the Interior has been contented with the gradual progress and has not regarded the program with the sense of urgency which Congress intended it should have. Illustrative of the Department's attitude is the fact that the Department has, in the past 2 years, deferred or cut back admittedly important projects on the ground that the fiscal and other limitations in the Saline Water Act would preclude such work, yet has not recommended modification of those limitations.

3. It does not appear that any desalting process now in being or under development offers promise of overcoming the difficult problems standing in the way of producing fresh water from sea water in large quantities and at costs economically competitive with other sources in most areas. Moreover, these problems are such that their solution will have to be preceded by a dramatic scientific breakthrough. However, the committee has seen no evidence that such a breakthrough is imminent.

4. The economical production of fresh water from saline water is a complex problem, as difficult perhaps as that of developing methods of using atomic energy for economical production of electric power. The committee believes that the importance of the task and the need for new ideas and new techniques to solve the problem will demand all the ingenuity and engineering know-how that can be brought to bear. The committee is convinced that there must be a larger and more sustained effort in both basic research and development of saline water conversion methods than is possible at the present rate of expenditure by Government and industry. The Office of Saline Water must substantially increase its efforts in advancing both basic research and pilot-plant work in the saline water conversion program. Such effort would be facilitated by amendment of the Saline Water Act to eliminate the financial authorization restrictions now present in that act, and by appropriation of sufficient additional sums to enable such work to proceed promptly and without deferment.

5. Localities whose fresh water needs can be met by conversion of saline water often differ greatly in climate, topography, salinity of the available water, quantities of water required, uses for the fresh water, cost or availability of fuel, labor, materials, and so forth. The committee recognizes that no single process now in view is superior to all others at all locations and in all circumstances. The committee therefore agrees with the OSW policy of concurrently investigating and developing as many different processes and methods as possible.

6. Estimates given the committee concerning saline water conversion costs vary widely not only among different processes but also among different methods of the same process. Moreover, the more optimistic cost estimates are either admittedly preliminary or strongly hedged. Also, the fact that the added costs of pumping, transporting, storing, and distributing the water are largely or completely omitted makes it difficult to compare the costs of converted water and of water from natural sources. These cost uncertainties are a major handicap to the committee in attempting to reach firm conclusions about the present state of progress, and reasonable expectations as to future developments, in the saline water program.

7. The Office of Saline Water has not taken full advantage of Federal scientific laboratories to perform research on saline water conversion problems.

8. The Office of Saline Water is substantially understaffed, with resulting excessive workload and impairment of its efficiency and ability to advance the saline-water program as rapidly as Congress intended.

9. The cooperation and coordination which Congress intended should be made in the saline-water program by the Department of the Interior, Department of Defense, and other Federal agencies have not been attained. No joint projects have been initiated and only one cooperative agreement has been executed between the agencies. Although there has been liaison on some projects, it is the opinion of the committee that more could and should have been done in effectuating the cooperation and coordination necessary to mobilize the full resources of the Government in achieving the objectives of the Saline Water Act.

10. Considerable work is being done on saline-water conversion in many countries throughout the world. It is questionable whether adequate efforts are being made to obtain for the researches within the United States the full benefit which could be obtained from foreign researches.

11. The OSW has made some contacts with research groups in various countries. However, it has given very little attention to the possibility of cooperating in saline-water research endeavors or projects with research groups and governmental agencies in the countries of Latin America, several of which have widespread and pressing need for economical methods to desalt sea and brackish water.

12. Private industry is keenly interested in the design and manufacture of desalination equipment, and would undoubtedly respond quickly and positively if encouraged to advance desalination research, engineering, and plant construction on a large scale.

13. The progress of the OSW program is being hampered by unduly small allocation of funds for basic research, by deferring research and testing in pilot plants of many promising processes which are ready for such work, by lack of a Federal seashore laboratory for saline-water research, and because contractors are frequently uncertain of getting the long-term financial support from OSW needed for continuity of research-staff effort.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from California.

Mr. HOLIFIELD. I happen to be a member of the Committee on Government Operations. I resent what the gentleman from Wyoming said in regard to the partisanship of this committee. I happen to be chairman of the Subcommittee on Military Operations and the gentleman from New York [Mr. RIEHLMAN] is the ranking member on that side of the aisle. I will say in the last 6 years of my chairmanship of that subcommittee that about 9 out of 10 of our reports have been unanimous as far as the Republicans and Democrats are concerned on that committee. Many of the reports on the committee are unanimous and, of course, there are some slightly different viewpoints in some minority reports, of course, as there are in any committee, but I certainly resent the statement of there being partisanship on this committee.

Mr. PUCINSKI. I should like to agree with the gentleman from California. I am not a member of the Committee on Government Operations, but the distinguished gentleman from Chicago [Mr. DAWSON] is chairman of that committee and I think it is certainly unfair to charge his committee with political partisanship, or making any similar sort of a charge against this committee, when the distinguished gentleman from Chicago, the chairman of that committee, has actually leaned over backwards to be fair and nonpartisan. That is something that has been acclaimed by the press throughout the country, and I think everybody in this Congress knows what an extremely diligent job he has done in trying to be fair to both sides in the conduct of his committee. I am sorry to see that under my special order such a charge is being made against this committee, when everyone in this House knows that Mr. DAWSON has served as a model chairman in conducting his committee in a fair and impartial manner.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Wyoming.

Mr. THOMSON of Wyoming. I am sorry the gentleman thinks the charge of Democratic partisanship is such a shocking charge.

Mr. PUCINSKI. The gentleman did not say Democratic partisanship—the gentleman said political partisanship.

Mr. THOMSON of Wyoming. OK then, political partisanship.

Mr. PUCINSKI. I do not think the distinguished chairman of that committee has ever used that committee for political purposes.

Mr. THOMSON of Wyoming. We do not want to debate that on your time, but sometime, if you would like, we can debate it, and I can speak from my own experience.

Mr. REUSS. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Wisconsin.

Mr. REUSS. On this question of partisanship on the part of the Committee on Government Operations, I happen to be a member of the committee too. As I understand it, the portion of the committee report quoted was a unanimous committee report concurred in by both the minority and the majority. It happens that the minority ranking member of the House Committee on Government Operations is the gentleman from Michigan [Mr. HOFFMAN] who can certainly never be accused of a lack of partisanship for his side of the aisle. I hope

there is no suggestion that the gentleman from Michigan [Mr. HOFFMAN] was not as zealous in protecting his side of the aisle.

Mr. HOFFMAN of Michigan. May I correct you right there? I could never be accused of what?

Mr. REUSS. A lack of partisanship.

Mr. HOFFMAN of Michigan. Oh, yes, yes, yes; just within the past 3 weeks Mr. DAWSON, chairman of that committee, when we happened to get a little equal publicity on a subcommittee report called me over and I went over, and when I showed him that they had been 2 or 3 weeks ahead of us, he said, "You lack aggressiveness." He said, "You are not partisan enough." I said, "You tell that to Mr. Moss." Although I do not know whether he did or not.

Mr. REUSS. Now the same implicit accusation comes from your side of the aisle and I just want the RECORD to show that I just do not think it is true.

Mr. HOFFMAN of Michigan. No, no. You see he said I was not aggressive enough. Think of that. Is that not something?

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Montana.

Mr. METCALF. Mr. Speaker, I believe the point to be made is that the Democratic Party has carried out and will carry out this pledge in our platform:

> We will support and intensify the research effort to find an economical way to convert salt and brackish water.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield for a question?

Mr. PUCINSKI. Mr. Speaker, I refuse to yield until the gentleman from Montana has completed his statement.

Mr. METCALF. I have pointed out where no committee of this Congress has discouraged this research which bears out the second sentence in the Democratic platform.

Then I have pointed out here that the Democratic-controlled Congress had appropriated more money for this program than was asked for by the administration or permitted by the Bureau of the Budget. In 3 of the years we have appropriated $400,000 that was asked for by the administration. So I feel with all this discussion that a complete answer has been given to the statement of the gentleman from Arizona that the charge leveled by the gentleman from Wyoming has not been answered.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield.

Mr. BYRNES of Wisconsin. I wonder if the gentleman from Montana when he revises his remarks would include a table showing from the inception of this program to date, including fiscal year 1961, the budget requests and the final appropriation bills for each of the fiscal years? If he does that and examines that himself he will find that the statement he is making is false.

Mr. METCALF. I will be delighted to include that table, and I have asked unanimous consent to include such a table, and I intend to include such a table.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield.

Mr. THOMSON of Wyoming. I think the only thing I set out to prove was that any inferences that the Republican administration had not supported this program was contrary to the fact.

I know the gentleman from Montana and myself both left the Interior Committee in January of 1959 to go to other duties, but there are other members of the committee here on the floor who can furnish information about the program. This matter was actively supported by our former colleague from Nebraska, Dr. Miller, who is now head of the program. It is reported to me that there was a bill submitted some time ago to this House asking for an expanded program and an enlargement of the program. But that this bill and two others have never been given the courtesy of a hearing before the Interior Committee, or any action by this session of Congress.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield.

Mr. METCALF. I may say that the Democratic candidate for the Presidency was interested in the subject and the Democratic candidate for Vice President of the United States, Senator JOHNSON, has introduced the bill the gentleman is talking about, S. 3557, but the gentleman knows the impossibility of getting it cleared for action because of the recess and the short session.

Mr. THOMSON of Wyoming. I came back here on the 14th or 15th of August, interrupting a campaign to get to work, but we did not do a thing during the rest of that week.

Mr. METCALF. The gentleman did not interrupt any more important campaign than I did. The gentleman knows which party it was which took such pointed notice of a quorum or the lack of a quorum.

Mr. PUCINSKI. Mr. Speaker, I must refuse to yield further for a moment. I asked for this special order to lament the fact that the 86th Congress, just a few hours from adjournment, is not going to meet one of the great challenges of 1960, and pass a minimum wage bill.

As a member of the House Labor Committee, my colleagues and I on the subcommittee that drafted this legislation worked extremely hard.

We put in long hours listening to very difficult and tedious testimony. Our colleagues in the other body, the Labor Committee headed by the distinguished Senator from Massachusetts [Mr. KENNEDY], did likewise.

In the bill that we finally reported to the House from the Labor Committee we had tried to reflect the problems and the difficulties that had been reported to us by various witnesses. We believe we had come to this House with an extremely fair bill. This bill recognized the fact that we were moving into an entirely new area of fair labor standards. This bill recognized that when the Fair Labor Standards Act was passed in 1938, 56 percent of the American labor force was engaged in production, while only 44 percent was engaged in services. The Congress of the United States very wisely and properly, 22 years ago, excluded service employees and applied fair labor standards primarily to industrial workers.

Our committee recognized the fact that in ensuing years an industrial revolution had occurred in this country. Today, in 1960, 56 percent of the American labor force is engaged in services, and only 44 percent in production. In other words, out of a labor market of 65 million people, only some 24 million today enjoy the protection of fair labor standards, but the overwhelming number of 41 million working people in America today enjoy no fair labor standards. Therefore, we brought before this House a bill that reflected a great deal of understanding that when we move into the field of services with fair labor standards minimum coverage, we must consider the inherent problems of those services. We said at the time that bill came before the House that it was a fair bill. This bill would have extended coverage to some 4.5 million additional workers who need relief most earnestly today.

Instead, a substitute bill was rammed through this House, a bill which had narrowed down that coverage to some 1.4 million people, and then, with the unfortunate amendment that was tacked on in the rush, without any discussion, we eliminated another 700,000 of those now covered. So that the net gain of this bill passed by the House would have been 700,000. We had hoped that the Senate might correct many of the shortcomings, and the Senate did. In the Senate the distinguished Senator from Massachusetts [Mr. KENNEDY], again recognizing the many problems that would be involved in moving too fast in this field, came along with a fine, fair bill.

Even in conference, after that bill was adopted by the Senate, the distinguished chairman of that committee, the Senator from Massachusetts, made further concessions, recognizing that there are certain Members in this Congress who feel that perhaps applying the fair labor standards to purely intrastate commerce might set a dangerous precedent. The distinguished Senator from Massachusetts and the three Democrats on that Senate committee acquiesced to a narrower definition of a business enterprise. They accepted the House version of five establishments doing business in two or more States, and added a further provision that would exclude any business enterprise from coverage unless it brought in from out of State a million and a half dollars worth of goods for resale in the State.

The Senator also acquiesced in bringing down the level, the original $1.25, and agreed to settle for $1.15. So the Senate conference committee was perfectly willing to report out a bill that would have met the problem. It would have extended the coverage to some 3.7 million people, yet would have reflected to a great extent the very thing that so many men in this House complained

about. What happened? The will of the whole Congress was frustrated by four men, three of them Republicans.

Mr. Speaker, during the last 2 days I have sat in this House and patiently listened to long debates under special orders here by my Republican friends on a project they called Operation Veracity. Well, the fact of the matter is that this project would not be complete unless these gentlemen are willing to admit to us here in the Congress and to the Nation that we are not going home tonight or tomorrow morning with a fair labor standards extension and with improvement in the minimum wage law; and, incidentally, a law that the President wanted. His own Secretary of Labor appeared before our committee and asked for a bill. It certainly came close to the bill that your committee reported out. The President at one time, I understand, had threatened to recall the Congress if it did not deal with the Fair Labor Standards Act or a revision of that act. In my own district I asked the people in a survey whether they felt that the Fair Labor Standards Act should be improved, and 71 percent of the people of my district said "Yes." I believe that my people reflect the feelings of all Americans. And yet here is a House and a Senate and a President and a Nation that recognizes the need for improving our Fair Labor Standards Act, and four men, three of them Republicans, can frustrate the will of the whole Nation. I hope that my friends will talk about this when they talk about veracity. That is a fancy word. I prefer to stick to the simple word "truth." And, the fact of the matter is that no matter how our Republican colleagues on this side of the aisle from now until November 8 will try to chop up this record, they are going to have to admit that not only in minimum standards but in issue after issue that came before this Congress we have been frustrated by their opposition. There is no question in my mind but what these gentlemen have the same responsibility to the people of the United States on that side of the aisle that we have on this side of the aisle.

And, as a matter of fact, I would like the RECORD to show that when Operation Veracity was started, the gentlemen had 2 hours on 2 successive days. And, I think if any of you will take the trouble to look at the RECORD, you will find that the architects of Operation Veracity refused instance after instance to yield to any cross-examination until the last remaining moment of their time. I want the RECORD to show that when this discussion started today we did not hesitate one moment to yield to the gentleman from Wyoming to ask his questions and interrogate the gentleman from Montana.

But, I should make one more point, and then I will be very glad to yield. I made the statement the other day that progress has been made in this Congress, and it certainly has been made. I lament the fact that we cannot go home with a minimum wage bill, but certainly there has been progress made in the 86th Congress. I think I can go home and proudly recite the record of this Congress, and I need not apologize for many of the bills that we have passed here. We have passed a great deal of this legislation, particularly legislation that the administration today is boasting about, with Democratic support. And the record of this Congress in the last 8 years will show repeatedly that if it had not been for the statesmanlike attitude of the Democrats in this Congress, in supporting those bills they felt were wise and sound, the President would have been in an unhappy box.

The Democratic committee has prepared some interesting figures. Let us look at the record. In 1953, on a vote to increase the Air Force, 83 percent of the Democrats voted for it; 98 percent of the Republicans voted against it. In 1954, to maintain the Army, 79 percent of the Democrats voted for it—this is 1954 when we had a Republican in the White House—and 98 percent of the Republican Party voted against this legislation. In 1956, to increase the Air Force, 93 percent of the Democrats supported this legislation and 88 percent of Mr. Eisenhower's own men in this Congress opposed that legislation. In 1958, to increase the Army, 84 percent of the Democrats voted for this legislation while 71 percent of those of his own party opposed this legislation. In 1959, to increase the airlift, 68 percent of the Democrats supported this legislation and 90 percent of the Republicans voted against it.

Then let us take a look at some figures on foreign policy. What degree of support did the President get from the Democrats and what degree of obstruction did he receive from members of his own party? The House voted to increase funds for international educational activities and 66 percent of the Democrats supported this legislation and 88 percent of the Republicans opposed it.

On the House vote to avoid crippling amendments in the Trade Agreements Act extension in 1955: 65 percent of the Democrats supported it and 64 percent of the Republicans opposed it.

On the Senate vote for 2-year instead of 1-year extension of the Agricultural Trade Act, 86 percent of the Democrats supported this action and 84 percent of the Republicans opposed it.

In the House passage of the Health for Peace Act in 1960, 91 percent of the Democrats supported this legislation and 67 percent of the Republicans opposed it.

Mr. Speaker, I think everyone who is in this House may be proud of the fact that in the last 3 weeks of this bobtailed session we certainly have tried to avoid as much as possible purely partisan political discussion. And I can say, if we look at the RECORD for those 3 weeks, we will find that the Members of the House have certainly conducted themselves very much contrary to the predictions that were made before the session began. There were dire predictions that these 3 weeks were going to be spent on nothing but bitter political partisan backbiting.

If I have taken the floor of the House today, if other Members of the House are taking the floor today, it is only because in the last 2 days before the adjournment of Congress, our colleagues on the Republican side have taken time to launch this Operation Veracity. Certainly I do not think that this Congress could adjourn without at least those on this side who have been supporting decent, sound legislation, who have gone along in helping the President, being given a chance to state our case.

Mr. Speaker, at this time I yield to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, I thank the distinguished gentleman from Illinois and I concur in his remarks. I would like at this time to discuss briefly the question of research in minerals. I quote from the Democratic platform:

> We will resume research and development work on use of low-grade mineral reserves, especially oil shale, lignites, iron ore taconite, and radioactive minerals. These efforts have been halted or cut back by the Republican administration.

Here is what the truth squad from the opposition says.

Let me use as an example oil shale research conducted at the Bureau of Mines Experimental Laboratory at Laramie, Wyo. I want to discuss the question of liquid fuels and mineral resources, and I want to go back a little further than the truth squad wanted to go back. Let me go back to 1946 when my colleague, then Representative JENNINGS RANDOLPH, now senior U.S. Senator from West Virginia, was a Member of the House. He offered legislation to provide for a study of liquid fuel. The Congress approved the legislation. We appropriated $15 million for the purpose of studying liquid fuels, gasification, hydrogenation, and other processes of converting coal and lignite into high octane gasoline or into lubricating oil.

Under that act, enacted in 1946, by 1952, we had set up subareas and substations for the conduct of this investigation and this research in Missouri, where they were engaged in the hydrogenation of coal. We set up one at Birmingham, Ala., engaged in the gasification of coal converted into liquid fuel. We set up another one at Bristol, Pa. We had the main operation set up in connection with the West Virginia School of Mines under the control of the Bureau of Mines, a station at Morgantown, W. Va.

When the Republican administration came in following the 1952 election, the distinguished gentleman who became chairman of the Appropriations Committee—and I am referring now to the gentleman from New York [Mr. TABER]—immediately tried to cover back out of the $15 million we had appropriated in 1946, into the Treasury, $4,800,000 of that $15 million that had not been expended.

I objected on the ground that it was legislation on an appropriation bill, and the Speaker sustained me. The next day I went over to the Bureau of Mines and reminded them that they had an act that had been passed in 1946 that gave them contract authority. They went ahead and contracted for a research bureau at Morgantown under the control of the Bureau of Mines that cost

$2,800,000, and they bought $600,000 worth of modern equipment before Mr. TABER succeeded in covering back into the Treasury the remainder of that $2,800,000.

What happened following the 1952 election when this Republican administration came into power, that wants to take credit for all of the improvements in the field and study of mineral resources? What happened?

I led the fight. On a number of occasions I have had oil company representatives walk into my office and stand across the desk from me and say, "Congressman, when coal is processed into high-octane gasoline and lubricating oil the oil industry will do it, not the coal operators."

Now, after the big slush fund that went into the campaign of 1952, what happened in 1953? They cut the appropriation for this big research unit at Morgantown, W. Va., half in two. They cut so deep into it that we closed this laboratory at Louisiana, Mo., we closed this oil shale plant at Rifle, Colo., at Birmingham, and at Bristol, Pa. What then do we expect? You know that the oil people and the people who produce gasoline do not want any competitive fuel.

At one time at this research center at Louisiana, Mo., they produced high-octane gasoline that came within 6 cents a gallon of the wholesale price of gasoline. After researches that had been carried on at Morgantown last year, I began pleading with them to install an atomic reactor over there. The reason I did that was that to break coal down into its component parts takes 32° F. The cost of conventional fuels to create that heat is what causes coal to be made into high-octane gasoline through the hydrogenation process. What is happening now? The Bureau is operating over there and they are not carrying on the necessary researches. Still the Republican Party wants to take credit for developing our national resources. They have thrown every obstacle possible in my path to try to say this.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. No; I will not yield. Take your medicine. It is coming to you.

They threw everything possible in the way of West Virginia's developing its unmined reserves of coal by processing them into high-octane gasoline and lubricating oil, because they are under the control of those who contribute to your campaign fund. Take it and like it.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. No, I will not yield further at this time. I think we have demonstrated a desire to be fair. We are going to be fair. Certainly at the proper time I shall yield to my colleagues on this side. I think I have already demonstrated that, and I will do that.

The thing I would like to ask the gentleman from West Virginia is this. We keep hearing the statement, and throughout this whole Operation Veracity we kept hearing the statement that we had 283 Democrats and 153 Republicans in the House, and almost a similar ratio in the Senate. Some time ago the President mentioned at one of his press conferences this rather large ratio of Democrats to Republicans.

One thing that I think these men fail to understand, and I wonder if the gentleman from West Virginia would agree, is that while certainly within our own party, as within the Republican Party, there are differences, the very dynamics of the Democratic Party are that we have differences within our own party. We respect the gentlemen from the South who speak when they do not agree with our own viewpoint on many issues. I have gotten the impression that while we may in the Democratic Party honestly disagree, throughout this Congress I have noticed that our friends on the Republican side have opposed legislation not necessarily because they opposed it on the merits but because it might give the Democratic majority in this Congress some sort of an advantage—perhaps, a point or two—in the opinion of the public. Would the gentleman agree that this exists during this session?

Mr. BAILEY. That is true. Now I would like to say at this point, if the gentleman will yield to me, the distinguished gentleman from Wyoming said that my language was kind of rough. I will agree that it was, but the truth is rough and sometimes the truth is necessary and it is necessary at this point to keep the record straight. I have no apologies to make to anybody. It is the truth.

Mr. PUCINSKI. I yield to the gentleman from Michigan [Mr. HOFFMAN].

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield for a parliamentary inquiry?

Mr. PUCINSKI. I do not yield for a parliamentary inquiry. I promised to yield to the gentleman from Michigan and I trust that my colleague will understand.

Mr. THOMSON of Wyoming. I was just going to ask the Chair if a point of privilege of the House would be in order.

Mr. HOFFMAN of Michigan. Now I am not familiar with this Operation Veracity you call it, or this counteroperation so I cannot talk very much about that. But you did refer to the membership in the House on both our side and your side and you did refer to the President's statement. That is the point I wanted to make. When you complain about this, you have folks enough to bring it out on a petition, if you want to; do you not?

Mr. PUCINSKI. Not in these closing days and closing hours of the session. But may I just make one point clear. The conferees had recessed to reconvene at the call of the Chair. Now I am not sufficiently skilled in the mechanics of parliamentary procedure, but I am inclined to think in this particular situation it would be rather difficult in these closing hours for us to try to bring out a minimum wage bill under suspension.

Mr. HOFFMAN of Michigan. It would, but we are on the same Committee on Education and Labor.

Mr. PUCINSKI. Yes; and I have certainly enjoyed serving on that committee with the distinguished gentleman from Michigan [Mr. HOFFMAN], and he has taught me a lot of things.

Mr. HOFFMAN of Michigan. And it was my vote, was it not that got this thing out to the full committee; do you remember that?

Mr. PUCINSKI. That is correct.

Mr. HOFFMAN of Michigan. And now may I ask this question? In view of the very fine statement you are making and in view of the fact that some of these Members of the veracity group are not here, do you not think in fairness to everybody that we should have a quorum call?

Mr. PUCINSKI. Oh, no.

Mr. HOFFMAN of Michigan. Now, you fellows can laugh all you want to, but we are going to stay here until morning anyway, as I understand, and I think the gentleman is entitled to an audience.

Mr. PUCINSKI. May I remind my colleague that many Members of the House have been on the floor all day and they must take the time to attend to necessary business in their offices and they must have to leave the Chamber to get something to eat.

Mr. HOFFMAN of Michigan. I will ask your commander in chief over here, the gentleman from California [Mr. HOLIFIELD]. I thank the gentleman.

Mr. PUCINSKI. Now to show the typical fairness of the Democrats of this House, I am very glad to yield to the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. I thank the gentleman but I was beginning to wonder. May I simply say when you cannot meet an argument head on, then you throw up some wild charges. I would say to the gentleman from West Virginia that there is more coal in the State of Wyoming and probably in a very small part of Wyoming than there is in the entire State of West Virginia, and that I show no partisanship between coal or oil or gas or what-have-you. We are interested in and support both the development of shale oil and the production of hydrocarbons from coal. As far as the charge of campaign contributions is concerned, there have been no campaign contributions that have come this way with any strings attached and I wish every Member of the House could so state, and I think they probably would.

But getting back to the point, nothing has been said by the gentleman from West Virginia or anyone else with regard to the statement contained in the RECORD of August 29, page 18197, relative to the Republican program for research. It was on the way way back in 1946, but that is ancient history. Since that time the Eisenhower administration in 1956 went to the country and the record was certainly approved.

Mr. PUCINSKI. The gentleman does not like us to go back to 1952 and 1953 which he calls ancient history. I think throughout these 2 days of Opera-

tion Veracity I kept hearing one statement made repeatedly which was that it was the Democrats who had failed to act in 1947 and 1948 to strengthen the missile program and put our country in a position of sound strength in this field. In some instances it is ancient history. Apparently it is all right if ancient history helps you but you object when it hurts you.

Mr. THOMSON of Wyoming. The gentleman knows there has been no setback in this carbonization program, coal carbonization, or any other of these programs of that nature. If he has any facts I would welcome their being brought into the argument, but the fact is, I would say to the gentleman, that the gentleman from West Virginia talks about Roswell, Colo., and the oil shale work being stopped up there. The principal research in this field is being carried on at Landy. The operation at Rifle ceased to be a research operation and turned into a mining operation which proved successful. The Union Oil Co. took it over. That being the situation we did not see any use in spending further taxpayers' money on it.

The fact remains that the Subcommittee on Appropriations dealing with Interior and related agencies for the past 2 years in this Congress—and I hope the gentleman from West Virginia is here because I do not recall his appearing before our committee and asking for any increase in coal research funds. The principal work in coal research and oil shale is being conducted at Landy. The subject matter has been handled by the committee in a nonpartisan way. We went ahead with the recommendation in the committee report. I congratulate the Democrats for it. That does not bear out the indictment placed in the Democratic platform.

Mr. PUCINSKI. I believe the gentleman from Wyoming has made his point, and he will understand if I yield to the gentleman from California.

Mr. HOLIFIELD. In the RECORD of August 29, page 18196, my colleague on the Joint Committee on Atomic Energy, Mr. HOSMER, ended his part of the so-called Operation Veracity, and his remarks included the 12 points in which he set forth his viewpoint upon the atomic energy program.

I would like to say that I have been on the joint committee since it was started in 1946. I think I know pretty well what the record is. I know that when we started into the postwar area and we had finished with the increased weapons program we turned to the development of peacetime use of the atom. That was long before the atoms-for-peace program of the Eisenhower administration. Years before that we were seeking new uses for atomic energy in the form of isotopes and other uses.

In Mr. HOSMER'S article which I referred to, he takes a great deal of credit for many of the things that were started back in the days before the Eisenhower administration. I want to call attention to some of them, and I think they will be of benefit to the people who are interested in getting the truth of this matter. I read from this little résumé here some of the things which have happened.

In the first place, they said if we turned atomic energy over to the private industry that they will do the job of bringing electricity to the American people. The majority of the Democrats on the committee thought we were still in the days of research and development, and it was unprofitable for private industry and it took hundreds of millions of dollars to pass through that period of development to the point where we were attaining our goal in electricity. We thought so in 1954, and do so now in 1960. The record proves this is true.

In 1955 Mr. Strauss predicted that the United States would have 2 million kilowatts of atomic power capacity by the end of 1960. In June 1958, Mr. Strauss revised his estimate and said we would have only 400,000 kilowatts in operation by the end of 1960. At one point 3 million kilowatts at the end of 1964. Nothing more has been heard of the 1955 prediction of 2 million kilowatts. It is very doubtful that we will ever be anywhere near that much. We will be lucky to achieve in fact 20 percent of the Eisenhower appointee to the AEC prediction by the end of the year 1960.

In more than 7 years the Republicans have initiated only one power reactor, and that on pressure from the Democrats on the joint committee. This is a small reactor of 66,000 kilowatts, and now they are having trouble over the reactor's location.

Mr. HOSMER referred to the nuclear submarine program and took a great deal of credit for that. The naval reactor program was initiated and placed on a firm basis by President Harry Truman prior to the Republicans taking office. It was under the Truman administration that Adm. H. G. Rickover was appointed and headed up the naval reactor program and it is primarily due to Admiral Rickover's leadership and competence that we have unquestioned world leadership in nuclear powered naval vessels. Far from supporting Admiral Rickover, this administration, until recently, has done what it could to discredit him. It was under the Republican administration that the Department of the Navy proposed to pass over Admiral Rickover for promotion, thus requiring his retirement within a short time. This effort to drive out of the public service one of our most valuable public servants was prevented by the Democrats in Congress.

We told the administration that if they did pass him over we would put a rider on an appropriation bill in the Congress, which would promote him to the next step and keep him in the service for another 5 years. He was kept in the program. We have pushed through the Congress appropriations which will now make it possible for us to have 30 nuclear powered submarines in operation by the time that our authorization and appropriation is extended.

So, it has been the Congress that has been pushing it, it has not been at the administration request. It has been at the request of the Congress and a pushing of a Democratic Congress that this result has been achieved.

My friend spoke about the international atomic energy conference at Geneva. I attended those conferences officially, and I say that the Eisenhower administration has muddled the international atomic energy program. They set up the International Atomic Agency at Geneva. One of our former colleagues, Mr. Cole, is Chairman of it. Mr. Cole came back and protested to members of the committee and protested to the administration that they were cutting the throat of the International Atomic Agency through their bilateral agreements with various countries in the world. They were going to scuttle the International Agency and deal directly with these various governments.

There was very little that the International Atomic Energy Agency could do working against each other in that way, that the International Atomic Energy Agency should not be continued unless it can bring up a program which is a good program, and that is not caught up in bilateral agreements sponsored by the administration.

There have been reactors built during the past 7 years, as Mr. HOSMER points out. There have been large expenditures of Federal funds, but the atomic power program continues to drift without a clear sense of direction or a positive objective. The Republican administration continues to oppose a strong and effective Federal program and the result is that we are far behind where we could be and should be as of the present time.

I might point out that in every year except one we have increased the international appropriation for research and development in the reactor field, sometimes half and sometimes double that which was asked by the administration.

Now, I do not have time to take up all the other points, but I just want to put the truth on the record, and I believe that my statement today will stand on the record as substantiated.

Mr. PUCINSKI. I thank the gentleman. I think everyone in this House who has known the gentleman from California [Mr. HOLIFIELD], and his very sincere, tireless, dedicated service on the Atomic Energy Committee, will certainly agree that the gentleman from California has made one of the really great contributions in trying to help lead this Nation into a field of profound success against tremendous obstacles.

Mr. HOLIFIELD. Mr. Speaker, before I sit down, I want to thank the gentleman for those kind remarks. I ask unanimous consent on the part of my colleague, the gentleman from Connecticut [Mr. BOWLES], who is detained and cannot come to the floor, to insert his remarks in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BOWLES. Mr. Speaker, last Friday the gentleman from Arizona [Mr. RHODES] alerted me that he and several of our other colleagues on his side of the aisle had decided to examine the Democratic platform here on the floor this week.

The fact that they saw fit to refer to their plans as Operation Veracity indicated that their approach to the Democratic platform would not be entirely complimentary.

I must say in all frankness that while I appreciate the gentleman's invitation to come and listen, the fact that it was to the Operation Veracity gave me second thoughts and awakened memories. I had been reading the Republican platform and had been encouraged by its theme "Building a Better America." I had been heartened because both that concept and the Democratic concept of the rights of man seemed to at least put the stamp of approval of both parties this year on the elemental fact that we are entering a new era, at home and abroad, and that hopefully the bickering and bitterness of some previous political campaigns would now at long last be put behind us.

None of us really needs to be reminded of some of those past campaigns for most of us have lived through them and would prefer to forget them.

But Operation Veracity hardly seemed to change the name of the notorious Republican truth squad which huffed and puffed across the country in 1952, dragging its tawdry veracities in the wake of President Truman's campaign special.

Many Americans must have agreed with President Truman's response on Columbus Day, 1952, that there were a good many truth squads in Columbus' time who went around repeating, "The world is flat, the world is flat."

I had hoped that in 1960 we had finally emerged beyond the truth squad stage, and until recently I thought I had good grounds for hope.

All of us who worked on the 1960 Democratic platform were especially conscious of our responsibility to be fair and conscientious. That is why in the short version of the Democratic platform which I read to the national television audience at our convention we deliberately omitted any reference to the word "Republican." That is why, I like to think, the 1960 Democratic platform has earned such widespread acclaim for its constructive tone, an evaluation made, incidentally, by many of our leading Republican newspapers.

That is also why, I am sure, my distinguished counterpart, the chairman of the Republican platform committee, Mr. Charles Percy, said in his press release of Friday, July 15:

> I have studied the Democratic platform carefully. The great value of a political platform is that it provides the basis for wide-ranging discussion of the great issues confronting us as a people. It is one of the most important parts of the educational process in American democracy. * * * Both parties seek a better America. Men of good will seeking identical goals are working hard in both parties to develop our programs for America.

Mr. Percy then went on to raise legitimate questions about the different approaches of our two parties. But the tone was right, the questions were constructive, and the purpose of promoting an intelligent statement of the issues for the American people was clear. I admired Mr. Percy for it.

Many of us who participated in the writing of the Democratic platform also took silent pride in the days that immediately followed its adoption, when it was widely regarded as having had a constructive influence on the Republican Convention deliberations. Indeed, perhaps even Members on the other side of the aisle will forgive me my personal feeling that our platform played a certain role in the midnight talks between the Vice President of the United States and the Governor of New York.

Under these circumstances I am sure that many Republican leaders throughout America will be as discouraged as I am over what now appears to be an irresistible temptation by the Irredentists of the Republican Party to return to their tactics of yesteryear. "Truth squads" and "operations veracity" seem to have an unalterable appeal—usually to those who are most vehement in their overstatements of the partial truths of their own position.

As I glanced through the CONGRESSIONAL RECORDS of the last 2 days, I was struck with what little progress we have really made. The gentleman from Arizona [Mr. RHODES] refers to this campaign as one between the youngsters and the grownups. He talks of new frontiersmanship, just the way the Vice President attempted to sidetrack the foremost economic issue of this campaign by ridiculing it as growthmanship.

The gentleman from Ohio [Mr. AYRES] finds our platform outrageous.

The gentleman from Michigan [Mr. FORD] finds it disturbing and demoralizing.

The gentleman from New York [Mr. DEROUNIAN] finds it full of fabrications.

The gentleman from New Hampshire [Mr. BASS] asks us to apologize.

The gentleman from Wyoming [Mr. THOMSON] accuses us of having a complete lack of faith in free enterprise coupled with plain demagogy and boyish gamesmanship.

The two gentlemen from Wisconsin [Mr. BYRNES and Mr. LAIRD] cannot resist following in the footsteps of the late Senator from their State by depriving us in the Democrat Party of the "ic" which we wish to have at the end of our name.

The gentleman from Missouri [Mr. CURTIS] enlightens us with the following:

> I observe that one of two things is true about this Democratic platform statement that the Republican failure in the economic field has been virtually complete.
>
> Either the statement was an intentional falsehood, or the framers of the Democratic platform picture a new frontier in which there is no prosperity, no individual incentive, no pursuit of personal happiness, but only a superstate all-powerful over miserable individuals and one which is probably at war.
>
> In 1934 Henry A. Wallace wrote a book "New Frontiers."
>
> Apparently, the new frontiers at which the 1960 Democratic platform framers gaze are the depression frontiers of 1934.

And all this remarkable cacophony of McCarthyism and innuendo is summed up by the gentleman from Wyoming [Mr. THOMSON] as a conscientious attempt to focus the light of truth on the current political campaign.

This is the light of truth as seen by that long line of soothsayers who stretch from Murray Chotiner to Senator SCOTT. I am perfectly prepared to believe that our colleagues here, like some others in their party, have again been victimized by that long line of petty researchers and small-minded ghostwriters who glory in scoring or misscoring debater's points down at the Republican National Committee.

Some 27 pages of the CONGRESSIONAL RECORD have now been devoted to their new operation on the truth. Let me select, more or less at random, just a few matters for comment:

First. The gentleman from Arizona [Mr. RHODES] reports that the topic sentence of the following Democratic platform paragraph is in error:

> Over the past 7½-year period, the Republicans have failed to balance the budget or reduce the national debt. Responsible fiscal policy requires surpluses in good times to more than offset the deficits which may occur in recessions, in order to reduce the national debt over the long run. The Republican administration has produced the deficits—in fact, the greatest deficit in any peacetime year in history, in 1958–59—but only occasional and meager surpluses. Their first 7 years produced a total deficit of nearly $19 billion.

The gentleman suggested we revise the first sentence to read, as follows: "Over the past 7½ years, the Republicans balanced the budget in fiscal years 1956, 1957, 1960, and 1961."

If we are to go in for revisions, I suggest that the gentleman's revision be revised, as follows: "The Republicans balanced the budget in fiscal years 1956, 1957, and 1960 with a total surplus of $4.3 billion. They left a deficit in fiscal years 1954, 1955, 1958, and 1959 totaling $22.5 billion. The total deficit over the last 7½ years has thus been $18.2 billion."

Our platform refers to a total deficit of "nearly $19 billion" based on the 1960 estimates of $1 billion surplus for fiscal year 1960 available on July 12 when our platform was adopted. On July 20 the figure of a $1.1 billion surplus for fiscal year 1960 was first released.

Second. The gentleman from Wisconsin [Mr. BYRNES] has called our attention to the platform statement that the Republicans years of power "have consisted of two recessions, in 1953 and 1954 and 1957 and 1960, separated by the most severe peacetime inflation in history."

He is concerned about the dramatic price rises immediately after World War II, which were caused by Republican insistence on removing our wartime price controls. As Price Administrator and Economic Stabilizer during and immediately after World War II, I can assure the gentleman that most experts consider it both reasonable and generous not to include the March 1946 to March 1947 period as part of our peacetime economic history. On the other hand the years of Republican inflation from 1955 to 1956 were 2 years removed from the Korean war and far removed from price control.

Wholesale prices, whose fluctuations are a better measure of inflation than those of consumer prices, rose about 24 percent between 1945 and 1947. Before the end of the Truman administration,

these prices decreased—during 1951 to 1953—only to rise again under the next Republican administration.

Third. Let me turn quickly to national defense. The gentleman from Michigan [Mr. FORD] denies that our conventional military forces have been dangerously slashed.

Yet throughout the years of the Eisenhower administration these cuts have continued, recently falling most heavily on our ground strength for fighting limited and conventional aggression. Our divisions were first reduced to 18 in spite of the pleas of Democratic Members of Congress for a force of at least 19. Progressively the cuts have gone on. From 20 divisions to 18; from 18 to 16; from 16 to 15. And now our ground forces stand at 14 combat strength divisions.

The gentleman challenged me to produce the administration statements which admit that our conventional military forces have been slashed for reasons of economy. Here are a few:

Gen. Matthew B. Ridgway, Chief of Staff of the Army during the Eisenhower administration, has stated that the first three Eisenhower defense budgets "were not primarily based on military needs. They were squeezed within the framework of preset, arbitrary manpower and fiscal limits."

Gen. Maxwell Taylor, also a Chief of Staff during the Eisenhower administration, wrote in Look magazine on December 22, 1959:

> Budget making has been allowed to control strategy although the defense budget is developed in such a way that no one really knows how much combat power the United States is getting for its dollar. * * * The budget makers have become the real strategy makers. Military programs needed to implement our policy can be made or broken by those who decide how to spend the military dollar. Unfortunately, the decisive power is in the hands of men who are not strategists, but rather fiscal experts.

The gentleman from Wisconsin [Mr. LAIRD] told us yesterday: "We have never been in a position where the Polaris program has lacked for funds at any time during this administration."

But the reason there was never any lack of funds was precisely that more funds were appropriated by the Democratic Congress than the administration was willing to use. We all know that we have lost a full year in the construction of three Polaris submarines, delayed from fiscal year 1959 to fiscal year 1960 by a Bureau of the Budget decision to freeze funds appropriated by Congress for this specific purpose over and above the administration's request.

Fourth. Lastly let me refer to some of the statements we have heard on subjects of interest to our American farmers. Take our rural electrification plank as an example.

The gentleman from Wisconsin [Mr. LAIRD] suggested that the Democratic platform was in "bad need of facts" when it stated that—

> The Democratic Congress has successfully fought the efforts of the Republican administration to cut off REA loans.
>
> It—
>
> The Republican administration—
>
> has sought to cripple rural electrification.

We all know that the Republican administration adopted a policy of no new starts on hydroelectric dams, and we have had none except for those projects initiated at Democratic insistence. The result has been to cut off a new supply of abundant low-cost wholesale power. Anyone who looks at the wholesale power rate map the co-ops have drawn up will see the effects of this policy on the power costs which the co-ops must pay and pass on to their members.

We all know that Republican policy has deliberately raised interest rates and has annually tried to limit severely the amount of REA loan funds available, despite the fact that these co-ops have a perfect record of repaying these loans with interest. In the years from 1953 through 1960, the administration requested a total of $1,149.3 million in REA electric loan funds. The Democratic Congress forced through additional appropriations, raising the aggregate total to $1,815 million. That is more than a 33-percent increase forced through by a Democratic Congress—and the record shows that it was needed.

In the meantime the Eisenhower administration would have done away with the REA if its legislative proposals had been accepted, according to Senator GEORGE D. AIKEN, of Vermont, the senior Republican on the Senate Agriculture Committee, in a statement reported by the UPI on May 22, 1959:

> Senator GEORGE D. AIKEN, Republican, of Vermont, accused Agriculture Secretary Benson today of an attempt to put American farmers "still more under the thumb" of giant banking and corporate interests.
>
> AIKEN, senior Republican on the Senate Agriculture Committee, said he would do all he could to block Benson's proposal to create a bank to replace the U.S. Treasury in financing of rural electric power and telephone systems.
>
> Benson made the proposal in a speech at Cedar Rapids, Iowa, last night.
>
> AIKEN, in a Senate speech, said the Benson plan was an attempt to do away with the Rural Electrification Administration. * * *
>
> AIKEN said Benson's proposed bank would force possibly one-third of the REA cooperatives to give up the ghost and sell out to the utility interests.

Mr. Speaker, I could go on at length, but I prefer to close. I know that several of my colleagues have things to say. Let me add just this:

Today is August 31 and there are only 69 days left until the election. The Democratic platform attempted to address itself to the real questions which face the American people. They are not questions that invite further displays of politics as usual. They invite serious, constructive debate. They are questions like these:

How can we build defense forces of sufficient strength and flexibility to deter aggressions of all sorts, large or small?

How can we at the same time elevate arms control to a new position of equal priority so that an arms race will not once more lead to unlimited catastrophe?

How can we speed up our national rate of economic growth on which our policies both at home and abroad so directly depend?

How can we provide that delicate balance of national and local leadership which will enable us to move ahead effectively in the great moral effort to assure equal right to all Americans?

The themes of our two platforms this year are both addressed to these goals. Most Americans are, I hope, ready to enlist in the cause of building a better America not a more bitter one. Likewise we are all, I hope, dedicated to the implementation of the rights of man.

If this is indeed a critical election, as I think both parties agree, I earnestly hope that it can be conducted from now on in a manner befitting the solemnity and importance of the hour. I can think of no better note on which to conclude these remarks, which will be my last in the House of Representatives.

Mr. PUCINSKI. Mr. Speaker, I hope that the architects of Operation Veracity who have made a strong point of the fact that the gentleman from Connecticut [Mr. BOWLES], chairman of platform committee of the Democratic Party could not be here during their exercises, will take the trouble to read his remarks. I have seen them. It is unfortunate that he cannot be with us here this evening, but I hope that they will read that statement, because I think they will find many of the answers they have raised.

Mr. Speaker, I now yield to the gentleman from Wisconsin [Mr. REUSS].

Mr. REUSS. Mr. Speaker, I want to congratulate my colleague, the gentleman from Illinois [Mr. PUCINSKI] for the leadership he is showing here this evening on the reexamination of Operation Veracity. I am not sure I know what Operation Veracity proves, but it does seem to me, Mr. Speaker, that it proves conclusively one thing, and that is that its authors and architects just have not learned to read the footnotes. Take one of the big issues which Operation Veracity purports to make. In the Democratic platform it is set forth, and I think it is a modest and true statement, and I quote: "Republican failure in the economic field has been virtually complete."

Now, Operation Veracity attempted to answer that Democratic platform plank by pointing out—and here I quote from Operation Veracity—that "Financial assets of individuals increased more than 2½ times from $373 billion at the end of 1952 to $956 billion at the end of 1959." Well, to accept this naked statement sounds indeed as if the Republican Party had done wonders during the last 8 years. However, what Operation Veracity did not include was the footnote to that statistical statement in the President's Economic Report of January 1960, which footnote says: "Data prior to 1954 do not include individual holdings of corporate securities and therefore are not comparable with subsequent data."

So, Operation Veracity was comparing apples and oranges and this particular assertion becomes quite meaningless. It is too bad that the authors just did not look at the footnotes. It is too bad, too, that they do not look at the subborn facts of our economic life; the fact that

there are today in this country more than 4 million unemployed; that is, more than 5 percent of our American labor force; that today nearly 8 million family units are living on less than $2,000 a unit per year; that farm income continues to decline and has decreased 23 percent under the Republican administration.

That steel production——

Mr. PUCINSKI. Mr. Speaker, if the gentleman will permit me to interrupt for a moment, the gentleman should be extremely careful in reciting these indisputable facts because during the debate on Operation Veracity, whenever those of us on this side cited those very tragic statistics, we were immediately tagged "prophets of doom and gloom." The Republican Party has never wanted to face up to the facts.

Mr. REUSS. Yes. This is a charge hurled at all of us on the floor of this House and elsewhere who have chosen to inform the American people of some of the problems facing us in the economic sphere and to make constructive suggestions for meeting them.

I think the problems of this country in the economic field will not be solved by sweeping them forever under the sofa. They must be examined. Constructive solutions must be proposed. That is precisely what the Democratic platform does.

Mr. Speaker, I appreciate the opportunity granted me by the gentleman from Illinois to participate in this discussion. I would commend to all who choose to read in the CONGRESSIONAL RECORD the debate going on by the adherents of the Democratic and Republican platforms the particular point I made, that it would be a good thing for the authors of Operation Veracity to read the footnotes in the President's own economic reports.

Mr. PUCINSKI. I am sure all fair-minded Americans will be grateful to the gentleman from Wisconsin for his contribution this evening.

Mr. Speaker, at this time I should like to yield to the distinguished gentleman from Illinois, my colleague on the Atomic Energy Committee, Mr. PRICE.

Mr. PRICE. Mr. Speaker, I should like to compliment and congratulate my colleague from Illinois for the service he is rendering in making this presentation possible here tonight. We have considerable time while we are waiting for the final conclusion of this session of Congress and this is a good way to spend it, to set the record straight.

I have had the opportunity to be on the floor through much of Operation Veracity. During yesterday's session I, through the kindness of the Member on the other side who handled that debate, the gentleman from Arizona [Mr. RHODES] was able to get into part of it. I attempted to reply to some of the questions asked by the gentleman from New Hampshire [Mr. BASS]. But I was then at some little disadvantage because I had had no previous warning of what the substance of his statement would be. He asked many questions in his prepared presentation. I was able, even without advance warning, to supply him answers to many of his questions.

He asked, for instance, if anyone could name anyone in high position in the Republican administration who made any assertions as to the position of the United States versus the Soviet Union in the space program. Offhand I was able to give him the names of two high administration officials who subsequently resigned because of disagreements, and because of their feeling that budgetary restrictions had placed us at a disadvantage in our space and military programs.

In the meantime I have been able to search through various publications, through some congressional hearings, and I have come up with a number of names of people high in the Republican Party who have been disturbed at the inadequacy of the administration's program of research and development, both in the space program and in our military program.

For the edification of those who participated in Operation Veracity I ask unanimous consent at this time to include in the RECORD at this point my full compilation in reply to the questions asked by the gentleman from New Hampshire [Mr. BASS] and others who participated.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

(The matter referred to is as follows:)

THE GREATEST DEBATE: IS THE UNITED STATES BECOMING A "SECOND BEST" MILITARY POWER?

Background

For the first time in the proud history of our country, responsible military and civilian leaders are sounding solemn and repeated warnings that a hostile foreign nation may soon be able to threaten our very national survival, while we lack sufficient retaliatory power effectively to deter such threats. They see the next few years as a time of gravest national danger. They call for an all-out effort to increase our military strength before it is too late.

At the same time, President Eisenhower, Vice President NIXON and our top official military authorities are giving flat assurances that our military strength is adequate to any challenge; that there is no serious threat to continued peace and prosperity; that no special or additional effort is called for.

This difference in view certainly involves the highest stakes of any question which has ever divided our Nation's leaders. Even the grave issues at stake in the Civil War or in World Wars I and II did not involve possible threats to the basic survival of our country.

With this "greatest debate" resounding daily in newspapers, magazines, books, and speeches, most ordinary Americans are understandably concerned and confused. We are in much the position of a man in the prime of life listening with increasing horror while two groups of doctors hotly discuss whether or not he has a serious disease which is likely to be fatal unless he quickly and drastically changes his current pleasant way of living. There is every urge to believe the hearty cheerful doctors who say he's in good shape, and to dismiss as alarmists the other group of doctors who diagnose a serious ailment. But what if the cheerful doctors are wrong? What if their optimism is simply based on professional unwillingness to admit their earlier treatment has been inadequate? What if he finally finds out that the more pessimistic diagnosis was right—only when it is too late to begin the necessary corrective action? Isn't it better to err on the side of caution in such a case?

I. IS THERE A MISSILE GAP?

A. Background facts

The latest, most powerful, and dangerous weapon of warfare is the ballistic missile with a nuclear warhead. This missile is being made today by the United States and by the Soviet Union in two types, the intercontinental (ICBM) with a range of more than 5,500 miles and the intermediate range (IRBM) which can travel more than 1,200 miles.

The United States at present has one type of ICBM—the Atlas—in operational position. Our total current operational force is reliably reported to be "less than a handful" and these are in exposed bases. In the IRBM range, our total current operational force consists of a few dozen Thor missiles in the United Kingdom. By the end of 1960 the United States hopes to have two nuclear submarines armed with Polaris missiles in operation, with others following in 1961 and 1962. The Minuteman, a "second generation" solid fueled ICBM to operate from hardened bases, is in advanced stages of research and development.

It is uniformly agreed that the Soviet Union currently has more powerful rocket engines at its disposal than does the United States. The number of Soviet ICBM's currently in operational position is believed to be at least three times as many as the United States has and this disproportion is expected to continue at least through 1962. In addition the U.S.S.R. is believed to have hundreds of IRBM's in operational positions.

Current debate in this area bears not so much on the existence of a missile gap as on its significance, and whether we are making sufficient efforts to overcome it.

B. The official view

President Eisenhower: "There has been no place that I can see where there has been any possibility of gaps occurring" (Aug. 27, 1958).

"Today the so-called missile gap is being rapidly filled" (Oct. 20, 1958).

"We are rapidly filling the gap that existed; and in some ways I think that our scientists have already achieved what we would call even more than equality, particularly in types and kinds, even if not in numbers" (Oct. 21, 1958).

"The so-called missile gap of 6 years ago is speedily being filled" (Oct. 22, 1958).

"Our military missile program, going forward so successfully, does not suffer from our present lack of very large rocket engines, which are so necessary in distant space exploration. I am assured by experts that the thrust of our present missiles is fully adequate for defense requirements" (Jan. 20, 1960).

C. Other views

Former Secretary of Defense, Neil H. McElroy, after public challenge from Senator SYMINGTON, reluctantly conceded in a public news conference early in 1959 that the Soviet ICBM's lead in ICBM's would grow to a 3-to-1 advantage in a few years compared to the U.S. position.

Secretary of Defense, Thomas S. Gates, Jr., in testimony before a House subcommittee on January 13, 1960, admitted that a small missile gap will exist during the next 3 years, having also testified that his predecessor had announced the 3-to-1 ratio.

Senator THRUSTON MORTON, chairman of the Republican National Committee: "We are behind in missiles—let's face it. We didn't do the research when we should have—but forget that—it's on the conscience of the American people. I guess, I for one, didn't get up and make a speech when I should have, and did not vote for an appropriation when I should have" (Feb. 16, 1960).

Lt. Gen. James M. Gavin, former Chief of the Army's Research and Development: "We are now entering a missile-lag period in which the Soviets will have a steadily in-

creasing ICBM striking capability which we will be unable to match for several years. We are in mortal danger and the missile lag portends trouble of a serious nature" (August 1958).

Gen. Maxwell D. Taylor, former Chief of Staff, U.S. Army: "We are now threatened with a missile gap that leaves us in a position of potentially grave danger" (Nov. 24, 1959).

"Having a well-developed skepticism toward information tending to inflate the strength of an enemy, I have been slow to accept the reality and the significance of the so-called missile gap. Reluctantly, I have concluded that there is indeed such a gap, which, in combination with other factors, has a most significant bearing upon our military security" ("The Uncertain Trumpet," 1959).

The New York Times: "The Soviet Union will have at least 150 ICBM's in operational readiness in 1961, according to the latest intelligence estimates of the United States. If the estimates are correct, the Soviet Union will have at least a 3-to-1 superiority over the United States in intercontinental missiles. In the coming year, the United States will have fewer than 50 ICBM's ready to fire" (Feb. 2, 1960).

Walter Lippmann: "The controversy about defense arises from the fact, which nobody denies, that the Soviet Union is several years ahead of us in the production of missiles and in the exploration of outer space. The Russians have more missiles. They have bigger missiles capable of carrying bigger loads and they are far ahead in the whole art of guidance of missiles. * * * The real situation, which is the source of our peril, is that because in this vast field [missiles] the Soviet Union has gotten its research and development effectively organized, and because the Soviet Union is allocating to it all the resources that it requires, the gap is not becoming narrower, it is becoming wider. Not only did they have a head start but they are now running faster" (Feb. 2, 1960).

Des Moines Register: "No official has denied that Russia is several years ahead of us in this area of accomplishment (ICBM's and powerful rocket engines). It is this lead or advantage that weakens the claims of confidence and superiority President Eisenhower makes for the immediate present. It gives strength to the critics of the administration's defense program so far as to what the future may hold" (Feb. 4, 1960).

Senator STUART SYMINGTON, former Secretary of the Air Force, has led the Democrats in emphasizing that there is an increasing and strategically serious missile gap. He has said: "The facts are that a very substantial missile gap does exist and the administration apparently (will permit it to) increase" (Jan. 27, 1960).

II. IS THERE AN OVERALL DETERRENT GAP?

A. Background facts

The overall defensive strength of the United States and our ability to deter aggression clearly depend on our total military power relative to that of the Soviet Union, rather than on relative strength in any one type of weapon, even one as important as ballistic missiles.

Current discussion in this area reflects general agreement that as of now the United States disposes of military power which is extremely strong, probably more or less on a par with that of the Soviet Union, and probably adequate to inflict unacceptable retaliatory damage on any enemy who might attempt major aggression.

The areas of disagreement are whether our current retaliatory strength is dangerously exposed and whether, given present relative rates of increase in overall strength, the United States may not in the next few years be confronted with a preponderance of Soviet military power which changes the present strategic balance in a manner which could endanger our national survival.

B. The official view

"The President was asked whether he might not be at a disadvantage in talks with Premier Khrushchev because of the prospects that the United States would be second best in the missile field. President Eisenhower replied that he would enter the negotiations with 'no feeling of inferiority' and that he was not 'a little bit frightened' or in the 'slightest degree disturbed'." (New York Times, Jan. 14, 1960.)

"We have created a great deterrent strength—so powerful as to command and to justify the respect of knowledgeable and unbiased observers here at home and abroad" (Feb. 21, 1960).

Vice President NIXON: "There is no part of our record of which we are more proud than in the area of national security. * * * It is time to quit selling America short. We are not a second-rate country, with a second-rate military strength and a second-rate economy. * * * No aggressor in the world today can knock out the deterrent striking power of the United States and its allies. This is the case today and it will continue to be so in the future" (Jan. 27, 1960).

"Engaging in a numbers game in which we compare the numbers of missiles, airplanes, submarines, or carriers we have with those possessed by our potential opponent is a completely fallacious method of determining whether we have the strength we need" (Feb. 8, 1960).

Secretary of Defense Gates: "The impression that the Soviet Union has outdistanced [us] * * * is not supported by the facts. There is no deterrent gap. * * * It is the conclusion of those who have analyzed the matter that even a surprise attack by all the missiles the Soviets could muster would not suffice to destroy enough of our retaliatory strike forces to enable (the enemy) to make a rational decision to attack" (Jan. 13, 1960).

Dudley C. Sharp, Secretary of the Air Force: "We are producing as many missiles as we think we need for a sensibly balanced program. * * * There is no overall deterrent gap" (Jan. 24, 1960).

Gen. Nathan Twining, Chairman of the Joint Chiefs of Staff: "I do not believe any nation today or in the foreseeable future has the military power to destroy us or to attack us without receiving unacceptable destruction in return" (Feb. 9, 1960).

Gen. Lyman Lemnitzer, U.S. Army Chief of Staff: "Assuming that we carry out military progress at the present rate, we will have the capability of deterring general or limited war for the next 2 or 3 years" (Feb. 4, 1960).

C. Other views

Gen. Thomas S. Power, head of the Strategic Air Command: "With only some 300 ballistic missiles (half ICBM and half IRBM) the Soviets could virtually wipe out our entire nuclear strike capability within 30 minutes" (Feb. 2, 1960).

(NOTE.—The President the following day spoke of this as a "parochial viewpoint.")

Joseph Alsop, well-known columnist (commenting on an earlier speech of General Power's in which his estimate of 150 ICBM's as the Soviet requirement appeared): "The number is not large. It is, for example, only 10 months of the production capacity of our own Atlas ICBM plant, if the Atlas production line were working on a three-shift basis instead of a business-as-usual basis" (Jan. 26, 1960).

"How can anyone be so sure that Nikita S. Khrushchev was lying in late 1958 when he stated that Soviet ICBM's were already 'in serial production'? How prove that he was deliberately misleading, more recently, when he seemed to say that a single Soviet factory had turned out 250 ICBM's last year? If he was telling the truth, Khrushchev must now have at least 150 operational ICBM's" (Jan. 28, 1960).

Maj. Gen. John B. Medaris, former chief of the Army Ordnance Missile Command: "I do not think the United States is in a defenseless situation today (but) if we do not change our approach to things, the future is going to be worse 5 years from now" (Feb. 18, 1960).

The Gaither report (a study made by leading experts in 1957): "It portrays a United States in the gravest danger in its history. It pictures the Nation moving in frightening course to the status of a second-class power. It shows an America exposed to an almost immediate threat from the missile bristling Soviet Union. It finds America's long-term prospects one of cataclysmic peril" (reported in Washington Post, December 1957).

The Rockefeller Brothers Fund, Inc., a report: "The possibility cannot be ruled out that the Soviet leadership, if it secures a clear superiority in the arms race, will use this advantage to blackmail or to attack its major opponent without warning. That possibility must at all costs be forestalled. * * * Under present conditions, and for as long as necessary, the strength of the Western deterrent must be maintained, with clear realization that this cannot be done easily or once and for all. * * * The underlying basic Soviet danger (of expanding Communist power and isolation of the United States) has not been as well understood in the United States as it should be. Certainly the situation will not be changed by a lull in the crises which have served to keep the United States awake" (December 1957).

Mr. Khrushchev "reiterated that the Soviet Union was the 'most powerful country in the world from the military standpoint'" (New York Times, Mar. 2, 1960).

III. IS THERE A LAG IN SPACE EXPLORATION?

A. Background facts

The Soviet Union startled and impressed the world when it successfully orbited the first earth satellite in 1957. The Soviets have continued to score important firsts in this challenging area. The United States also has made some important advances in this field, despite some disappointing failures.

Two Soviet achievements in space exploration in 1959 served to focus further public attention on the status of the U.S. program. The Russians sent a rocket to the moon; another rocket enabled them to photograph the far side. These dramatic successes brought a critical examination of American efforts.

The superior thrust of Soviet rockets—600,000 to 800,000 pounds against the 350,000-pound thrust of our Atlas ICBM—is considered the principal reason for the Soviet space lead. Our Saturn rocket will have a 1½-million-pound thrust, but 2 or 3 years will elapse before this rocket becomes operational.

B. The official view

President Eisenhower (speaking with regard to the Soviet Union's launching of Sputnik I in October 1957): "It does not raise my apprehensions, not one iota.

"Now, for the life of me, I cannot see any reason why we should be using or misusing military talent to explore the moon" (November 1959).

C. Other views

General Medaris: "Unfortunately we already are second rate in space. No one will even argue that point any more" (Missiles and Rockets magazine, Feb. 1, 1960).

(Note: In the same issue General Medaris described President Eisenhower's contention that the Armed Forces have no business in exploring space as utter nonsense.)

Ernest Stuhlinger, Director of the Army Research Projects Laboratory at Redstone

Arsenal, Huntsville, Ala.: "We are in a meager second place, everywhere in space" (Feb. 3, 1960).

Clarke Newlon, executive editor of Missiles & Rockets: "There is an almost universal feeling * * * that the Nation's space program is at present on dead center; that the present administration fails to recognize its importance; that we have no real space plan; that no significant action will be taken until we have a new head of Government" (Dec. 14, 1959).

Walter Lippmann: "The deep weakness in the administration's position is not that we cannot deter the Soviet Union in 1963. It is that in the general field of rockets and the exploration of space we are not even holding our own. We are falling behind" (Jan. 28, 1960).

The Atlanta Constitution: "President Eisenhower's assurances that all's well with U.S. missiles and space program, and his rebuke to generals and others who say it's not so, add more uncertainty to the already confused public mind" (Feb. 4, 1960).

"Dr. Wernher von Braun said today that the United States would not overtake the Soviet Union in the space race for several years "despite the accelerated development of superthrust rockets" (reported in New York Times, Feb. 2, 1960).

New York Herald Tribune: "The U.S. space effort is still hamstrung by inadequate financing, by divided authority, by lack of a clear affirmation of national purpose. * * * We are second, and not even second among equals; we still are getting there—into space—latest with the leastest" (Jan. 6, 1960).

Aviation Week: "Each step in the unbroken chain of Soviet space pioneering achievements has indicated that their lead in this field is increasing with the passing of time. Despite all of the official drum beating from the White House, Pentagon, and National Aeronautics and Space Administration aimed at convincing the American people that we are catching up with the Soviets, the sad record of achievements indicates we are still losing ground" (Nov. 2, 1959).

IV. HAS THE U.S. SUFFERED A SIGNIFICANT LOSS OF WORLD PRESTIGE AS A RESULT OF RECENT SPACE AND MISSILE DEVELOPMENTS?

A. Background facts

The dramatic Soviet achievements in developing missiles and in exploring space during the past 2½ years have been acclaimed throughout the world. Our own progress in these fields, while substantial, suffers by comparison.

The Russians have pressed to the full the propaganda advantages which have accrued. Many people believe that their successes have damaged U.S. prestige.

B. The official view

President Eisenhower was asked a question about catching up with Russia in the field of exploration "in view of the international prestige at stake." Replying to the specific question whether he did not feel it was at stake he said: "Not particularly, no" (Jan. 26, 1960).

C. Other views

George V. Allen, Director of the U.S. Information Agency: "The achievement of placing in orbit the first earth satellite increased the prestige of the Soviet Union tremendously, and produced a corresponding loss of U.S prestige, due primarily to the contrast" (Jan. 22, 1960).

Hanson W. Baldwin, New York Times military analyst: "The Russians got to the moon first; they preceded us into solar space; they put the first living thing in orbit, and hence, in the area of international psychology and politics they are far ahead in the establishment of prestige. * * * The global damage * * * done to the U.S. prestige is incalculable, but there is no denying it has been immense" (Jan. 17, 1960).

The Milwaukee Journal: "The men delegated to keep tabs on the Nation's oversea prestige say it is suffering because of a national lag in space exploration. The President blandly says that our prestige isn't at stake at all. To say the least, this makes for confusion. To say the most, it appears that President Eisenhower is not much worried about whether the Nation is second best in the space age (Feb. 1, 1960).

The Washington Post (dispatch from Leipzig, East Germany): "Important is a subsurface change that has been caused by the shift in the world balance of power since the first Soviet sputnik, 2½ years ago. The idea seems to be gaining ground among the East Germans that the Soviet Union rather than the West may represent the wave of the future whether one likes it or not. This has produced a certain inclination to make one's personal peace with the Communists" (Mar. 1, 1960).

Dr. George B. Kistiakowsky, science adviser to the President: "I need not discourse on the scientific and technological contest with the Soviet Union which today involves our national prestige, and tomorrow, perhaps, our very survival" (Feb. 13, 1960).

V. ARE WE PROPERLY USING OUR INTELLIGENCE ESTIMATES?

A. Background facts

The key factor in determining the adequacy or inadequacy of our defense is, of course, our strength relative to that of the Soviet Union. Our knowledge of Soviet strength is estimated on the basis of carefully compiled and analyzed intelligence information. Intelligence work recognizes two major ways of making such estimates: to evaluate enemy strength in terms of his capabilities—i.e., the most he could do with the resources he has; or in terms of his intentions—i.e., what, on the basis of all known evidence, we believe he will do or has done with the resources he has. The first is the more conservative basis and has traditionally been the primary guideline of U.S. intelligence judgments.

However there has recently been an indication of a change in U.S. policy toward reliance on the second approach.

B. The official view

Secretary of Defense Gates: "Figures (of Soviet ICBM output) that have been testified to in years past * * * were based on Soviet capabilities. This present one is an intelligence estimate of what we believe (the Soviet) will probably do, not what (the Soviets are) capable of doing" (Jan. 20, 1960).

C. Other views

Brig. Gen. Thomas R. Phillips, retired (after citing a number of examples of enemy change of plans): "So much for intentions, or what the opponent probably will do. He can change his mind overnight; and no matter how solid the information you may have today, it can be a trap tomorrow" (Reporter magazine, Feb. 18, 1960).

Joseph Alsop: "The national intelligence estimates may be correct to the last decimal. Pray God they are. But they may also be wrong by a considerable margin. If the estimates of the Soviet ICBM's are wrong, even by a very narrow margin, the error can be fatal. Basically, therefore, it is not merely foolish, it is really criminal to use the national estimates as precision instruments which show how little we need to do. Common prudence demands insurance against error in the ICBM estimate. The national interest demands measures, such as the airborne alert, to end the total vulnerability of the American deterrent. And sound practice demands that the use of mere estimates as precision instruments be abandoned and condemned, as wholly pernicious and improper" (Feb. 10, 1960).

Senator JOHN F. KENNEDY: "I think the administration, the President, reached his judgment in good faith and he's not going to play with the security of the United States. But I think it's extremely difficult to make a correct assessment with precision as to what a dictatorship is doing.

"Therefore I should err on the side of safety. Men who have the same information as the President—Power, Ridgway, Gavin, and Taylor—come to the exact opposite conclusion. If we're moving in a position of peril, I would err on the side of caution" (Feb. 21, 1960).

VI. HAS OUR MILITARY POSITION BEEN WEAKENED BY GIVING PRIORITY TO BUDGET CONSIDERATIONS?

A. Background facts

The Eisenhower-Nixon administration came into office promising substantial cuts in all Government expenditures, including defense. "More bang for the buck" was a well-publicized campaign slogan. Defense expenditures were in fact sharply curtailed—from $43.6 billion in fiscal year 1953 to a low of $35.5 billion in fiscal year 1955. Such expenditures have gradually been increased again since 1955, reaching $40.9 billion in fiscal year 1960. Meanwhile, however, other Government expenditures were increasing even more sharply so that defense has represented a generally decreasing portion of the total Federal budget—from 58.8 percent of the total in fiscal year 1953 to 51 percent in fiscal year 1960. Similarly our defense expenditures have represented a decreasing proportion of our total gross national product—from about 12 percent in 1953 to 8.5 percent in 1959.

Many thoughtful people have raised serious questions as to whether these cutbacks in total and relative defense expenditures have been wise in a period in which military technology has been changing rapidly and weapons systems have become increasingly costly, while the Soviet Union has greatly increased its military power.

The administration has often denied that any necessary or desirable military expenditures have been withheld for budgetary reasons. Yet there is mounting evidence that the limits on our defenses have frequently been more related to an administration concept of what the Nation could afford than in terms of objective judgments of the defense we need.

B. The official view

President Eisenhower (at his news conference on February 17, 1960) was asked if any money had been withheld from any needed weapon. The only answer he gave in addition to stressing the policy of adequacy was: "I get tired of saying that defense is to be made an excuse for wasting dollars. I don't believe we should pay 1 cent for defense more than we have to."

Senator LEVERETT SALTONSTALL speaking on the status of our national defense: "Certainly there is no intention on the part of the President of the United States or any of the officials in the Pentagon to mislead the citizens or Members of Congress as to the military strength we have or as to the military strength we should have in the future. Certainly there is no intent, as the President of the United States has said with great emphasis, to put budget balancing above the national security" (Feb. 19, 1960).

C. Other views

Gen. Maxwell D. Taylor: "Budget making has been allowed to control strategy although the defense budget is developed in such a way that no one really knows how much combat power the United States is getting for its dollar. * * * The budget makers have become the real strategy makers. Military programs needed to implement our policy can be made or broken by those who decide how to spend the military dollar. Unfor-

tunately, this decisive power is in the hands of men who are not strategists, but rather fiscal experts" (Look magazine, Dec. 22, 1959).

"We must prepare for personal sacrifice in giving up luxuries and paying more taxes. * * * Bluntly I am talking about a military budget of from $50 to $55 billion a year for the next 5 years, instead of today's $41 billion" (Look magazine, Jan. 19, 1960).

Joseph Alsop (deploring the President's giving expense as a reason for a nuclear test ban): "Surely this singular choice of reasons for a high policy decision of truly immeasurable import, reveals a mind gripped by one idea to the point of total obsession. Surely it shows a man driven by a single purpose almost to the point of mania. * * * If you think about a nuclear test ban primarily in terms of possible budget cuts, how do you think about a missile gap? You think about it, the answer seems to be, primarily in terms of the threat to the budget, and hardly at all in terms of the threat to the United States" (Feb. 8, 1960).

The Raleigh News & Observer: "President Eisenhower may be the absolute exception but in history the most mistaken men in the conduct of nearly every new war have been the old soldiers who learned their ways and did their fighting in past ones.

"The changes in war and weapons since Eisenhower was in command in World War II have come at a greater rate than at any other time in the history of human conflict.

"Furthermore in his 70th year the President's preoccupation with defense has clearly become more fiscal than military" (January 1960).

Gen. Thomas R. Phillips: "But the evolution of U.S. military policy has been held back by budgetary fixation on the 'New Look' strategy of sacrificing a flexible military organization to a single weapon for massive retaliation and by jealousies among the three service empires. The result today is that the U.S. forces are not suited to our needs and that the United States in the past 6 years has fumbled until Khrushchev could say confidently: 'Now it is clear that the United States of America is not the world's most powerful military power'" (Reporter magazine, Feb. 4, 1960).

Chalmers M. Roberts: "The problem in Washington is one of attitude. It is an attitude which attempts to comfort those at home who are alarmed at the military slippage by talking about 'balanced forces' and about not competing with the Russians 'missile for missile.'

"It is an attitude toward the other free nations of the world which the United States professes to lead in the East-West struggle, an attitude in which budget balancing and the sanctity of the dollar appear supreme" (The Washington Post, Jan. 6, 1960).

Hanson W. Baldwin: "Closely circumscribed dollar guidelines have clearly inhibited and slowed this country's exploration of space. Moreover, they promise to continue to do so, despite our past disappointments" (the New York Times, Jan. 17, 1960).

VII. ARE THESE APPROPRIATE SUBJECTS FOR PUBLIC DISCUSSION?

A. Background facts

The Eisenhower-Nixon administration has obviously been embarrassed by the mounting public concern over shortcomings in our defense program. The President and the GOP are particularly sensitive to criticism in this area, since major emphasis in the 1952 and 1956 elections was placed on Eisenhower's great knowledge and ability in the defense field. Once again "peace" has been billed as the top campaign appeal of the GOP for 1960.

In this situation the administration has sought to silence critics by implying that our defense position is not a suitable subject for public discussion. Reviving the GOP treason charge techniques of 1952 and 1956, they have even sought to imply that such critics are disloyal or guilty of giving aid and information to a potential enemy.

Thoughtful observers have been disturbed by this attempt to silence sincere questioning in an area that goes to the very heart of public policy.

B. The official view

President Eisenhower (exchange in press conference):

"Question: Sir, there seems to be sort of an attitude of kissing off defense adequacy. * * * Your Republican leaders seemed to think any question of adequacy here is partisanship.

"The PRESIDENT: I've spent my life in this and I know more about it than almost anybody, I think * * * those people that are trying to make defense a partisan matter are doing a disservice to the United States" (Jan. 14, 1960).

Vice President NIXON: "One of the strengths of a free society is that our policies are submitted to constant, searching criticism by those who disagree with them. Criticism can become destructive, however, when by emphasizing alleged weaknesses and overlooking acknowledged strengths it has the effect of making the United States appear to be a 'sitting duck' to potential aggressors" (Feb. 8, 1960).

Senator EVERETT M. DIRKSEN, Senate GOP leader: "The comment on the submarines we have compared to the Soviet Union, the number of ships in different categories compared to the Soviet Union, the discussion of bases—I don't think that these things ought to be paraded across the front page" (the Washington Post, Feb. 14, 1960).

Gen. Nathan F. Twining, Chairman of the Joint Chiefs of Staff: "We have great strength, we are a powerful country, and I do not think we should downgrade our capabilities as a nation to the Russians. That is what gives me cause for concern—this downgrading of our capability. It looks like we are going to get licked every day. I am afraid that the public will become frightened some day. It sometimes appears to me that there is an element in this country that thinks 'Gentlemen, we better be Red than be dead.' It is a serious thing" (Jan. 13, 1960).

Murray Snyder, Assistant Secretary of Defense (report in Life magazine): "Snyder * * * has counseled top Defense officials to 'kick the teeth in' of reporters who dare question U.S. defenses and suggested that critics of the program are undermining national confidence and security" (Feb. 8, 1960).

C. Other views

The Washington Post (referring to Dirksen comment above): "Such premises seem to us fallacious on two counts. The first is the notion that the Russians are being treated to a lot of information they do not already have. If their intelligence is half as good as there is reason to think that it is, they have a pretty accurate knoweldge of what the United States possesses in military capacity.

"The second is the implication, connected with the above notion, that such knowledge should be secreted. It may be important to safeguard the details of weapons, but in the broad sense a deterrent is only as good as a potential adversary believes it to be. Most of the criticism of American defenses concerns inadequacies 2 or 3 years hence, some of which may yet be remedied. If present military power is as great as defense officials say that it is, then the administration ought to want the Russians to know about it. That is the way to prevent miscalculation.

"Some of the criticism may indeed be wrongly based or ill informed. But for administration spokesmen to imply that criticism of the defense program is therefore destructive—or to insinuate as General Twining did the other day that there is something disloyal in questioning the performance—is to assume a degree of sacrosanctity and infallibility that Americans have not customarily accorded their national leadership.

"How, pray tell, are persons who are just as sincere in their concern for the country as the President is in his to attempt to increase the defense effort except through public comment and discussion? The attempts to stigmatize the exercise of criticism are far more frightening than the bogeys of a garrison state which apologists are so fond of invoking" (Feb. 14, 1960).

Aviation Week magazine: "We respectfully disagree with the thesis that public speeches and newspaper articles contribute little to the progress of the space research program. Without the violent public reaction expressed through these media after Sputnik I and the resultant Soviet space achievements, this country would very probably have no space program worthy of the name. * * * We think that even more public prodding is necessary to stir the very top levels of our Government into an understanding of the basic contribution space research can make to humanity and also to the competitive problem we face with the Soviet Union in this respect" (Nov. 2, 1959).

UP-TO-DATE POSTSCRIPT

Newsweek reports as follows:

The real reason for the long-awaited Cooolidge committee report on disarmament was hushed up and eventually discarded: It insisted there's a serious missile gap and that it's dangerous for the United States to negotiate on disarmament while it lags in ICBM's. Ike ordered the report withheld from circulation among top Government officials (Apr. 11, 1960).

Mr. PRICE. Then I would like to give one or two prominent names of Republicans who have expressed their worry and concern over our position both militarily and in other scientific areas.

Yesterday, when I attempted to answer without advance preparation I was challenged by my good friend from Wyoming as to the date of the statements made by the men whom I had quoted. I will admit that the recollections that came to my mind then were of dates that were back in 1956 and 1958, but my whole research in the meantime makes it possible for me tonight to bring these exceptions to the present program up to date.

For instance, I can give some quotations from responsible Republican leaders as late as June of 1960. I should like to refer to a statement by Governor Rockefeller, who certainly cannot be classified as a Democratic critic of the present administration. But Governor Rockefeller stated that "The forces for limited war are inadequate." He then went on to recommend the immediate expenditure of additional money to correct that situation. That does not refer to any particular scientific program, but I think it is essential that in keeping up the military strength of this country we give some serious thought to the forces for the conduct of limited war.

I should like to go back a little further in the Rockefeller opinions on this, to the Rockefeller report in 1958, which stated:

There is grave reason for concern with respect to the workings of the budgetary processes.

This is one of the challenges thrown out by the speakers in the Operation

Veracity, that we were challenged to show where any budgetary considerations had interfered with our space or military programs. This is a direct reference to a budgetary restriction, and a reference to the concern that people who are interested in our national security have over budgetary considerations when it comes to adequate preparations in this field. This is the Rockefeller report from which I am quoting.

The report then refers to reductions which have taken place since the Korean war in our expenditures for the Armed Forces. The report refers specifically to the effect on the Air Force and the Army. In making such references, it stated:

> The result has been serious imbalance in our military preparedness. Recent budgetary ceilings could be maintained only by a reduction of forces in all services and processes which has been slowly going on for the past 3 years. The budgetary squeeze affected not only force levels, it also slowed down our research effort in many fields causing us to lose ground to the U.S.S.R. Recent military expenditures are therefore insufficient to maintain even our current force level, and events have made clear the inadequacy of these levels.

The above expressions were in an introduction to the chapter entitled "Budget for National Security." It must be emphasized these are not Democratic criticisms. These are criticisms from the Rockefeller report.

Robert C. Sprague, who introduced himself as a conservative Republican, and who was the chairman of the Gaither Committee, which prepared its report at the request of the President and for the President on the status of our national defense, testified before the Subcommittee on National Policy Machinery of the Senate Committee on Government Operations on February 24, 1960, not 1954, not 1956, nor 1958, but February 24, 1960.

He said that he considered our present military program inadequate to the needs, and also that he considered the deficiencies a threat to our survival, and also that he thought there ought to be a higher ratio between defense expenditures and gross national product than now obtains.

These were people actually outside the Government. Perhaps Rockefeller at the time he made the statement in 1960 was in the State government, but he was a high spokesman for the Republican Party, and he had served in official capacities in the Eisenhower administration.

But with reference to the point that they have made that no spokesman of the administration has said that, I just want to refer to Secretary of the Army Brucker who testified before the Senate Defense Appropriation Subcommittee in May 1960, to the effect that the Army had recommended and specified additional requirements were needed for modernization of the Army and an airlift for the Army, but that such recommendation had been cut back by the Department of Defense and by the Bureau of the Budget.

He went on to say "the decision was made adversely to us," meaning the Department of the Army.

I could go through congressional hearings and bring out name after name of people high in the administration who have been critical of the effort put forth and the restrictions put upon the efforts made when it comes to national preparedness.

Mr. PUCINSKI. Mr. Speaker, I cannot let this moment pass without congratulating the distinguished gentleman from Illinois [Mr. PRICE] for his profound contribution in his work on the Joint Committee on Atomic Energy. Next month we in the State of Illinois are going to have the great honor of seeing the first large privately developed electric powerplant powered by atomic energy opened to serve that vast area. The Dresden powerplant is to be opened. It was built by the Commonwealth Edison Co. You know men seeking public office frequently play footloose and fancy free with slogans, and they like to brand a lot of us Democrats as Socialists and various other things every time we try to do something. Yet, if it had not been for the determined efforts of the gentleman from Illinois [Mr. PRICE] and his great and sincere and dedicated contribution on the Joint Atomic Energy Committee and his great assistance to private enterprise to see that private enterprise developed this great atomic power for private use, this plant would not be opening next month. I think not only in the Midwest, not only the people in Illinois and not only the people of Chicago, but, yes, the people of America and the world certainly can be proud that we have a man like Mr. PRICE on this committee who has helped to guide research in this atomic energy field so that today, contrary to the frequent accusations we hear from our colleagues, private enterprise is benefiting from that research which has been paid for through the Government and the taxpayers' money.

Mr. KING of Utah. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Utah.

Mr. KING of Utah. Mr. Speaker, I have requested a few moments from the time of the distinguished gentleman from Illinois so that I could ask a specific question of my friends on the other side of the aisle.

First, I would like to give some background for my question, dealing with the general subject of space, in view of the fact that I am a member of the Committee on Science and Astronautics, and that this subject is close and dear to my heart. Yesterday, the distinguished gentleman from New Hampshire [Mr. BASS] took the well of the House and spent some 20 or 25 minutes, as I recall, putting over the point in most emphatic terms that the Republican Party had responded to the challenge of the space age, that the Republican Party was well aware of the gravity of the situation; that they had done all that was possible and that very commendable progress was being made in the field of space activities. This statement, of course, was challenged by many of us on the Democratic side of the aisle.

Last April the distinguished chairman of the Republican congressional campaign committee, Mr. MILLER, appeared in Salt Lake City at the Republican organizing convention.

As the keynoter of that convention, in referring to me, he stated that the Congressman from the Second Congressional District of Utah was a Congressman who in effect had been downgraded, and who was a Congressman with little responsibility in Congress. As evidence of that fact he recited my membership on the Space Committee.

I call attention to the fact incidentally that membership on the committee includes such distinguished men as the present majority leader, the distinguished JOHN MCCORMACK, and by the former Speaker of the House and former minority leader, JOSEPH MARTIN.

The question I should like to ask Mr. MILLER, and may I say incidentally that he was on the floor a few minutes ago. I saw him leave. So in order to be fair I shall indicate here my intention. I shall write him a letter tomorrow morning and I shall send him an excerpt of what I am here stating and shall ask him in the letter to make a reply either in the RECORD or to me personally.

So I want this to be perfectly fair. The question I ask him is: Did he or did he not make the statement that it is evidence of the downgrading, or lack of importance and influence of a Congressman, that he is appointed a member of the Space Committee?

If his answer is "Yes," that he did make the statement, then, Mr. Speaker, that in itself is evidence of the allegations contained in the Democratic platform: namely, that the Republican Party has not fully appreciated the gravity, and the magnitude of the space challenge. I submit, Mr. Speaker, that from those very words we have authoritative confirmation of our allegation that the Republicans have neither understood this problem nor taken adequate steps to solve it.

If his answer should be that he did not make the statement, then, of course, I shall immediately ask that the newspapers that reported this particular article make a public retraction.

I think the public is entitled to know whether or not the Republican Party feels that the work of the Committee on Science and Astronautics is an unimportant work and that the members who serve on that committee are doing unimportant work for their country. We are entitled to know the answer to that question.

In conclusion, Mr. Speaker, in 1959, there came before the House of Representatives the authorization bill for the NASA fiscal 1960 budget. This bill called for the authorization of $485 million to finance the activities of the National Aeronautics and Space Administration, for fiscal 1960. This was the administration's own bill. It contained the administration's own figure, and a modest figure, I might say. This bill was submitted by the administration to this committee with the request that it be endorsed by the committee. The committee approved the bill, as I recall, unanimously. It was reported out to the floor of the House. If my memory serves me correctly, and I think I am correct,

the record will show that when it came up for a vote there were approximately 90 Republicans who voted against the bill. That represented the great majority of the Republicans who cast a vote. The record will also show that a majority of the Democrats voted for the bill. So here, Mr. Speaker, you have the anomalous situation of the administration's own bill, with its own figure, $485 million, as I recall, to finance our space effort, coming before us, and being turned down by those who should have been its stanchest supporters.

I might say that if there had been 10 more votes against that particular bill it would have failed, and our entire space program would have stood in serious jeopardy of failure, and might even have failed altogether.

To me, Mr. Speaker, this is serious. It indicates one of two things: either the Republican Members of this great body felt that the Democrats were sure to pass the bill, and therefore saw this as their opportunity to get in a few economy votes, or they failed to realize the seriousness of this situation. If we put the latter interpretation on their vote, we must assume that they had no comprehension at all of the seriousness of the space challenge. I leave it up to them to choose which horn of the dilemma they want to impale themselves on. But to me, Mr. Speaker, this is eloquent testimony in confirmation of what the Democrats have been saying all along, that the Republicans have been slow to rise to this new challenge of the space age.

Mr. BRAY. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Indiana.

Mr. BRAY. All I wanted to do was to direct a question to the gentleman from Utah [Mr. KING], who has just been speaking. He mentioned the gentleman from New York [Mr. MILLER]. Mr. MILLER is not in the room, and has not been all the time the gentleman spoke. I have not seen him for some time .

I would like to ask the gentleman from Utah [Mr. KING] this question: Since he knew he was going to mention Mr. MILLER, the Congressman from New York, did the gentleman notify him you were going to direct a question at him before you directed the question?

Mr. KING of Utah. In answer to the gentleman, may I say I did ask the gentleman from Illinois, the present occupant of the well, whether he would yield to me and I asked him at a time Mr. MILLER was on the floor. By the time I got the floor, Mr. MILLER had slipped out.

Mr. BRAY. The gentleman does not answer the question.

Mr. PUCINSKI. Mr. Speaker, I refuse to yield further. I think the gentleman from Utah answered the question.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. PUCINSKI] will continue.

Mr. PUCINSKI. Mr. Speaker, I must confess when I requested this time to make my remarks this evening I did not realize that an analysis of the Republicans' Operation Veracity by my colleagues on this side would develop into a Democratic antideception depth charge that would bring all of our colleagues on this side of the floor to the rescue.

I think we have certainly brought to light many more things that have been said in the last 2 days in this Operation Veracity. I should also like to point out that during the last few days while many of us sat here listening to Operation Veracity, on any number of occasions we asked the managers of the time to yield to us, but for reasons known best to themselves they declined.

We on this side did not make a point of order that a quorum was not present in indignation when you gentlemen would not yield.

I yield now to the gentleman from Utah, who was addressing the House at the time of the quorum call.

Mr. KING of Utah. Mr. Speaker, just before the quorum call I was in the process of asking a question of the gentleman on the other side, the gentleman from New York [Mr. MILLER]. I regretted the gentleman from New York [Mr. MILLER] was not in the room at the time. He had been prior thereto. Now that he is in the Chamber I should like to repeat my question to establish this point for the record.

By way of brief preface, may I say that on yesterday the distinguished gentleman from New Hampshire [Mr. BASS] spent considerable time in pointing out to the House that the Republican Party was well aware of the seriousness of the space challenge, that it understood the gravity of the situation before it, and that it had done everything possible to meet this challenge, and that progress in the field of space was satisfactory in every respect.

Last April, as I recall it, at the Republican organizing convention in Salt Lake City, the honorable gentleman from New York [Mr. MILLER] was the keynote speaker. He is reported in both Salt Lake City daily newspapers as having said that the Congressman from the Utah Second Congressional District, namely myself, had very little influence in the House of Representatives, and that as evidence of that fact he had been appointed a member of the newly formed Committee on Science and Astronautics.

I should like to ask the distinguished gentleman from New York whether that statement was made by him?

Mr. PUCINSKI. I am glad to yield to the gentleman from New York to reply. I just want to remind him that the last time I did this we got a quorum call. I now yield to the gentleman from New York.

Mr. MILLER of New York. I thank the gentleman for yielding to me. I may say that if I had known the gentleman from Utah was going to pose this question, if he had called me at any time during the day and told me he anticipated making this statement, I certainly would have been present.

I will say that I recollect very vividly keynoting the convention in Utah to which he refers. I am certain that I made no comment concerning the gentleman from Utah in the course of my prepared remarks. I did have a press conference and I think perhaps I was asked the question as to the position of the gentleman from Utah [Mr. KING] on our Committee on Space. I would like to assert at this time we do indeed stress this area, it is a very important one. We are having a conference of our candidates in Washington, and we had a 2-hour session tonight on this very subject. But I think probably when I was asked the question in Salt Lake City concerning the gentleman I probably remarked along the line that I had not heard very much about the gentleman, I did not know very much about his work on the committee, and therefore I might have some doubt about his effectiveness on the committee, although I do not doubt at all he was honest.

Mr. KING of Utah. In order to make this crystal clear, does the gentleman now deny that membership on the Space Committee in itself constitutes evidence of having been downgraded in the Congress of the United States?

Mr. MILLER of New York. May I say that outside of the majority leader and the former minority leader of the House, is there anyone else in the House who is a member of the Space Committee, and a member of any other committee of the House?

Mr. HECHLER. Mr. Speaker, I am a member of the Space Committee and a member of no other committee. And, I would like to say that the gentleman from Utah [Mr. KING], is one of the hardest working and most effective members of the House Committee on Science and Astronautics.

Mr. MILLER of New York. I might say I am delighted to hear it.

Mr. WIER. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Minnesota.

Mr. WIER. Mr. Speaker, let me make mention, while the gentleman from New York [Mr. MILLER] is on the floor, that in the Minneapolis papers recently there has been a little story about Congressman WIER having been, so to say, degraded as a member of the District Committee, where freshmen usually serve. Now, I hope that that had no connection with your presence in this gathering at Minneapolis. Being a member of the District Committee is really refreshing.

Mr. MILLER of New York. You are not trying to say that I made such a statement?

Mr. WIER. I am just asking the question if in that statement in Omaha you might have said something about Congressman WIER in the Minneapolis program.

Mr. MILLER of New York. I might have. I was there.

Mr. WIER. Well, I would gather that it was closely related and that it was probably made by you.

Mr. MILLER of New York. No; it was not. It was made by your opponent. I think the voters in your district will decide that.

Mr. WIER. Oh, indeed they will.

Mr. GREEN of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Pennsylvania.

Mr. GREEN of Pennsylvania. While the gentleman from New York [Mr. MILLER] is on the floor, I would like to propound a question to him. There is an article in Roll Call today which quotes you as saying that you believe the Republican Party has a great chance of taking away the district from the most distinguished woman in the Pennsylvania delegation, Mrs. KATHRYN GRANAHAN. Now, the gentlewoman from Pennsylvania [Mrs. GRANAHAN] was elected in 1958 by about 42,000, in 1956 by about 50,000, and in 1952 by about 40,000. So, I would like to know who is giving you the information.

Mr. MILLER of New York. Well, of course, you have to remember that we have had Members on this side of the aisle who had records just exactly like that and who lost their seats.

Mr. GREEN of Pennsylvania. Well, I happen to be the leader of the Democratic Party in Philadelphia.

Mr. MILLER of New York. I am delighted to know that.

Mr. GREEN of Pennsylvania. And I know something about the district, and I know when you make a statement like that you certainly do not know what you are talking about. And, I ask you where you got your information.

Mr. MILLER of New York. We will see after the November race.

Mr. GREEN of Pennsylvania. I hope you are not getting it from that great distinguished junior Senator in the other body who does not know anything about Pennsylvania, Mr. HUGH SCOTT.

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that those words be stricken from the RECORD. He is talking about a Member of the other body. He cannot do that.

Mr. PUCINSKI. Mr. Speaker, if the distinguished gentleman from Pennsylvania and the other Members on this side will permit me to yield to those that I had promised to yield to earlier and we continue showing what a complete mockery Operation Veracity is, I think that not only Mrs. GRANAHAN but a lot of the Democrats who are trying to come to Congress will be here after November 8.

So, Mr. Speaker, I yield to the very charming and distinguished lady from Idaho [Mrs. PFOST].

Mrs. PFOST. Mr. Speaker, yesterday the gentleman from Minnesota [Mr. NELSEN] criticized a passage in our Democratic platform which reads, as follows:

> The Democratic Congress has successfully fought the efforts of the Republican administration to cut off REA loans.

In criticizing the platform reference, the Republican truth squad said:

> Now REA has been in existence 25 years. The Eisenhower administration has been in office a little over 7½ years—in other words, about 30 percent of the time of REA existence. Yet, 45 percent of all the loans approved in REA history were approved during the Eisenhower-Nixon administration.

Now, Mr. Speaker, REA co-ops are very important to my State of Idaho. Their transmission lines carry power to the rural homes of thousands of Idahoans and additional power is desperately needed at this time.

Now, Mr. Speaker, for the Republicans to come out at this 11th hour—virtually on the eve of election—with the statement that they have really loved REA all along is a bit like a deathbed decision to reform. This will be somewhat difficult for the thousands of managers and directors of the 1,000 REA co-ops to swallow. Two months of promises will not make these men—Republicans, independents, and Democrats alike, forget the past 8-year record.

The REA co-ops have many problems but there are two of major concern to them: First, adequate wholesale power at rates they can afford to pay; and, second, financing through REA at reasonable interest rates.

Here is the Republican record on these two major areas in which the Federal Government must cooperate if the REA co-ops are to survive and grow.

On power supply the Republican administration adopted a policy of no new starts on hydroelectric dams, thus cutting off this source of abundant, low cost wholesale power. Anyone who looks at the wholesale power rate map which the co-ops have drawn up will see the disastrous effect this policy has had on the power cost the co-ops must pay and then pass on to their members.

On the matter of financing, the Republican Administration attempted to cripple the REA co-ops in two ways. First, they have annually tried to severely limit the amount of REA loan funds available, despite the fact that these co-ops have a perfect record of repaying these loans with interest. In the years from 1953 through 1960, the administration requested a total of $1,149.3 million in REA electric loan funds. Democratic Congresses forced through additional appropriations, raising the aggregate total to $1,815 million. That's more than a 53 percent increase forced through by Democratic Congresses—and the record shows it was needed.

Had it not been for the fact that the Democratic Congress wrote the laws under which an REA Administrator must make loans and forced through these necessary higher loan fund authorizations the REA co-ops would not have had adequate loan funds.

Only the aggregate REA electric loan authorizations for the 1953–60 period—budget request and actual authorization—are included in the following.

Year-by-year figures are:

[In millions]

	Administration asked	Congress authorized
1953	$100.0	$100
1954	155.0	180
1955	90.0	170
1956	195.0	260
1957	170.3	414
1958	179.0	179
1959	150.0	342
1960	110.0	170

With the Democratic Congress in this way protecting the REA co-ops from this Republican onslaught, the Republicans tried another device—they tried to raise the interest rates the co-ops must pay, raise it high enough to cripple the co-ops they now profess to love. The REA co-ops, their members, directors, and managers are aware that the Republicans have continued a barrage of raise-the-REA-interest-rate propaganda unleashed by Benson and other GOP spokesmen. Only a Democratic Congress thwarted this attack.

No rural electric co-op manager, no director, no farmer will forget this persistent, destructive, three-pronged attack on the REA organizations of America. No Republican campaign-time lullabies can wipe it out.

Mr. PUCINSKI. Mr. Speaker, I yield now to the gentleman from Minnesota [Mr. BLATNIK].

Mr. BLATNIK. Mr. Speaker, I ask unanimous consent that the gentleman from Oregon [Mr. ULLMAN] have permission to extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. ULLMAN. Mr. Speaker, when President Truman dedicated the Hungry Horse Federal Dam he told those there to "take a good look at it—the dam—because it is the last of its kind you will see for a long time if the Republicans get in."

Truman was right. Under the pressure of GOP policies, the development of our natural resources has almost come to a halt.

The simple fact of the matter is that the Republicans, concerned with the needs of the few, do not have the vision, imagination, or boldness needed to properly develop our natural resources.

Budgeting has hurt conservation as has the veto of the antipollution bill of 1960, by the granting of oil leases in wildlife refuges and by the shocking award of unwarranted mining claims in national forests.

Other development has been hurt by vetoes of two rivers and harbors bills, by the giveaway of such sites as Hells Canyon, and by in general restrictive policies.

We are already feeling the pinch of the Republican policies in natural resources, but if we follow these shortsighted policies in the future, the result will be disastrous.

To feed the more than 230 million Americans of 1975, we will need twice as much water as we now have, twice as much food, and three times as much power. We may need an additional 3,500,000 acres on which to grow food.

Programs to prepare us for the challenges of the new frontier are needed, as is vigorous and enlightened leadership to carry them out.

The Democratic program for the future calls for:

Resource advisers in the Office of the President, charged with long-range responsibilities in the proper development of natural resources.

A capital budget to distinguish wise investment in self-liquidating resource projects from current operating expenditures.

A Youth Conservation Corps to improve the forests.

Giant power systems for low-cost electricity over regional transmission lines.

Comprehensive development of river basins for flood protection, irrigation, navigation, recreation, and electric power.

Increased recreational opportunities.

Pollution control.

A public-power yardstick to regulate private-power rates.

Soil conservation.

Comprehensive national water resource policy, under which, with the cooperation of State and local governments and private groups, will be developed a balanced, multiple-purpose plan for each major river basin, to be revised periodically to meet changing needs.

Most of all, we will eliminate the Republican slogan of "no new starts" and pick up where Franklin D. Roosevelt and Harry S. Truman left off.

Mr. BLATNIK. Mr. Speaker, I thank the gentleman from Illinois, our very able colleague, for yielding me of his limited time, as I know how many other Members have statements they want to put in the RECORD.

I could not help wonder a few minutes ago when the gentleman from Indiana seemed distressed when our young but very able and respected colleague from Utah raised the question of what another Member from New York had said why he displayed such great excitement, making a point of order of no quorum and forcing a call of the House. I do not recall during the debate, when the Republicans had their special orders, that any of the Members on our side of the aisle made a point of no quorum, or tried to interrupt the proceedings in any way.

Mr. PUCINSKI. The gentleman's recollection is absolutely correct.

Mr. BLATNIK. Why such concern tonight about making reference to another Member when he does not happen to be on the floor at the time? Just yesterday, on the floor of the House, under a special order requested and granted in advance, a Member on the minority side, a colleague of ours on the Public Works Committee and on the Highway Investigating Committee, put into the RECORD 7 full pages of personal statements, tables, and reports from the Federal Bureau of Roads, and not once did he extend the courtesy of notifying any Member on our side, and least of all the chairman, who is now speaking.

I am glad to see the gentleman here on the floor, the gentleman from Florida [Mr. CRAMER]. I use his name only because he is on the floor. We have had an opportunity to discuss this personally this morning, following a session of the Public Works Committee. I let the gentleman know what I thought of the tactics at that time.

These hit-and-run tactics that we have just seen demonstrated by the gentleman from New York, when he was quoted as saying one thing and then claimed he was misquoted—and chances are he was, and I hope he was, because he gave us a very different version of what he had intended to say or thought he had said back in Utah, and now in repeating what he had said for the RECORD.

The same thing happened yesterday. The gentleman from Florida [Mr. CRAMER] referred to one of our two major hearings conducted by the special investigating committee on the interstate highway program. He made reference to one of these hearings, known as the Oklahoma hearing, as follows, and I quote from page 18429 of the RECORD, dated August 30:

> The second great exposé dealt with the State of Oklahoma. And apparently some internal, largely political, problems were involved there.

I must admit that there was considerable trouble in Oklahoma that made me quite concerned. But what did he say originally in our committee? What did he say in the very closing minutes of a week-long session of intensive interrogation and presentation of witnesses under most difficult circumstances, firmly but fairly, with not one witness being abused or maligned? What did the gentleman from Florida say on that date? You will find it in the printed record of our highway subcommittee hearings on page 358, in the very closing minutes after 5 days of hearings, on an occasion when he had very recent recollection of what had transpired during the previous days of committee hearing. I quote from the printed hearings of the committee:

> Mr. CRAMER. I, too, want to say I congratulate the staff for the very fine job they did. This has been an extremely exhaustive investigation, and I think a most objective one. I want to congratulate them for the fine work they have done, along with the chairman. I, too, feel that good has come out of this already and much more will in the future.

Talk about Operation Truth, about truth squads, what we ought to have is mention of what truth means before it is used so loosely and irresponsibly in example after example that has come to our attention. The ranking minority Member, the gentleman from Ohio [Mr. SCHERER], and again I only use his name because I see him here on the floor of the House, 10 days ago in a large press release prepared in advance, abused and maligned the committee and the chairman, attributing to the chairman political motives in the conduct of the hearings and repeated, as he had in the past, the motives of the committee itself. He has referred in the past to the staff and to other members of our committee as hatchetmen. He has insulted the distinguished senior colleague and chairman of our full committee, the gentleman from New York [Mr. BUCKLEY], by assigning to him and attributing to him this scathing, vitriolic, unmitigated at- and the charman of the full committee.

He put out this press release on Monday, 10 days ago when he knew that 2 days later, on Wednesday of that week, there was to be held an executive session of our committee in which the points to which he had made reference would be discussed before the full membership of the committee. So our committee met on Wednesday, 2 days after he released this scathing, vitriolic, unmitigated attack on everybody in the committee—the staff, the chairman, the subcommittee, and the chairman of the full committee. The purpose of the investigation was to give full briefing, a face-to-face report and rundown by our committee staff counsel to the full committee membership informing them of what they had been doing this past 3 months and what they intend to do and to what degree these cases are unfolding. I, as chairman, then stated that now was the time for any member to raise questions that may be disturbing them. The gentleman from Ohio maintained interesting and self-incriminating silence on the grave charges he had raised 2 days earlier in his press release. Now I call that hit-and-run tactics, and I say so publicly here on the floor of the House and in the presence of the two minority members to whom these remarks are directed. I say that this is an indefensible twisting of the truth and I charge here that they have insulted the members of the committee and cast irresponsible but grave and serious doubts on the conduct and purpose of our committee. I want the RECORD to show that these two gentlemen from the very beginning, even before the committee was created, have attacked and questioned in very unrestrained terms the motives of the committee; that the two gentlemen appeared in person before the subcommittee of the House Committee on Administration and opposed the appropriations for this highway investigation. They opposed it, of course, on the ground that the amount asked for the investigation was too much. But when we asked them what they recommended, they said they had given it no consideration and they had no recommendation to make. The record will show all three House Members of the minority on that appropriations subcommittee subsequently voted against this request for funds to conduct this tremendous intricate, important, and difficult investigation of the highway program.

Mr. Speaker, I ask unanimous consent that I may revise and extend my remarks in the RECORD in further detail to try to clarify some of the misstatements that were put in the RECORD yesterday and on previous occasions, and I thank the gentleman from Illinois for the time he has so generously given to me.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. BLATNIK. Mr. Speaker, so, here is the story of highly irresponsible behavior of the minority members.

Twice within the past 10 days the Special Subcommittee To Investigate the Federal-Aid Highway Program has been subjected to vitriolic hit-and-run attacks. The first such attack was made by the ranking minority member of the subcommittee, the gentleman from Ohio [Mr. SCHERER], through the medium of a press release which contained wild allegations which he did not have the temerity to repeat when an executive session of the subcommittee was called.

The second ranking minority member, the gentleman from Florida [Mr. CRAMER], chose the floor of the House as the forum for his attack just yesterday.

I have tried my best, as chairman of this subcommittee, to direct its affairs in a way that is calculated to keep the investigation free from political overtones. I call upon the Members of the House to

witness that the injection of political considerations originates entirely from the other side and I have no recourse except to set the record straight.

The gentleman from Ohio and the gentleman from Florida are well aware of the rule in equity that a complainant must come into court with clean hands. Their public pronouncements scarcely fall within the purview of this rule.

I have no hesitancy in charging now that they have been obstructionists from the very moment this subcommittee was conceived. They opposed the appropriation of funds for its operation. The gentleman from Ohio has insulted the chairman of the parent committee. Both he and the gentleman from Florida have impugned my integrity and the gentleman from Ohio has gratuitously insulted other individual members of the majority. He has publicly proclaimed that hard-working, dedicated staff members are political hatchetmen. I see sitting near me, on the majority side, another colleague from Florida, my good friend JIM HALEY, who on every occasion, including on the floor of the House, has most vigorously supported our investigation and urged that adequate funds be provided for this tremendous task.

The minority gentleman from Florida [Mr. CRAMER] yesterday made a great point in his remarks to the House that there have been only two investigations by what he disparagingly chose to term "this great crusading subcommittee."

So that there will be no question about what he said, I quote from page 18429 of the CONGRESSIONAL RECORD, in which he states as follows:

> There have been two investigations; one of them was directed at the Bureau of Public Roads. It was an effort to try to show that a decision was made in regard to bridge clearance, that instead of a 17-foot bridge clearance, as the Department of Defense had recommended—and some of the majority apparently were in favor of it—they established a 16-foot bridge clearance.

Now, I am not quite sure just what the gentleman from Florida was trying to say. However, I can tell you that the record before the subcommittee discloses these undisputed facts:

First. Army staff studies were made in 1952 and again in 1955 in the Office of the Chief of Transportation, Department of the Army, which showed that the military services were designing, procuring, and had in stock thousands of items of excessive dimensions and weight; that there had been a tendency on the part of military planners to use experience of the past for current and future planning; that from the transportation aspect this type of planning was no longer practical, and that another war would be one of quick movement demanding fluid supply lines.

Second. Army technical manuals reflected in 1953, 1954, and 1956 that the current ordnance inventory contained weapons which, when loaded on a transporter, varied in height from 13 feet 6½ inches, to 15 feet ½ inch. The Corps of Engineers, the Navy, and the Air Force all had essential items exceeding 14 feet.

Third. The configuration of the Atlas missile was known in 1954. The difficulties in moving it by highway from California to Cape Canaveral were known in 1956. The witness, Mr. Leonard, testified that nobody in the Department of Defense ever bothered to learn from him what difficulties he was experiencing.

Fourth. The act of 1956 specified that the standards for the Interstate System were to be adequate to accommodate the types and volumes of traffic forecast for the year 1975. When the standards fixed the minimum vertical clearance at 14 feet the Department of Defense was not consulted. But neither did the Department of Defense make any effort to alert the Bureau of Public Roads or the American Association of State Highway Officials to the fact that the 14-foot standard would seriously impair the ability of the military to move expeditiously with the oversized items then known to be in the ordnance inventory.

The 14-foot standard was officially adopted on July 17, 1956. The testimony shows that the issue as to its adequacy for military movements was not raised until 6 months later. Thereafter there occurred a classic example of bureaucratic indecision.

From July 17, 1956, to January 27, 1960, when the standard was finally raised from 14 to 16 feet, the total elapsed time was 3 years, 6 months, and 10 days, during which over 2,000 affected bridges or structures were built. This was unconscionable, incredible, inexcusable, and indefensible delay.

It is to be remembered in this connection that you will still have uncorrected a gigantic obstacle course of thousands of substandard underpasses which will continue to strangle the mobility of military units which may, in the future, be trying to make their way across those stretches of the System.

And what has been the cost in terms of the taxpayers' dollars? We know from the testimony that the Bureau of Public Roads made a "guesstimate" in March 1958 that it would cost $100 million to go to 16 feet and $228 million to go to 18 feet. The Bureau's first firm estimate was not calculated until March 1959. At that time the Bureau said it would cost $875 million to build future bridges, to raise and rebuild those already completed or under way, and to raise and rebuild bridges on existing facilities that had been incorporated in the System. These figures were for a 17-foot standard.

Six months later, because bridges continued to be built, the figure became $1,123 million for 17 feet. When the 16-foot standard finally became official in January of this year the estimate became $925 million. It is not inconceivable that the administration will now claim that this final decision saved $198 million.

The vociferous minority, during the course of the hearings, valiantly tried to associate the urgency of a higher standard with the time when the Russians put sputnik into orbit. They have endeavored to create the impression that responsibility can be limited only to the 2,259 bridges built since 1956. They have argued that if the move to a higher standard was made immediately after sputnik it would only have cost $40 million to raise the bridges built from 1956 up to that time and another $13 million to modify the design of the bridges yet to be built. They have also elicited testimony that to convert as of now would cost only $176 million and that, therefore, by some complicated reasoning that I cannot comprehend, the loss between the time of sputnik and the present is only $123 million.

We now come to the second investigation by the subcommittee which the gentleman from Ohio, in his press release, characterized as, and I quote, "an investigation which had political overtones involving a factional fight within the Democratic Party. The present Governor of Oklahoma is the leader of one of the factions which was helped by the hearings. It is significant or maybe it is merely a coincidence that his brother is a member of our investigating committee." The gentleman from Florida, propagandizing on the same identical line, stated here in the House that "apparently some internal, largely political, problems were involved there."

The gentleman from Ohio and the gentleman from Florida, as evidenced by the foregoing quotations, demonstrate that their gift for distorting facts is virtually indescribable.

Now, what are the true facts? The evidence in the Oklahoma situation established conclusively that serious inspection deficiencies existed at both the Federal and State levels and that the inspection and investigative machinery of the Bureau of Public Roads failed to bring to light the deplorable conditions subsequently shown by the subcommittee staff to have prevailed during almost the entire construction period. The unrefuted testimony was that the contractor did, in fact, ignore the specifications; that substandard materials were used during construction; that there was improper weighing of materials; that there was falsification of test reports and test samples; that there was double billing for material and overpayment for materials; and finally, that there were shortages of materials in the finished highway. Expert witnesses estimated that the deficiencies in the completed road were in excess of $524,000. The testimony also disclosed that a former Oklahoma highway commissioner, in violation of a State statute, held a hidden 25 percent interest in a construction company that participated in a lucrative subcontract for sodding on one of the projects in question, during the period of his service as a member of the highway commission.

I would like to cite one more instance to illustrate how well the gentleman from Florida can blow hot and cold. He is critical now of the way the subcommittee and the staff has operated, but I would like to quote to you from page 358 of the printed record of the Oklahoma hearings and these are Mr. CRAMER'S own words:

> Mr. CRAMER. I, too, want to say I congratulate the staff for the very fine job they did. This has been an extremely exhaustive investigation and I think a most objective one. I want to congratulate them for the

fine work they have done, along with the chairman. I, too, feel that good has come out of this already, and much more will in the future. I am extremely gratified and encouraged to learn of the committee established by the State highway officials, because I am thoroughly convinced that if this problem is not tackled and licked on the State level it can only result in additional Federal intervention and additional Federal bureaucracy, and thus taking away some of the responsibilities and rights that the States presently have in this program.

I am glad to see that the State highway officials are accepting that responsibility and going forward, and likewise the Bureau of Public Roads, on having had these facts called to their attention.

Both the gentleman from Ohio and the gentleman from Florida have publicly accused me of handcuffing the committee and the staff between now and November. They have clearly implied that all investigative activity has been suspended. Once again they are guilty of indefensible twisting of the truth. I want the RECORD to show that there has been no slackening of investigative activity and there is no intention of suspending any investigative activity. I do serve notice on the gentlemen on the other side of the aisle that as long as I am chairman of this subcommittee we will not hold public hearings in any manner until such time as there has been a full and complete investigation and the ascertainment of all available facts.

The gentleman from Ohio and the gentleman from Florida both know full well that the objective of this subcommittee has been to operate in a nonpartisan manner and that we will definitely give judicious consideration to any complaints that we receive and that we do not propose for one moment to engage in any witch hunt or badger any whipping boys.

I want the RECORD also to show that both the gentleman from Ohio and the gentleman from Florida during the course of hearings that we have held consider it to be their principal duty to serve as defense counsel for the present Republican administration. The gentleman from Florida particularly pursued the rather novel defense that the reason the Oklahoma scandals were not disclosed earlier came about because no one bothered to tell the Bureau of Public Roads what was going on in that State. He knows as well as I do that nothing can relieve the Bureau of Public Roads or other agencies of the Government from the responsibility of ferreting out wrongdoing wherever it may occur.

The gentleman from Florida made a particular point on Tuesday of inserting in the RECORD the official documents of the Bureau of Public Roads which shows the substantial progress being made on what has been termed "this greatest of public roads programs in the history of the world." He conveniently forgot to mention the undeniable fact that no one really knows to what extent conditions similar to those found in Oklahoma exist elsewhere in the United States. The subcommittee is engaged even now in investigations which we are pretty certain will show that highways elsewhere have been built without regard for specifications.

The gentleman from Florida has also tried vainly to assert the premise that the only good things that ever happened in Federal aid to highways came about as a result of the Eisenhower administration. He completely ignored the record which shows that Federal aid to highways invariably has come through the urging of Democratic administrations and support from the Democratic-controlled Congresses.

It was a Democratic administration in 1933, backed by a Democratic Congress, that made Federal funds available for secondary roads. It was a Democratic administration in 1939 that foresaw the need for transcontinental superhighways. It was a Democratic Congress in 1944 that passed legislation stepping up Federal aid for the postwar years and which designated the 40,000-mile national system of interstate highways. It was a Democratic Congress in 1952 that made the first specific authorization of funds for the Interstate System. It was a Democratic Congress that enacted the Federal-Aid Highway Act of 1956 which authorized the 13-year program for completion of the interstate and a sustained level of financial help for the primary, secondary, and urban systems.

Surely the gentleman from Florida must have had his tongue in his cheek when he made the following statement with reference to the passage of the 1956 Highway Act:

It was largely because of the President's strong leadership and the support he had among the Republicans in Congress that the program enacted was a responsible one, providing adequate funds for construction, and the establishment of a trust fund to be replenished with earmarked road-user taxes; also there was tremendous Democratic pressure to finance the program out of the general fund.

Those of us who were in Congress at the time have no difficulty in remembering that the administration originally proposed that this program be financed through a bond issue. Neither do we have any trouble in remembering that the then Secretary of the Treasury, George Humphrey, successfully induced Senator BYRD to insert the Byrd amendment in the 1956 act which has caused most of the financial difficulties that have plagued the program in recent years.

The gentleman from Florida was also most careful not to tell you Members of the House how the administration in 1956 which, as you all know was a presidential election year, played fast and loose with the highway trust fund and used it as a vehicle by which to proclaim to the American public that the administration had ended fiscal 1956 with a surplus of $1.626 billion.

The highway trust fund was created on July 1, 1956, and the Secretary of the Treasury immediately transferred $1.98 billion in unpaid bills to the trust fund but did not turn over one red cent of revenue which had been collected from highway users during fiscal 1956. The road-user taxes were earmarked, all right, but not for the purposes of paying highway bills.

It is a matter of official record that in fiscal 1956 the Treasury collected $2.944 billion from American motorists but every dime of this was used to create the mythical surplus. Without application of this $2.944 billion to general fund purposes the administration would have concluded the year with a deficit. According to Republican reasoning it was perfectly all right to saddle the trust fund with a mortgage of almost $2 billion.

Let it be noted for the record that the gentleman from Ohio has admitted publicly the truth of what I have just stated. In a speech to the American Association of State Highway Officials in Boston last October, in discussing the financial crisis that had developed in the highway program, the gentleman from Ohio said this:

The trust fund absorved, as was not contemplated, approximately $1.5 billion of highway obligations due and owing on the effective date of the 1956 act.

Even then he could not get the figure straight because there is no doubt about the fact that the total was $1.98 billion.

The gentleman from Florida also conveniently forgets to tell you that while the administration collects at the present time almost $4½ billion annually from highway users, more than $1½ billion goes to the general fund and not into the highway trust fund. I say to the gentleman from Florida and also to the gentleman from Ohio that the fiscal policies of the present Republican administration have eroded and seriously jeopardized the basic principles of the 1956 legislation to keep financing and construction in balance.

The present administration has evidenced no compunction about using the highway trust fund as a handy market for U.S. short term notes but has shown great reluctance to loan money to the trust fund even though the law says it shall. On those occasions when moneys have been advanced from the general fund to the trust fund there has been insistence by the administration on repayment before the end of the fiscal year despite the fact that the act provides that such advances shall be paid when the Secretary of the Treasury determines that moneys are available in the trust fund for such purposes. The administration conveniently construes this to mean that repayment shall be made for the convenience of the Treasury and not for the convenience of the trust fund. I think it is quite obvious that such a limitation on the length of time in which the trust fund can be of a debtor to the general fund certainly was not the intention of Congress when this provision was included in the act.

The inconsistency of the position of the gentleman from Florida is best evidenced by the statement that the highway program is actually ahead of schedule. Anybody who knows anything about the situation knows that under present circumstances the Interstate System cannot possibly be completed by the target date of 1972. The administration has publicly admitted that it is not possible to complete the system until 1975 or later.

The gentleman from Florida would also have us believe that the administration is not responsible for the stretchout of the program. The plain fact of the matter is that there has been a stretchout and that during the past year it was carried out under the disguise of what the Bureau of Public Roads chose to label "reimbursement planning." One Department of Commerce official described it as "essentially a scheduling of obligations for Federal-aid highways to avoid the embarrassment of default on Federal contractual obligations made necessary by the financial policy enacted by Congress in the Federal-Aid Highway Act of 1958."

Most of us remember that Congress moved in 1958, with administration approval, to provide a shot in the arm to a sagging economy and to ward off a threatening recession by increasing the allocations to both the interstate and the A–B–C programs. In the process it suspended for 2 years the pay-as-you-go Byrd amendment to the 1956 act which limited interstate apportionments to an amount not to exceed the forward estimates of available cash.

The gentleman from Florida complains that the action of Congress in 1958 was responsible for depleting the trust fund and that this created the situation where reimbursement planning became necessary. In reply I wish to state very emphatically that if the Treasury had not shortchanged the trust fund to the tune of nearly $2 billion in 1956 the financial crisis would never have occurred and the necessity for the 1959 increase of 1 cent to the Federal gasoline tax might well have been avoided.

In conclusion, I want to reiterate what I said before, that the injection of politics into this situation came from the other side of the aisle. Under the circumstances, and in view of the personal attacks on me, I have no alternative except to make a vigorous reply and to cite the undisputed facts which the gentleman from Ohio and the gentleman from Florida so casually skirt. I also want to make it very plain once again that the investigations by this subcommittee will be carried out in an orderly manner and that hearings will be held only after there has been full and complete investigation and ascertainment of all available facts.

I am sure that I speak for the majority members of the subcommittee when I say that we have every intention of being objective and that our primary concern is to conduct thorough but fair hearings to sustain the integrity of the program and to continue to maintain the public confidence in this gigantic program.

Mr. PUCINSKI. Mr. Speaker, I thank the gentleman from Minnesota for his contribution.

Mr. Speaker, I can yield only very briefly. I have promised to yield to the gentleman from Missouri [Mr. BROWN].

Mr. BROWN of Missouri. Mr. Speaker, I ask unanimous consent to revise and extend my remarks immediately following the remarks of the gentleman from Illinois [Mr. PUCINSKI].

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. BROWN of Missouri. Mr. Speaker, I make the same request to extend my remarks in the CONGRESSIONAL RECORD and also make the same request for my colleague, the gentleman from Indiana [Mr. BRADEMAS].

Mr. SCHERER. Reserving the right to object, since I have been attacked on this floor I take this time to——

Mr. PUCINSKI. Mr. Speaker, I refuse to yield to the gentleman at this time.

The SPEAKER pro tempore. The gentleman from Ohio is proceeding under a reservation of the right to object.

Mr. BROWN of Missouri. Under the circumstances, Mr. Speaker, I withdraw my request.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman briefly.

Mr. JONES of Alabama. I thank the gentleman for his courtesy.

The distinguished gentleman from Minnesota has been unjustly attacked. I do not think there has been a more dedicated member of the Public Works Committee than the distinguished gentleman from Minnesota [Mr. BLATNIK]. I find myself placed in the position of defending a man who has dedicated himself to the public roads program, who has demonstrated his great capabilities in this House, yet he has been attacked and castigated with prejudice and vituperation emanating from some members of our committee.

I thought we had approached this situation with a great feeling of concord and a great feeling of dedication to improving our highway program; and I feel that it is a shame that at this late hour so much time is spent in criticism of this worthy and dedicated man.

Mr. PUCINSKI. Mr. Speaker, I apologize to the gentleman but I cannot yield further. I would like to summarize if I may.

Mr. JONES of Alabama. Before the gentleman from Illinois reclaims his time I hope he will bear with me to let me say that I think this is a time to dedicate ourselves to the improvement of the program and to come to the defense of a man who has proven himself time and time again one of the great stalwarts, one of the great patriots, one of the great statesmen of the House of Representatives. To have him in the position of being so severely criticized is something that cannot remain unanswered.

Mr. PUCINSKI. Mr. Speaker, I again must apologize to the gentleman. I have about 20 seconds left.

When I asked for this simple little special order to discuss and lament the fact that we did not get minimum wage legislation in this session of Congress because of the actions of our Republican colleagues on the left of the aisle and their failure to act in conference, I did not realize that we would be overwhelmed by so many facts that have completely demolished the chicanery of the Republican operation the other day which they called Operation Veracity.

For the benefit of my colleagues, the National Democratic Committee has prepared an analysis of the Democratic and Republican platforms, and I think if we have not covered any of the points that the architects of Operation Veracity raised the other day, I am sure that as I present these facts here the question will be answered.

One thing is certain. After listening to my friends during this evening, we may be divided in our own party on occasion, but the fact is millions of people every day in America are reminded of the great progress of the Democratic Party by the simple little gadget they have in front of their steering wheel in their cars, and every day they know that when they put that lever in "D" they are in the Democratic Party and they are driving forward. When they put that lever in "R" they are in the Republican Party, and they are going backward.

In the past few days we have heard a lot of talk about the Republican platform adopted at Chicago last month.

The Democratic National Committee has prepared a comparison of our platform with that of the Republicans and added the essential last comparison of "performance."

It would seem to me, Mr. Speaker, that in the field of platform performance, the Republicans are a lot of talk. In a most cynical way they pattern their platform to sound like ours, but leave out the all-important specifics.

Their platform of 1952 was meaningful. They promised much and it remained to be seen what they would produce.

The platform of 1956 was less meaningful because they had 4 years to perform and failed.

This platform of 1960 has no meaning at all. They have had 8 years to show what they could do and they have not done.

I am sure these facts, figures, and statements, will help to clear the air.

[From the Democratic Digest, September 1960]

FACTS TO FILE: PLATFORMS AND PERFORMANCES

Americans have long been conditioned to taking party platforms with a grain of salt. Belief in the cynical summary that "platforms are something to run on, not stand on" is widespread. On top of such skepticism is the fact that this year, on many matters, the platforms of the two parties seem to say about the same thing.

How, then, is the voter to evaluate the platforms? Facts to File this month seeks to document two points: (a) That there are, in fact, substantial differences in the positions of the two parties, differences reflected in the wording of specific sections of the platforms, despite GOP attempts to mask these differences in generalities. (b) That even where the platforms seem to say about the same thing, there is a real difference in the probabilities of specific undertakings being carried out. This difference can best be judged from the past records of the parties. Selected examples illustrating these two points are cited below:

DEFENSE

Democratic platform

The new Democratic administration will recast our military capacity in order to provide forces and weapons of a diversity, balance, and mobility sufficient in quantity and

quality to deter both limited and general aggressions.

Our military position today is measured in terms of gaps—missile gap, space gap, limited-war gap * * *.

This is the strength that must be erected: Deterrent military power * * * balanced conventional military forces * * * continuous modernization * * * intensified research and development.

GOP platform

We have, and will continue to have, the defenses we need to protect our freedom.

The strategic imperatives of our national defense policy are these:

Highly mobile and versatile forces.

A nuclear retaliatory power that can survive surprise attack, strike back, and destroy any possible enemy.

National determination to employ all necessary military capabilities so as to render any level of aggression unprofitable.

Unremitting modernization * * * development and production of new strategic weapons.

Performance

Budget considerations have come first in the Eisenhower-Nixon years. As a result all authorities agree that we have lost the preponderance of military power over the Soviet Union which we had in 1953. In spite of growing gaps, GOP legislators in five votes between 1953 and 1959 voted against increased military strength, while Democrats supported such measures.

Here are the votes:

Vote	Percent of Democrats for	Percent of Republicans against
1953: To increase Air Force	83	98
1954: To maintain Army	79	98
1956: To increase Air Force	93	88
1958: To increase Army	84	71
1959: To increase airlift	68	90

DISARMAMENT

Democratic platform

A primary task is to develop responsible proposals that will help break the deadlock on arms control. * * * This requires a national peace agency for disarmament planning and research.

GOP platform

We are * * * ready to negotiate and to institute realistic methods and safeguards for disarmament, and for the suspension of nuclear tests.

Performance

Requests by the Senate Disarmament Subcommittee that the status of the Government's arms control division be improved have gone unheeded by the Eisenhower-Nixon administration. Democratic proposals for special agencies to work on arms control measures have received no support from the GOP. Negotiations have been unimaginative and, on occasion, undercut by the military because the GOP administration lacked coordination and leadership.

ECONOMIC GROWTH

Democratic platform

Our economy can and must grow at an average rate of 5-percent annually. * * * We pledge ourselves to policies that will achieve this goal without inflation.

GOP platform

We must quicken the pace of our economic growth to prove the power of American free enterprise to meet growing and urgent demands. * * * We therefore accord high priority to vigorous economic growth.

Performance

U.S. gross national product has averaged an annual increase of only 2.4 percent in the GOP years since 1953, whereas it averaged 4.6 percent from 1947 to 1953, under Truman. A Senate study emphasized that this slow growth was a direct result of Eisenhower-Nixon tight money and similar policies.

INFLATION AND TIGHT MONEY

Democratic platform

A Democratic President will put an end to the present high-interest, tight-money policy. * * *

Among those remedies [for inflation] are monetary and credit policies properly applied, budget surpluses in times of full employment and action to restrain administered price increases in industries where economic power rests in the hands of a few.

GOP platform

We reject the concept of artificial growth forced by * * * loose money policies. * * *

We favor: * * * use of the full powers of Government to prevent the scourges of depression and inflation.

Performance

The GOP tight-money policy has given gigantic profits to moneylenders. It has greatly increased Federal, State and local government costs. (Almost $10 billion in additional Federal interest payments alone.) It has added about $4,000 to the interest costs on a $15,000 home mortgage. It has slowed down economic growth. With all this it has not stopped inflation. Since 1952 the cost of living has risen about 11 percent.

AGRICULTURE

Democratic platform

To achieve income parity, we propose production and marketing quotas * * * loans on basic commodities at not less than 90 percent of parity, production payments, commodity purchases, and marketing orders and agreements.

GOP platform

We pledge:

Use of price supports at levels best fitted to specific commodities * * *. Promises of specific levels of price support * * * are cruel deceptions.

Performance

Parity ratios fell from more than 100 percent to 77 percent in 7 GOP years, while the Republican President vetoed three price support measures. In a typical vote in Congress in 1958, more than 80 percent of the Democrats voted for high price supports, and more than 75 percent of the Republicans voted against.

FOREIGN POLICY

Democratic platform

American foreign policy in all its aspects must be attuned to our world of change. * * *

We shall expand world trade in every responsible way.

We shall support practical measures to ease the necessary adjustments of industries and communities which may be unavoidably hurt by increases in imports. * * *

We recognize and welcome the irresistible momentum of the world revolution. * * * We shall identify American policy with the values and objectives of this revolution. * * * We shall place our programs of international cooperation on a long-term basis.

The Democratic programs of economic cooperation will be aimed at making it as easy as possible for the political leadership in these countries to turn the energy, talent, and resources of their peoples to orderly economic growth. * * *

We shall keep open the lines of communication with our opponents. Despite difficulties in the way of peaceful agreement, every useful avenue will be energetically explored and pursued.

GOP platform

The preeminence of this Republic requires of us a vigorous, resolute foreign policy—inflexible against every tyrannical encroachment, and mighty in its advance toward our own affirmative goals. * * *

Carrying forward under the Trade Agreements Act, the policy of gradual, selective—and truly reciprocal—reduction of unjustifiable barriers to trade among free nations. We advocate effective administration of the act's escape clause and peril-point provisions to safeguard American jobs and domestic industries against serious injury. * * *

In Latin America, Asia, Africa, and the Middle East, peoples of ancient and recent independence have shown their determination to improve their standards of living, and to enjoy an equality with the rest of mankind. * * * We declare ourselves to be in sympathy with their aspirations.

We propose a further evolution of our programs for assistance to and cooperation with other nations, suitable to the emerging needs of the future. * * *

The Eisenhower-Nixon administration has demonstrated its willingness to negotiate in earnest with the Soviet Union to arrive at just settlements for the reduction of world tensions. We pledge the new administration to continue in the same course.

Performance

While the objectives of both parties in foreign affairs are, as they should be, the same, the performance record of Democratic administrations has been one of vigorous and positive action and initiative to advance these objectives (e.g., the founding of the U.N.; the Marshall plan; NATO; the point 4 program). The Eisenhower-Nixon administration, on the other hand, has been content to carry out earlier Democratic policies in a routine and unimaginative way and to act only in response to Soviet initiatives, and then only late in the day and on a minimum basis.

GOP congressional positions have reflected this essentially negative approach. A few examples from votes in Congress:

	Percent Democrats supporting	Percent Republicans opposing
House vote on point 4 program (1950)	86	80
Senate vote to maintain needed level of Marshall plan aid (1951)	79	87
Senate vote to increase military aid to Europe (1951)	56	97
House vote to increase funds for international education activities (1953)	66	88
House vote to avoid crippling amendments in Trade Agreements Act extension (1955)	64	64
Senate vote for 2-year instead of 1-year extension of Agricultural Trade Act (1958)	86	84
House passage of "Health for Peace" Act (1960)	91	67

SMALL BUSINESS

Democratic platform

We pledge: action to aid small business in obtaining credit and equity capital at reasonable rates * * * vigorous enforcement of the antitrust laws.

GOP platform

We favor * * * spurring the economy by fostering new and small business, by continued active enforcement of the antitrust laws.

Performance

The number of business failures increased by 94.3 percent between 1952 and 1959, while the total number of businesses in existence increased only 2.6 percent in the first 6 GOP years.

From 1952 to 1959, manufacturing firms with assets of more than $100 million increased their sales by 63 percent and their profits after taxes by 77 percent. In the same years, sales by firms with assets of less than $1 million increased only 20 percent, and their profits after taxes only 2 percent.

HOUSING

Democratic platform

We support a housing construction goal of more than 2 million homes a year (primarily for) middle- and low-income families. * * *

Special mortgage assistance, with low interest rates, long-term mortgage periods and reduced downpayments. * * *

Substantial low-rent public housing. * * *

Direct Government loans for housing for older people.

GOP platform

We support * * * adequate authority for the Federal housing agencies to assist the flow of mortgage credit into private housing * * * for middle- and low-income families. * * *

Effort to clear slums. * * *

New programs * * * for the elderly and nursing homes. * * *

Performance

Even with the slump in housing, Republican majorities voted against housing bills and in 1959 the President vetoed housing bills twice. Among other objections, both veto messages said programs for the elderly, urban renewal and low-rent public housing were either "entirely unnecessary" or "excessive." Eighty percent of the Democrats consistently voted for these measures. A 1960 bill to ease mortgage money has been threatened with a veto.

JOBS AND WAGES

Democratic platform

We will reduce current unemployment to a minimum.

If recessionary trends appear, we will act promptly with countermeasures. * * * We pledge to raise the minimum wage to $1.25 an hour and to extend coverage to several million workers not now protected.

GOP platform

We must raise employment to even higher levels. * * *

We pledge * * * upward revision in amount and extended coverage of the minimum wage to several million more workers.

Performance

GOP recessions have raised the unemployment plateau higher each time, with 5 percent of the labor force out of work most of the time since 1954.

Republicans viewed a $1.25 minimum wage as inflationary, thus forced $1.15 into the bill enacted by the House. The GOP also opposed coverage of an additional 7½ million workers.

In a showdown Senate vote on August 18, 1960, on increasing the minimum wage to $1.25 and expanding coverage, 75 percent of Democrats led by Senator KENNEDY supported the measure; 55 percent of the Republicans opposed it.

EDUCATION

Democratic platform

Financial support, within the traditional framework of local control * * * will take the form of Federal grants to States * * * including classroom construction and teachers' salaries.

GOP platform

We pledge * * * a program of Federal aid for school construction. * * * We believe * * * direct contributions * * * for teachers' salaries can only lead * * * to Federal domination and control of our schools.

Performance

Every year since 1953 Democrats have tried to enact legislation providing for Federal aid for school construction and teacher salaries. GOP promises of "full support" came easy, but the White House was silent and NIXON "vetoed" education aid with his tie-breaking vote (February 3, 1960). Nearly two-thirds of House Democrats voted for, and more than two-thirds of the Republicans voted against, school aid in 1960.

PUBLIC WORKS AND NATURAL RESOURCES

Democratic platform

The Democratic administration * * * will begin again to build multiple-purpose dams, hydroelectric facilities, flood-control works, navigation facilities, and reclamation projects.

Federal action is needed in planning, coordinating and helping to finance [water and air] pollution control. The States and local communities cannot go it alone.

GOP platform

We pledge * * * development of new water resource projects throughout the Nation.

Strengthened Federal enforcement powers in combating water pollution. * * * Federal grants for the construction of waste disposal plants should be made only when they make an identifiable contribution to clearing up polluted streams.

Performance

In 1956, 1958, and 1959 President Eisenhower enforced the GOP maxim of "no new starts" by vetoing bills for much-needed flood control and reclamation projects. The Democratic Congress overrode the 1959 veto. In 1960 the President vetoed a bill to help communities build sewage disposal plants, saying water pollution was "a local problem."

MEDICAL AID FOR THE AGING

Democratic platform

The most practicable way to provide health protection for older people is to use the contributory machinery of the social security system.

We reject * * * the indignity of a means test—a pauper's oath.

GOP platform

We pledge * * *

Revelopment of a health program that will provide the aged needing it * * * through a contributory system, protection against burdensome costs of health care.

Performance

Democrats in Congress have attempted to legislate a plan based on contributions to the social security system and requiring no means test. Republicans balked, but political expediency brought forth a GOP proposal of grants based on a means test, the cost to be shared by already overburdened States.

THE BOX SCORE ON SUPPORT OF PLATFORM OBJECTIVES, 1953–60

Here is an accurate record of Democratic and Republican votes in Congress in the past 8 years for and against various measures advancing progressive goals. While both 1960 party platforms endorse such goals it is clear that only the Democratic Party has actively supported them.

Goals	Senate			House		
	Number of votes	Percent Democrats for	Percent Republicans for	Number of votes	Percent Democrats for	Percent Republicans for
To liberalize and extend reciprocal trade agreements	8	84	57	14	76	53
To increase and stabilize farm income and develop soil conservation programs	71	77	34	21	78	27
To encourage rural electrification co-ops	6	86	24	5	93	30
To develop new water resource projects	16	82	87	22	72	43
To expand coverage and increase minimum wage and unemployment compensation	20	72	30	10	78	53
To aid depressed areas	9	83	24	4	76	24
To foster small business	7	75	12	3	92	66
Aid to education	11	77	36	13	65	57
To promote slum clearance and home financing	34	80	29	23	86	34

Nine examples of how the records of the candidates differ in support of platform objectives

NOTE.—From 1947 through 1950 Senator KENNEDY and Vice President NIXON served together in the House of Representatives. During this period they were called upon to vote on many issues covered in the platforms. The following examples of contrasting votes are clear-cut proof of their differing basic beliefs as related to the objectives expressed in the two 1960 party platforms.

	How the candidates voted	
	KENNEDY	NIXON
Foreign aid: Vote to cut military aid to NATO countries almost in half, RC 188 Aug. 18, 1949	Against	For.
Foreign trade: Vote to continue reciprocal trade agreements for 3 years instead of 1, and without crippling amendments, RC 81 May 26, 1948	For	Against.
Minimum wage: Vote to exclude 1,000,000 workers from minimum wage protection. Considered the key vote on minimum wage legislation, RC 172 Aug. 10, 1949.	Against	For.
Agriculture: Vote to increase appropriations for 1947 soil conservation payments by $129,000,000, RC 119 July 18, 1947	For	Against.
Small business: Vote to insist on stronger protection of small business in "basing-point" bill allowing "price fixing" by certain heavy industries, RC 231 Oct. 14, 1947.	do	Do.
Housing: Vote to cut low-rent public housing and housing research program, and to put program on unsound year-to-year basis, RC 119 June 29, 1949.	Against	For.
Social security: Vote to replace contributory insurance features for disabled workers with a noncontributory "public assistance" handout scheme, based on need, not on right. The substitute also provided less coverage, and lower benefits. This is considered a key vote in social security legislation, RC 217 Oct. 5, 1949.	do	Do.
Public power: Vote to restore funds for Missouri Valley and Bonneville development transmission facilities, RC 40 Apr. 25, 1947	For	Against.
REA: Vote to include $300,000,000 for REA loans in urgent deficiency bill, RC 14 Feb. 24, 1947	do	Do.

CALL OF THE HOUSE

Mr. BRAY. Mr. Speaker, I make the point of order a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 203]

Adair	Forrester	Passman
Alger	Frazier	Patman
Allen	Glenn	Pilcher
Anderson, Mont.	Grant	Powell
	Green, Oreg.	Preston
Andrews	Griffin	Rains
Anfuso	Griffiths	Reece, Tenn.
Auchincloss	Hargis	Riley
Baker	Harrison	Rivers, S.C.
Barden	Hays	Rogers, Colo.
Baumhart	Hébert	Rogers, Mass.
Belcher	Holland	Rostenkowski
Blitch	Horan	Roush
Boggs	Jackson	Shelley
Bolling	Jarman	Shipley
Bow	Johnson, Md.	Sikes
Bowles	Kelly	Siler
Boykin	Kilburn	Sisk
Brooks, La.	Kluczynski	Smith, Kans.
Broomfield	Lafore	Smith, Va.
Buckley	Landrum	Spence
Budge	Lankford	Steed
Celler	Loser	Sullivan
Coffin	McDowell	Taylor, N.Y.
Colmer	McGinley	Taylor, N.C.
Cooley	McMillan	Thompson, La.
Davis, Tenn.	McSween	Thompson, N.J.
Diggs	Macdonald	Tuck
Dingell	Machrowicz	Utt
Dooley	Madden	Vinson
Doyle	Magnuson	Walter
Durham	Martin	Weaver
Evins	Mason	Wharton
Farbstein	Mitchell	Widnall
Fisher	Moore	Wilson
Flynn	Murray	Withrow
Fogarty	O'Brien, Ill.	Zelenko
Forand	O'Konski	

The SPEAKER pro tempore (Mr. THOMPSON of Texas). On this rollcall 316 Members have answered to their names, a quorum.

By unanimous consent further proceedings under the call were dispensed with.

SPACE AND MISSILE GAPS

Mr. DADDARIO. Mr. Speaker, for the first time since 1812 there is doubt about our Nation's ability to defend itself.

In an age of space and missiles, this country is at the wrong end of the space gap and at the wrong end of the missile gap.

These are not partisan election year charges. Rather they are the considered opinions of the country's top military strategists and the men in charge of our scientific arsenal.

Lt. Gen. James M. Gavin, former Chief of Army Research and Development, warned that we are in mortal danger.

Gen. Maxwell D. Taylor, former Army Chief of Staff charged we were threatened with a missile gap "that leaves us in a position of potentially grave danger."

Ernest Stuhlinger, Director of the Army Research Projects Laboratory at the Redstone Arsenal, said only a few months ago that "we are in a meager second place everywhere in space."

These fears have been echoed by many others. Even Senator THRUSTON B. MORTON, chairman of the Republican National Committee conceded we were behind in missiles. But, as Senator KENNEDY has pointed out, the current discussions of defense center on how our retaliatory strength compares with the Russians today. The real issue is not how we stand today, but tomorrow—not in 1960, but in 1961 and 1962 and thereafter. Those are the critical years. If we are behind today, what will happen tomorrow. There is no sign that this administration will heed its experts.

Yet, when the Democrats left office in 1953, we were the strongest Nation in the history of the world. The free world looked to us for guidance and help, knowing we had the strength to live up to our commitments. There was no missile gap, no space gap. We had men minding the store who were not afraid of making hard decisions. They could have kept pace with the Russians. They could have dispelled the current doubt of our friends and allies.

General Taylor, closer to the situation than most Americans, put the blame for our lag on the "budget makers." He charged that the budget makers had become the "strategy makers."

Instead of making the hard and possibly unpopular decision to spend more money to make America safe, the Republicans went down to Madison Avenue to find slogan writers to lull America into a false sense of security.

While Russia was working night and day to catch up with us, we heard about "more bang for a buck."

While the Russians were preparing to turn their rockets to the moon we were told about maximum safety at minimum cost—an expression that has become a Republican cliche since it was first used in 1953.

And while the facts piled up, we were told we cannot afford to build military strength by sacrificing economic strength.

And, I am sure, if the Russians send a man to the moon while the Republicans are still in the White House there will be some new slogan to tell us all is well.

The stakes are too high for policy to be formed by the budget makers and the slogan makers. America needs to face up to the crisis and needs a leader who can make the hard decisions to keep our country safe. The cornerstone of peace, in this day and age, is an adequate defense. Defense is our investment in peace.

Mr. ROOSEVELT. Mr. Speaker, I am going to propound a unanimous-consent request, and I would like the gentleman from Ohio to have the opportunity to reply. That is a courtesy that should be given to a gentleman whose name is mentioned in debate.

Mr. SCHERER. Mr. Speaker, I reserve the right to object.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent to extend my remarks.

Mr. SCHERER. Mr. Speaker, I reserve the right to object.

The SPEAKER pro tempore. The gentleman reserves the right to object.

Mr. SCHERER. Mr. Speaker, I have just listened to the attack made upon the gentleman from Florida [Mr. CRAMER] and myself by the chairman of our subcommittee. Let me say at the outset I do not retract or modify in any respect any statement I have made on the floor of this House or anything I have said in any speech made in connection with the operation of the Highway Investigating Committee of this House of which I happen to be the ranking Republican minority member. I am not going to make any charges, but I am going to take a few minutes to tell you the facts, then let you be the judge of whether any accusations that the gentleman from Minnesota has made are correct.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. SCHERER. Mr. Speaker, I ask unanimous consent to proceed for 5 minutes.

Mr. BAILEY. Mr. Speaker, I object.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Arizona [Mr. RHODES] is recognized for 60 minutes.

Mr. SCHERER. Mr. Speaker, I want to thank the gentleman from California for attempting to give me this opportunity to reply.

Mr. ROOSEVELT. Mr. Speaker, will the gentleman yield to me for a unanimous-consent request?

Mr. RHODES of Arizona. Mr. Speaker, I yield to the gentleman from California for a unanimous-consent request, but if he does not get it through this time I will not yield again.

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks immediately following the remarks of the gentleman from Arizona.

Mr. RHODES of Arizona. Would the gentleman mind extending his remarks before mine instead of after them?

Mr. BROWN of Missouri. That is satisfactory to me. I ask unanimous consent that my colleague from Indiana, Mr. BRADEMAS, may extend his remarks in the RECORD, and I also ask unanimous consent that I may extend my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. BROWN of Missouri. Mr. Speaker, I have just finished talking with the distinguished chairman of the Ways and Means Committee [Mr. MILLS] about the outlook for our proposals to grant tax relief to small business so our merchants can plow back earnings for expansion.

The chairman tells me that these proposals are very much alive and will get every consideration when his committee

undertakes a general overhauling of the tax structure in January.

This is heartening news; and, as a member of the Small Business Committee I rise today in the final hours before adjournment to urge the Members to discuss small business tax relief with the folks back home and start a grassroots ground swell for this most necessary legislation.

Small business is the very heart of the free enterprise system. One of the facets of our American way of life that must be preserved is the freedom of opportunity for a man to start a new business of his own choice and build it into a successful concern.

In other years, when our population was smaller and more rural in nature, the climate for small business was healthier than it is today in this swiftly changing world. And, in all honesty, if this climate is not changed, I fear for the future of small business.

It is a fact that small concerns cannot get access to adequate capital today. Whether money is loose or tight, the Main Street merchant or the small manufacturer has few places to turn for equity capital or long-term loans. Studies we have made in our Small Business Committee show that 99 percent of long-term insurance loans to business go to large concerns borrowing $50,000 or more per loan. Substantially more than three-fourths of insurance company loan money flows into the multimillion-dollar corporations.

The commercial banks try to take care of the short-term capital needs of our merchants and small manufacturers; but banks are limited under the law—and rightly so—to working capital loans, not long-term money for capital improvements.

For years now, the Government has tried to fill a portion of this void by supplementing private capital sources with loans by the Small Business Administration. Some of our concerns in southwest Missouri have been saved by loans from the SBA; but the SBA does not even begin to fill the vast need for small business capital.

Two years ago, we passed the Small Business Investment Act to create another source for long-term loans and equity capital for small business. The program is just barely off the ground; it is a system with great potential, if developed properly; but no one would contend that even the investment companies will meet the tremendous capital needs of small business.

Small business, especially new concerns, must be able to plow back a portion of their earnings into the business for growth and expansion. And the truth is that the present tax structure makes such plowbacks extremely difficult, if not impossible.

Just when a man gets to doing business, buying and selling more merchandise, adding additional warehouse space or buying new trucks, he gets hit with a big bite from the Department of Internal Revenue; and there goes his capital.

Small businessmen are patriotic Americans. Everyone recognizes that we must all shoulder our share of the tax requirements in these very complex and dangerous hours of history. But the present business tax structure hits the small or new business a much more serious blow than it hits big business, because big companies are not so dependent on retained earnings for capital. They can go to investment banks, insurance companies, pension funds, and so forth, for new capital for expansion. Small concerns have no such sources. Most of them must rely on retained earnings.

For these reasons, I have been urging tax revisions to help small businesses retain more of their earnings for capital expansion ever since I got to the Congress. Our Small Business Committee has made many appeals to the Ways and Means Committee on this subject. We got some minor revisions in 1958; and they were welcome, indeed. All of us commended the Ways and Means Committee for this action; and I feel sure that most Members want to grant still more relief for small business when the tax laws are revised again.

My own bill, H.R. 473, would permit a small business to retain 20 percent of its annual earnings, up to $25,000, for plowback investment in strengthening the business. This is one way to help solve this problem, and I think H.R. 473 is a sound bill. I shall continue to press for this measure.

But if there is a better way, if it can be done through adjustments of the general tax level or by changes in the regulations on deductible items, or however it might be done, I am willing to join with anyone on any worthwhile legislation that will accomplish our purpose.

Small enterprise is being stunted by an unhealthy climate—few sources for capital and a tax structure that limits reinvestments of earnings.

Trustbusting and antimonopoly actions certainly have their place in preserving the free enterprise system. But the best way to prevent unhealthy giantism and concentrations and monopoly is to maintain a business community climate where small concerns can get or retain capital and compete with the giants.

I urge the Members of this House to talk with your merchants and manufacturers about this problem this fall, and let us make tax revision for small business a must item on the next year's agenda.

Mr. BRADEMAS. Mr. Speaker, the nearly 8 years of Republican administration have resulted in a lop-sided prosperity under which the rich got richer and the poor got poorer.

Let us compare the prosperity of big business and the prosperity of the man who works for a living during these 8 years.

On one side of the ledger we find these facts: Between 1952 and 1959 total corporate profits increased by 43 percent; profits of large corporations increased by 76 percent; dividend payments increased more than 50 percent; and total interest income increased more than 100 percent.

On the other side of the ledger we find these figures: In March of 1960 there were 142 communities in 29 States where more than 6 percent of the workers were unemployed. In several major cities—Detroit, Pittsburgh, Buffalo, and Providence—almost 1 in 10 were out of work.

Many of these communities would have qualified for assistance under the depressed areas bill vetoed by the President.

The President explained he vetoed the legislation because, he contended, it "would squander the Federal taxpayers' money where there is only temporary economic difficulty, curable without the special Federal assistance provided in the bill."

Yet the statistics prove that many of the depressed areas which would have been helped had been so designated for more than 5 years. Most of the other areas had been so designated for 2 years.

Democrats in Congress have pressed for Federal help to encourage new industry and create more jobs in these areas, but twice these bills were vetoed by the President.

Under the Republicans we have had two recessions, one in 1953–54 and the other in 1957–60. In between we had the most serious inflation in our Nation's history.

Under the Republicans our rate of economic growth has dwindled to one-third of the rate of the Russians.

The Democrats feel that our economy must grow at an average rate of 5 percent annually and our platform pledges that we will achieve this goal without inflation.

The Republicans, in their platform, promise economic growth, but their tight-money policy of the past was one of the main depressants of the economy. The high interest rates might be good for bankers, but not for small businessmen. These policies certainly were not good for the consumer caught in this price squeeze, especially those consumers forced to live on fixed incomes.

The Jim Jones of the Republican convention, hailed as the sign of the future, is a fictitious myth. The Republican Jim Jones had increased wages and prosperity during the Eisenhower years, according to a key Republican speaker at the convention. But a New York newspaper located a real live Jim Jones and he had another story to tell. Living in a crowded apartment, working in a shop struggling for a union, seeing prices steadily increase while his wages were held stationary, he was forced to give up his vacation because he didn't have the money to go anywhere.

The son of the real Jim Jones was unemployed—one of the statistics ignored by Republican prophets of prosperity.

The increase in the rate of economic growth will help every Jim Jones. It will make jobs plentiful without distorting the economy. It will help us move toward a balanced budget. And it will provide moneys for the public sector of the economy, the public works, the schools, the hospitals, so badly needed throughout the country.

The problems of the present are severe enough, when left to drift unaided by Government, but they are minor when considered in the light of future developments.

Automation is right around the corner. We need to plan for automation so that men and women will be trained and ready for the shifting patterns of employment.

The present administration admires the past and looks to the status quo for guidance. This timid policy is not what made our country great.

The Democrats look to the new frontiers of the future, confident that the people of America will make the sacrifices necessary to meet successfully the challenges of the future.

We offer to the American people a program for the future. We offer vigorous leadership to direct these efforts. We rest our case on deeds, not words, on sincerity, not slogans.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD at the conclusion of all other special orders heretofore entered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. RHODES of Arizona. Mr. Speaker, reserving the right to object, would the gentleman mind putting his remarks before mine instead of afterwards?

Mr. EDMONDSON. Not a bit.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. LEVERING. Mr. Speaker, as a member of the Committee on Agriculture, I appreciate the opportunity to make a few remarks in connection with the farm problem—admittedly, the most critical domestic issue confronting the Nation today.

There is more wrong with agriculture than Secretary Benson. Dropping the controversial Secretary of Agriculture from any future Cabinet will not solve the farm problem. Making him the scapegoat for deep-rooted Republican farm policies, I predict, will not fool the farmer.

This administration has used what I call the seven times seven formula for dealing with the farm problem.

Total costs and losses on farm price support under the President, the Vice President and Secretary Benson has amounted in 7 years, to seven times more than for the 20 years under Roosevelt and Truman administrations, Mr. Speaker, which our Republican friends have smeared as spending administrations.

Republican farm policies have cost the taxpayer $31 billion, but they have failed to help the surplus or the farmer. The size of the commodity surplus in Government hands has multiplied seven times to almost $8 billion. The agricultural payroll has swelled from 65,000 in 1952 to 85,000 in 1959—and, Mr. Speaker, the Republicans call the Democrats bureaucrats.

During this period, 900,000 farm units were liquidated to decrease the surplus, but the surplus increased.

It is now clear that the real goal of the administration's farm policy is not to reduce the surplus but to run the small, independent farmer out of business. The goal, I fear, is to substitute for him the large corporate farm, making the proud farmer a foreman or laborer on his own lands, or running him off to the city to join the unemployed.

Our Republican friends admire the so-called IBM efficiency of the big farm, as they do the cold, calculating IBM efficiency of big business. What they have always failed to admire is the rugged individualism of either the small farmer or the small businessman. Their traditional dislike of the independence of the worker, who was too courageous to be intimidated by the big boss, is too well known to discuss again.

Adhering to the traditional reverence of things past, the Republicans view the agricultural surplus as a liability. The Democrats take a different view of the situation and offer plans and programs to return the American farmer to prosperity with dignity, and turn surplus food to an instrument for a better America and for world peace.

For the Democrats, the solution of the agricultural program is one of the challenges of the sixties.

The Democratic platform pledges, in clear language, a positive action to raise farm income to full parity of income levels and to preserve family farming as a way of life.

As Senator KENNEDY has said, this strongest pledge ever given to the American farmer by any political party in history means that farmers shall receive returns for their labor, for their managerial skills, and for their investments which are equal to the returns received for comparable human talents and resources in other types of enterprises.

I concur with the distinguished Senator from Massachusetts when he says that the farmer and his family have done more for America and received less for it than possibly any other group in our Nation.

The Democrats pledge a policy to raise farm prices and incomes; to use surplus food at home to benefit the nutrition for all needy Americans; to reserve a food supply for the hazards of modern war; a dynamic "food for peace" program abroad; and a long-range program for low-income farms, credit, research, and new rural industries.

We Democrats offer deeds not words. Our proof is in the doing. We have done and will do again. The Republicans have not done and will not do in the future. Their policy is the past. Ours is the future.

Mr. RHODES of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Pennsylvania.

Mr. RHODES of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD preceding the remarks of my colleague, the gentleman from Arizona [Mr. RHODES].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

TOWNSEND INFLUENCE FOR IMPROVED SOCIAL SECURITY

Mr. RHODES of Pennsylvania. Mr. Speaker, the social security amendments adopted by this Congress fall far short of the needs which face the people of our country. Despite our Nation's great wealth and ability to produce in abundance, there are still millions of citizens who live on inadequate incomes and suffer needless distress. Many of the other free nations of the world are far ahead of us in this important field.

The social security program is now 25 years old. Much progress has been made but the program is still shamefully inadequate. Minimum benefits amount to only $8 a week. The age requirement of 65 for men is much too high in these days of automation when increasing numbers of workers find it difficult to get jobs at 50 years of age.

Twenty-seven years ago when the Townsend pension movement was founded, Dr. Francis E. Townsend advocated many of the provisions which are now part of the social security law.

Other Townsend proposals have received substantial support in the Congress and will most likely be enacted at some future time.

Dr. Townsend envisioned the end of poverty among old folks when he proposed a Federal pension plan for all citizens at age 60 on a pay-as-you-go basis. He sought full benefits for disabled persons regardless at what age disability came.

I am glad that the new law will contain such a provision for disability benefits. I was disappointed that the age requirement for men was not reduced to age 62 as approved in the Senate. I was especially disappointed that an adequate medical care provision was rejected and replaced by a meaningless public assistance medical aid program that will require a pauper's oath before any aid is given. Congress also failed by not increasing income limitations to at least $1,800.

These are all Townsend proposals that were made 27 years ago. Dr. Townsend still lives at the ripe old age of 93. He takes pride in the part he has played in the long march forward for pension legislation for the senior citizens of the Nation.

Throughout the Nation he has many faithful followers who carry on the fight for social justice. Much progress has been made. Much more needs to be done. So long as millions of our aged citizens are without adequate means for proper housing, food and medical care the long hard fight for social justice will continue.

A Nation that is worried about its surpluses and the challenge of automation cannot afford to delay much longer in meeting the needs of its underprivileged and aged citizens.

Mr. PORTER. Mr. Speaker, I make the same request.

Mr. RHODES of Arizona. This is before my remarks?

Mr. PORTER. Yes.

Mr. RHODES of Arizona. I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

STRATEGY FOR PEACE

Mr. PORTER. Mr. Speaker, this country is losing out in the race for men's minds because we have no strategy for peace.

We are pouring billions of dollars into defense alliances and economic assistance, but we are undermining this aid by failing to project the purpose and idealism which underlies our actions.

Young nations and young men, who formerly turned our way for guidance and help, are today, in many parts of the world, questioning our motives. They see no consistent policy which they can trust.

We are in trouble because this administration moves from crisis to crisis. In the age of the fire engine, we are still using the bucket brigade approach to peace. Unfortunately, in our haste to put out the fire, we sometimes use buckets of oil instead of water.

The latest incident in Japan showed our advance planning for the President's trip was inadequate. Someone misjudged the temperament and feelings of the Japanese youth and someone miscalculated their effectiveness.

The summit was doomed to failure even before the U–2 incident. It was doomed because for the last 8 years we have failed to build the long-term strength essential to successful negotiation.

The poor timing of the U–2 incident, and the embarrassing coverups in its aftermath, were not the true issues. The real issue is the lack of a plan or a policy for dealing with a crisis of this magnitude.

When World War II ended, the Democrats had a strategy for peace that called for saving Western Europe from communism without resorting to war. It was a successful strategy. It was implemented by the Marshall plan and Point Four. It was protected by a military might here at home that made an all-out war an impossibility.

Today we need the same strong leadership for peace that Harry Truman offered this country. We need deeds, not slogans. We need a plan for peace.

The Democratic Party, in this election, offers such a plan. It is not an easy plan. In the words of Senator KENNEDY, it is a plan that calls for sacrifice. But the goal is survival.

The cornerstone is a defense so formidable as to leave no doubt that an attack on the United States would surely be followed by the destruction of the attacker.

But a stalemate of nuclear terror is not the answer. The Democrats offer proposals to end nuclear tests under workable safeguards, cutting back nuclear weapons, reducing conventional forces, preserving outer space for peaceful purposes, preventing surprise attack and limiting the risk of accidental war.

The plan calls for a national peace agency for disarmament planning and research to coordinate and direct this operation.

The program also calls for an increased exchange program directed toward the young people of the world, the students and new leaders. It calls for a national policy making machinery for assembling facts, making decisions and coordinating action.

The plan calls for a shift in emphasis from military to economic aid as quickly as conditions permit. And, looking to the future, it calls for planning to use the manpower and material released from the arms race to meet our backlog of public needs.

This program substitutes decision for drift in the quest for peace. It is the kind of program which made us the leader of the free world.

OPERATION VERACITY

Mr. RHODES of Arizona. Mr. Speaker, I yield to the gentleman from Ohio [Mr. SCHERER].

Mr. SCHERER. Mr. Speaker, I want to thank the gentleman from Arizona for yielding so that I can further reply to the gentleman from Minnesota.

As I said, I am not going to make any changes, but I am just going to tell you some things about the highway investigating committee and then let you gentlemen determine whether some of the charges that the gentleman from Florida [Mr. CRAMER] and I have made are true.

Back in 1956 when this highway program was started and there was going to be this expenditure of billions of dollars, both the gentleman from Florida [Mr. CRAMER] and I, time after time, in speech after speech, suggested and urged that the majority authorize the Roads Subcommittee of this House to conduct a surveillance of this program. There was no question but that such a surveillance of the program was necessary when we have the expenditure of that kind of money.

Now, heading the Roads Subcommittee was a distinguished Member of this House, the gentleman from Maryland [Mr. FALLON]. He had guided through this House all of the highway legislation. He is a Democrat. He is the most informed Member of this Congress on highway legislation and highway problems. He is recognized as such throughout the United States by people who are interested in the highway program.

Finally, in September 1959, just a year ago, after repeated urgings by the minority that such a committee be appointed, when we were approaching an election year such a committee was appointed by the majority. But, what happened? Was the gentleman from Maryland, GEORGE FALLON, named chairman or given authority to proceed; was the outstanding Member of this House, the man who had more knowledge about highways and highway programs than anyone else, retained as chairman? No, he was not. He was kicked downstairs. Why? Simply because the chairman of the full committee, the gentleman from New York [Mr. BUCKLEY], who is never here, decided that he wanted——

Mr. GREEN of Pennsylvania. Mr. Speaker, I want the gentleman's words taken down.

Mr. SCHERER. Almost never here. Well, I will withdraw that.

The gentleman from Maryland, Mr. GEORGE FALLON, was kicked downstairs simply because GEORGE FALLON was more interested in building highways for this country than he was in following the political dictation of the Tammany boss from Brooklyn. And, that is the reason GEORGE FALLON, the Democrats' outstanding Member in this House insofar as highway legislation is concerned, was not appointed chairman.

Then what happened? Everyone in this House and in this Congress knows that investigating committees are usually composed of an equal number from the majority and from the minority. Witness the recent Labor Rackets Committee in the Senate. It had four Republicans and four Democrats.

Most of the time, of course, on an investigating committee, there is one more Member of the majority party. But the chairman of the full committee—and I am not blaming the gentleman from Minnesota [Mr. BLATNIK]—but the chairman of the full committee, in this political year, loaded this committee lopsidedly 13 to 6. For the first 6 months that this committee functioned, Mr. BUCKLEY would not give the minority one clerk, or counsel. We worked in the dark for 6 months. Do you wonder why we charge this with being a political committee?

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. SCHERER. No; the gentleman from Arizona has the floor.

Mr. JONES of Alabama. Would the gentleman repeat his statement, I did not hear it?

Mr. SCHERER. I said that for 6 months after, you loaded this committee 13 to 6.

Mr. JONES of Alabama. I mean the reason the gentleman will not yield.

Mr. SCHERER. I thought the gentleman said he did not hear what I said.

Mr. JONES of Alabama. I did not hear what the gentleman said about not yielding.

Mr. SCHERER. The gentleman from Arizona [Mr. RHODES] has the time and I cannot yield; and I am asking him not to yield until I finish.

For 6 months after this committee was organized we had no representation on the staff, although we requested it time and time again. And then what happened? There was no hesitation in this election year to begin an investigation of the Bureau of Public Roads, or of the Defense Department, which was under the Eisenhower administration. I am not saying that we should not have conducted that investigation into vertical clearances. I am saying that was proper. But there was no hesitation on the part of the majority to do that in an election year. But then what happened? We were supposed to have hearings after the conventions.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. SCHERER. I decline to yield. We were told that we were going to have hearings after the conventions.

Mr. JONES of Alabama. Mr. Speaker, I see that the gentleman from Arizona [Mr. RHODES] is very reluctant to yield, so I shall withdraw my request.

Mr. RHODES of Arizona. Mr. Speaker, may I say to the gentleman from Alabama that I have yielded to the gentleman from Ohio [Mr. SCHERER]. When the gentleman has finished, if I have sufficient time left to make a few points that I want to make, I will be glad to yield to the gentleman from Alabama.

Mr. SCHERER. The gentleman from Alabama is just trying to interrupt my presentation. He does not like what I am saying.

I will tell you what happened. We had no hesitancy investigating an agency of this Government under the Eisenhower administration and we were going to have hearings, we were told, after the conventions. But what happened? The handpicked staff of this committee reported to the chairman of this subcommittee on June 9 that there was substantial evidence of a conspiracy to fraudulently increase appraisals in the State of Massachusetts. Immediately an announcement was made by the chairman of this subcommittee, without consultation with the minority, without any meeting of the committee, that there would be no more hearings this year. You may draw your own conclusions. I am telling you, the irregularities we looked into were peanuts compared to the scandals in Massachusetts. That is what has them agitated. That is why all these charges against Mr. CRAMER and me are made, simply because we complained about these derelictions and political shenanigans.

Mr. BLATNIK. Mr. Speaker, will the gentleman yield just on that point?

Mr. RHODES of Arizona. I yield briefly.

Mr. BLATNIK. The gentleman makes some powerful statements when he compares the situation in Massachusetts with the rest of the cases. The gentleman does not have any more idea than the rest of us about the comparative status of that case. We said a week ago this morning that that will be investigated from top to bottom. The gentleman sat right alongside of me for 2 full hours and never said one of the things he is now saying on the floor. Why? Tell the whole membership of the House why.

Mr. SCHERER. I will tell you why: because your staff for the first time admitted they had done practically nothing, and they knew since January that these scandals existed in the State of Massachusetts; yet they have done practically nothing.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield for some factual corrections?

Mr. RHODES of Arizona. The gentleman from Arizona would like to take a few minutes to comment on the Democratic Operation Against Veracity.

Mr. SMITH of Mississippi. This is not veracity, this is complete lack of veracity.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield for a question?

Mr. RHODES of Arizona. I do not yield further.

Mr. Speaker, tonight we have had an attempt to counteract Operation Veracity. I am sorry that the gentleman who conducted it did not see fit to let us know that he intended to conduct it, otherwise I might have heard more of it. But I think I heard enough to know that this as a counteroperation was not successful.

You may have thought that maybe I am getting a little tired of this operation. As a matter of fact, my good friend from Texas [Mr. ROGERS] said to me this morning, "You have been putting this veracity out so long, I wonder if you have got any left."

I think I do, because I am certainly going to do my best now to take that barb that has apparently stunned some Democratic Members so badly and seared their flesh, and reinsert it where it belongs.

Let me tell you where I think it belongs. It does not belong on most of the Members of the House of Representatives on the Democratic side. It does not belong on the delegates to the Democratic Convention. It does not belong on the voters who are registered, and who belong in the Democratic Party. It does belong on the people who drafted the Democratic platform, and I say with all the candor at my command that those people made some statements which cannot stand the light of day. The only reason we have had this operation is to try to prove to this country and the gentlemen on both sides of the aisle, the persons in both parties in this country, that a platform is no longer a dead document as soon as it is read at a political convention. As far as I am concerned, a platform is a living document which lives from one convention to the next, and the convention which adopts it will have to be responsible for the contents thereof.

We have made remarks concerning the veracity of statements in the Democratic platform. There has been some talk tonight about certain parts of it. I would just like, though, to repeat those statements upon which there has been no comment by the gentlemen on the Democratic side at least while I was here, and again, I say I am sorry I was not notified that the Democratic operation would be going on tonight, otherwise I would have been here for the whole thing.

In the first place, this platform said that under the Republican administration the medical care for veterans has deteriorated. The gentleman from Ohio [Mr. AYRES], the ranking minority member of the Veterans' Affairs Committee, I think very conclusively stated that was not the situation.

Mr. GREEN of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. GREEN of Pennsylvania. Mr. AYRES is not the ranking member of that committee. Mrs. ROGERS is. This is just to keep the record straight, for veracity.

Mr. RHODES of Arizona. I thank the gentleman, and I accept his correction. Mr. AYRES is the next ranking minority member of the Veterans' Affairs Committee. As far as the quotation from the platform that the Republicans had adopted an antilabor policy, I have not heard anybody say anything about this so-called Republican antilabor policy. We said that such a policy never existed, and proved it. Do you know why I think nobody talked about it? Because so many of the people over on the Democratic side voted for the Landrum-Griffin bill. We were pleased that you did and proud that you did because without your votes, it would not have passed. I do not blame you. I would not comment on it either if I were you.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. The gentleman may recall when he was carrying on "Operation Veracity" the other day, several of us tried very hard to get him to yield at the point and at the time when the antilabor question was under discussion and refusal uniformly met our requests that the gentleman yield.

Mr. RHODES of Arizona. The gentleman knows exactly why the refusal was made. I did not have time to yield, unless I did so at the expense of colleagues who had material prepared for the occasion.

Mr. EDMONDSON. But, we endeavored to call to the gentleman's attention the fact that the appointment of antilabor people to the National Labor Relations Board is a clear-cut instance of antilabor policy by this administration and no opportunity was given to us to do that in the course of the gentleman's remarks.

Mr. RHODES of Arizona. The gentleman knows full well why the gentleman refused to yield.

The gentleman also knows that the gentleman from Illinois [Mr. PUCINSKI] just had 2 hours of special orders, and if the gentleman forgot to mention this during those 2 hours, I am very sorry. But I state again there has been nothing said which indicated that the Republicans ever adopted an antilabor policy. I still say in light of the remarks of the gentleman from Oklahoma that nothing has been said.

Mr. EDMONDSON. The gentleman knows that the Democratic platform includes that charge in it regarding antilabor appointments to the NLRB and it is a part of the Democratic platform, and we only have one edition of the Democratic platform being printed and not two editions.

Mr. RHODES of Arizona. I did not say anything about that part of the Democratic platform which might have been telling the truth. I am talking about the parts that do not tell the truth.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. The gentleman has discussed the platforms. I have copies of both platforms here. I wonder, if in the interest of veracity the gentleman would explain to those

of us who are somewhat troubled, what this language means that is found on page 11:

Diligent administration of the amended Labor-Management Relations Act of 1947 (Taft-Hartley Act) and the Labor-Management Reporting and Disclosure Act of 1959 (Landrum-Griffin Act) with recommendations for improvements which experience shows are needed to make them more effective or remove any inequities.

What does that language mean? I am pointing out to you the precise recommendation and language of the Republican platform. If I have ever seen intentional ambiguity, it seems to me that this is as delightfully an ambiguous statement as one could possibly make. So if the gentleman could clarify this for us and say, "No, you are not really antilabor," I would be very, very happy.

Mr. RHODES of Arizona. The gentleman is a very well educated man. He knows the difference between ambiguities and outright distortions of the truth. As far as ambiguity is concerned, I do not see any reason why I should explain it to a gentleman as well educated as the gentleman from Colorado.

Mr. JOHNSON of Colorado. The Democratic platform is quite precise and that is why I am so confused, when I read the Republican platform. We put out our platform first and you had a chance to put out yours after we had put out our platform.

Mr. RHODES of Arizona. As far as the other allegation is concerned, there was an allegation in the Democratic platform that the Republicans had had two recessions and that in between the two recessions there was the greatest inflation in peacetime. The gentleman from Wisconsin [Mr. BYRNES] pointed out that in 1 year under the Truman administration the cost of living went up 20 percent while in the entire Eisenhower administration, it went up only 11 percent.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Does the gentleman recall in 1945 when the war came to an end; was the gentleman a Member of the Congress at that time?

Mr. RHODES of Arizona. No, the gentleman was not, and neither was the gentleman from Colorado.

Mr. JOHNSON of Colorado. Well, I had been serving in the Budget Bureau during the war years, so I was thoroughly cognizant of the anti-inflation program at that time. I will recall for the gentleman's benefit as well as for the benefit of the Members of the House that Congress withdrew the power of credit control which the Federal Reserve had been exercising. That was in the 80th Congress. They pretty well sabotaged price control. I recall I had a bet that the Congress would extend it and even though they did extend it, it was so badly extended that I paid off on the ground that I had really lost even though a bill carrying that name had gone through.

Now, the Republican Congress had withdrawn from the President the effective tools to hold the cost of living in line until the economy could catch up with the tremendous backlog of demand which had built up during the war. The gentleman may recall that during the war years the Congress was timid about giving the President the amount of tax increase he had asked for to enable him to take care of the tremendous postwar inflation. He was left naked in that storm by the action of the Republican Congress.

Mr. RHODES of Arizona. Of course the gentleman is adopting the technique which we found to be prevalent in the Democratic "Operation Lack of Veracity." The gentleman has not answered the point in the Democratic platform we protest, but is trying to make another point. The gentleman has not answered the accusation which we made that the statement in the Democratic platform that between the two recessions was the greatest inflation in peacetime was a false statement. Figuratively, he is talking about sticks when the subject has been centered on stones.

Does the gentleman want to address himself to the mendacious statement in the Democratic platform?

Mr. JOHNSON of Colorado. I would like to know the page of the platform.

Mr. RHODES of Arizona. The gentleman can find the page on his own time.

Mr. JOHNSON of Colorado. Let me simply say——

Mr. RHODES of Arizona. Mr. Speaker, I cannot yield to the gentleman further.

Then there is another statement that the budget was not balanced during the 7½ years of the Eisenhower administration. The budget was balanced in the years 1956 and 1957, 1960, and 1961. There has been no attempt by the Democratic Operation Lack of Veracity to take this point up at all.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. EDMONDSON. On page 19 of the platform immediately following the reference to the 7½-year period appears this line:

The Republican administration has produced a deficit; in fact, the greatest deficit in any peacetime years in history in 1958 and 1959, but only occasional and meager surpluses.

So there is a recognition of your occasional surpluses as well as your record-breaking peacetime deficit.

Mr. RHODES of Arizona. That is just exactly the point I am trying to make. I thank the gentleman from Oklahoma for he has made it so much better than I could. But why should you say there was not a balanced budget during the Eisenhower administration when later on you say there were these surpluses. How could there be surpluses without balanced budgets? The difficulty with this whole platform is that you did not appoint a committee to clean it up; the Republican platform committee did. Now, after this—you are going to be a member of the party for a long time—make sure that they do this, will you?

Mr. EDMONDSON. The gentleman from Arizona probably had as much to do with the writing of the Democratic platform as did the gentleman from Oklahoma, and the gentleman from Oklahoma was not at the convention any more than was the gentleman from Arizona. But I hope, though, that when the gentleman comments on lack of veracity in the Democratic platform he will recognize the fact that the same paragraph states that after the 7½-year record of deficits, the same paragraph states that you did have a surplus occasionally.

Mr. RHODES of Arizona. I did not say the whole thing was untrue; certainly, there are true statements in the platform. The only difficulty I have is that there is not as great a percentage of true statements as I think there should be.

Mr. EDMONDSON. As I have said, it states your 7½-year record and also states there was occasional surplus.

Mr. RHODES of Arizona. I am sorry, all I can do is take what your platform says, not what you think it means. It says there was never a balanced budget.

Mr. EDMONDSON. That is not what it said. I have the exact language if you would like me to read it.

Mr. RHODES of Arizona. I have read it many times.

Mr. EDMONDSON. The line to which you make reference——

Mr. RHODES of Arizona. Yes; read it.

Mr. EDMONDSON. Is the first sentence of the paragraph and it says that during the past 7½-year period the Republicans have failed to balance the budget or reduce the national debt.

Mr. RHODES of Arizona. Or reduce the national debt.

Mr. EDMONDSON. That is the statement. It goes on to say that you have had occasional surpluses but you also had the biggest peacetime deficit in history. I would like to hear the gentleman deny that.

Mr. RHODES of Arizona. As far as I am concerned, I am talking about what the platform says, not what you think it says.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from California.

Mr. HOLIFIELD. I will take the responsibility for this paragraph if the gentleman will yield.

Mr. RHODES of Arizona. I have yielded to the gentleman.

Mr. HOLIFIELD. Let the gentleman from California read something:

Over the past 7½-year period—

Notice the word "period"—

the Republicans have failed to balance the budget or reduce the national debt.

That is true.

Responsible fiscal policy requires surpluses in good times to more than offset the deficits which may occur in recessions, in order to reduce the national debt over the long run. The Republican administration has produced the deficits—in fact, the greatest deficit in any peacetime year in history, in 1958–59—but only occasional and meager surpluses.

Note the last statement:

Their first 7 years produced a total deficit of nearly $19 billion.

I say the gentleman quibbles if he tries to apply a period of 7½ years to a 1-year period.

Mr. RHODES of Arizona. Let me ask the gentleman what he means by the word "budget." Does not "budget" mean 1 fiscal year?

Mr. HOLIFIELD. No; not when you talk about 7½ years.

Mr. RHODES of Arizona. This is Operation Veracity, and I thought the name was well understood. Apparently, I was mistaken.

Now, as far as saline waters are concerned, there is an allegation that the Republican administration had discouraged research in saline waters. The gentleman from Wyoming [Mr. THOMSON] stated that this was not the situation, and showed it was not the situation.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Montana.

Mr. METCALF. I pointed out to the gentleman from Wyoming I was on the Interior Committee with the gentleman from Arizona when the Republican administration was criticized for its slowdown of this saline water or brackish water program. I pointed out to the gentleman from Wyoming that every year the Democratic Congress appropriated more money than had been asked for by the President or the Budget Bureau, and I told the gentleman from Wisconsin and the gentleman from Wyoming, and secured permission to put in the record a table of the budget requests for appropriations for every year since this operation went into effect in the 82d Congress.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Iowa.

Mr. JENSEN. If the gentleman from Montana will look at the RECORD for today he will find there a documented statement of the history of the saline water program. I had that placed in the RECORD today. I am sure the gentleman after he reads that, and I will say to the gentleman every fact and every figure is documented, he will change his mind and I will also say that the Republican Party is the party which really carried on the saline water program. The facts and figures prove that.

Mr. RHODES of Arizona. It is also true that the first bills which were introduced for the saline water project were introduced by Republican Members of the House, two from the State of California. It is also true that the first money which was put in the saline water program was put in by an amendment in the other body by the Senator from South Dakota [Mr. CASE].

Mr. JENSEN. No one in this Congress has been more interested in the saline water program than JENSEN.

Mr. METCALF. I have no quarrel with that. I have nothing but praise.

Mr. JENSEN. And I happen to be a Republican, and the Republican record is 100 percent on that issue.

Mr. JONES of Missouri. Mr. Speaker, I offer a privileged motion. I move we adjourn.

The SPEAKER pro tempore. Has the gentleman from Arizona yielded for that purpose?

Mr. RHODES of Arizona. I have not, Mr. Speaker.

Mr. JONES of Missouri. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. Does the gentleman from Arizona yield for that purpose?

Mr. RHODES of Arizona. Yes, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. JONES of Missouri. A motion to adjourn is in order at any time.

The SPEAKER pro tempore. Not when another Member has the floor.

Mr. JONES of Missouri. Will the gentleman yield to me for the purpose of making a motion to adjourn?

Mr. RHODES of Arizona. I do not yield for that purpose.

Mr. METCALF. And I do not propose to labor this point, because I have permission to put this matter in the RECORD tomorrow. But, I want to say to the gentleman from Iowa and the Committee on Appropriations that I am going to put tables in the RECORD that are taken out of the official record of the Committee on Appropriations.

Mr. JENSEN. They are all in there.

Mr. METCALF. To show you that in the Republican 83d Congress the appropriation was only in the amount requested, and in every Democratic Congress since we have increased the budget and increased this program over and above the amount requested by the Republican administration.

Mr. JENSEN. I still stand on the record that I put in, which is documented with facts and figures. And, you cannot change them, my friend.

Mr. RHODES of Arizona. May I say to the gentleman from Montana that this is a matter of which I have some personal knowledge.

Mr. METCALF. We were both on the committee when this second authorization bill was passed.

Mr. RHODES of Arizona. The gentleman is correct. There was a bill passed by the Committee on Interior and Insular Affairs which encouraged the further activation of the program. There is no doubt of that. However, the Democratic platform says that the Republicans have been responsible for slowing it down. This I deny.

Now, there was a supplemental budget request sent up this year. The request was for $500,000, but the Appropriations Committee returned $400,000. I am sorry that they did not return the whole amount, but they did not. And this, of course, I do not need to tell the gentleman, is a Democratic Congress. So, the sword is going to cut many, many ways.

Mr. JENSEN. Mr. Speaker, if the gentleman will yield in all fairness I must tell the House the truth about that supplemental bill. The $100,000 by which we reduced that budget was by unanimous agreement of every member of that committee, both Democrats and Republicans. Now, that is a fact, and the members of that committee will tell you the very same thing that I have told you.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Wyoming.

Mr. THOMSON of Wyoming. I thank the gentleman from Arizona for yielding. I want to congratulate him for the way in which he has handled this Operation Veracity. I think it was handled very well.

There is one point I would like to mention. I see many Members on the floor of the House who may be able to help me out. I quoted in my remarks on Monday last, appearing at page 18197 of the RECORD from the Democratic platform with respect to depletion allowances, where the platform said:

> We shall close the loopholes in the tax laws by which certain privileged groups legally escape their fair share of taxation. Among the more conspicuous loopholes are depletion allowances which are inequitable.

It is my understanding that the Democratic candidate for Vice President has made it quite clear that this did not apply to oil and gas, for which I am deeply grateful, because of the importance of that industry to my area and to the Nation as a whole. But also in the State I represent and in areas many others represent there are other minerals. I happen to represent oil. We have coal which I previously mentioned, we have iron, taconite, copper, cement, and clay, and other minerals. Since this statement does not seem to apply to oil and gas, I wish some of these Members would tell me which one of these other industries it does apply to. I am sure the people who rely upon those industries for their jobs and livelihoods would be interested. I am sure it would give us a great deal of light upon some of these other statements with regard to research, et cetera, that have been made.

Mr. RHODES of Arizona. Mr. Speaker, at this time I yield to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Speaker, I ask unanimous consent on behalf of the gentleman from Nebraska [Mr. WEAVER] that he be permitted to extend his remarks in the RECORD prior to the remarks of the gentleman from Arizona [Mr. RHODES]; and following his remarks.

The SPEAKER pro tempore (Mr. HARRIS). Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. RHODES of Arizona. Mr. Speaker, I yield to the gentleman from Florida [Mr. CRAMER].

Mr. CRAMER. Mr. Speaker, I wish time permitted, but I understand that there is an effort being made to expedite matters. I had hoped to have the opportunity to answer charge by charge the statement made by my distinguished colleague from Minnesota.

However, let me say this: First, the record will clearly show that all Republicans on the Roads Subcommittee voted for funds in the organization of that committee.

Second, the record will show that the minority has at all times wanted adequate funds, but they have taken the

position that money should not be squandered. And when the gentleman from Minnesota [Mr. BLATNIK] suggested that we were not asking for a specific amount of money, the reason was that we had no information on which to base a request although we made it clear we were for adequate funds; we had been furnished absolutely no information, had not been consulted with as to the makeup of the staff of the committee.

Let me say with regard to the only argument I have with the majority and with the chairman of the subcommittee, that after we were served notice by our staff that there was substantial evidence of wrongdoing in a number of States, including Massachusetts and Florida, as examples, it was my position, knowing these facts, that we should go forward with hearings and we would be derelict in our duties in not doing so. It was the position of the chairman, as evidenced by statements to the press on June 20 and subsequently, in the committee, that there was no intention to hold hearings prior to the election. That was the difference between our positions. I termed the position of the majority one of handcuffing the committee between now and election. To this the chairman, the gentleman from Minnesota [Mr. BLATNIK], takes exception. Existing facts and future developments, I am sure, will sustain my position which I stated before in yesterday's RECORD beginning at page 18428. And I repeat that statement at this time.

Further, if all of these things are to be exposed, if this is, as one of the members of the subcommittee said, something that would make the Teapot Dome Scandals look like child's play, then I say let us get them out into the open. Let us do it now. Let us not let the elections hamper these investigations. Let us get them under way. I have a duty to inquire into and find out why they have not been under way in the past except in one State, Oklahoma, when matters in some six other States may also need thorough hearings. That is the criticism I have. I repeat it now. I can understand why it gives the chairman such discomfort that he should even question the motives of those of us who demand action, but I still think my criticism is justified.

Because of my determination that this subcommittee should be objective and constructive—fearless in its approach to all matters—I have been under constant attack. Early this year, information—false information—was leaked about the executive sessions of this committee to Drew Pearson, who manages to have at least two anti-Cramer columns every election. Headlines at home thus carried the story that I was somehow opposing the committee—when the facts are that I was the first member of the Roads Subcommittee on Public Works to ask for such a surveillance group, supported it wholeheartedly in its establishment and announced my support of sufficient funds to run it.

In executive session recently, I was served with a veiled threat that if I persisted with my demands for hearings in Massachusetts—and some other politically explosive States, my hometown papers would be reminded of Drew Pearson's article. The next day by coincidence my local papers repeated Drew's charges, with added fuel heaped on by my opponent. Under these circumstances, I cannot remain silent—the threat has been carried out—but I shall persist in my objection to handcuffing the committee until after the election—or at any time for that matter.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks immediately following the remarks of the gentleman from Minnesota on this same subject matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SMITH of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. SMITH of Mississippi. Mr. Speaker, in relation to statements about the Highway Subcommittee, as a member I feel that I have an obligation to correct the RECORD. I will first point out that the main argument is just the old situation, that never in the history of the House of Representatives so far as I know has the minority given orders to the majority. In this case the minority wants to give orders, and when they cannot they holler foul play. But let me point out that the gentleman from Florida testified before the Committee on Accounts, of which I am a member, in opposition to funds for this highway committee. As the result of his testimony the two Republican members of the committee who were present and voting voted against funds for that committee. If that is not opposition to a committee, I do not know what it is.

Mr. METCALF. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Montana.

Mr. METCALF. I want to make one comment upon the question propounded by the gentleman from Wyoming [Mr. THOMSON] as to the depletion allowances. I share the opinion of the Democratic Party on these various loopholes. I do not want to go into the whole question of depletion allowances.

As to the question of oil and other things in Wyoming, the State of Montana has just as much oil and twice as much coal. There are many areas, however, and I will be glad to extend my remarks, whose representatives made appearances before the Committee on Ways and Means where we sought to correct errors in the depletion allowances, without destroying the depletion allowances and drilling benefits. The Gore amendment that passed the House was unanimously approved. There are other things that have not been taken care of to make even our depletion allowances, drilling benefits, and so forth, equitable in the minds of the people in the industry.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. THOMSON of Wyoming. I admire the stand of the gentleman from Montana on this point because I had occasion a couple of weeks ago to talk with one of our mutual friends from Montana who told me the gentleman from Montana had courageously made 10 or 11 TV appearances in Billings, Mont., criticizing the depletion allowance on oil and gas. He told me that, and that even though he disagreed, he admired the gentleman for his forthrightness.

Mr. METCALF. Let us hope he will keep that attitude.

Mr. THOMSON of Wyoming. May I ask the gentleman from Montana, Does he or does he not agree that this has no application to oil or gas or minerals?

Mr. METCALF. I agree with the Vice President, I do not think it has any application to either oil or gas or the minerals.

Mr. THOMSON of Wyoming. How about this coal that the gentleman says his State has twice as much of as we have? I disagree with that. Does it have any application there?

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. BYRNES of Wisconsin. I should like to call the attention of the gentleman from Montana to the fact that he said some of the things in the platform with respect to inequities in the depletion allowance were taken care of in the Gore amendment. I call the gentleman's attention to the fact that the Gore amendment was passed before your platform was written.

Mr. METCALF. I only used that as an analogy to indicate that what was referred to in the Democratic platform was the kind of thing that was treated in the Gore amendment.

Mr. BYRNES of Wisconsin. I do not know and I am sure the Members would like to know what you mean by that generality, and what you are doing to do?

Mr. METCALF. I mean by that generality that there are other things in that area such as lime, glass, coal, and so forth that should be taken care of without infringing either on oil or minerals.

Mr. BYRNES of Wisconsin. Were they not taken care of by the Gore amendment?

Mr. METCALF. Some were and some were not. I think the Gore amendment made great progress and saved us a lot of embarrassment in defending some of the other matters of depletion allowance, but I think there are other things in that general area, and the gentleman from Wisconsin knows just as well as I do and he has attended the same hearings and read the same reports, and he knows that there are other things that need to be taken care of to make this whole depletion allowance equitable and just.

Mr. BYRNES of Wisconsin. What did the Democratic platform mean? What items or what areas are you now talking about? You had the Gore amendment before the convention.

Mr. METCALF. I have told the gentleman from Wyoming that I agree we should eliminate oil and minerals.

Mr. RHODES of Arizona. I would ask the gentleman from Wisconsin if he feels that this might not be another instance where the Democratic platform apparently does not mean what it says. It seems to be subject to all sorts of interpretations. In other words, depletion allowance does not mean depletion allowance and the word "budget" does not mean budget. It means whatever some of their members apparently want it to mean at the time.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Wisconsin.

Mr. BYRNES of Wisconsin. From what the gentleman from Montana said, I got the impression that what they are talking about, when it comes to correcting inequities, had been corrected just a few weeks prior to their convention through the Gore amendment.

Mr. RHODES of Arizona. As I understand it, depletion allowance comes down to a depletion allowance for sand and gravel and I have quite a bit of sand in my district and I am very unhappy about this, and I think others are very unhappy.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. Always to my friend, the gentleman from Oklahoma, on the subject of depletion allowances.

Mr. EDMONDSON. I want to join my friend, the gentleman from Montana, in expressing thanks to the gentleman from Arizona for his generosity in yielding to us for questions and comments on what he has had to say here today.

Mr. RHODES of Arizona. I thank the gentleman.

Mr. EDMONDSON. Can we conclude from the gentleman's position in commenting on the Democratic platform that it is the Republican position that there are no inequities of any kind in the depletion allowance framework of our laws and that we should not have any adjustments or changes in the law?

Mr. RHODES of Arizona. I think the Republican platform speaks for itself.

Mr. EDMONDSON. Would the gentleman state the Republican position on this?

Mr. RHODES of Arizona. The Republican position, as I recall, in the platform states that there should be a reasonable depletion allowance. Now the word "reasonable," as the gentleman knows, can be construed in the light of the exigencies of the situation as they might arise, and I am sure the gentleman wishes the Democratic platform had that nice word "reasonable" in it also.

Mr. EDMONDSON. I happen to be one of those who believes that we can have some adjustments and some equitable changes in our depletion allowances, and I personally would like to see some increases in the depletion allowance for our hard rock minerals which I think are vital to help a number of areas in this country; and also for coal. I think that should be increased.

Mr. RHODES of Arizona. Does the gentleman think there should be any decrease in the depletion allowance?

Mr. EDMONDSON. I think it is possible there are areas where decreases should be voted also. I would be willing to let the facts justify the decrease where the facts will prove the need for a decrease.

Mr. RHODES of Arizona. In other words, you like the Republican platform.

Mr. EDMONDSON. I would say this. I am not prepared to say the Republican platform is shot through with mendacity which the gentleman seems to think is the case with the Democratic platform.

Mr. RHODES of Arizona. Oh, no, the gentleman is not correct. The gentleman from Arizona has stated consistently that the Democratic platform is not shot through with mendacity but there are certain instances in which so many people have taken such liberties with the truth and with the spoken word that some of us felt it necessary to call it to the attention of the people of this country.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield for a further observation?

Mr. RHODES of Arizona. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I have listened with as open a mind as I think a Democrat from Oklahoma can summon for a Republican political speech to most of the gentleman's presentation. The gentleman has in his "Operation Veracity" totally failed to point out really solid substance for the allegation that the Democratic platform was full of inaccuracies and untruths.

Mr. RHODES of Arizona. I did not say that. I did not say it was full of untruths and inaccuracies. It does have quite a few, however.

Mr. EDMONDSON. I have heard you out and I do not think you have made your case on a single allegation. I think Operation Veracity can more properly be known as Operation Inaccuracy——

Mr. RHODES of Arizona. If I may interrupt, the gentleman is just like the old owl down in the swamp: The more light I shine in his eyes the less he can see.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from West Virginia.

Mr. BAILEY. I would like to remind the distinguished gentleman from Arizona that the sponsor and the author of the depletion allowance was the senior Senator, the late Senator Neely, of West Virginia. The matter was written into the statute books in 1927. I am very much surprised to see the Republicans so interested in this program that originated as a Democratic program.

Mr. RHODES of Arizona. I might say to the gentleman that we have never claimed to have a monopoly on good ideas; we certainly do not.

Mr. BAILEY. You are doing it right now.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. THOMSON of Wyoming. I think it was in January of this year that some of us including the gentleman from Colorado [Mr. JOHNSON], the gentleman from Wisconsin [Mr. REUSS], and myself had quite a floor debate on this matter of depletion. In the light of that discussion I am not surprised that the Democratic platform would stand for reducing the depletion allowance on gas and some other numerals. All I can say is that it demonstrates a fractionated party, that would have it mean one thing in our area, another thing in New York, and still another thing in West Virginia. Actually depletion allowances represent fair taxation necessary to provide an adequate supply of oil and gas and other minerals for this country. In our State oil, gas, coal, uranium, trona, taconite, iron, bentonite, and I could go on and on, are all important. I would like to know just which depletion allowances are loopholes and inequitable as the Democrats see it. I think they have an obligation to forthrightly state just what their platform means in such a general charge.

Mr. RHODES of Arizona. Did anybody reply to the Republican refutation of the Democratic statement that the Food and Drug Administration was being neglected, and so forth?

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. Certainly.

Mr. EDMONDSON. I do not know what our exact responsibility on this platform charge is, but I do recall a Secretary of Health, Education, and Welfare who reportedly resigned because of considerable difficulty in the handling of polio vaccine.

Mr. RHODES of Arizona. Of course, what the Democratic platform stated was that the Food and Drug Administration had been starved for lack of funds.

Did anybody say anything about the weakening of the transportation system? We have had lots of talk about internecine strife in the Public Roads Committee. However there was an allegation that in the Democratic platform there was a horrible weakening of the transportation system throughout the country. Did anybody mention that in the Democratic Operation Lack of Veracity deal with it?

I guess not.

Of course, the gentleman from Wisconsin [Mr. REUSS] tried to talk about the statement of the Democratic platform that the Republican failure in the field of economics was virtually complete, and I recall he said something about our economy being so bad. Here we have half-a-trillion-dollar country. We have had growth at a healthy rate. And yet the gentleman says this is not really true at all because in the President's Economic Report there is a footnote, mind you, that might indicate otherwise. Since when does a footnote overshadow the plain facts? What kind of myopia is this which looks so hard at the footnotes that the context of the main work is lost?

The charge of virtually complete economic failure cannot stand.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. Certainly.

Mr. WRIGHT. I am not sure just what our responsibility in that regard is.

Mr. RHODES of Arizona. Let me state your responsibility as I see it. The Democratic platform has stated that the failure of the Republican administration in the field of economics has been virtually complete. Those are very strong words. You should defend them.

Mr. WRIGHT. May I inquire of the gentleman from Arizona if he is satisfied with the rate of economic growth?

Mr. RHODES of Arizona. Now, if the gentleman is going to talk about the words "virtually complete," I will yield to him, but if he wants to make a speech I do not yield.

Mr. WRIGHT. I am a little curious that the gentleman is satisfied with the rate of economic growth that has been attained under the Eisenhower administration, which averages 2.4 percent annually, when we have an experience prior to that time and economic growth of an average of 5.4 percent.

Mr. RHODES of Arizona. You are talking about some war years in that 20 years, and I am sure you do not mean to do so. I do not claim to be satisfied with that rate of growth. I do not think I would be satisfied with the 5 percent or even a 10-percent rate of growth. I want the country to grow as does the gentleman from Texas. Where we differ is that I believe the growth of the economy will occur by the encouragement and propagation of the private sector of the economy. The Democratic Party is replete with promises to expand with the emphasis on expansion in the public sector.

Mr. WRIGHT. I agree with the gentleman's conclusion. One of the things I suppose would be the immediate abandoning of the administration's hard money policy which has restricted and stifled the country's economic growth. Will the gentleman agree with that?

Mr. RHODES of Arizona. Let us talk about the hard money policy for a while. Although some persons would like to believe otherwise, money really is a commodity subject to the laws of supply and demand, like any other commodity. When you have an expanding economy the money supply is taxed; in other words, there is often not enough money when you have an expanding economy. If the economy is going downhill you have plenty of money. It is characteristic of an expanding economy that for a period in that expansion there is a shortening of the supply of money and a hardening of the interest rate.

Mr. WRIGHT. I am curious as to the gentleman's position. Is the gentleman trying to maintain that the present administration has not had anything to do with the raising of interest rates and does the gentleman maintain this just simply happens, it has not been artificially manipulated?

Mr. RHODES of Arizona. I state it has not been artificially manipulated. In fact, if it had been artificially manipulated down, instead of having only an 11-percent increase in the cost of living during this administration, you would have had a 30- or 40-percent increase. If you push the interest rate you are going to push the cost of living down by increasing the supply of money up. You cannot have your cake and eat it, too, whether it is in flour or greenbacks.

Mr. WRIGHT. Has the gentleman forgotten that one of the first acts of this administration which occurred only 9 days after it took office was the act of the Secretary of the Treasury in suddenly increasing the yield on Government bonds which had been paying only 1⅞ percent interest to 2¼ and 2½ percent interest? In that one fell swoop of the pen you increased the public indebtedness by $30 million and set off this chain reaction. Has the gentleman forgotten that?

Mr. RHODES of Arizona. I do not think the gentleman believes that. I do not think the gentleman believes the administration did this on purpose, if it really happened. The gentleman knows that no matter who was President of the United States, if this occurred it was probably necessary.

Mr. GUBSER. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from California.

Mr. GUBSER. Is it not possible, particularly with a 2 to 1 majority, to pass legislation directing the Federal Reserve Board to loosen money? I would inquire further of the gentleman whether anyone on the Democratic side of this controlled Congress has ever introduced such a bill or whether any of the controlled committees has considered any such bill.

Mr. RHODES of Arizona. The gentleman knows the answer to that question.

Mr. GUBSER. It is probably insincere to be talking about loose money and not doing anything about it when you control the Congress 2 to 1.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Indiana.

Mr. HALLECK. I wonder if the gentleman from Texas, who talks about hard money, is really the enemy of the people who have been paying life insurance, social security, buying Government bonds that the Government sought to have them buy. I wonder how he feels about them and what has been done to them under the attitude he expresses.

THE LATE HONORABLE EDWARD F. McGRADY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, in the recent death of the Honorable Edward F. McGrady of Newtonville, Mass., the country has lost one of its truly great citizens, and I have lost a valued friend. "Eddie" McGrady led a long and constructive life, in the field of labor, in the field of government, and in the field of business. His friends were countless in number.

"Eddie" McGrady worked in the press room of various Boston newspapers, and in the ranks of labor was a constructive leader for many years in the American Federation of Labor, and achieved international fame as top-labor troubleshooter during the first administration of Franklin D. Roosevelt. He served in an outstanding manner for a number of years as Assistant Secretary of Labor. He later became associated with the Radio Corp. of America as vice president and director, maintaining his associations with this company and its affiliates for a number of years.

In any position in which he served, "Eddie" McGrady did so with outstanding ability, and in an honorable and trustworthy manner. He was truly one of the greatest men I have ever met. I valued greatly his friendship. I shall miss him very much.

To his daughters and other loved ones left behind, Mrs. McCormack joins with me in extending to them our heartfelt sympathy in their great loss and sorrow.

ANALYSIS OF DEMOCRATIC PLATFORM

Mr. HIESTAND. Mr. Speaker, the Democratic platform on housing, though true in its one basic statement, is very misleading, due to the fact that the year selected—1950—for comparison was an extraordinary year. It was nearly 40 percent greater than the previous year and the following year.

A more fair or normal comparison would have taken the last year of the Democratic administration, 1952.

Following is our analysis:

ANALYSIS OF DEMOCRATIC PLATFORM—HOUSING

"Today our rate of homebuilding is less than 10 years ago."

As far as total number of nonfarm dwelling starts is concerned, this statement is probably true by a very narrow margin, a margin actually less than the probable error involved in these statistics.

The year 1950, to which this statement obviously refers was, unitwise, the largest year in the history of home construction with 1,396,000 nonfarm units started. This total for 1950 barely surpassed the total for 1959 (by 18,000 units, countrywide). Since an 11.3 percent average error (on the low side) was shown for private nonfarm starts in 1959 as a result of the new counting system started by Census a year ago, there is a legitimate question as to the accuracy of this comparison since the difference in the 2 years compared is somewhat less than 1½ percent.

The year 1950 was actually the one freak year in recent housing statistics. The unusual volume of this year, which was over 20 percent above the year preceding, 1949, or the year following, 1951, resulted from the telescoping of housing starts as a result of the building industry's anxiety to get under way before the imposition of the credit and material controls which followed the outbreak of the Korean conflict in June 1950.

When you take the last 7 years of a Democratic administration and compare it to the first 7 years of the Eisenhower administration, it is a different story. During the 7 years of the Eisenhower administration, 8,400,000 nonfarm dwelling units were started as compared to 7,091,000 nonfarm dwellings started during the last 7 years of a Democratic administration. This is an increase of nearly 18½ percent under a Republican administration.

Total number of nonfarm dwelling units started

TRUMAN ADMINISTRATION

Year:	Dwelling units
1946	671,000
1947	849,000
1948	932,000
1949	1,025,000
1950	1,396,000
1951	1,091,000
1952	1,127,000
Total, 7 years	7,091,000

EISENHOWER ADMINISTRATION

Year:	Dwelling units
1953	1,104,000
1954	1,220,000
1955	1,329,000
1956	1,118,000
1957	1,042,000
1958	1,209,000
1959	1,378,000
Total, 7 years	8,400,000

When dollar volume is considered, 1959 is far and away the greatest year in housing history with estimated dollar value of total nonfarm residential starts $23.3 billion compared to $14.4 billion in 1950.

As a matter of fact, during 6 of the 7 years of the Eisenhower administration estimated dollar value of housing starts exceeded the best year under the Truman administration, 1950.

For the 7 years 1946 through 1952, total estimated dollar value of nonfarm residential construction was $74.2 billion. During the 7 years 1953 through 1959, total estimated dollar value of nonfarm residential construction was $126.7 billion * * * an increase under the Eisenhower administration of 70 percent.

Estimated dollar value of nonfarm residential construction

TRUMAN ADMINISTRATION

Year:	Dwelling units
1946	$5,126,000
1947	7,735,000
1948	10,278,000
1949	10,001,000
1950	14,445,000
1951	13,124,000
1952	13,496,000
Total, 7 years	74,205,000

EISENHOWER ADMINISTRATION

Year:	Dwelling units
1953	$14,333,000
1954	15,715,000
1955	18,971,000
1956	17,969,000
1957	17,525,000
1958	18,893,000
1959	23,280,000
Total, 7 years	126,686,000

Another way of looking at private and public residential construction is as a percentage of the gross national product. Since January 1, 1953, under the Republican administration an average of 5.9 percent of GNP has been devoted to housing. This is an increase over the 5.5 percent of the years 1946 through 1952 under the Truman administration * * * an increase of about 8.8 percent.

Private and public residential construction versus gross national product

TRUMAN ADMINISTRATION

Year	Gross national product	Residence construction,[1] percent of GNP
1946	$210,700,000,000	3.7
1947	234,300,000,000	5.0
1948	259,400,000,000	5.8
1949	258,100,000,000	5.7
1950	284,600,000,000	6.7
1951	329,000,000,000	5.5
1952	347,000,000,000	5.4
Total, 7 years	1,923,100,000,000	5.5

EISENHOWER ADMINISTRATION

1953	$365,400,000,000	5.4
1954	363,100,000,000	5.9
1955	397,500,000,000	6.4
1956	419,200,000,000	6.0
1957	442,500,000,000	5.6
1958	441,700,000,000	5.8
1959	479,500,000,000	6.3
Total, 7 years	2,908,900,000,000	5.9

[1] Includes maintenance and repairs.

(In all honesty it must be noted that the percentage of gross national product for the atypical, or freak year, 1950 when housing starts were telescoped in anticipation of Korean conflict controls is the highest in the 14 years covered, 6.7 percent. This figure can be compared with the high of 6.5 percent of gross national product for the Eisenhower administration in 1955 or with 1959 when construction equalled 6.3 percent of gross national product.)

Another valid approach to housing statistics compares the dollar volume spent for private, new residential construction with the total amount of gross private domestic investment.

During the 7 years of the Eisenhower administration, 29 percent of the gross private domestic investment was in private, new residential construction compared to 24.5 percent during the 7 years of the Truman administration—an increase of over one-fourth.

It is significant that this index shows 1959 as the top year. In 1959, private residential construction represented 31.4 percent of the gross private domestic investment compared to 29.1 percent for the year 1950 on which the statement in the Democratic platform is based.

Private new residential construction versus gross private domestic investment

TRUMAN ADMINISTRATION

Year	Gross private domestic investment	Residence construction, percent of GNP
1946	$28,100,000,000	17.1
1947	31,500,000,000	23.8
1948	43,100,000,000	23.4
1949	33,000,000,000	29.1
1950	50,000,000,000	28.2
1951	56,300,000,000	22.2
1952	49,900,000,000	25.7
Total, 7 years	291,900,000,000	24.5

EISENHOWER ADMINISTRATION

1953	$50,300,000,000	27.4
1954	48,900,000,000	31.5
1955	63,800,000,000	29.3
1956	67,400,000,000	26.3
1957	66,600,000,000	25.5
1958	54,900,000,000	32.8
1959	71,100,000,000	31.4
Total, 7 years	423,000,000,000	29.1

"A healthy expanding economy will enable us to build 2 million homes a year in wholesome neighborhoods for people of all incomes.

"At this rate, within a single decade we can clear away our slums and assure every American family a decent place to live."

This is obviously a desirable, although somewhat utopian, goal.

The present rate of new home-construction starts is estimated at 1,200,000 for 1960. The figure in the Democratic platform would call for 66⅔ percent increase. At today's prices, this would aggregate $38,784,480,000 for housing. On the basis of today's economy, this amount for home construction would amount to 9.8 percent of the gross national product. (Of course, it is suggested that such a magnitude of housing would be constructed under an economy which was considerably expanded.)

It is obvious that were the economy to increase at the proposed rate of 5 or 6 percent a year this goal of 2 million home-construction starts a year would not be achieved until the latter part of the decade, unless a considerably larger portion of the gross national product were devoted to homes than is predicted by even the most optimistic of economists.

Data from the National Housing Inventory covering a 6⅔-year period between 1950 and 1956 indicates there were then an estimated 3,400,000 nonfarm units which would be classified by the Bureau of the Census as dilapidated. In addition, there were 4–5 million units that were in good condition but lacked one or more of the basic plumbing facilities.

"The Democratic administration will end the neglect of our older citizens. We shall assure them not only health care but employment for those who want work, decent housing, and recreation."

More has been done to provide housing for elderly people during the Eisenhower administration than in any similar period in the history of the country. More than 20,000 private or public units, especially designed for the elderly have been built or started in the last 3 years alone.

One of the proudest achievements of this administration is that it inaugurated the first Federal measure to help elderly people to get good housing—further, it has done more to help elderly people get good housing than any other administration since the founding of the Republic.

In his state of the Union message in 1956, President Eisenhower asked the Congress to revise Federal housing laws "to meet the needs of the growing number of older people." From his proposals came a three-part program written into the Housing Act of that year.

One part of the program that is having spectacular acceptance relates to the provision of private rental housing for elderly persons by nonprofit groups such as churches, labor unions, fraternal groups, and similar associations.

As a result of President Eisenhower's recommendations, and the implementing action by the Congress in the Housing Act of 1956, such nonprofit groups have been able to obtain attractive FHA-insured mortgages, and applications have been rolling in in bale-load quantities.

In 1959 the administration carried the program a step further by sponsoring legislation to facilitate building FHA housing for elderly rental projects on a profit basis as well as the previous nonprofit basis.

As a result of these two developments, we find beautiful projects being constructed in all parts of the country.

Consider this abbreviated list of projects now in being:

Royal Oaks Manor (Presbyterian), California; Carmel Hall (Roman Catholic), Detroit, Mich.; Michigan Christian Home Association, Grand Rapids, Mich.; OEA Senior Citizens, Omaha, Nebr.; Bethel Methodist Home, Ossining, N.Y.; Evangelical Lutheran

Good Samaritan Society Home, Hobart, Okla.; St. James House of Baytown (Episcopal), Bay town, Tex.; Douglas Gardens (Jewish), Miami, Fla.

As of April 30, 1960, more than 71 projects with nearly 9,000 living units were either completed or on the road to completion. Meanwhile, scores more were moving up into the pipeline and the number of applications coming in can be counted in the hundreds.

However, this is only one part of the program.

Other changes were made. For example, low-rent public housing projects were opened to single elderly persons, 65 or older. Ever since 1937, single persons had been denied admission to such projects.

Further, elderly families were given priority of admission; and the Public Housing Administration was authorized to help local authorities build or remodel dwellings specifically designed for the elderly.

As a result, more than 12,000 units of public housing designed especially for the aging have been added to the public housing supply in 3 years—in addition to the housing of many thousands of elderly families in standard units.

"A new Democratic administration will expand Federal programs to aid urban communities to clear their slums, dispose of their sewage, educate their children, transport suburban commuters to and from their jobs, and combat juvenile delinquency."

This statement involves in part programs currently conducted in housing and home finance under the community facilities administration and the urban renewal administration.

More American cities are engaged in urban renewal than any similar period in history—436 communities—more than double the previous number—have 750 renewal projects under way—four times as many as before 1953.

More has been done to help localities plan for sewers, water systems, schools, than any similar period in history—advances made to plan 1,300 public works projects involving a total construction cost of nearly $2 billion.

More cities and metropolitan areas are engaged in planning for the future than any similar period in history—an administration first in urban planning, with grants made for comprehensive planning in 90 metropolitan areas and urban regions and in 1,140 smaller towns throughout the country.

Before the Eisenhower administration, the term urban renewal was unknown. It is a new concept and phrase, created in 1954, for solving the long-standing problem of urban deterioration and decay of our urban areas through combined use of public and private efforts in the urban community. This is not just clearing slums—it is also restoring and preserving good areas and preventing new slums from developing.

More than 1,000 towns and cities throughout the country now have comprehensive local plans, known as workable programs for community improvement, to solve their major housing, planning, traffic, and land use problems through a coordinated attack. No such total community programs existed before 1954.

At the President's recommendation, the Congress has authorized since 1953 $1½ billion in Federal grant funds to aid towns and cities to redevelop and rehabilitate their slum and blighted areas—three times as much as was authorized before 1953.

Under the present administration, the number of towns and cities carrying out renewal projects has more than doubled, totaling 436, and the number of projects is more than 750—four times the number initiated before 1953.

Federal assistance on these earlier projects, moreover, was provided only for clearing slums already in existence.

There were no provisions for preventing slums from coming into existence. So the battle was a losing one from the beginning. It was as if we had built a hospital filled entirely with operating rooms, but with no place for patients to get well and forestall an operation.

The Republican administration (and Republican Congress) in the historic Housing Act of 1954 initiated an entirely new approach to the slum blight problem—the total approach.

Another farseeing program introduced by this administration (in 1954) is the planning program designed to help metropolitan areas combat the new phenomenon in American life known as "suburban sprawl."

This was the first such constructive Federal legislation of its kind.

At the end of 1959, there were 94 urban and metropolitan areas receiving planning assistance.

In addition (due to another provision of the 1954 Housing Act), more than 1,000 small municipalities were also receiving assistance.

AMERICA STILL LEADS FROM STRENGTH

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Indiana [Mr. BRAY] is recognized for 25 minutes.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. Mr. Speaker, I would like to say that I think it is very significant on the eve of adjournment, after this marvelous presentation by the gentleman from Arizona [Mr. RHODES], to note that he served on the Labor Committee with me and to remember that, running for the Office of President, both RICHARD NIXON and JACK KENNEDY have served on that same committee, and I think that the gentleman from Arizona [Mr. RHODES] did a wonderful presentation to show his merit in how he has had his background before he moved over to the Committee on Appropriations.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. BRAY. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, I regret there was not time during the presentation by the gentleman from Arizona [Mr. RHODES], to give our answer in detail, but I simply call to the attention of the House that position on transportation in the platform is correct.

In addition to the sentence the gentleman referred to, "Over the past 7 years, we have watched the steady weakening of the Nation's transportation system," there also appears the following by way of further detail, "Railroads are in distress. Highways are congested. Airports and airways lag far behind the needs of the jet age."

The critics cannot deny these observations.

The gentleman also made an allegation that the Democratic platform sought economic expansion entirely through further public spending. This is a completely unfair representation of the party position as expressed in the platform. What the platform actually says about economic growth is as follows:

> The new Democratic administration will confidently proceed to unshackle American enterprise and to free American labor, industrial leadership, and capital, to create an abundance that will outstrip any other system.
>
> Free competitive enterprise is the most creative and productive form of economic order that the world has seen. The recent slow pace of American growth is due not to the failure of our free economy but to the failure of our national leadership.
>
> We Democrats believe that our economy can and must grow at an average rate of 5 percent annually, almost twice as fast as our average annual rate since 1953. We pledge ourselves to policies that will achieve this goal without inflation.

It goes on to suggest ways this can be done—not only through an end to tight money and proper control of inflation but also by securing full employment, by giving aid to distressed areas, by planning for automation, and by a whole host of specific proposals that would favor the development of our free competitive enterprise system.

I do not want to intrude further except to say that it is not a fair presentation of the issue to suggest that the Democratic platform seeks expansion only by further public outlays. We have very specific recommendations for expansion on the private side.

I thank the gentleman for yielding to me.

Mr. BRAY. Mr. Speaker, the accomplishments of the United States hold a more commanding lead over the rest of the world than ever before. American production is so great that while the world is suffering from want, our problems are due to surpluses. However, despite this, there are those in America today who would deprecate America and the things for which we stand—the freedom and dignity of man.

I want to briefly discuss with you the knowledge and information that I have as to America's lead. While that lead is general, I shall principally discuss that which has to do with our military strength. Our American military strength has been a subject in which I have been interested for many years. I have been a member of the Armed Services Committee of the House for 8 years, and for 35 years have been a member of the Armed Forces either on active duty or reserve.

Each year I discuss our military strength, our progress, and our stated goals. In order to properly understand and evaluate our progress a background will be given which means that some remarks will be repetitious of developments previously discussed. I will point out the phenomenal progress that the United States has made in the last few years and I will compare our military strength of today with that of Russia.

THOSE WHO WOULD CALL OUR COUNTRY SECOND RATE

For some years we have been hearing the false and foreboding cry that the United States has become a second-class country, that we are weak in comparison with Russia in many fields, that our

poor defense capabilities and the "missile lag" are threatening us with destruction. This foreboding cry has been echoing and reechoing in the press, on radio, television, and the platform. Some columnists, commentators and politicians have had a field day deprecating our country and its accomplishments.

The attacks on the strength of the United States comes from several groups; the motives of each group are different, but their cries of alarm are much the same. These attacks are launched against several areas of our national life, but I will principally discuss those which pertain to our military strength.

On the American scene especially in an election year, it is impossible to ignore as important an issue as defense with all of its policies, propaganda, and developments. The American people must decide which statements are for political expediency and those that are real.

A second group which has added to the demand for greater defense appropriations are confirmed socialists or statists who are exponents of greater and greater spending regardless of the purpose of that spending and of increased Government control. This group has the misguided belief that such riotous spending is a wise method of redistributing the wealth. They are also the ones anxious to propose a Federal solution to every human problem. They are fascinated by the size and complexity of the Federal machine and want to see it strengthened to the point where it would not only dominate but annihilate free, private life in America. There is in America a group who believes that the average American does not know how to spend his money; that the all-knowing Federal Government should take more and more from him and spend it as the all-wise Government thinks is best for him. Several members of this group are writers and well known to us in Washington. They are leaders in this clamor for defense spending. Their goal is government expansion, they are not especially interested in defense; they would be equally strong advocates of spending for harbors, parks, canals, schools, public power, or forests if that special brand of spending could be made popular with the people.

A third group who says that we are faced with destruction unless we spend more money are armament salesmen. In order to sell their special missiles or weapons, they tell the American people that we are faced with destruction because of Russia's great military power, unless we spend another billion or more for defense, especially the missile or gadget which they are marketing. On the whole, our manufacturers in the arms business are doing a superior job, but several have resorted to the most incendiary allegations regarding the U.S. weakness and Russia's strength to high pressure the American people and force the Government to buy their special missiles or weapon, whether this weapon is needed or not.

A fourth voice in the clamor about American military strength is made up of dedicated officers of our military services, who naturally believe that their respective services are not being used sufficiently in our military planning. The officers of each service want more defense money. If our country would give to each service all of the defense dollars it wants and to each armament salesman what he says the military should buy, all of the production and wealth of America could not quench their insatiable appetite. We would destroy ourselves by national bankruptcy just as surely as a Communist military force could do. We already are spending more than 60 cents of every Federal tax dollar for national defense—a total in excess of $40 billion a year. We must make decisions as to our military plans and procurement that will give us the best defense and yet not wreck the United States by riotous spending. It was that wily architect of communism, Lenin, who predicted that the United States someday would spend itself into ruin.

THE MISSILE LAG

The missile lag has become a popular subject of discussion for those who would glibly say that America is behind Russia and that "pinch penny" policies of this administration have starved our defense. Exactly what is the missile lag to which they refer?

Immediately after World War II both Russia and the United States began the development of long-distance surface-to-surface rockets. Our project in this field was NX–774. It was ordered canceled on July 1, 1947. Today we can see that this was an unfortunate decision, for it was not until 1953 that the United States really revived the long-distance, surface-to-surface missile project. Russia had at least six years head start on us in this field and it is an outstanding achievement that we have been able to catch up and even pass Russia in most phases of military missiles despite her advantage.

After we abandoned our program, Russia continued her program to the limit of her capacity. In fiscal year 1950 we spent only a half a million dollars for both our intercontinental ballistic missile program and our intermediate range ballistic missile program. During fiscal 1960, which closed on June 30 this year, we spent $3.5 billion on missiles.

It is important that the American people understand the facts as to when the "missile lag" took place and also as to whether the "missile lag" exists today. This situation is well documented by the remarks of Congressman MAHON, Democrat of Texas, chairman of the subcommittee on defense appropriations, on the floor of the House on May 9, 1956, during the debate on the defense appropriations bill—CONGRESSIONAL RECORD, page 6994—for fiscal 1957.

Another important fact is that immediately after World War II the Soviets began an intensive program for the development of the ICBM (intercontinental ballistic missile). This country did not. We are trying now to make up for lost time, and whether we will be able to do it remains to be seen.

Later in that same year, on July 19, 1956, I commented on this statement of Congressman MAHON, and this statement appears on page 13599 of the CONGRESSIONAL RECORD for that date:

The ICBM field, I must admit, is one in which there is no definite knowledge as to whether the United States or Russia is ahead in technical progress. We know Russia began her extensive intercontinental development just after World War II. We did not start until a few years ago. The element of time is the one concession we must grant the Soviets in this field. If we are behind, it is because of our inaction in the years between the end of World War II and the conclusion of fighting in the Korean conflict.

When Congressman MAHON made that statement in 1956, "We are trying to make up for lost time, and whether we will be able to do it remains to be seen," there was real doubt as to if and when we could catch up with Russia in the long-distance ballistic missile race. Today we can definitely say that we have caught up with Russia in the missile race. Except for the fact that Russia today has rockets with a greater thrust than ours, we are definitely ahead of Russia in all phases of the missile race.

I would like to point out exactly what we have spent in the purchase of missiles in the last several years. I requested the Legislative Reference Service of the Library of Congress to provide the actual figures of missile production and procurement. Fiscal 1951 was the first year for which such figures were available. The figures are as follows:

Fiscal year:	*Total spent (millions)*
1951	$21
1952	169
1953	295
1954	504
1955	718
1956	1,168
1957	2,095
1958	2,737
1959	3,339
1960 (estimated)	3,500
1961 (estimated)	3,479

These figures certainly refute the statements that our country has been niggardly in our expenditures for missiles in recent years. In addition, since fiscal 1958 we have had separate appropriations for the Federal space program which I will point out later.

OUR MILITARY PROGRAMS MUST BE CONSTANT—NOT SPASMODIC

One of the most difficult problems in national defense is to keep a defense that will meet America's need. We must not allow Russia to guide us in that field. Our military strength must not be one that ebbs and flows as the Kremlin smiles or frowns. The policy of feast or famine has dominated our military thinking for too many years. Such a program is unduly expensive and places us in danger of enemy aggression when we are at our low ebb of strength.

The abandonment of our long-distance missile program in 1947 placed us at a disadvantage with Russia. Our military planning, just as our farming, business, and personal planning, must

be made in an orderly manner. This we are trying to do and I believe we are succeeding.

In May 1957, Congress, I think erroneously, cut the defense budget submitted by the President. Many of us who were aware of the Russian threat attempted to prevent this cut, especially in *certain fields* of military development. This attempt to restore part of the defense cut was made on May 29, 1957, and the vote is found on pages 8097 and 8098 of the CONGRESSIONAL RECORD for that date. Our attempt was defeated. It is interesting that this vote was just 4 months and 6 days before Russia launched sputnik on October 4, 1957.

It is especially interesting that almost without exception those in Congress today who are crying about the "missile lag" and blaming the administration for what they term "Russian superiority" in missiles and space, voted on May 29, 1957, against restoring the cut in the President's military budget.

DESPITE CANCELLATION OF MISSILE PROGRAM IN 1947, TODAY THE UNITED STATES IS AHEAD OF RUSSIA IN MILITARY MISSILES

Exactly where do we stand in the missile field?

The phenomenal progress that the United States has made in the intercontinental ballistic missile field from 1953 to the present is one of our greatest technological and industrial accomplishments. Our country cannot buy an intercontinental ballistic missile in the same manner as you would go to the grocery store to buy a loaf of bread. The missiles we are firing today are missiles that within the last few years were taken from the drawing boards to operational success.

The Atlas missile overcame early structural defects to the place where 37 firings have been a success, to a phenomenal accuracy at ranges up to 9,000 miles. Those shots had a greater degree of relative accuracy than if a golfer made 37 holes in one at a distance of 300 yards. Today, with the Atlas missile we can drop a nuclear warhead, 100 times as powerful as the bomb that was dropped on Hiroshima, on any target in Russia. While Russia had 6 years start on the United States in the ballistic missile field, in my opinion the Atlas missile is a better combat missile than Russia has produced. I must hasten to admit that Russia has rocket engines with greater thrust than ours, which are useful in space exploration, but not on the battlefield. We have recently fired Atlas missiles more than 9,000 miles with pinpoint accuracy. That is a far greater distance than is necessary for military usage. Our new missile, the Minuteman, has less thrust and distance than either the Atlas or the Titan, for we do not need this great a thrust for any military usage.

Atlas missiles are coming off the production line faster than we are building bases. It costs $150 million to build an Atlas base which will house 10 missiles for firing, which is many times the cost of the missile itself. Firing an Atlas ICBM is not like firing a roman candle. When it is fired you must rebuild its launching pad. It is true that we can speed the building of Atlas bases, but to do so would slow the newer intercontinental ballistic missiles which are on the way. Our next ICBM is the Titan, which has been successfully fired and will be placed on site ready to fire soon.

OUR NEWEST ICBM'S, THE TITAN AND MINUTEMAN, WILL BE PROTECTED FROM ENEMY SNEAK ATTACKS

For structural reasons it is difficult to fire the Atlas from a hard stand, but a Titan missile can be fired easily in that manner. A hard stand is a silo in the ground where the missile is stored for firing and is given almost total protection from an enemy sneak air or missile attack. Such protection is understandably most important, for an enemy's first objective in a surprise attack would be to destroy our power of massive retaliation at the very beginning of hostilities.

Next in line is the solid propellant Minuteman, a far cheaper missile that can be fired easily from hard stands or easily carried for firing in planes or on trucks and trains, which would prevent an enemy from destroying them before they are fired, as their location would not be known by a potential enemy. Polaris submarines capable of firing atomic warheads from concealed locations under the sea for thousands of miles with great accuracy are going into operation. It would take hours to set forth our missile and other military strengths, but I can assure you that America is not a second-class country but is far stronger than Russia, and we intend to keep it that way.

UNITED STATES LEADS IN SPACE

I am uncertain as to the value of many phases of our satellite and space program especially as it may have to do with military strength. However, we are definitely in the race with Russia in this field and regardless of the value it ultimately may have, it unquestionably has a strong effect on world opinion.

Our Government abandoned the long-distance missile program which was the forerunner of the space program, back in 1947. Naturally they did not see the embarrassment that would result in the abandonment of the program, when on the 4th day of October 1957 Russia placed Sputnik I in space.

However, thanks to the brilliance and capability of American scientists and technicians, the United States today can say that space travel is almost "all-American." Russia is superior in only one field of space, and that is that she has produced rockets of greater thrust than has the United States and these rockets are able to place in orbit heavier objects than we are able to place in orbit. The reason for this is their 6-year start in the field which they took advantage of while we had abandoned it.

The United States is now working on the Saturn project which, when it is fully operational in 1963 will move us far ahead of Russia in this field of thrust.

To date the United States has launched 26 satellites of which 14 are still in orbit; Russia has launched 8 of which 3 are still in orbit. The record shows our achievements in space are far greater and more useful than those of Russia, even though we entered this field much later than Russia.

The three Vanguards made great early discoveries in space including the earth's magnetic field and solar X-ray. The Explorer sent back the first photographs of the earth. The Pioneer went into orbit around the sun and sent back radio messages from 22.5 million miles. The Discoverer XIII marked the first reentry and recovery of a capsule from orbit in space. Echo, the 100-foot balloon circling the earth where all the world can see, is also a milestone in developments in space. Tiros sent back 23,000 photographs of clouds and signaled disturbances which became the basis for new techniques for weather forecasting. Midas marked the beginning of new infrared detection of foreign missile launchings.

On and on American achievements dwarf Russian accomplishments in the field of space. Space is becoming an all-American highway. The last year has been a sad one for those who would disparage our country and call us a second-class power. Our spending in the Federal space program since fiscal 1958 is as follows:

Total expenditures

	Million
1958	$139
1959	404
1960	715
1961 (estimated)	1,013

AIR DEFENSE

When our long-distance surface-to-surface missile program was abandoned in 1947 we continued our antiaircraft missile, the Nike. For this reason we are and have always been far superior to Russia in our missile defense against planes. As Russia fell behind us in the quality and quantity of long-distance bombers we have been able to cut down on our expenditures for antiaircraft defense and add this money to the building up of a stronger attack capability.

One great problem confronting us today is whether it will be possible to build up a defense against ballistic missiles. We are developing such a program. The principle involved is that we intercept the ballistic missile with an atomic missile that will destroy by its explosion the warhead that is approaching our country with a speed of thousands of miles per hour. It is complicated, but great progress has been made, and it may be a success. It is the Nike-Zeus program. It is similar to many programs on which we have worked during the last several years. Many of these programs are successful; many are not. However, one does not know whether these will succeed until they have been tried. Such efforts have contributed heavily to our military costs.

AMERICAN PLANES VERSUS RUSSIAN PLANES

It is interesting to go over the pages of the CONGRESSIONAL RECORD for the last 4 or 5 years and read statements to the effect that Russian planes are far better than ours. Four years ago there was a great demand that we buy more and more B–52 bombers to "catch up" with Russia.

On July 19, 1956, in answering the demand that we should construct more

and more of these planes, I made the following statement on the floor of the House, which appears in the CONGRESSIONAL RECORD for that date:

A few years ago we made that mistake when we assumed that the B–36 was the zenith of our large bomber development. Before 10 percent of the B–36's were finished they were obsolete because of the greater efficiency of newly developed jet bombers over the propeller-driven bomber. If today we should go all out for the production of B–52's, in a few years we could have the air literally filled with them; we would have ignored research and planning for far better planes which I personally know are on the drawing board.

Today even the strongest exponents of defense spending could not make such a demand, for it is apparent that we are far ahead of Russia in quality and quantity of long-distance bombers. We are today, however, going ahead with the development of the B–70 bomber, a plane far ahead of anything of this type in the world.

The decision to go ahead with the development of this bomber is very interesting. We had credited Russia with greater progress in her antiaircraft missile than she had actually made. It was earlier thought that by the time the B–70 could be developed and in use the Russian antiaircraft missile would have progressed to such a place where the B–70 would not be feasible. However, the success of our U–2 plane and the failure of Russia to be able to destroy it in the air points to the fact that the B–70 will have some years of utility after it becomes operational before Russia will have advanced to the place where she can intercept it.

OUR RESERVE FORCES ARE STRONGER THAN EVER BEFORE

The citizen soldier is an absolute necessity to our military strength. Being a reservist for 35 years myself, I am never satisfied with the progress and strength of our Reserve Forces. However, we have reached a standard of training and efficiency much higher than ever before. The National Guard and the organized Army Reserve are carrying out the heritage left to them by the early militia which fired the first shots at Concord and Lexington. The same high standards exist in the Reserve Forces of the Air Force, Navy, and Marines.

U.S. TRAINING OF FRIENDLY MILITARY FORCES ABROAD

The United States has for some years been sending military missions abroad to assist in the training and equipping of military forces in friendly countries and to prepare them to resist Communist aggression. This program should not be confused generally with our foreign aid program. While I have not been in total agreement with all these programs, I visited each of our military assistance missions adjacent to the Bamboo and Iron Curtains.

Perhaps no one thing that our country has done has so encouraged resistance to Communist aggression as has this program. There are today more than 200 divisions of troops in friendly foreign countries that have been trained under this program. One of the strongest evidences of the success of this program has been the fact that Russia has bitterly and violently verbally attacked all progress in this field.

OVERALL MILITARY DEVELOPMENTS

In order to properly understand our overall military developments and determine whether we are making progress, standing still, or allowing our military strength to wane, I will go back and present figures from just before the Korean war to date. I will leave out the period of the actual Korean war for that should not be compared with peacetime expenditures.

As of June 30, 1949, there were 419,000 persons in the Air Force. This number had decreased to 411,000 by June 30, 1950, which was just as the Korean war commenced. Today the strength of the Air Force is 845,000 men.

The strength of the Army has increased from a total on June 30, 1950, of 632,000 to the present 870,000 men.

The manpower of the Navy on June 30, 1949, was 450,000. In June 1950, just as the Korean war started, it was 382,000. Today naval manpower stands at 630,000.

On June 30, 1949, Marine strength was 94,000. This figure was allowed to drop to 77,000 by June 30, 1950, just as the Korean war started. Today the Marine Corps strength is 170,000.

As to appropriations, which I will discuss next, an interesting fact is that for the fiscal year ending June 30, 1950, just 6 days after the Korean war began, the Army had failed to spend 21 percent of its total appropriation. The following are the defense expenditures for 1949 through 1961, excepting 1951, 1952, and 1953, when the Korean war was in progress.

Fiscal year:	*Expenditures (Millions)*
1949	$11,994
1950	11,887
1954	40,336
1955	35,532
1956	35,791
1957	38,439
1958	39,062
1959	41,233
1960 (estimated)	41,200
1961 (estimated)	40,995

WILL THERE BE WAR?

The danger of war is very, very remote. It is true that Russian greed and conquest have in the last few years been thwarted and that she will resort to any action short of war to gain her goals. We in America did not understand Russia for we had had very few dealings with her. For 5 centuries Russia has been seeking a final frontier which she never finds. Russia's relentless march of expansion and attempted expansion has continued from generation to generation regardless of whether she was ruled by the early Ruriks, the later Romanoffs, or the Communists under Lenin, Stalin, or Khrushchev. Russia has used many vehicles for this expansion—Pan-Slavism, the church, and for the last 40 years, world communism. The Russian appetite for conquest has devoured 46 nationalities speaking 61 languages.

Russia, however, has been extremely cautious of risking battle unless the odds are overwhelmingly on her side. In many instances Russia has backed away from planned conquests, even of a very weak country, when it became evident that the country would fight for its freedom. As soon as Russian expansion has been resisted, she either moves to another frontier for new conquests or she cajoles, talking peace and war alternately, attempting to divide friends. Cold war is not new—Russia has practiced it for 500 years.

It is impossible to rationalize by our standards, the frowns and smiles—the wild threats and friendly promises—the rapid contradictions—the startling inconsistencies—the insane ravings—the puerile bragging—and obvious brazen falsehoods of the Kremlin. It is part of the cold war. The cold war is the Russian substitute for battle. She is becoming increasingly aware that she cannot gain her ends by war with us so she is placing all of her energies into the cold war. She will not intentionally resort to war for she realizes that war would mean her destruction.

America must remain strong—strong militarily, strong economically, but above all she must retain the spiritual strength of a free, God-fearing people. That is and will remain the basis of American strength. We must make our course clear to all so that there will be no danger of misunderstandings whereby Russia will mistake our intentions and fall into a war through misadventure.

THE U–2 INCIDENT WILL NOT LEAD TO WAR

The U–2 incident did not cause the failure of the summit conference—nor will it lead to war. The U–2 incident, while somewhat embarrassing to the United States, is in a practical sense far more embarrassing to the U.S.S.R., for it shows that just at the time Russia desires to appear strong to all her satellites and the uncommitted world, she is at the mercy of America who can fly at will over her country—something that she cannot do to us.

The U–2 incident is especially embarrassing to those in our own country who have been alleging the military superiority of Russia. It is apparent to all that our air superiority together with our leadership in the production of small battlefield nuclear bombs place Russia absolutely at our mercy. That fact will discourage Russia more than any other factor from risking war with us.

Before the proposed summit conference, Russia became aware that the United States would stand up to her; that we would not surrender the freedom of the free world to Communist tyranny. From the Russian viewpoint the summit conference had to be stopped, for her failure to obtain her goals at this forthcoming conference would have increased the mounting problems with her satellite countries. So Russia seized on the U–2 incident as an excuse for canceling the summit conference which she was going to cancel anyway.

I am certain that Russia today regrets making an issue of the U–2 incident, for in so doing she publicized to the world her own weakness and our strength. Russia, in fact, publicized to all her friends and her enemies that the United States could fly over her territory—something which she could not do to us.

AMERICA STANDS UP TO RUSSIA

Today America is beginning to understand Russia. With that understanding has come the will to stop the Russian aggression which has threatened to overrun the world. Russia screams and threatens us as her aggression is thwarted.

Unless Russia radically changes the pattern of behavior toward other countries which she has followed for over five centuries, then we can predict with reasonable accuracy the course that the Russian Bear will take in the months and years ahead. Isolated and detached incidents of Russian behavior are difficult to interpret. History is full of incidents maneuvered by Russia that have confused other countries when a real understanding of their philosophy and design would have left little doubt as to Russian intentions. The smiles and promises of the Kremlin can inspire hope, confidence, and trust that will lead unwary countries into the black, treacherous pit of delusion and slavery. Unless properly understood, the foreboding growls and threats of the Khrushchev Russian Bear can cause panic and submission through fear, when in reality the Soviet threat is a bluff—a bluff, however, which has gained her a substantial part of the world because few asked to see her "hole" card.

Russia has shown greater ability at winning conferences after a war than she has at winning a war. This is not a reflection on the Russian soldier, for he has been capable and brave, especially in the defense of his homeland.

If our country had understood Russian philosophy and history, we would not have been "out-generaled" in conferences at Teheran, Yalta, and Potsdam. Germany would have destroyed Russia except for the heroic efforts of England and the United States; yet Russia is the only country that gained territory as the result of World War II. Russia acquired Estonia, Latvia, Lithuania, part of Finland, East Germany, Eastern Poland. Even greater than this, Russia gained satellite countries which she holds under the iron heel of her armed forces—Poland, East Germany, Hungary, Czechoslovakia, Bulgaria, and Rumania. Russia was able to obtain control of all of these countries because the United States and England did not understand Russian history, philosophy, and goals. They naively believed Russian promises and allowed her to gain advantages by lies, deceit, broken treaties, and armed force. At no time did Russia take any real military risk except when Germany had invaded her and she had made every effort to avoid that risk, even to the extent of offering to join Hitler in his war against England and France. A proper understanding of Russian aims and procedures, which even a casual study would have given us, probably would have kept Central Europe and the Balkans outside of the Iron Curtain.

It is sad and disturbing that many in America, after our many experiences with Russia, still fail or refuse to see Russia in her true light. There are still those so naive that they believe Russia honestly intended to work at the summit toward a solution of the Berlin question that would not have sold West Berlin into Communist slavery. There are also those who believe that kind words will change the Russian Bear into a dove of peace.

However, it is encouraging that many in our Government are learning from the experiences of the past. When Russia was definitely moving into Iraq, Lebanon, and the Near East, President Chamoun of Lebanon asked the United States for assistance. The United States landed Marines in Lebanon on July 14, 1958. Khrushchev immediately demanded that we withdraw our troops and hinted dire consequences unless we did so. In a few days, American army, air, and naval forces had the situation well under control. It is significant that before all of our forces were landed, Khrushchev, realizing that the United States was serious, made unusual gestures of friendliness toward the United States. Russia respects strength.

RUSSIAN PROBLEMS AND WEAKNESSES

Russia is beset with many problems—problems that will cause her increasing difficulties in future years. As we look into the future, we can see many critical problems facing Russia—problems that may partially account for the loud and boisterous threats of today. The most critical problem facing Kremlin leaders is probably Berlin. It is the only place in the world today where one can so readily observe results of freedom in West Berlin and of communism in East Berlin by merely crossing the street. Berlin is a brightly lighted show window where all can see by contrast the well-kept, prosperous shops and busy, happy people of West Berlin as contrasted to the shoddiness and drabness of the regimented way of life that is communism. This is causing the great crisis in Berlin today. Russia feels that she can no longer afford to permit this illustration of communism's failure—that she must extinguish the lights in this show window.

Tito, while still maintaining communism in Yugoslavia, is demonstrating that it does not have to be tied to Russian-brand communism and is shouting his independence of Russia; but Russia has not felt sufficiently secure to slap down this unruly offspring.

China, the "sleeping giant" of the past, has been awakened by Russian Communists. While there is no open break between Russia and China, it is apparent that the "honeymoon" is over; and tensions are increasing. The 300 years of enmity will not tend to ease these tensions. Russia may some day wish that she had let China sleep.

As for Soviet publicity in the field of space, she impressed the world by placing the first satellite in orbit. However, the U.S. development in that field since then clearly demonstrates to all the world that we are now ahead of Russia.

Russia is also aware that we are well ahead of her in quality if not quantity of battlefield missiles, although she was working in that field earlier than we. Recent tests of the Polaris fired from an atomic submarine point out the lead that the United States has taken over Russia in the military field.

Today economic strength is absolutely necessary for any real military strength. One of Russia's great weaknesses is that basically she is weak economically although she has publicized some sensational scientific achievements. I personally believe that despite Russia's tremendous efforts she can never achieve stable economic strength under communism.

Despite the Soviet claims of progress, the Russian worker today has to work 8 percent longer than he did 32 years ago in 1928 to provide his family with the seven essentials of food. In the United States, on the contrary, the average American worker works half the time he did in 1928 to earn the money for those same seven food essentials. A comparison as to the amount of labor it takes to supply the necessities of living shows: an average worker in Moscow has to work 4 times longer than a man in New York for beef and milk; 8 times longer for eggs; 9 times as long for butter; 21 times as long for sugar; and 8 to 16 times as long for clothing as does the man in New York. There are serious scarcities of food in Russia and her satellites, especially East Germany. Despite all of her efforts, Russia is plagued with scarcities.

The manner in which Russia will attempt to solve these problems will dominate the pages of history of tomorrow.

WHAT SHOULD BE OUR ATTITUDE TOWARD RUSSIA

International and domestic events have been running against Russia. Her recent frantic ravings and actions attest to this. Russia will go to any ends short of war to change or thwart the direction that the U.S. leadership is taking against communism today. The United States and her citizens must not be confused by Russian actions as we and the others in the world have been in the past. We must learn to understand Russia. Every threat and vile accusation that Russia makes against us, every insult and condemnation is a tribute to our strength, to our understanding, to our nobility of purpose, and to our accomplishments in the cause of freedom.

We are refusing to sell or barter our freedom or that of our friends just to get along with Russia. America must remember that freedom is reserved for only the Godfearing, who are strong and brave. If we will stand strong and firm for freedom, Russia cannot prevail against us. Russia will never attack us unless she misinterprets our kindness for weakness, our chivalry for cowardice. We owe it to ourselves and the world to make our course ahead crystal clear, so that no country can mistake our position of Christian brotherly love and tolerance for cowardice and weakness. Our strength should never assert itself in bragging or aggression. It should be the calm, friendly assurance that comes from being fully prepared militarily, from being well informed, and from a knowledge that right makes might.

UNITED STATES IS PREPARED TO RESIST LIMITED AGGRESSION

There are those who believe that the only defense which America needs is a

capability to blast a potential enemy to destruction with nuclear bombs. That view is certainly erroneous.

In our discussing modern armament, we too often forget the fact that the most priceless ingredient in any armed force is the training, courage, patriotism, and integrity of the men in that armed force. In our American forces today, those elements are of the highest.

Throughout history military leaders have placed undue reliance on certain weapons or on one military theory, such as the reliance of France upon the Maginot Line. Many, including some generals, today say we should place our reliance on a nuclear bomb attack aimed at total destruction. Some want more and more ICBM's. A bill was introduced a few days ago to build 100 atomic Polaris submarines that would cost $10 billion. Our own experience in Lebanon in May and June of 1958 demonstrates that we have problems that an atom bomb will not solve. There have been 19 wars since we first dropped the atom bomb on Hiroshima. Yet, no country has used a nuclear weapon in any of these wars. If we relied altogether on the massive destruction by nuclear weapons we might someday find ourselves in the terrible position of having to start a nuclear war ourselves in self-protection.

Perhaps more important but less dramatic is our capacity to prevent and stop limited and small wars before they develop into a world holocaust. In the military vernacular, they are called brush wars. In peacetime the United States should have a capable, well-trained and equipped Army, Air Force, and Navy as we have today. The Army has an excellent family of missiles—the Corporal and Redstone, which will soon be replaced by superior Sergeant and Pershing missiles. It would take scores of pages to set out the new and modern weapons, nuclear and conventional, which the Army, Navy, and Air Force have aside from the intercontinental ballistic missiles which I discussed earlier.

I recently participated in practice helicopter landings from a carrier on the beach at Vieques off Puerto Rico. Our advance in techniques in beach landings was certainly a far cry from my experiences in beach landings in World War II. We are rapidly arming our servicemen with the newest, finest, and most modern of equipment for all operations.

We must be ready to take care of American interests at all times, and not merely rely on one gadget. A humorous story about a gentleman from Georgia illustrates this point. Before the commencement of the Civil War a Mr. Sylvaneus Lee, in a speech advocating war with the North, said vehemently that the South could whip the Yankees with cornstalks. After the war while he was making a speech as a candidate for public office in Georgia, a member of his audience took him to task, saying, "How can we trust your judgment when you told us before the war we could whip the Yankees with cornstalks?" Mr. Lee quickly retorted, "Yes, we could have, but those damn Yankees did not use cornstalks."

American preparedness must include all phases of armament.

RIOTOUS SPENDING FOR DEFENSE COULD DESTROY AMERICA

There is a terrific demand from many sources that America should spend more and more money on national defense. Too many in America believe that money is the answer to everything. I frankly doubt that there are more than a few fields in our military today where more expenditures would increase our military strength. I am certain there are fields where we could decrease our expenditures without reducing our military capabilities.

The military has always been expensive. The rapid change in military weapons is increasing that expense manyfold. Until 500 years ago military weapons were the club and sword, the stone, the spear, the bow and arrow. Then gunpowder and the weapons associated with it were used for the next 500 years. Just a little over 40 years ago the airplane entered warfare, and just 15 years ago the atom bomb was exploded. The development of the ballistic missile is in the same period. The weapons of today are obsolete tomorrow. The expense is terrific. Russia did not have the resources to keep pace in the field of airplanes. We have far surpassed her today as is shown in the U–2 incident.

We must spend our dollars carefully or we will wreck our country as the wily Lenin prophesied. We are working ceaselessly in our attempt to cut down the great waste of the American dollar. Only a few weeks ago we passed legislation which we believe will save millions of dollars in the transportation of servicemen's furniture and baggage. We have also passed legislation which we believe will save the taxpayers' money in the letting of contracts for the furnishing of equipment and ammunition. We are trying to eliminate those who are inefficient in spending our military funds. The job of insuring American defense without injuring our economic well-being is a difficult one, and I assure you that we will do our best to do just that.

My remarks have been primarily directed to our military strength for the reason that it is a field in which I feel that I am qualified to speak with some authority. Furthermore it is a field in which today there are those who would disparage America and are taking special delight in attacking our military strength. However, I hasten to point out that we must never change our attitude about certain American principles—principles of American strength which were the same yesterday, today, or the future. Four years ago I expressed them thus, and they apply today as surely as they did then:

I fear that, in the beating of drums and the blowing of bugles, we may forget that the real strength of America does not lie in our armed might, in our marching battalions, in our ships and tanks and guns. The real strength of America lies in its free, unregimented people, a nation under God, dedicated to the freedom and dignity of the individual, a free people that have produced the greatest economy and the highest standard of living on earth. Without that great economy and without that free unregimented people, all of our Armed Forces would become "as sounding brass or tinkling cymbal."

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I am delighted that the gentleman from Indiana [Mr. BRAY] did not have a political presentation to make to the House. I think we have had about enough politics for one night. So, Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore [Mr. HARRIS]. The Chair will count. [After counting.] One hundred and sixty-two Members are present, not a quorum.

Mr. McCORMACK. Mr. Speaker, I move the call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 204]

Alger	Glenn	O'Konski
Allen	Grant	Passman
Anderson, Mont.	Green, Oreg.	Patman
Andrews	Griffin	Pilcher
Anfuso	Griffiths	Powell
Ashley	Hargis	Preston
Auchincloss	Harrison	Rains
Baker	Hays	Reece, Tenn.
Barden	Hébert	Riley
Baumhart	Hess	Rivers, Alaska
Beckworth	Horan	Rivers, S.C.
Blitch	Jackson	Rogers, Mass.
Boggs	Jarman	Rooney
Bolling	Johnson, Md.	Rostenkowski
Bow	Kee	Shipley
Bowles	Kelly	Sikes
Broomfield	Kilburn	Siler
Brown, Mo.	Kirwan	Sisk
Buckley	Kluczynski	Smith, Kans.
Budge	Lafore	Smith, Va.
Canfield	Landrum	Spence
Celler	Lankford	Steed
Colmer	Loser	Sullivan
Curtis, Mass.	McDowell	Taylor, N.Y.
Davis, Tenn.	McMillan	Teague, Tex.
Dent	McSween	Thompson, La.
Diggs	Macdonald	Thompson, N.J.
Dingell	Machrowicz	Tuck
Dooley	Madden	Utt
Doyle	Magnuson	Vinson
Durham	Martin	Wainwright
Farbstein	Mason	Walter
Fisher	Miller, George, P.	Wharton
Flynt	Minshall	Widnall
Fogarty	Mitchell	Williams
Forand	Montoya	Wilson
Forrester	Mumma	Withrow
Frazier	Murray	Yates
Gilbert	O'Brien, Ill.	Zelenko

The SPEAKER pro tempore (Mr. HARRIS). On this rollcall, 313 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate returns to the House the bill (H.R. 7990) entitled "An act to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma," pursuant to House Resolution 640.

THE OIL IMPORT QUESTION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Massachusetts [Mr. CONTE] is recognized for 20 minutes.

Mr. CONTE. Mr. Speaker, the program of mandatory limits on oil imports into the United States was first imposed in March 1959—for political reasons. Under the guise of safeguarding our national security, imports of oil into the country have been sharply curbed. The real reason for this program has been to satisfy the profit-hungry motives of certain American producers and thus appease those in our political life who speak for them.

The political pressures for increased protection for the domestic coal and oil industries have continued unabated. The result has been that energy-consuming regions, such as New England, have either suffered higher prices or been denied the economies that a free market system should guarantee.

One of the most blatant exertions of political pressure on the Department of the Interior, which administers the mandatory oil import quota program, took place May 31 when a group of 16 Members of the House met with Secretary Fred A. Seaton and other Department officials to press for a further cut in residual oil imports. I was deeply shocked when, the following day, the Interior Department reduced the quotas of residual oil imports by almost 50 percent.

Such a drastic reduction sounds hardly possible, but it is true. Residual fuel imports in regions 1–4, which includes New England, averaged about 491,000 barrels daily between January and June of this year, but were set at only 249,999 barrels a day for the next quarter. For the last quarter of this year, a quota of 415,000 barrels per day has been established.

This figure is very close to the 400,000 barrels per day requested by the National Coal Policy Conference and is far short of the 560,000 barrels a day recommended by the Petroleum Industry Research Foundation.

It is also about 20,000 barrels per day less than for the corresponding period in 1959 when we in New England had a very mild winter.

What bothers me even more is the fact that the quotas established both in the past and future do not take into consideration any expansion of the industrial growth in this region. East coast residual fuel oil sales increased by about 7 percent in both 1958 and 1959, and yet despite this indicated growth and ignoring future growth, our quotas have not even been kept level, they have been cut.

As an example of natural growth which has not been taken into consideration are the steel industries that we have in regions 1–4. During the last quarter of 1959 they were on strike. During the last quarter of 1960 they will be operating.

How much residual fuel do they plan to use? Every indication is that their needs will amount to 26,000 barrels a day more than in the same period last year. I am delighted, of course, that they will need this amount, but I cannot understand why this increased demand was not included when the quota was fixed.

On June 2 the president of the National Coal Association, Stephen F. Dunn, said the bituminous coal industry was "extremely gratified that the Department of the Interior has cut residual oil quotas."

Mr. Speaker, we in New England and other energy-consuming areas are something less than extremely gratified by this Interior Department move toward a controlled economy, direct subsidy for certain domestic interests, and higher prices for us, the consumers.

It is time for us to take a serious second look at the implications of the mandatory oil import quota program. We in New England, who are particularly dependent on residual oil for power generation, industrial uses, shipping and apartment house, school, and hospital heating, have a right to know why we cannot purchase residual oil at the reasonable and low prices that a free economy should guarantee us.

At this point I wish to refer to a study on "Fuel and Energy Use in the 1960's," prepared by the Federal Reserve Bank of Boston. The report points out that New England is a have-not region with respect to fuel and energy. Hydroelectric power damsites are almost fully developed in our region, and we must import all of our coal, oil, and gas.

The Reserve bank report says that "unless present import barriers are removed or some radically new and cheap fuel such as nuclear fission is developed, New Englanders will be forced to spend more of their income for fuel and energy in 1970 than they do now."

Already we in New England are feeling the first indications of such pressure. In mid-July of this year the price of residual fuel was increased 15 cents a barrel. Translated, this means that it will cost New Englanders about $10 million a year.

I submit that an area which has suffered greatly already because of loss of industries to low-wage areas should not be forced to pay more for power at the same time, thus further weakening our competitive industrial position.

The domestic coal industry has sought to persuade us that in the name of national security, oil imports should be strictly curtailed so that more coal will be mined and available in event of a national emergency. Needless to say, the real motive of this industry is to cut off competition from oil in the hope that domestic consumers will switch to or remain with coal.

The national security argument, in relation to coal, simply does not hold water. The Reserve bank's report points out that "the total reserves of recoverable coal in beds over 4 feet in thickness could supply the needs of the entire country—at present rates of consumption—for about 20 years" and that "there is no danger that supplies will run short in the Northeast during the next 10 years."

The report says that "oil competition has probably been the most effective factor in keeping coal costs down during the last 12 years," and that "there is still surplus capacity in the coal industry and prices are lower than they would be without residual fuel imports."

No one need believe that we in New England are planning to do serious harm to the coal industry. Coal consumption in New England has remained at a remarkably steady level since 1949. The Federal Reserve predicts that if there is a freely available supply of residual oil imports, coal prices and consumption in our area may even move up slightly in the coming decade.

Moreover, the best estimates indicate that even sharply increased prices for residual oil would not return to the coal industry the bulk of the market which residual oil now occupies. The only consumers who would find it practicable to convert from residual oil to coal would be utilities and certain pulp and paper firms which have dual burning plants, the other 75 percent of the residual oil consumers would be forced to pay highly inflated prices just so that the coal industry could force a quarter of the market to make the costly readjustment to coal.

Mr. Speaker, we New Englanders are not complaining about minor costs in our regional economy. The potential cost to us of oil import quotas are tremendous. The best estimates show that there is a difference between world crude-oil prices and domestic crude-oil prices of approximately 50 cents a barrel. This is a conservative estimate of the average price differential. Some studies have shown a much greater differential. In 1958 New Englanders consumed about 236,000 barrels daily of residual oil, gasoline, distillate oils, diesel oil, and kerosene. If the absence of competition prompts domestic oil producers to raise their prices in a seller's market, the annual cost of these products to New Englanders would increase by $118 million or $50 per family or $11.85 per person.

Of course we have not experienced such a sharp price rise—yet. But all the essential ingredients for such a rise are present—most importantly, a lack of foreign competition to keep domestic oil and coal prices in line.

The study of the Federal Reserve bank concludes that prices of residual oil, which are especially important to us in New England, can only be maintained if present import quotas are constantly revised upward in the years to come.

The bank's best estimate is that if the oil import quota system is designed to induce the domestic petroleum industry to produce an increasing percentage yield of residual oil, a price increase of well over $1 a barrel probably would be necessary. Because of modern and improved refining techniques in the United States, most producers can earn far more money, under current prices, by refining most of their crude oil for products other than residual oil.

The Reserve bank's best estimate is that if the oil import quota system is designed to return some of the industrial fuel markets to the coal industry, a price increase of 50 cents a barrel for residual fuel would be necessary.

Mr. Speaker, the bank estimates that a 50 cents a barrel price increase in resid-

ual oil would cost New England's economy $30 million every year.

Today our Nation is locked in a deadly struggle for survival with the Soviet Union. This is not a struggle in which we can afford to do half our best. Our total, dedicated effort will be required for survival alone.

Under such circumstances, how long can we afford uneconomic and restrictive trade policies which mean inefficiency and waste in our Nation's economy?

The so-called national security argument in favor of restricting oil imports has been shown to be a shabby, unsupportable assertion.

I submit that the greatest danger to our national security is national self-deception, the belief that we can prosper when we squander our national wealth of uneconomic and outdated economic practices.

Let those who really believe in free enterprise show their sincerity by doing away with the costly and economically dangerous oil import quota program. We in New England are forced to bear the heavy cost in dollars of this program. But the whole Nation suffers if our free economy is shackled in times when our very survival is dependent on our economic health and vigor.

FLY THE FLAG FOR FREEDOM ON ELECTION DAY

Mr. MEADER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MEADER. Mr. Speaker, I have introduced a bill today calling on the President to issue a proclamation calling on Americans to fly the flag for freedom each national election day. The practice, I hope, will remind all Americans of the occasion of election day and their duty to preserve their Government by becoming a part of it.

Following is its text:

The President shall issue a proclamation in each even-numbered year, calling upon the American people to display the flag of the United States on the Tuesday next after the first Monday in the month of November in that year as a reminder on the occasion of election day of the duty of all citizens to preserve their Government by being an active part of it.

Mr. Speaker, I realize that this bill cannot become law this late in the 86th Congress. But I do expect it will be referred to the Judiciary Committee of which I am a member and I hope the various executive agencies involved will submit their reports during the coming adjournment. In that way, when I reintroduce the measure in the 87th Congress, much of the preliminary work will have been completed and we can adopt it promptly.

I am pleased to report to the House that conventions of both Democrats and Republicans in the State of Michigan have endorsed the proposal and emphasize that my measure should be viewed as a nonpartisan, patriotic proposal, which should attract universal support.

I was first stimulated, Mr. Speaker, to draft this measure by a distinguished journalist of the district I represent, Mr. Carl Saunders, editor of the Jackson (Mich.) Citizen Patriot. Mr. Saunders, as many of my colleagues will recall, is a Pulitzer Prize-winning editorialist, a great American and one devoted to the principles of Americanism and Christian freedoms. Mr. Saunders was responsible for focusing the attention of Americans on the real significance of Memorial Day by reserving a portion of that day of solemn observance for an annual prayer for peace.

At this point, Mr. Speaker, I submit for the RECORD a resolution of the Jackson County (Mich.) Republican Committee endorsing Mr. Saunders' original proposal:

Whereas we believe that the new 50-star American flag should be honored by establishing the tradition that it be displayed throughout the land from Maine to Hawaii and from Florida to Alaska on all election days as a symbol of the privilege of the citizens of this democracy to freely select by secret ballot the candidate of their choice: Therefore be it

Resolved, That Congress be asked to pass a resolution and the President of the United States to issue a proclamation declaring every election day a great patriotic occasion letting all men know that the banner which has led patriots into battle since the days of the Revolution also calls upon all citizens to preserve their Government by being an active part of it, and that all citizens should fly the flag as a symbol of freedom on election day; be it further

Resolved, That the Jackson County delegates propose this resolution for adoption by the Republican State Convention and urge the Members of Congress, regardless of their politics, to establish this proud tradition of flying the American flag on election day throughout our great democracy as a symbol of our freedom.

CONSTRUCTION OR RECONDITIONING OF VESSELS

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, a prime example of legislation that once served a useful purpose, since voided by changes and shifts in our economy, is section 502(d) of the Merchant Marine Act of 1936. It applied to the construction or reconditioning of vessels to be operated in foreign trade from ports on the Pacific coast. It provided that the lowest responsible bid by a shipbuilder on the Pacific coast shall be approved by the Government if such bid is not more than 6 percent higher than the lowest responsible bid of an Atlantic coast shipbuilder.

This 6-percent differential was a subsidy designed to place west coast shipbuilders in a competitive position with east coast yards. It recognized the lack of suitable manufacturing facilities for ship components on the west coast, and the distance from eastern supply sources. Furthermore, there was a need for adequate shipbuilding facilities on all coasts to be available in the event of a national emergency.

There was reason for the differential in 1936. With the coming of World War II, however, and the demands of supplying our forces in the far Pacific, there was a great industrial expansion in the west coast area. This pace continued through the postwar era. As a result, the competitive disadvantage of west coast yards, which justified a compensatory differential in 1936, has been corrected by the impressive development of manufacturing facilities and steel production facilities in that area.

Not only has the imbalance been leveled out, but, in some cases, is now tilted in favor of west coast shipyards. There is evidence to show that in recent bidding on a major dry cargo vessel the bids submitted by west coast shipyards were the lowest, even without the advantage of a differential.

The House Committee on Merchant Marine and Fisheries, in recommending enactment of H.R. 8093, the bill to eliminate this differential, reports that:

In the light of these developments, this bill is needed to remove a provision which under today's conditions gives west coast shipyards a discriminatory advantage over those on the east coast, gulf coast, and Great Lakes.

The reasonable legislation of 1936 has, by a paradoxical change in circumstances, become the basis for unreasonable discrimination in 1960.

The elimination of the 6-percent differential is now necessary to restore east coast, gulf coast, and Great Lakes private shipyards to competitive equality with Pacific coast shipyards.

It is expected that the Congress will remedy this situation before it adjourns.

THE UKRAINIAN CONGRESS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, the occasion of the 20th anniversary of the Ukrainian Congress suggests an opportunity to consider several broad subjects which concern our country today. The Ukrainian Congress Committee of America represents more than 2 million Americans of Ukrainian ancestry in various Ukrainian organizations throughout the United States. However, ideologically it represents much, much more. It stands for the hope of Ukrainian independence from the Soviet Union; it stands for the liberty of all countries behind the Iron Curtain; it stands for worldwide freedom from tyranny, dictatorship, and aggression. In essence, it is based on those beliefs upon which the United States was founded—the undeniable rights of the individual to do as he pleased, so long as it was reasonable, and to have a voice in the government under which he lived.

The Ukrainian Congress task is particularly important today because it reminds us graphically, by showing us the fate of the Ukraine and other captive nations, of our beliefs and keeps us aware of their value.

It seems to me that being aware is very important to all of us right now, at the midpoint of the 20th century. We must be well informed of existing situations and then try to meet them as best we can with the means at our disposal. This is why the Ukrainian Congress is so important to the United States and to Congress and to all Americans. Its single purpose is to educate us to existing conditions, as it discovers them in regard to the Soviet Union. Its particular purpose is to educate us to the aims of the Soviet Union directed against our way of life, thus reminding us just what our way of life is and how we can protect it.

Americans of Ukrainian ancestry in the United States are particularly qualified for this task, for many of them have experienced, and have friends and relatives who have experienced, the horrors of the Red regime since the collapse of Ukrainian independence in 1920. They have escaped or filtered across Russian lines for the last 40 years and bring with them tales of what Russian domination is really like. The fact that comes to light first is that the Soviet Union is not one united country. It is made up of many small countries such as the Ukraine, Turkestan, Georgia, Lithuania, Armenia, and many others. They all declared their independence after World War I. They were all taken under Soviet rule in the ensuing years. Like the Ukraine, they all have their own languages, heritages, culture, and political structures. In truth, the Soviet Union can be nothing more than a giant with clay feet—a restless conglomeration of many unwilling nations held in bondage by Moscow. It becomes obvious that it can be nothing more than a loosely knit political unit, dependent on propaganda to prevent the world from guessing its internal divisions, and on the economic resources to be derived from its unwilling members. From time to time, Khrushchev appeases these countries by assuring them of their independence. In 1957, he referred to the Ukraine as "a truly free and independent nation." But that condition is only a fact in the hearts of the patriots of these countries.

The list of crimes Khrushchev has perpetrated in the Ukraine during his career is in itself a good example of the treatment accorded all the captive nations. He was one of the Communist leaders when the manmade famine ravaged the Ukraine from 1930 to 1933 and killed many people. He was directly engaged in the purges in the Ukraine actually to make way for himself to become the first secretary of the Communist Party. During the thirties these purges wiped out more than 400,000 Ukrainians. As first secretary of the party, he was involved in the horrible massacre of Vinnitsa, when 10,000 Ukrainians were killed. In 1946, Khrushchev liquidated the Ukrainian Catholic Church and continued the repression of the Ukrainian Orthodox Autocephalic Church. In 1954, he removed many young people from the Ukraine to virgin lands. Throughout the last 10 years he has continued his repressive policies against the protests of the Ukrainian people.

This is why the Ukrainian Congress is dedicated to proving to the rest of the world the real nature of the Soviet Union. The Soviet tyranny it fights against is a very real threat, but Soviet propaganda is effective. We need all the information and advice it can disseminate in the struggle against the Soviet myth. Like all prosperous peoples, we Americans tend to be all wrapped up in our way of life. Let us not really believe the Soviet myth is harmless. I think the Ukrainian Congress succeeds in convincing us of this fact. I wish it well in their continued pursuits on this, its 20th anniversary.

LET US BE FAIR WITH SOCIAL SECURITY BENEFICIARIES WHOSE RETIREMENT INCOME IS SUPPLEMENTED BY INDUSTRIAL PENSION PLANS—LET US ADOPT LEGISLATION TO BLOCK CUTBACKS IN SOCIAL SECURITY INCREASES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. STRATTON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. STRATTON. Mr. Speaker, I have today introduced legislation designed to protect many of the beneficiaries of industrial pension plans from a practice that I understand is fairly widespread and which I feel is not only contrary to the public interest but also contrary to the desires and intentions of Congress.

It has come to my attention that a number of industrial pension plans are tied in more or less directly to the Federal social security system. Under some of these arrangements beneficiaries of the plans are guaranteed a certain fixed dollar retirement benefit, with the company agreeing to supplement the individual's social security benefit to bring it up to this specific fixed figure. Under these plans, therefore, whenever social security benefits are raised, as they have been frequently raised in the past to keep up with rising living costs, the total return for these pension plan beneficiaries remains the same instead of increasing correspondingly, and the employer reduces his own contribution to the total accordingly.

While the original plan was no doubt well intended, it is having the practical effect of depriving these individuals of an increase in social security benefits which Congress intended they should have, an increase provided because of the increasing demands of a rising cost of living. In practical effect, the money which the Government is paying out, supposedly to its citizens in the form of increased social security benefits, is in such cases actually being added to the assets of employers rather than employees. These employees end up getting nothing to meet the added cost of living and they find their own pension income frozen fast while other people around them, direct recipients of social security, have the benefit of an increase.

From every point of view it seems to me that this procedure is undesirable and I believe that Congress should take action to prevent it.

The legislation which I am introducing today provides that where such arrangements exist, and whenever an employer's contribution to a pension plan correlated in this way with social security is reduced as a result of an increase in social security benefits, then the Federal taxes due and payable from this employer are increased by the amount of the reduction.

I believe that my bill states a fairly simple legal proposition adequate to meet the situation. However, there are many different types of industrial pension plans and it is possible that to deal with the whole situation fully and fairly a somewhat more complex piece of legislation may be needed. I am introducing this bill at this time, however, so that the staff of the Committee on Ways and Means may have an opportunity to study the general principle and so that members may also have an opportunity to consider its desirability.

In the meantime, I intend to make a further survey of such types of industrial pension plans, and in the event I am fortunate enough to be returned by my constitutents to serve in the 87th Congress, I will propose such legislative additions or improvements to this present bill as my study indicates seem desirable.

No social security system, in my judgment, can fully and adequately meet all the needs of retired persons. We must look of course to industry to develop effective retirement programs to supplement social security payments, and every encouragement should be given to industry to undertake such programs. I have no desire to discourage such action. It is my sincere belief, however, that the type of industrial pension program that permits the company's contribution to a joint plan to go down every time the governmental portion goes up—or in other words for Government benefits that have been increased with the express intention of benefiting retired workers to be utilized instead to benefit the industry itself—is not a desirable program, is harmful to the morale of retired persons, is contrary to public policy, and actually produces a result contrary to the one for which Congress authorized the added social security benefits.

The pressures of increased living costs which have in the past led to improvements in social security benefits concern every retired person. We must, I believe, make certain that governmental action designed to help retired persons in meeting these increased costs cannot be funnelled off into directions that do not accomplish the result Congress had in mind. Surely our retired citizens must not be allowed to find themselves on this kind of a treadmill—running hard just to stay in one place.

I believe that our retired persons must be permitted to live out their lives with

dignity, with respect, and with a reasonable measure of mental and economic security. I believe my legislation will correct a situation, which, however well-intended originally, has proved to be most unfortunate. I believe it is a step in the right direction, and I urge my colleagues to give my bill their earnest consideration as well as their support.

The text of the bill follows:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to provide that employers having pension plans under which payments are correlated with social security benefits shall be subject to an additional tax in cases where increases in such benefits result in a reduction in their own contributions under such plans and are not passed on to their retired employees

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to pension, profit-sharing, stock bonus plans, etc.) is amended by adding at the end thereof the following new section:

"SEC. 405. PENSION PLANS CORRELATED WITH OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE BENEFITS.—In any case where—

"(1) some or all of the employees of an American employer (as defined by section 3121(h) (other than paragraph (1) thereof)) are covered by a private pension or other retirement plan under which the payments made to an individual by such employer are based upon the difference between (A) a total figure fixed by or under the plan, and (B) the amount of the monthly insurance benefits to which such individual is entitled under title II of the Social Security Act, and

"(2) the amount of the payment or payments by the employer to or on behalf of such individual under the plan for any period decreases when the amount of the monthly insurance benefits which are payable to such individual for such period under such title II is increased (whether such increase is one which is provided by law for beneficiaries generally or for one or more classes of beneficiaries, or is a result of a change in the individual status of such indvidual for purposes of such title),

then the aggregate amount of the taxes otherwise payable by such employer under section 1 or section 11 (as may be appropriate) for the taxable year in which occurs the period described in paragraph (2) shall, under regulations of the Secretary or his delegate, be increased by an amount equal to the net decrease resulting in such employer's payments to or on behalf of all individuals under the plan as described in such paragraph (2) during such taxable year. For purposes of applying the increase provided for in the preceding sentence, an employer otherwise exempt from payment of the taxes imposed by sections 1 and 11 shall be considered to be liable for the payment of such taxes (before the application of such increase) in the amount of zero."

(b) The table of sections for such part I is amended by adding at the end thereof the following new item:

"Sec. 405. Pension plans correlated with old-age, survivors, and disability insurance benefits."

SEC. 2. (a) Section 1(d) of the Internal Revenue Code of 1954 (relating to cross-reference) is amended to read as follows:

"(d) CROSS-REFERENCES.—

"(1) For definition of taxable income, see section 63.

"(2) For increase in tax in certain cases involving pension plans correlated with old-age, survivors, and disability insurance benefits, see section 405."

(b) Section 12 of such Code (cross-references relating to tax on corporations) is amended by adding at the end thereof the following new paragraph:

"(9) For increase in tax in certain cases involving pension plans correlated with old-age, survivors, and disability insurance benefits, see section 405."

SEC. 3. The amendments made by this Act shall apply only with respect to taxable years beginning on or after the date of the enactment of this Act.

SMALL BUSINESS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. LESINSKI] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LESINSKI. Mr. Speaker, for nearly 8 years now the Republican administration has used the forum of Government to extol the merits of the free enterprise system and the virtues of rugged individualism. But they have consistently failed to practice what they preach. They have made a mockery of the free enterprise system by stifling small business with high interest rates and legislating in favor of the monopolistic interests of big business.

We Democrats have come to expect protection of special business interests by Republicans. It is their tradition and they are great believers in the traditions of the reactionary past.

While by administrative decree and legislative vote they steadily undermined the interests of small business, their sloganmakers were at work promising fair-play to the small businessman.

Their platform, adopted at Chicago last month, brings to date their double standard of saying one thing and doing another. Their platform calls for "spurring the economy by fostering new and small business, by continued enforcement of the antitrust laws."

But their record of nearly 8 years in office does not balance with their campaign promises.

In that period the number of small business failures increased by 94.3 percent. The number of businesses in existence increased by only 2.6 percent in the first 6 years of GOP domination. Only one in two small businesses started today has a chance of surviving for more than 2 years.

In contrast, these same years were the greatest period of big business merger and amalgamation in our history.

Evidently what is good for big business is not necessarily good for small business.

In the Congress it was the same story. When the Republicans controlled the 80th and 83d Congresses, they failed to enact one law to improve antitrust legislation.

By contrast, the four Democratic Congresses walked where Republicans feared to tread and, as a consequence, laws like the Celler-Kefauver Anti-Merger Act are on the books, as well as improved laws against price discriminations and tie-in sales.

KEFAUVER'S startling hearings on antitrust also took the public inside of big business and showed them why things cost so much today.

Small business was hurt most severely by the high interest rates sponsored by this administration. Low-interest credit and capital are essential to the survival of small business.

But, as Senator KENNEDY has said, "Our task now is not to fix the blame for the past, but to fix a course for the future."

The Democratic platform does just that. It charts a course for the new frontier of the sixties.

The platform offers relief from the slow strangulation of the Republican years and pledges programs to:

Aid small businessmen to obtain credit and equity capital at reasonable rates. The loan program of the Small Business Administration will be accelerated and the independence of the agency protected.

Protection against the growth of monopoly and administered prices through vigorous enforcement of the antitrust laws.

Strengthen the Robinson-Patman Act to protect small business against price discrimination.

Obtain an equitable share of Government contracts for small and independent businesses.

The Democratic platform promises to protect "the right of every businessman, large and small, to trade in an atmosphere of freedom from unfair competition and domination by monopolies at home and abroad."

What the Republicans now piously promise in generalities—but have failed to deliver in nearly 8 years—the Democrats will do in specifics.

Let us not forget, regardless of what laws Congress passes, it is the administration of the law that is most important. The Republican-dominated agencies have fallen woefully in doing what they had promised to do when they had the opportunity.

Things will get done under a Democratic President and with a Democratic Congress, not because it is good politics, but because the policies are right and because the Democratic Party is steeped in the tradition of the future and dedicated to equal prosperity for all.

FEDERAL AID TO EDUCATION

Mr. MOULDER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. MOULDER. Mr. Speaker, I have introduced a resolution for concurrence in the Senate amendments to H.R. 10128, to authorize Federal financial assistance to the States for constructing school facilities. The resolution is as follows:

"That immediately upon adoption of this resolution the bill (H.R. 10128) to authorize Federal financial assistance to the States to be used for constructing school facilities, with the Senate amendments thereto, be, and the same hereby is, taken from the

Speaker's table, to the end that the Senate amendments be, and they are hereby, agreed to.

Mr. Speaker, State and local school districts cannot alone bear the financial burden required to provide the expanding educational needs of today. The financial support of the education of the children and young people of the United States is a joint responsibility of all divisions of our Government—Federal, State, and local.

The House bill and the Senate bill specifically provide that there shall be no Federal intervention in schools, the curriculum and the instructional programs.

I favor the provision in the Senate bill which provides that each State can decide how much of its annual allotment it would use for school construction and how much for teachers' salaries.

Mr. Speaker, the people of America understand and we can justify the major part of our expenditure of $38 billion to $40 billion each year on military programs, including sputniks, rockets, guided missiles, and other worthy Federal defense and domestic programs. But the people do not understand why their Federal Government continues to neglect the vital and extremely important responsibility of assistance to education.

We all know the United States gives billions of dollars to foreign countries each year. I have opposed and voted against these wasteful expenditures. But most of the people do not know that last year our Federal Government agreed to pay $237,000 to improve teaching in Philippine schools; $1.18 million for better schools and vocational training in Thailand or Siam; and $2.1 million for educational facilities in Korea. In varying amounts, every year our Government has spent millions for aid to education in Burma, Cambodia, Free China, India, Indonesia, Laos, Vietnam, Afghanistan, Ceylon, and a host of other countries in Asia, Europe, Africa, and South America. Yes, and even Yugoslavia, a Communist country. Some of this may be good for our international policy. But what about our educational problems right here at home?

Mr. Speaker, the effort of Missouri school districts to provide needed school buildings is reflected by the issuance of $328,651,805 in bonds during the last 10 years. The outstanding bonds of school districts increased from $33,527,473 on June 30, 1949, to $277,146,002 on June 30, 1959—an increase of 726 percent.

Despite heroic efforts, many Missouri school districts are losing in their battle to provide classrooms for their increasing enrollments. One hundred and thirty-nine districts are bonded to 80 percent or more of their bonding capacity. Eighty-five of the one hundred and thirty districts are bonded to 90 percent or more of bonding capacity.

A total of 3,958 additional classrooms were needed last year in all school districts in the State. The estimated cost of these classrooms and other needed building facilities was $129,949,713.

The bonds that may be issued by school districts are limited by the State constitution to 10 percent of their assessed valuations. This was increased from 5 percent to 10 percent by a constitutional amendment adopted in 1952. This gave all school districts additional leeway in issuing bonds. Districts experiencing substantial enrollment increases for the most part have now issued the maximum bonds and can vote additional bonds only as present bonds are paid.

We must recognize and appreciate the limitations of local tax revenues. It is unrealistic to assume and expect State and local sources of revenue to be sufficient to provide the educational facilities so vital to our national security and future of the United States.

The need for expansion and improvement of our educational facilities demands the breadth, strength, and flexibility of a financial structure that only the Federal Government can provide. The benefits from education transcend all State and local lines. It is a national problem and the Federal Government must share in the financial responsibility. If we are to prevail as a free and prosperous Nation, we must become as interested in launching educated men and women as we are in launching satellites.

Great education comes from dedicated teachers and dedicated teachers are entitled to salaries commensurate with the importance and responsibilities of their position as teachers. State laws properly set up high standards and qualifications for schoolteachers, requiring many years of education and special training, but the expense to the person seeking to so qualify for a teaching career and the inadequacy of teachers' salaries have created a critical shortage of teachers.

Mr. Speaker, I have supported and voted for all Federal aid to education bills presented in Congress. If reelected, I shall do so again at the next session of Congress. The Federal Government can no longer afford to neglect the necessity of providing financial assistance to our schools.

I cannot help feeling—and I hope others will realize it—that our teachers are our first line of defense. In fact, they always have been, but we have never talked about it enough. Our schoolteachers, who are so grossly underpaid, are the quiet force in this country that molds our most precious resource—our children. The full impact of the valuable service teachers give to the people of this country and its future, in a sense, will ultimately guide the destiny of the world. We must find a way to provide for our school systems the additional financial support which they so urgently need.

BOWLES ASKS REPUBLICANS TO JOIN IN "BUILDING A BETTER AMERICA, NOT A MORE BITTER ONE"

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Connecticut [Mr. BOWLES] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOWLES. Mr. Speaker, last Friday the gentleman from Arizona [Mr. RHODES] alerted me that he and several of our other colleagues on his side of the aisle had decided to examine the Democratic platform here on the floor this week.

The fact that they saw fit to refer to their plans as "Operation Veracity" indicated that their approach to the Democratic platform would not be entirely complimentary.

I must say in all frankness that while I appreciated the gentleman's invitation to come and listen, the fact that it was to be Operation Veracity gave me second thoughts and awakened memories. I had been reading the Republican platform and had been encouraged by its theme, "Building a Better America." I had been heartened because both that concept and the Democratic concept of the rights of man seemed to at least put the stamp of approval of both parties this year on the elemental fact that we are entering a new era, at home and abroad, and that hopefully the bickering and bitterness of some previous political campaigns would now at long last be put behind us.

None of us really needs to be reminded of some of those past campaigns, for most of us have lived through them and would prefer to forget them.

But Operation Veracity hardly seemed to change the name of the notorious Republican truth squad which huffed and puffed across the country in 1952, dragging its tawdry veracities in the wake of President Truman's campaign special.

Many Americans must have agreed with President Truman's response on Columbus Day, 1952, that there were a good many truth squads in Columbus' time who went around repeating, "The world is flat, the world is flat."

I had hoped that in 1960 we had finally emerged beyond the truth squad stage, and until recently I thought I had good grounds for hope.

All of us who worked on the 1960 Democratic platform were especially conscious of our responsibility to be fair and conscientious. That is why in the short version of the Democratic platform which I read to the national television audience at our convention we deliberately omitted any reference to the word "Republican." That is why, I like to think, the 1960 Democratic platform has earned such widespread acclaim for its constructive tone, an evaluation made, incidentally, by many of our leading Republican newspapers.

That is also why, I am sure, my distinguished counterpart, the chairman of the Republican platform committee, Mr. Charles Percy, said in his press release of Friday, July 15:

> I have studied the Democratic platform carefully. The great value of a political platform is that it provides the basis for wide ranging discussion of the great issues confronting us as a people. It is one of the most important parts of the educational process in American democracy. * * * Both parties seek a better America. Men of good

will seeking identical goals are working hard in both parties to develop our programs for America.

Mr. Percy then went on to raise legitimate questions about the different approaches of our two parties. But the tone was right, the questions were constructive, and the purpose of promoting an intelligent statement of the issues for the American people was clear. I admired Mr. Percy for it.

Many of us who participated in the writing of the Democratic platform also took silent pride in the days that immediately followed its adoption, when it was widely regarded as having had a constructive influence on the Republican convention deliberations. Indeed perhaps even Members on the other side of the aisle will forgive me my personal feeling that our platform played a certain role in the midnight talks between the Vice President of the United States and the Governor of New York.

Under these circumstances I am sure that many Republican leaders throughout America will be as discouraged as I am over what now appears to be an irresistible temptation by the Irredentists of the Republican Party to return to their tactics of yesteryear. "Truth Squads" and "Operations Veracity" seem to have an unalterable appeal—usually to those who are most vehement in their overstatements of the partial truths of their own position.

As I glanced through the CONGRESSIONAL RECORDS of the last 2 days, I was struck with what little progress we have really made. The gentleman from Arizona [Mr. RHODES] refers to this campaign as one between the "youngsters" and the "grownups." He talks of "new frontiersmanship," just the way the Vice President attempted to sidetrack the foremost economic issue of this campaign by ridiculing it as growthmanship.

The gentleman from Ohio [Mr. AYRES] finds our platform "outrageous."

The gentleman from Michigan [Mr. FORD] finds it "disturbing and demoralizing."

The gentleman from New York [Mr. DEROUNIAN] finds it full of "fabrications."

The gentleman from New Hampshire [Mr. BASS] asks us to "apologize."

The gentleman from Wyoming [Mr. THOMSON] accuses us of having a "complete lack of faith in free enterprise" coupled with "plain demagogery" and "boyish gamesmanship."

The two gentlemen from Wisconsin [Mr. BYRNES and Mr. LAIRD] cannot resist following in the footsteps of the late Senator from their State by depriving us in the "Democrat" Party of the "ic" which we have at the end of our name.

The gentleman from Missouri [Mr. CURTIS] enlightens us with the following:

> I observe that one of two things is true about this Democratic platform statement that the Republican failure in the economic field has been virtually complete.
>
> Either the statement was an intentional falsehood, or the framers of the Democratic platform picture a new frontier in which there is no prosperity, no individual incentive, no pursuit of personal happiness, but only a superstate all-powerful over miserable individuals and one which is probably at war.

In 1934 Henry A. Wallace wrote a book, "New Frontiers."

Apparently, the new frontiers at which the 1960 Democratic platform framers gaze are the depression frontiers of 1934.

And all this remarkable cacophony of McCarthyism and innuendo is summed up by the gentleman from Wyoming [Mr. THOMSON] as "a conscientious attempt to focus the light of truth" on the current political campaign.

This is the light of truth as seen by that long line of soothsayers who stretch from Murray Chotiner to Senator SCOTT. I am perfectly prepared to believe that our colleagues here, like some others in their party, have again been victimized by that long line of petty reseachers and smallminded ghostwriters who glory in scoring or misscoring debater's points down at the Republican National Committee.

Some 27 pages of the CONGRESSIONAL RECORD have now been devoted to their new operation on the truth. Let me select, more or less at random, just a few matters for comment.

First. The gentleman from Arizona [Mr. RHODES] reports that the topic sentence of the following Democratic platform paragraph is in error:

> Over the past 7½-year period, the Republicans have failed to balance the budget or reduce the national debt. Responsible fiscal policy requires surpluses in good times to more than offset the deficits which may occur in recessions, in order to reduce the national debt over the long run. The Republican administration has produced the deficits—in fact, the greatest deficit in any peacetime year in history, in 1958–59—but only occasional and meager surpluses. Their first 7 years produced a total deficit of nearly $19 billion.

The gentleman suggested we revise the first sentence to read as follows:

> Over the past 7½ years, the Republicans balanced the budget in fiscal years 1956, 1957, 1960, and 1961.

If we are to go in for revisions, I suggest that the gentleman's revision be revised as follows:

> The Republicans balanced the budget in fiscal years 1956, 1957, and 1960 with a total surplus of $4.3 billion. They left a deficit in fiscal years 1954, 1955, 1958, and 1959 totaling $22.5 billion. The total deficit over the last 7½ years has thus been $18.2 billion.

Our platform refers to a total deficit of "nearly $19 billion" based on the 1960 estimates of $0.1 billion surplus for fiscal year 1960 available on July 12 when our platform was adopted. On July 20 the figure of a $1.1 billion surplus for fiscal year 1960 was first released.

Second. The gentleman from Wisconsin [Mr. BYRNES] has called our attention to the platform statement that the Republican years of power "have consisted of two recessions, in 1953–54 and 1957–60 separated by the most severe peacetime inflation in history."

He is concerned about the dramatic price rises immediately after World War II, which were caused by Republican insistence on removing our wartime price controls. As Price Administrator and Economic Stabilizer during and immediately after World War II, I can assure the gentleman that most experts consider it both reasonable and generous not to include the March 1946–March 1947 period as part of our "peacetime" economic history. On the other hand the years of Republican inflation from 1955–56 were 2 years removed from the Korean war and far removed from price control.

Wholesale prices, whose fluctuations are a better measure of inflation than those of consumer prices, rose about 24 percent between 1945 and 1947. Before the end of the Truman administration, these prices decreased (during 1951–1953) only to rise again under the next Republican administration.

Third. Let me turn quickly to national defense. The gentleman from Michigan [Mr. FORD] denies that our conventional military forces have been dangerously slashed.

Yet throughout the years of the Eisenhower administration these cuts have continued, recently falling most heavily on our ground strength for fighting limited and conventional aggression. Our divisions were first reduced to 18 in spite of the pleas of Democratic Members of Congress for a force of at least 19. Progressively the cuts have gone on. From 20 divisions to 18; from 18 to 16; from 16 to 15. And now our ground forces stand at 14 combat strength divisions.

The gentleman challenged me to "produce the administration statements which admit that our conventional military forces have been slashed for reasons of economy." Here are a few.

Gen. Matthew B. Ridgway, Chief of Staff of the Army during the Eisenhower administration, has stated that the first three Eisenhower defense budgets "were not primarily based on military needs. They were squeezed within the framework of present arbitrary manpower and fiscal limits."

Gen. Maxwell Taylor, also a Chief of Staff during the Eisenhower administration, wrote in Look magazine on December 22, 1959:

> Budgetmaking has been allowed to control strategy although the Defense budget is developed in such a way that no one really knows how much combat power the United States is getting for its dollar. * * * The budgetmakers have become the real strategymakers. Military programs needed to implement our policy can be made or broken by those who decide how to spend the military dollar. Unfortunately, the decisive power is in the hands of men who are not strategists, but rather fiscal experts.

The gentleman from Wisconsin [Mr. LAIRD] told us yesterday:

> We have never been in a position where the Polaris program has lacked for funds at any time during this administration.

But the reason there was never any lack of funds was precisely that more funds were appropriated by the Democratic Congress than the administration was willing to use. We all know that we have lost a full year in the construction of three Polaris submarines, delayed from fiscal year 1959 to fiscal year 1960 by a Bureau of the Budget decision to freeze funds appropriated by Congress for this specific purpose over and above the administration's request.

Fourth. Lastly let me refer to some of the statements we have heard on subjects of interest to our American farmers. Take our rural electrification plank as an example.

The gentleman from Wisconsin [Mr. LAIRD] suggested that the Democratic platform was in "bad need of facts" when it stated that:

The Democratic Congress has successfully fought the efforts of the Republican administration to cut off **REA** loans. It (the Republican administration) has sought to cripple rural electrification.

We all know that the Republican administration adopted a policy of no new starts on hydroelectric dams, and we have had none except for those projects initiated at Democratic insistence. The result has been to cut off a new supply of abundant, low-cost wholesale power. Anyone who looks at the wholesale power rate map the co-ops have drawn up will see the effects of this policy on the power costs which the co-ops must pay and pass on to their members.

We all know that Republican policy has deliberately raised interest rates and has annually tried to limit severely the amount of REA loan funds available, despite the fact that these co-ops have a perfect record of repaying these loans with interest. In the years from 1953 through 1960, the administration requested a total of $1,149.3 million in REA electric loan funds. The Democratic Congress forced through additional appropriations, raising the aggregate total to $1,815 million. That is more than a 33 percent increase forced through by a Democratic Congress—and the record shows that it was needed.

In the meantime the Eisenhower administration would have "done away with" the REA if its legislative proposals had been accepted, according to Senator GEORGE D. AIKEN of Vermont, the senior Republican on the Senate Agriculture Committee in a statement reported by the UPI on May 22, 1959.

Senator GEORGE D. AIKEN, Republican, of Vermont, accused Agriculture Secretary Benson today of an attempt to put American farmers still more under the thumb of giant banking and corporate interests.

AIKEN, senior Republican on the Senate Agriculture Committee, said he would do all he could to block Benson's proposal to create a bank to replace the U.S. Treasury in financing of rural electric power and telephone systems.

Benson made the proposal in a speech at Cedar Rapids, Iowa, last night.

AIKEN, in a Senate speech, said the Benson plan was an attempt to do away with the Rural Electrification Administration.

AIKEN said Benson's proposed bank would force possibly one-third of the REA cooperatives to give up the ghost and sell out to the utility interests.

Mr. Speaker, I could go on at length, but I prefer to close. I know that several of my colleagues have things to say. Let me add just this:

Today is August 31 and there are only 69 days left until the election. The Democratic platform attempted to address itself to the real questions which face the American people. They are not questions that invite further displays of politics as usual. They invite serious, constructive debate. They are questions like these:

How can we build defense forces of sufficient strength and flexibility to deter aggressions of all sorts, large or small?

How can we at the same time elevate arms control to a new position of equal priority so that an arms race will not once more lead to unlimited catastrophe?

How can we speed up our national rate of economic growth on which our policies both at home and abroad so directly depend?

How can we provide that delicate balance of national and local leadership which will enable us to move ahead effectively in the great moral effort to assure equal rights to all Americans?

The themes of our two platforms this year are both addressed to these goals. Most Americans are, I hope, ready to enlist in the cause of building a better America, not a more bitter one. Likewise we are all, I hope, dedicated to the implementation of the rights of man.

If this is indeed a critical election, as I think both parties agree, I earnestly hope that it can be conducted from now on in a manner befitting the solemnity and importance of the hour. I can think of no better note on which to conclude these remarks, which will be my last in the House of Representatives.

In this connection, Mr. Speaker, I include a memorandum on the impact of expenditure ceilings on the defense program, taken from official hearings, in the RECORD at this point of my remarks:

IMPACT OF EXPENDITURE CEILINGS AND OTHER FUND RESTRICTIONS ON THE DEFENSE PROGRAM IN RECENT YEARS

CEILING OF $38 BILLION

In May, 1957, Secretary of Defense Wilson issued an order freezing defense expenditures for fiscal year 1958 at $38 billion. At the time this order was issued, Defense spending was running at a rate equivalent to $42 billion a year. As part of this expenditure ceiling, the Army, Navy, and Air Force were directed to reduce the amounts available for obligation during fiscal year 1957 by $500 million. The directive to make this cutback was issued on May 22 so that all of the cutback had to be made during the month of June.

The sharp and abrupt cutbacks in Defense obligations and expenditures resulted in curtailment and elimination of many programs which had been justified to, and approved by, the Congress. Even more disastrous, however, was the fact that these abrupt cutbacks were made at a time when the economy was faltering.

As a result, these Defense cutbacks, which were made to "save" $2 billion in Defense expenditures, served to trigger the recession of 1958. One by-product of this recession was the fact that the Government suffered a budget deficit of $12.4 billion in fiscal 1959—the largest peacetime deficit in the history of the Nation.

IMPACT OF SPUTNIK

On October 4, 1957, the Soviet Union placed the first earth satellite into orbit. As a result of Sputnik I, and of hearings held by the Preparedness Investigating Subcommittee, the administration submitted a supplemental appropriation request for fiscal year 1958 to the Congress on January 8, 1958. The rigid Defense expenditure ceiling of $38 billion was also adjusted upward.

Ever since sputnik, the Department of Defense has avoided the issuance of any documents formally establishing a Department of Defense budget ceiling. Instead, the emphasis has been placed on expenditure targets, objectives, estimates, etc. Thus, while formal rigid expenditure ceilings no longer exist, the ceiling psychology still exists and serves as a brake against acceleration or expansion of defense programs.

QUOTATIONS REGARDING BUDGET CEILINGS

The following are representative quotations regarding the existence and impact of budgetary ceilings and similar administrative limitations on Department of Defense programs:

Impounding of Marine Corps funds (hereings before Senate Appropriations Committee, Department of Defense appropriations for 1958, pp. 266–267):

"Senator SYMINGTON. The decision was made to cut heavily the Marine Corps, and the money was appropriated in the amendment to prevent that being done.

"But I see it was done anyway, so apparently there was a difference of opinion.

"Do you know what the $40 million was going to be used for instead of what the Congress requested?

"General PATE. By the Defense Department?

"Senator SYMINGTON. Yes.

"General PATE. I do not.

"Senator SYMINGTON. Do you, General Moore?

"General MOORE. No, sir. It was impounded and $31 million in the appropriation, 'Military personnel,' Marine Corps was placed in reserve, and together with another $20,963,000 reverted to the Treasury. That is $31,853,000 out of the total $41,148,000.

"There was more than one appropriation involved."

"Imposition of Expenditure Ceiling Without Knowledge of Its Impact on Defense Program" (hearings before Senate Appropriations Committee, Department of Defense appropriations for fiscal year 1958, pp. 412, 415–416, 465, 471, 941–942):

"Senator SALTONSTALL. For the fiscal year 1958, which is the appropriation that we are talking about now, the estimated expenditures of the Department of Defense are a little over $38 billion; is that correct?

"Mr. MCNEIL. That is about correct, Senator SALTONSTALL; yes, $38 billion.

"Senator SALTONSTALL. At the rate that they are running, or are estimated to run, as you foresee it now, they will run nearer $42 billion than $38 billion; is that correct?

"Mr. MCNEIL. They are running, at least during the last 2 or 3 months, at a rate of about $42 billion; that is correct.

"Senator SALTONSTALL. The purpose of this directive here is, as contended by the Senator from Missouri—I would agree quite fully with him on that—that the purpose of the directive is to make sure where you are going, as to whether you are going nearer $38 billion, which is the estimate originally that was submitted to the Congress, or are going to run nearer $42 billion; is that not correct?

"Mr. MCNEIL. That is correct.

* * * * *

"Senator SALTONSTALL. As far as the program of procurement is concerned, and contracts, and what it will do to the Air Force, the Navy, or the Army, that has to be worked out, and you can't tell this committee at the present time just what the effect of this directive will be; is that not correct?

"Mr. MCNEIL. That is correct."

* * * * *

"Senator ROBERTSON. At the present rate of expenditure, what would the actual expenditures be for fiscal 1958?

"Mr. MCNEIL. For fiscal 1958, we will try to work that out and get a more precise figure.

"As I mentioned, in response to Senator SALTONSTALL a few minutes ago, in the last

few months the rate of expenditures has been at the rate of about $42 billion.

"Senator ROBERTSON. If that rate continued, it would be $42 billion for fiscal 1958; is that correct?

"Mr. MCNEIL. That is right, if it continued at that rate. I do not think it would necessarily do that.

"Senator ROBERTSON. Not necessarily.

"And your May 21 directive, in the part of overall planning, you started curtailing expenditures in fiscal 1957 with a view to keeping fiscal expenditures in 1958 down to $38 billion?

"Mr. MCNEIL. Or very close to that.

"Senator ROBERTSON. That could involve a cut of $4 billion, a cutoff or a cutback, or whatever you call it.

"Mr. MCNEIL. We do not know yet whether this rate of the last 3 or 4 months would continue at this rate during all of next year. It is possible that it would drop off to some extent during the middle of the year, or even in the latter part of the year.

"This may be a mere temporary hump, but it is almost certain that unless the program is extended, and those things which must be carried on are carried on, while those things that can wait or be delayed are sorted out, these expenditures will run above the $38 billion.

"Something will probably have to be done, and I mention that in my statement. As I say, I was trying to bring this to the attention of the committee in my statement this morning.

"Senator ROBERTSON. The distinguished Senator, my great friend from Missouri, said, or rather he intimated, that the first consideration was a fiscal one and the fiscal one indicated that you needed to keep expenditures for 1958 down to $38 billion.

"You discussed that action without knowing definitely to what extent it may delay and impede the development of bombers, missiles, et cetera.

* * * * *

"Senator SYMINGTON. Right.

"Now, Mr. Secretary, you say: 'We have been informed that considering the anticipated revenues of the Government and the statutory debt limit, expenditures for the Department of Defense must not substantially exceed the budget estimate of $38 billion during the coming year.'

"Fundamentally, that is what we are really talking about; is it not?

"Mr. MCNEIL. It is one of our real problems.

"Senator SYMINGTON. Would the answer to my question be 'Yes' or 'No'?

"Mr. MCNEIL. There are quite a few problems, but I would say that was one of the prime problems; yes, sir.

* * * * *

"Senator SYMINGTON. You say in your statement that we have been informed that these expenditures 'must not substantially exceed' and so on.

"Mr. MCNEIL. That is for 1958, sir.

"Senator SYMINGTON. I am not much on definition of how rigid a ceiling is or is not—but are you saying that the Bureau of the Budget is saying you must try to live within this figure? Is there a difference in rigidity you are talking about now?

"Mr. MCNEIL. Yes, sir.

"Senator SYMINGTON. So from here out the programs presented by the President to the Congress really do not mean much, do they?

"Mr. MCNEIL. I think they do.

"Senator SYMINGTON. If you feel that the amount of money is as you have already testified, and that expenditures must be held down, and that is the chief reason for these directives, what you are really saying is you are not going to let the Department of Defense have the money necessary to implement the program.

"Mr. MCNEIL. It does not move quite that way, sir. There is no question that the—well, I might call it a ceiling—is much more rigid for 1958 than it was in 1957."

* * * * *

"Senator SYMINGTON. At this point is it not an entirely fair statement to say that the fiscal situation became completely dominant as against the force situation?

"General BOGART. I think so insofar as the directive is concerned.

"Senator SYMINGTON. There could be no other answer, could there?

"General BOGART. I don't think so.

"Senator SYMINGTON. That would seem especially true in that you were not told what part of the forces to cut. It was strictly a matter of dollars as against security; is that not correct?

"General BOGART. That is true, sir."

After-the-fact acknowledgment that there had been a rigid $38 billion expenditure ceiling on Department of Defense expenditures (hearings before House Appropriations Committee, supplemental defense appropriations for 1958, pp. 239–240, and hearings before the Preparedness Investigating Subcommittee, inquiry into satellite and missile programs, pp. 257–258):

"Senator SYMINGTON. Now, you refer to the $38 billion expenditure ceiling, in the memorandum that the President sent met, as 'not as an arbitrary limit on defense spending but as a step taken by the administration to keep military spending in appropriate balance with the requirements of the Federal Government as a whole.'

"Testimony by top civilian officials of the Department of Defense challenge this statement. As I mentioned, the Assistant Secretary (Comptroller) said there had always been some guidelines and restrictions; but now these were rigid ceilings. That was his statement.

"What would you comment on that?

"Was it an arbitrary limit on defense spending or wasn't it?

"Secretary MCELROY. Well, there was a limit for a period but, of course, since then, as I think is well known, there has been a change.

"There has been relief in the spending for the fiscal year, so while there was an attempt to set a limitation it was found that that was not right in relationship to the needs of defense and that it was relaxed to the extent of several hundred million dollars.

* * * * *

"Secretary GATES. I imagine what he is talking about, Mr. FLOOD, is the fact that everyone knows we were operating under an expenditure ceiling in the early days of this fiscal year and there was a holdup of money by the Bureau of the Budget in apportionments in regard to controlling expenditures. This is a costly thing to do in the long run.

"Mr. FLOOD. Then if there is, as a fact, a holdup——

"Secretary GATES. There was.

"Mr. FLOOD. In the allocation of appropriated funds, it was not the fault of the Congress in the development of the nuclear program as of today; it is not the fault of the Navy or the Department of Defense, but the 'Pooh-Bah' at the Budget who substituted his thinking for everybody's and said you could not have this money and you did not get it.

"Is that correct? 'Pooh-Bah' is my word, not yours.

"Secretary GATES. Well, I think——

"Mr. FLOOD. Well, it is Gilbert and Sullivan's, as a matter of fact, but they were good, too. You go on and tell me something.

"Secretary GATES. Yes, sir. I think that the policy of the administration was for a balanced budget and not an increase in the debt limit. The Bureau of the Budget was carrying out the policy of the President in this respect, and this caused an expenditure target to be placed on the departments of Government, including the Department of Defense This slowed up apportionment procedures, and in some instances delayed obligation of money and procurement of materiel in various departments, including the Navy and the bureaus of the Navy. I think that is what Admiral Rickover is talking about.

"This has been partially corrected. We now have a change in the expenditure targets we were originally working toward."

Impact on air force research and development of Department of Defense directive of August 17, 1957 withholding 10 percent of research and development funds (hearings before House Appropriations Committee, supplemental defense appropriations for 1958, pp. 345–6):

"Normally in the research and development appropriation early in July the Air Research and Development Comand, having had the proposed fiscal year program, is able to immediately start initiating new research and development contracts and continuing previous contracts for effort which is still in the overall research and development program. However, new obligations were frozen as of June 30, 1958, so that no new obligations could be incurred without specific approval from the Office, Secretary of Defense. In addition, an expenditure amount for research and development within the overall Air Force expenditure objective was established, which the research and development program should not exceed during fiscal year 1958. Further, about August 17, 1957, the Office, Secretary of Defense, directed a reduction under research and development programs and the Department of Defense in the amount of 10 percent.

"The effect of the above actions was to immediately halt contractual action pending analysis of the fiscal year 1958 program and to establish actions so that the Air Force could live within the directives as issued. In this respect, the Air Force directed the Air Research and Development Command to reduce all work effort type contracts by 5 percent so that under the restrictions the most balanced research and development program could be maintained in fiscal year 1958. The funds for the operation and maintenance of research and development centers and test bases were put on a minimum operating base by reduction of local purchase to the minimum need to maintain mission stock levels; by the reduction of overtime for all programs except the ballistic missile test program, and by the reduction of civilian personnel. These actions served to slow down the operation of the research and development effort for a period. Although certain contracts with universities and nonprofit organizations were terminated upon the expiration of existing contracts, complete cooperation was received from most contractors to the point that the Air Force scientific effort was not deferred. The research and development contractors in effect worked 30–60 days past the expiration time of the contract in order to give Air Force time to evaluate effect of these actions on the research and development program and in order that the scientists and engineers working on Air Force programs would not shift to other projects and be lost for the remainder of the fiscal year.

"Upon review of the overall research and development program, the Air Force made the decision to support the research effort to the utmost allowable under the expenditure ceiling and effect release of enough additional expenditures to bring the research program back into phase so that contracts could be written for new work as well as continuing of work which had been all contracted from fiscal year 1957 funds. The Air Force reduced the fiscal year 1958 program by the approximate 10 percent as directed

by the Office of Secretary of Defense. This was done by deferring and deleting many projects which had been planned for implementation in the fiscal year 1958 President's budget estimate. On October 24, however, the Air Force began to take actions to place the research and development effort back on the original planned basis for fiscal year 1958. Additional expenditure allowances were provided in order that obligations and expenditures could be achieved in normal manner for the balance of fiscal year 1958. On November 7, 1957, the Air Force relieved the Research and Development Command from the 5 percent reduction of effort-type contracts.

"The research and development program is now proceeding as expeditiously as possible toward fulfillment of the program during fiscal year 1958."

Army strength was cut by impounding fiscal year 1959 funds (hearings before Preparedness Investigating Subcommittee, major defense matters, pp. 14–16, 59):

"Senator JOHNSON. Do you have some $200 million for previously approved procurement in 1959 that has been held up?

"General TAYLOR. $210 million, I am informed.

"Senator JOHNSON. All right.

"Now, summarizing—and I want to be as brief as possible because I have only 5 minutes—the Congress said they wanted you to to have a 900,000-man Army. That has been reduced to 870,000 by impounding funds. Yes or no?

"General TAYLOR. Yes; that is my understanding, sir.

"Senator JOHNSON. The Congress said it wanted you to have $210 million more for procurement than you have been authorized to spend; correct? Yes or no?

"General TAYLOR. Yes, sir.

"Senator JOHNSON. Has there been any other cutback or reduction in fiscal year 1959 Army funds that you are aware of?

"General TAYLOR. Yes; the Congress appropriated $37 million for modernization and $6,250,000 for construction which have not been made available to the Army. In addition, there are the funds associated with our increased strength which have been held back.

* * * * *

"Mr. WEISL. General Taylor, do you know why the $210 million fund appropriated by the Congress and recommended by the Defense Department was withheld?

"General TAYLOR. My understanding was that it involved the considerations of expenditures; that it was desired to spread out the expenditures more into 1960 and 1961.

"Mr. WEISL. Who made that decision?

"General TAYLOR. I would say that it came down through fiscal channels from the Office of the Secretary of Defense.

"Senator JOHNSON. Where did he get it?

"General TAYLOR. Sir?

"Senator JOHNSON. Where did he get it?

"General TAYLOR. I would not know, sir.

"Senator JOHNSON. By the fiscal channel, do you mean the Director of the Bureau of the Budget?

"General TAYLOR. I would not know, sir."

The Secretary of Defense was not permitted by the Budget Bureau to ask the Senate for any funds for fiscal year 1960 in excess of the budget request submitted to Congress in January 1959 (hearings before Preparedness Investigating Subcommittee, major defense matters, p. 304):

"Mr. STANS. We did not take issue with the Department of Defense determinations as to the position they should take on the House add-ons and on-the-House cuts. We did make suggestions as to what we thought might be the best way to handle them, but the determination was to be made by the Secretary of Defense, and I am not sure that we have all of the details yet as to how the Secretary is going to make the presentation.

"The only limitation that was imposed upon him was that in the aggregate the Secretary would not ask for a greater budget for the Department of Defense than appeared in the budget document last January."

Fixed budget ceilings failed to reflect changing world conditions (hearings before Preparedness Investigating Subcommittee, missiles, space, and other major defense matters, pp. 190–191):

"Mr. WEISL. We have been told, General Taylor, that while the Department of Defense and the various services have had guidelines on expenditures, there really never was a budgetary ceiling on expenditures. What is your view on that?

"Has there been a budget ceiling on defense expenditures?

"General TAYLOR. I think that perhaps we are just playing on words, Mr. Weisl. Certainly, for practical purposes there was a finite limit on what we could count upon, and each year that amount was essentially the same.

"I often point out that the split between the services was almost exactly the same for at least 4 years; 23 percent to the Army, 28 percent to the Navy, and 46 percent to the Air Force, giving a suggestion of a frozen pattern, which I don't think corresponded to the changing world conditions.

* * * * *

"Mr. WEISL. In your book you state as follows:

"The fact that there is a ceiling of around $40 billion on the defense budget is a reminder to each Chief that all military programs, however disparate in character, are in fact competitors for a fixed number of dollars.

" 'This consideration tends to color the attitude of individual Chiefs toward the program of sister services. It tends to make disinterested judgments more difficult than would be the case if it were possible to form judgments without such regard for fiscal consequences. The fixed defense budget by accentuating the interservice struggle for funds has become the prime cause of the service rivalry which is undermining national confidence in our military programs.'

"Would you like to comment on that?

"General TAYLOR. No, I think unfortunately, that the statement is accurate. I am sure that each Chief has always tried to sit in judgment honestly and dispassionately, but I know very well that we all think in terms of the effect on the budget of decisions on new weapons, for example. I think that explains to a degree why the Army and the Navy have been very reluctant to support, say Bomarc. I am equally certain that that is one of the reasons why the Navy and the Air Force have been reluctant to support Nike-Zeus; namely, the ultimate effect upon a fixed budget.

"Mr. WEISL. In your judgment, has the fixed ceiling on the military budget kept pace properly with changing world conditions?

"General TAYLOR. Well, I would say, sir, even without any analysis of the defense budget, that it is hard to believe that the world has not changed in the last 4 or 5 years. Yet our military budgets have been virtually the same within a variation of 1 or 2 percent."

Fiscal year 1960 funds provided by Congress for Army modernization were withheld by Bureau of the Budget (hearings before Preparedness Investigating Subcommittee missiles, space, and other major defense matters, pp. 229, 252, 262):

"Mr. WEISL. Last year Congress added funds to the budget for Army modernization. Are these funds being used fully?

"General LEMNITZER. The answer to your question is 'No.' I would like to tell you how the funds have been used, so that it may be clear as to why I give the answer 'No.' The total amount of money that was appropriated by the Congress over and above that which was in the President's 1960 budget amounted to $382.6 million. Now, $164.2 million of these funds are being used to cover a deficiency in the funding of the fiscal year 1960 direct obligational program for procurement of the Department of the Army, which totaled about $1.372 billion. This deficiency resulted from the Office of Secretary of Defense funding program including assets which failed to materialize, but these assets were beyond the control or influence of the Army.

"I might explain what I mean by that.

"Under the mutual security program, the Army provides some of its equipment right out of its inventory to assist our allies. We are normally reimbursed for that equipment so that we can replenish our inventories. The total amount of reimbursements which the Department of Defense estimated we would get did not materialize, and $164 million of the $382 million were used to cover deficits of this sort; $43.4 million of the total of $382 million will be used for modernization. This amount will be used to increase the Army's fiscal 1960 direct obligational program and it will be used in our so-called PEMA budget, that is, the 'Procurement of equipment and missiles, Army.' Of the $382 million, $175 million has been placed in reserve by the Bureau of the Budget for utilization in financing the fiscal year 1961 program. That gives the complete status of the total amount appropriated by the Congress in the fiscal year 1960 budget.

"Senator STENNIS. What was the last figure?

"General LEMNITZER. $175 million.

"Mr. WEISL. Has this amount been put in reserve?

"General LEMNITZER. It has been placed in reserve by the Bureau of the Budget.

"Mr. WEISL. Why hasn't the Bureau released these funds? It was the clear intent of Congress to use that money to modernize your Army?

"General LEMNITZER. I can't answer that. You will have to ask the Budget.

"Mr. WEISL. Did you protest against reserving that money and not using it for modernization of the Army?

"General LEMNITZER. We have requested apportionment of these funds on a number of occasions.

* * * * *

"Senator CANNON. Thank you Mr. Chairman.

"General, we know you are concerned about modernization of the Army, and, of course, as you know, Congress did earmark certain funds for use in modernization.

"I understand you have testified that the Army protested the decision of the Bureau of the Budget in withholding some of these funds that were earmarked for use in modernization; is that correct?

"General LEMNITZER. I wouldn't use the word 'protest.' We asked for the funds. We made a strong case for them. Our request was not approved, but we didn't protest or complain.

"Senator CANNON. You didn't complain. You just asked for them but didn't get them?

"General LEMNITZER. That's right.

"Senator CANNON. But at the time you asked for them, you felt they were very necessary; is that correct?

"General LEMNITZER. We did.

"Senator CANNON. Do you believe these funds are of such importance to our national security that new, or perhaps stronger, efforts should be made to dislodge these funds?

"General LEMNITZER. Well, of the funds that you referred to, Senator Cannon, only $175 million remain available in reserve. I think that is what you referred to.

"We would like to get those funds. We have asked for them, and we probably will make another attempt to get them.

"Senator CANNON. I don't think that quite answers my question, General. The question was: Do you think that these funds and the use for which they are intended are of such importance to the national security that new or perhaps stronger efforts should be made to dislodge these funds from the Bureau of the Budget reserve? I am thinking not only of your own efforts, but efforts on behalf of the Congress.

"General LEMNITZER. We need these funds for modernization of the Army, and as we have testified before various committees of the Congress, we have made a strong case for our modernization program. We need these funds.

"Senator CANNON. And in your opinion they are very important to our national security.

"General LEMNITZER. Yes; insofar as they will improve the capability of the Army to accomplish its mission."

* * * * *

"General LEMNITZER. We would be better equipped with this $175 million. I wouldn't want to give the impression to this committee that the Army can't carry out certain commitments, because it can and will. We can do it better with more modern equipment, as I have attempted to state here this afternoon.

"Senator STENNIS. I know you would do your best, but it is just unthinkable that you would have to go up against better weapons than you have yourself.

"With all the money that we spend, with all the resources we have, the know-how, the technology and everything, it is just unthinkable that we would have to go up against someone else who had better weapons, better equipment, and therefore someone who would place us at a disadvantage to that extent.

"This money is available and appropriated, yet is withheld. Who is holding it up? Is it the Director of the Budget, Mr. Stans? That is where the funds are locked, is it not?

"General LEMNITZER. I don't know who the individuals are; the best information I can give you is that it has been placed in reserve by the Bureau of the Budget."

* * * * *

Budget limitations prevented Navy from submitting its military requirements for fiscal year 1961 (hearings before Preparedness Investigating Subcommittee, missiles, space, and other major defense matters, pp. 280–282, 329):

"Mr. WEISL. In other words, you were given guidelines as to what plateau you must not cross regardless of how much you needed?

"Admiral BURKE. We were given two planning guidelines, sir.

"One was to build a budget based upon our NOA last year less 10 percent of the procurement, military construction, and research and development. That was to be the basic budget.

"The other one was the basic budget plus that 10 percent plus half a billion dollars. We submitted both budgets to the Department of Defense, based on those guidelines, sir.

"Mr. WEISL. Those guidelines were money limitations; isn't that right?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. Not requirement presentations?

"Admiral BURKE. They were money limitations; yes, sir.

"Mr. WEISL. But the fact is that three fleet ballistic missile submarines as recommended were denied; long leadtime requirement for six additional fleet ballistic missile submarines were denied, and seven conversions were denied. Is that correct?

"Admiral BURKE. Yes, sir; I did that in order to——

"Mr. WEISL. You did that?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. But it wasn't because you thought it should be done, but because of the guideline and the money limitation. Is that correct?

"Admiral BURKE. Yes, sir.

* * * * *

"Senator JOHNSON. What you are saying is that you are following the budget judgment instead of the military judgment. The military judgment is one thing, and the budget estimate is another. You made the recommendations based on military judgment. Then you got restrictive budget guidelines and you compromised by following the guidelines.

"Admiral BURKE. We put our most important items in our budget, in the basic budget, and the next most important items in the add-on, sir.

"Senator JOHNSON. And the budget does not contain items that, in your military judgment, you feel you should have.

"Admiral BURKE. It doesn't contain as many items as we originally asked for; no.

"Senator JOHNSON. It eliminated three Polaris submarines, also long leadtime procurement for six additional Polaris submarines. Does that mean you believe the budget provides all the funds that should be provided for the Polaris submarines?

"Admiral BURKE. I might explain that a little bit, sir. I think that people in the Department of Defense should speak for themselves on this——

"Senator JOHNSON. They will. I want you to speak for yourself. Do you think the budget includes all the money it should have for the Polaris submarines and missiles?

"Admiral BURKE. Not now, sir, because we have completed our tests on the Polaris submarines. It is a wonderful machine, sir.

"Senator JOHNSON. The answer is 'No.'

"Admiral BURKE. Yes, sir.

"Senator JOHNSON. And you think the budget ought to include more money for the Polaris submarines?

"Admiral BURKE. Yes, sir."

Withholding of funds results in gap in deploying Polaris submarines (hearings before Preparedness Investigating Subcommittee, missiles, space, and other major defense matters, pp. 282–283):

"Mr. WEISL. In fiscal years 1958 and 1959, the Congress provided funds and authority to proceed with nine Polaris submarines; isn't that correct?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. Despite this, is it not true that the executive branch refused to release the funds for submarines 7, 8, and 9 during fiscal year 1959?

"Admiral BURKE. They were held over until fiscal year 1960.

"Mr. WEISL. I know, but the Congress provided for the use of those funds in 1959, and they were deferred, were they not?

"Admiral BURKE. Yes, sir.

"Mr. WEISL. Is it not also true that the 1960 budget contained no funds for construction of additional Polaris submarines, except for advanced components for submarines Nos. 10, 11, and 12?

"Admiral BURKE. That is correct, sir.

"Mr. WEISL. Isn't the withholding of the funds appropriated in 1959, and the failure to request additional funds in 1960, resulting in a sharp decrease, or a gap, in the deployment of Polaris submarines after the first nine?

"Admiral BURKE. Not a sharp decrease, sir. What we can do, of course, will be to deploy about three submarines per year, because that is what we are building per year.

"Mr. WEISL. I understand that, but if you had used the money that you asked Congress to give you and for which you pleaded so eloquently, you wouldn't have had that gap; isn't that true?

"Admiral BURKE. Yes, sir; that is correct.

"Mr. WEISL. Obviously you cannot make up for that leadtime now. Once leadtime is lost, it is lost forever, isn't it?

"Admiral BURKE. Yes, sir."

Expenditure limitations prevented Air Force from requesting additional programs for fiscal year 1961 (hearings before House Appropriations Committee, revisions in 1960 and 1961 Air Force programs, pp. 38, 40):

"Mr. MAHON. Let me get this clear: The add-ons which you have presented us today are not all the add-ons you requested of the Department of Defense in connection with this presentation?

"General WHITE. That is correct, sir.

"Mr. MAHON. What was the stumbling block with these additions and why did you not get the funds and approval, or do you know?

"General WHITE. Yes, sir; I know. It is an expenditure problem. We must abide, by service, as to the expenditures that can be made in any given fiscal year.

"Mr. MAHON. Is your expenditure limitation for fiscal year 1961 $18.6 billion?

"General FRIEDMAN. $18.6 billion; yes, sir.

"General WHITE. These addenda bring us up to that figure.

"Mr. MAHON. Were you not already up to that point?

"General FRIEDMAN. We were. But, on a comparable basis—although we dropped out some $500 million and we put in $300 million—the space programs and the missile programs spend out at a higher rate than the types of programs which we deleted. Therefore, on an expenditure basis we net out. The point is that we cannot use the additional $140 million without exceeding the $18.6 billion expenditure.

* * * * *

"General FRIEDMAN. For the Minuteman, we asked for an amount of $20.7 million more in our initial discussions than is shown in the addenda here.

"Mr. MAHON. Why was it reduced?

"General FRIEDMAN. It was reduced on the basis which General White discussed, that this appeared to be the maximum funds we could apply and still remain within the expenditures reflected in the President's budget.

"General WHITE. May I put it this way: The list that you have read adds up to the amount of expenditures which we have deleted by our proposed changes.

"Mr. MAHON. I see the point."

THE ROLE OF THE ROBINSON-PATMAN ACT IN THE ANTITRUST SCHEME OF THINGS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. PATMAN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PATMAN. Mr. Speaker, the American Bar Association is one of the great institutions of our contemporary society. Its membership includes all of the great lawyers, jurists, and professors of law that have contributed so mightily to the advancement of our Nation. The achievements of this organization and its members need not be recounted for they are well known throughout the entire country.

During this week in Washington, the American Bar Association is holding its

83d annual convention. At this convention the members are discussing and deliberating various propositions deemed to be of such importance as to merit attention and consideration by the learned group of lawyers in attendance. These discussions, of course, are being led in each case by outstanding members of the profession.

It is noteworthy, I believe, that the Robinson-Patman Act was one of the topics chosen to be discussed by the antitrust section of the association. One of the lawyers selected by the American Bar Association to expound upon the legal intricacies, ramifications, and significance of that act was an attorney recognized by all informed persons as being a complete master of the subject, an attorney of national renown and acknowledged by the antitrust legal fraternity as a leading authority in this field of the law. He is Mr. Everette MacIntyre, general counsel for the Select Committee on Small Business of the U.S. House of Representatives.

There are perhaps many members of the American bar who excel in the field of antitrust law. In my opinion Mr. MacIntyre stands without a peer among those that have attained this high degree of perfection. Mr. MacIntyre's accomplishments are outstanding, not only because of his superb professional talent but also because he has dedicated himself to the application of his knowledge and skill unstintingly in the public interest.

The Robinson-Patman Act like the Sherman Act has had a great impact upon the commerce of our country. The proper interpretation of the act, therefore, is a matter of importance not only to the legal profession, but to all of the people managing the 5 million businesses operating in our country.

For the above reasons, I wish to invite the attention of the Members of the Congress to the following enlightening and authoritative dissertation upon this technical subject that Mr. MacIntyre delivered before the antitrust section of the American Bar Association on August 30, 1960, here in Washington:

THE ROLE OF THE ROBINSON-PATMAN ACT IN THE ANTITRUST SCHEME OF THINGS—THE PERSPECTIVE OF CONGRESS

(By Everette MacIntyre)

The perspective of Congress on the subject of our discussion, or any other subjects, is its understanding of the subject matter. Of course, no individual is authorized to speak for the Congress and to state its views or understanding regarding any subject matter. The understanding of the Congress about any matter is expressed in the action it takes and in its resolutions. Of course, the reports of the committees, upon which Congress acts, are often looked to for information about congressional intents. Therefore, when it was suggested to me that I discuss the perspective of Congress regarding price discrimination and the Robinson-Patman Act, it was agreed that the only way to determine the perspective of the Congress is by recorded expressions which present congressional perception and congressional intents.

When attention is directed, first, to the records of the thing or things which motivated Congress to enact the Clayton Act (1914),[1] as amended by the Robinson-Patman Act (1936),[2] it is noted that Congress acted in an effort to solve a problem by which it was troubled; and second, further examination shows that the problem was created by the practice of price discrimination.

The records clearly show that Congress understood what the problem was, what it was doing to meet it, and that it believed the public interest required the enactment of the Clayton Act and the Robinson-Patman Act. However, in view of the fact that in recent years many apparently well-informed individuals have argued about not only the economic significance of the practice of price discrimination, but, also, even the meaning of the term "price discrimination," it would seem worthwhile to discuss those aspects of our subject.

The term "discrimination" ordinarily is considered to be a simple word of the English language. Webster defines it as a distinction in treatment and as an unfair or injurious distinction. The injury attaches to the person who suffers the distinction of receiving disfavor in treatment.

Today we hear much about discrimination. All of the discrimination that is alleged to be taking place does not involve discrimination in price, but the subject of our discussion is concerned only with price discrimination. Therefore, the action to which we are directing our attention is that of a seller of commodities in discriminating in price between and among purchasers to whom he sells, in that the seller distinguishes some purchasers of his commodities with disfavor through charging them higher prices than he charges other purchasers for goods of like grade and quality. This is the definition of the term "price discrimination" serving as a basis for our discussion today.

We are concerned not only with the meaning of the term "price discrimination," but, also, with the significance of the practice of discriminating in price. Recently, we have heard much argument about the economic significance of price discrimination. According to one school of thought, the practice is a manifestation of competition. Another school of thought holds that it is the antithesis of competition. To the latter it is a practice destructive of competition and the creator of monopolies. How did Congress perceive the practice of price discrimination when it viewed it as a problem to be dealt with in 1914, again in 1936, and how does it perceive it today?

The Commissioner of Corporations, in a report on the transportation of petroleum, May 2, 1906, informed Congress about action by the Standard Oil Co. in inducing and receiving the advantages of rebates from several railroads on a very large volume of business in the transportation of petroleum. In that report it was stated: [3]

"The Standard has therefore been able by reason of its discriminating freight rates to sell oil, when necessary to meet competition, at prices which were profitable to itself, but which left no profit to a competitor. Having thus destroyed competition in large sections of the country, the Standard there charges prices several cents above the cost of manufacture. Railway discriminations, in connection with price cutting, have thus enabled the Standard to obtain monopoly profits of enormous amount.

This price discrimination in favor of a large multiple-market operator, and its use of those advantages in discriminating between and among its customers in widely separated markets to destroy its competitors, is the outstanding aspect of price discrimination brought to the attention of the Congress before enactment of the Clayton Act in 1914. The history of that aspect paralleled the history of the operations of the Standard Oil Trust and the Standard Oil Co. of New Jersey.

The beginnings of the organization which developed into the Standard Oil Co. was a modest partnership between a 23-year-old commission merchant, John D. Rockefeller, and his partner, M. B. Clark. They expanded that partnership by investing $4,000 in an oil refinery plant, which had been started by Mr. Samuel Andrews. In 1865, Mr. Rockefeller became a full partner with Mr. Andrews, and the business became one of the most flourishing of the 25 oil refinery firms in Cleveland. Within 2 years, the partnership was expanded to include the refineries of five additional firms. This was the first step in a long series to establish one of the largest industrial combinations. By 1874, over 50 percent of the refining industry was represented by what had become known as the Standard Alliance. This loose federation became the Standard Oil Trust after 1882. By this time its relative size had given it a degree of market power in both its buying of services and goods, and its selling of coal oil or kerosene. This market power was exercised to secure favored treatment from railways in the transportation of the oil and other supplies for Standard Oil Trust. The advantages thus gained were utilized by Standard to discriminate between and among its customers located in widely separated markets for the purpose and with the effect of destroying competing oil refinery firms.[4]

In a report under date of August 5, 1907, the Commissioner of Corporations informed Congress that the business of each of Standard's competitors largely was confined to a limited area and to a limited number of towns within such area—first, by reason of the fact that their volume of business was small, and, second, that their resources did not permit the direct-delivery methods utilized by Standard. The direct-delivery methods utilized by Standard enabled it to make sales and deliveries of kerosene to all sections of the country, including those where it faced no competition. In these markets where it did not face competition, Standard was enabled to, and did, charge monopoly prices, and, by reason of the high prices thus obtained, it was further enabled, in competitive areas and towns, to reduce its prices to a point which left no profit for the independent concerns.[5]

In the course of its investigations of trusts, Congress found that Standard first acquired its position as a multiple-market operator

[3] Transportation of Petroleum, Garfield's report (1906), p. 3.

[4] The Commissioner of Corporations, in part I of his "Report on the Petroleum Industry," May 20, 1907, in referring to the position of the Standard Oil Co. in the petroleum industry, at pp. xviii–xx, in his letter of submittal of the report, stated:

"Scandalous railway discriminations obtained by the Standard in its earlier years as against its competitors did more than all other causes together to establish it in its controlling position.

"Another important element in the control over the industry is secured by the Standard through its marketing methods. It uses very generally the bulk system of delivery to retail dealers by tank wagon—a cheaper, safer, and more convenient method of delivery than in barrels. This not only reduces the cost of marketing greatly, but also has eliminated largely the jobber from the business. Dealing thus directly with the retailer, the Standard is enabled to arrange for such local price differences as it may desire for the purpose of destroying local competition, without disturbing its prices over any large section of its trade."

[5] See pt. II of the Report on the Petroleum Industry by the Commissioner of Corporations, dated Aug. 5, 1907, p. 28.

through merger with a number of previously independent competitors. In order to effectuate the control of these companies, the Standard Oil Trust was organized in 1879. It encompassed about 40 companies, which controlled a large percentage of the total oil-refining capacity in the United States. Thus, what started out as a small company in the period of 1860–65, as only 1 of about 30 refining companies, had by 1879 grown to a position having powerful monopoly control over prices in many local markets in an industry which previously had given the public the benefit of price competition. Generally, it is agreed that powerful monopoly control such as this over prices in a number of separate markets is what enables a large seller to discriminate in price regularly or at will between and among its customers and the communities in which the customers are located. Of course, it is recognized that a small seller without market power can and on rare occasions engages in spasmodic price discriminations, but these discriminations ordinarily are not regarded as having any economic significance. The price discriminations which are practiced by the seller frequently or regularly and at will with devastating effects flow as actions from the seller who has market power approaching monopoly control over prices in the markets in which he operates. It is clear from the record that the Standard Oil Co., to which we have made reference, had such market power and control of prices in many local markets.

As a result of its investigations of trusts, Congress was informed that the trail blazed by Standard in the petroleum industry, which included, first, the acquisition of market power and multiple-market control through merger with competitors, and then the use of that market power to discriminate in price to destroy the remaining competition, had shown the way to monopolists and would-be monopolists in other industries, who quickly proceeded to imitate Standard's practice of price discrimination. Included among the latter were the tobacco, sugar, biscuit and steel industries. The monopoly power thus acquired and abused by those in the petroleum and tobacco industries was challenged as violative of the Sherman Antitrust Act. The Supreme Court of the United States disposed of those challenges in 1911. It held that the Standard Oil Co. of New Jersey was a monopoly in violation of section 2 of the Sherman Act and decreed a dissolution of that combination.[6] The Standard Oil Cos. of today resulted from the dissolutions. A similar ruling was handed down against the American Tobacco Co.[7] Later the combination and restraint of trade having monopoly control over prices in the sugar industry was challenged successfully under the Sherman Act.[8] In some of these cases, effort was made to defend the challenged monopoly control over prices on the ground that this power and position had been acquired as a result of the use of a lawful practice, namely, the practice of price discrimination. For example, attorneys for the Standard Oil Co. of New Jersey argued before the Supreme Court of the United States that Standard should not be broken up as a monopoly because it had acquired its position as the result of lawful competitive methods.[9] In the later Sugar Institute case, representatives of the defendants expressed a strange idea of just what constituted discriminatory treatment. They confused discrimination with competition. They condemned price reductions because the sellers were either not willing or able to provide all buyers with the same reductions. Therefore, they undertook to maintain all prices at a high "competitive" level, contending that for any one seller to reduce prices below that "competitive" level, even though he treated all of his buyers equally, was engaging in unethical, noncompetitive and discriminatory conduct.[10] Many of these ideas about the meaning of the economic significance of the practice of price discrimination have persisted.

They have served as the wellspring for other ideas from which has arisen the argument that the Clayton Act, the Robinson-Patman Act, and other legislation against price discrimination, constitute legislation against competition and are, therefore, basically in conflict with the Sherman Antitrust Act and our national antimonopoly policy underlying it. It is for this reason that our discussion today is belaboring the definition of the term "price discrimination," and the recorded expressions of the perspective of Congress regarding the economic significance of price discrimination.

References have been made to the information available to the Congress from the Commissioner of Corporations about the economic significance of the practice of price discrimination. That and similar information was not only available to the Congress, but, also, to the President of the United States and to others. Study of this information prompted President Woodrow Wilson in 1913, in one of his first messages to the 63d Congress, to call for legislation to prohibit price discrimination and unfair trade practices. In doing so, he stated:

"We are sufficiently familiar with the actual processes and methods of monopoly and of the many hurtful restraints of trade to make definition possible, at any rate up to the limit of which experience has disclosed. These practices, being now abundantly disclosed, can be explicitly and item by item forbidden by statute in such terms as will practically eliminate uncertainty, the law itself and the penalty being made equally plain."

Congress was responsive to that call for legislation. First, it enacted the Federal Trade Commission Act, which became law September 26, 1914.[11] In that law, unfair methods of competition were made unlawful. Congress enacted the Clayton Antitrust Act,[12] section 2 of which made price discrimination unlawful where the effect may be substantially to lessen competition or tend to create a monopoly in any line of commerce. That law was approved October 15, 1914.

President Wilson was highly elated over the prospects provided by this legislation for action against monopolistic practices and conditions.[13]

The perception of Congress into the economic significance of the practice of price discrimination is vividly recorded in the committee reports on the bill, which became the Clayton Act.[14] In those reports, references were made to the price discrimination practices of the Standard Oil Co. of New Jersey and the American Tobacco Co., and to the great market power these multiple-market operators had acquired and abused through the use of price discrimination, with the result of destroying competition and creating

[12] 15 U.S.C. 12–33 (1958).

[13] Shortly after President Wilson signed the Clayton Antitrust Act and the Federal Trade Commission Act, he wrote in a private letter:

"With similar purpose and in a like temper the Congres has sought, in the Trade Commission bill and in the Clayton bill, to make men in a small way of business as free to succeed as men in a big way, and to kill monopoly in the seed. * * * It is our purpose to destroy monopoly and maintain competition as an only effectual instrument of business liberty. * * *" (Letter of Woodrow Wilson, Oct. 17, 1914, in 3 The Public Papers of Woodrow Wilson, 189–190.)

[14] The Clayton Act of 1914 originated with the bill H.R. 15657, introduced by Mr. Clayton on Apr. 14, 1914, 51 CONGRESSIONAL RECORD 6714 (1914). Sec. 2 of this bill prohibited discrimination in price between different purchasers, with the purpose or intent to destroy or wrongfully injure the business of a competitor of either the purchaser or the seller. Sec. 2 did not contain any proviso excepting discriminations made in good faith to meet competition.

H.R. 15657 was reported out on May 6, 1914, and the report, H.R. No. 627, 63d Cong., 2r sess., 8–9, showed that the sec. 2 prohibition of price discrimination was confined to a well-known, common, particular form of discrimination. Thus, the report stated, in part:

"Sec. 2 of the bill is intended to prevent unfair discrimination. The necessity for legislation needs little argument to sustain the wisdom of it. In the past it has been a most common practice of great and powerful combinations engaged in commerce—notably the Standard Oil Co., and the American Tobacco Co., and others of less notoriety, but of great influence—to lower prices of their commodities, oftimes below the cost of prices of production in certain communities and sections where they had competition, with the intent to destroy and make unprofitable the business of their competitors, and with the ultimate purpose in view of thereby acquiring a monopoly in the particular locality or section in which the discriminating price is made. Every concern that engages in this evil practice must of necessity recoup its losses in the particular communities or sections where their commodities are sold below cost or without a fair profit by raising the price of the same class of commodities above their fair market value in other sections or communities. Such a system or practice is so manifestly unfair and unjust, not only to competitors who are directly injured thereby but to the general public, that your committee is strongly of the opinion that the present antitrust laws ought to be supplemented by making this particular form of discrimination a specific offense under the law when practiced by those engaged in commerce."

S. Doc. No. 583, 63d Cong., 2d sess. (1914), made the same statement for the Senate Judiciary Committee in its report on H.R. 15657.

In its report upon the bill to enact the Clayton Act—S. Rept. No. 695, 63d Cong., 2d sess., 1 (1914), to accompany H.R. 15657, the Senate Committee on the Judiciary said:

"Broadly stated, the bill, in its treatment of unlawful restraints and monopolies, seeks to prohibit and make unlawful certain trade practices which, as a rule, singly and in themselves are not covered by the act of July 2, 1890 (the Sherman Act) or other existing antitrust acts and thus, by making these practices illegal, to arrest the creation of trusts, conspiracies, and monopolies in their incipiency and before consummation."

monopolies. The practice of price discriminations was viewed as evil and as contributing to high prices far above the market value in some sections of the country. It was noted that those who had sufficient market power to discriminate in price had charged high prices in some markets to subsidize the lower prices involved in the discriminations, with the effect of eliminating competition in the areas where the lower prices were charged.

The legislation Congress enacted in 1914, making it unlawful to practice price discrimination in certain situations, was hailed not only by President Wilson, but by small business enterprises and the public generally as a step in the right direction. However, these champions for the free and competitive enterprise system were in for some unpleasant surprises. It was found that somehow someone had slipped into the antidiscrimination provision of section 2 of the Clayton Antitrust Act the proviso which made that section of the law unoperative against price discriminations when made "in good faith to meet competition." When that proviso was being debated in Congress, concern was expressed about the possibility of it "pulling the teeth" from the law. The fears which were expressed about the possible effect of the good faith proviso of the Clayton Antitrust Act of 1914 have been proven to have been well founded. In the first 20-year period, after the enactment of the legislation, it was found that the good faith proviso had made the law somewhat ineffective for use against destructive price discriminations.

Congress wanted to know why the law was ineffective. It requested the Federal Trade Commission to investigate the matter. That was done pursuant to Senate Resolution 224, 70th Congress. On December 14, 1934, the Commission submitted its final report on that investigation.[15] In that report, the Commission stated that the then existing law, as it had been interpreted, permitted destructive price discriminations "when made in good faith to meet competition." The Commission reported that such good faith provision of the law virtually nullified the provisions in the Clayton Act, which were directed against price discriminations.[16] The Commission proceeded to recommend that the law be amended and that the nullifying provisions be eliminated.[17]

The Commission rejected suggestions which had been made to the effect that the Sherman Antitrust Act[18] be relied upon and used to halt destructive price discriminations.[19]

Resolutions were introduced in the House of Representatives, providing for a congressional investigation of the trade practices of big-scale buying and selling organizations.[20] These resolutions provided for investigations to be made by a special investigating committee, consisting of seven Members of the House; four Democrats and three Republicans. It was under the chairmanship of Hon. WRIGHT PATMAN, Democrat, of Texas.

The Committee found that injurious price discriminations were widespread, and were being practiced particularly in the food industry. It was found that in many instances the big chains were demanding special price concessions and coercing small suppliers into granting special concessions, with threats of putting up their own manufacturing plants. In other instances they were playing the suppliers off against one another, forcing suppliers of nationally advertised products to meet the prices of small, exclusive suppliers who could not, in practice, market to the independent trade. The big corporate chain food retailers who were receiving the benefits and advantages of these discriminations were, in turn, utilizing these advantages in their selling, with the result that independents were being driven out of business. The chains were getting price concessions and secret rebates far beyond anything that was justified by the suppliers' cost differences. The investigations revealed, for example, that prior to 1935 the Atlantic & Pacific Tea Co. had been receiving on an annual basis $6 million in off-the-invoice discounts and another $2 million a year in brokerage fees on its purchases. These widespread and growing practices were found to be destructive of competition and creating monopolistic conditions, but the congressional committee was not able to find that the existing law provided any prospect for any effective relief. It was unable to conclude differently from the Federal Trade Commission that "The Commission has no evidence which would establish that price discrimination by chain stores has not been in good faith to meet competition and there is good ground to conclude that in many cases it has been for that purpose." [21]

In the light of the facts uncovered during the course of investigations of big-scale buying and selling in 1935–36, it was not difficult for one to see why the law against price discrimination had broken down. One of the main reasons was the defect in the law pointed out by the Federal Trade Commission in its report on the chainstore investigation. That defect was the provision which allowed the sellers who were discriminating in price to defend on the ground that they were meeting competition in good faith.

Bills were introduced in both the House and the Senate to overcome the defects in the laws against price discrimination, including the loophole which permitted discriminations "made in good faith to meet competition".[22]

Extensive hearings were held by the Committee on the Judiciary of the House of Representatives, and by the Committee on the Judiciary of the Senate on these proposals to strengthen the laws against destructive price discriminations. Representatives of many of the large corporations which had been practicing price discrimination voiced strong opposition to these legislative proposals. However, the committees reported favorably on the Robinson and Patman bills, and recommended their enactment into law. The report of the Committee on the Judiciary to the House on the Patman bill contained the following statement:

"Your committee is of the opinion that the evidence is overwhelming that price discrimination practices exist to such an extent that the survival of independent merchants, manufacturers, and other businessmen is seriously imperiled and that remedial legislation is necessary." [23]

The bill introduced in the Senate and reported by the Senate Committee on the Judiciary followed the FTC's recommendations literally in that it contained no reference whatever to good faith or to meeting of competition. The House bill, on the other hand, contained the language of the statute today. The Senate bill was amended on the floor of the House by insertion of the good faith clause of the old Clayton Act. The conference committee agreed upon the language of the House bill.

The conference report to the House on the resolution of the differences between the Senate and the House bills is quite significant on the good faith provisio in the light of subsequent developments.

Congress passed the Robinson and Patman bills overwhelmingly. Only 16 votes were recorded in opposition in the House of Representatives, and none in the Senate. The enactment was completed on June 16, 1936, and President Roosevelt signed the Robinson-Patman Act on June 19, 1936.

A few of the facts relating to the passage of the Robinson-Patman Act have been cited to demonstrate that in effect the 74th Congress accepted its responsibility and met one of the really serious problems of the day when it strengthened the laws against destructive price discrimination.

The congressional action in thus strengthening the law against the practice of price discrimination was not sufficient in and of itself to eliminate the practice, although it was noted that much progress was made in that direction. Countless well-intentioned firms attempted to correct their trade practices voluntarily. The Federal Trade Commission pursued others with prosecutions. In some instances the prosecutions were prolonged and costly, with relief delayed and

[20] H. Res. 203, H. Res. 239, 74th Cong., 1st sess. (1934).

[21] S. Doc. 4, 74th Cong., FTC Final Report on the Chain Store Investigation (1934).

[22] H.R. 8442 (introduced by Representative WRIGHT PATMAN, Democrat, of Texas), and S. 2154 (introduced by Senator Joseph Robinson, Democrat, of Arkansas), 74th Cong., 2d sess. (1935).

[23] Mr. Utterback was the chairman of the conferees for the House and therefore not only presented the conference report to the House but also served as manager of the bill when it was reported to the House by the conference committee for consideration.

With reference to the "good faith" provision, the conference report contained the following statement:

"The Senate bill contained a further proviso—That nothing herein contained shall prevent discrimination in price in the same or different communities made in good faith to meet competition."

This language is found in existing law, and in the opinion of the conferees is one of the obstacles to enforcement of the present Clayton Act. The Senate receded, and the language is stricken. A provision relating to the question of meeting competition, intended to operate only as a rule of evidence in a proceeding before the Federal Trade Commission, is included in subsection (b) (H. Rept. 2951, 74th Cong., 2d sess. 6, 7 (1935) (on H.R. 8442)).

That aspect of the conference report on the bill which became the Robinson-Patman Act was further explained by Mr. Utterback, the manager of the House conferees in the following language: "This does not set up the meeting of competition as an absolute bar to a charge of discrimination under the bill. It merely permits it to be shown in evidence. This provision is entirely procedural. It does not determine substantive rights, liabilities, and duties. They are fixed in the other provisions of the bill. It leaves it a question of fact to be determined in each case, whether the competition to be met was such as to justify the discrimination given, as one lying within the limitations laid down by the bill, and whether the way in which the competition was met lies within the latitude allowed by those limitations"2 (80 CONGRESSIONAL RECORD 9418, daily ed. June 15, 1936).

Therefore, it was made clear that the Congress never intended the "good faith" proviso to be construed as a carte blanche exemption to violate the bill so long as a competitor could be shown to have violated it first. Particular care was exercised to make clear that the law was not to be used in practices of oppressive discriminations in violation of the obvious intent of the bill.

uncertain. In the meantime, Congress again investigated and studied monopoly problems, including the practice of price discrimination. This time the investigation and study was made by the Temporary National Economic Committee, under the chairmanship of Senator JOSEPH C. O'MAHONEY. The final report of that investigation was made March 31, 1941. It contains many recommendations for strengthening our antimonopoly laws. One recommendation was directed to systematic discriminations practiced through the use of basing-point systems and zone-pricing systems.

The Temporary National Economic Committee recommended that Congress enact legislation declaring such systematic discriminatory pricing systems to be illegal per se.[24] Congress did not enact legislation as thus recommended.

With the tools provided by the Congress through the Robinson-Patman Act, the Federal Trade Commission continued its laborious task to eliminate destructive price discriminations. It met with considerable success.[25] Opposition to this success arose, grew and stiffened. It took the form of arguments by representatives of firms accused and found to be discriminating in price, and by others, that price discriminations were evidence of competition and should not be interfered with. It was argued that the Robinson-Patman Act was a law against "effective competition." This argument was made not only to the Federal Trade Commission in briefs in the cases which were being litigated, it was repeated in law review articles. However, the Federal Trade Commission continued its enforcement activities. One of its notable cases was that in which it challenged price discrimination practices in the portland cement industry.[26] The Commission was successful in that proceeding. That success prompted representatives of the firms which had been found to be discriminating in price to ask Congress to legalize their price discriminating methods and systems. Elaborate lobbying activities were undertaken in support of that request.[27] The arguments made to the Congress in the course of these lobbying activities to the effect that price discrimination practices and systems should be legalized, were predicated upon the further argument that price discrimination was evidence of effective competition,[28] and became persuasive in that instance, and Congress passed a bill which would have had the effect of legalizing some of these price discrimination systems and methods.[29] That bill was vetoed by the President of the United States during June 1950.

Failure to secure approval of legislation which would have legalized many types of price discrimination, prompted representatives of firms using these price discrimination practices to "reeducate" not only the leaders of the American public regarding what should be considered as "competitive" and what should be considered as "monopolistic" practices, but, also, to "help the courts understand the problem." Arguments in support of this program were set forth in articles, books, and speeches, which were expected to come to the attention of Government officials, legislators, and judges. The crux of these articles was to the effect that price discrimination and other practices previously found to be monopolistic by the Congress, were, in fact, "competitive," and that laws directed specifically against such practices are laws inconsistent with an antimonopolistic policy for free and unfettered competition.

These plans and programs, along with the writings which followed, gave rise to a new body of literature regarding the laws against price discrimination. Arguments appeared in many writings describing antitrust laws prohibiting price discriminations as being inconsistent, if not in conflict, with our basic antitrust law, namely, the Sherman Act of 1890.[30]

In the meantime, the courts took note of these writings. A number of opinions and decisions appeared, in which it was noted that in many of these writings "experts" had contended that the Robinson-Patman Act was basically inconsistent with the Sherman Antitrust Act because it interfered with price discriminations which were said by these "experts" to reflect vigorous competition. The Supreme Court of the United States in the case of *Standard Oil Co. of Indiana* v. *Federal Trade Commission*, reflected a leaning to this view.[31] In that case the Court held that a giant concern such as the Standard Oil Co. of Indiana, notwithstanding the provisions of the Robinson-Patman Act, is privileged to discriminate in price with the effect of destroying its competitors and substantially lessening competition and tending to create a monopoly, so long as such giant concern is able to show that it has accomplished all of those things in "good faith" in meeting an equally low price of a competitor.

One of the authors of the Robinson-Patman Act, Hon. WRIGHT PATMAN, Democrat, of Texas, took the position that this decision in the Standard Oil Co. of Indiana case had so crippled the Robinson-Patman Act that legislation was needed to remove the effects of that decision.

Therefore, at the opening day of the 84th Congress, he introduced a bill [32] which would have removed in large part the effect of the decision in the Standard Oil case. MR. PATMAN'S bill would have restored the law to

---

[24] S. Doc. No. 35, 77th Cong., 1st sess.—Final report and recommendations of the Temporary National Economic Committee—and it was stated:

During the last 20 years basing-point systems and variations of such systems, known technically as "zone pricing systems" and "freight equalization systems," have spread widely in American industry. Many of the products of important industries are priced by basing point or analogous systems, such as iron and steel, pig iron, cement, lime, lumber and lumber products, brick, asphalt shingles and roofing, window glass, white lead, metal lath, building tile, floor tile, gypsum plaster, bolts, nuts and rivets, cast-iron soil pipe, range boilers, valves and fittings, sewer pipe, power cable, paper, salt, sugar, corn derivatives, industrial alcohol, linseed oil, fertilizer, and others.

The elimination of such systems under existing law would involve a costly process of prosecuting separately and individually many industries, and place a heavy burden upon antitrust enforcement appropriations.

We therefore recommend that the Congress enact legislation declaring such pricing systems to be illegal.

[31] 340 U.S. 231 (1951).

[32] H.R. 11, 84th Cong. H.R. 11 would have amended subsec. (b) of sec. 2 of the Robinson-Patman Act to read as follows:

Section 2(b) of an act approved October 15, 1914, as amended (15 U.S.C. 13(b)):

"SEC. 2(b). Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however*, That unless the effect of the discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce it shall be a complete defense for a seller to show that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor."

The bill then came up for debate and vote by the House on June 11, 1956, at which time it passed overwhelmingly by the vote of 394 yeas, 3 nays, and 35 not voting (CONGRESSIONAL RECORD, vol. 102, pt. 7, pp. 10051–10052). The matter then was considered by the Senate Committee on the Judiciary and was reported favorably by that committee in Senate Report No. 2814 on July 27, 1956. But since that was the date on which the Senate adjourned sine die for the 84th Congress, the bill failed to receive consideration on the floor of the Senate. The rules provide that a report of that nature cannot be taken up on the same day it is made without unanimous consent. Since Senator Bricker, of

the point where price discriminations, proven to have the effect of substantially lessening competition and tending to create a monopoly in any line of commerce, could not be defended by the utilization of the "good faith" proviso.

Mr. PATMAN's bill passed the House of Representatives on June 11, 1956, by a vote of 394 to 3. It failed of passage in the Senate because it was not taken up in that body until the closing days of the session and unanimous consent was required for it to be considered. One Senator objected, and, therefore, the bill was not considered in the Senate. Since then, similar bills have been introduced, but none has reached the floor of either the House or the Senate for consideration.

In 1956, when the provisions of Mr. PATMAN'S bill (H.R. 11) and an identical bill (H.R. 1840) were being presented to the House of Representatives for consideration, the House Committee on the Judiciary reported that—

"Price discriminations favoring preferred buyers present a danger to the competitive enterprise system which is inconsistent with the policy of the price discrimination statute. Firms can abuse their superior market position and engage in discriminatory practices that eliminate small suppliers and small retailers from the competitive scene. In practical effect the law as presently construed allows the private interest of a discriminator to outweigh the public interest in preserving competitive opportunity at all levels of business activity. H.R. 1840 would reassert that the public interest in protecting the economy against discriminations which may substantially lessen competition or tend to create a monopoly must prevail over private interests served by discrimination." [33]

When no legislation developed out of these efforts to strengthen the Robinson-Patman Act against the practice of price discrimination, there appeared to be an upsurge in the use of the practice. Many complaints poured in to the Small Business Committees of the Senate and the House about large, multiple-market sellers using the practice of price discrimination with the effect of eliminating competition.

In the meantime, small business firms victimized by these price discriminations have struggled to protect themselves to the extent provided under existing law. A small wholesale baking firm, doing business in Santa Rosa, N. Mex., found that a large competitor doing business at locations in several States, including Santa Rosa, was selling bread at discriminatory prices and at prices at levels below cost in Santa Rosa, with damaging results to the small baker in that community. The small business firm brought suit under not only subsection (a) of section 2 of the Robinson-Patman Act but also under section 3 of the Robinson-Patman Act. The latter section of the law makes it unlawful for a seller to sell at unreasonably low prices. In that instance, the small firm was successful, and its success was sustained by the Supreme Court of the United States in 1954.[34] However, further efforts by other small business firms to utilize section 3 of the Robinson-Patman Act have met with failure.

On January 20, 1958, the Supreme Court of the United States by a 5 to 4 decision held that section 3 of the Robinson-Patman Act is available only for criminal prosecutions by the U.S. Department of Justice, and, therefore, cannot be utilized by small business firms in private litigation for damages or for injunctions.[35] The reasoning underlying the Court's decisions in these cases was that section 3 of the Robinson-Patman Act is not a part of the Federal antitrust laws. Immediately the chairman of the House Small Business Committee, Hon. WRIGHT PATMAN, Democrat, of Texas, introduced H.R. 10243 (85th Cong.), which would have redefined the term "antitrust laws" appearing in section 1 of the Clayton Act, so as to include section 3 of the Robinson-Patman Act. No action was taken on that proposal.

Before the conclusion of the 85th Congress, the rising tide of complaints from small business firms about price discriminations prompted the House Small Business Committee to create a special subcommittee to look into the matter. That special subcommittee held hearings regarding small business problems stemming from price discrimination practices in the distribution of dairy products. The subcommittee has continued its activities in the 86th Congress and has made two reports to the House of Representatives on its investigations and hearings.[36] In these reports, the subcommittee made findings that small and independent processors and distributors of dairy products have been providing a substantial amount of price competition at low, nondiscriminatory prices. The large, competing, multimarket processors and distributors met that competition by selling at discriminatory prices in various markets, and, in some instances, in making sales at prices, apparently, below cost. The subcommittee concluded that these discriminatory pricing practices of the large processors and distributors threaten the continued existence of large numbers of small and independent processors and distributors of dairy products.

Subcommittee No. 5 of the House Small Business Committee in the 85th Congress, and again in the 86th Congress, has made investigations and studies of price discrimination practices in the distribution of various food items. In the course of these investigations and studies a large amount of testimony and other evidence has been received to the effect that price discrimination practices in the sale and distribution of food is widespread. Representatives of small and independent food distributors testified that the large corporate food retailers are inducing and receiving the benefits of these price discriminations with devastating effects on their small and independent competitors.

Quite recently the Federal Trade Commission issued a report entitled, "Economic Inquiry Into Food Marketing," in which it was stated that during the period from 1948 to 1958, approximately 100,000 independent food retailers disappeared.

Members of Congress, mindful of these circumstances, have introduced a number of legislative proposals designed to strengthen Federal legislation against the practice of price discriminations. These legislative proposals are pending.[37]

The first of these bills, introduced in the House of Representatives at the beginning of the 86th Congress (H.R. 11) was designed to plug up the loophole in the Robinson-Patman Act made by the decision of the Supreme Court of the United States in 1951 in the case of the *Standard Oil Co.* v. *Federal Trade Commission*, 340 U.S. 231. Another, H.R. 8841, would empower the Federal Trade Commission to enter temporary cease and desist orders where it would be in the public interest to do so, pending the resolution of long, drawn out litigation against price discrimination practices. H.R. 10235 would amend the Federal Trade Commission Act by adding a new section containing the substantive law now appearing in section 3 of the Robinson-Patman Act, and, in that connection, providing that the small business firms victimized through violations of the substantive provisions would be entitled to proceed with private litigation for damages and for injunctions.

Committees of Congress have not acted on these proposals. However, the House Committee on Interstate and Foreign Commerce did hold hearings on H.R. 10235 on June 16 and 17, 1960.

From these circumstances, it is readily apparent that Congress in 1960 is faced with and troubled by a problem not unlike the problem it faced and acted upon in 1914 and again in 1936; that is, the problem of price discriminations which have the effect of substantially lessening competition and tending to create monopolies. Incident to this problem facing the Congress is the question of whether we want monopoly in this country, even when it results from acts and practices carried on in good faith. Also to be considered are the arguments of those who use the practice of price discrimination to the effect that price discrimination is a form of vigorous competition and should not be interfered with by laws which prohibit price discrimination. Congress is called upon to weigh these arguments against the facts which at this juncture appear to inform the Congress that the practice of price discrimination is anticompetitive. As carried on in many sections of the country and in many industries today, it appears no different in its effects from the price discriminations previously practiced by the Standard Oil Trust in earlier years. The effects have been shown to susbtantially lessen competition and tend to create monopolies.

In conclusion, personally I think that if Congress at this late date should find that all it has learned heretofore about the practice if price discrimination is wholly inaccurate, and that instead of price discrimination havng the effect of substantally lessening competition and tending to create monopolies is, in fact, a competitive practice, then Congress would be justified in repealing the Robinson-Patman Act and all of the Federal laws which prohibit price discrimination. On the contrary, if Congress should confirm its previous findings about the deleterious effects of price discrimination on competition, then it should make the laws which prohibit the use of that practice, more effective.

Reaffirmation by the Congress of its earlier findings on these matters would help to make more effective our antitrust legislation against price discriminations. We should have more of what is good and less of what is bad.

Ohio, Republican, objected to the bill receiving consideration, he prevented it from being taken up.

On January 3, 1957, at the opening of the 85th Congress, Representative PATMAN, Democrat, of Texas, reintroduced the same bill in the House, and likewise Senator KEFAUVER introduced again a companion bill in the Senate at the same time. By coincidence, Mr. PATMAN's bill in the House in the 85th Congress also bore the number H.R. 11 and Senator KEFAUVER'S bill in the Senate the number S. 11. During March, April, and May 1957, the Antitrust Subcommittee of the Committee on the Judiciary, U.S. Senate, held hearings on S. 11 and reported the bill to the full committee. The full committee did not act on the bill before the 1st session of the 85th Congress ended. The House Judiciary Committee did not hold hearings on H.R. 11 in the 85th Congress.

[37] The bills referred to include the following: H.R. 11, H.R. 212, H.R. 2215, H.R. 8841, and H.R. 10235 (86th Cong.)

REVISING IMMIGRATION LAWS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, I am pleased that the splendid platform adopted by the Democratic National Convention contains the following wise and forthright section on immigration:

We shall adjust our immigration, nationality and refugee policies to eliminate discrimination and to enable members of scattered families abroad to be united with relatives already in our midst.

The national-origins quota system of limiting immigration contradicts the founding principles of this Nation. It is inconsistent with our belief in the rights of man. This system was instituted after World War I as a policy of deliberate discrimination by a Republican administration and Congress.

The revision of immigration and nationality laws we seek will implement our belief that enlightened immigration, naturalization and refugee policies and humane administration of them are important aspects of our foreign policy.

These laws will bring greater skills to our land, reunite families, permit the United States to meet its fair share of world programs of rescue and rehabilitation, and take advantage of immigration as an important factor in the growth of the American economy.

In this World Refugee Year it is our hope to achieve admission of our fair share of refugees. We will institute policies to alleviate suffering among the homeless wherever we are able to extend our aid.

We must remove the distinctions between native-born and naturalized citizens to assure full protection of our laws to all. There is no place in the United States for second-class citizenship.

The protections provided by due process, right of appeal, and statutes of limitation, can be extended to noncitizens without hampering the security of our Nation.

We commend the Democratic Congress for the initial steps that have recently been taken toward liberalizing changes in immigration law. However, this should not be a piecemeal project and we are confident that a Democratic President in cooperation with Democratic Congresses will again implant a humanitarian and liberal spirit in our Nation's immigration and citizenship policies.

I have repeatedly called the attention of this House to the need for making basic changes in our immigration law, as proposed in the Democratic platform. While the lack of substantial progress in this important field of our national policy is deplorable, nevertheless I have been heartened by the number of limited improvements that have been enacted in recent years. The outstanding examples are the Refugee Relief Act of 1953 and Public Law 85–316, approved September 11, 1957.

The Refugee Relief Act made it possible for over 200,000 people to enter the United States outside the quota limits of the McCarran-Walter Act.

Public Law 85–316 has made it possible for other special classes of aliens to enter, notwithstanding the restrictions of our basic law.

The present Congress has seen some humanitarian improvements even if they are of limited applicability. The alien orphan adoption provision and tubercular alien provision of Public Law 85–316 were extended. Public Law 85–363, passed last year, was designed to reunite families both by improving the method of allocating visas among the preference groups within each quota and by granting nonquota status to many aliens who had been on waiting lists for a number of years. Public Law 86–648 is a modest contribution to our participation in World Refugee Year. It expands the Attorney General's authority to parole refugees into the United States and to grant them permanent resident status. It is a deep disappointment to me that the unfortunate Italian nationals who have been displaced from their ancestral homes in Tunisia are not eligible for entry under this new refugee law. A measure providing for the issuance of 5,000 special nonquota immigrant visas to these refugees and their families was introduced by me in the Congress after reading the moving report on this tragic problem made by the Honorable Juvenal Marchisio, National Chairman of the American Committee on Italian Migration. Surely, the plight of these people, so graphically described by Judge Marchisio, merits our compassion and assistance.

Despite the shortcomings and limitations of these measures, I have gladly supported them, but emergency legislation is not sufficient to mitigate the harshness of the quota system. As the Democratic platform declared, "this should not be a piecemeal project." We must enact basic amendments to our immigration code—amendments which would eliminate completely the unjust, discriminatory national origins provisions from the law.

The Refugee Relief Act was designed to take care of an unusual situation to be sure but it demonstrated that this country is capable of absorbing fresh blood over and above what the national origins quota provides. The quota after all is not holy writ, as some would like to think. It is not the ideal, the perfect one and only method of determining how many immigrants shall enter the United States or who they shall be. It is in fact an anachronism, granting even that it made some sense in 1924 when it was adopted. It is based on a theory of racial superiority and inferiority which we have long since rejected. It would have our quotas set, from now until eternity, presumably, on the basis of the racial composition of the United States in 1920—40 years ago. Moreover, the racial homogeneity principle of the national origins system is not being realized in actual practice because most of the quota visas available to natives of the preferred countries, such as Great Britain are not being used, while we have at the same time had very large immigration from Western Hemisphere countries which do not come within the strictures of the quota at all.

With each passing year the national origins concept becomes more ridiculous. It will most certainly be replaced with a more realistic system some day—it is just a matter of time. This should not be looked upon as just another "all in due time" matter. It is inevitable that the national origins principle will be abandoned. Inevitability, however, should not be used as an excuse for not facing up to the problem.

I have long sponsored legislation providing for a complete revision of the discriminatory and inequitable Immigration and Nationality Act of 1952 against which I voted. Among its other accomplishments, my bill would replace the national origins quota system with a unified quota which would establish standards of individual qualifications, rather than race, for determining the admissibility of immigrants. This system of selection would be a realistic substitute for the national origins quota system, which is so heavily weighted in favor of those who have no need or desire to come to the United States. To illustrate: Of the total quota authorized under the Immigration and Nationality Act, almost 42.2 percent goes to Great Britain and Northern Ireland and this allotment is largely unused. Italy has 3.6 percent of the total quota, or 5,666 persons. This contrasts with the last two decades of the 19th Century when about 960,000 immigrants—including my own parents—entered the United States from Italy. In the first decade of this century, 2,045,877 persons came here from Italy, an annual average of over 200,000. During the same 10-year period, over 167,000 Greeks migrated to this country, an average of over 16,000 a year; under the McCarran-Walter Act 308 Greeks are entitled to enter the United States each year.

In addition to providing a substitute for the national origins formula, the legislation advocated by me would effect other needed reforms, including abolishing certain loss of nationality provisions which apply only to naturalized citizens; establish better procedures to review deportation and exclusion orders; and increase efficiency by creating a single agency to administer the immigration laws instead of splitting these functions between the Justice Department and the State Department.

The most important change offered by this bill is, of course, the unified quota system to substitute for the national origins provisions of the present law. I have explained the workings of this system a number of times on this floor, as have others. It is sufficient at this time to say that an apparently reasonable and workable substitute has been offered in place of the present formula which so many Americans find objectionable. It should be given a chance to stand or fall under our democratic process.

Ours is, after all, a Nation of immigrants. Were it not for immigration there would be no United States. Washington would still be largely a swamp, New York City, a primeval forest, and Chicago, a spot on the tall grass prairie whose silence was broken only by the sound of the wind and the occasional hoofbeat of buffalo.

Immigration is not a necessary evil which must be kept to a minimum. It

is a positive factor which has contributed to our growth as a nation. Andrew Carnegie, Joseph Pulitzer and Albert Einstein, were immigrants who contributed greatly to our national treasury of human achievement. The contributions of the 40 million other immigrants of the last hundred years are no less important.

No responsible person today advocates a complete abandonment of our regulations over immigration. Reasonable qualitative and quantitative controls must be maintained. All that is asked is that these regulations be shorn of their few—but basic—inequitable and racially discriminatory principles. It is most unfortunate that during the past 7 years we have lacked strong and sustained executive leadership in effecting revision of our immigration policy but I look forward to early action in the next administration when a "Democratic President in cooperation with Democratic Congresses will again implant a humanitarian and liberal spirit in our Nation's immigration and citizenship policies."

THE REPUBLICAN PARTY'S PLATFORM STATEMENT ON HOUSING

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, I have just finished reading the Republican Party's platform statement on housing. I find it to be a hypocritical farce tailored to fool the people.

The statement uses journalistic techniques to convey the impression that the Republican Party is dedicated "to achieving the national objective of a decent home in a suitable environment for every American."

Two elements are missing from their pious and pompous analysis of the housing crisis: Specifically what they are going to do about it in the future and specifically what they have failed to do about it in the past.

Unless a Democrat comes to the White House in January, the "suitable environment" of the Republican platform, will continue to be a slum for 22 million Americans.

Twice major housing legislation was passed by the Congress and twice it was vetoed. A third bill was signed only because the Democrats salvaged it from a Republican veto. We felt we would take what we could get until we changed the occupancy of the White House.

The already critical problem of housing was further complicated when the administration resorted to a tight money, high interest policy. These rates sabotaged the program of the Federal Housing Administration, an agency which some Republicans thought was "socialistic."

Another index of the housing situation under the Republicans is the frequency of foreclosures. The Federal Home Loan Bank Board's estimate of nonfarm real estate forclosures on one- to four-family dwellings has increased an amazing 145 percent during the nearly 8 years of Republican administration.

The problem will get worse before it gets better. If the expected growth of families continues in the sixties, the Nation must either "double up" or must bring the annual rate of home production up to 2 million units a year.

Among the many objections raised in vetoing the housing bills, the President stated that the programs for the elderly, urban renewal and low-rent public housing were either "entirely unnecessary" or "excessive."

In the light of these actions, the Republicans continue to paint a glowing picture of what will happen in the housing situation if RICHARD NIXON becomes President.

Although the Republicans platform refers to "stubborn and deep seated problems" in the way of decent housing, I submit, Mr. Speaker, that these problems are the Republicans themselves.

The fact is that they just do not believe in alleviating the housing crisis by Federal assistance because they know this position would lose them votes. It is as simple as that.

The Democratic platform promise of "the right of every family to a decent home" is merely the carrying on of a Democratic belief, not the coining of a Madison Avenue slogan to substitute for a lack of conviction about what is needed in housing.

The Democrats, in their program to meet the challenges of the new frontier of the sixties, support a housing construction program of more than 2 million homes primarily for middle and low income families.

We favor special mortgage assistance with low interest rates, long-term mortgage periods and reduced down payments for the home building industry.

We also support substantial low-rent public housing and direct Government loans for housing for older people.

We propose a 10-year program to eliminate slums and blight and for the restoration of cities and depressed areas.

Our program is clear. It spells out in detail what we believe as Democrats and how we intend to reach our goal. We only regret that the Republican platform writers did not have the same candor.

METHODIST CHURCH LEADERS IN INDIANA CALL FOR REPEAL OF RIGHT-TO-WORK LAW

Mr. BRADEMAS. Mr. Speaker, I would like to call to the attention of Members of Congress a statement by a group of prominent ministers of the Methodist Church in Indiana calling for repeal of Indiana's so-called right-to-work law.

I believe that many fairminded citizens will agree with the statement of these churchmen that "in the name of freedom the present right-to-work law denies freedom, compelling, as it does, all of industry to observe the open shop, thus negating free collective bargaining."

This law has been in effect in Indiana since 1957. It has had a fair trial. Now, this group of Methodist ministers has reached the conclusion that by destroying union security, the so-called right-to-work law creates an unbalance between labor and management harmful to the worker because his collective bargaining position is weakened, and equally harmful to management because the union cannot guarantee that nonunion members will honor a no-strike pledge in a labor-management contract.

METHODIST MINISTERS FROM THROUGHOUT INDIANA SIGN STATEMENT

The statement was signed by Rev. Lynn Garth, pastor of the Stull Memorial Methodist Church of South Bend, Ind., a highly respected minister of the Methodist Church in my State, who is chairman of Christian Social Relations of the 1960 Northwest Indiana Annual Conference of the Methodist Church, and a group of other Indiana Methodist churchmen. These include Rev. A. Summers Clark, of Westfield; Rev. Robert Smith, of Indianapolis; Rev. Vernon Bigler, of Terre Haute; Rev. Warren Anderson, of Dyer; Rev. Edward Boase, of South Bend; Rev. Robert Fields, of Kentland; Rev. Warren S. Saunders, of Goshen; Rev. Lyle Loomis, of West Lafayette; and Rev. Victor E. Ramsey, of Boswell.

I believe it is pertinent to note also that the statement of these clergymen supports the collective bargaining plank of the Democratic Party platform for 1960, adopted at Los Angeles, which pledged repeal of the Federal authorization in the Taft-Hartley Act for all right-to-work laws.

As a member of the Methodist Church in Indiana myself, I am particularly pleased to insert the statement of these Methodist clergymen in the CONGRESSIONAL RECORD. The statement follows:

TEXT OF METHODIST MINISTERS' STATEMENT

We believe that members of the clergy are obligated by their calling to speak strongly and forthrightly on all issues affecting the rights of man. To react timidly in the face of controversy is moral and social cowardice. To speak with honest conviction on issues inherent in the so-called right-to-work law enacted by the Indiana Legislature in 1957 is our desire and the intent of this statement.

We believe in the democratic process in labor-management relations. We believe that in the name of freedom the present right-to-work law denies freedom, compelling, as it does, all of industry to observe the open shop, thus negating free collective bargaining.

We are particularly concerned over an evergrowing trend to sell ideas and legislation by "labels." Advertised as protection for a minority, the so-called right-to-work law is, in effect, a restriction of the freedoms of organized labor and management. We oppose the efforts of proponents of this law who proclaim themselves as the protectors of the rights of the worker, when, in fact, they have molded a legal instrument detrimental to the worker. By destroying union security, the so-called right-to-work laws creates an unbalance between labor and management harmful to the worker because his collective bargaining position is weakened, and equally harmful to management because the union cannot guarantee that nonunion members will honor a no-strike pledge in a labor-management contract.

Significant in evaluating the true purpose of this legislation is the list of organizations which supported its passage: the Indiana State Chamber of Commerce; the Associated Employers of Indiana; the Indiana Manufacturers Association; the Indianapolis Chamber of Commerce; and the Indiana Right-to-Work Committee, a group supported by industry contributions. These organizations are acknowledged as self-interest associations. Their primary purpose is to work for the interests of the employer. However commendable their other programs for Indiana might be, it is improper to translate this self-interest to a guise of protecting the rights of workers.

TERM "RIGHT-TO-WORK" MISLEADING

The misleading nature of the term "right-to-work" has been recognized by the various States where the issue has been on the ballot as a referendum. The States of Washington, Ohio, Idaho, and California refused to permit proponents of this measure to use the words "right-to-work" on the ballot because the phrase is deceptive. This law guarantees no one the right to work or the right to any particular job.

The arguments for the so-called "right-to-work" law have no real basis in fact. The Indiana "right-to-work" law has not attracted new industry that added to the prosperity of the Hoosier State, and has not curtailed the number of strikes.

Although proponents of the present law have falsely convinced many persons that it is a step toward the control of corruption, we find nothing in the present right-to-work law that can prevent corrupt labor practices. We recognize that corruption has entered the union movement in some few instances and in this respect we strongly urge the use of existing legislation to combat corruption in the labor movement.

U.S. SUPREME COURT HAS UPHELD UNION SHOP

Those who honestly support this law because they believe it to be morally valid, actually ask a question on the meaning of freedom. At what point do you decide the limitations of a person's right to do as he wishes when there exists the very real question of his obligations to his fellow man? Specifically, we get to the question of whether union membership as a condition to employment is a violation of man's personal or constitutional liberties. The answer is simple. The U.S. Supreme Court has unanimously declared that the union shop does not violate the Bill of Rights or any other American constitutional freedoms.

Government, consequently, has three courses of action. By legislation, it could compel the union shop. But even labor doesn't want this. It can compel the open shop, as has happened with the so-called right-to-work law. The third course, is no action at all—the Government can keep hands off. In other words, if a company and a union agree voluntarily that all employees represented by the union must become members, the Government would leave them free to do so. Traditionally, this middle-of-the-road approach has been the American legislative policy.

ISSUE OF UNION OR NONUNION SHOP SHOULD NOT BE DETERMINED BY GOVERNMENT

We seek freedom for laboring people. We point out that certain types of compulsion are not incompatible with freedom in a complex society. Whenever people work together in groups, decisions made and rules adopted by the majority must be binding upon all. Collective bargaining is posited upon the democratic framework in which management and representatives of a majority of the workers jointly reach agreement incumbent upon all. The issue of nonunion or union shop should be one item which is open to free collective bargaining and not determined by Government. We believe that the right-to-work law should be repealed in order that workers may be neither compelled to work in an open shop nor compelled to work in a union shop except through democratically determined labor-management contracts.

TEACHERS' SALARIES

Mr. KASEM. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. KASEM. Mr. Speaker, I address the House today on the matter of teachers' salary and pertaining to our responsibility. To many things we attribute the fact that our Nation has accomplished the highest material standard of living in the world. The free enterprise system wherein a person may give free reign to his creative abilities, the bountiful endowments of nature that gave us a broad new land, rich in resources and fertile in the temperate zone, and other things are given much credit for our great accomplishments. Two factors that were paramount in the creation of this high standard of material achievement, I call to our attention for the purpose of making my point this day. We are a nation, and as such we believe in free public education.

First is the fact that the Founding Fathers in every way set out that we were a nation, and not a confederation of states. In fact, the whole history of the formation of our Constitution and Nation led us to the compelling necessity of rejecting the idea of forming an alliance or association of states that resulted in less than a nation. This idea is manifest in almost every line of the Constitution, in the placement of powers in the Federal Government of regulating all matters of interstate concern. Not only does the Constitution refer to the United States as a nation, but it is so in the heart of every American. Can you find one who places allegiance to his State above his allegiance to the Nation?

Indeed, it is this fact above all others that caused us to develop into the great industrial and world power that we are. Within the confines of that Nation were all the elements necessary to produce a great economy unfettered by State lines to inhibit the interchange of goods, ideas, communications, and persons. We had a courageous and progressively oriented pioneering people confronted with vast underdeveloped areas unburdened with the feudalistic suppression from which they fled. Individual creativeness and ingenuity was never provided with so abundant an opportunity.

That same Constitution threw out its cloak of protection over the liberties we now regard as basic in the new territories as well as the old, and the mind of man was free to operate and communicate within its fullest capacity. But, alas, with all these glories, the task could not have been performed without the development of understanding and skills.

It is toweringly apparent that one of the essential steps to bring us along the way was our commitment to a system of universal education—even mandatory—so that the opportunity for understanding and the development of skill would be available to all. But the benefits of education extend far beyond the material. Indeed, that may be only incidental to the process of education. For material benefits are diminished and rendered a nullity if there is not the capacity to appreciate and enjoy the world in which we live. The chief aim of education is the broadening of the mind and the extension of horizons.

In yet another sense, education is the passing of the accumulated learning of man collectively and historically to man individually.

At the core of this is one individual. The teacher. That most sacred of ministries who tills and nourishes the mind that it may blossom to its fullest. The teacher is the giver of the abundant life. The teacher gives the firmest security of self-reliance by the conquest of ignorance.

No structure of stone nor mortar, no electronic device, no book nor journal, and no visual aid can be more than a tool of the teacher. It can never replace the teacher.

The doctor may cure our ills, the lawyer may protect our rights, the engineer may build our structures, the scientists may explore the unknown, but each is the product of our teachers. Each is a human being with a life outside his profession, and so it is with the teacher. It is this truth that makes the teacher the most indispensable element of the most indispensable of all human programs for the more abundant life—education. And, it is this that makes it necessary to provide for the nonprofessional needs of the teacher. It is this truth that entitles the teachers to great and honorable recognition and to share commensurate with their contribution in the material benefits their profession plays so important a part in creating.

Who shall pay the teacher? Teachers should receive their compensation from the general public that benefits from the system built around them. It is well established that the local government of the area they teach in, as well as the State government, has the duty of contributing to her compensation. But does not the teacher in a sister State serve me as directly as the teacher in my own community or the teacher in another part of my own State? Does not her teaching as much improve my country and my fellow citizens? Does not her teaching go to those who will buy my products and sell me theirs, those whom I will defend and who will defend me, those who can and will come to my State, as well as to whose State I have the right to go? Have I not the same interest in the child of Mississippi and Vermont that I have in the child around the corner? These questions are undeserving of replies because the answers are so patently in the affirmative. Then, it must follow that my duty and my interest requires that I contribute to those teachers' pay.

Arguments that this threatens the sacred cow of local control are specious and irrelevant. Specious because there is no such threat. Irrelevant because there is

no inherent relationship between control and contribution to compensation.

We must act at once to meet the challenges that face us from the ancient tyrannies in ever-changing forms that would suppress and diminish our liberties—challenges that will be forever with us, and come from within and without our boundaries. Challenges that only an enlightened populace can recognize and repel.

Our indebtedness to our teachers is incalculably great and is owing from all levels of our government. We must recognize this fact at once, and we of the National Government must proceed forthwith in all haste to make our contribution in substantial quantity to expedite the educational processes of the entire Nation by providing adequately for the teacher.

SMALL BUSINESS AND THE NATION'S FREEDOMS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 30 minutes.

Mr. PATMAN. Mr. Speaker, never in the country's history has there been such a wave of bankruptcies as is sweeping the Nation today. The great toll of bankruptcies which took place in the dark days of 1933, even when the economic foundations of the Nation seemed to be crumbling, set a record which many of us thought would stand for all time. Yet that record was almost doubled in the fiscal year just ended.

An era of prosperity? We hear it constantly said that these recent years of big-business Government have given us unprecedented prosperity. But if this is true, how is it that independent business firms are failing at an ever-increasing rate? How is it that a few vast corporate empires, whose domains extend not only across this Nation but across most of the non-Communist world, are rapidly taking over control of the productive wealth of this country?

Today I want to say some things about small business and large freedoms. I hope the Members will consider these things most carefully in the coming political campaigns. Are the things I wish to say political? Let me answer this way:

POLITICAL DECISIONS MUST BE MADE TO SAVE SMALL BUSINESS

The Declaration of Independence was a political decision. If we maintain any of the ideals expressed in that political decision of 180 years ago, it will be because we make some right political decisions today and in the year ahead.

None of us doubts that one of the main purposes of government is to help business. The purpose is to help all of our citizens in ways which best enable them to advance themselves economically. To do this, political decisions must be made, or must be neglected at the Nation's peril. The ways in which the Federal Government designs its tax system directly affect the well-being of all, and the way chosen largely determines which businesses succeed and which fail. The ways in which the Federal Government manages its money system, the ways in which it manages its patent system, the ways it designs and enforces trade and antitrust laws are all political decisions which play a leading role in determining whether small business survives and prospers or whether the economic affairs of the Nation are taken over by a few corporate giants. The ways in which the Federal Government dispenses its vast subsidies for research, development, and experimentation also play a leading role, as does the way in which it divides the money it spends—and this is equal to the wealth of empires—for all of the many industrial and consumer products it buys for defense purposes.

One reason that I hope the Members will talk about small business in their political campaigns is that I think this is the only way the voters will get the facts. The commercial organs of communication will be proclaiming, as they are today, that all is well with small business, and that the present big-business Government has done all kinds of wonderful and tender-hearted things to nourish and care for small business. As chairman of the Select Committee on Small Business in the House of Representatives, I have had the not-very-pleasant experience of seeing developments that are not good. It has been my experience to learn of some very ugly facts which do not support the claims and propaganda.

SMALL BUSINESS IN THE COMING POLITICAL CAMPAIGNS

Another reason why I hope you will talk about small business is that I hope all of the Members, both Democrats and Republicans, will make some resolves and promises that they intend to keep. The rapid changes which have been taking place in the organization of the country's economic affairs are of deep concern, not just to small business people, but to everybody. Our political freedoms are at stake as much as our economic freedoms.

In criticizing, as I have, and as I expect to continue doing, the way big business has handled its stewardship of the Federal Government over these past 7½ years, let me say again that I have never claimed all virtue for the Democratic Party and all fault for the Republican Party. While it is true that the previous Democratic administrations of President Truman, President Roosevelt, and President Wilson took some giant strides toward the ideal of fair and equal opportunity for business enterprises of all sizes, large and small alike, the Democratic administrations never did all they should have done—and I said so at the time—at least I said so during the Roosevelt and Truman administrations. Those administrations adopted at times policies which were bad in my view, and I criticized them at the time. I could not do less than criticize the bad policies of this Republican administration.

Just what is happening to small business? Let me describe the trends. Then, I will venture to suggest some of the causes of these trends.

BANKRUPTCIES NOW HIGHEST IN HISTORY

In the fiscal year 1960, as I have pointed out, more business firms, farmers, and individuals filed bankruptcy petitions than ever before in our history. Some 110,034 bankruptcies were filed, a figure which compares with the peak year of the great depression of 70,049 bankruptcies. Furthermore, the trend is not down. It is up. In the fiscal year just ended, there were approximately 10,000 more bankruptcies than in the previous fiscal year, and that year covered a long period of business recession.

During the 7 fiscal years that this administration has been in office, there have been 550,000 bankruptcies—almost 3 times the number of bankruptcies which occurred in the previous 7 years of Mr. Truman's administration.

As I go along, I will insert statistical tables in the RECORD so that there may be no doubt as to the source of my figures.

Number of bankruptcy petitions filed in the United States

7 fiscal years 1947–53	201,246
7 fiscal years 1954–60	550,761

Source: Administrative Office of the U.S. Courts.

The rate of small business failures has gone up by leaps and bounds since this administration took office. Dun & Bradstreet reports that during the past calendar year there were more than 14,000 failures among the business firms which it lists. These were all small firms though they were among the better established and more substantial small firms. Dun & Bradstreet does not list all of the business firms in the country. On the contrary, it listed last year 2,746,000 business firms in operation, whereas the Department of Commerce reported that all of the business firms in operation totaled almost 5 million.

Now what is the rate of small business failures, considering that there have been more business firms in some years than in others? Dun & Bradstreet reported that failures last year amounted to 52 firms for each 10,000 firms in operation. As I have indicated, this rate has gone up by leaps and bounds. During the first 7 years of this administration, the average rate of business failure was 46 failures for each 10,000 firms, or almost twice the average rate of the 7 previous years.

Number of business failures, 1946–59

Year	Number of failures	Failure rate per 10,000 listed concerns
1946	1,129	5
1947	3,474	14
1948	5,250	20
1949	9,246	34
1950	9,162	34
1951	8,058	31
1952	7,611	29
Total failures and average rate, 7 years	43,930	24
1953	8,862	33
1954	11,086	42
1955	10,969	42
1956	12,686	48
1957	13,739	52
1958	14,964	56
1959	14,053	52
Total failures and average rate, 7 years	86,359	46

Source: Dun & Bradstreet, Inc.

It has been a distressing thing to me that on previous occasions both the Small Business Administration and some of the Members on the other side of the aisle have attempted to minimize this increasing rate of business failures by comparing it to the average of 100 years. What poor reasoning it is to think that a yearly failure rate of 52 firms for each 10,000 firms in operation is really not so bad because during the Harding, Coolidge, and Hoover administrations the failure rate averaged in excess of 100 firms for each 10,000. Those were the years when the great national chains were sweeping across the country, squeezing out tens of thousands of independent merchants and wholesalers, and when the huge manufacturing corporations were rooting out tens of thousands of smaller manufacturing firms. Surely we have learned enough to know where this kind of thing ends. But then I wonder?

FEW CORPORATE GIANTS GAINING CONTROL OF THE NATION'S ASSETS

In 1952, the corporate giants in the manufacturing fields had already acquired a lion's share of all of the corporate assets. Those corporations with $100 million of assets, or more, had in that year, according to official reports of the Federal Trade Commission and the Securities Exchange Commission, 52 percent of all the assets of corporations engaged in manufacturing. By the end of last year, 1959, corporations of this giant size had increased their hold over the assets of the country to 62 percent. If this trend is not stopped, it will mean that a few giant corporations will control all of the manufacturing of the country in less than 20 years. It will also mean these corporations will control most, if not all, of the distribution and retail business of the country. Many of these giants already have their own distribution systems, their chains of retail outlets, their own transportation and utility systems, their own mines, and, in many instances, their own consumer finance agencies; and they are rapidly advancing in all of these fields.

Growth of assets of firms with $100,000,000 and over of assets compared with growth of assets of firms of all sizes, 1952–60

Year (4th quarter)	Total (all asset sizes)	Firms with $100,000,000 assets and over	Firms $100,000,000 and over as percent of total
	Millions	*Millions*	*Percent*
1952	$165,965	$85,502	51.5
1953	171,241	92,797	54.2
1955	190,086	108,625	57.1
1957	221,534	131,993	59.6
1959	244,175	150,250	61.5
1st quarter 1960	247,745	155,313	62.7
Percentage change, 1952–60	49.3	81.6	

Source: Federal Trade Commission and Securities and Exchange Commission, Quarterly Financial Report of Manufacturing Corporations.

In the utilities, transportation, and distribution fields, the concentration of business during this administration has proceeded at no less a pace. Recently the Federal Trade Commission made a survey to see what had happened in food retailing in this country between 1948 and 1958. The FTC's report shows that corporate chains having 11 or more retail stores increased their share of the Nation's food sales from 29 percent in 1948 to 44 percent in 1958, 10 years later. In the same period, sales by independent retailers dropped from 58 percent of the Nation's total to 25 percent.

BIG BUSINESS PROFITS UP, SMALL BUSINESS PROFITS DOWN

Consider what has happened in the profits picture. Since 1952 the smaller manufacturing firms, those with less than $1 million of assets, have increased their sales by 20 percent, though their profits have gone up only 2 percent. The big firms, those with more than $100 million of assets, have increased their sales by 63 percent and their profits by 77 percent. Everywhere we find increasing big business profits and big business taking over more and more of the productive resources of the Nation, and small business losing out:

Percent change in sales and profits of manufacturing corporations, 1952–59

	Sales	Profits after taxes
Firms with assets of—		
Under $1,000,000	+20	+2
Over $100,000,000	+63	+77

Source: Federal Trade Commission and Securities and Exchange Commission, "Quarterly Financial Report, U.S. Manufacturing Corporations."

Why is small business losing out? The answer lies in big-business favoritism in all of the vital business policies of this administration. I will invite the Members' attention to each of these, but first it must be acknowledged that, to an important extent, prosperity for small business is tied to the general prosperity of the Nation. And the general prosperity of the Nation is not good.

THE RICH ARE GETTING RICHER

We are hearing a great deal these days about the increase in real income per family, which has been brought about during the Eisenhower Administration. But we do not hear about the very deceptive aspects of this average, nor the fact that this administration has shifted income from the great mass of consumers over to the families of great wealth. True, the average family income of the country has gone up while the rich have gotten richer and the poor have gotten poorer.

Earlier this year, the National Bureau of Economic Research released the results of a survey of national wealth which found their way into very few newspapers. The New York Times, which has never been guilty of overemphasizing news about favoritism of the rich nor guilty of reporting at all on the doings in high finance, mentioned the National Bureau's survey under the heading "The Rich Are Getting Richer."

The simple fact is that the Roosevelt and Truman administrations brought about a more equal distribution of the wealth of the country; and the Eisenhower administration immediately set out on a counterrevolution, and has been concentrating the wealth in the hands of the few again. Said the New York Times:

The nationwide survey disclosed that during the 20 years that began with the stock-market crash and ended in 1949 there had been a period of more equal distribution of personal holdings. The reversal of this trend was clearly evident in 1953, the study reported, when 1.6 percent of the country's population held 30 percent of the Nation's personal wealth.

The study reported that the same year this minority top-income group "owned at least 80 percent of the corporate stock held in the personal sector, virtually all of the State and local government bonds and between 10 and 35 percent of each other type of property." Estimates were based on an analysis of estate-tax returns, the study explained.

I cite the National Bureau of Economic Research on these facts about the redistribution of wealth to avoid any suspicion that I am citing researchers having a political bias in favor of Democratic policies. The National Bureau of Economic Research is headed by Dr. Arthur Burns who was formerly Chairman of President Eisenhower's Council of Economic Advisers. Furthermore, if we can believe the news reports, Dr. Burns is today chief economic adviser to Vice President NIXON.

How is it that the wealth has been shifted from the many to the few? There are two main reasons. One simple reason is that the big corporations have been acquiring more and more of the Nation's wealth. Indirectly this wealth accrues to the stockholders.

The other reason, and one which is equally simple when we cut through all of the rigmarole and propaganda, is the administration's high-interest policy. Any fairminded person who examines the facts must agree, I think, that the ways the administration has increased personal income from interest is no less phenomenal than its raising the satellite balloon to the upper stratosphere.

PERSONAL INCOME FROM INTEREST MORE THAN TWICE THE FARM INCOME

Let us consider this: The official Department of Commerce reports show that personal income from interest has been increased from $12.1 billion in 1952 in successive jumps of $2 to $5 billion each year—in good times and in bad times—until now personal income from interest is at the rate of $27.1 billion per year. If you have any housewives complaining to you about the high cost of food and saying that she thinks the Nation is paying the farmers too much, just call her attention to this: The Nation is paying the farmers $12.2 billion per year; it is paying the personal interest income receivers $27.1 billion per year; and you will be safe in pointing out, too, that the number of families who share in this personal interest income are equal to only a very tiny fraction of the 5 million farm families in the country.

One way to get a pretty good idea of how few families share to any significant extent in the personal interest income is this: U.S. savings bonds, which an

individual can buy for $18.75 on a payroll savings plan, and which the Government campaigns to sell to individuals, are no doubt the most widely held of any kind of interest-paying paper. Last year the Federal Reserve Board published a survey which shows that even these savings bonds, which are relatively widely held, are owned mostly by a few families. The survey shows that 74 percent of the American families own none of these bonds, and at the other end of the scale 5 percent of the families own 87 percent of all the bonds outstanding:

Farm income and personal interest income, annual rates, 1952–July 1960

Year or month	Farm proprietors income	Personal income from interest
	Billions	*Billions*
1952	$15.3	$12.1
1953	13.3	13.4
1954	12.7	14.6
1955	11.8	15.8
1956	11.6	17.5
1957	11.8	19.6
1958	14.0	20.8
1959	11.8	23.5
1960 annual rates: [1]		
January	11.3	25.2
February	10.4	25.5
March	10.1	25.9

HIGH INTEREST POLICY HAS REDISTRIBUTED THE INCOME

High interest? Yes, it makes the rich richer and the poor poorer. Today we hear all kinds of elaborate arguments to justify the administration's high-interest policy—claims that it helps the little man by fighting inflation, will lengthen the term of the Federal debt, and all that sort of thing. But when this administration first took office, it was much more arrogant and plain spoken in its reasons for raising interest rates. One of the first acts of the administration, in February of 1953, was to bring out a bond issue on which it deliberately set a giveaway interest rate. There could be no doubt that this policy would raise interest rates throughout the economy. Many people were flabbergasted. Eight Members of the Senate wrote a protest to the Secretary of the Treasury, and they got a blunt answer. Secretary Humphrey's answer was that he considered interest rates under the previous Democratic administration had been "artificially low," and the administration intended to shift more of the income to what he called the savers. In plain words, this administration has been dividing the spoils among its backers. It did not like the more even distribution of income which had been brought about under the New Deal and Fair Deal administrations, and it set about to restore the comfortable and favored status of those families who gain their livelihood by clipping bond coupons.

One result is that many millions of middle-income families who purchased new homes in suburbs in the early postwar years now find they cannot pay school taxes and meet the expenses of suburban living, and are trekking back to the cities, while the much-discussed city slums are yet to be cleared. Small businesses are many and they are scattered throughout the Nation. A high average family income is not the same as a high national income in which a great majority of families enjoy a fair share.

SMALL BUSINESS PROBLEM NO. 1—CREDIT

While we are considering this administration's tight-money and high-interest policies, let me point out how this has served in a very direct way to squeeze out small business.

We now have a record which gives spectacular proof of what any sensible administrator should have known all along. The proof is that big business has first claim on the available supply of bank credit. Its credit needs are supplied first, and small business gets only what is left over. The reason is obvious. Not only are the banks inclined to cater to their biggest depositors, but there are all kinds of interlocking financial connections between the big finance and the big industrial and commercial corporations. To see the pattern of these mutual back-scratching arrangements, you need look only at how the big financial, industrial, and commercial firms have interlocking boards of directors.

Consider, then, the factual record of what happens to bank credit in a cycle moving from relatively easy credit to extremely tight credit. October of 1955 was a period of relatively easy bank credit. From that date on until November of 1957, credit was made progressively tighter.

BIG BUSINESS HAS FIRST PRIORITY ON BANK CREDIT

There was, of course, a large increase in bank credit in this period as there was also a large increase in the volume of business being done, and a tremendous expansion of business facilities. How was the increased credit distributed? In October of 1957 when credit was tightest, the corporate giants—those with more than $100 million of assets—had 66 percent more bank credit than they had had 2 years earlier. At the other end of the size scale, those firms with $50,000 of assets, or less, had 3 percent less bank credit than they had had 2 years earlier.

Had bank credit gone to the big firms only because the big business industries were those making the principal expansion? No. Contrary to everything we were told before these facts became known, this was not merely a question of which industries were expanding. When you go down the list industry-by-industry, you find that it was the big firms in each and every industry that got the lion's share of bank credit in the period when credit was tight. It was the exceptional industry that the smaller competitors got any increase in credit at all. In most industries, the small firms had even less credit in 1957 than they had had 2 years earlier.

Percent change in amount of member bank loans to smallest and largest size classes of business firms between October 1955 and October 1957

Business of borrower	Business firms with assets of—

Source: "Financing Small Business," report to the Committees on Banking and Currency and Select Committees on Small Business, U.S. Congress, by the Federal Reserve System, pts. 1 and 2, Apr. 11, 1958, p. 377.

What actually happened in this period was this: As the Federal Reserve raised interest rates up to the stratosphere, the big corporations postponed their long-term financing. They stayed away from the insurance companies and the bond market, but went to the commercial banks and got the money they wanted on short-term loans. They were waiting for the next recession, when interest rates would be brought down, to enter into long-term debt contracts. In other words, the tight-money, high-interest policy caused the big corporations to take up more of the available supply of bank credit than they would have wanted if interest rates had not been raised.

PRESENT MONEY POLICY MAKES BIG BUSINESS BIGGER AND SMALL BUSINESS SMALLER

It is not enough that the policy of alternately squeezing and loosening credit produces in recession times a surplus of bank funds which might be lent to small business. It is only in the periods of general business expansion that either large or small firms make an effort, or are willing, to undertake any substantial expansion or to make large outlays for new equipment. Thus, by the time recession comes the small firms find that whatever capacity additions to their industries might have been attractive have already been made by their big competitors in the previous boom periods. It is in this way that the new cost-saving equipment is acquired by the big competitors in the boom periods and operated to the competitive disadvantage of the small firms in the recession squeeze. It is also in this way that relatively more of the total business capacity is acquired by the big competitors.

Now this is a point I cannot emphasize too strongly: When the Federal Government takes an action which cuts small business off from bank credit, it cuts off about the only source of credit small

firms have. It is a sad commentary on our capitalistic system—a system of which we are so proud—that only the very big corporations can actually obtain long-term loan capital and equity capital. Small business in this country is a part of the capitalistic system—and a very important part—yet in all practical respects it is cut off from all long-term capital save only that which the small business people can draw from their personal family savings.

I grant you this is no new problem.

The new reforms of Woodrow Wilson's administration were as much an effort to break the Wall Street monopoly control over credit as they were an effort to enact trade and antitrust laws, which, as President Wilson put it, should "make a man in a small way of business as free to succeed as a man in a large way of business."

WOODROW WILSON'S MONEY REFORMS REVERSED

One of the main reasons for establishing the Federal Reserve System was to create 12 regional money centers, under public control, which would break the stranglehold of the Wall Street money center, under private control. Woodrow Wilson put it this way:

The plain fact is that control of credit—at any rate of credit upon any large scale—is dangerously concentrated in this country. The large money resources of the country are not at the command of those who do not submit to the direction and domination of small groups of capitalists, who wish to keep the economic development of the country under their own eye and guidance. The great monopoly in this country is the money monopoly. So long as that exists our old variety and freedom and individual energy of development are out of the question. A great industrial nation is controlled by its system of credit. Our system of credit is concentrated. The growth of the Nation, therefore, and all our activities are in the hands of a few men who, even if their action be honest and intended for the public interest, are necessarily concentrated upon the great undertakings in which their own money is involved and who necessarily, by very reason of their own limitations, chill and check and destroy genuine economic freedom. This is the greatest question of all, and to this statesmen must address themselves with an earnest determination to serve the long future and the true liberties of men.

The credit monopoly is still the No. 1 problem threatening our freedoms. Other statesmen since Woodrow Wilson have, indeed, addressed themselves in a determined way to the problem, but with only incomplete success. And such success as was achieved has been eliminated by the present administration.

The 12 regional Federal Reserve banks have long since ceased to be a source of credit other than minimum amounts in the form of 15-day bank loans. Short-term credit—that is, bank credit—is all extended from only one of these banks—the Federal Reserve Bank of New York—and this is all funneled out to the economic system through the private Wall Street banks.

THE RFC BYPASSED WALL STREET CONTROL

The much-hated RFC provided a bypass to the concentrated private control over long-term credit and equity capital, and did so with conspicuous success in the Roosevelt and Truman administrations. It made several billion dollars of long-term loan capital available to several hundred thousands of firms that did not have the blessings of Wall Street, as well as to a great many municipal and local governments. It brought about new industries; it created strong competitors in industries previously under monopoly control; and it sparked one of the highest rates of industrial development that the country has known. With all this, the RFC paid its expenses and made a profit for the Government. It also made a profit for the private banks to which the administration turned over its assets for liquidation.

As we know, one of the first and foremost objectives of the great political crusade of 1952 was to eliminate the RFC, to eliminate it quickly, and to pour salt on the earth where it had stood. Our Republican colleagues will remember that when they were in control of the Congress in 1953, they lost no time in repealing the RFC legislation.

Of course, there had been, unfortunately, what we call scandals. A couple of White House assistants had obtained fur coats at the wholesale price and, as I recall, a deep freeze found its way into the White House basement. These incidents were made the basis for a massive and sustained political campaign, aimed, not at correcting the improprieties, but at eliminating outright the rivalry for the Wall Street monopoly.

It would be interesting to know how the value of these fur coats and deep freezes compare to the value of all the gifts which have gone into the White House and overflowed onto the President's Gettysburg farm since President Eisenhower has been in office.

My point is neither to question nor to condone the personal propriety of the gift giving and the gift taking. I simply point out that these matters have not been the object of a massive crusade to clean up the mess in Washington when there was no longer any RFC to be eliminated. And what is more important, I point out that a vital national problem has been intensified, and no alternative solution to the problem has been adopted. True, the Small Business Administration has a loan program which is played up as something of tremendous help to small business. This program was provided for by the same legislation that killed the RFC. Today, of course, administration spokesmen cite the Small Business Administration loan program as one of the administration's great constructive contributions to small business, and nothing is said of the point that this small provision for small lending was retained, not so much to help small business as to overcome opposition to removing the larger help which the RFC provided. Manifestly, the RFC was considered to have lent too much, and to firms that were somewhat more than tiny.

SMALL BUSINESS IS MORE THAN 99 44/100% "PURE" OF ANY SBA HELP

Small business is still up against a financing problem and a bigger problem than ever before. And it is as plain as the noses on our faces that something must be done and done promptly to help make credit available to small business—or there will soon be no small businesses.

From time to time, particularly at election time, the country is flooded with pamphlets, press releases, and oratory describing the financial assistance which SBA has given to small business. The bare facts are that during the 7 years the SBA has been operating its loan program, through June 30, 1960, it has made loans to 16,471 different business firms. Furthermore, it has disbursed on these loans Federal funds amounting to $542,739,000. Surrounded by the right kind of oratory, this record is most impressive. But let me take a moment to put the record in perspective.

There are at present some 4,690,000 business firms in operation and even by SBA's definition, 98 percent of these are small businesses. SBA's 16,471 loans mean, therefore, that it has made loans to only forty-four one-hundredths of 1 percent of the business firms in operation. Let me put it another way: We are educated to believe that Ivory soap's slogan of 99 44/100 percent purity is just about the ultimate in freedom from impurities. Well, it happens that 99 60/100 percent of the business firms of the country have been free of the impurity of any SBA money over the past 7 years.

Let us look at it another way. During the 7 years when SBA was supposed to be helping to meet the credit needs of small business, the corporations were investing $184 billion in new plants and new business equipment, to say nothing of the several scores of billions these corporations invested in inventories, in real estate, in financial enterprises, and in tools and equipment which are supposed to have a useful life of only a year, such as those the automobile companies acquire each year for changing the models of their automobiles.

This means, then, that the approximate half billion of Federal funds which SBA lent to small business amounted to thirty one-hundredths of 1 percent of the amount of funds which the corporations were investing in new plants and equipment. So on a dollar basis, small business has been 99 70/100 percent free of SBA credit assistance over the past 7 years.

Corporate investment in new plant and equipment, 1953–60

[Billions of dollars]

Period:	
1953 (last 3 months)	6.0
1954	22.4
1955	24.2
1956	29.9
1957	32.7
1958	26.4
1959	27.7
1960 (first 6 months)	15.0
Total	184.3

Source: U.S. Department of Commerce, except estimates for last 3 months of 1953 and first 6 months of 1960, which are based on allocations of data for previous periods.

I would venture the guess that any one of the top corporations of the country has invested more funds in new plant and equipment in the past 7 years than SBA has lent to all of the almost 5 million small-business firms of the country.

To illustrate, from the time SBA's loan program began operations through December of last year, General Motors invested, according to published reports, $3.4 billion in new plant and equipment, not including special tools. This was more than six times as much as the SBA had lent to all the small businesses of the country for all purposes—inventory and otherwise—through June of 1960.

At the end of last year, after a large part of its loans had been repaid, SBA still had outstanding $362.4 million. At that time the gross debt of all the corporations in the country amounted to $335.9 billion. So it is apparent that SBA's contribution to business credit amounted to approximately one-tenth of 1 percent of the corporate debt.

If we added in the amount of private bank funds which have been advanced in connection with SBA's loan program, and added in the amount it has lent under the Small Business Investment Act, the picture would not be changed. SBA's record would still be a microscopic dot on the map of American business. Specifically, the private banks have lent small firms in connection with SBA's program $193 million, which they might or might not have lent had there been no SBA. As for the small-business investment companies, SBA has licensed, as of today, only 126, and lent them a total of only $6.5 million.

SECRET ORDERS TO "PHASE OFF" HELP TO SMALL BUSINESS

During the past 5½ years, Congress has appropriated to SBA all of the funds the administration has asked for, and more; and the Small Business Committees of both the Senate and the House have urged the SBA to step up its lending program. But this has been a case where you can lead a horse to water but you cannot make him drink. The SBA people have very effective ways of discouraging small business people from filing applications, and they have very effective ways of putting the successful applicants to all kinds of trouble and expense for such things as professional appraisals, professional accountants, lawyers, and so on. And, finally the successful applicant who perseveres and gets past all this delaying rigmarole usually has to be able to pledge ready assets worth at least three times the amount of the loan he applies for.

I do not say this to reflect on the hard work or the good intentions of the conscientious SBA employees, and I think very probably all of these people are conscientious and are trying to do a good job for small business. The fact is that these people must live with the policies that are laid down to them and do the best they can within these policies.

Recently, investigations of the Senate Small Business Committee uncovered a confidential policy directive in which Mr. Wendell Barnes, then SBA Administrator, had written all of his regional offices last August instructing these offices to cut down even on the small lending program which SBA had developed. Mr. Barnes' instructions to his regional directors were to "moderate demands for credit from the Government."

He said:

> We should phase off any activity that tends to attract applicants or encourages program expansion. I would include in this the avoidance, where possible, of speeches before groups, which are seeking information on the business loan programs and calls on banks which might encourage referrals of borrowers.

In plain words, the Administration's policy was to avoid even giving small business people any information about its loan program.

A great many small business people have been shocked at the publication of this letter. Frankly, I cannot say that I was either shocked or surprised. There was really not much new about the policy. I am confident, furthermore, that this policy has not been one that Mr. Barnes thought up by himself. He was simply carrying out orders from higher up in the Administration.

What should be done?

I would recommend three things, and I hope that you will think well enough of these recommendations to discuss them with your constituents this fall. Needless to say, these recommendations are not personal inventions of mine. They represent a line of thinking developed by many people who have studied and considered the problem.

A FLEXIBLE TAX POLICY TO REDUCE PUBLIC AND PRIVATE DEBT

First, we must stop the policy of squeezing credit in every period of business expansion, and stop the policy of maintaining a high level of interest rates during both boom and recession periods. I will suggest in a moment an alternative to the tight-money, high-interest policy. The tight-money, high-interest policy has accomplished none of the good things which have been claimed for it, and it is bringing about some very bad things. It is putting the brakes on economic growth in two respects: First, it is operating quite directly on small business, preventing them from expanding and even squeezing many of them out of business; whereas a healthy and expanding small business population contributes mightily to the Nation's growth.

Second, by taking the purchasing power out of the pockets of the middle- and low-income classes and putting it into the pockets of the high-income groups, the high-interest policy is cutting down consumer demand. And this is retarding growth even of the big corporations. This is a high price to pay for a policy which does not accomplish what has been claimed for it; and clearly the policy has not accomplished what has been claimed for it. It has not stopped any price increases. Rather, the high interest rates have added to business costs and have increased prices.

THE HIGH INTEREST POLICY HAS INCREASED BOTH PUBLIC AND PRIVATE DEBT

All the pious nonsense we have been hearing about raising interest rates to encourage savings has had a lot of people gazing up to the heavens while the country is being marched right off the gangplank. "The interest rate is a wage to the savers, and a cost to the borrowers," Chairman Martin likes to say, as the Federal Reserve goes along propagandizing for the high-interest policy. The money managers in this administration well know that the middle- and low-income families do not and have not saved any larger percentage of their income when interest rates were high than when they were low. In fact, the overwhelming majority of the American families have done just the opposite—for the simple reason that in periods of high interest rates, they have had less to save.

Raising interest rates to shift income from the mass of consumers to the banks, to the finance and insurance companies, and to the high-income families, on the theory that income thus diverted will be saved and invested instead of being spent for the necessities and comforts of life, might be justified if the administration had any reason at all to believe that this policy actually helps the Nation. But it has no such reason. There is no such reason to be found in common sense; and there is no such reason to be found in the disasters which have followed all previous periods in which this policy has been tried.

The obvious reason why the policy of shifting income to the wealthy fails is that the income is spent anyway. A savings and investment by one group, or one family, results in an equal amount of debt for other groups, and other families. But does a mounting debt—consumer and business—mean that the national income will be as high as if the debt had not occurred?

No; and here is precisely the road to disaster. As more and more consumer purchasing power is drained off to pay the interest on consumer debt, and to pay the interest on the business plant and equipment, there is less consumer purchasing power to buy what the plants can turn out. Business plant and equipment is utilized less—to produce real income—and the whole income of the Nation falls. The whole process snowballs. Increasing the debt load on consumers and raising interest rates at the same time means still more purchasing power drained off to pay the interest, more debt, and more diversion of purchasing power. In the end, the people who are getting the money have nothing to invest it in, because consumers are already in debt up to the point that they have any prospects of paying, and there is no need for any more productive capacity, because consumers cannot buy what the existing plants can turn out.

BIGGEST SUBSIDY GOES TO THE MONEY LENDERS

Subsidies? What do we mean by "subsidies"?

I read in the morning newspapers an account of a speech which a prominent insurance executive made yesterday to the convention of the American Bar Association here in Washington, where

lawyers from all over the country and England are meeting to hear speeches about what our different public policies are and should be. This gentleman wants to eliminate what he calls "farm subsidies" and to cut back on veterans' benefits.

According to the Washington Post and Times Herald this morning, Mr. James F. Oates, who is president of the Equitable Life Assurance Society, told the lawyers that "income taxes could be reduced 12 percent if farm subsidies were eliminated."

Further, the Post reports that Mr. Oates "called many veterans' benefits as well as the farm subsidy program 'wasteful spending'."

What can we call this administration's high-interest policy, except a subsidy to the insurance and other financial companies, plus a few wealthy families?

The interest cost on the Federal debt has now risen to the second biggest item of expense in the budget, being second only to defense expenditures. The interest cost on the Federal debt is now far more than the costs of all the benefits to veterans and their dependents and survivors—in fact, it is almost twice as much.

In other words, the Nation is paying almost twice as much to carry the debt we incurred because of war as it is paying to the veterans, and the dependents of veterans, who had to fight the wars.

Furthermore, this interest cost is at least twice what it would have been if interest rates had been left at the 1952 level. Actual payments have risen from $6 billion in 1952, up to a total of $9.6 billion for this year. The high-interest policy which the administration immediately adopted in 1953 has meant that the Government has paid out billions in extra interest charges which could have been used to reduce the debt. Instead, we have had to increase the debt.

Except for defense, here are the top items of expense in the administration's budget for the present fiscal year:

	Billions
Interest	$9.6
Agriculture	5.6
Veterans services and benefits	5.5
Labor and welfare	4.6
Commerce and housing	2.7
General Government	1.9

Source: Budget of the United States for the fiscal year ending July 1961, page 913.

Now what has the high-interest policy done to the distribution of the income?

BIGGEST DEBT INCREASE IN HISTORY UNDER THIS ADMINISTRATION

Never in all history has there been such an increase in debt as has occurred under this administration. Most of the talk, of course, is about the Federal debt and how inflationary this is. But the plain fact is that the Federal debt, and, in fact, all public debt, is a very small part of the picture. In the first 7 years of this administration the net Federal debt has increased at an average rate of $2.9 billion a year. Net debts of the State and local governments has increased at an average rate of $3.4 billion a year. But the net private debt has been mounting at a rate of $34.4 billion a year.

In case there is any question of my use of the figures on net debt, I might point out that the observation still holds if we compare increases in the gross debt. The gross Federal debt between the end of 1952 and 1959 increased by $42.7 billion. In the same period, the gross private debt increased by $300.4 billion.

Net private and public debt

[In billions of dollars]

Year	Total public and private debt	Private debt	Federal debt	State and local Government debt
1945	406.3	139.9	252.7	13.7
1952	555.2	306.5	222.9	25.8
1959	846.4	547.5	243.2	55.6
Average yearly increase, 7 years, 1945–52	21.3	23.8	−4.2	1.7
Average yearly increase, 7 years, 1953–59	41.6	34.4	2.9	4.3

Source: U.S. Department of Commerce, "Survey of Current Business."

Consumer debt has almost doubled. It has ballooned from $27.4 billion at the end of 1952 to $52 billion at the end of last year. Counting the mortgages on nonfarm homes, total consumer debt has gone up by $93.4 billion in these past 7 years:

Net consumer debt

End of year	Total	Consumer debt	1- to 4-family nonfarm residential mortgages
	Billions	*Billions*	*Billions*
1946	$30.3	$8.4	$21.9
1952	83.0	27.4	55.6
1959	176.4	52.0	124.4
Average yearly increase in 7 years, 1946–52	*Percent* 7.5	*Percent* 2.7	*Percent* 4.8
Average yearly increase in 7 years, 1953–59	13.3	3.5	9.8

Source: Department of Commerce, "Survey of Current Business," July 1960.

Between 1952 and the end of July 1960, the personal interest income receivers received a total of $48.7 billion more in interest income than they would have received in this period if personal interest income had not been increased above the 1952 level. But in approximately the same period—to the end of 1959—consumer debt, including home mortgages, increased $93.4 billion. In fact, consumer debt, exclusive of home mortgages, has almost doubled—it has increased by roughly $25 billion.

NATIONAL INCOME FAILS TO KEEP PACE WITH EXPANSION OF DEBT

As we might expect, national income has not kept pace with this mounting debt—public and private. In 1952 the net public and private debt amounted to 190 percent of the national income of that year. By 1959, the debt had risen to 212 percent of the national income:

Total net public and private debt compared with national income

End of year	Amount of debt (billions)	Percentage of national income
1952	555.2	190
1959	846.4	212

Source: U.S. Department of Commerce, "Survey of Current Business."

In the private sector of the economy, the debt picture is even worse. In 1952 the net private debt amounted to 124 percent of personal and business incomes, after taxes. By last year, private debt had risen to 157 percent of all personal and business incomes:

Total net private debt compared with net private income [1]

End of year	Amount of debt (billions)	Percentage of net private income
1945	$139.9	91
1952	306.5	124
1959	547.5	157

[1] Disposable personal income plus corporate profits after taxes and payment of dividends.

Source: U.S. Department of Commerce, "Survey of Current Business."

The new plants have been built, and other new business equipment has been purchased; but the new plants and equipment for which the debt was incurred are not being used to the same extent to produce real income. Furthermore, the fact that consumer purchasing power is being drained off by the high-interest policy is not the only contributing cause. The new business capacity is not being used to the extent that it should be used for the reason that more of this capacity is under the control of the monopoly corporations. These corporations can, and inevitably do, follow high-price and low-production policies rather than the low-price and high-production policies which help the whole country when business capacity is divided among smaller competitors.

GOVERNMENT SHOULD ADOPT AN EFFECTIVE ANTI-INFLATION POLICY, INCLUDING A FLEXIBLE TAX POLICY, TO BE CARRIED OUT BY THE PRESIDENT

No; the high-interest, tight-money policy is not the way to try to restrain inflation. It is squeezing out small business; it is putting more of the productive resources of the country under monopoly control; and it is hurting consumers.

Surely we ought to know enough by now to know where a policy of high interest and mounting debt leads. It leads to a breakdown of the whole economic system and a breakdown which is repaired only after a wholesale debt cancellation through inflation.

It is an astonishing thing to hear the official money managers in this administration hark back to the interest rates of the 1920's, to try to show that present interest rates really are not so high. It is as though the good old days of the 1920's represent an ideal these people

think they should try to maintain. We might wonder where these people were during the 1930's. Possibly they were secluded in their walnut-paneled board rooms, still dreaming of the good old days of the 1920's.

No; the Government absolutely must adopt a more sensible and sane policy of trying to restrain inflation.

I would strongly urge that you give the most careful consideration to a flexible tax policy to be used in place of the high-interest policy—to accomplish the things which the high-interest policy is supposed to accomplish but has notably failed to accomplish.

The President should have authority, it seems to me, to raise taxes when the Government wishes to restrain spending, and to lower taxes promptly when the first signs of recession make their appearance. Such a policy would offer many advantages.

First, when a recession appears, a tax reduction would stimulate spending because it would make available income which consumers could actually spend. The present policy of making more credit available to the banks has proved a notable failure in stimulating spending. This is like a policy of trying to push on a piece of string. In recession times, the banks do not lend the money, even when they have it to lend. The Government can choke off a boom and bring on a recession by pulling on the purse strings, but it cannot push on the purse strings.

A second great advantage of a flexible tax policy is that when business taxes are raised, they would be raised more or less evenly on all kinds of business. The policy of tightening credit simply chokes off small business credit and prevents the small firms from expanding along with the big firms.

Finally, the revenue from an increase in taxes in a boom period would go to reduce the Federal debt. The present policy of raising interest rates simply increases the profits of the banks, insurance companies, and the high-income families.

Certainly the Federal budget should be balanced in reasonably good times, and the Federal Government should reduce its debt in prosperous times. I am strongly in favor of this, although I do not wish to leave the impression that I hold the distorted view that inflation has been caused solely, or even largely, by increases in the Federal debt.

If we listened to all the propaganda we hear these days about the Federal debt, we would think building another veterans hospital is highly inflationary, but building another resort hotel at Miami Beach is a wholesome and stabilizing influence on the economy. Yet the truth is that few thoughtful people would conclude that increases in the public debt are any more or less inflationary than increases in private debt.

SMALL BUSINESS INVESTMENT ACT SHOULD BE EXPANDED

The second thing which should be done to help give small business access to capital is to expand the small business investment program. The Small Business Investment Act, which was introduced in the Senate by Senator LYNDON B. JOHNSON, of Texas, and in the House by me, would appeal, I think to everyone who really wants to find a permanent solution to this problem. Certainly it is a step in the right direction to a permanent solution. The central idea of the Small Business Investment Act is that the small business investment companies are operated by private individuals who have invested a large amount of their own money. These private companies will make their own investment decisions, and as they grow, they will pay back the Government capital and get the Government completely out of the picture. They are profit-making organizations, intended to make profits, and the intention of the act is that they may take risks. They may take risks just as bold as the good judgment of the private operators dictates. In other words, the intention of the act was to help create a new kind of service where none existed. It should not be very difficult to make the small business investment program a growing and a really effective program. The interest which has been expressed in it has been tremendous, but here again the SBA has proceeded to license these new investment companies with great deliberation and excessive caution. Under an administration of less deliberate hold-back, private individuals would form a great many more of these companies, even under present law.

In addition, however, the law needs amending to authorize the small business investment companies to operate on a more realistic scale. The bill which became the Small Business Investment Act was actually the second bill that Senator JOHNSON introduced in an effort to get this program established. His second bill was a considerable mark-down and whittle-down from his first. It is my belief that Senator JOHNSON scaled down his request after negotiations with the administration, and the whittle-down was accepted in an effort to draft a bill which the President would accept and not veto.

The authorization should now be scaled up in two respects.

First, the present authorization calls for the SBA to invest only $150,000 in the subordinated debentures of these companies, in which case private individuals put up $150,000 of their own money. This should be increased. A $300,000 investment firm cannot help many small businesses, and it hardly justifies full-time attention of competent managers. Senator SPARKMAN has recommended that the capital be increased to $1 million, and this seems to me a good and reasonable recommendation that should be adopted.

The second defect of the present program is that it builds a fence around each of these small business investment companies insofar as they might pledge their assets jointly and issue stock or debentures to raise private capital. In other words, there is no regional capital bank, and no national board which can issue securities that would be attractive in the national markets. This defect was fully recognized, I believe, at the time the legislation was passed, but here again practical considerations required that the defect be accepted.

I sincerely hope that next year, under a new administration, legislation will be improved along the lines I have indicated. If these small business investment companies are to make any real impact, they must be allowed to expand, and they must be allowed to organize in ways whereby they can attract private capital.

A NEEDED SHIFT IN CHANNELS OF FEDERAL RESERVE CREDIT

My third recommendation for helping solve the small business credit problem is in the field of more adequate bank credit. Several steps are needed. One, the Federal Reserve System should be required to return to the practice of making more of its credit available through the 12 regional Federal Reserve banks, rather than making it all, or substantially all, available through the New York Federal Reserve Bank.

Second, the Federal Deposit Insurance Company should have its activities confined to operating an insurance program. At the present time, it is meddling in the affairs of the private banks, telling them what kind of loans to make and what kind of loans not to make, and so on. This is not good for the small business concerns needing bank credit. I assure you I would not like it if my life insurance company came around every day or so and told me what time to go to bed, what to eat and what not to eat, and otherwise instructed me in how to care for my health.

Several other things should be done to strengthen the small independent banks of the country. It is vital, in my view, that these banks become stronger and more profitable. The small local banks are a vital cog in the system of credit for other small business concerns. Yet, under present conditions, the prospect that independent local banking will give way to a few national chains of holding company banks is very real, indeed.

SMALL-BUSINESS PROBLEM NO. 2—TAXES

More could be said; but this is, in general terms, the small-business financing problem as I see it. This brings us to a closely related problem—taxes.

BIG BUSINESS HAS NUMEROUS SOURCES OF FUNDS NOT AVAILABLE TO SMALL FIRMS

I have already alluded to the point that the big corporations have several sources of funds which are not open to the small firms. They can issue bonds and find an acceptable market for them through the usual Wall Street channels. The same is true of issuing stock. And the big corporations have first call on commercial bank credit. Yet all the funds which the corporations raise from all these sources are only a supplement to the funds they accumulate from retained earnings and depreciation allowances.

Over the past 8½ years, the corporations have invested some $335 billion in modernizing and expanding business facilities including inventory expansion. No less than 63.4 percent of this total came from funds accumulated within the year—after paying taxes and dividends to the stockholders.

Sources of corporate funds used for investment and working capital, 1952–60

[Billions of dollars]

	Total new funds used	Funds from internal sources			
		Retained profits	Depreciation allowances	Total internal funds	Internal funds as percent of total
					Percent
1952	30.8	7.4	10.4	17.8	58
1953	30.4	7.9	11.8	19.7	65
1954	22.2	6.3	13.5	19.8	89
1955	50.3	10.9	15.7	26.6	53
1956	47.9	10.5	17.3	27.8	58
1957	42.5	8.9	19.1	28.0	66
1958	30.7	6.1	20.2	26.3	86
1959	53.0	9.1	21.5	30.6	58
1st half 1960 [1]	27.0	5.0	10.8	15.8	
Total, 8½ years	334.8	72.1	140.3	212.4	63

How is it then, under a 52-percent income tax rate, the giant corporations are able to retain enough income to pay handsome dividends to the stockholders and still have enough funds left over to provide for more than half of their vast expansions?

The truth is that the big corporations are shifting the Federal income tax. They have the market power to do it, and they are shifting the tax onto somebody else—mostly onto consumers, sometimes onto their small suppliers, and sometimes onto labor. I know of no dispute about this, either in academic circles or among big business executives. The only point in dispute is the question of exactly how much of the income taxes is shifted. Obviously, the amount varies with the corporation, depending upon its control over the market. But at least we know that the giant corporations take pretty much what they feel they need to be able to satisfy the stockholders with good dividends and, at the same time, put about an equal amount of money into expanding the corporation.

PRESENT TAX STRUCTURE CREATES A FORCED INVESTMENT IN BIG CORPORATIONS

It used to be thought that a high principle of the capitalistic system was that people with money to invest would build a new plant in the hope of getting their money back, plus a profit out of future sales to consumers. We now have a system under which the corporate managers make consumers pay for the new plant before it is built. Under this system the corporate managers decide how the earnings to the stockholders will be invested. They keep these earnings and invest them in whatever way they please. But, of course, the stockholders are usually happy with this arrangement because it means they avoid having to pay taxes on their earnings and then finding a new investment for them.

This is a kind of forced system of investment in which the corporate managers feel they must branch out and expand the corporation, even if they make the corporation too big to be most efficient. A distinguished economist has recently described the corporate managers' compulsion to expand this way:

[T]hey will do this even though the marginal productivity of capital, even though profit opportunities, are greater elsewhere.

In short, capital does not flow, necessarily, into its most profitable uses. The pattern of allocation may be as arbitrary as it would be under government direction, and may be more so. (Prof. Melville J. Ulmer, "Some Reflections on Economic Power and Economic Theory," De Economist, May 1959, Amsterdam, the Netherlands.)

Where is the power of small firms to shift taxes on to consumers and then reach into the consumers' pockets to take whatever funds they wish to have for modernization and expansion? Of course, there is very little of such arbitrary power in the hands of small business. In the case of small business taxes are very large and very real, and they are taking away any real chance to accumulate growth capital from the firms that need growth capital most and are least able to obtain it from outside sources.

The problem is, I believe, generally recognized. The question is, Who will do something about it—and when?

SMALL BUSINESS TAX RELIEF PROMISED

In his first state-of-the-Union message, in 1953, President Eisenhower called for an overhaul of the Federal tax laws, saying:

We should now remove the more glaring tax inequities, particularly on small taxpayers; reduce restraints on the growth of small business; and make other changes that will encourage initiative, enterprise, and production.

This announcement launched the Treasury's famous complete rewrite of the tax laws, which the Congress enacted, with its eyes closed, in 1954. This revision of the tax laws turned out to have in it some very striking encouragement for big business and even some for high-income individuals. In fact, it had some encouragements of this nature that turned out to be so conspicious that the administration later came back and asked that they be toned down. In all this melee, however, the promised removal of the inequities on small business got overlooked.

These inequities became a matter of administration concern again, however, when the next presidential election year rolled around. Several small-business tax bills had been introduced in Congress which were receiving some public attention. The President, early in 1956, set up a Cabinet Committee on Small Business, with instructions to make recommendations on taxes and other small-business problems. The Cabinet Committee made its recommendations in August of 1956, and these were widely publicized. The one tax recommendation which would afford some substantial relief was one to reduce the effective income tax rate on small corporations from the then 30 to 20 percent. More specifically the proposal was to reduce the rate on the first $25,000 of income of all corporations; but this would help the small corporation a great deal, while making no significant reduction for the big corporation. The total expected cost to the Treasury was estimated at slightly more than half a billion dollars.

TAX RELIEF PROMISED AND PROMISED

In the political campaign that followed, many promises were made that this tax recommendation would be carried out—and somewhow the impression got around that this meant promptly. In his speech accepting the Presidential nomination at the Cow Palace in 1956, President Eisenhower spoke of the speed with which his dynamic forward-looking programs were going, saying:

Specific money programs of action are being pushed for all of these, the most recent being a new 14-point program for small businessmen which was announced early in August. And the everyday well-being of people is being advanced on many other fronts. This is being done, not by paternalistic regimentation. It is done by clear-cut, aggressive, Federal leadership and by releasing the illimitable resources and drives of our millions of self-reliant individuals and our thousands of private organizations of every conceivable kind and size.

On October 22, just a couple of weeks before the election, the President made public a telegram he had sent to a small business group, saying that he had already put into effect the Cabinet Committee's proposals which did not require legislation, and that he was moving ahead with legislative proposals which he would present to Congress, when it came back in January, to put its other recommendations into effect. At the top of the President's list was the promised tax cut from 30 to 20 percent, and this was the item which received the headlines in the newspapers.

When Congress convened in January, following the elections, Senator FULBRIGHT and several others introduced bills to carry out this promise. But without making headlines, the Secretary of the Treasury, George Humphrey, quietly but firmly advised the tax committees it would be premature to consider putting the promise into law. After some of us in Congress made some pointed demands that the Cabinet Committee recommendation be enacted as promised, the President himself wrote, in July, to the chairman of the Ways and Means Committee, saying:

It would be ill-advised to consider the recommendation, because—

He added—

of the substantial revenue loss it would entail.

THE PROMISE HAS NOT BEEN KEPT

Another presidential term is now drawing to a close. But in these past 4

years the administration has not yet recommended, nor has it done anything but oppose passage of this recommendation.

In simple fairness this proposal should be enacted at the beginning of the next Congress. I sincerely hope it will be. I hope also that should any of the candidates for office this fall make promises to support this legislation, they will also specify the time when they expect to support it.

This legislation would help not just small corporations, but also the unincorporated firms. We passed in the last Congress a change in the tax laws which gives to small firms the option of being taxed as a corporation. So, this reduction from taxes for the small corporation, if we can pass it, will be helpful to any operator of an unincorporated business who wishes to accumulate earnings in the business, for purposes of expanding the business, without having to pay individual income taxes on these earnings.

Frankly, the need for revisions in the tax laws to give small business a better break are much more extensive than I have indicated, and I wish that I had specific recommendations for handling these revisions, which I do not have. I would like to see a careful and impartial study made of the whole tax structure, to see just what can be done to bring about a more even impact of taxes. This is a matter of no small consequence, because, obviously, the Federal tax structure can change the whole structure of American business. Indeed, it seems clear that it is doing so, and at a very rapid rate.

SMALL BUSINESS PROBLEM NO. 3—PREJUDICE FAVORING BIG BUSINESS IN GOVERNMENT PURCHASES

Let me now review one of the other big reasons why 100 or so big corporations have mushroomed into vast empires, in recent years, and are rapidly gaining control over most of the Nation's productive resources and markets, while the rest of the business population becomes less and less a factor in the economy.

Let me make an imaginary suggestion to you. Suppose I were to suggest that the government of some great nation—I need not name the nation—was about to place a great deal of business with certain private business firms of that nation. Suppose that I were to suggest that the amount of business orders to be placed with these firms within a short period of 10 years would be equal to all the income produced last year, say, in Great Britain. Or, let us say that the amount of this business to be placed exceeds the value of all the goods and services—both public and private—produced in Canada last year. You would be impressed, I am sure, that that is a great deal of business.

HOW TO DESTROY THE COMPETITIVE ENTERPRISE SYSTEM

Suppose I suggested also that the government of that great nation which has, let us say, 5 million different business firms—is about to place all this business with only 100 business firms. I suspect that you would be shocked by such an idea. Certainly, if such a volume of business, greater than the whole production of Canada and Great Britain, were to be placed with only 100 business firms on terms which assured these firms that they would be paid for all the expense they cared to incur plus a fat profit, you would expect some drastic changes in the competitive relations between these 100 firms and the other 5 million firms of the nation. You would expect that in the course of 10 years these very fortunate 100 firms would be vastly enlarged in financial power, they would come to have the newest, most expensive, and most productive equipment, that they would have technical processes not available, nor yet even known to their competitors, that they would have staffs of technicians, scientists, and a vast store of know-how and patents their small competitors did not have and could expect them to have other superior competitive advantages. You would expect these 100 firms, now blown up to giant size and towering above their competitors, to be in a position to root out their rivals and take over any and all of the commercial markets of the country.

Yes, I have no doubt that, if the Members thought that such things as I have described were about to be done, they would expect some dire consequences. Certainly they would expect these things to bring about some radical changes in the competitive system of business in that nation.

Well, of course, all of these things I have described have already been done, right here in our own Nation. The vast amount of business I have described has already been placed over the past decade, and it has been placed with only about 100 business firms. And the results have been no different from those you would expect.

MORE BUSINESS GIVEN 100 CORPORATIONS THAN THE WEALTH OF NATIONS

In the past 10 years, the Department of Defense has purchased some $223.5 billion worth of goods from private business firms. This vast aggregate includes purchases of every known article of commerce and industry, as well as many not known. It includes all imaginable kinds of goods—both civilian and military. And, of course, many that were military yesterday are civilian today.

The official reports of the Department of Defense show that no less than 70 percent of all these vast purchases have been made from about 100 corporations. In other words, in placing approximately $156 billion of business over the past 10 years, with only 100 or so different business firms, it has placed with these firms several times as much business as is done in a year in such a nation as, say, Canada. In fact, this is more than four times the value of all the goods and services—both public and private—produced in Canada last year.

To get another idea of just how vast this is, let me point out that it is more than the combined national incomes of Canada, the United Kingdom, Italy, and France.

Gross national product and national income of selected foreign countries

[In billions of U.S. dollars [1]]

Country	National income	Gross national product
Canada	25.6	33.8
France	36.4	48.0
Germany	42.2	54.4
Italy	21.0	26.7
United Kingdom	51.1	63.8
Total	176.3	226.8

[1] At official exchange rates at end of year; income figures for the year 1958.

Source: International Monetary Fund, "International Financial Statistics."

I will insert in the RECORD a table made from the Department of Defense's various reports on this subject. The reports which have been issued on this matter have been issued at irregular intervals, and the different reports have not always covered the same number of months. In several instances, furthermore, the periods of time covered by the reports overlap; but the seven reports which have been issued over the past 10 years, taken together, cover these years completely. We cannot say what the precise percentage is of the total value of the purchases that have been made from the 100 largest contractors in the whole 10-year period, but in no part of the 10-year period was the percentage less than 64 percent; and in most parts of this period, the percentage of the Department's purchases going to the 100 largest contractors was in the neighborhood of 70 percent and above. The largest share of the total purchases made from only 100 contractors occurred in fiscal year 1958, when the 100 largest contractors received 74 percent of all the Department's business.

How $224 billion of defense production has been distributed in various periods during the 1950–60 decade

SHARE TO 100 LARGEST CONTRACTORS

Period:	Percent
July 1950–June 1953	64.0
July 1953–December 1954	68.8
January 1955–December 1956	69.6
July 1956–June 1957	68.4
July 1957–June 1958	74.2
July 1958–June 1959	73.8
January 1959–December 1959	73.2

Source: Department of Defense annual reports of contracts awards and occasional reports of awards to the 100 largest contractors.

The 100 largest contractors are not always the same identical firms in each of these periods. As the contractors are ranked from the first largest on down, there is always some shifting of firms in positions around the 100th position. In other words, a corporation which is ranked, say, the 105th largest contractor in one period, may move up to the position of 95th largest in the next period, while the 99th largest moves down, and so on. But in general the same 100 or so favored firms have been the favored firms throughout. They have grown fat

and powerful on Government business, and, just as we would expect, they are using this power to advance themselves in civilian markets at the expense of the less favored concerns.

PROMISES TO GIVE SMALL FIRMS A FAIR SHARE OF UNCLE SAM'S PURCHASES

This matter has been a topic of many promises and, I have no doubt, good intentions—but good intentions are soon forgotten. In truth, any suggestion which threatens to disturb the ways in which the Pentagon distributes the country's vast wealth is likely to set off some formidable big business action, even if such a suggestion comes from the President of the United States. Dividing up the wealth of empires is no playful pastime which is taken lightly by the power centers of big business and big finance.

I have already referred to President Eisenhower's 1956 telegram to the small businessmen in which he reported that the administration had already put into operation such of his Cabinet committee's recommendations as did not require legislative actions. According to the Wall Street Journal's report of that telegram, the President had already "called for a comprehensive review of Government procurement policies aimed at increasing small business' share of Uncle Sam's purchases."

Perhaps it would have been better had that comprehensive review not been made. In the fiscal year after it was made small business' share of Uncle Sam's purchases dropped to 17 percent from a previous year's share of 18 percent, and the share has not risen since. Small business concerns, which the Federal agencies generally define as firms having no more than 500 employees, were awarded 16.6 percent of the Federal agencies' purchases in the fiscal year 1959, the last year so far reported.

SBA SET-ASIDE HAS PROVED INEFFECTIVE

Now, of course, there is a program called the "SBA set-aside" which I believe is considered to be the administration's main answer to the several laws passed by Congress declaring that our national policy is to place a proportionate share of Uncle Sam's purchases among small business concerns. Under this program the Small Business Administration reviews certain of the purchases which the other Federal agencies propose to make, and in certain particular purchases the SBA may recommend that the purchase be "set aside" for small business. Such recommendations are made where the item to be purchased is typically a small business product and a sufficient number of small business firms are known to be able to supply the product to assure strong competition in the bidding for the contract. The Federal agency in question may or may not comply with SBA's recommendation.

Now, it seems to me that there has been a considerable boasting, and no little confusion, about the achievements of this "set-aside" program. What does the scoreboard show?

Value of contracts awarded by the Department of Defense

Fiscal year	Value placed with all firms	Share placed with small business firms	
		Total	From SBA set-aside
	Billions	*Percent*	*Percent*
1954	$16.8	25.3	0.6
1955	18.5	18.0	1.0
1956	20.9	17.0	1.2
1957	22.6	17.0	2.4
1958	21.8	17.0	3.1
1959	22.7	16.6	3.7
1960	21.3	16.1	3.7

Source: Department of Defense, monthly reports.

In the fiscal year 1954, the Department of Defense made 25 percent of its purchases from small business. Six-tenths of 1 percent of Uncle Sam's purchases went to small business by reason of the SBA set-aside program. In fiscal 1959, 16.6 percent of the purchases went to small business, and 3.7 percent of these purchases went to small business by reason of SBA's set-aside efforts. Despite all the boasting, SBA's set-aside program has not increased the share of Government business placed with small firms, so to find any accomplishment that the SBA has made in this field, we are left to imagine that small business' share of Uncle Sam's purchases would have declined even more than it has declined, had SBA not been in the picture.

This quite remarkable tendency of the Federal agencies to concentrate all of the Government's business in a few top corporations, has, of course, been a matter of deep concern to Congress for many years. Laws have been passed declaring that the agencies shall follow a policy of awarding Government contracts on a basis of advertised, competitive bids, that these agencies shall place a proportionate share for small business, and so on. Congress has, furthermore, created a small business agency and passed annual appropriations for it in an effort to create an arm of the Government that would see that these policies are carried out. If anything has changed as a result, the changes are not clearly visible.

It is comforting to know that in certain of its operations, the Department of Defense takes an overall look at its problems and our military posture relative to the industrial resources of the country. It is my belief, furthermore, that in certain aspects the Department's planners actually do some planning and budgeting so that in some matters there is a degree of central and coordinated direction. I believe, for example, that the Department's planners recognize that they should watch to see that there is at least a minimum of industrial capacity in each of several categories sufficient to supply the Department's need under certain emergency conditions. In other words, the Department maintains what it calls a "mobilization base" of private industrial corporations. Consequently, there have been times, I am told, when the Department has maintained certain large corporations on a sort of make-work basis, buying these corporations' products for which it had no particular need, on the theory that these firms should be kept in business in case they are needed in the future.

THE NATIONAL POLICY IGNORED

As to any simple budgeting or coordinated effort to carry out the congressional mandates that a proportionate share of its contracts shall be placed with small business, no visible steps have ever been taken. Each of the various military services handles its own placement of Government purchases and in the final analysis, the several thousand separate contracting offices make the decisions as to where the business is to be placed. On a dollar value basis, better than 85 percent of all the contracts are awarded on the basis of negotiation rather than by advertised, competitive bid. I do not suggest that competition is absent from all of the contracts placed after negotiation. On the contrary, competition can be and in many cases is as strong in the negotiation prices—depending upon how much the contracting officer negotiates—as it is in the case of advertised, competitive bids. But, the area of competition left open is of little benefit to small business. The big corporations use the Government's money to subsidize their quest for the competitive contracts and take a handsome profit on the subsidy.

What happens, of course, is that the big items such as missiles and planes almost inevitably go to the big corporations. No one can be sure what a fair price is for such items at the time the contract is made, least of all the contracting officer. So, the price agreed upon is usually made comfortably large on the theory that in the end the Renegotiation Board will take back any excessive profits that accrue from the contract. The practice of the Renegotiation Board is to allow the company to keep as profits a certain percentage of the total dollar volume of business the company has done with the Government during the year. So, this means that as soon as the big corporation sees that it has accumulated a few millions of dollars it will have to return to the Government at the end of the year, it goes after the hard to get competitive contracts, even if it has to take these contracts at a below-cost price. This expands the volume of the company's Government business and hence increases the amount of Government profits it can keep. In other words, the company makes money even if it loses money on the contracts it takes away from the small competitors.

This seems to me a very foolish policy of the Government, to allow its money to be used by the big corporations to drive out the small competitors. It also seems to me a very foolish policy of the Government to make purchases equal, as I have said, to the total wealth of many large nations and place all this business with only a few corporations. But this is not the end of the foolishness yet.

SMALL BUSINESS PROBLEM NO. 4—THE GOVERNMENT'S DISCRIMINATION IN ITS RESEARCH GRANTS AND PATENT POLICY

When we listen to our television sets and hear some of the corporations' claims about all of the research and development work they are doing, and all the progress they are making in projecting the Nation's science and technology into the world of the future, many of us are no doubt much impressed, as I am. The claims which some of these companies make for themselves make it seem as though each of them is a sort of one-firm geophysical year.

What the ad writers do not tell us is that the taxpayers are paying for most of this research and experimentation with new products and new processes. The taxpayers are paying for it, furthermore, not through any roundabout way of reasoning on my part, but in direct grants of money right out of the Federal Treasury.

FEDERAL GOVERNMENT FINANCES TWO-THIRDS OF ALL RESEARCH AND DEVELOPMENT

The country has spent, in the past 4 years, about $42 billion. According to estimates of the National Science Foundation, this is about equal to the total amount spent in the country for these purposes between 1860 and 5 years ago. The amount is increasing principally because the Federal Government is pouring more and more funds into these purposes.

The National Science Foundation estimates that, taking all spending—public and private—for all kinds of research, experimentation, and technological development, the country is now spending about $12.4 billion per year. The Federal Government is footing the bill for $8 billion, or a little more than two-thirds of the total. Private industry is spending about $4 billion, or about half the amount the Government is spending.

Sources of funds for research and development in the United States

[Millions of dollars]

Sector	1953–54	1956–57	1957–58	1958–59 (estimated)	1959–60 (estimated)
Federal Government agencies	2,740	4,960	6,130	7,050	8,079
Industry	2,240	3,260	3,660	3,794	3,971
Colleges and universities	130	170	180	316	374
Other nonprofit institutions	40	70	80		
Total	5,150	8,460	10,050	11,160	12,430

Source: National Science Foundation, "Reviews of Data in Research and Development," December 1959.

So far, so good. I have no complaint about the country's spending a great deal of money for research, experimentation, scientific and industrial advancements of all kinds. Even more of the country's resources and brains should, in my opinion, be put into these pursuits, even though, as the figures indicate, we are now spending for these things more money than the total income in several nations of the world. But the next question is who is doing all this research; who is getting the benefit of the money; and who will control for the future the fruits of all this effort?

UNCLE SAM IS FINANCING INDUSTRIAL CONCENTRATION

The answer is more frightening than anything most of you could imagine.

Most of the Government's share of the cost of the research, experimentation, and development work is being handled by the Department of Defense in the form of grants handed out to private companies, and to some extent, to the universities. These grants are being made, not just for what we could reasonably call military items, but for all kinds of industrial technical development—all kinds of industrial processes, new products, metallurgy, chemistry, and so on.

Perhaps the Members will by now not be shocked, if they do not already know, that substantially all of these grants are going to a few giant corporations. In 1956, 89 percent of all the grants the Department of Defense made went to the 100 largest receivers of these grants. Since that time, the total amount of money being granted has been going up and up, and so, too, has the percentage of the total grants going to the 100 largest receivers. In 1959, the 100 largest contractors got 93 percent of the total.

Amount of grants made by the Department of Defense for experimental, developmental, and research work

Fiscal year	Total grants (in billions)	Percentage made to 100 largest firms
1956	$2.4	88.7
1957	3.0	91.0
1958	3.7	90.9
1959	4.9	92.9
1960	(1)	(1)

[1] Not available.

Source: Department of Defense annual reports.

This is a most astonishing policy, even considering all we know about this administration's single-minded favoritism to big business in other fields. All objective researches into the question of how discoveries and inventions are made show that most of the inventions have been, and are being made, not by the giant industrial corporations, but by small research groups and individual inventors. Why in the name of all reason, may we ask, would not this administration try to encourage and take advantage of all the technicians and inventive brains we have in this country? Why give these few big industrial corporations the money with which to hire so many scientists and technicians and largely waste their time? You might think that the leaders of big business and big finance who have such a powerful say in everything the Government is now doing would know better than to allow this to go on, even in his own self-interest.

UNCLE SAM IS FINANCING A PATENT MONOPOLY

I hate to say more, but the worst is yet to come.

Who do you suppose gets to own and control the patents on the inventions made at Government expense?

The Department of Defense not only allows, but encourages, the corporations to acquire the patents on the inventions they make through research paid for by the Government.

This was too much even for the administration's first Attorney General, Mr. Herbert Brownell. In 1956, the Department of Justice made an investigation of the Defense Department's handling of research and development grants, and in November of that year, the Attorney General issued a report condemning this policy of allowing the private firms to acquire the patents on inventions paid for by the Government. This report pointed out that processed foods, penicillin, electronic devices, and a long list of other "present-day commercial products were all originally developed under research and development programs for defense purposes." Said the Attorney General's report: "Present patent policy may well be one of the major factors tending to concentrate economic power."

And what has the administration done about the warnings of its own Attorney General? Nothing.

In view of what I have said about the administration's policy of concentrating the Government's vast amount of purchases with only a few giant corporations, its policy of turning over to the top corporations the tremendous sums Congress has appropriated for research, and, finally, its policy of allowing the corporations to acquire and control the patents on the fruits of this research, I believe my recommendations are self-evident.

The only cure to this situation I know of is to have a President in the White House tell his Cabinet officers to change these policies and mean what he says.

THE "NEW LOOK" IN ANTITRUST ENFORCEMENT

I come now to the antitrust laws, I believe we are all agreed that without good antitrust laws and real enforcement of these laws small business in no nation can survive in any degree of independence and freedom.

The spectacle which this administration has made of the antitrust laws is not pleasant to contemplate.

The spectacle began with an all-out effort to achieve a "new look" for the antitrust laws by means which are, I believe, unprecedented in our history. To put the matter bluntly, one of the administration's earliest and most highly advertised projects was one aimed at "brainwashing" the Federal judges. In brief, there sprang into being a highly touted group known as the Attorney General's Committee To Study the Antitrust Laws, who let it be known that their mission was to modernize and revitalize the antitrust laws.

In truth, this committee was mostly a bunch of big-business lawyers who specialize in defending big corporations in antitrust suits—and who, incidentally, had recently been suffering a los-

ing streak. This group also had, to assist them in their labors, certain members of the staff of the antitrust enforcement agencies, such as Mr. Kintner, the present Chairman of the Federal Trade Commission, and Mr. Bicks, who served as secretary to the group.

A small minority of law professors and academic economists were also appointed, presumably for window dressing, but fortunately for the country this minority, in the end, turned out to be more windowbreakers than window dressers.

While the Attorney General's committee recommendations were being drawn, there seems to have been a shift in political sentiment in the country. At least there was a change in the control of Congress. In the end, the committee decided to direct its recommendations, not at the Congress for changes in the laws, but to the Federal courts with subtle instructions for reinterpreting the laws. The whole operation was very slick, very pious and high-minded, and merchandised with the best of the Madison Avenue techniques. Their report is smoothly persuasive—to the casual reader—but of course you will not be surprised to learn that it was rigged with some boobytraps the lawyers hoped the judges would step into. There were also some very plain and pointed recommendations to the enforcement agencies—the FTC and the Department of Justice—as to how they should adopt new ways of enforcing the antitrust laws.

Never to my knowledge has the executive branch of the Government before undertaken a lobby directed at our courts. But the Attorney General saw to it that a copy of this report reached the hands of every Federal judge in the land; and there were all sorts of bar association shindigs arranged to acquaint the Federal judges with the importance of this report. As matters turned out, there is little indication that this big effort has had any effect at all on our Federal judges, in which case we have reason to hope that this sad chapter in our country's history will not be repeated.

As to the effect of the "new look" on the enforcement agencies, however, that is another matter. In this fertile soil both the committee's recommendations and its Madison Avenue techniques have taken root and flowered while effective antitrust law enforcement has steadily gone from one step of deterioration to another. The first step was that of adopting one of the main recommendations of the brainwashing project, namely the practice of settling the pending antitrust suits by private, out-of-court negotiations and, furthermore, settling the new suits to be brought in the same manner.

This practice is still with us.

The next stage was one which was not recommended. This period saw the administration's first FTC Chairman resigning from his post after he had been discovered participating in a case from which he was disqualified—disqualified by reason of the fact that the case involved one of his previous law clients—and it saw the Assistant Attorney General in charge of antitrust and his top assistant leaving office about the time they were discovered speculating in the stocks of corporations which were about to merge, and which merger it was the duty of these offenders to approve or disapprove.

The spectacle now draws to a close with a kind of traveling circus featuring the comedy team of Kintner and Bicks, whose act consists of quick changes from judicial robes, prosecutor's wig, and barker's uniform—one speiling off the numbers while the other takes turn passing out the snake oil.

ANTITRUST BY CONSENT

The administration's practice of issuing antitrust complaints and then settling these complaints by consent decrees can be an extremely dangerous practice—one which could turn antitrust law enforcement to political manipulations of the worse kind. It can be, and has been, most unwholesome. The Members may recall, for example, the famous consent decree which the Attorney General negotiated in the A.T. & T. case. When the Committee on the Judiciary of the House tried to investigate that settlement, along with the whole consent decree practice, the Department of Justice refused to give the committee any records. It did, however, develop the fact that Attorney General Herbert Brownell had worked out the settlement with an A.T. & T. official at a weekend party down at White Sulphur Springs, W. Va. The Judiciary Committee then turned to the private companies for the records and obtained a memorandum which an A.T. & T. official had written concerning his conversations with the Attorney General. The A.T. & T. official gave the following description of the Attorney General in response to this official's suggestion that the case be dropped:

He reflected a moment and said in substance that a way ought to be found to get rid of the case.

Consequently, he thought that we could readily find practices that we might agree to have enjoined with no real injury to our business.

He said if we tried we could certainly find things of that sort that could be used as a basis for a consent decree.

He said the President would understand this also and that if a settlement was worked out he could get the President's approval in 5 minutes. (See p. 54, "Report by the House Committee on the Judiciary on the Consent Decree Program of the Department of Justice.")

The inherent challenges to good government in this sort of thing speak for themselves.

But there is another aspect of this consent settlement matter which has been the basis for my many criticisms of it, as well as most of the other criticisms that have been made in Congress. The aspect is that these settlements, even if they are the kind that put an end to the monopoly situation, as the public has a right to expect, the business firms, the individuals, and the State and local governments who have been directly injured by the monopoly practice are cut off from their usual opportunity of bringing a private suit and recovering damages.

THE "GUILTY" NOT YET GUILTY

Now it seems to me that considerable confusion has recently developed over what is supposed to have been a change in policy in the administration, and perhaps in the FTC, concerning these consent settlements. The Department of Justice did announce a change in policy which seems to have given the impression that it is now accepting consent settlements in cases where the State and local governments have been damaged by a monopoly practice only when the company admits guilt and allows his admission to be entered in a judgment of the court. This policy, if it had actually been put into practice, as some of the States attorneys general seemed to think, would permit the States to sue on the basis of the admission of guilt in the same way they could sue and recover damages if the case were tried before a court and the court rendered a verdict of guilty.

All the speeches and press releases and news stories and telegrams we have had in recent weeks about this matter, frankly, had me confused, so I inquired just what the score is. Actually, the score on the new policy is zero. I have been told, and I do not doubt it, that the Department of Justice has taken some action to try to get an admission of guilt entered in the judgments of the court in two cases. But so far these have not been accepted. In the meantime, the consent settlement business continues to boom.

THE CONSENT DECREE BOOM CONTINUES

The record of the Federal Trade Commission in entering decrees in antimonopoly cases is as follows:

	1958	1959	1960
Total	53	63	57
Consent decrees	30	54	49
Contested cases	15	9	8
Dismissals	8	5	

The record of antimonopoly civil decrees entered by the Department of Justice in each of the fiscal years shown is as follows:

	1958	1959	1960
Total	27	33	24
Consent decrees	23	23	22
Contested	4	10	2
Of those contested:			
Won	3	5	1
Lost	1	5	1

Prior to Mr. Kintner's reign at the FTC, it was the practice of that agency never to accept a consent settlement without a judgment and a finding of fact. If I am correctly informed, it is now the FTC's practice never to do otherwise. From the standpoint of individual private rights, an FTC order without a judgment and finding of fact is not quite the same as one under the Sherman Act, in that an individual cannot sue on the basis of the record. From the standpoint of the general public's rights, however, there is very little difference.

Without such a judgment and finding of fact, neither the courts nor the public—nor as for that matter future Federal Trade Commissioners—can determine whether or not a company which has been charged with violating the antitrust laws is continuing the same practice it has consented to abandon.

What shall we hear of the great rash of new antitrust complaints which we have been hearing so much about from Mr. Kintner and Mr. Bicks in their campaigns to win reappointments to their jobs? As for my part, I would say, "Congratulations. Go to it. Break all the records you can in issuing complaints." In the meantime, however, I, for one, am not particularly amused. I will be delighted to see what comes of all this complaint issuing when these have ripened into some real results.

The biggest complaint I have heard about all of these compaints so far is that they tend to be directed at the little man and have very little in them that could actually break up a big monopoly.

Let me remind the Members that there are two parts to the Sherman Act which is supposed to be our charter of freedom against monopoly.

Under section I, you bring charges to break up a conspiracy—a price fixing conspiracy, a conspiracy to control production and allocate markets, and so on. You may bring either a civil or criminal charge or both under section I. If you bring a criminal charge, the case may, in the end, result in a fine, which is usually inconsequential to a large corporation. Under civil proceeding, you may get an injunction against continuing the conspiracy. And, if you take a consent order, you simply get a promise that the companies will not in the future violate the law they should not have violated in the first place.

Section II of the Sherman Act is quite another matter. This is the one you use to bust up trusts, and to get injunctions against individual companies doing whatever it is they should not do.

Needless to say the very weak section I of the Sherman Act has become the favorite method of the administration's antitrust activity. It is under this section that almost all the complaints are being brought, and it is these complaints that are also being settled out of court.

Let me quote from a paper delivered by a distinguished antitrust lawyer, Mr. Abe Fortes, before the Antitrust Section of the American Bar Association, last April. Here is what Mr. Fortes says after analyzing the Department of Justice's antitrust record:

A stranger, indeed, might get the impression these days—totally unwarranted—that our antitrusters think that all American business is the same size. There is little evidence that they are aware of the major grievance of small business. That major grievance is big business: That is, business bigger than they are.

Tucked away in the Sherman Act, largely unnoticed in recent years, is section 2, the monopoly provision of the act. In 1957, at the seminar on protracted cases at the New York University Law Center, Mr. Bicks, the able acting head of the division, assured the Federal judiciary that there would be a decline in the big case problem because the Department was instituting fewer cases under section 2. He pointed out that in the years 1946 to 1948, 46 percent of the Government's cases were brought under section 2. But in 1955 to 1957, only 19 percent of the cases instituted involved section 2.

In examining the cases which the Department filed in 1959, I have found that only 6 out of the 63 new cases instituted by the Department in any way involved section 2. Actually, only two of these cases substantially involved monopoly problems, and neither touched the central nervous system of our economy. One involved postage meters and the other concerned zig-zag sewing machines.

Now the Antitrust Division is entitled to sympathetic understanding for its aversion to these cases. Winning a section 2 case and getting effective relief from the courts is not child's play. But the enforcement of section 2 is fundamental to our society; fundamental to the preservation of competition; and fundamental to the operation of antitrust generally. Its enforcement is essential to provide the framework for an economy hospitable to the existence of a multitude of independent business units—the conception upon which many of our institutions, principles, and policies depend. I do not believe that enforcement of this section is beyond the competence of the Government.

* * * * *

Indeed, small—or smaller business—may have reason to fear that the Government's current enforcement emphasis may inadvertently have the effect of insulating our giant companies from real competition. I refer to the policy, described by Mr. Bicks in his 1959 year-end report, and exemplified in the cases filed last year and this by the Department and the FTC, to devote the Department's resources to the antimerger crusade to the virtual neglect of section 2. (Source: American Bar Association Section of Antitrust Law, vol. 16.)

FREEDOMS AT THE CROSSROADS

Our antitrust laws and small business, it seems to me, are at the crossroads. It may be that we are beyond the crossroads and cannot turn back. Many people seem to think so. Frankly, I hope we can turn back and make the turn we should have made—toward more effective antitrust laws and more effective law enforcement.

When we consider the changes which have taken place in both business and Government, even within the span of our own memories, we cannot doubt, I think, that there is a serious question whether our experiment in freedom may be drawing to a close. There was a day when our country offered something very near the ideals of economic freedom. Every citizen could choose his economic pursuits. The door of opportunity was open in all lines of trade and in manufacturing. And the kind of competition which Adam Smith envisioned as providing a natural regulation of prices and automatic self-regulation of the other aspects of our economic affairs did, in fact, prevail. That day has long since passed.

More and more of the Nation's economic activity has shifted from a system of independent, competitive enterprise to a planned, controlled, and regulated system of giant monopoly enterprise.

None of us here need to be reminded that political freedoms and economic freedoms go hand in hand. We have all seen the practical demonstrations of how great concentrations of economic power influence our press, our radio, our television—all of the means of human communication, including, not the least of all, communications within the national business organizations, such as the National Chamber of Commerce, the National Association of Manufacturers, and even the associations of professional men.

Are these political considerations? Yes; the organization of our economic life cannot be otherwise than political. The corporations themselves are creatures of law, and, indeed, the whole course of business is a creature of law. This is one of the main purposes of government—to help business—to help all citizens of the country advance themselves economically.

The ways in which the Federal Government imposes its taxes; the way in which it hands out its subsidies, and its vast payments for research, experimentation, and defense production; the ways in which it manages its money system; the ways in which it manages its patent system; and the ways in which it arranges and enforces its trade and antitrust laws are all political decisions which have a leading role in determining which businesses survive and prosper and which are squeezed out. They are political decisions and play a leading role in determining how employees, consumers, farmers, and all other groups in the country share in the productive wealth of our country.

REPORT ON THE 86TH CONGRESS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. VANIK] is recognized for 20 minutes.

Mr. VANIK. Mr. Speaker, as the 86th Congress draws to a close, it is fitting that we look back over our work and take inventory of our legislative effort and achievements. Although this second session was interrupted for the political conventions, Congress returned to complete such work as was feasible.

The post-convention session was not designed to embark on any new fields of legislation. It was called to finish vital work which could not be overlooked in view of current world conditions. If Congress had not returned, the President would have been justified in recalling Congress for this purpose and politically making the most of it.

History will record that this Congress worked under extremely difficult circumstances to draft laws which would best meet the urgent needs of the American people and survive the threat of veto. A working coalition between conservative Democrats and the Republican minority combined to develop control over the legislative output. Liberal hopes to legislate on the problems of unemployment, sluggish economic growth, high interest rates, urban blight, and the crucial medical problems of the aged, were put aside.

The President's veto threat hung ominously over the Congress throughout its deliberations and was often employed to cut the substance from worthwhile measures.

During this election year partisanship took its toll. The entire governmental

process appeared frustrated, awaiting the stimulation of fresh spirit and new blood from the autumn elections. America could ill afford this political delay, but a fresh start is on its way.

FOREIGN AFFAIRS—THE COLLAPSE OF PERSONAL DIPLOMACY

Failure at the summit resulted from the personal diplomacy which characterized American foreign policy during the past 8 years. This commenced with the personal diplomacy instituted by the late John Foster Dulles and was climaxed with the President's disastrous mission to the summit.

Personal diplomacy provides headlines and glamour for its participants, but seldom in history has it proven to be a capable substitute for positive policies of state developed in orderly process. The current state of disorganization in the Department of State directly results from emphasis on personal diplomacy.

The personal magnetism of the President, operating without firmly established policies of state, could not stem the tide of bitterness developing against America. The ill-timed U–2 incident was a stupid mistake which could not be corrected. Premier Khrushchev intended to sabotage the summit. Our Government could not have provided him with a handier tool.

Throughout the world, people pray for a stable peace and the machinery which can insure it. America has failed to provide positive leadership in this regard. Our policy of supporting friendly dictators has lost us other worthwhile friends. Our belated awareness of the plight of the Latin American republics now threatens inter-American solidarity. Our belated interest in the aspirations of the people of Africa now makes our participation seem almost too late.

American foreign policy has too often and in too many places been associated with American investment for high and quick profits. Loans and aid have been offered in combination deals which brought in American business and investment. It is no surprise that our official representatives should be jeered and even stoned in Latin American countries, when American funds find their way into investment there at fantastic interest rates which range from 20 percent in Peru, 24 percent in Chile, to 36 percent and 40 percent in Brazil and Argentina. If American capital abroad is participating in the extortion of such exorbitant rates of interest in the underdeveloped areas of the world, it would be doing this Nation a grave disservice which no "policies of state' could correct.

On this point I took the floor on May 12, 1960, to criticize a $2 million loan by the Development Loan Fund to a savings and loan association in Lima, Peru, which was founded by the Prime Minister of Peru. That housing loans are critically needed in Peru is unquestioned. However, I was astounded that our Government should prefer to loan to a bank owned by the country's prime minister. In our dealings with the foreign governments we should insist on the same degree of political morality as we expect from our own public officials.

If we are to return to our former position of world leadership, we must reaffirm our devotion toward world peace, make manifest our concern for the underdeveloped, the underprivileged, the suppressed, the neglected, the forgotten people who constitute most of the population of the world. Dollar diplomacy must give way to human diplomacy. Dollar profit alone has no place in this program. Good will can profit our Nation much more. The reconstruction of our foreign policy must be the prime goal of a new administration.

THE DEFENSE OF AMERICA

Throughout the political discussion of this autumn considerable attention will be directed toward the condition of our national security. American superiority is unquestioned in many fields. The atomic submarine and the great polar adventures it has made possible are unexcelled. The U–2 incident proved American ingenuity in world observation by man in flight. The development of rocket warfare, however, raises serious doubt about the usefulness of big Navy carriers and the effectiveness of expensive military bases throughout the free world.

It appears that the Russians will place man in space at an early date. On the other hand, there are grave doubts that the highly publicized American astronauts will reach space before their eligibility for social security benefits. If our Nation suffered a lag in space development prior to 1952, it is obvious that the gap widened at a discouraging rate since.

The bitter fact is that the defense lag in America has resulted mainly from administration policies. Defense contracts have frequently been let to provide economic stabilization for industry rather than to fulfill essential defense needs. Large production contracts were repeatedly granted for obsolete military hardware, when production should have been halted with the development of the prototype weapon. Billions of dollars of this obsolete military hardware have been shipped to our bases abroad and to our allies in the free world, frequently to remove the stockpiles of obsolescence from the American scene.

There is no doubt that the grave cost of defense production could be substantially reduced with no impairment to the national security if defense production were founded a little bit more on patriotism and considerably less on profit.

Perhaps the greatest failure of executive responsibility has occurred in the administration of the Department of Defense. Deterioration began with the present administration's call for businessmen in Government. They came with empty brief cases, served for short periods of time, and departed with plush Government contracts. In most cases, they left the Government service with more know-how than they brought in. As they returned to their private corporations after brief periods in the Government service, they brought to their permanent employers experience in the methods of Government procurement and a contact with those in authority to make executive decisions as to who should get the contract.

In Government service, a man cannot serve two masters. He seldom can be loyal and devoted to the Government knowing that his permanent career is with the private corporation which has loaned him for temporary Government work.

However, the deterioration of leadership in the Department of Defense is the most tragic circumstance of all. In this special area we had the right to expect the most from our Executive, particularly in view of his military experience. In this field, where the greatest economies and efficiencies could have been effected, America has been let down. The high office of Secretary of Defense has been bandied around as though it were a small town postmastership. It is inconceivable that anyone could have occupied this vital position without an unflinching obligation to see the job through the President's term or terms. How can responsible administration of Defense result when there have been three different Secretaries and eight different Deputy Secretaries assigned to this task, each with his own policies, each with his own set of advisers, each with his limited experience?

The complete overhaul of the Department of Defense is of the highest priority. The head of the Department should under all circumstances pledge to remain at his post as long as he is needed by the Executive who appoints him. The continuity of command decisions must not be interrupted. Wasteful practices and procurement must be abolished. Contracts must be granted competitively under procedures established by law without abusing the privilege of suspending proper laws through an emergency declaration which has characterized procurement during the past 8 years.

Such production as is needed must be carried on at the lowest possible cost to the taxpayer, using publicly owned plants and facilities as are available. Emphasis must be upon such defense procurement as is truly needed for the defense of America, rather than for the stabilization or the profit of corporations friendly to the administration.

Furthermore, the $4½ billion spent by the Federal Government in research and development which has considerable civilian value, should be made available to all of the productive forces of America. It is not the private property of the defense contractor who was adequately compensated for this work.

CIVIL RIGHTS

The most cherished civil right guaranteed to all citizens by the Constitution is the right to vote. The persistent resistance of some areas of the South to this fundamental guarantee constitutes a tragic blight which must be removed from the American scene.

During the course of this legislative session, I testified before the appropriate committees and frequently debated in support of a meaningful civil rights bill. A working coalition between southern Democrats and midwestern Republicans

collaborated to suppress civil rights legislation as well as other important legislation in the area of education, minimum wage, medical aid for the aged and housing.

In the 2d session of the 86th Congress, it took the mounting pressure of 219 signatures to dislodge this vital legislation from the Rules Committee stranglehold. As a member of the Civil Rights Steering Committee, I was proud to participate in the organization of this effort. If the power of the House Rules Committee is to be restrained, and if a comprehensive human rights program is to develop, it must be done through a revision of the rules of the 87th Congress.

The Voting Rights Act of 1960, which was finally passed, was a watered-down version of our original bill. The new law made it a crime to obstruct the enforcement of a court order relating to voting rights. It also made interstate flight from civil rights offenses a Federal crime. It provided for the retention of Federal election records and in addition provided for the appointment of referees to protect voting rights.

In my opinion, the administration has not exhausted efforts to insure voting rights and to provide equality in housing, or employment opportunities. The reservoir of regulatory power in these vital areas remains substantially untapped. The Federal Government has not attempted to regulate the elimination of discrimination and prejudice in employment, housing and education.

It remains for a new Congress and a new administration to aggressively attack the disease of prejudice and bigotry which weakens America. Fair employment practices and decent housing are certainly as important as voting rights and must be provided for. Intolerance at home must be fought as vigorously as it must be fought abroad.

On this very point any effort to inject religious bigotry into the coming national elections must be as vigorously opposed as we must oppose racial intolerance. It is all the same fight. Forces are now at work to inject religious bigotry side by side with racial intolerance into the coming elections. America must reject such a campaign of hate and repudiate those who foster it.

TAXES: LOOPHOLES AND RELIEF

The crushing burden of State, Federal, and local taxes has become one of the most critical problems of our times. Under our Federal tax system, every increase in salary or wages automatically results in an increase in taxes. During recent years, State and local taxes have had the most precipitous rise to provide our growing population with better highways, better schools, and better cities.

Most outspoken criticism has been directed toward Federal expenditures, most of which are spent for the national security. The great Federal debt of $289 billion results principally from the unpaid balance due on the cost of World War II and the Korean conflict. It is regrettable that wartime profits were not adequately taxed at that time. It is also significant that the debt made an increase of almost $30 billions during the past 8 years. This resulted more from tax loopholes created by the Revenue Act of 1954 than it did from the high cost of the Korean conflict.

Most Americans who complain about Federal expenditures fail to recognize that of the total Federal expenditure of over $77 billion in fiscal year 1960, almost $42 billion were spent for national defense, $3½ billion for the foreign aid programs related to the national security, $2½ billion for atomic energy research, $5½ billion for the cost of services to veterans, present, past, and future. In addition $9.2 billion were spent in fiscal 1960 to pay interest on the Federal debt which had almost doubled from $5.8 billion in 1952 because of administration policies which favored more return on the dollar to the lenders.

Therefore, after $5½ billion had been spent on the farm support program, slightly over $10 billion remained for all of the other important functions of the Federal Government including its frequently criticized welfare programs.

In my judgment the American people cannot expect any substantial Federal tax reduction until our Nation's leadership can develop foreign policies which can permit a reduction in the costly program of national defense and the frequently wasteful program of foreign spending. If world conditions could have permitted a $10 billion reduction in defense spending, the Nation would have been on its way to debt reduction and a more secure domestic economy.

As long as our Nation faces an angry and upset world, and contributes to this international delinquency, there is little hope for Federal tax reduction. For this reason I have diligently attacked tax loopholes and resisted tax reductions for special groups.

Earlier this year, I waged an almost one-man fight against a tax-escape bill which was loaded with benefits for bankers and businessmen doing business abroad. This bill, H.R. 5, in its original form, would have made it possible for a transfer of assets abroad by American corporations without the payment of capital gains taxes to the U.S. Treasury. In addition, this bill would have exempted from taxation the fabulous banking profits of our American banks in foreign countries.

As a result of my efforts, this bill was drastically modified to considerably meet a substantial portion of my objections.

THE MYTH OF THE BALANCED BUDGET

During the coming months much will be said about the balanced budget which was achieved in fiscal 1960. Completely obscured to the public will be the fact that during the past 8 years, $29.4 billion have been added to the Federal debt.

It may be entirely coincidental that budget surpluses occurred in fiscal 1956, 1957, and 1960, conveniently for the national elections involved.

In analyzing the fiscal operations of the Government, the American people should also be aware of the fact that the surplus for fiscal 1960 was in no small part due to the extraordinary contribution to the Federal Treasury by the so-called independent Federal Reserve bank.

In fiscal 1959, when the Nation was facing a $12½ billion deficit, the bank could only make a $491 million contribution. In 1960, however, this contribution was multiplied to $1,093 million. Thus, in order to balance the budget for fiscal 1960 and in order to show a political surplus, the Treasury had to call on the Federal Reserve Board to double its previous contribution. At the same time, heavy defense spending was deferred until July 1, 1960, the beginning of fiscal 1961.

When the true circumstances are brought to light, the 1960 balanced budget will prove to have been a fraud on the American people.

HOUSING AND URBAN TROUBLES

It is no secret that the cities of America are in trouble. The large urban centers of industry, finance, commerce, and culture, which have been the very heartbeat of our country, are suffering from decay and delay. Cities have been neglected at the hands of the rural-dominated State governments. Their tax base has been eroded by the shift of industry to outlying areas, by the loss of business to the suburban areas of population growth, and by the population movement to areas of improved housing and school facilities.

In desperation, the cities turned to the Federal Government for help in a bold and courageous program of urban restoration and preservation. There is no substitute for good housing, good schools, and good living in close proximity to the place of employment. The migration of people away from the areas of employment has more than offset the great gains which the American worker has made in reduced hours of daily work. The average American suffers more frustration and more anguish proceeding to and from his job than doing his daily work. He could enjoy almost one extra month of pleasant living each year, if he could conveniently live near his job.

It is for this reason that urban renewal and preservation of central city life has become a major American problem. The repeated efforts which have been made to continue and expand this program have met with resistance and repeated veto by the President. If a positive step forward is to be made in restoring to the city some of its lost integrity, leadership must be dedicated to the elimination of slums, blight, and the crime which they breed.

It has been firmly established that highway improvement alone cannot meet the problem of transporting large masses of people through urban areas. It will be necessary to develop an adequate Federal program for the creation of a mass transportation system in every urban area.

The only possible way to reverse the trend toward central city abandonment and hopeless traffic congestion is to develop an urban renewal program combined with a mass transportation system. By 1975, 80 percent of an estimated 215 million Americans will reside in our

urban areas. For most Americans this will mean doubling the present transit time to and from work. Unless this problem is immediately approached, by 1975 the average American will spend more time going to and from his job than he spends at work. It is high time for our Nation to concern itself more critically with the problems of the overwhelming majority of the people who now live in cities.

SOCIAL SECURITY—LITTLE CHANCE

Frustrated in efforts to obtain the legislative strength to pass a worthwhile medical care program for the aged as a part of social security coverage, Congress was forced to accept a compromise which merely increased the Federal share of medical care provided by the States to the indigent and to the needy aged not on relief rolls.

Social security recipients, who must work to survive while in retirement, will gain a slight advantage from a new provision in which the earnings limitation is raised from $1,200 to $1,500 annually under a complicated formula. For every $2 earned over $1,200 up to $1,500, the recipient will lose $1 of benefits. If he earns over $1,500, he will lose $1 of benefits for every $1 earned. This provision eliminates the former language under which a recipient would forfeit a month's pay if he earned $1 additional. Another section of the new law removes the age limitation on eligibility for total disability.

The 1960 changes in the social security program are only a small part of the tremendous work that must be done to bring the social security program up to date. In improving medical benefits for the indigent, the legislation serves to provide them with better medical services than the thrifty, low income, near-indigent can afford. The new Congress must make it possible for all recipients of social security to qualify for health benefits in retirement as a matter of earned right, without charity or proof of poverty by prepayment of premium during their working years. In addition, steps must be taken to substantially increase the limitations on allowable income to permit a decent standard of living in retirement. Steps must also be taken to reduce the retirement age of men from 65 to 62.

RUNAWAY FATHERS

During the course of the current session of Congress, I continued in my efforts to revise social security regulations to facilitate the location of runaway fathers. It is reliably estimated that family abandonment costs the taxpayers almost a million dollars each day. There is every indication that these costs will multiply unless steps are undertaken to reconcile runaway fathers to their family obligations. In this connection, I have prevailed upon the Department of Health, Education, and Welfare to liberalize regulations relating to social security records and making them available to appropriate public authorities seeking to locate fathers of abandoned families on public relief.

As result of an article which appeared in the American Weekly magazine of July 24, 1960, discussing my efforts on the runaway father problem, hundreds and hundreds of letters have poured into my office describing the pathetic and desperate plight of countless abandoned families. Some runaway fathers developed a pattern of abandonment, leaving neglected families in several States and then moving on.

The present relaxation of social security regulations facilitating the search for runaway fathers is only a partial solution to the problem. It provides no help for abandoned families who are not public charges and who are attempting to solve their own support problem. In the next session of Congress I will endeavor to initiate and support legislation which will make interstate flight from family responsibility a Federal offense. Only in this way can the integrity of the American family be protected. Only in this way can we hope to save hundreds of millions each year to pay for the neglect of runaway fathers.

TANK PLANT CONTROVERSY

As Congress adjourns, a House Armed Services Committee investigation continues into the circumstances under which the Cleveland Ordnance Plant was bypassed on a recent $35 million defense contract. This inquiry is being conducted at my request after I learned that rigged bidding procedures prevented use of the Cleveland Ordnance Plant although an expensive Army survey recommended the Cleveland facility as being the most desirable and economical. As I predicted, this contract for the construction of the M–113 armored personnel carrier was finally awarded to the Food Machinery Corp., of San Jose, Calif.

On numerous occasions I took the floor to object to favoritism in contract awards. I succeeded in taking my case to the committee for a complete and thorough investigation of this unnecessary waste of taxpayers' money.

It is impossible for me to believe that production of the M–113 vehicle could economically take place anywhere else as long as the Government owned a tremendous and almost fully equipped plant in which the taxpayer already had an investment of $132 million, and which involved a Federal expenditure of almost $1 million each year to maintain it in idleness.

It is impossible for me to believe that a former Assistant Secretary of the Army, now hired as a consultant to the California plant, had nothing to do with this contract. My suspicion was also aroused when I learned that the chairman of the board of the successful bidder was actively participating in the fund raising campaign of a presidential candidate.

Cleveland's loss is California's gain. While the Cleveland tank plant lies idle, perhaps the finest facility of its kind in the world, a far less capable plant in California is bursting at its seams and advertising for the skilled workmen who are abundant and idle in the Cleveland area.

We cannot rest until we restore the Cleveland ordnance tank plant to full productive use, in either public or private work. Cleveland needs the 5,000 new jobs it will provide.

FEDERAL BUILDING FOR CLEVELAND

A $47 million Federal building for Cleveland is finally a reality with site acquisition and planning funds now available through approval of Senate and House committees. Site selection is now under way. By the summer of 1961, construction should begin on the largest building on the Cleveland scene in this generation.

In addition to long-term economies, the public will be better served by consolidating Federal business into one building from the present 33 scattered locations. Service to the public should be improved.

This new Federal building affords another tremendous advantage to Cleveland. It will become the pivot for the development of an adjacent urban renewal project. This should result in the construction of additional office buildings and high-rise residential apartments designed to provide suitable living accommodations for officeworkers who desire the additional living time which urban living permits.

This successful project is the result of the tremendous cooperation between local, State, and Federal officials as well as the unity of the entire Cleveland congressional delegation. I was pleased to have the responsibility of starting this project off in early February 1960 and seeing it consummated within a 5-month period. A fighting, unified congressional delegation can produce untold benefit for a progressive community.

POSTADJOURNMENT PLANS

After the close of this session and until January I shall be available almost daily at my Cleveland office, 506 Federal Building, on Cleveland's Public Square. The telephone number is Cherry 1–7900. My staff and I will be available to carefully consider any special problem or matter relating to the Federal Government. I will try to see personally every person who calls. One of the most important functions of a Congressman is to have personal knowledge of the problems of his constituents. It is also the responsibility of a Representative to translate and interpret the vast and complicated affairs of our Government in the most understanding way to every citizen. It is from these discussions that I learn firsthand of the effectiveness of Federal laws and of their administration.

It is also my intention to attend public meetings in various parts of my congressional district to personally discuss legislative matters with constituents at a time and place convenient to them. If I am to continue to legislate wisely, I must keep in close touch with my community in order to understand its problems. This is the very essence of democracy.

CONDITIONS IN THE POST OFFICES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from West Virginia [Mr. HECHLER] is recognized for 30 minutes.

Mr. HECHLER. Mr. Speaker, I have asked for this time today in order to share with my colleagues a number of communications I have received concerning conditions in post offices, and among postal workers throughout the country.

Mr. Speaker, our Nation was founded on the principle of the dignity of the individual. I am disturbed by the fact that over the past few years postal workers have been frequently made to feel that they are slackers and that somebody has to police them and swing a whip or else they will not do a good day's work.

Postal workers are loyal Americans who are proud of the job they do. Any individual will do a more thorough and conscientious job if he is allowed the initiative and responsibility which contributes to improved morale.

In the name of efficiency, various methods have been installed in many post offices, with the professed objective of achieving more orderly and efficient service to the people. The objective sounds fine. We have had scientific management since the days of Frederick Taylor, and factories, businesses, and administrative agencies alike have benefited from these advances in efficiency. The Federal Government has work simplification programs, and the Bureau of the Budget has been working assiduously to extend these programs throughout the executive branch. This is all very fine—even though I have seen some administrative agencies which must subscribe to a sign I saw the other day: "Think: There must be a harder way to do it."

EMPLOYEE MORALE

Efficiency is an objective toward which every agency must strive. My only point is that when you undermine employee morale in the name of efficiency, you are destroying the very goal you seek. When you spread seeds of suspicion among loyal and hard-working employees, when you force older workers and disabled veterans to meet the same speedup standards as an able-bodied man in his twenties, you are not producing efficiency. No, the result is likely to be resentment. Given confidence and initiative, the average human being will go out of his way to contribute more to do a better job. Postal workers are proud of their jobs, proud of their service to the people of the United States of America, and they want to do a better job. But if you stand over them with a whip, Mr. Speaker, they will gradually lapse in doing only so much as is absolutely required and no more. That is a simple rule of human psychology.

This is the reason why I have raised objections to the so-called "distribution guides system" through which the Post Office Department has attempted, through a complicated set of filled-out forms, to raise the efficiency of the post office. When I voiced these objections, I began to get letters from many industrial concerns who were worried lest I was starting a drive against modern industrial efficiency practices. Nothing could be further from the truth. Private industry has made many long strides with its efficiency programs. I think particularly of a wonderful company in my own congressional district, the Schurman Construction Co. Its president, Al J. Schurman, and its vice president, John Riedel, have frequently talked with me about the fact they hired a trained psychologist, Dr. Madeline Feil—formerly a fellow member of the Marshall College faculty while I taught at Marshall—to work out an efficiency system which took into account the feelings of the workers themselves.

THE POST OFFICE AND HUMAN RELATIONS

It suddenly occurs to me, Mr. Speaker, that what the Post Office Department needs is a trained psychologist—or even a human being with common sense to explain human reactions—to review some of the so-called efficiency plans of the Post Office Department.

Mr. Speaker, in an election year we will hear all sorts of contentions that everything one party does is right and everything the other party does is wrong. I am not one who subscribes to the theory that we had the millennium in every aspect of human life prior to 1953 and we have been steadily going to pot in a hand basket since January 20, 1953—even though this makes an interesting argument. Therefore, I am not in the slightest embarrassed by those who argue that if we have had peepholes in the post offices under Jim Farley and Democratic administrations—and Republican also—for nearly a century, therefore they must be useful items.

Mr. Speaker, on January 18, 1960, I called attention to the presence of these peepholes in remarks to be found on pages 662 and 663 of the CONGRESSIONAL RECORD. On January 25, 1960, some exception was taken to my remarks in data presented by several Members. I believe that the discussion served to put this issue into better perspective. Certainly we need some system to prevent mail thefts and protect the integrity of the mail. The Post Office Department, which appears to have a stake in the peephole system, will constantly call attention to individuals who have been allegedly caught through use of this system. But is it really the best and most effective system for catching criminals?

POSTMASTER BASS AND PEEPHOLES

My colleague, the gentleman from Tennessee [Mr. BASS] who served as a postmaster for 6½ years stated during the January 25 discussion:

I do not think the lookouts or peepholes in post offices serve the slightest purpose because I do not believe there are enough crooks in the postal service to demand the use of such an instrument. I do not think they are used very often. I think the expense of building them far exceeds the value that they perform for the postal service because I do not believe we have that many crooks in the postal service in the United States of America.

Mr. BASS further commented that—

Nothing is more important to the postal service, in my opinion, than the sanctity of the mails.

He went on to add:

However, in stating what I did, I am of the opinion that this really time-worn practice of lookouts is outmoded, because the average employee going into the postal service at the present time is so much under surveillance by his own fellow employees who have also this deep-seated desire to observe the sanctity of the mails, that this business of having an individual look at him through a lookout, in my opinion is unimportant. Every employee of the Post Office Department is a postal inspector in his own right because he is so proud of the institution for which he works that he is going to see that the sanctity of our mail is continuously preserved.

Mr. Speaker, I wish it were possible for me to reveal the full names of everyone who has written to me about the peepholes in the post offices, but so many employees have said that their jobs or their status might be endangered if their names are used publicly. Mr. Speaker, I believe that this fact in itself reveals an unhealthy situation among workers in the post offices. I do not believe that the best working conditions are those in which the workers are seized by fear and limited in their freedom of speech.

LETTERS FROM POSTAL WORKERS AND OTHERS

Mr. Speaker, under unanimous consent I would like to include excerpts from some of the letters I have received:

JENNINGS, MO.,
January 28, 1960.

Representative KEN HECHLER,
Washington, D.C.

DEAR SIR: I read with interest the article in the St. Louis Post-Dispatch concerning peepholes in our post offices.

I have a brother working for the postal department. He had a nervous breakdown in April 1959, was hospitalized for 2 months. He has always complained of being constantly watched at his work. His doctor said it was odd, but he had three other patients from the Post Office Department, with the same complaint. My brother broke down again last December and is now in the veterans hospital.

I sincerely hope you will continue your investigation and bring better working conditions to the postal employees.

Sincerely yours,

RUTH EPPLE.

FEBRUARY 18, 1960.

DEAR REPRESENTATIVE HECHLER: Your remarks in a House speech with reference to inspectors of the Post Office Department are of great interest to me.

We have several inspectors assigned permanently at our post office. Several months ago another group of inspectors were sent to make a general survey. From all indications they will be here several more months. Recently another inspector was assigned to assist one of the local inspectors in the investigation of a "slowdown." Ironically, this investigation of a so-called slowdown was started 1 month prior to the installing of a speedup system which the Post Office Department calls the distribution guides system.

Many employees have come to me and told of being subjected to star chamber type hearings by these two inspectors. They told of being intimidated, threatened, and of coercive methods being used to get them to sign written statements. If the employees being questioned mentioned that they thought the morale was low in the post office, these inspectors did not seem to be interested in the morale of the employees, but would try to force the employees to give the names of employees who were not happy with their work.

These employees who were questioned were told to keep the questioning secret. I know

that many have been questioned but are afraid to tell anyone.

This type of intimidation had created an atmosphere of fear in this post office. I have always had the utmost respect for the postal inspectors in their role of safeguarding the U.S. mail and seeing that regulations are adhered to. The lookout galleries of the inspectors have never concerned me. But many employees fear they are being watched from the inspectors' lookouts, and I wonder if these inspectors' lookouts are being used to observe and listen to employees.

The atmosphere that exists on the workroom floor of this post office is more of what you would expect to find in a concentration camp or prison than what you would expect to find in a U.S. post office. These tactics are no doubt being used in many other post offices. Any assistance that you may give toward eliminating the fear that haunts employees in the post office will be greatly appreciated.

Respectfully yours,

(Name withheld by request).

———, N.C.,
March 29, 1960.

Representative KEN HECHLER,
Member of Congress, House Office Building, Washington, D.C.

SIR: I was pleased to read in the press that the post office peepholes were irksome to you, too. It's a wonder that someone hasn't thought of closed-circuit television cameras over every cashbox too. The main office of our post office has just been air conditioned and because of new air ducts they have had to move and install about another hundred peepholes. What a waste of money and space.

(Name withheld.)

———

———, TENN.,
January 31, 1960.

Hon. Representative KEN HECHLER,
U.S. House of Representatives, Washington, D.C.

DEAR SIR: It is encouraging to see that you are opposed to the practice of installing peepholes for spying purposes in postal installations. I agree with you 100 percent (as do most clerks, carriers, and personnel other than management) that this device is similar to Nazi and Communist tactics. Further, it is an unnecessary expense to the taxpayer.

Of course, I would like for my name to be kept confidential in this matter as the post office has other vicious practices such as placing in an employee's record file a letter attesting to his inefficiency, disloyalty, insubordination, or any other charge that might strike a supervisor's fancy without the employee having knowledge of the charges.

In our post office there are over 50 of these peepholes. When this building was erected the old style rather plain, slotted metal peepholes were installed and were apparently satisfactory until about 3 years ago when they were replaced by the new type. I might point out that new lighting, air conditioning and other improvements were and still are much more greatly needed than peepholes. We have been using green shade reflector lights with 40-watt bulbs over the cases for a number of years. You can understand why a high percentage of us wear glasses.

Yours sincerely,

(Name withheld by request.)

———, Mo.,
January 25, 1960.

Hon. KEN HECHLER,
House Office Building, Washington, D.C.

DEAR CONGRESSMAN: It was with considerable interest that I read your statement relative to peepholes in the post office. Having spent better than 37 years in the post office and visiting many others, I can appreciate your statements. While it is true, as Mr. Harding states, they are designed primarily for watching employees suspected of stealing or tampering with the mails, I have heard employees state they had been warned by supervisors that they should discontinue certain practices as inspectors might be watching. The mere thought of having someone spying on you strikes terror to the hearts of many people and something should be done to correct it. We appreciate your efforts.

Very truly yours,

(Name withheld).

———

———, W. VA.,
January 19, 1960.

Representative KEN HECHLER.

MY DEAR SIR: This morning the Parkersburg News carried an article headed "Swearingen Defends Post Office Catwalk." It seems you have called such a method of deterring evildoers "vicious, un-American, and an insulting spy system." I think you are right.

I am the cleaning man in one of these new post offices, and I was formerly a third-class postmaster. On the first day of each month the postmaster unlocks the door and I can wipe out the cobwebs and dust. Our postmaster is a prince of a man and, while all of the employees know the catwalk is there, we are not made to feel that he doesn't trust us. But who knows what his successor may be like?

My experience and feeling is that postal employees—whether they be inspectors, postmasters, clerks, carriers, or what not—are not deserving of such a secret-police method of treatment.

Respectfully yours,

(Name withheld).

———

———, CALIF.,
January 22, 1960.

Hon. KEN HECHLER,
House of Representatives, Washington, D.C.

DEAR SIR: I hope that this is but one of many letters you will receive as a result of your action on the matter of post office peepholes. These lookouts provided for the inspection service have been a subject of controversy for a long time. In fact, the length of time they have been used without change should cause us to be suspicious of their effectiveness in modern supervisory practices. It is time that a realistic appraisal was made of the results obtained through the means of the "catwalks" and whether their installation and maintenance is justified.

The lookouts are intended for the exclusive use of postal inspectors when they have a jacketed case against an employee or an office. Observations are supposed to be limited to the case at hand. Many postal offenders have been detected and apprehended through the use of the lookouts. Also a greater number of cases have been solved by other means.

Most new employees resent the lookouts because they do not understand their purpose. Gradually they accept them as a necessary evil and pay little attention to the numerous one-way windows and the ever present possibility of secret surveillance. There is little difference between post office lookouts and a "stakeout" as used in police work. However, their presence does have a demoralizing effect on both the employees and the supervisors of the post office.

Postal employees cannot help but feel that the lookouts are necessary because their immediate supervisors lack both the ability and authority to locate and discipline postal offenders. This may have been true at the time when the lookout system was started. Supervisors in the post office are now selected on the basis of their overall ability, consideration being given to their honesty, integrity, experience, loyalty, and those qualities which make them particularly capable of directing men in the best interest of the postal service. A supervisor is responsible for the training, performance evaluation, production, conduct, and discipline of the employees under his jurisdiction. Any condition which would tend to lessen the employee's respect for supervision should be carefully appraised.

Most cases of criminal acts in the post office could be solved if the inspection service solicited the cooperation of the immediate supervisor through the head of the establishment and took advantage of the experience and ability of the supervisor, as well as his knowledge of the personal habits and work status of the employees concerned.

Failure to do this amounts to a bypassing of command which is demoralizing to the supervisor involved. Bringing postal offenders to justice is as much a part of a supervisor's responsibility as it is that of any branch of the service.

The sooner we, as supervisors, are permitted to carry out this important part of our responsibilities the sooner there will be a marked improvement in the morale of all postal employees.

I am pleased that you are taking action and hope that you will take a realistic approach to this matter of peepholes, carefully weighing the costs, both in dollars and morale, against any benefits that may result in continuing this method of law enforcement. I am not satisfied that the lookouts are the best method, and feel that there must be some other and better method of spotting criminal offenders in the post offices.

I will be only too glad to assist your efforts in whatever way I can.

Respectfully yours,

(Name withheld.)

———

KRUSE, OUTCALT & UNDERCOFFER,
Cincinnati, Ohio, January 26, 1960.

Congressman KEN HECHLER,
House Office Building, Washington, D.C.

DEAR CONGRESSMAN HECHLER: I was very interested to read in the Cincinnati Enquirer your charges about the gestapo-like policy of the postal inspectors. I congratulate you on your forthright statements which were certainly very well taken. I have been extremely troubled about the same situation for some time and the matter came particularly to my attention when a very fine client of mine was arrested by the inspectors on peephole evidence. I am enclosing a copy of a memorandum I prepared in this case which I am certain you will find extremely interesting. As indicated in the memorandum this man's case was tried two times; the first trial resulting in a jury which hung, 11 to 1, in favor of acquittal; the second time, the man was acquitted. In spite of this and many, many repeated efforts on our behalf we have been unable to get this man reinstated to the postal service even though he has been proven not guilty and, in fact, found not guilty by 23 of 24 jurors who heard his case.

We have made repeated attempts to do something about this and Congressman WILLIAM E. HESS was most helpful and cooperative but nevertheless no one in the Post Office Department will take any proper action to see that justice is done. It seems that everything you try to accomplish in the Post Office Department on this case runs up against the same blank wall, the fact that no one in the Post Office Department wants to dispute the almighty word of the postal inspectors. I realize a considerable amount

of time has gone by on this but I do feel that you will be interested because of your remarks. If you think that there is anything you can do to see that justice is done in this case I certainly would be eternally grateful for your efforts.

Very sincerely yours,

PETER OUTCALT.

To Whom It May Concern:

On October 31, 1958, Nelson Conner was acquitted by a jury in U.S. District Court for the Southern District of Ohio, Western Division, of charges of theft and embezzlement from the mail. This was at the conclusion of two long and tedious trials. Subsequent to this, Attorneys Peter Outcalt and Harry A. Abrams requested of H. C. Rumble, Regional Operations Director, of the U.S. Post Office in Cincinnati, Ohio, that Mr. Conner be reinstated as a letter carrier and granted backpay.

On January 22, 1959, Mr. Rumble notified Mr. Outcalt and Mr. Abrams that the case has been reviewed by representatives of the Chief Postal Inspector, Washington, D.C., and that a recommendation was made to the effect that Mr. Conner was not to be reinstated in the Post Office Department. This so-called investigation was made, as far as can be ascertained, on the basis of having talked to the postal inspectors who had charge of the prosecution of Mr. Conner's case and it did not include talking to Mr. Conner or interviewing witnesses who testified on his behalf. It is, therefore, felt that the so-called investigation was an attempt by the Chief Postal Inspector to justify the action of his subordinates to wit: the local inspectors for the Post Office Department who caused the arrest of Mr. Conner. Therefore, it is felt that this investigation did not, and could not ascertain all of the facts in the case.

We, as Mr. Conner's attorneys, are setting forth here a résumé of the background of Mr. Conner's employment and subsequent activities in the post office up to, and including the day of his arrest, with the hope that this will result in justice being done to Mr. Conner by leading to his eventual reinstatement with all backpay.

Mr. Conner is married and resides at 4900 Shirley Place, Cincinnati 38, Ohio. He has four children, one of whom graduated from the West Point Military Academy in June 1958, where he was captain of the baseball team. This son is now stationed on active military duty in the Hawaiian Islands. Two of Mr. Conner's daughters attend the University of Cincinnati on scholarships and one daughter is in high school. Mr. Conner was employed by the Post Office Department on October 8, 1928. From that time until the date he was arrested by the post office inspectors, he has been a hard-working and conscientious individual, has lived very modestly and at the time of the alleged offense, had a mortgage on his home and was driving a 1946 automobile. From October 8, 1928, he worked continuously in the Post Office Department in various capacities for approximately 29 years. During that time he bore an excellent reputation and had the respect of everyone in the community including persons associated with him in the Post Office Department, individuals to whom he delivered mail and the people who knew him in the community in which he resided. Just a few months prior to the alleged offense there was a suspicion of mail being rifled at the place of business of one of the customers on his route and Mr. Conner was taken into confidence by the post office inspectors in the investigation of this case. As a result of his cooperation in the investigation, the culprit was apprehended by the postal inspectors. This case where an employee of Bond Clothes, the addressee, was opening and rifling mail matter, was similar to the instant one.

Mr. Conner does not smoke, drink or gamble and is a highly respected member of the St. Peter and St. Paul United Church of Christ.

The alleged offense charged against Mr. Conner occurred on June 18 and 19 of 1957. The post office inspectors were concealed in the lookout in the post office on June 18 and they stated they saw Mr. Conner put two letters in a magazine case which was adjacent to his letter case. These inspectors testified that they thought the letters went into a magazine. It is customary that when letters appear in a letter carrier's mail which does not belong to that particular carrier for him to put the letter aside for the carrier who actually had the route. The particular letters involved in this case belonged on the route of letter carrier, Sam Conover, whose case was directly alongside of Mr. Conner's and it was customary for Mr. Conner to put mail belonging to Mr. Conover's route in the magazine rack between their two cases in order to facilitate delivery of such mail. There was ample testimony in the trial that this was a perfectly proper method of handling the mail and at least one of the Government witnesses even testified that they saw Mr. Conover at one time remove some of this mail from the magazine rack indicating, to any reasonable mind that Mr. Conner's idea in putting the mail in the magazine rack was to get it into Mr. Conover's possession. These two particular letters on June 18 apparently got inside of the magazine inadvertently and the magazine was finally delivered to one Edna Rains, a customer on Mr. Conner's route. Mrs. Rains later saw the letters, which were unopened and not tampered with and she subsequently returned them to the Post Office Department. There is absolutely no question that Mr. Conner had no intention to take the two letters because he certainly could have very easily appropriated them along his route and abstracted the contents. Certainly, one who steals mail would not place it in a magazine and then deliver it to a customer. As indicated before, these letters were intact when repossessed by the Post Office Department.

It was also charged that Mr. Conner took two other letters on the 18th day of June, one of which was found in the misthrow case and one of which was found by a clerk who was resorting mail at night. Neither of these letters was ever found in Mr. Conner's possession.

That night, the postal inspectors prepared four test letters. The next day, namely June 19, 1957, the inspectors again watched through the peephole claiming that they saw Mr. Conner put another letter addressed to an addressee not on his route in his letter pouch. This was one of the test letters. As he left the post office to go on his route he was apprehended by the postal inspectors and taken to their office. He was searched and there was found in his letter pouch, one of the test letters which was intact and unopened and which Mr. Conner claimed unquestionably was inadvertently included in his mail. It must be pointed out that this letter was placed in the mail given to Mr. Conner by the inspectors on the night before. While he was in the inspectors' office, Mr. Conner was searched and during this search there was no marked money, or glue or anything indicating thefts or embezzlement found on his person. After an exhaustive search of his pouch by employees of the postal inspector, one of the test letters which was unopened and had not been tampered with was located in his pouch. The inspector and his investigative aids went over the mail carefully three times but could only locate one test letter. It was claimed that a substitute letter carrier in delivering the mail in the pouch later in the day found the other test letter and returned it to the post office inspector's office. It is the most earnest contention of Mr. Conner that these two test letters must have gotten into his mail entirely by accident. The inspectors themselves overlooked one of the test letters in examining his pouch. There was ample evidence in the trial of the case that such misthrows are an ordinary occurrence in the course of a letter carrier's duties. The evidence showed that Mr. Conner apparently followed his usual custom in regard to the other two letters of putting them in the magazine case where Carrier Conover, got possession of them. At any rate, they were delivered by the proper carrier to the addressee and were intact and not tampered with.

At no time was there any evidence or testimony whatsoever that Mr. Conner had, in his pocket or on his person, any moneys belonging to anyone other than himself, nor was there at any time any letter found in his possession which was tampered with nor opened. Mr. Conner had a locker at the Post Office Department which was never locked and to which the postal inspectors and all other employees of the Post Office Department could always gain access. Mr. Conner, after his apprehension, strenuously denied any guilt although examined practically the whole day long by three representatives of the Post Office Department during which time he was not given permission to call his wife, make bond, or retain an attorney.

Mr. Conner produced the maximum number of character witnesses allowed to him during his trial and has obtained letters from individuals attesting to his good reputation and character. Practically everyone who knows this man in connection with his work as a letter carrier or who has come in contact with him during his civic and church work would be very willing to testify to his honesty, integrity, and good character. All of the evidence introduced in the trial was merely suspicion because no one could definitely state that they saw him take a letter, open one, or have a mutilated or opened letter in his possession. There was never any evidence that he had in his possession the contents of any letter which he handled as a mailman. Mr. Conner is extremely well regarded by the mail carriers in the Cincinnati Post Office and if the rules of court had permitted, many more of them would have been glad to testify on his behalf.

Mr. Conner was actually tried twice, the first jury having been deadlocked 11 to 1 for acquittal and if it had not been for the fact that one of the jurors had fallen from his chair while the jury was deliberating, Mr. Conner would have undoubtedly been acquitted at the first trial. In fact, this jury was so incensed after being discharged that many of the members cried, and some of them even expressed the opinion that a law suit should be filed against the post office inspectors who brought the charge.

A strong indication of the bias and prejudice on the part of the inspectors can easily be seen by the following example. Before the first trial, Mr. Conner was indicted under indictment No. 9345 in which he was charged with embezzling six letters. After the hung jury in the first trial, the inspectors brought in numerous other letters which had been rifled, accused Mr. Conner of having taken them and had him indicted under charge No. 9382 for doing so. There was not one iota of evidence indicating that they were ever in his possession.

During the second trial, the court upon motion of the counsel for the defendant, withdrew all of the counts of the second indictment from the consideration of the jury stating there was no basis whatsoever for

having charged Mr. Conner for such offenses. In the remaining count, the jurors found Mr. Conner not guilty. We have here a situation where two juries at two different times were almost unanimously in favor of Mr. Conner, indicating that a wrong had been done to him and having completely vindicated him as hereinbefore stated.

As a result of the unjust arrest of Mr. Conner, he has suffered considerable financial loss and anxiety and he and his family have undergone a tremendous amount of privation, embarrassment, and discomfort. Although his friends have tried to be of help to him, he has not been able to secure any permanent employment because of his age and he has gone in debt securing the necessary money for his defense and for the maintenance of his family. Now that he has been acquitted he certainly is entitled to reinstatement to the post office where he has spent the best years of his life. We believe that a thorough investigation of all the facts, including an interview with Mr. Conner and his witnesses would show conclusively that his plea for reinstatement is just and proper. It would clearly indicate how baseless and unwarranted the charge was against him. To do otherwise than to reinstate Mr. Conner and give him back pay for the time he has been separated from the postal service would be completely disregarding the American jury system and making a mockery of the civil service regulations under which he worked.

It is interesting to compare this case with one involving the arrest of a water meter reader in Cincinnati by the name of Robert Lyons. He was charged with the murder of a customer along his route and indicted for first degree murder. Although he had previously confessed to this offense, he repudiated that confession on trial and was acquitted by a jury. Being an employee of the city of Cincinnati, the city civil service commission then considered his case and based upon his acquittal, immediately reinstated him as an employee of the city because of the jury verdict. The city civil service commission felt that in view of the finding of the jury, he was entitled to be reinstated.

In this case we have a vastly different situation inasmuch as Mr. Conner has, from the very beginning, denied any guilt and the entire case was built on a group of capricious assumptions made by the postal inspector and his employees. We sincerely believe that the arrest of Mr. Conner was the result of overzealousness on the part of the Post Office inspector, who was attempting to have someone arrested in order to conclude an investigation which was causing him a great deal of trouble. Two juries which heard the case were satisfied of Mr. Conner's innocence and it is certainly not asking too much for the Government to reinstate him to his former position.

Respectfully submitted.

PETER OUTCALT,
HARRY A. ABRAMS,
Attorneys for Nelson Conner.

———, W. VA.,
January 27, 1960.

Hon. KEN HECHLER,
Member of Congress,
Washington, D.C.

MY DEAR MR. CONGRESSMAN: When we officers in the Federal prison service found it necessary to cite an inmate for misconduct there was a space at the bottom of the form for us to indicate whether or not we had advised the inmate that we were "writing him up." And, if we were to answer that question negatively the writeup was disregarded by the officials—because they felt that the inmate was entitled to know that we had initiated action in his case. Contrariwise in the postal service where they are dealing with respectable citizens instead of convicted criminals, there isn't 1 instance out of 100 when the employee is acquainted with the fact until he is in receipt of a letter from the postmaster. Even though the foreman has observed the activity of the employee and decided to write details of that observation to the postmaster, in most instances the employee is wholly unaware of any such until he receives the official letter from the postmaster.

Both the Post Office Department and the Federal prison service are parts of the same Federal Government and it seems ridiculous to accord a convicted criminal more consideration than is accorded a respectable citizen.

Yours respectfully,

(Name withheld).

———, CALIF.,
January 1960.

DEAR SIR: My heartiest congratulations to you on your exposure of post office peepholes. I am a post office employee and for obvious reasons I cannot sign my name. After all, Drew Pearson might be hiding in your filing cabinet.

The alibi that the postal inspectors use is that the peepholes are necessary to catch dishonest employees. That's plain nonsense. I know most of the several hundred employees here in the post office and not a one of them would put as much as a 4-cent stamp in his or her pocket. I've seen them pick up stamps that have come off letters and put them in a box that we have for that purpose.

A POSTAL WORKER.

PORTLAND, OREG.,
January 24, 1960.

Representative KEN HECHLER,
Washington, D.C.

SIR: A men's room into which the notorious spy peepholes peered was converted into a women's room. From the buzzing conversation among the women at the time, which I could not help overhearing, since I "swept" the mail sorted by the women sorters, they had no assurance that these peepholes were not being literally "manned."

Sincerely,

(Name withheld).

———, W. VA.,
January 22, 1960.

DEAR SIR: I am a postal clerk at the ———, W. Va., post office and I was once disciplined for an infraction of the rules that could have been observed only from the "peepholes." Of course any shirking of work observed from the peepholes is not ignored. Why should it be?

For obvious reasons I cannot disclose my identity.

(Name withheld).

———, MICH.,
January 22, 1960.

HOUSE OF REPRESENTATIVES,
Washington, D.C.
(Attention Representative HECHLER):

The following is submitted for informational purposes relative to peepholes.

This device installed in ceilings is approximately 30 inches by 18 inches, 8 to 10 inches in depth; has a one-way view mirror, costs from $41 to $45 per unit to the post office and a prime vendor is Metal Products Co., Ferrysburg, Mich.

(Name withheld).

———, GA.,
January 1960.

Hon. KEN HECHLER,
House of Representatives,
Washington, D.C.

DEAR SIR: Thanks so much for speaking up for the postal employees in regards to the peepholes. I know of no other business that stoops to such low tactics.

Most post offices are small. There are about 70 men that work in the one I work in and we have three wheels who watch at all times to be sure we stay busy. Each route at all stations is more than 8 hours long and so you have to keep on the ball to even get most of your route done each day. There is no time to "goof" off, but as usual most bosses think that is the only reason we even work for the Government. They can't seem to realize that it is also our country that we are working for. And they are also employed by the same Government as supervisors, not slavedrivers.

Sincerely,

(Name withheld).

CHARLESTON, W. VA.,
January 19, 1960.

Representative KEN HECHLER,
Washington, D.C.

DEAR SIR: I read your article in today's paper, and being a postal worker I enjoyed it. Peeping is only one of many things they do to us. Sometimes I believe if the Russians took over our country, they wouldn't treat the postal employees any worse than we experience at present.

Sincerely,

(Name withheld).

OJAI, CALIF., *January 19, 1960.*

Hon. KEN HECHLER,
Member of Congress,
House Office Building,
Washington, D.C.

DEAR SIR: I have been wondering when someone in Congress would comment on the practice of the Post Office Department, in requiring lessors of new post office buildings to provide "inspection galleries," with peepholes and one-way observation panels in all new construction. According to an article on UPI wire, as published in today's San Francisco Chronicle, I see that you have taken issue with this practice.

I can tell you something about it. As a trustee of the Ojai Civic Association, I have been connected actively with the construction of a new post office building, which we are leasing to the Government for 10 years. When we got the specifications on which we made our successful bid, we were astonished to find in them a clause describing the inspection gallery with its appurtenances. Since this post office is to serve a small city of 4,000 population, in which nearly everybody knows everybody else, and, of course, all the post office employees, we felt that this was an insult to them, and a reflection upon their integrity, and it met with universal disapproval among our citizens.

Nevertheless, it had to be, so we had our architect design accordingly. This meant that we had to increase the proposed ceiling height, construct the gallery, and provide the expensive lookouts, and so forth, required, with the net result that we had to increase our bid and rental to compensate, by over $6,000, thereby adding 8.6 percent (or more) to the cost of construction.

Now, I maintain this: that even if petty peculations by post office employees were to go undetected for a long time, it would take a lot of dishonesty to offset the additional cost of the building; furthermore, in a small community like ours it insinuates that our respected and loyal fellow citizens, who work for the Government, are potential crooks. I think that the blow to their self-respect far outweighs the protection, so expensively gained. It may be necessary—and probably is—in a large metropolitan area, but I question the policy in small towns, for in the long run we all pay for it both in trust and taxes, or revenue.

I wish you luck in your investigation.

Yours sincerely,

JOHN A. DRON, Sr.

———, ARK.,
January 22, 1960.

Representative KEN HECHLER,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE HECHLER: As the wife of a postal employee I was interested in the article which appeared in the Thursday morning, January 21 edition of the Commercial Appeal (Memphis, Tenn.) relative to the peephole policy of the Postal Department and your move of an investigation of same.

My husband served in the Army during World War II and was cleared for handling security documents; he worked with the Corps of Engineers and handled estimates of thousands of dollars; yet in his work with the Post Office Department he never knows when he or his work is being scrutinized by a "Peeping Tom." Who peeps on the "Peeping Tom"? Is he entrusted with security documents? Are his estimates valued at thousands of dollars?

Being a member of the fairer sex I should be ashamed to admit that maybe some of the "girls" are not above suspicion in the postal department, but no one peeps on them, well, the men I know who are connected with the postal department should be and are so far as I know, entirely above suspicion.

Another point that I would like to bring out here is that actually when they do the work to which they are assigned, they have little time to pry into pieces of mail. At our local post office they are so afraid that the boys will cost the Government for services that they do not render that someone is always piling work on them before they can finish their regular job even if you have to clock out to finish it on your own time. At the present time my husband is handling the civil service work, gratis, yes, he has to work up his own programs and give them on his own time because it was a policy established by the post office, but no means of recompense was established at the same time. I admit it is a service to humanity and to our fellowmen, but when the Corps of Engineers give a service to humanity in the high water fights, the boys are paid for overtime.

I suppose you, as I, wondered in your childhood why the postal buildings were so tall, well until our affiliation it escaped my knowledge that such a waste of space as you see in 20- to 25-foot ceilings is all to accommodate the "peepers." Such a waste in materials in construction and such a waste in upkeep might trim some from the budget.

Another thing, why don't you see that it is published that the funds from the post office go into the general fund and then the public harps on the cost of postal service.

Any other Federal agency that I know anything about has a break in the shift for coffee, statistics prove that you work more efficiently when this is an established policy, but the poor postal clerk must be on the alert all the time, he never has time to have a cup of coffee, unless someone brings it to his window for him to drink and then the supervisory personnel thinks this might not add to the dignity of the office, so unless you are a city carrier and duck in someplace for a quick cup, you dare not stop because the peeper might be there.

Postal employees are human just as the rest of us, for the most part they are honest people trying to make an honest living, and although they don't get the breaks most Federal employees think of as a part of their job, they try to make the best of the situation, but it certainly does not add to a harmonious working condition to know that in doing your best, some Peeping Tom might not approve of your method of handling the work.

The Arkansas scheme for dispatching the mail requires that you know about 1,000 towns and the method of mail service each has—with the thought of someone watching you sort the mail it is a little disconcerting and yet if you make a mistake you are called on the carpet? How many peepers as well as how many other people could sort the 48 States if someone were looking or you had the feeling someone was looking and it isn't always the women who have the intuition that gives them the suspicion.

We hope this investigation will make for righting some policies which undermine your morale and will create more favorable working conditions in more harmonious situations.

Sincerely,

(Name withheld).

———, FLA.,
January 22, 1960.

Representative KEN HECHLER.

DEAR SIR: I read your article in the newspaper about postal "spying" and I can say that it really was the correct title for it. I have been in the Government service and in the Post Office for the past 34 years, and I can tell you that the majority of postal employees resent this underhand Russian-type method that is used.

Their comeback that they caught about 50 Christmas help stealing by this method was amusing to me. I don't know if you knew why this happened, but I can tell that during the Christmas rush this office hired men to work in the post office they didn't know anything about them. They were just cheap labor to use, so that they would not have to work the regulars and pay us overtime. Every year the postal service does this, and then they come out with a sweet letter telling you that the mail increased 40 percent, and they appreciate the good work of the regulars in getting the mail out during the holidays. The morale in the post office is the lowest in history, and if the authorities keep on treating the employees like this it will get lower. We are the lowest paid Government workers, and I doubt if we even get a raise this year.

Each year we handle more mail with less help, and we are allowed less overtime, due to the use of scab labor. I am hoping that Congress will do something about this. Another thing they use regular subs for as many hours as they want, but I feel and our union feels that everybody should be paid 1½ for all hours over 40 hours, but so far Congress has not done anything about it. Thanking you again for putting this Gestapo method before the public of the way the post office spies on all their faithful employees.

Sincerely yours,

(Name withheld.)

DEAR SIR: I have read an article in the newspaper concerning a statement you made in regards to peepholes in post offices as being "vicious, un-American, and insulting." I congratulate you, sir, and wish we had more that thought the same as you.

I am an ex-postal clerk and I want to tell you that you have only touched the surface on the slave-labor working conditions under which a sub postal clerk earns a living. I started in the employ of the Post Office Department in July of 1956 and quit in April of 1957. A total of 10 months. During those 10 months I never worked with a more discouraged group of men in my life. To prove my point—when I started, I started with a group of 32 men and when I left there were 14 left. This was better than average. Average amounted to about 50-percent quit rate in 6 months. I would like to list a few of the regulations under which a sub postal clerk works.

He can be worked 12 hours a day; 7 days a week. During those 12 hours he is allowed a half an hour to eat. He has to punch a timeclock and is allowed no more than 6 minutes over 30 minutes. During that time he is allotted to eat, he has to ride an elevator to the basement, stand in line for his food, eat, and then ride the elevator to the third floor.

Contrary to all labor and Government laws he is not paid any overtime for hours worked above 40 hours a week.

Getting back to those peepholes. These peepholes are all over. Even in the restrooms. The toilets are not partitioned for this reason but are lined up open as if for cattle. Besides these peepholes being everywhere there are supervisors in every aisle keeping constant watch. Everybody is given a number on a card and as you are moved from place to place this number is your name.

The sub clerk is given a different time every day to report and he does not know it till about the time he leaves the previous day. When he reports for work he usually works 6 hours till he is permitted to eat. He then returns and works 6 more hours without a regulation break if he is needed. He also can be compelled to report for work and work only 2 hours for 2 hours' pay for a day. There also is a regulation that states that only an 8-hour break is required from the time you leave your job till you are to report again. For instance, and this had happened to me and others, you start to work at 12:30 p.m. and work the following day till 1 a.m. You then are told to report for work at 9 a.m. the same day for another 12 hours. Remember that you are standing most of this time. If you decide you want a coke, you can get and drink it at the coke machine, but you are not allowed to sit down.

As you are working under these conditions you are given schemes to study on your own time. Now these schemes are pretty rough because you can imagine learning every street in the St. Louis area for zones besides your own scheme for carriers in your zone which are constantly changing.

I hope that I am not making this letter too long but these are just a few of the grievances connected with that job. Some of the others that are there but which I will not go into detail are: The arrogance and Hitlerite attitude of some supervisors. Having to buy, rent, or make your own equipment to study with. How you are written up for forgetting your badge one time, etc.

When I left the post office the last day (I put in 12 hours from 6 p.m. to 6:30 a.m. the following day), I felt as I laid that badge on the counter like a man would have felt, I am sure, as if he was let out of prison.

I went to work for the Air Force the following Monday and I couldn't help but wonder how the same Government that I was working for now ran the Post Office. It was as different as night and day.

When I worked for the Post Office I wrote the postmaster of the city of St. Louis and told him that a sub clerk job was a disgrace to the U.S. Government and I still believe it. Thank you for your time, sir.

RICHARD A. VOGEL.

ST. LOUIS, MO.

———, OREG.,
January 26, 1960.

Representative KEN HECHLER,
House of Representatives,
Washington, D.C.

DEAR SIR: In the Portland Oregonian Sunday, January 24 there was an article "Democrat Raises Rumpus on Postal Peephole Cost." It was, of course, concerning you and your wanting a peek at the post office's budget for peepholes. Well, I'm not a Democrat, but in this instance I'm with you.

——— opened its new post office just a few days ago. Inasmuch as my husband is a letter carrier, we watched the progress while it was under construction. One day it was far enough along so that we could go in. It was all very nice—but what were those cupboard-like corridors with windows at intervals (these windows have special glass, too).

My husband told me they were for spying. I could hardly believe my ears. Such things were done in medieval times, but this is 1960 and the United States.

I really doubt that the general public knows that post offices have peepholes. If so, why hasn't something been done about them. It seems to me the peephole budget could be eliminated and the money put to a much more honorable and better advantage—namely, a postal pay raise. I would really like to know just how many of those on the peephole committee could exist on less than $300 a month? We have to—and on it raise a family, buy food, clothing, etc. And let me tell you it really hurts when there are medical, dental, and drug bills.

Anyway, more power to you, and I hope you get a peek at the budget for peepholes. I, too, would like a peek, but I know I'd just froth at the unfairness of it. Ask them why the peephole system isn't used in banks where we do hear about robberies and pilfering. And I doubt that a bank employee is checked on as closely as a postal employee before he is hired—and on top of it they have to be spied upon—what a slap in the face that is.

Sincerely,

(Name withheld.)

PANAMA WARNS UNITED STATES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Pennsylvania [Mr. FLOOD] is recognized for 30 minutes.

Mr. FLOOD. Mr. Speaker, a United Press International dispatch from Panama City, Panama, dated August 30, 1960, quotes Foreign Minister Miguel A. Moreno, Jr., as warning the United States that it must act promptly on Panamanian demands to fly the Panama flag over the Canal Zone "if it wishes to avoid new violence."

Events on November 3 and 28, 1959, when Panamanian mobs attempted to invade the Canal Zone, clearly show what did happen on two previous occasions, precisely as predicted by me far in advance.

Unless this threat is met with adequate action by our Government, we are due for more trouble at Panama. If the Panamanian Government is unable or unwilling to restrain radical elements in Panama from organized violence such as that which occurred last November, the United States should warn Panama publicly that any future efforts to invade the Canal Zone will be repelled.

But more important than this attempt for political blackmail by Panama is the statement by Foreign Minister Moreno that Secretary Herter, in recent bilateral talks with him in San José, "accepted the flag claim of Panama but did not give any assurances."

That, Mr. Speaker, is a shocking revealment of moves yet undisclosed to the people of the United States, which require the full spotlight of public scrutiny. Does this acceptance mean that the Secretary of State has come to an agreement with the Minister of Foreign Affairs of Panama to fly the Panamanian flag over the Canal Zone? Because of its potential significance, does it mean that the Secretary of State will recommend to the President the formal display of the Panama flag over that strip of U.S. territory after the Congress adjourns? Until the statement of Foreign Minister Moreno is denied or clarified by the Secretary of State, the sovereign people of the United States and their Congress must assume that the stage is set for further surrenders at Panama.

Mr. Speaker, the Committee on Government Operations is now engaged in an inquiry into subversive influences in the Department of State with respect to the conduct of our isthmian policies. The indicated UPI dispatch supplies further evidence of the necessity for such inquiry into the operations of our State Department, which has completely demonstrated its inability or unwillingness to defend our isthmian policies against Bolshevist-inspired attacks.

The people of the United States have become tired of such attempts at political blackmail. They demand that we stand up for our treaty-based rights and policies with respect to our constitutionally acquired territory of the Canal Zone and terminate what has been an era of pusillanimous surrenders at Panama.

The indicated UPI dispatch as quoted in the August 31, 1960, issue of the Washington Post follows:

PANAMA WARNS UNITED STATES ABOUT FLAG

PANAMA CITY, PANAMA, August 30.—Foreign Minister Miguel Moreno tonight warned the United States it must act promptly and fly the Panamanian flag over the Panama Canal Zone "if it wishes to avoid new violence."

Moreno spoke to a crowd chanting nationalist slogans calling for Panamanian sovereignty over the Canal Zone. Moreno was hailed for reasserting Panama's rights to the zone at the San Jose Foreign Ministers' Conference, particularly the flag demand.

The foreign minister said U.S. Secretary of State Christian Herter, in bilateral talks, accepted the flag claim of Panama but did not give any assurances.

PANAMA INTRIGUE: CONGRESS MUST INVESTIGATE

Mr. FLOOD. Mr. Speaker, on numerous occasions I have addressed the House on the crucial subject of the Caribbean. The location of that vast sea on one of the great crossroads of the world, because of the Panama Canal, gives it the highest strategic importance with respect to the security of the Western Hemisphere, which has been marked for conquest through the paralyzing method of Communist subversion.

How far has this program for conquest progressed? Already the drive for control of the Caribbean is well advanced, with Cuba, on the northern flank of the Atlantic approaches to the Panama Canal, a Soviet captive, and Venezuela, on the southern flank, a center for subversion. These form a double pincer movement with the Panama Canal as the key target.

In Panama radical elements, fanned by well-trained Communist mentors, have focused their efforts on worldwide agitations to obtain recognition of Panamanian sovereignty over the Panama Canal and Canal Zone, with the display of the Panama flag over the zone as the crucial issue. In addition, the Panama Government has made official request of the United States for such display.

When this demand became known to the people of the United States, thoughtful citizens instinctively recognized that, in view of recent history, such display would be tantamount to flying the red flag of the Soviet Empire over United States territory. They deluged the Congress with letters from individuals and resolutions from organizations voicing strong opposition to surrendering to that extortionate demand.

The first result of this opposition was passage by the House of House Concurrent Resolution 459 on February 2, 1960, after a notable debate, by the overwhelming vote of 381 to 12. The purpose of this measure was to prevent such display unless authorized by treaty.

Later, on February 9, the House adopted the Gross amendment to the Department of Commerce appropriation bill, which provided that no part of its appropriation should be "used to construct a flagpole, platform, or any other device for the purpose of displaying the flag of Panama in the Canal Zone, the sovereign control of which is vested in the U.S. Government by virtue of longstanding treaty."

Could anything, Mr. Speaker, be clearer as to the intent of the Congress, which under our Constitution is representative of the sovereign people and of the States, than these actions? I think not.

Notwithstanding their clear import, agitations continued in Panama, especially in the Spanish language press, for recognition of Panamanian sovereignty over the Canal Zone and for formal display of the Panamanian flag as evidence of that sovereignty. This, coupled with a discreet silence on the part of the Department of State and opposition to corrective measures in the Congress, clearly indicated a determination on the part of subordinates in that Department to recommend flag display to the President.

So obvious was this determination that I addressed the House at length on June 23 urging that our isthmian policies be defended against Bolshevist attack and quoted State Department letters which confirmed my suspicions as to its intentions.

In fact, so shocking were these letters quoted in my address of June 23, that on two subsequent occasions I warned the House that, after adjournment, the State Department would recommend display of the Panamanian flag over the Canal Zone in violation of the intent of the Congress. In addition, I wrote the Secretary of State on June 30, 1960, apprising him of essential facts and serving notice that should the flag of Panama be displayed over the Canal Zone with the knowledge of his Department that Members of the Congress would press for his impeachment. Also, I wrote to the chairman of the Committee on Government Operations urging an immediate investigation of the Department of State to identify what, in effect, has been a treasonable influence on the conduct of our isthmian policies.

Published in a brief statement to the House on July 1, 1960, these letters have evoked many favorable comments from people in various parts of the country

and Members of the Congress. The latter support, Mr. Speaker, I am particularly gratified to report, comes from members of both major parties.

Among the revealments growing out of publication of these letters was information to the effect that the late Secretary of State Dulles, subsequent to the 1956 Suez crisis, issued an order to the Caribbean area directing that no officer of the State Department discuss the surrender of U.S. sovereignty over the Canal Zone or in any way equate the situation at Suez as a precedent for Panama. I promptly wrote, on July 7, 1960, to the Secretary of State requesting a copy of this order of Secretary Dulles.

On July 14, 1960, the Secretary of State, in reply to my first letter, evaded the crucial question presented. He stated that he would be guided by the "same concern for national interest and constitutional responsibility" which governs all—his—activities as Secretary of State. Thus, his reply merely deferred the answer one step.

Hence, on July 20, I addressed the Secretary in another letter inquiring whether his concern required him to maintain the unquestioned sovereignty of the United States over the Canal Zone or does it permit him to authorize or allow the display of the Panamanian flag there as a symbol of Panamanian authority.

Again I assert that from the official record it is clear there are subversive influences in the Department of State which are aiding and abetting Soviet penetration of Cuba and the entire Caribbean area, and Panama itself. All of this is with the purpose and intent of divesting the United States of any control over the Panama Canal, the overthrow of the Monroe Doctrine, and the establishment of Soviet satellites throughout the Americas.

Mr. Speaker, the fires of communism are burning fiercely in the Caribbean regions. How can anyone who really desires to quench the conflagration be so naive or complacent as to believe that this can be done by adding the combustible of the display of the Panamanian flag as evidence of Panamanian sovereignty over the Canal Zone? And how, Mr. Speaker, can anyone in authority in our Government be so naive or complacent as to fail to realize that such action would inevitably be accepted by Panama and so regarded by the world at large as the first step toward Panama's ultimate goal of nationalization of the canal?

These questions, Mr. Speaker, are of such transcendent consequence, not only to the United States but also in this hemisphere, that they cannot be ignored or evaded. They present investigatory problems to the Congress of the highest importance to our national security.

In order that all the correspondence on this subject in my possession may be easily available to the Congress and the Nation, I quote the letters above referred to as follows:

JUNE 30, 1960.

Hon. CHRISTIAN A. HERTER,
Secretary of State,
Department of State, Washington, D.C.

DEAR MR. SECRETARY: As shown by documentation in my address to the House on June 23, 1960, copy enclosed, it is clear that subordinates in your Department are determined to engage in the treacherous act of raising the Panama flag over the Canal Zone contrary to specific provisions of an act of this Congress and in violation of our treaty rights.

On two subsequent occasions, I have warned the House of Representatives that promptly after Congress adjourns your Department plans to recommend to the President that Panama be allowed to fly its flag over the constitutionally acquired domain of the United States known as the Canal Zone. These assertions have not been denied.

Accordingly, in view of the failure of your Department to recognize our Nation's legal position, I am writing you to give notice that should a formal display of the Panama flag over the Canal Zone be made with the knowledge of your Department, Members of the House, who are clothed with constitutional authority in this regard, will press for your impeachment.

The Congress is representative of the sovereignty of the people under our Constitution and the members of your Department are their employees.

With assurances of my highest personal regards, I am,

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

JUNE 30, 1960.

Hon. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The determination of subordinate elements in the Department of State to authorize a formal display of the Panama flag over the constitutionally acquired territory of the United States known as the Canal Zone has been announced and commented upon on the floor of the House without denial from that department.

Because wresting control of the Panama Canal from the United States is a prime Communist objective for the takeover of the Caribbean area and for discrediting the United States in the eyes of the world, any such position is evidence of subversive influences in the Department of State, because it is in disregard of authority conferred upon that Department in administering our treaty obligations.

Enclosed herewith is a copy of my address to the House on June 23, 1960, and a copy of my letter of June 30, 1960, to the Secretary of State.

Because of the seriousness of the situation at Panama, I urge you as chairman of the Committee on Government Operations to start an immediate investigation of the Department of State to identify the persons responsible for what, in effect, has been a treasonable influence on the conduct of our Isthmian policies.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

JULY 7, 1960.

Hon. CHRISTIAN A. HERTER,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: Since publication in the CONGRESSIONAL RECORD on July 1, 1960, of my letter to you of June 30, I have been reliably informed that, in 1956 subsequent to the Suez crisis, the late Secretary John Foster Dulles issued an order to the Caribbean area to the effect that no officer of the State Department was to discuss the surrender of United States sovereignty over the Canal Zone and Panama Canal or in any way to equate the situation at Suez as a precedent for Panama.

Because of the bearing that this order may have on the Panama flag matter, a copy of it is respectfully requested.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

THE SECRETARY OF STATE,
Washington, D.C., July 14, 1960.

Hon. DANIEL J. FLOOD,
House of Representatives.

DEAR MR. FLOOD: I have your letter of June 30, 1960, in which you refer to the problem of whether the United States will accede to the request of the Government of Panama that its national flag be flown in the Canal Zone.

In fulfilling my responsibilities in this matter I shall be guided by the same concern for national interest and constitutional responsibility which governs all of my activities as Secretary of State.

Most sincerely,

CHRISTIAN A. HERTER.

JULY 20, 1960.

Hon. CHRISTIAN A. HERTER,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: Your letter of July 14, 1960, relative to flying the Panama flag in the Canal Zone I must consider as evasive of the question presented. It merely defers the answer one step.

Therefore, may I ask: Does your "concern for national interest and constitutional responsibility which governs all of (your) activities as Secretary of State" require you to maintain the unquestioned sovereignty of the United States over the Canal Zone or does it permit you to allow the flag of Panama to be authorized or permitted to be displayed there as evidence of Panamanian sovereignty? And this in defiance of the action of the Congress and the House of Representatives (Gross amendment and H. Con. Res. 459, 86th Congress).

This matter is of such consequence that it does not admit of evasion.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

DEPARTMENT OF STATE,
Washington, D.C., August 3, 1960.

The Honorable DANIEL J. FLOOD,
House of Representatives.

DEAR MR. FLOOD: I acknowledge the receipt of your letter of July 20, 1960, addressed to the Secretary, in further reference to the matter of the United States displaying the Panamanian flag in the Canal Zone.

It is the policy of this Department to protect the rights which the United States enjoys under the treaties in force between this country and the Republic of Panama, and any decision that may be taken in the matter of the display of the Panamanian flag in the territory of the Canal Zone in evidence of Panama's titular sovereignty with respect to the Zone will be in accord with that policy.

Sincerely yours,

WILLIAM B. MACOMBER, Jr.,
Assistant Secretary.

AUGUST 29, 1960.

Hon. CHRISTIAN A. HERTER,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: I have received State Department letter of August 3, 1960, signed by Assistant Secretary William B. Macomber, Jr., concerning the display of the Panamanian flag over the territory of the Canal Zone.

If this is your reply to my communication of July 20, I must consider it is another evasion on this subject. It is again not responsive to my query. Moreover, it furnishes further grounds for belief that subordinates

in your Department are not wholeheartedly in accord with the historical policy in this matter indicated by congressional actions.

In this regard, international Socialist elements are believed to be exerting their influence to weaken the sovereign status of the United States in international affairs.

Our position in the Canal Zone under treaty is strong. This must not be changed to one too weak for the defense of this strategic territory against Bolshevist attack. Our present Isthmian policy must not become diluted through the efforts of Socialist groups.

Congress has evidence that one of the most powerful Socialist organizers in the world today is attempting to affect or control our agencies of Government. Two distinguished labor leaders have challenged this radical leadership and charged that we are being led to positions out of step with traditional American labor aims.

The files of our Government from 1942 onward will enable you to identify the organizations and personalities concerned with attempts to stir up trouble in Panama. Unhappily, the information will show that native American organizations are not guiltless in the attempt to injure U.S. military power.

The display of the Panama flag over the Canal Zone without a modification of our treaty agreements with Panama would, as you must know, be one of transcendent consequences. As such, it does not admit of evasion in your position with the Congress.

In these general connections, it is vitally important for the Congress and executive departments always to bear in mind the following considerations: first, that the United States is bound by treaty with full responsibility for the maintenance, operation, sanitation, and protection of the Panama Canal, and that the Canal cannot serve two masters; second, that any diminution of this authority must inevitably weaken the ability of the U.S. Government to meet its objections in the premises; third, that the open and avowed declaration of policy of the Panamanian Government is the ultimate nationalization by Panama of the Canal; and fourth, that the official display of the Panama flag in the Canal Zone would not be the last step to satisfy Panamanian demands, but the first for such nationalization.

Sincerely yours,

DANIED J. FLOOD,
Member of Congress.

And now, Mr. Speaker, I insert at this point an article from the first page of the Panama City Star and Herald for Friday, August 26, 1960, with headline "Moreno and Herter Holds Private Talks."

MORENO AND HERTER HOLD PRIVATE TALKS—SESSION FOLLOWS SPEECH—PENDING PROBLEMS REPORTED TOPIC OF CONFERENCE

(By Carlos Sole Bosch)

SAN JOSE, COSTA RICA, August 25.—Foreign Minister Miguel Moreno, Jr., of Panama, met privately with U.S. Secretary of State Christian A. Herter last night.

The conference followed Moreno's speech before the Organization of American States in which he warned that U.S. delay in meeting Panama's demands for the raising of its flag in the Canal Zone is contributing to tension between the United States and Panama.

There was no official announcement on the topics discussed between Moreno and Herter. But sources close to the Panama delegation said the Foreign Minister and the Secretary of State discussed matters related to problems pending between the two countries.

In addition to the flag question, Moreno referred in his speech before the Foreign Ministers to another problem which he said contributes to tension between the two countries. This is the double scale of wages in effect in the Canal Zone which Moreno charged works to the detriment of Panamanians employed there.

Panama's claims for the display of its flag in the Canal Zone as recognition of its sovereignty have been intensified since last November 3, when the Independence Day celebration was marked by an attempt to carry the flag into the Canal Zone. The attempt resulted in a clash between the Panamanian demonstrators and Canal Zone police and U.S. Army troops at the boundary line.

The November 3 incidents resulted in a visit to Panama by Under Secretary of State Livingston Merchant as presonal representative of President Dwight D. Eisenhower. After a series of conferences with Panamanian officials, Merchant issued a statement expressing official recognition of Panama's "titular sovereignty" over the Canal Zone.

The Panamanian Government has had pending before the State Department for the past 8 months an official request for the display of the Panamanian flag in the Canal Zone. In his speech before the OAS conference yesterday, Moreno said Panamanians are hurt by the delay by North American authorities in heeding the express will of the Government and people of Panama that the Panamanian flag be raised regularly in the Canal Zone "as a living symbol of our sovereignty in that strip of land of the Panamanian nation."

Moreno also noted in his speech that President Eisenhower already was on record as favoring a "visual evidence" of Panama's sovereignty in the zone.

The Panamanian Foreign Minister has received more than 200 congratulatory messages from Panama and Costa Rica for his address. The San José newspaper, "Prensa Libre" said today that Moreno "stole the show with his vigorous pronouncement." Similar praise was expressed by other Costa Rican newspapers.

Moreno also has received cables of congratulation from a number of Panamanian organizations in the capital, Colon, David, Chitré, and Puerto Armuelles. Among these are the Lions Club, the first department, the Association of Professors, the Association of Chiriqui Newsmen, and the Union of Brewery Employees. Numerous personal messages also have arrived for Moreno.

PROGRESS REPORT ON CLASSICS OF AMERICAN DEMOCRACY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. O'HARA], is recognized for 60 minutes.

Mr. O'HARA of Illinois. Mr. Speaker, today as the 86th Congress nears the end, I think to take an honored place in the legislative history of our country, I have asked, and graciously by unanimous consent my colleagues have granted me, time to present another progress report on the program known as the "Classics of American Democracy," and which it was my great honor and distinction to offer for the consideration of the Congress and of the U.S. Information Agency on behalf of a distinguished group of my constituents and other Chicagoans of outstanding stature.

This is a program to win the hearts and the minds of people everywhere. Its amazing success, I would say its unprecedented success, has in my opinion been the most significant development in our changing world in recent years. It is based upon our faith that the classics of democracy that gave inspiration and guidance to the Founding Fathers of our own United States would have, if translated into native languages and made available at grassroots, an influence no less profound on the thinking and on the political soul-searching of the men and women whose destiny in this generation, as was that of our forefathers in their generation, is to preserve the independence newly come to them in a fabric of government as pure as the mind and heart of man can weave.

WAR OF IDEAS AND PHILOSOPHIES

At this moment, more than ever before perhaps, the American people are aware that economic and military means are not sufficient in the worldwide battle for the minds and hearts of men. Important as our economic aid programs are, and important as are the alliances, of which the United States is the main bastion, they have not by themselves sufficed fully to engage the energies of the free world on behalf of the ideal of human dignity and a world order under the rule of law. The cold war remains a battle of philosophies, a war of ideas.

A great weakness of the free world remains the fact that it has had no common or universal fund of political doctrine. Most of the great works of democratic political thought, produced from time to time in the various countries, as it were the bible of democracy, have not in fact been available in other countries and other languages. This includes not only works originating in America but works originating variously throughout the modern Western World.

ORIGINATED BY CHICAGO GROUP IN 1954

On several previous occasions I have discussed this question before the House. In 1954, I presented studies which established these facts and presented a plan, originated by a committee of my constituents, for action by the U.S. Information Agency to remedy this appalling lack. In this advocacy I was very proud to have the powerful and thoughtful support of the Chicago Daily News and the Christian Century.

Too much credit cannot be given to that small group of dedicated Chicagoans. It is no exaggeration to say, and the report of progress I am about to make will bear me out, that in the development of the program of its conception has come one of the great vital forces of our times.

Members of the Chicago group were Dr. Jerome Kerwin, chairman of the Charles R. Walgren Foundation, University of Chicago; Dr. Harold Fey, executive editor, Christian Century; A. T. Burch, associate editor, and Van Allen Bradley, literary editor, Chicago Daily News; Dr. Richard P. McKeon, professor of philosophy, University of Chicago, and State Department visitor to the universities of India; Emery T. Filbey, vice president emeritus, University of Chicago; John McGinnis, president, Pennsylvania Lodge 225, Brotherhood of Railway Trainmen; and Thomas B. Stauffer, of the faculty of Wilson Junior College.

Mr. Stauffer has a rich background of experience in the foreign service. The fact that nowhere were such classics of democracy as "The Federalist" available in translated editions, and at grassroots,

made a deep impression on him. The more he mingled with peoples in foreign lands and found none who had knowledge of the classics of democracy that had inspired our forefathers, the greater became his wonder and bewilderedness.

At the time he assembled the Chicago group at its first luncheon, "The Federalist" had been translated into only one language, and that edition was out of print.

Mr. Stauffer has been invaluable and indispensable to the Chicago committee, to the U.S. Information Agency, and to me in the pursuit of his vision to the reality of great accomplishment, as will appear as I continue in this report of progress.

OUTSTANDING PUBLIC SERVICE IN JOURNALISM

The reports in the Chicago Daily News from its foreign correspondents in all parts of the world did much to alert the American people and to stir their interest. These reports showed that books on democracy nowhere were available at grassroots while Communist literature was everywhere. I have said before, and I think it should be repeated, that in the publication of these reports from correspondents of recognized authority the Daily News performed an outstanding public service.

Likewise, the Christian Century, with its wide and influential circulation, made large contribution to building popular demand for a program directly to reach and win the hearts and minds of people by imparting to them that faith in democracy that comes only from understanding.

POLL OF REPRESENTATIVE AMERICAN LEADERS

In 1957, I was able to report to the House that, partly in response to the overwhelmingly favorable results of a poll which I had undertaken of representative leaders of opinion throughout the country the classics of democracy program had been adopted as part of the policy and plans of the U.S. Information Agency.

The responses I received from the representative Americans, of whom I had requested suggestions in compiling a list of classics of democracy, to constitute as it were a bible of American democracy, were very thoughtful, informative, and illuminating.

I have from time to time reported on the progress and uniform success of the Agency carrying out this plan, especially since the Agency has been under the vigorous leadership of Ambassador George Allen.

Last year I presented on April 8, a very extensive report of the success overseas of this program as conducted by the Agency. I now will present further reports from the Agency and from the public overseas.

SIGNIFICANT FACTS THAT STAND OUT

These reports, I think, establish three significant facts: First, the continued successful activities of the U.S. Information Agency. Second, the fact that the idea of the classics has been so successful that other agencies in addition to the U.S. Information Agency have entered the field. And thirdly, that, as the sponsors of the program long ago predicted, the treatment of the free world as a philosophical and moral system rather than as a military or economic power group, has rallied to itself some of the best and most active minds in the various countries.

To the first point, the report of the Agency and the number of books produced under its sponsorship and their sales, speak sufficiently. There are also a variety of reviews and comments, or various classics publications, from various countries.

FIRST ARABIC EDITION OF FEDERALIST

The second point requires amplification. There is now for the first time in any Asian language—now for the first time after nearly 200 years, now in the decades when the historic peoples of Asia are seeing the results of adapting Western technology to strengthen the life of their own rich cultures—now at last for the first time in any Asian tongue, there is a complete edition of "The Federalist Papers."

"The Federalist Papers," next to the Constitution itself, are the most marvelous and the most characteristic intellectual product of America. A full text has now been produced in Arabic. This publication is so new that I do not as yet have any figures of sales or any reviews or comments.

But the important facts about this edition are two: the publisher and the translator. The publisher is Franklin Publications, a commercial venture which as I understand it is operated by a consortium of American publishers with the explicit purpose of making American books of all kinds more widely available abroad. The procedure as I understand it is that Franklin recommends a list of likely titles and those desirable for each country are selected by a distinguished panel of leaders of opinion in each of the several countries.

The "Arabic Federalist" was produced in this way and I understand that both "The Federalist" and others of the classics titles will in due course be produced in a variety of Asian countries. I think it is of historic importance that commercial publishing has found it expedient to have its action concur with the long-term objective which the classics program of the U.S. Information Agency has sought to advance.

TRANSLATOR OF THE ARABIC FEDERALIST

I said that the second feature of this edition which deserved comment was the translator. The great danger and the secret defeat of a large-scale translation program is that the words and thoughts of great geniuses should be defaced and obscured by routine translators who understood neither.

Franklin Publications have by their integrity and prestige secured for the Arabic Federalist, a man who is a worthy colleague of the original author. Jamal Mohammed Ahmed, the translator, is an intellectual and political leader in his own country, a man of considerable reputation as an orator and stylist, in a language which prides itself on its poetic power. He was educated in economics and political science in England and in English. He is now one of the senior diplomatic officers of the Sudanese Republic and has had a leading role in its achievement of nationhood.

As an African his words will be heard throughout that continent; as a Moslem his words will be heard from the pillars of Hercules to the volcanoes of the Philippines. It should be a matter of pride to all Americans that anyone with his active and responsible role in the modern world should find the time or think it an important service to his people to translate and comment thoughtfully upon some 172-year-old articles from the daily papers of New York City—namely, "The Federalist Papers."

WORLD RESPONSE TO CLASSICS' STIMULATION

The third aspect of the progress of the classics on which I propose to report was the extent to which the opinion forming elements in the various countries had responded to the stimulation of the philosophical classics of democracy, and had themselves begun to propagate these ideas.

We must be respectfully aware that the result of such advocacy of philosophical democracy is not, either necessarily or in the short run, any simple-minded alinement with or advocacy of the policies or the culture of the United States. It is rather the development of a climate of world opinion in which peace and the rule of law will become possible while each of the many historic cultures maintains its own individuality.

Nevertheless, and taking special account of his distinguished position, in two of the great cultural matrices of mankind, we may feel especially pleased that Jamal Mohammed Ahmed, the translator of the "Arabic Federalist," has thought fit to recommend that "The Federalist Papers" be universally used in the high schools.

It has not been convenient to obtain a verbatim translation of the introduction by Jamal Mohammed Ahmed to "The Federalist" but I have in his own words a skeleton abridgment which states as its concluding point:

CONCLUSION

"Federalist" as a specimen of original sources Arab readers need today; the many points of contact between the development of American nationalism and Arab nationalism.

A proposal that "The Federalist" be included in university syllabuses of political theory; selections of it to be read in secondary schools in classes of training for citizenship. Reasons given briefly.

APPEAL OF FEDERALIST IS UNIVERSAL

It is one of the historic distinctions of "The Federalist" papers that in every generation and in every country, since its publication, the constitutional, the orderly, and the moderate among those who are active in political life have turned to it for both inspiration and practical devices.

We have one of the most striking examples of this in the correspondence of Thomas Jefferson. As U.S. Minister to Paris and as a friend of James Madison, he had been among the first in Europe

to receive a copy of the first edition of "The Federalist" in book form. We have his own account of how he read passages of "The Federalist" to the Compte Mirabeau and to constitutional moderates in the French Revolution and how they worked together to produce the first French translations in 1789.

Modern parallels are not lacking. One of the great human forward stride of mankind of the postwar years is the establishment of independent states for the people of Africa. It is reported, on what authority I am uninformed, that when the committee of the new West African nations met to debate the possibilities of a West African or General African Federation there was mention of "The Federalist" and a desire expressed that each member might have a copy to study as a guide in the attainment of an African Federation built on the pattern of our American federation.

As chairman of the African Subcommittee of the Committee on Foreign Affairs, I am deeply interested in the new emerging nations of that continent. I was pleased to hear that The Federalist was proving helpful, and hope that the report given me is accurate.

CLASSICS MAKE UNPRECEDENTED RECORD

Mr. Speaker, here is the record up to March of 1960, the classics of American democracy that have been printed in foreign languages, the sizes of the editions, the sales prices. Considering that at the time the program first was proposed by the distinguished Chicago committee there was no available translation of even "The Federalist" in a single foreign language, it is an unprecedented record of accomplishment:

Foreign editions of classics of democracy

	Language	Edition size	Retail price

Language, Arabic (Beirut).
Number of copies published, 3,000.
Date of publication, 1957.
Number of copies sold, 2,000.
Retail price, £2.50 ($0.80).

2. Dewey, John, editor: "Living Thoughts of Thomas Jefferson":
Language, Indonesian.
Number of copies published, 3,000.
Date of publication, 1959.
Number of copies sold, 2,000.
Retail price, 20 rupiah ($0.50).

3. Dewey, John, "Human Nature and Conduct":
Language, Farsi.
Number of copies published, 2,000.
Date of publication, 1956.
Number of copies sold, 2,000.
Retail price, 70 rials ($1.75).

4. Dewey, John, "Reconstruction of Philosophy":
Language, Arabic (Cairo).
Number of copies published, 3,000.
Date of publication, 1958.
Number of copies sold, 1,900.
Retail price, 30 piasters ($0.85).

5. Dewey, John, "Reconstruction of Philosophy":
Language, Farsi.
Number of copies published, 2,000.
Date of publication, 1958.
Number of copies sold, 2,000.
Retail price, 60 rials ($1.50).

6. Hamilton, Jay, Madison, "Federalist Papers":
Language, Arabic (Beirut).
Number of copies published, 1,500.
Date of publication, 1959.
Number of copies sold, —.
Retail price, £10.00 ($3.10).

PUBLIC RECEPTION OF TRANSLATED CLASSICS

Mr. Speaker, I heartily congratulate and warmly commend the U.S. Information Agency for the rapidity and the efficiency with which it has moved in the translation and the distribution of the classics. My congratulations and commendation also go in full measure to the Franklin Publications and other private publishers.

But what has been the public reception of these classics once they were translated and made available in native tongues? That is the test of how well or how poorly the sponsors of the program judged. Here is the record, furnished me as of March of this year:

USE AND EFFECTIVENESS OF "CLASSICS OF DEMOCRACY" PUBLISHED ABROAD UNDER THE USIA BOOK TRANSLATIONS PROGRAM

FRENCH EDITION, "THE FEDERALIST PAPERS"

Since the question of federalism has become a political issue of basic importance in West Africa, interest in "The Federalist" is high in that part of the world. In Dakar, e.g., copies of the French translation of the American Constitution have been widely distributed among political leaders, and the local USIS mission reports that the U.S. Information Center in Dakar has six copies of the French edition of the "Federalist Papers" in constant circulation and considers it one of the most useful books in the collection. Especially during the framing of the Mali Constitution, the book proved to be of great value to Government and political leaders.

In Europe itself, the French translation of "The Federalist" continues to serve as a beacon for political and information leaders concerned with the question of European integration. E.g., a very laudatory review appeared in the April 1959 issue of the German monthly "Der Föderalist" which particularly praises "the brilliant introduction by A. Esmein." A review in the "Bulletin Critique du Livre Francais," March 1958, has this to say: "This series of articles published in the United States in 1788 is rightly considered the most pertinent analysis of the federal system. It is fortunate that at a time when so many dream of federalism, this book can be welcomed in Europe, and particularly in France."

Lastly, two statements made by persons prominent in the European integration movement:

"I believe one can but appreciate the timeliness of this new edition because, basically, 'The Federalist' is a classical text, in its way as irreplaceable as 'The Spirit of the Law' or 'The Social Contract.'" (Pierre Duclos, professor of international relations, Paris.)

"In reading this classic of federalism, which this book is, you notice quickly that, despite all differences, the experience of the 'Fathers' of the American Constitution provides us with a source of inspiration and enrichment." (Alexandre Marc, Belgium; author; director general of the International Center for European Reconstruction; vice president of the executive committee of the European Federalist Movement.)

GERMAN (AUSTRIAN) EDITION, "THE FEDERALIST"

In the German-speaking world, the Federalist Papers, in a highly praised German translation, continue to have an impact on persons interested in constitutional questions and the vital issue of federalism. This is reflected in the reviews which have appeared in the German, Austrian and Swiss press. The Neue Zurcher Zeitung, one of the most influential European dailies, called it a masterwork of political world literature (NZZ, Oct. 23, 1958), while one of the leading German papers, the Suddentsche Zeitung (May 9–10, 1959), pointed up the usefulness of this book to responsible citizens of the German Federal Republic: "This isn't the place to enumerate the wealth of stimulating ideas. But we should say that a serious study of these essays will help, help more than any other political writings, in understanding the tasks our state faces as well as those that reunification will bring with it. Everyone who wants to concern himself with matters concerning our Federal Government should consider this book compulsory reading." And as influential a journal as the Vienna monthly, Wort und Wahrheit, wrote in its May 1959 issue, in part: "Nowhere has the principle of federalism as a restraint on the exercise of power been more effectively demonstrated than in the United States; and up to our day, it has not found advocates more capable than the authors of the 'Federalist Papers.' These essays are, as shown by a survey of recent writings, not only of considerable importance to the theory about federal government, but they also provide instructive insights into American political thought. Above all, every discussion about federalism * * * will have to go back to this collection of essays because everything worth saying about democratic federal government is said therein."

IMPACT OF "THE FEDERALIST" IN ITALY, FRANCE AND GERMANY

One of the results of the availability of the "Federalist Papers" in foreign languages has been that it has helped in stimulating the study of American constitutional

thought and of the question of federalism. Indeed, in Italy the publication of "The Federalist" has produced something like a chain reaction, making possible various courses and seminars, as well as the publication, in Italian USIS-assisted translations, of such volumes as "The Growth of American Thought," by Merle Curti, Corwin's "The Constitution and What It Means Today," and "Studies in Federalism," edited by Bowie and Friedrich. Special seminars on "The Federalist" have, for example, been held in Rome in July 1956 and, on a national basis, at the University of Pavia in March 1958. The proceedings of the Rome seminar were published last year in a volume entitled "La Nascita degli Stati Uniti."

In France, USIS Paris assisted in November 1957 in arranging a seminar for French students and young adults on "Federalism in Theory and Practice," using the French Federalist as a basic text. Similarly, it has served, in German, as text for a semester-long seminar on federalism given at the Free University Berlin during the spring of 1959.

PORTUGUESE (BRAZILIAN) EDITION, "THE FEDERALIST"

Typical of the reception given by scholars and political leaders to the Portuguese edition of "The Federalist Papers" is a lengthy review which appeared in several papers in Rio Grande do Sul area last July, written by Paulo Brossard de Souza Pinto, State Deputy in Rio Grande do Sul and professor of law, stating that this book "has not lost its actuality" and that "it is a classic of political and constitutional bibliography," Professor Brussard goes on to say: "In Brazil a version of 'The Federalist' of unknown authorship appeared more than a century ago. This was in the remote year of 1840 when the regency was terminated and the assembly, with Antonio Carlos at its head, declared the majority of young Pedro II. Now, after so much time, Editora Nacional de Direito has published a new edition of 'The Federalist,' this famous book that Ruy (Barbosa) called a reservoir of immortal lessons in the science of constitutions" (Correio do Povo, July 14, 1959).

VIETNAMESE EDITION, "THE FEDERALIST PAPERS"

This translation came out in June 1959 in an edition of 2,000 copies of which, 8 months later, all but 400 copies have been sold. This is considered a most unusual success for this type of material in Vietnam.

LINCOLN SESQUICENTENNIAL

The publication and sale of books on Lincoln during 1959—the year of the Lincoln sesquicentennial—clearly reflected the tremendous significance of his life, utterances, and writings to the growth of democracy throughout the world. During 1959 alone, 23 editions of books by and on Lincoln, totaling 292,000 copies, were published overseas under the Agency's translation program, with many others, published previously, still in print.

Particularly noteworthy among these is an Arabic translation of the "Lincoln Reader" which was published in Damascus, Syria, in an edition of 4,000 copies (at a retail price of 84 cents per copy) and was sold out within 6 weeks; a second edition, published completely at the Syrian publisher's own expense, was more than half sold some months ago. This same publisher, considered Damascus' most active, also released in 1959, with USIS assistance, a 6,000-copy Arabic edition of a Lincoln biography for young readers and added this comment, as quoted in a report from USIS Damascus: "It is enough to know that each of these books sold more copies than any other I published in 1959."

In preparation for the Lincoln Year, a 5,000-copy translation of Carl Sandburg's "Abraham Lincoln: The Prairie Years and the War Years" was published in Vienna with USIS assistance. A preface for it was written by the Honorable Dr. Heinrich Drimmel, Austrian Federal Minister of Education, in which he stresses that Lincoln's "House divided speech" is today as applicable to the whole world as it was, in 1858, to the Union. After having read this biography in its German edition, the renowned German novelist, Frank Thiess, wrote to its publisher: "Whoever reads this book will know more about America than a hundred contemporary reports could tell him; and if he understands it properly, he could know as much about America as if he had lived there for many years. I place this biography published by you above all others I've read in recent years."

An indication of the impact of classics of democracy—be they in form of biographies or translations of original writings—can be found in these sentences from a Bengali review of a Lincoln biography by Sterling North: "Abraham Lincoln's name is a symbol of equality, freedom, and national solidarity to all the people of the world. * * * It is but too well known that Lincoln * * * was the first man to try to establish real democracy in the world. * * * The study of any biography of Abraham Lincoln is a must, especially for the people of newly developed countries like Pakistan. * * * As a citizen of a newly developed country, I now realize how precious his ideals can be to the people of my country. * * * May the translators' efforts enable the people of this country to follow the ideals of Abraham Lincoln and enrich their personal life as well as that of the nation." (Markin Parikrama, Dacca, Feb. 1, 1959).

BOOKS BY AND ON JOHN DEWEY IN KOREA

John Dewey is one of the best known philosophers and educators in Korea and his works are exerting a profound influence on Korean educational thought. Next to the authors of the world's great novels, few writers are as widely translated and read in Korea as John Dewey. The total number of copies of the six books by or on Dewey which have to date been published in Korea with or without Agency assistance amounts today to over 30,000; one USIS-supported title, "Freedom and Culture," has gone through five printings in the past 5 years. Dewey is regarded by Koreans as America's greatest thinker, and his influence on Korean life is so varied as to make accurate evaluation of all its effects impossible. The Korean translation of his book, "Experience and Education," is used as a text at the largest women's university in Korea, while Irwin Edman's "John Dewey," containing selections from all his major writings, is widely used as a text in several Korean universities. The Dewey centennial in January 1960 was widely observed throughout Korea.

Characteristic of the high esteem in which John Dewey is held in Korea as a force working toward the adoption of democratic ways is this paragraph from which an article which appeared in the January 1960 issue of the periodical Sasangge (The World of Thought), written by Professor Hyung-chin of Sookmyung University: "John Dewey * * * has played as great a role as the ancient, storied Augustine, Aquinas, Bacon, Descartes, Locke, and Comte. * * * It is a fact that the North American Continent will play a central role in world civilization for at least several generations to come. Dewey, who, following Jefferson, Paine, Emerson, and James, greatly influenced the growth of America's civilization, is indeed a giant star shining over the 20th century." Similarly, the dean of the Graduate School of Ewha Women's University of Seoul, wrote in the October 1955 issue of Saikyoyook (The New Education): "We should modestly try to learn from Dewey. We kneel down before him and gladly accept his teachings. Only in this way, I believe, will Korean education be able to enjoy a renaissance and advancement in the future."

CLASSICS OF DEMOCRACY IN SPANISH EDITIONS

Spanish translations of the classics of democracy have enjoyed success throughout the Spanish-speaking world. It is believed that some titles, written over a hundred years ago, were translated into Spanish for the first time through USIS initiative. The authors and the titles of their works have long been familiar to many Latin Americans, especially those active in the fields of law and political science. Translations of American and European works in these fields often refer to these classics, but they were only available in the original.

Prepublication interest in the works of Locke, Hume, and Thoreau caused the first printings to be raised from 10,000 to 25,000 copies. It is expected that these editions, for which USIS has only preliminary sales reports, will go out of print within a year of publication date. They will be welcomed in all Spanish-speaking political, legal, and university circles. No reviews have yet appeared and few are expected, since classics, even when they do appear for the first time in Spanish, are seldom reviewed.

Ralph Gabriel's "Selections From the Federalist Papers" ("El Derecho de Gobernar") was an immediate best seller in Latin America. The then unheard-of edition of 10,000 copies was sold out within a few months of publication. Its immediate success was partially due to the interest centering around the 1957 Argentine constitutional reform debate which coincided with its publication. Appearance in an inexpensive format was considered of such major importance that some newspapers treated it as a news item rather than relegating it to the review page. The title has been out of print for 2 years and USIS is presently negotiating with the publisher to arrange for a 100,000-copy low-price edition destined to retail at 15 pesos (about 18 cents).

FRENCH EDITION, "THE SPIRIT OF LIBERTY"

The French translation of Learned Hand's "Spirit of Liberty," published in Paris in 1957, has made a profound impression on French readers. This is, for example, strongly reflected in many of the reviews which discussed this modern classic of democracy:

"The extraordinary fame of the author in the United States is exemplary and helps to understand the country. Learned Hand is an eminent judge, a profound humanist, a great citizen, a man of great learning. This book is a message which reaches beyond all frontiers, addressed as it is to all those who are concerned with the future of human values" (Echo de Tourami, May 7, 1958).

"Individual pages of his belong already among those of the breviary of democracy, in the most lofty sense of this word" (Echo Républicain, Feb. 21, 1958).

"He touches upon the whole existence of a people, and in reading this book you gain a vivid image of the United States—an image as diverse as life itself and far removed from the clichés which are much the prevalent" (Republique du Centre, Feb. 26, 1958).

"The figure of the author comes to life in these essays, and he * * * becomes a symbol of that moral inspiration which animates the best spokesmen of the American community" (Bibliography Bulletin of the National Institute of Education, Paris, December 1958).

John Dewey's "The Public and its Problems," published late in 1958 in an edition of 15,000 copies, was an immediate sellout.

Sandburg's "Lincoln—The Prairie Years and the War Years," published in late 1957, while having relatively poor sale, has been a critical success. While it deals with a well-known subject, the fact that it is the original presentation of a major writer caused it to be well reviewed. On January

19, 1958, the daily Clarin proclaimed "Lincoln" to be "a great book, by a great poet, about a great man." Clarin later followed with two special reviews in the Sunday supplement sections of July 20 and August 25, 1958. Ficcion, the important literary bimonthly, presented a three-page review in its March–April 1959 issue. La Prensa devoted two-thirds of its Sunday supplement literary page to a well-illustrated review of Sandburg's "Lincoln" on February 9, 1958.

In addition to Sandburg's work, USIS Buenos Aires succeeded in placing a special Spanish-language edition of McNeer's "America's Lincoln" which was published in 42,000 copies and was sold out within weeks through bookstores and kiosks throughout Latin America.

PRESS OF FREE WORLD ACCLAIMS CLASSICS

Mr. Speaker, since the start of the classics of democracy program the press of the free world has been filled with editorials such as those I now bring to the attention of the House, reading from translations that Mr. Theodore R. Jaeckel, Acting Chief of the Translations Branch of USIA's Information Center Service, graciously has furnished at my request:

TIN MOI, SAIGON

ON THE CONSTITUTION

When a nation is founded, its main structure is its constitution. As a man should have a skeleton, a nation should have a constitution in order to support itself. It is thanks to her Constitution that the present United States of America can be a powerful country holding high the torch of democracy and freedom.

When the United States recovered her independence and was drafting her Constitution, Messrs. Alexander Hamilton, James Madison, and John Jay had in turn written for several months to analyze, explain, and discuss each article of the American Constitution. They endeavored to convince the American people to adopt their new Constitution. Up to now their essays still are valuable documents for the politicians.

The book "On the Constitution" is the translation of the aforesaid essays and as Vietnam is advancing on the path of freedom and democracy, this book is a very precious document for those who are interested in the executive and legislative questions.

[From Bulletin Critique du Livre Francais]

FRANCE

(Hamilton, A., Jay, J., Madison, J.)

The "Library of Federalist Texts and Studies," the aim of which is to revive the concept of federalism, has chosen to inaugurate its work with the series of articles which were published in the United States in 1788 and which are rightly regarded as the most searching analysis of the federal system.

The success achieved by this book is well known; it was translated into several languages and published in France by Gaston Jèze and A. Esmein. It is fortunate that at a time when many dream of federalism this book should be available in Europe and particularly in France; it is to be hoped that it will find the widest possible audience.

MY OPINION ON THE PUBLICATION OF "THE FEDERALIST"

(By Pierre Duclos, chairman of courses at the Institute of Political Studies of Paris, professor at the Institute of Higher International Studies and at the International Institute of Studies and Diplomatic Research)

I don't see how we can do otherwise than appreciate the reissuing of this work, for "The Federalist" is fundamentally a classic test, as irreplaceable of its kind as the Spirit of Laws or the Social Contract.

The French version had been out of print for many years. I still remember the precautions taken, 30 years ago, by the librarian of the faculty of law when he would place in your hands the only copy, tattered, unstuck, practically in pieces, which the faculty owned. I still wonder what has become of this relic.

In other words, the new edition published by the U.E.F. which was wise enough to select the excellent version by G. Jèze with an introduction by A. Esmein, together with a preface by a well-known specialist on American matters, is extremely timely. Once again the French public will have the opportunity to acquaint itself with this classic work well known to former generations of practicing lawyers.

For my part, I agree completely with the laudatory comments about this publication which were carried by the Revue Francaise de Science Politique.

ABOUT A RECENT PUBLICATION

(By Alexander Marc, author, professor at the University Institute of European Studies in Turin, director-general of the International Center of European Formation, vice president of the Central Committee of the European Federalist Movement, and member of the Belgian Center for the Study of Problems of European Sociology and Economy)

Out of print for many years and finally republished in the collection of federalist texts and studies, the famous work by A. Hamilton, J. Jay, and J. Madison, "The Federalist," has astonished those not already familiar with it by its quality of great timeliness.

Of course, the problems now confronting the European nations differ greatly from those which were faced almost two centuries ago by the Thirteen States of North America. Nonetheless, in reading this classic of federalism, we become rapidly aware that, despite all the differences, the experience of the Fathers of the American Constitution remains for us a source of inspiration and enrichment.

In the course of my own work, I have frequently had cause to observe how the example of the American States struggling toward unity enlightens and encourages the militants of the European movements.

Let us pay homage to this work, which belongs to the heritage of mankind.

ISRAEL

From Freiheit, Tel Aviv, January 7, 1960 (Alexander Hamilton, James Madison, and John Jay, "The Federalist"):

"For the ordinary educated man it is no shame when he finally becomes impatient and demands to know, what is 'The Federalist'. It treats of the 85 articles in which the three authors try to convince the three States in which each resides to accept the newly written but not duly ratified Constitution. The 85 articles appeared in three newspapers under the pseudonym 'Publius' from October 1787 to May 1788. In penetrating style the pros and cons of the Constitution and the Articles of Confederation are carefully weighed. Opponents of the Constitution are politely and seriously treated and the refutation is underscored by discussing historical documentation on practical grounds and theoretical considerations.

"One can call special attention to the fact that there is not a single demogogical statement in the articles. These authors who, on the one hand, drew on expert knowledge and created a treatise on the theory of the federal state, but on the other hand, had to convince themselves as well as their readers that this form of government guaranteed manifold benefits for the future."

AUSTRIA

From Austrian Law Review, Vienna ("The Federalist," by Alexander Hamilton, James Madison, John Jay):

" 'The Federalist' up to now has not been completely translated into German—in the English language it was last read in C. Van Doren edition—and had therefore hardly any influence on the study of law in the German speaking areas. The present complete edition in German makes it now possible for every student of government, politics, or history to familiarize himself with the contents.

"Ermacora, as the editor of the work, has also written a valuable introduction. In it he sketches the historical development of the alliance between the English colonies in North America, the Declaration of Independence and finally the creation of the Constitution, the adoption of which Hamilton, Jay, and Madison recommend in their articles. Finally, however, and this should be especially noted, Ermacora, using 'The Federalist' as a basis, examines four theoretical problems of fundamental importance; he shows thereby that this published work not only is of political-historical importance but that its theoretical value is conveyed to the reader, as a direct connection is established between the legal problems and the presentation of the authors."

GERMANY

From South German Newspaper, Munich (Hamilton, Jay, Madison: "The Federalist," edited by Felix Ermacora, German translation by K. Demmer, Manzsche, publisher, and University Bookstore, Vienna, 496 pp., 32 German Marks):

"In his little book about the 'Spirit of America' Golo Mann comes to the decision that the United States of North America is the greatest development that the genius of European statecraft has produced. The difference between here and over there has been artificially created; it does not make sense. The first German edition of the 'Federalist Papers' reminds one of this thesis in a double fashion, first, because, the three authors by each sentence and with each page draw from an honorable inheritance from antiquity and European sources, and, secondly, because this German edition of the 85 articles now appears 170 years after their original publication.

"They were printed in New York newspapers during 1787 and 1788 and in the same year came out in book form. German language literature about these basic works on state and constitutional theory composes less than a dozen titles of which the majority was published in the third quarter of the 19th century. The 'Federalist Papers' appear to have been forgotten by then and the Constitution of the United States disappeared from the German consciousness as the citizens in the new German state felt superior compared to the American citizens living under this great experiment in government. The United States was the land where disgraced relatives were sent when they became a nuisance to their families. Thereby the 'Federalist Papers' could have given an answer to a very pressing German question of that time—the transition from a confederation of states to a federal state.

"The America Confederation of 1777 reserved to the individual States all rights except those considered as common defense, welfare, and individual freedom. The Continental Congress appealed to the States for support in their decisions but were seldom upheld. This occurred often as local interests took priority over the common good, and by 1787 in Philadelphia an agreement to support a Congress and an executive office was entered into. The creation of a Supreme Court was the final work of the Convention.

In order to convince the citizens of New York State of the need for this Constitution, Hamilton, Jay, and Madison wrote their articles—and the results were full and complete.

"If one asks about the reasons for the success of these political articles, one must mention their excellent style of writing. The opposition to the Constitution concedes defeat, and the reader feels as though he is in a position as judge and jury. He takes over as a conscientious citizen a position guaranteed to him. The 'Federalist Papers' associate the common names of 'federal', 'state', and 'democracy' and with all the theoretical tests the discussions concerning the citizen and the state are well aired.

"The innumerable ideas that one can mention are not too important. However, what can be said is that our primary task, the union of our country, can be better understood if one will deeply study these articles.

"Everyone in the country who is connected in any way with Federal problems should make this book required reading."

From Echo of the Times, Recklinghausen (Ruhr):

"'The Federalist': Two disciplines are assisted: With this reference work the German language edition of the 'Federalist Papers' the historian is aided in his research, since these articles by the North American legislative historian derive from the most reliable sources and the historian's task is made easy.

"Additionally, this work serves also the political scientist, for here the American parliamentarian of the classical period for the first time attempts to present the outline of a theory of the Federal state which further attempts to distinguish the points which separate the Democratic and the Republican Parties. The 'Federalist Papers' not only leads to the founding of the political parties in the United States, but Alexander Hamilton, James Madison, and John Jay have in their incisive articles presented to the people of New York a constitutional theory which in turn grew from a federation of States to the present (Federal) United States of America.

"It is humorous to read that the problems of the American Founding Fathers were practically the same which bother us here today including, for example, details of freedom of the press (p. 475). For the issuance of these articles we are thankful to Felix Ermacora as well as the publishing house."

BRAZIL

From Correio do Povo, Porto Alegre, Brazil, by Paulo Brossard de Souza Piuto, professor of law, University of Rio Grande do Sul:

"After the 4th of July 1776, which marked the independence of the 13 British colonies in North America proclaimed by the Congress that extra-legally had met in Philadelphia, the Congress took steps to decide under what ties the new States should live together, especially concerning foreign affairs. From this effort resulted the Articles of Confederation, a document approved a year later but which, because of the resistance of Maryland, had only entered into force in 1781. Experience, however, early showed that the confederative system did not meet the common needs. Anarchy, insecurity, and discredit were the characteristics of those times. It is enough to remember that the Continental Congress itself was not respected, nor were its acts obeyed. Without the power to tax in the Congress, financial affairs of the confederation remain the responsibility of the separate States. Beset by creditors, the Congress was forced to change its site. According to George Washington, 'In each State there was a deposit of inflammable material that could explode with a single spark.'

"At last the Congress decided to convoke an assembly with the express and sole object of revising the Articles of Confederation, in order to make a Federal Constitution adequate to the needs of the Government and the Union. This was in 1787. The Convention assembled in May under the presidency of Washington, delegate from Virginia, in Independence Hall, yet today religiously preserved in the heart of Philadelphia. The debates were agitated as in all assemblies, to the point that Franklin at one point counseled his colleagues to take recourse in prayer. Even so, on the 17th of September, a majority of the delegates signed a new code, to which good fortune was reserved.

"But the effort of the Federalists in trying to give the former colonies an efficient national government was not yet finished. For the project elaborated in Philadelphia to be transformed into the Constitution of the United States it was still necessary to obtain the ratification of at least 9 of the 13 States. It is easy to imagine the differences that multiplied among them and, for various motives, the strong opposition to the type of government proposed.

* * * * *

"Hamilton was one of the signers of the Constitution who had stood out in the debates in Philadelphia. A lawyer of 30 years of age, he had been private secretary to Washington, a colonel of infantry, a representative of New York in the Continental Congress, and one of the proponents of the Philadelphia meeting (the other was Madison). He was to be the first Secretary of the Treasury and the most important adviser to Washington on internal affairs, as well as organizer of the financial system of the Union and administrator of unusual capacity. His reports are considered works of a statesman more than merely fiscal statements. So great was his political ability that Ruy Barbosa, the great Brazilian liberal, had words of admiration for the least liberal of ministers of George Washington, pardoning in Hamilton antiliberalism that Barbosa would not tolerate otherwise in anyone.

"Like Hamilton, James Madison had participated in the Continental Congress, had been the most active member of the Philadelphia Convention, and one of the signers of the Constitution. Later he was to fight for 10 amendments, known now as the Bill of Rights, and become Secretary of State under Jefferson and later President of the Republic for two terms. Member of Continental Congress, John Jay, diplomat and politician of prominence, did not participate in the Philadelphia Convention because he was Secretary of State. Later he would be President of the Supreme Court as the first Justice of the Nation.

"Such were the authors of 'The Federalist,' a compilation of 85 articles in defense of the Constitution. They were signed by Publius, pseudonym for the three statesmen, and appeared in New York newspapers from October 1787, until May of the following year. Of the 85 articles, 5 are by Jay, 14 by Madison, 51 by Hamilton, with the authorship of the others being uncertain.

* * * * *

"With this popular origin and written at the end of the 18th century, 'The Federalist' had not lost its timeliness. It continues to be read. It is a classic in the bibliography of political and constitutional works. Successfully reedited in the United States, it was translated in France, Germany, Brazil, Argentina, Italy, Mexico, and elsewhere. For Jefferson it was 'the best commentary that had ever been written on the principles of government.' Modern writers also do not underestimate its worth. Willoughby, for example, sees in it a guide for interpreting the supreme law in the United States. Beard calls the book the greatest of all commentaries for interpreting the Constitution. Foreigners have also exalted its merits, such as Sumner Maine, Guizot, Esmein, Jèze.

"In Brazil, more than a century ago, appeared a version of 'The Federalist' of unknown editorship. It was in the remote year of 1840 when the Regency was ending and the young Emperor Pedro II was reaching his majority. At that time the Empire was far from attaining the form that it later obtained, and only the first outlines of the parliamentary system were beginning to appear.

"Now after so much time has passed, published by the National Law Press, appears a new edition of 'The Federalist,' the famous book that Ruy Barbosa called 'The reservoir of immortal lessons in the science of constitutions.' It should be read and studied."

REBIRTH OF DEMOCRACY'S IMMORTAL LITERATURE

Mr. Speaker, the above are typical of editorials appearing in many newspapers. I would say they reflect the wide interest the classics of democracy program has stirred and the depths that have been reached in the minds of the peoples today in the thinking, the precepts and the governmental philosophies of our forefathers. I cannot understand how for so long such immortal documents of democracy as "The Federalist" remained untranslated and practically unknown in foreign lands until on the suggestion of the Chicago committee and in the wisdom of the Congress and of the USIA a new birth was given to democracy's immortal literature. As I stated at the beginning of these remarks, the amazing success of the classics of democracy program, the reception of the books that gave inspiration to our forefathers by others in foreign lands as sources of inspiration and patterns for the building of new nations in a modern world, this indeed is one of the most significant and heartening developments of recent years.

I am extending my remarks to include a biographical sketch of Jamal Mohammed Ahmed, one of whose many distinctions is that he first of all persons translated into Arabic, "The Federalist," and I am told by scholars did a wonderful job:

U.S. INFORMATION AGENCY,
Washington, D.C., April 19, 1960.

Jamal Mohammed Ahmed, Sudanese Ambassador to Ethiopia, and translator for the Arabic edition of the "Federalist Papers":

Born 1917 at Waddi Halfa, Sudan. Attended Khartoum primary and secondary school and Gordon Memorial University, now the University of Khartoum. Took advanced studies at the University of the Southwest at Exeter, England, and at Balliol College, Oxford, where he received his Ph. D. in history. His doctoral thesis was entitled "The Intellectual Background of Egyptian Nationalism."

After his return to the Sudan, he taught at the Sudan Institute of Education at Bakht Er'Ruda, and for a time was editor of a children's magazine published by the Sudanese Ministry of Education.

During 1948–49, he was clerk-assistant to the Sudanese Legislative Assembly. In 1949 he joined the staff of the University of Khartoum. In 1955 he became senior warden of the university working in close association with the president of the university on student affairs.

In October 1956, Mr. Ahmed was appointed Ambassador to the Arab States—Iraq, Jordan, Syria, and Lebanon (not Egypt), and in

1957 he presented his credentials to the Iraq Government. In 1959 he was assigned Ambassador to Ethiopia.

CEDAR RAPIDS AND THE SPACE AGE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Iowa [Mr. WOLF], is recognized for 15 minutes.

Mr. WOLF. Mr. Speaker, in these closing days of the 86th Congress, I think it most appropriate to inform you and my colleagues of what the great strides that have been taken in our national space effort have meant to people who live and work in our local communities. In particular, I direct your attention to Cedar Rapids, Iowa, a community which I am immensely proud to represent in Congress. There, in the heartland of America, has settled one of the young giants of the electronics industry. It is making contributions, not only to our space effort but to our national defense and will undoubtedly have immeasurable influence on our future. I refer to Collins Radio Co., a firm that has in a few short years established a worldwide reputation for its outstanding research and development capabilities and the unquestioned reliability of its electronic component manufacturing.

Now why did Collins Radio, out of all the cities and localities in our country, choose Cedar Rapids, in which to establish its multimillion-dollar operation? I believe it chose Cedar Rapids principally because that city has within it the great, wholesome American qualities of character, enthusiasm and driving energy that have always been demonstrated by its people and that exemplify the American image. That is why Collins Radio came to Cedar Rapids. And that is why I, too, after traveling to the far ends of the country, settled near Cedar Rapids to live, raise my family and invest my life's work.

In the 2 years I have participated in the work of the House Committee on Science and Astronautics, it has compiled a record of activity which I believe is unparalleled in scope and import to our national future. We have conducted 58 investigations, held 265 hearings and heard some 658 witnesses. Among the areas which we investigated and in which we expressed vigorous committee interest and guidance were satellites for world communication, international telecommunication and space communications, international control of outer space, space propulsion, Project Mercury (the man-in-space program), NASA-military management of electronic equipment and many, many others, all of which have great significance to Collins Radio and the community of Cedar Rapids, and to which my committee has made many important contributions.

Right now, circling the globe a thousand miles high, is the Project Echo satellite, which I am sure many of my colleagues in the House have seen. Collins Radio is working hard in association with this program, a work in which the people of Cedar Rapids can justly take pride.

During my tenure here in Congress, I have traveled to the far reaches of the world for the committee, checking satellite tracking equipment and other electronic gear, as well as working on international scientific projects. On these trips, I have witnessed the products of Collins Radio being employed in our vital tracking stations across the Pacific. After driving down a jungle trail for 90 miles, it was a thrill to find a piece of Collins Radio equipment which has become an indispensable part of our tracking facilities.

I am thrilled by the fact that from this community, so representative of industrious, intelligent Americans, where hard-thinking and fast-acting American businessmen chose to settle and develop a vital organization like Collins Radio, have come the products which are the result of an industrial genius that is now playing and will continue to play an indispensable role not only in our advances into outer space but also in the building of our national bulwark of strength and security.

I am also, in all humility, proud that I have had the privilege of serving the people of Cedar Rapids in the House of Representatives and on the House Committee on Science and Astronautics, thereby rendering to those who sent me here the greatest possible pursuit of their local interests. In the 2 years in which I have participated in the committee's activities I have gained much in my own personal development by listening to and talking with the leaders of our country in every field of endeavor—from research and development in agriculture to the exploration of the deepest reaches of the ocean's floor. I think this has helped me to be a better Congressman, and has given me an unparalleled opportunity to assist my people in achieving and furthering our common interests.

From the grassroots of America come the know-how, the energy, the willingness to work hard, and through an unquestioned belief of my people of Cedar Rapids in wholesome American principles have come the products of a thriving organization, Collins Radio. It is in this way that I believe I am helping my constituents to continue to live lives that are meaningful and in which their children can reap the benefits of their parents' industry. This, in turn, has been made possible by our free system of life that has become a symbol of intellectual freedom to mankind everywhere. From the cornfields of Iowa—the heartland of America—in Cedar Rapids, Iowa, has come leadership in the space age.

MINIMUM WAGE BILL

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Pennsylvania [Mr. DENT] is recognized for 15 minutes.

Mr. DENT. Mr. Speaker, as you all have noted in the daily papers there has been a breakdown in the Committee of Conference on the minimum wage bill—at least up to this moment.

As a representative of that committee I feel that some erroneous statements ought to be corrected.

I was not a bit surprised to find in the record of the other House within a few minutes after the apparent breakdown and stalemate of the conference the immediate attack upon the chairman of the Senate conferee group and sponsor of the Senate bill.

This of course, is the usual political maneuver to place upon another the fault for your own failures.

I note that the question has been asked in the other House by the distinguished Member of that body who, as a member of the conferees, says that he does not know why the conference failed and that he sympathized with the thousands of workmen and their families who would have had their standard of living raised.

Mr. Speaker, there is no secret as to why the conference broke down. I happened to be present in the room on the third floor when the Rules Committee met and I heard the interrogation of certain members of the Rules Committee when they questioned the chairman of the Labor Committee and the minority ranking member—and I heard their answers—and very frankly, sir, the conference died aborning because if records were kept of that meeting of questions and answers made, you will find that there was a positive position taken that there would be no bill except the House bill.

There were some amendments offered—there were some attempts made to compromise. I want to note here that one of the members of the minority party in the Senate offered five separate compromises, and after some discussion the sponsor of the Senate bill accepted each and every one of the proposals that had been amended to allow for some decent coverage and a reasonable rate of increase. However, I believe that the conferees will admit that at no time was there a break in the minority House membership's position and in plain language—they rejected each and every proposal.

I might say, Mr. Speaker, that some of these proposals offered were very far afield from the original intent of the law in which we were hoping to cover a few million of our workers who are not covered by the protective covenants in law and to give a reasonable increase in pay to those already covered.

There are in America 20,700,000 workers who are covered by the act originally passed in 1938 and amended to the present figure of $1 minimum and 40 hours maximum in 1955.

There are yet in America approximately 10 million workers who are not protected and covered by a minimum wage and maximum hour law. I want to call to your attention that if the House proposal would have passed, it would have covered, at the very maximum, approximately 700,000 workers and because of the limitation placed in the bill as to the type of coverage, it is very probamatical whether any more than 20 or 25 percent of this number would actually receive any pay increases.

The majority party conferees were willing to accept five compromise proposals. Some of these were offered by a member of the minority party and accepted by the majority members from

the Senate in a sincere effort to try to reach some kind of agreement.

Mr. Speaker, compromise is a two-way street and no compromise is possible when any one group takes an adamant and unflinching position that there can be no compromise except on their terms.

No fault can be found with Senate Democratic conferees, especially the openminded, sincere approach taken by the sponsor of the Senate bill—the junior Senator from Massachusetts.

As proof of the sincerity and willingness to compromise these differences between the two bodies, the Senate majority agreed to the following proposals either en toto or as amended.

The agony of the situation was caused by the deliberate standpatism of the four votes of the House conference group. At no time was any amendment or even a suggestion of willingness to listen to any proposal of compromise offered by this group, either individually or collectively.

The proposals in one form or another covered the following areas in which disagreement appeared between the House and Senate bills:

COVERAGE TEST

I. (a) Eliminate activity affecting commerce concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "employer engaged in commerce."

(c) "Employer engaged in commerce" means (1) any employer who has two or more establishments and who operates such establishments in two or more States; or (2) any employer who derives $1½ million or more in annual gross sales from activities depending on, or furthering, movement or travel in commerce of persons, or goods, or of communications or otherwise requiring or enabling persons to engage in commerce or in the production of goods for commerce.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained, including the $250,000 establishment exemption.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1, $1.05, $1.10.

IV. Overtime for newly covered workers:

COVERAGE TEST

I. (a) Eliminate activity affecting commerce concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "employer engaged in commerce".

(c) "Employer engaged in commerce" means (1) any employer who has two or more establishments and who operates such establishments in two or more States; or (2) any employer who derives $100,000 or more in annual receipts from interstate sales.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained, including the $250,000 establishment exemption.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1.

IV. Overtime for newly covered workers:

V. Number covered: 2,840,000.

COVERAGE TEST

I. (a) Substitute for the "Activity affecting commerce" concept the term "Employer engaged in commerce".

(b) "Employer engaged in commerce" means (1) any employer who has two, three, four, five, or more establishments and who operates such establishments in two or more States; or (2) any employer who purchases for use in his business operations (exclusive of purchases for general maintenance, repairs or capital improvements) merchandise, materials or supplies which have moved across State lines and which amount in annual dollar value to $1 million or more as measured by the preceding calendar or fiscal year.

When you realize that the standpatters were determined not to open the door to a reasonable coverage amongst the 10 million workers in these United States working at wages substandard to our way of life you can easily see the position certain men of good intentions found themselves placed in.

First of all, let us understand one thing. When we agreed to certain changes in the definition of commerce we were wandering far away from the real intent of the law and that was to bring under the coverage of this legislation the peoples in our Nation who are on the lowest rung of the economic ladder.

Congress must have some conscience of this need or it would not have passed a 10-percent and a 7½-percent increase for Federal employees whose base pays were from 2 to 10 times as much as the workers not covered by any law or even those covered by the present law.

If any person can justify this position, then he must indeed have a flexible conscience or a twisted concept of the needs of our peoples.

We are all aware of the impact for a sudden shift in our level of prosperity upon the business and economic life. However, the first to suffer and the last to recover are those amongst us whose incomes are limited to the necessities and in some cases less than the needs of families.

These citizens are the first to appear on the relief rolls and I sincerely believe that the difference in taxes paid for relief and charity handouts in some cases exceed the amounts required to pay a living and decent wage.

These people have no reserves and we play a legislative hoax upon them by talking about new coverage when the House bill would only cover 1 out of every 14 persons unprotected by a minimum wage law. We are talking of wages and hours and fail sometimes to consider the proposals offered in their effects upon the economics of commerce and industry within our respective States.

I attach hereto a letter received recently from the Secretary of Labor and Industry of the State of Pennsylvania, Mr. William L. Batt, Jr.

AUGUST 26, 1960.

The Honorable JOHN H. DENT,
The House of Representatives,
Washington, D.C.

DEAR JOHN: As you know, the Senate has now passed the Kennedy minimum wage bill providing coverage for 4 million additional workers and an increase from $1 to $1.25 per hour.

The House bill was a much weaker version providing additional coverage for only 700,000 more people and raising the minimum to $1.15 an hour.

It is of the utmost importance to several hundred thousand workers in Pennsylvania and their families, struggling to make ends meet on subminimum wages, that the more liberal Senate version prevail in the joint conference committee. It is equally important to the manufacturing and business communities in the State, many of whom are paying $1.25 and over and who are competing with companies in other States, particularly in the South, paying substantially less than $1.25, that the Senate amounts and coverage be accepted.

Since you are one of the two Pennsylvanians representing us on the conference committee, I hope you will present these views to the conference and do your best to bring a strong bill out of those meetings.

If we can be of any help to you in providing data on the impact of this minimum wage in Pennsylvania, we will be happy to do so.

Sincerely,

WILLIAM L. BATT, Jr.

This is not new—this opposition to a change of the minimum wage law by those who have exerted so much influence both on the floor of this House and in this conference committee.

These are the same people, organizations and representatives who fought social security, unemployment compensation, the original wage and hour bills, and every progressive move sponsored in the last 20-odd years by the Democratic Members of Congress.

Where would this Nation be today if the people who emasculated the minimum wage and maximum hour law had been successful in their fights to keep these important props in our economy from the statute books.

In all of these legislative battles the arguments of States rights, interstate and intrastate commerce were used to its worth noting in passing that the NLRB has established benchmarks in their jurisdictional claims in labor disputes that make our modest attempt to seek coverage for unprotected workers a very reasonable proposal.

Is it not strange that for the purpose of policing labor disputes establishing bargaining rights and applying fines and penalties to a group of workers in a given area of employment are considered to be an interstate employment but when it comes to paying a minimum wage to these same employees they are considered as being in intrastate employment.

Frankly, if the NLRB had not assumed jurisdiction in many of these cases chaos would have resulted from the conflicting findings and opinions handed down by the various State agencies and the Federal agency.

So then it will be if we were to break down and pass minimum wage legislation creating unfair and burdensome differences in wage levels within like industries making competition in some cases impossible.

I know and I believe most of you know what would happen to our economy overnight if the Social Security Act, the Unemployment Compensation Act, the Federal-State relief systems, the farm

subsidy programs, the Federal procurement spending would be repealed or abolished.

Gentlemen, this is no time to move backward or to stand still.

We must continue in a democratic way within the range of our constitutional rights to provide the greatest good for the greatest number.

A WICKED FALSEHOOD EXPOSED

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. WRIGHT] is recognized for 30 minutes.

Mr. WRIGHT. Mr. Speaker, I have taken this time in order to expose a wicked falsehood which has gained considerable circulation throughout much of the country. I would like to think that, by giving it this public exposure and thoroughly documenting the utter fraudulency of its character, I might thereby lay finally to rest an ancient myth. Unfortunately, this would probably be too much to hope, since the spurious nature of this particular falsehood has been properly exposed many times in past years, only to have it lie dormant for a season and then be revived in all its malignant ugliness.

This ancient fraud has quite obviously been revived this year in an effort to injure the presidential candidacy of Senator JOHN F. KENNEDY. I would feel as strongly about it, I am sure, if it were being used to discredit the candidacy of RICHARD NIXON or any other American. For it is evil in and of itself, and the fact that this year its intended victim is quite obviously Senator KENNEDY neither adds to nor detracts from its malicious falsity.

The presidential nominee of the Republican Party has made numerous high-sounding statements disavowing any intention to use Senator KENNEDY's religious affiliation against him. Vice President NIXON has said that religion will not be an issue in the campaign except to the extent that the candidates themselves may discuss it. Unfortunately, this is not quite true. The Vice President, if he has sought in any way to discourage his willing followers and helpers from injecting this matter into the campaign, apparently has no influence with a great many of them.

THE PHONY OATH

In the last few weeks a document has been distributed in my home town and county, placed under the doors of our people, handed out surreptitiously at night, and it must be appearing in some of your districts as well. The Library of Congress reports that inquiries concerning it are arriving at the current rate of 1,000 a day. A wicked document, this thing purports to be an oath of the Knights of Columbus, and it is as phony as a $3 bill.

Now, lest there be any mistake, let me make myself clear, I am a Protestant, I am a Mason, I am a Presbyterian—a kind of a dry-cleaned Baptist—but we live in a country which guarantees to every American the right of freedom and the right of free participation in his government regardless of his race or his color or his creed. We live in a country which was founded upon a belief that a religious test should never be used against a man so as to disqualify him from public office. This is one of the basic guarantees of our Constitution. We make it meaningless if we behave otherwise.

In order to give this fraudulent document an aura of respectibility those who pass it out say it is taken from the CONGRESSIONAL RECORD, 62d Congress, 3d session, volume so and so, February 15, 1913—that makes it look authentic, does it not? Of course, it appeared in the CONGRESSIONAL RECORD, but let me tell you the context in which it appeared. They do not tell you this when they pass it out. It appeared in the CONGRESSIONAL RECORD as a result of a congressional investigation into the fraudulent misrepresentation of the oath of a fraternal body. It appeared as an example of the most horrid, the most diabolic, the most evil type of thing that we can do in America, and that is to misrepresent what our fellow Americans say and what our fellow Americans stand for.

Some one said that if there is so much smoke there is bound to be fire. That is not necessarily true. The smoke might be caused by a stink bomb. In this case, it is.

There have been so many inquiries stimulated by the increasingly widespread distribution of this spurious document that the Library of Congress has printed a statement to give to all who inquire, in order that the truth of its utterly fraudulent character may be fully understood. Following is the text of the printed report published by the Library of Congress:

STATEMENT CONCERNING THE FRAUDULENT CHARACTER OF THE ALLEGED KNIGHTS OF COLUMBUS OATH

The so-called oath of the Knights of Columbus formed the basis of one of the charges in the contested election of Eugene C. Bonniwell against Thomas S. Butler, of the Seventh Congressional District of Pennsylvania, in the 62d Congress, and was printed as an exhibit, not as being the oath of the order, in the CONGRESSIONAL RECORD, February 15, 1913 (p. 3216). The committee report on the case (H. Rept. No. 1523 of the House Committee on Elections, No. 1, 62d Cong.) was also printed in the CONGRESSIONAL RECORD of February 15, 1913 (pp. 3215–3221).

Mr. Bonniwell's fourth charge (p. 3216) referred to the circulation of "a blasphemous and infamous libel, a copy of which is hereto attached, pretended to be an oath of the Knights of Columbus, of which body the contestant is a member." He added: "So revolting are the terms of this document and so nauseating its pledges that the injury it did not merely to the contestant but also to the Knights of Columbus and to Catholics in general can hardly be measured in terms."

Mr. Butler, the contestee, said (p. 3219): "I believe the circulation of this paper known as the Knights of Columbus oath, notwithstanding my sincere efforts to suppress it, and spurious as I believed it to be, was of disadvantage to me and lost rather than gained votes for me."

The committee, while seating Mr. Butler, concluded: "This committee can not condemn too strongly the publication of the false and libelous article referred to in the paper of Mr. Bonniwell, and which was the spurious Knights of Columbus oath, a copy of which is appended to the paper."

The CONGRESSIONAL RECORD of January 29, 1915, contains (p. 2721) the findings submitted by Representative Kettner, of California, of a committee of Free Masons in California, who examined the ceremonials and pledges of the Order of Knights of Columbus. The committee said: "We find that neither the alleged oath nor any oath or pledge bearing the remotest resemblance thereto in matter, manner, spirit, or purpose is used or forms a part of the ceremonies of any degree of the Knights of Columbus. The alleged oath is scurrilous, wicked, and libelous, and must be the invention of an impious and venomous mind."

The CONGRESSIONAL RECORD of February 4, 1915 (pp. 3017–3020), in connection with remarks by Representative Gallivan, of Massachusetts, contains a report, presented by him, of the commission on religious prejudice of the Knights of Columbus, in which there is a review of the various prosecutions for criminal libel "in printing or publishing or defaming by means of the alleged oath." The same number of the CONGRESSIONAL RECORD (p. 3021) contains also the abovementioned report of the committee of Free Masons.

REVOLTING EXCERPTS

The bogus oath is in some places so revolting that I shall not ask its reprinting here. May it suffice for me to tell you that this spurious, fraudulent, wicked instrument which falsely purports to be the oath of this fraternal body, refers to all Protestants as damnable, contains statements erroneously purporting to show that the Knights of Columbus promise that they will have no opinion of their own but will unhesitatingly obey each and every command that they may receive from their superiors in the militia of the Pope, and contains one particularly nauseating and thoroughly objectionable paragraph in which the members of this order are represented as promising to wage relentless war against all Protestants and Masons, to extirpate them from the face of the whole earth, to crush their infants' heads against the walls, in order to annihilate their execrable race.

This violent, objectionable document, falsely represented as the oath of this fraternal body of Catholic men, is quite obviously distributed in an effort to poison the minds of the people against all Catholics and thus, in this particular instance, to do injury to Senator JOHN F. KENNEDY in his presidential aspirations. In one version of this spurious reproduction which I have seen, the following words appear on the bottom of the sheet on which it is printed:

This is just one reason why I could never support a Catholic for President. Can you?

In another printing of the fraudulent document, the following words appear at the bottom of the sheet:

I have seen this in the CONGRESSIONAL RECORD. Therefore, I know that it is true.

REPORT OF THE COMMITTEE OF MASONS

In 1915, a body of Free Masons in the State of California was privileged to examine the true Knights of Columbus oath in order to report upon the utter and total fraudulency of this phony oath. Two of them were 33d degree Masons. Two of them were past grand masters of the Masons of California. All of them were distinguished Masons. Their report, which appeared in the

CONGRESSIONAL RECORD shortly after its completion, and which was directed to Judge Paul J. McCormick, of Los Angeles, reads as follows:

We hereby certify that by authority of the highest officer of the Knights of Columbus in the State of California, who acted under instructions from the supreme officer of the order in the United States, we were furnished a complete copy of all the work, ceremonies, and pledges used by the order, and that we carefully read, discussed, and examined the same. We found that while the order is in a sense a secret association, it is not an oath-bound organization, and that its ceremonies are comprised in four degrees, which are intended to teach and inculcate principles that lie at the foundation of every great religion and every free state. Our examination of these ceremonials and obligations was made primarily for the purpose of ascertaining whether or not a certain alleged oath of the Knights of Columbus, which has been printed and widely circulated, was in fact used by the order, and whether if it was not used, any oath, obligation, or pledge was used which was or would be offensive to Protestants or Masons, or those who are engaged in circulating a document of peculiar viciousness and wickedness. We find that neither the alleged oath nor any oath or pledge bearing the remotest resemblance thereto in matter, manner, spirit, or purpose is used or forms a part of the ceremonies of any degree of the Knights of Columbus. The alleged oath is scurrilous, wicked, and libelous, and must be the invention of an impious and venomous mind. We find that the order of Knights of Columbus, as shown by its rituals, is dedicated to the Catholic religion, charity, and patriotism. There is no propaganda proposed or taught against Protestants or Masons or persons not of Catholic faith. Indeed, Protestants and Masons are not referred to directly or indirectly in the ceremonials and pledges. The ceremonial of the order teaches a high and noble patriotism, instills a love of country, inculcates a reverence for law and order, urges the conscientious and unselfish performance of civic duty, and holds up the Constitution of our country as the richest and most precious possession of a Knight of the order. We can find nothing in the entire ceremonials of the order that to our minds could be objected to by any person.

MOTLEY HEWES FLINT,
Thirty-third Degree Past Grand Master of Masons of California.
DANA REID WELLER,
Thirty-second Degree Past Grand Master of Masons of California.
WM. RHODES HERVEY,
Thirty-third Degree Past Master and Master of Scottish Rite Lodge.
SAMUEL E. BURKE,
Thirty-second Degree Past Master and Inspector of Masonic District.

THE TRUE OATH

Recently, for the first time, in an effort to set the record completely straight, the Knights of Columbus has released for public inspection the true oath actually taken by members of the order in their fourth degree. That actual and true oath is as follows:

I swear to support the Constitution of the United States. I pledge myself, as a Catholic citizen and a Knight of Columbus, fully to enlighten myself upon my duties as a citizen and conscientiously perform them entirely in the interest of my country, regardless of all personal consequences. I pledge myself to do all in my power to preserve the integrity and purity of the ballot and to promote respect for law and order. I promise to practice my religion consistently and faithfully, and to so conduct myself in public affairs and in the exercise of public virtue as to reflect nothing but credit upon our Holy Church, to the end that she may flourish and our country prosper to the greater honor and glory of God.

The order has offered a $25,000 reward to any person or persons who will furnish proof that the alleged oath so freely and falsely distributed has ever been taken or subscribed to by the Knights of Columbus, or that Protestants or Masons ever have been referred to directly or indirectly in the ceremonials of the Knights of Columbus, or that the language of the above recited is not the true obligation. Needless to say, there have been no takers.

COURT HISTORY

There is, in fact, quite a lengthy court history surrounding the distribution of this infamous fraud. It dates back many years. Without attempting to present an exhaustive account of all the legal cases which have arisen from the distribution of this spurious oath, I shall mention herein a few such cases in order that it may be fully understood that courts of law have looked into this question quite thoroughly:

THE CASE OF L. J. KING

In May 1929, one L. J. King, a pretended ex-priest, was arrested at Homer City, Pa., and charged with criminal libel for having circulated the bogus oath in connection with anti-Catholic meetings which he was conducting at that place. On June 5, 1929, as the case was about to be presented to the grand jury, the defendant appeared in court and waived the sending of a bill of indictment to the grand jury and entered a plea of nolo contendere.

Hon. J. N. Langham, presiding judge, after directing that sentence be suspended upon payment of costs, addressed the defendant and stated that he undoubtedly knew that the document was libelous and untrue, that if we are to serve our Lord and Master, we must cease to interfere with denominations that do not agree with us; that the accused should, in his own pulpit, strive to propagate religion and observe the American principle of fair play and that if he failed to recognize this admonition he would be at once ordered before the court for sentence.

THE MORRISON CASE

This was an action of criminal libel brought by E. M. Lawless, editor of the Waterville Sentinel, against A. M. Morrison and G. E. Morrison, father and son, editors and publishers of the Mankato Morning Journal of Mankato, Minn. The libel consisted in charging Lawless with having taken the bogus Knights of Columbus oath. The trial was held in Waterville, Minn., Wednesday, July 29, 1914.

A SENSATIONAL TRIAL

The trial was a most sensational one from many points of view. It was presided over by Judge George J. Dressel. The district attorney who prosecuted the case was Francis J. Hanzel, of Montgomery, prosecuting attorney for Le Sueur County, who was assisted by Attorney Thomas Hessian, of Le Seuer. The defendants were represented by Owen Morris, of St. Paul. The small country courtroom was crowded to the very limits of its capacity, and the spectators filled every available inch of space, having come in from the surrounding country to hear the case tried.

It is of more than passing importance and a matter of gratification to the order, as it was a compliment to him, that the Reverend Thomas Billing, the resident Methodist minister, was chosen on the jury without challenge by the complainant and that he was also made foreman of the jury.

The defendants took the witness stand but made no attempt to establish the authenticity of the bogus oath. They threw themselves on the mercy of the jury, claiming that there was no intention to libel Mr. Lawless. They were not cross-examined by the county attorney.

The jury returned a verdict of guilty, which was read by the foreman, Rev. Thomas Billing, and the court imposed a jail sentence of 30 days on each of the defendants, from which they took an appeal to the district court.

The case was called for trial in the district court at Le Sueur, Minn., February 25, 1915. The defendants entered a plea of guilty and the court imposed a fine of $25 on each defendant, which they paid.

THE BEACH CASE

In the summer of 1923, A. H. Beach, of St. Paul, engaged in the distribution of anti-Catholic literature and distributed copies of the bogus Knights of Columbus oath in various parts of the United States. His attention was called to the fact that this alleged oath was false and libelous and demand was made that he discontinue its publication. The demand having been ignored, the matter was presented to the county attorney who sent for Beach. Under threat of prosecution he entered into an agreement with the county attorney that he would discontinue the sale or circulation of the pamphlet. The county attorney stated that he desired to be lenient with Beach because he was a crippled and indigent appearing individual. However, notwithstanding this agreement, it was found in the summer of 1928 that Beach had resumed the publication of the alleged oath, and on November 15 he was indicted for criminal libel by the grand jury of Ramsey County. On November 19, 1928, he entered a plea of guilty and was sentenced to six months in the workhouse and fined $500, the sentence being suspended on his promise not to repeat the offense.

There have been many other similar cases, all of them resulting in findings of guilt on the charges of libel against those who knowingly and intentionally distribute this false oath. One of them was a case involving a man named Charles A. Swift, which was tried in St. Johns, Newfoundland, on February 18, 1913. Another arose in the State of California where a Socialist editor named H. S. Turner was found guilty upon trial by jury in the superior court, and where this verdict was affirmed in the court of appeals, the case being styled as *People* v. *Turner* (28 Cal. Ap. 766, 154 PAC. 34).

Another publisher named David J. Gordan was similarly convicted of criminal libel for having published the bogus oath in California. Also, in the State of Oklahoma, a similar finding was returned in the case of the State of Cklahoma against Roy Crane. The foregoing should be sufficient to establish beyond a shadow of a doubt that the courts have thoroughly investigated and uniformly found this false oath to be utterly fraudulent.

OTHER FALSEHOODS

There are other ancient and proven canards which are reported to be finding circulation during this political season, all of which are equally false and all of which have as the target of their poison barbs the presidential candidacy of Senator KENNEDY. There is, for instance, a scurrilous work known as the "Awful Disclosures of Maria Monk." This purports to be the autobiography of a nun. In truth, it was written by a demented woman of ill repute in 1832. This fraud was revived in Wisconsin earlier this year.

The people of Wisconsin also have been treated to printing which contains the false charge that Abraham Lincoln was assassinated by Catholics after he had voiced a warning against catholicism.

Only this week, in Wednesday morning's issue of the New York Times, the disinguished newsman James Reston reports on yet another grotesque distortion of truth which has received distribution, obviously aimed at American Catholics and at Senator KENNEDY directly.

Mr. Reston writes concerning the distribution of an article written by a man in Owensboro, Ky., which flagrantly misquotes a famous writing by Thomas Jefferson in such a way as to make it appear that President Jefferson was writing against the Boston Catholic clergy in his famous letter to Dr. Benj. Rush on September 23, 1800, in which Jefferson declared his "eternal hostility against every form of tyranny over the mind of man."

The article in question then made reference to the nomination of "the Boston Catholic leadership as the candidate for President this year."

Mr. Reston points out that the writer of this article had gratuitously changed the meaning of Thomas Jefferson's famous letter which in truth made no reference whatever to the Catholic clergy.

Then, Mr. Reston relates that he could not find the author of this distorted article at his office in Owensboro, Ky., but did find him in the office of the Republican national chairman here in Washington, where this man admitted, according to Mr. Reston, that he had not read the complete Jefferson letter which he had taken the liberty of paraphrasing and misquoting.

Apparently this particular incident was the result not so much of outright malice as of careless research and faulty memory, for the perpetrator of this misquotation, who is now in Washington working actively in the Republican campaign, is quoted in Thursday morning's edition of the Washington Post as having issued a public retraction and apology.

Nevertheless, this illustrates the readiness with which many people are willing to believe the worst about another person's religious faith and to repeat and distribute falsehood without checking carefully into its veracity. Who knows what will come next in this campaign of calumny?

It seems extremely clear to me that each of these wicked frauds is fundamentally and deeply irreligious in character. It has been my privilege to serve as an elder in the Presbyterian church and as a member of the permanent Judicial Commission of the Presbyterian Church of the U.S.A. My own religious orientation, therefore, is quite clearly a Protestant one. Yet I am deeply offended, as I believe any Christian should be deeply offended, at the distribution of such utterly wicked and thoroughly false attacks upon another body of Christians.

People who are receiving these spurious and totally misleading documents are entitled, I think, to know the truth. Perhaps those who have been passing them out did not know they were false. Assuming them innocent of such knowledge, I think they are also entitled to know the truth.

A MATTER OF RIGHT AND WRONG

To me, this kind of thing just comes down to a matter of right and wrong. Just as it is wrong to bear false witness against one's neighbor, it seems to me wrong to pass out a bogus paper against someone else and represent it to be the truth. This, to me, is all part of the Golden Rule—that we should do unto others as we would have them do unto us.

As a Protestant and a Mason, I would keenly resent anybody passing out such a thing and calling it a teaching of my church or an oath of my lodge. If I am a good American, I think I should resent it also when this is done to others, and that I should have the courage to speak out against it.

I have no quarrel with anyone who because of sincere conviction wishes to vote for the Republican candidate. I have no quarrel with anyone who holds a sincere religious conviction in which he prefers one church to another, nor do I attempt herein to dissuade any such person from such a conviction. My quarrel is with a demonstrable falsehood which compounds its culpability by taking on the habiliments of a religious garb.

CONSTITUTIONAL GUARANTEES

Many people, as a result of the distribution of part-truths and half-truths, have become seriously disturbed about the safety of their country if a member of the Catholic faith should be elected to the White House. They show, it seems to me, a rather shocking lack of trust in their fundamental constitutional guarantees. The basic freedoms of our country, for which Catholics as well as Protestants have died, could not be set aside short of constitutional amendments. These, as you know, could never come unless they were approved by a two-thirds majority in both Houses of Congress and then ratified by three-fourths of the States.

Moreover, Senator KENNEDY himself has quite emphatically demonstrated that he is his own man and not subject to influence by an outside force, ecclesiastical or otherwise. Long before he ever was mentioned for the Presidency, he demonstrated his own belief in the long-established American principle of the separation of church and state by voting against public funds for parochial schools. He has stated his forceful opposition to the sending of an Ambassador to the Vatican.

He has unequivocally declared his stanch adherence to the complete separation of church and state, and has emphatically announced that no force, ecclesiastical or temporal, would ever be allowed to come between him and the performance of his duty to the American people if he should be elected as our President. What more can we ask?

There are things which I, as a Protestant, cannot fully embrace about the Catholic Church. Yet this has nothing to do with the qualifications of an individual to serve in public office. There are certain things about some of our other faiths which I personally do not fully embrace, yet it would be quite wrong for me to argue for instance that a worshiper of one of these other churches should be disqualified from serving as our President simply because of my own philosophical disagreement with some particular doctrine of his church.

I am not trying to suggest that everyone who wishes to support some candidate other than Senator KENNEDY is motivated by religious prejudice or influenced by fraudulent representations. That, of course, would be a ridiculous conclusion. Yet I do believe that, in nominating this man, his party has demonstrated its faith in the basic soundness of the American people. The Democratic Party, in nominating a man who is a member of a minority religious faith, has manifested its belief in the toleration and the good will of Americans.

WHAT AMERICA STANDS FOR

Let me ask you quite seriously: Do we want to say to the world that Dublin, Ireland, can have a Jewish mayor, that Catholic France can have a Protestant Foreign Minister, that even Israel can have a Mohammedan in its Cabinet, and that we, the Nation that has set ourselves up as the freest nation and the most tolerant nation of all, cannot allow a Catholic to serve in the highest office in the land?

Do we want to say to ourselves that we, who set ourselves aloft as a nation that believes in brotherly love and religious toleration and in the separation of church and state—for which JACK KENNEDY has very firmly asserted his belief—that in this free Nation we automatically disqualify about a third of our citizens at birth simply because of the church in which their parents worship? If so, perhaps we should have told that to JACK KENNEDY's brother before he died for our country in World War II?

Perhaps we should have told that to my colleagues who served with me in the Fifth Air Force—my very good friends who were Catholics who died defending the freedom of our country? Perhaps we should have told it to JACK himself

before he so ably distinguished himself defending his country and risked his life to save the lives of others.

No, my friends, that is not America—I do not know what it is, but it is not what I was brought up to believe. It is not the America that I want my children to grow up in, and I do not think it is the America that you want your children to grow up in. Because the religion that our people profess, including the people who either knowingly or unknowingly distribute such fraudulent documents is not a religion that teaches hate, but one that teaches brotherly love. It is a religion that looks forward to a day when we can create such an atmosphere of friendliness and understanding and mutual good will that "the lamb and the lion can lie down together" and men can "beat their swords into plowshares and their spears into pruning hooks; and nation shall not lift up sword against nation; and neither shall they learn war any more."

This day, though it may seem afar off, is the promise of our Scriptures and is the goal toward which we should be striving. We shall not attain it by peddling stale falsehoods against our fellow men. We shall not achieve it through motivations of fear and prejudice and hate. We shall move toward it only as we try to understand one another, tell only the truth about one another, and follow the injunction to do unto others as we would have them do unto us. This is the reason why I, as a Protestant and a Mason but mainly as an American citizen and as one who would aspire to be a good Christian, have taken this time to discuss this matter.

WHAT REPRESENTS THE TERM OF A REPRESENTATIVE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New Jersey [Mr. CANFIELD] is recognized for 15 minutes.

Mr. CANFIELD. Mr. Speaker, as my congressional career draws to a close, I would like to comment on a problem which has aroused controversy since the Constitutional Convention. I refer to the question of how long a Representative's term should be.

Throughout our history the 2-year term has caused a good deal of discontent, but there appears never to have been a concerted effort to bring about a change. My remarks arise from a deep-seated conviction that the term should be lengthened to 4 years.

That the Founding Fathers favored a short term is clear. But a close reading of the Federalist No. 52 reveals that they were not quite as dogmatic as some suppose. The authors held that the degree of frequency of elections "does not appear to be susceptible of any precise calculation, and must depend on a variety of circumstances."

And the circumstances have changed today to an extent undreamed of in 1787. One such change has been the profound alteration of our way of life by the related developments of communication and transportation. When our Constitution was written the means of communication were decidedly limited—there were no radios or telegraph or telephones; the mails could not have been too swift in the absence of airplanes and a rail and highway network. Today, on the other hand, people know the issues and know what their legislators are doing. The focus has shifted to Washington to the extent that national politics are probably better understood and more popular than State and local politics. This change has come about with the growth of our daily newspapers and the wire services, the speed of radio and the immediacy of television. And today Congressmen avail themselves of our transportation facilities to visit their districts much more frequently than early Congressmen did. Representative Charles Vursell pointed this out 5 years ago when he noted the close tie which today exists between legislator and constituents as a result of modern communications.

When an election is always coming up within 2 years, it is necessary to engage in a kind of perpetual campaigning. This is true, of course, only in those parts of the country where the two-party system functions as it should. From personal experience as a Congressman representing a district closely divided between Democratic and Republican voters, I know that campaigning is not limited to the few months before election day. It means trips to the district almost every weekend and appearances before the multitude of organizations which characterize our society. Indeed, campaigning can become a state of mind, an end in itself.

In addition to the physical and mental demands imposed on candidates, campaigning in a two-party district costs money. We are committed to the idea that the public needs and deserves extensive publicity for informative purposes. This means literature and postage, stickers and billboards, radio and television, and other means of advertising and publicity—all of which cost money. Surely the necessity to repeat the campaign process every 2 years is an extravagant waste financially. Do we want to limit office to those independently wealthy men who can afford a costly campaign every 2 years?

No one denies that the legislative tasks confronting Congressmen today are highly complex. It takes time to learn the details of lawmaking, of how committees operate. And the subject matter of legislation has expanded enormously in the wake of technological progress and population growth. Back in 1789 Congress met 5 months a year, but today it meets almost twice that time. Comparative studies make it quite clear that today there are more bills introduced, more laws enacted, more subjects discussed, more committee meetings and reports, more mail, and more visitors. Writers of the Federalist, No. 53, foresaw such growth:

> No man can be a competent legislator who does not add to an upright intention and a sound judgment a certain degree of knowledge of the subjects on which he is to legislate. * * * The period of service ought, therefore, in all such cases, to bear some proportion to the extent of practical knowledge requisite to the due performance of the service.

Influence is essential if a Congressman is to be effective, and it is all too apparent that no freshman Representative can in a 2-year term secure any appreciable influence in terms of understanding the mysteries of House procedure and getting a hearing from leaders in the Chamber. And in 2 years a Congressman does not have time to make a broad record by which he may be fairly judged. This encourages the doing of many personal favors and the enactment of pork-barrel legislation to benefit constituents at the expense of the rest of the Nation.

Some have held that the short term tends to push Representatives into the background; that is, the House plays third fiddle to the Senate and White House.

Mr. Speaker, you said yourself 2 years ago that "I have always thought we would have a more independent House of Representatives if Members were elected every 4 years."

President Dwight Eisenhower similarly expressed his preference for a 4-year term at a press conference in 1955. He believed a longer term would encourage more good men to seek the office.

The Legislative Reference Service has reported to me that the total number of resolutions to lengthen the term of Representatives which has been introduced between the 1st and 86th Congress is about 120. In two-thirds of the resolutions a 4-year term is proposed. An unusually heavy attack on the 2-year term was made in the 85th Congress when no less than five resolutions called for a change of term length, four of which called for 4-year terms.

In spite of all this activity over the years, only two resolutions have been reported out of committee. They were House Joint Resolution 120, 59th Congress, in 1906, and House Joint Resolution 220, 67th Congress, in 1923. In the first instance the House rejected the measure, and in 1923 there was no further action beyond the report.

I would like to see a renewed interest in this problem and a concerted effort in the immediate years ahead to effect such a change. Over the 20 years that I have served in this great body, I have become more and more convinced that a 4-year term would make Congressmen better legislators and more responsive to their constituents. Furthermore, in these days of ever-increasing pressures, it would be conducive to the Member's good health.

NARCOTICS ADDICTION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 10 minutes.

Mr. HALPERN. Mr. Speaker, narcotics addiction, despite increasing efforts by all levels of government to combat its serious effects, remains as a major social and criminal problem. Although the number of addicts in the country has not materially increased in the past few years, they have not decreased either.

Regrettably, the relationship between addiction and crime is becoming more

and more pronounced. To quote from a New York City Police bulletin on narcotics:

> The prolonged and continued use of drugs is a costly practice. It swirls its victims into a maelstrom that flings them from drugs to crime—and then back to drugs again. Because many employers shun addicts as undesirable employees, these people are left without work and therefore without money. The addict must have drugs and his only solution is to turn to crime. Consequently both male and female find themselves involved in such lawbreaking as petty thefts, larceny, prostitution, shoplifting, burglary, robbery and even murder.

In 1956, the Daniels subcommittee of the Senate Judiciary Committee reported that drug addiction was responsible for approximately 50 percent of all crimes committed in the larger metropolitan areas and 25 percent of all reported crimes in the Nation.

This in brief, is the grim picture of the consequences to our society of the continued existence of narcotics addiction at a high level.

If this scourge is to be lessened it can only be accomplished through the vigorous carrying out of an overall plan for the treatment and control of addiction, in which plan all levels of government as well as religious, educational, private and public social agencies should be included. This is why I cosponsored and strongly supported the resolution adopted by this House last spring calling for a White House conference on narcotics.

Such an overall plan should have three primary goals:

First. Control of production and distribution of narcotics—legal and illicit.

Second. Treatment, supervision and control of individuals presently addicted to narcotics, including those who have committed crimes and those who have not.

Third. The prevention of new or increased addiction.

Broken down even further, such a program might include a revamping of the Federal laws relating to narcotics, and the adoption by the States of adequate public health legislation and penal provisions in this respect; an increase of treatment facilities and the adoption of laws encouraging addicts—including both those who have committed crimes and those who have not—to undergo treatment procedures; and, an increased distribution of educational material alerting the public to the dangers of narcotics and of the measures available to combat addiction.

At present there are three hospitals in the country devoted to the treatment of addicts, the Federal institutions at Lexington, Ky., and Fort Worth, Tex., and the New York State hospital for juvenile addicts in New York City. Some private facilities are also available but the total is woefully inadequate for the need.

Along with Senator JAVITS and our colleague, Mr. ANFUSO, I sponsored a bill for the establishment of a Federal narcotics hospital in New York State to be jointly operated through arrangements with the State, its political subdivisions, and neighboring States. This was intended to partially fill the serious gap in treatment facilities that now exists.

I am also pleased to cosponsor with Mr. ANFUSO, a bill to provide for grants-in-aid to the States for the treatment of narcotic drug addicts in so-called closed institutions, that is, hospitals providing a drug-free environment with maximum supervision and with minimum contact with the outside world. The condition of desperate lack of funds in the States to enable them to provide the essential facilities for treatment of addicts could be eased by this bill and I urge its speedy enactment.

But other legislation is necessary as well. If the menace of narcotics is to be lessened, not only must addicts be helped to help themselves, but sellers and purveyors of dope must be penalized to the fullest extent possible. Drug traffic must be made so costly to those engaged in it illegally as to discourage potential distributors. To this end I have introduced a bill today to provide that for a third or subsequent offense against the Federal narcotics laws, an offender shall be imprisoned not less than 15 years nor more than 60 years and fined not more than $20,000. Existing statutes only provide that, for a second or subsequent offense, imprisonment shall be for not less than 10 nor more than 40 years and the fine shall not be more than $20,000.

It is intended that the psychological impact of a possible third offense penalty of a severe nature should act as a deterrent to drug traffickers or "sellers," the human vermin who prey on the weaknesses of their fellowmen.

But for those who are merely victims of addiction, who possess small quantities of drugs for personal use only and are not engaged in the sale or distribution of narcotics, I believe that we should make every effort to help them to rehabilitate themselves and to become contributing members of society once more. In addition, I believe that those who are convicted under Federal laws other than the narcotics statutes, and who are addicts, should likewise be granted the opportunity for rehabilitation.

Existing laws do provide that violators of Federal laws who are addicts can be sent to hospitals for treatment and rehabilitation. However, I do not believe that they allow for sufficient flexibility in the treatment of such addicts. Nor, do existing laws specifically differentiate between those who violate the Federal narcotics laws by engaging in the sale or distribution of narcotics, and those who are merely victim-possessors and who might benefit from treatment.

I have been working on legislation aimed at meeting the objections to the existing laws and providing for the more flexible handling of addicts who violate Federal laws including the narcotics laws. I intend to introduce several bills when Congress convenes in January, which, I hope, will offer more encouraging procedures for the treatment of addicts.

Among such bills will be one that will make it a Federal offense to possess a certain amount of narcotics without being involved in the sale or distribution of such drugs. The purpose of such a bill will be to differentiate in terms of penalties and sentencing between those who are sellers and purveyors of narcotics and those who are merely victim-possessors. Alternative modes of sentencing the latter class of persons will be provided, each with the objective of promoting the widest program of treatment and self-help so as to enable addicts to become cured and fit and ready for community living. Particular features of such bills will include liberal use of probation and parole measures, expert supervision and the periodic undergoing of medical tests by those being helped, and, the setting aside of convictions where addicts become rehabilitated.

Such bills will rely on State and local support measures in the effort for rehabilitation.

In addition, I shall also consider the introduction of measures to provide assistance to State programs of education and research in the narcotics field and of public enlightenment about ways and means of combatting the narcotics scourge.

The existence of a national narcotics problem with all of its complications, demands the development of policies and programs designed to promote a nationwide effort to combat this menace. I have tried to indicate briefly something of the scope of the problem and the diversity of the remedial measures which must be undertaken by all levels of our society.

I believe that bills of the type which I have described will help immeasurably in the fight against the distribution of narcotics, in the treatment, supervision and control of addicts, and in the encouragement of State and local efforts in this field. The seriousness of the narcotics menace requires that we give our most earnest consideration to proposals to overcome it.

FACTUAL STORY OF WOLF FOOD FOR PEACE PLAN

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Iowa [Mr. WOLF], is recognized for 5 minutes.

Mr. WOLF. Mr. Speaker, it is gratifying after years of very diligent effort to see the Republican Party adopt the United Nations food-for-peace proposal. It is disturbing that they are attempting to give the impression that they developed it in the past 3 months. We Democrats have spent many, many hours over the past 2 years working over this proposal but we welcome this new support, however late. We hope that this declaration is not merely an election-year appeal by the Republican administration, but in the light of the past record of Republican political expediency, it does give that appearance. So often, the Republicans have adopted humanitarian Democratic proposals to win an election and then dropped them immediately after the election. But this I pledge, Mr. Speaker: That regardless of what happens the day after election, I will still be working just as diligently to get some of our God-given abundance

into the hands and mouths of needy and starving people.

In the interest of accuracy, I wish to introduce into the RECORD the various historical facts regarding the United Nations food-for-peace idea.

March 26, 1959: On that day, the day before Good Friday, I proposed the food for peace through the United Nations plan. At that time, I stated:

It is my suggestion that this Congress seriously consider aiding economic expansion by the use of American agricultural resources through the United Nations. * * * To these ends, I am proposing that the Congress of the United States authorize the President to make food and fiber available to the United Nations or its appropriate agencies. * * * I propose that we demonstrate our responsibility as the world's most fortunate independent democracy by using food and fiber resources to aid other nations in the improvement of their living standards.

April 27, 1959: Fellow Congressmen joined me in sponsoring the food-for-peace plan. The bill made available to the United Nations up to $250 million worth of food and fiber resources held in surplus by the Commodity Credit Corporation. The food was to be used in underdeveloped areas for three purposes: First, national food and fiber reserves; second, education and educational programs such as school lunch programs and school clothing programs; and, third, community development projects where nations had capital to pay for resources but not for labor.

June 18, 1959: Because the food for peace through the United Nations bill was bottled up in committee, I sponsored the food-for-peace idea as an amendment to the Mutual Security Act. At that time, I pointed out that if my food-for-peace plan was enacted and implemented over a 10-year period, we would save $1,140,000 in storage costs.

Congressman KING, of Utah, stated on the floor in support of the plan:

This is one of the very rare occasions in which liberal and conservative can join hands in support of legislation which represents the best interests of each. * * * In the name of fiscal responsibility, in the name of agricultural and economic stability, in the name of kindness, charity and decency, in the name of progress and opportunity, I urge your support.

One of the ranking Republican members of the House Foreign Affairs Committee, Mr. WALTER JUDD, of Minnesota, states:

This is a most appealing amendment because we have surpluses and the world has hungry people. But I cannot feel it is wise for us here today to accept this amendment. * * * It would place a burden upon the United Nations which that organization is in no position to handle.

The amendment was voted down 96–47. Only three Republicans stood in favor of the United Nations proposal.

April 21, 1960: I again introduced the United Nations food-for-peace proposal as an amendment to the 1960 Mutual Security Act.

Mr. SMITH, of Iowa, on that day, stated:

I think the only way we can have a change of administration of world food distribution this year is by a program operated through the United Nations. I know we are not going to get it through this administration in Washington because the Secretary of Agriculture and the Secretary of State are in agreement that the rate we are pushing wheat now is the greatest that we should push it despite the fact that Russia is constantly gaining in its percentage of the world wheat market.

I also read a letter from the Deputy Under Secretary General of the United Nations, Martin Hill, who said that the United Nations was ready, willing, and able to carry out the United Nations food-for-peace plan.

Mr. JUDD again spoke for the Republicans and against the United Nations food-for-peace plan by saying that the United Nations had no administrative machinery for handling such a complicated operation. This was said, even though the United Nations Secretariat agreed that it could handle the new job, which would operate similarly to the way a letter of credit operates in the commercial world. On this day, the plan was again defeated 93 to 46, with only 2 Republicans voting for the food-for-peace plan.

June 20, 1960: Vice President NIXON, the presidential nominee of the Republican Party, reversed the Republican position of just 2 months earlier and spoke out in favor of the United Nations food-for-peace plan:

Immediately prior to the summit conference the President, in discussions with his staff, in which I participated, developed a proposal which meets these objectives and which can lead to a major breakthrough in getting surplus food to hungry people abroad. He was considering presentation of this proposal for the first time at the summit conference in Paris.

The first step would have been to call a conference of all the surplus-producing nations, including the Soviet Union. These nations would then work out a joint proposal for a multilateral program under which the food surpluses of all nations which desired to participate would have been turned over to United Nations' agencies for distribution to the hungry people of member nations. The recipients of the United Nations food would be those unfortunate people who still are unable to supply themselves with an adequate diet either by their own agricultural efforts or by exchange of goods. The distribution would be handled in such a manner as not to disturb commercial markets.

Let me emphasize that I do not suggest that this proposal is a cure-all for the farm or for the world's problems. It does, however, have these obvious merits: It will not be harmful to our friends and allies since they will participate in the program. It will not be subject to the criticism directed against unilateral U.S. aid since it will be administered through the United Nations. It will be in the best American humanitarian tradition in expressing concern for and offering assistance to less fortunate people. It will serve the cause of peace and freedom by giving hungry people the food which will help provide them with the necessary energy to build independent, free societies which can resist foreign domination from any quarter.

Every one of these points which Vice President NIXON made in North Dakota obviously had to be made in favor of the Wolf food-for-peace proposal because this was the only United Nations food-for-peace proposal in Congress at that time. By his remarks on this day, Vice President NIXON reversed the stand of the Republican Party on the Wolf-United Nations food-for-peace plan and endorsed it.

July 27, 1960: The Republican platform calls for intensification of the food-for-peace program, including new cooperative efforts among food surplus nations to assist the hungry peoples in less-favored areas of the world.

The Democratic Party in its platform, also endorsed the Wolf-United Nations food-for-peace proposal:

We will no longer view food stockpiles with alarm but will use them as powerful instruments for peace and plenty. * * * With wise management of our food abundance, we will expand trade between nations, support economic and human development programs, and combat famine.

August 22, 1960: Senator FULBRIGHT, chairman of the Senate Foreign Relations Committee, and I introduced a concurrent resolution which embodies the United Nations food-for-peace proposal. It calls on the United States to take the initiative in the United Nations in developing plans whereby all members of the United Nations will work together in furnishing food and fiber to underdeveloped areas without, of course, disturbing normal markets.

For all of us who have supported this plan, it has been a long hard road. It has meant many trips by myself and my staff to the United Nations at my own expense to work out details of this proposal. It has meant almost daily selling this idea to Members of both parties. We have diligently tried to convince them of the value and necessity of using our agricultural commodities in a new and creative way. I am happy and gratified that platforms of both political parties and the two presidential candidates, Vice President NIXON and Senator KENNEDY, have expressed their agreement with the United Nations food-for-peace plan.

Mr. Speaker, I want the record to show that following passage of Senate Resolution 116 in the Senate, I attempted today to gain unanimous consent to bring this resolution up in the House of Representatives. The chairman of the Foreign Affairs Committee approved, the Speaker of the House agreed, the minority leader, the gentleman from Indiana [Mr. HALLECK] refused to agree to consideration of the resolution. I want the record to show that the Republican leader of the House personally blocked this resolution, notwithstanding the fact that the Acting Secretary of State Douglas Dillon said in support of this resolution:

The President wished to be assured that such an initiative (S. Res. 116) would elicit the support of Congress.

Mr. Dillon outlined completely the President's proposed program in his statement to the committee.

It is unfortunate that the final demonstration of support for the U.N. food-for-peace idea was stopped on the very threshold of passage by the very leader

of the President's party in the House of Representatives.

I am satisfied, Mr. Speaker, that when the new Congress convenes next year under Democratic leadership that the U.N. food-for-peace program will become a reality.

CONGRESSIONAL INSPECTION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. LIBONATI] is recognized for 60 minutes.

Mr. LIBONATI. Mr. Speaker, I have requested 1 hour to speak on special order upon three subjects. First, the report of the Congressman on the inspection and tour of the factories and industries in Italy that were the recipient of aid under the Marshall plan for the reconstruction and expansion to strengthen the economy of the Republic. Second, to speak on the interesting reunion of General Klein and General Teucci in Rome and such incidents thereto of interest. Third, the report of Subcomittee No. 3 of the Committee on the Judiciary on the visit to the prisons at Terre Haute, Ind., Chillicothe, Ohio, and Ashland, Ky., in company with counsel of the subcommittee, Cyril Brickfield, and various Government officials.

It was early morning on the 15th day of September, 6:22 a.m. that the session adjourned sine die. A small group hurried, scurried and ran to Washington travel center stations to embark, fly, or road-tumble to New York City.

The flight to Europe from Idlewild, aboard Alitalia, at 4 p.m. in the afternoon, was a glorious sensation—we appreciated the study objectives of our visit to Italy at the behest of the Italian Government.

It was at Ispra—Varese—that we first experienced the wonderful hospitality and friendship of the Italians toward the good will official messengers of the United States. And the same feelings continued throughout our visits to Turin, Genoa, Venice, Milan, Pavia, Novara, Milan, Florence, Rome, Salerno, Naples, Palermo, and Catania.

We were proud of our lineage and were welcomed by everyone with a loyal enthusiasm typical of the Italian people. Although the schedule was a tight one, we tried to please everyone interested in the American inspection tour of factories and industries that had received aid under the Marshall plan. And, being politicians ourselves, we gave way to the requests of the Italian politicians, such as mayor and prefect, to visit the plants and their intimates in the areas that we visited.

It was not an easy task being on the working end from 8:30 a.m. to 9:30 p.m. for the better part of 3 weeks. It is needless to say that the Congressmen saw very little of Italy except on the scenic side while en route from one factory site or shipyard to another.

The Members of the Congress, their wives and children in attendance, were: Congressman Paul A. Fino and his wife, Esther; Congressman Dante B. Fascell and his wife, Jeanne Marie; Congressman Roland V. Libonati and his wife, Jeannette; Congressman Alfred A. Santangelo and his wife, Betty; Congressman John H. Dent and his wife, Margaret; Congressman Emilio Q. Daddario and his wife, Berenice; Congressman Domenico V. Daniels and his wife, Camille; Congressman Robert N. Giaimo and his wife, Mariam; Congressman Silvio O. Conte and his wife, Corinne. Congressman Fascell's daughter, Sandra, was with us, as was Congressman Giaimo's daughter, Barbara.

Also accompanying us was our amiable Deputy Sergeant at Arms of the House, Thomas Iorio and his wife, Clara.

It was unfortunate that two of our colleagues who were most instrumental in the arrangements with the Italian Government, because of circumstances beyond their control, were unable to go with us—Congressman Peter Rodino and his wife, Marianna, and Congressman Hugh J. Addonizio and his wife, Doris.

Congressman Victor Anfuso and his wife, Frances, met us in Rome and attended our meeting with the Honorable Segni, Italian Prime Minister.

The distinguished Ambassador, Manlio Brosio, ever interested in cementing the friendly relationship between the United States and Italy, determined that a second visit to Italy by a congressional delegation of Italo-Americans—first visit in the fall of 1957—would create a most favorable impression upon the minds of the Italian people in visiting the industries of Italy, especially those whose expansion and construction had received aid through the operation of the Marshall plan. It was felt that the visit would reflect the growing interest of the American people in the exceptional progress made by the Italian industrialists and industries in contributing to the national and local economies of the nation. This progress was only realized through the saving of the defunct Italian industries, through the beneficence of the American people.

Dr. Paolo Savino, of the Embassy staff, perfected arrangements with the congressional group and the Italian industrialists, through the Hon. Carmine de Martino, then Under Secretary of State for Foreign Affairs and presently a Member of Parliament.

It was through the direct efforts of Mr. de Martino that the Italian arrangements were perfected. He is a great leader and is loved throughout Italy. To him must go the credit for the arrangements for our entertainment, comfort of travel, and the hospitality in every section we visited, by the officials and distinguished citizens in attendance at the luncheons and dinners given in our honor. We feel a great warmth toward him for his kindness and pro-Western fortitude. He is truly a great friend of the United States.

It is with pleasure that I record the names and addresses of our hosts in Italy, at this point. It is needless to say that, of the many praises that we could use to show our heartfelt appreciation for their many kindnesses and courtesies, to say nothing of the high respect and honor that they heaped upon us, and especially upon our wives, that we only say, "Thanks, from your American cousins, who stand side by side with you in defense of the liberties of nations."

It was a signal honor to be welcomed at the railroad station in Rome by the President of the Republic, Giovanni Gronchi, who had delayed his trip to America in order to greet us and converse with us, individually. Another memorable occasion was our meeting with the former Premier, Antonio Segni, in his offices in Rome and, in true American spirit, we asked of the welfare of the present Premier, Amitore Fanfani, who typifies the American policy of the solidarity of the family, with opportunity to own land and a home, in order that their children be given the full advantage and opportunities of education for the betterment of a future generation of citizens.

Another highlight was the luncheon given by the Honorable Giovanni Leone, President of the Chamber of Deputies. We would be remiss if we did not mention the wonderful luncheon and dinner given by Carmine De Martino and his lovely wife.

It was a high privilege to converse with these men who stand out as the important government personages of the nation.

The operations of the industries in all of Italy were under ideal conditions, such as the most modern of machinery and the most modern types of buildings that were properly ventilated and lighted with expansive glassed-in building effects. The factories are situated far from the towns, primarily as a precaution dictated by war experiences in that the location is distant from the homes of the people and will prevent casualties under a bombing war.

The skilled trades, such as mechanic in the auto industry, average $3 per day with other fringe benefits in accordance with the Italian law. The powerful labor unions in Italy have devised a sliding scale affecting wages in conformity with the ability of the local economy to pay and the cost of living and from these two are determined the formula which prevails as the working wage scale. It was felt that some of the salaries are not adequate enough in the skilled trades, but nevertheless the cost of living in Italy is hardly comparative to that in the United States and, naturally, our viewpoint in this area would be subject to correction.

At this point I am incorporating in this report, a general chart touching on salaries in Italy and fringe benefits in Italian factories. At least it shows the relative categories and salaries fixed in this field:

MILAN, *November 23, 1959.*

Re: Salaries in Italy

The following figures (in Italian liras) pertain to present salaries in Milan in the field of commerce (salaries in industry are different) for male employees over 21 years of age, for a 48-hour week. Different regions of Italy may vary slightly, for example in basic salaries, but insurance costs, taxes, etc., are the same throughout Italy. The cost of living (COLA) addition varies from time to time.

Each employee is placed in a category, depending upon the work he performs.

[Italian lire]

Category	Description	Basic monthly salary	Cost of living addition	Total without deductions	Deductions from salary
A	Department head	95,849	4,459	100,308	Income tax: on 20,000 to 80,000, 4.40 percent; above 80,000, 8.80 percent.
B	"Concetto" employees (can work without direct supervision).	From 62,837 to 72,984	3,354 for all	From 66,191 to 76,338	
C	General office workers (supervised)	From 48,294 to 52,188	From 2,119 to 2,496	From 50,413 to 54,684	Complementary tax (A, B, C categories only): Above 45,000, 1.65 percent. Social insurances: 4.57 percent.
D	Workers performing miscellaneous jobs (as porters, etc.)	From 44,893 to 48,251	From 1,859 to 2,093	From 46,752 to 50,344	
E	Mechanics	From 45,285 to 53,540	From 1,989 to 2,340	From 47,274 to 55,880	

Additions to above salaries: (1) An increase of 4 percent on the total without deductions every 3 years (5 times); (2) a 13th month salary (paid at Christmastime); (3) merit additions, judged by the individual firm; (4) family allowance: $57.37 per month maximum (this paid by government insurance) by firm and insurance in turn pays allowance to employee).

Additional costs to the firm (beyond basic salary and cost of living addition):

(1) Social insurance stamp (varies according to salary from 64 lire for salaries up to 33,400 lire per month, to 158 lire on salaries of 97,100 lire per month, etc.) (covers pension, death, TB, unemployment, orphans).

(2) Social insurance additions, 16.65 percent of salary.

(3) Family allowance insurance, 25.50 percent on a maximum of 22,500 (or 5,737.50) monthly.

(4) Sickness insurance, 6.21 percent.

(5) Workers' housing, 1.72 percent.

(6) Leaving indemnity—varies according to categories.

Deductions from employees' and workers' salaries:

(1) Income tax: from 20,000 to 80,000 salary, 4.40 percent; more than 80,000, 8.80 percent.

(2) Complementary tax (applies to categories A, B, C only), 1.65 percent on amount over 45,000.

(3) Social insurance, 4.57 percent.

EXAMPLES OF COSTS OF EMPLOYEES TO THE FIRM

(1) Employee with 60,000 monthly salary (basic salary plus cost of living addition) would cost the firm as follows: (per month) in addition to 60,000 salary:

Family allowance contribution to Government Insurance	5,737.50
Fixed social insurance	104.00
Social insurance integration	7,680.00
Sickness insurance	3,936.00
Workers' housing	690.00
All of the above on the 13th month amount	1,000.00
Total	17,847.50

(Or 31.41 percent of 60,000.)

Plus indirect costs as follows:

1/12 of the 13th month amount	5,000
Leaving indemnity 1/12 of 65,000	5,414.50
Total	29,262.

(Or 48.78 percent of 60,000.)

(2) Worker with $40,000 monthly salary (basic salary plus cost of living addition) would cost the firm as follows (per month) in addition to $40,000 salary:

Family allowance contribution to Government insurance	$5,737.50
Fixed social insurance	76.00
Social insurance integration	5,120.00
Sickness insurance	2,424.00
Workers' housing	460.00
All of the above on the 13th month amount	666.65
Total	14,484.15

(Or 36.21 percent on $40,000.)

Plus indirect costs as follows:

1/12 of the 13th month amount	$3,333.35
Leaving indemnity	1,666.65
Total	19,484.15

(Or 47.71 percent on $40,000.)

Examples of costs of employees and workers to the firm:

An employee earning 40,000 lire monthly will cost the firm in addition 21,413 lire or 53.53 percent per month.

An employee earning 50,000 lire monthly will cost the firm in addition 25,329 lire or 50.66 percent per month.

An employee earning 60,000 lire monthly will cost the firm in addition 29,262 lire or 48.78 percent per month.

An employee earning 80,000 lire monthly will cost the firm in addition 37,073 lire or 46.34 percent per month.

An employee earning 100,000 lire monthly will cost the firm in addition 44,913 lire or 44.91 percent per month.

A worker earning 40,000 lire monthly will cost the firm in addition 19,484 lire or 48.71 percent per month.

A worker earning 45,000 lire monthly will cost the firm in addition 21,206 lire or 47.12 percent per month.

A worker earning 50,000 lire monthly will cost the firm in addition 22,914 lire or 45.83 percent per month.

A worker earning 55,000 lire monthly will cost the firm in addition 25,093 lire or 45.62 percent per month.

A worker earning 60,000 lire monthly will cost the firm in addition 25,847 lire or 44.74 percent per month.

Some examples of real earnings in our firm:

[Italian lire]

	Categories					
	B	C	D	D (lower category)	E	E (lower category)
Basic salary	73,984	51,349	47,934	37,474	48,673	47,934
Cost-of-living addition	3,354	2,119	2,093	1,859	2,340	2,093
3-year increases	11,352		2,018		7,475	2,001
Merit increase					10,000	
Bonus	18,779				26,000	16,200

Less taxes	5,574	1,464	1,725	772	3,535	1,985
Plus family addition			10,790		1,430	
Net	96,984	49,560	68,274	36,764	88,065	63,125

But, nevertheless, it was a wonderful sight to see the heavy machinery in the automobile plants, steel companies, and shipyards stamped with huge letters, Erie, Pa., Pittsburgh, Pa., Gary, Ind., and so forth—it gave us a nostalgic feeling. This is what the United States had done for Italy.

Everyone was so good to us, we were called their liberators. Italy has not forgotten its debt of gratitude to the United States and its citizens.

At the various affairs, one of our number was chosen to answer the greetings extended to us. It was with great joy and admiration that the Italian officials present sat in wonder, listening to a Congressman speaking in the Italian tongue. Although several were very fluent, as our dear colleagues Messrs. Fino, our senior leader, Chargé de Affaires, Daddario, Conte, Santangelo, Fascell, and Giaimo, yet Iorio, Assistant Sergeant at Arms, Dent and I, with a Neapolitan flourish of dialect, were also accepted as linguists of extraordinary ability, perhaps the Italians were a little charitable in their enthusiasm. We, at least, felt that our every action annealed the close friendship between two great nations.

Those men who accompanied us, Cons. Pierluigi Alvera, Capt. Ugo Callery, and Cons. Elio Pascarelli and his sweet signora, Teresa, were painstaking in our behalf. We were proud to be in their gracious and meticulous care. The many services were given with clock-like precision, with no delays and without confusion. Each did a marvelous job and realized that we were appreciative of their work of perfection.

At Rome we attended the special visit of Pope John to the cathedral and His Holiness upon his departure came to greet us as dignitaries from a great nation.

NAMES AND ADDRESSES OF OUR HOSTS IN ITALY

Ispra (Varese): Centro Studi Nucleari del C.N.R.N., Dott. Ing. Gianfranco Franco, Direttore del Centro Studi Nucleari di Ispra, Via (Erva, 31, Milano).

Turin, Fiat (visit, lunch, presents, and transportation): Prof. Ing. Vittorio Valletta, Presidente della Fiat, Corso Marconi, 10, Torino; Ing. Giovanni NASI, Vice Presidente della Fiat, Torino.

Turin, Unione Industriale: Dr. Ermanno Gurgo Salice, Presidente Unione Industriale, Via Fanti, 17, Torino.

Turin, mayor (dinner): Avv. Amedo Peyron, Sindaco della Città di, Torino.

Genova, mayor (lunch): On. Avv. Vittorio Pertusio, Sindaco della Città di, Genova.

Genova, Ansaldo (visit of the shipyards): Avv. Federico de Barbieri, Presidente dell' Ansaldo, Piazza Carignano, 2, Genova.

Genoa, Ansaldo: Ing. Giuseppe Rosini, Amminstratore-Delegato dell'Ansaldo, Genova; Ing. Federico Lombardi, Direttore Generale dell'Ansaldo, Genova.

Genoa, Consorzio Autonomo Porto di Genova (Port Authority—visit of the harbor): Gen. F. Ruffini, Presidente del Consorzio Autonomo Porto di Genova, Genova.

Genoa, Cornigliano S.p.a. (steelmills—visit, lunch, and transportation): Dr. Enrico Redaelli Spreafico, Direttore Generale della Cornigliano S.p.a., Genova; Ing. Saverio Cesaroni, Cornigliano S.p.a, Genova.

Venice, Port Authority and Unione Industriale (visit of the harbor and industrial plants at Porto Marghera): Comm. Renzo Vidal, Vice Presidente dell'Ente Zona Industriale di Marghera, Venezia.

Milan, Innocenti: Ing. Luigi Innocenti, Vice Presidente, Via Pitteri, 81, Milano; Ing. Giuseppe Lauro, Amministratore-Delegato e Direttore Generale della Innocenti, Milano.

Milan, mayor: Dott Prof. Virgilio Ferrari, Sindaco di, Milano.

Milan, Chamber of Commerce (reception): Dr. Ing. Eugenio Radice Fossati, Presidente della Camera di Commercio Internazionale.

Milan, E.N.I. (visit): Dr. F. de Peverelli, E.N.I., San Donato Milanese.

Pavia (visit, lunch): Cav. del Lavoro Vittorio Necchi, Pavia.

Novara, Sovietá Montecatini (visit): Ing. Pietro Giustiniani, Amministratore-Delegato della Montecatini, Milano.

Milano, Alfa Romeo (visit) and present: Dr. Balduccio Bardocci, Presidente dell'Alfa Romeo, Milano.

Florence, Officine Galileo (visit): Prof. Francesco Scandone, Vice Presidente della Galileo Corporation of America, New York.

Florence, Pontedera, Piaggio (visit and lunch): Cav. del Laboro Armando Piaggio Pontedera (Pisa).

Rome, World Trade Fair (EUR Area) (lunch and visit): Dr. Ferenc Nagy, President of the World Trade Fair EUR, Roma.

Rome, Italian Red Cross (visit): Avv. Edoardo Roccetti, Presidente della Croce Rossa Italiana, Roma.

Rome: The Honorable Giovanni Leone, Presidente dalla Camera dei Deputati Roma (reception and lunch); Avv. Coraldo Piermani, Segretario Generale della Camera dei Deputati (visit of the Palazzo Montecitorio), Roma.

Rome, Confindustria (reception buffet and important contribution to the whole visit in Italy): Cav. del Lavoro Dr. Alighiero de Micheli, Presidente della Confindustria, Piazza Venezia, 11, Roma; Cav. del Lavoro On. Ing. Quinto Quintieri, Vice Presidente della Confindustria, Roma.

Salerno, mayor (reception in the City Hall): Gr. Uff. Alfonso Menna, Sinadaco di, Salerno.

Salerno, Cathedral (visit and reception): S.E. Arcivescovo Mons. Demetrio Moscato, Primate di, Salerno.

Salerno, International Center for Vocational Training of Migrants: Ing. Mario Alati, Ingegnere Capo del Genio Civile di, Salerno.

Castellammare, Navalmeccanica Shipyards (visit and cocktails): On. Dr. Giorgio Tupini, Presidente della Navalmeccanica, Napoli.

Napoli, Banco Di Napoli (reception-buffet): Cav. del Lavoro Ivo Vanzi, Presidente del Banco di Napoli, Napoli; Cav. del Lavoro Dr. Stanislao Fusco, Direttore Generale del Banco di Napoli, Napoli.

Palermo, mayor (lunch at Villa Igea): Dr. Salvatore Lima Sindaco di Palermo.

Priolo, Sincat-Edison (visit, lunch, and transportation): Ing. Carlo Ciriello, Consigliere Delegato della Edison, Milano; Ing. Vittorio de Biasi, Presidente della Sincat, Priolo (Siracusa); Dr. Aldo Romoli, Direzione Sincat, Corso Sempione, 2 Milano.

Foreign investments in Italy, including U.S. money, are increasing. The gold and dollar reserves of $3.2 billion are only exceeded by the United States and West Germany.

The natural resources of Italy are negligible as far as contributing to these remarkable industrial successes—poor in coal and oil, with only about one-half of its iron needs—makes it difficult to understand.

But the Italian economists are in unison in stating that the change from the agriculturally supported economy began with the aid of the United States (right after the war), totaling $4½ billion under the Marshall plan.

The sound money policy promulgated by succeeding Italian governments resulted in growth without inflation.

Italy, the cultural cradle of the arts, weighed down in its economy by increasing population—increasing 50 percent from 1900 to 1945—and lack of employment—one-ninth of population—has had a rebirth of industrial activity. In West Europe it is enjoying a boom of prosperity of sales that is a challenge to the great nations experienced in controlling the trade markets of the world.

This startling change that started 15 years ago has moved Italian industrialists, traders, bankers, designers, and engineers into the global scale of competition.

This surge of strength in the competitive economic field is having its impact on business all around the world.

Italian projects—everything from shoes to dresses; from hydroelectric dams to Fiats are captivating sales markets everywhere—in 3 years Italian exports have increased 30 percent.

We have won the love of the Italian people—the Italian workers, peasants, businessmen and industrialists from Turin to Toranto and from Po Valley to Sicily attested.

The Marshall plan—spring of 1948—stimulated progress on the economic and social fronts. Italy can be proud of her achievements with Marshall plan aid reconstruction, reforms, continuing measurable prosperity—now a boom—and continued growth of democratic institutions including the vital effect of free labor unions.

It caused the turning back of the spread of communism—the stomach kind—and loosened the growing Kremlin grip, strengthened by Communist stooges, in Italy.

Further the real determination displayed by the Italian Government to meet its obligations under treaties with the West—the rearmament program, European integration and others.

The uncertainties of the international situation at times dimmed the optimistic approach toward internal unity but somehow the crisis was always averted by the selection of a strong leader.

The Marshall plan achieved directly agrarian and fiscal reforms—meaning land for peasants and much needed increased revenues from income taxes—to be added the creation of $160 million annual fund for the development of the depressed areas of the south—a survey search for natural resources—gas in Sicily, and so forth.

Italy made progress through national revenue collections, that is, first half of fiscal year 1950–51 total of Lit643 billion nearly equal to the collections for the whole year previous to the Marshall plan.

Bank time deposits more than doubled, Lit87 billion at end of 1948 to Lit198 billion at end of 1950. And other forms of savings deposits at banks rose from 564 billion to 791 billion in the same period. Postal savings doubled the 1948 figure reaching Lit658 billion by December 1950. Finally, the commitments budget deficit declined Lit822 billion.

The predominant overall aid to Italy is military in scope, supervised and directed by the Department of Defense. The role of the Foreign Operations Administration is negligible in proportion. It operates a small productivity program as well as a technical assistance program in Sardinia and Somaliland—Italian trusteeship. The U.S. Information Agency handles the information program. There is a growing need for a central administrative control over these three agencies in order to prevent overlapping and duplication of services.

It can be honestly stated that the reconstruction program in Italy has now been completed. The economic aid program played an important part in its success. The Italians, have, through the recovery period, attacked many obstacles that prevented the advancement of better standards of living—being the lowest among European countries. The Cassa de Mezzogiono Fund was established—100 million lires a year for 10 years—to finance an integrated program for the development of the poverty stricken southern Provinces. At first American aid was given to start this program, but presently the Italian Government bears the cost. A key project in this program is a land reform program—thousands of peasant families are resettled on small homesteads—often on land unused by several land barons who received compensation for its releases. Peasant incomes increased, housing projects resulted and revolutionary seizures of lands ceased. The total effects upon the political front resulted in pro-Communist administrations being defeated. Our aid was an offset to communistic appeal among the poor.

It is said that in certain instances American aid made some Italians rich and the vast majority have been unaffected—that this served to freeze the archaic economic structure of Italy—yet no one can deny that with the earning power of the common man increased through new opportunities of employment, even at the old stand, the increased strength of the national economy

resulted in the financing of new reforms to relieve the economic pressures upon the less fortunate to grant new opportunities for their betterment. But in spite of the lack of resources, and the need for the modernization of Italy's economic institutions, Italy has in part and will in the future solve these problems themselves.

It is well said that, had not the United States, in its first postwar program, initiated the Marshall plan as an approach to the economic problems of European nations, NATO might never have been born. NATO came soon after. It was wholly military.

We, the members of the delegation, respectfully submit this report to the Congress.

Mr. Speaker, it is my very happy privilege to speak for the record the very interesting experiences that my good friend, the distinguished Gen. Julius Klein, had in Rome at a reunion with General Teucci, who, like Marshal Balbo, so fondly remembered Chicago in 1933 when the Italian air armada visited the World's Fair and renewed his old friendship with the then Captain Klein, who entertained him during that memorable visit.

Everyone in the Chicago area remembers Julius in his distinguished career as a newspaperman in the days of the criminal court. He was in attendance at many celebrated criminal trials, and his writings enamored him to thousands of admiring citizens. His unique style of reporting won for him great fame in the newspaper world.

His service under Douglas MacArthur in the Pacific and the author of the original Army combat public relations plan added to his distinguished services. A much decorated veteran who has time and again been sent to Europe on confidential missions to interview authorities there on extra-European problems which directly affect European policies and actions. It was considered a job well done in accordance with the remarks of Hon. STYLES BRIDGES, of New Hampshire, Hon. HUBERT H. HUMPHREY, of Minnesota, Hon. ESTES KEFAUVER, of Tennessee, Hon. STUART SYMINGTON, of Missouri and Hon. ALEXANDER WILEY, of Wisconsin. Many features of the report and some of the policies recommended have already been adopted.

His qualifications and ability to conduct study missions given him by our Government, based upon his experience with military and national defense problems, are acknowledged by everyone. He has received the congratulations of men high in the ranks of our military control. His acceptance by European leaders is reflected in their many confidences that were entrusted to him in many separate conferences at the behest of our Government. He has been unfailing in his love for his country and stands out as one of the great Americans of our time.

We of the Illinois delegation are especially proud of the great services that this patriot from Chicago has rendered to not only our Government but in its effect in the defense of the liberty-loving nations of the world.

The following insertions are indicative of the true greatness of our esteemed friend:

REUNION IN ROME—CHICAGOAN MEETS OLD COMRADE

ROME, Italy, July 1.—In 1933, Marshal Italo Balbo and his famous armada flew to the Chicago World's Fair. In this group, as aide to Marshal Balbo, was 1st Lt. A. Giuseppe Teucci. The Chicago host to the Italian visitors was the late Lt. Gen. Roy D. Keen, then commanding general of the 33d Infantry Division, Illinois National Guard. His aide was 1st Lt. Julius Klein. When the Italian and American aides met they did not dream that 27 years later they would meet again after many dramatic experiences.

Lieutenant Teucci returned with Balbo to continue his service in the Italian Air Force, where he had a brilliant career. Later he became air attaché at the Italian Embassy in Berlin during Hitler's regime. Teucci was a royal officer, loyal to the King only. Klein continued his career, became a colonel and general officer under General MacArthur, receiving many decorations and citations for his service as a combat officer.

Before the war Julius Klein's sister Frances, who was born in Chicago, met and married a well-known Czech textile manufacturer—Nathan Ticho. When the Nazis invaded Czechoslovakia, the two Ticho brothers were arrested and their factories confiscated. The brothers were taken to the Dachau concentration camp.

Mrs. Ticho, who retained her American citizenship, was permitted to go to Switzerland. All efforts to gain the release of Nathan Ticho from the concentration camp failed. The children were held as "hostages," until finally freed through the intervention of American authorities.

Finally, General Klein and his brother, Dr. Ernest L. Klein, prepared a telegram which was translated and dispatched by the late Chicago Judge Sbarbaro to Marshal Balbo. In the telegram General Klein, then colonel in the 33d Division, reminded Balbo of their friendship during Balbo's visit to Chicago and recalled the picture which Marshal Balbo autographed for the then lieutenant.

Balbo replied immediately from Libya where he was stationed, saying: "I received your cable. Will help you. Have instructed your old comrade and friend, Teucci, who is now my air attaché in Berlin, to try to help you get your brother-in-law out." (Signed "Balbo.")

The day the cable arrived in Chicago, news reached America that Balbo was shot down and killed over Libya. All hope was given up then that Klein's brother-in-law would be released. But Teucci in Berlin had received the order in time from Balbo and went to Goering with Balbo's last wish. Goering issued an order for release, and Teucci immediately went to the concentration camp. When he arrived, he learned that Nathan Ticho's brother had been killed a day earlier, but he got there in time to save Klein's brother-in-law. On his release, Nathan Ticho went to Switzerland to join his wife and they returned to Chicago.

But the story doesn't end here. When Mussolini, after his rescue by Hitler, again assumed full power over the Fascists, the royal officers of the Italian Army remained loyal to the King; and Teucci, who was then in Berlin, refused to go along with the Fascists. He was arrested by the Gestapo and put into a concentration camp in Oranienburg, not far from Dachau. He remained there for part of the war and was turned over by the Nazis to the Italian Fascists for trial. Finally, he escaped and joined the underground. When the Americans landed in Italy, he was one of the first Italian high-ranking officers to be selected by the Americans to reactivate the Italian Army and Air Force. He ended his career as a full general and chief of the Italian Air Force. He has recently retired and was appointed head of the Italian Officers' Organization of Italy.

And now General Klein and General Teucci met again—Klein as a retired major general and Teucci as a retired general of his country. General Teucci gave a cocktail party in his home for Dr. Ernest Klein and his wife, and General Klein and his wife in Rome recently. They reminisced about their meeting 27 years ago, and General Teucci told General Klein that the remaining members of the old Balbo squadron will celebrate the 30th anniversary of their historic flight with a reunion in Chicago, where they hope to meet many American comrades who were with them during their visit to the 1933 Chicago World's Fair.

The Tichos still reside at 5240 North Sheridan Road. Their eldest son is now a famous physicist at the University of California and was one of the young men who worked on the Manhattan project. Another son, who graduated from the University of Chicago, is a practicing attorney in Chicago. Another one is a well-known TV director.

The Daily American of Rome, Italy, reported the Teucci-Klein reunion as follows:

"Maj. Gen. Julius Klein (retired) of Chicago, now in public relations, is a current guest at the Excelsior, where he had a reunion the other night with Italian Lt. Gen. A. Giuseppe Teucci, also retired. The two men were both lieutenants during Balbo's historic mass flight to Chicago in 1933—Klein as aide to the commanding general of the 33d Infantry Division, Teucci as aide to Balbo; and it was Teucci, when he was air attaché in Berlin in 1940, who was responsible, by interceding with Goering, for the release of Klein's brother-in-law, Nathan Ticho, from the concentration camp at Dachau. The two ex-generals plan another reunion in Chicago in 1963, to celebrate the 30th anniversary of the Balbo flight."

[From the Rome (Italy) Sunday American, July 17, 1960]

A FRIENDSHIP OF 17 YEARS RENEWED IN ETERNAL CITY

Two generals have just shaken hands in Rome—and sealed a firm friendship that bridges 17 momentous years.

A friendship which once saved a father and son from the horror of almost certain death in Dachau.

It began when Gen. Giuseppe Teucci—then a colonel—flew into Chicago after a feat that thrilled the world and set a milestone in aviation history.

Twenty-five Italian Air Force planes had just crossed the Atlantic en masse, led by the nation's youthful air minister Gen. Italo Balbo. It was a pioneering achievement.

And it captured the imagination of pioneering America.

August 1933 * * * Chicago is in holiday mood. The World's Fair is being staged there. And half the Windy City turns out to roar a massive welcome to Balbo's 100 flying heroes from the Old World.

BALBO'S FLIGHT

Balbo has shunned aces for the flight. "He wanted to show it could be carried out by ordinary pilots," Teucci explained years later.

But Chicago is giving them the back-slapping, hero's treatment. They're feting the Italians in prohibition era bars. They're stopping them in the street for warm handshakes.

For Balbo's men haven't only proved that mass transatlantic flights are possible. The

second purpose of their trip: to carry a message of friendship and good will from Italy to the United States.

And Chicago even names a street "Balbo Avenue" in honor of it all.

And it's against that setting that Teucci's friendship with Maj. Gen. Julius Klein began. Teucci was Balbo's pilot and aide. Klein—a captain then—was aide-de-camp to General Keen, named to host the Italian fliers.

And before the 25 planes took off again after 4 days of VIP treatment, Klein and Teucci had become firm friends.

They began writing to each other, sending photographs of their families. The war clouds gathered. But the letterwriting went on.

WAR INEVITABLE

It's 1937. War seems inevitable. And Teucci is sent to Berlin as air attaché at the Italian Embassy. His is a difficult, delicate mission. There are the regular calls on Hermann Goering, the endless round of conference * * *.

But he still has time for "my American friend."

And soon that friendship is to be put to a severe test.

From Klein—later to become the highest ranking Jewish officer in the American forces—comes a dramatic letter. "My brother-in-law and his son are in Dachau. I'm worried about them. Can you do anything to get them released?"

A similar letter went to Balbo.

And Teucci acted.

Off to Goering's office went an official memorandum. Then the Luftwaffe boss summoned Teucci.

They talked about the two Czech Jews now languishing in the Nazi concentration camp. Explained Goering frankly: "It will be very difficult, you know. The only person who has full powers in matters like this is Himmler."

Teucci pleaded: "But these are close relatives of a very good friend of mine."

And Goering promised: "I'll see what I can *do*."

LETTER ARRIVES

Teucci heard no more * * * until a letter came to tell him the two had been freed and were safely in America.

Says Teucci: "I only did the right thing. It was a simple act for the sake of my friend."

One of the two men he saved now holds a high teaching post in the United States.

America entered the war. Italy was now an enemy. Klein went on active service. And all links between the two friends were severed.

Soon another testing time looms for Teucci.

The Allies have attacked "the soft underbelly of the Axis." Fascism is crumbling. Mussolini resigns, is imprisoned, then freed by Skorenzy's commandos.

Italy has no choice. On September 8, 1943, it surrenders unconditionally to the Allies—while in the north Mussolini counters the action of King Victor Emmanuel by setting up the Italian Social Republic.

Teucci is summoned again to Goering's office for his most dramatic—and the last—meeting with the top Nazi. He asks the Italian: "Where do you stand? Will you stay here and continue to serve Mussolini's regime, or do you intend to obey your King?"

"I must follow my King's orders," replied Teucci.

"I understand completely. You are a military man. It's the obvious decision," said Goering.

The Germans arrested Teucci and other high ranking Italians and sent them to a prison camp near Berlin. Later they were transferred to a jail in Verona—then to another camp at Novi Ligure, near Alessandria.

NIGHT OF FULL MOON

A full moon bathed the Alpine foothills the night Teucci, an admiral, and other top officers decided to make their desperate escape bid. The war was destined to last several more months. And they wanted to serve their embattled nation.

They knew their Italian guards would turn a blind eye. But suddenly out of the shadows loomed a patrol of Germans. "Where are you going?" they demanded.

Replied Teucci: "We're off to hunt partisans."

"Good hunting," quipped the Germans—and let them pass.

They reached the mountains, and the partisan groups harassing their German invaders. Teucci was assigned a group of men.

And until the war ended he was to be known simply as "Guido" by his comrades on one of World War II's strangest battlegrounds.

Gone was his smart blue uniform. Instead he wore a pair of khaki slacks, a sweater and a beret. The only concession to his past as a pilot for Balbo—killed earlier in the war over Libya—and air attaché in Berlin: His pilot's wings pinned to that sweater.

War's end saw Teucci leading his men down from the mountains and through the rejoicing streets of Genoa.

But his air force career was not yet over. Italy was reconstructing a sound future within the framework of the Western alliance. Its military might was being built up again.

And Teucci was sent to command the air force war college in his native city of Florence. He was promoted general. Later he was appointed to a top post at the defense ministry.

Then became commander of the air force's vital third zone.

Klein meanwhile had left the American Armed Forces. He set up a thriving public relations organization in Chicago. He was making a name for himself in the hurly-burly of politics, and in other spheres of public life.

PRAISE FROM CONGRESS

His work was praised from the floor of Congress. Senators of all parties hailed his mission to Europe as an unpaid consultant for a key subcommittee.

He restarted his letter-friendship with Teucci. Once, during his globe-girdling travels, he came to Rome. But Teucci wasn't in town.

But finally they have met up again—for the first time since those Chicago days in 1933. Klein thanked him personally for his moves that saved his two relatives.

They chatted over old times—and fixed a date to meet again in September.

Teucci—he went on the reserve last year, is now president of the Italian Air Force officers' elegant club in Rome—said: "It was wonderful to meet again.

"Now we're discussing the possibility of holding a big reunion in Chicago in 3 years time for the pilots of the Balbo flight and our American comrades.

"But I don't think there are many of us left * * *."

[From the Rome (Italy Daily American, July 1, 1960]

PASSING PARADE

Maj. Gen. Julius Klein, retired, of Chicago, now in public relations, is a current guest at the Excelsior, where he had a reunion the other night with Italian Lt. Gen. A. Giuseppe Teucci, also retired. The two men were both lieutenants during Balbo's historic mass flight to Chicago in 1933—Klein as aide to the commanding general of the 33d Infantry Division, Teucci as aide to Balbo; and it was Teucci, when he was air attaché in Berlin in 1940, who was responsible, by interceding with Goering, for the release of Klein's brother-in-law, Nathan Ticho, from the concentration camp at Dachau. The two ex-generals plan another reunion in Chicago in 1963, to celebrate the 30th anniversary of the Balbo flight.

JULIUS KLEIN PUBLIC RELATIONS., INC.,
Washington, D.C., August 31, 1960.

The Honorable ROLAND V. LIBONATI,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN LIBONATI: Regarding the telephone conversation today between you and my associate, General Klein, I take great pleasure in enclosing herewith the story, "Reunion in Rome" and also the newspaper account which appeared in the Sunday American in Rome.

* * * * *

During the visit of Marshal Balbo, I was commanding officer of the 106th Cavalry—Illinois National Guard, and as you may recall, I was later chief of staff of the Illinois National Guard. I had the pleasure of meeting you some several years ago at a luncheon to discuss an award for Nate Gross. I hope that I may have the pleasure of seeing you soon again. I have my permanent headquarters in Washington.

Sincerely yours,

KENNETH BUCHANAN,
Major General, U.S. Army, retired, Vice President and General Manager.

Mr. LIBONATI. Mr. Speaker, as a member of the House Judiciary Committee's Subcommittee No. 3, which handles legislation affecting Federal prisoners, I visited, during August 9–12, 1960, the Cook County jail in Chicago, Ill., the U.S. penitentiary at Terre Haute, Ind., the Federal reformatory at Chillicothe, Ohio, and the Federal correctional institution at Ashland, Ky. Mr. Cyril F. Brickfield, committee counsel, accompanied me. Mr. Roy Guenzel, Federal jail inspector, acted as our escort and representative of the Federal Bureau of Prisons during the entire series of visits.

COOK COUNTY JAIL

The Cook County jail is used by the Federal Bureau of Prisons in the Chicago area for the confinement of persons awaiting trial in the Federal courts or convicted Federal offenders sentenced to brief terms. An average of slightly more than 3,000 Federal prisoners daily are confined in this manner in various local county jails or other non-Federal institutions throughout the country. In order to insure that these Federal prisoners have adequate custody and care, a program of jail inspection and ratings has been in use by the Bureau of Prisons for the past 30 years. The total cost of all services incident to the custody and care of such prisons runs about $3,200,000 annually or about $2.85 per day per prisoner. Of more than 3,000 local jails in this country, about 800 are approved for Federal use.

On the morning of August 9 Mr. Brickfield and I met Inspector Guenzel at the jail and Warden Jack Johnson escorted us on a tour of the facilities, including three of the cellblocks, the culinary and bakeshop department, the hospital and medical areas, the chapel, schoolrooms, laundry, several of the shops, the yard, and several offices. During the course of the tour we met and discussed jail problems with Assistant Warden Frank

Trankina, Steward Arthur Davis, Protestant Chaplain Louis King and several others.

Warden Johnson feels that the presence of Federal prisoners in his jail causes a number of problems. Even without the Federal prisoners the jail would be seriously overcrowded. The Federal population runs between 25 and 60 on any given day, and an entire 60-man tier is set aside for Federal use. The Federal prisoners are also provided more extensive medical treatment than the local prisoners, although the services of U.S. Public Health Service personnel for this purpose tends to minimize this problem. The Federal prisoners typically are required to make several appearances in court, the Federal judges require more examinations of the prisoners for psychiatric, medical, and social data, and these factors add to the burden of traffic through the jail.

While Warden Johnson deals with the jail inspector in connection with overall confinement practices, he works chiefly with the local U.S. marshal on matters pertaining to the individual inmates that are committed, the visitors they are to be allowed, the type of custody they require, and so on. The problem of keeping out contraband—narcotics, alcohol, and so forth—is an ever-present one. Also, with a heavily populated institution a large number of the prisoners must sit in idleness, and it is a trying job for the warden to find meaningful work to occupy their time.

Considering the limitations of the facilities under which the Cook County Jail is operated, Warden Johnson is, in my opinion, doing a very satisfactory job for the Federal prisoners committed to his care.

U.S. PENITENTIARY, TERRE HAUTE, IND.

Arriving at the Terre Haute institution on the morning of August 10 we met in the warden's office for a briefing session attended by Warden Wade T. Markley; associate warden—business—E. H. Saunders; associate warden—custody—H. J. Davis; associate warden—treatment—J. E. Baker; Chief Medical Officer, E. C. Rink; and Superintendent of Industries L. R. Parham. Warden Markley first explained how the institution functioned administratively. The associate warden—business—handled such departments as personnel training, business and fiscal, culinary, farm, and the inmate commissary. The associate warden—custody—was responsible for the custody of the penitentiary's 1300 inmates, for the physical maintenance of the institution, all construction, and such services as power, water, and sewerage. The associate warden—treatment—supervised the religious, educational, vocational training, social work services, and the prisoner classification program. The superintendent of industries ran the woolen textile mill and the furniture refinishing factory. The chief medical officer, a commissioned officer of the U.S. Public Health Service, heads the medical, psychiatric, and hospital services. All these departments employed and trained varying numbers of inmates. Except for about 10 percent of the inmates, who had just been received, were in the hospital, had been segregated for punitive reasons, or were being held for transfer elsewhere, all inmates had job assignments.

The warden described the daily routine of the inmates and the manner in which each case is handled from the time of admission to the time of release. After being studied and observed in the admission-orientation for a month following commitment each inmate follows a program of work, education and vocational training, religion, recreation, and other activities that is developed for him by the institution's classification committee, composed of the heads of the major departments. For example, the institution is well equipped with leisure time activities, including many types of athletics, an extensive program of academic classes, hobby shop, music, Alcoholics Anonymous chapter meetings, religious activities, social education, library, radio and television.

Based on my observations of other institutions it appeared that Terre Haute is one of the best designed prisons in the Nation and I was pleased to learn that its superior facilities are devoted to a relatively youthful population, upon whom I feel the most intensive rehabilitative efforts should be concentrated. While the average age of the inmate population is about 30, the largest group falls into the age 23 to 26 bracket. Each of these men differ individually, and hence the program is widely varied in order to have a range of activities that will meet the equally wide range of problems that these prisoners present. Warden Markley reported that the population contained a hard core of about 100 prisoners who are potentially dangerous and most difficult to reach by any known technique. These men suffer from character disorders and are sometimes referred to as psychopaths or sociopaths. Some display elements of psychosis. In my opinion more should be done in the way of corrective treatment for this group of men. It is apparent, however, that the relatively small staff is doing the best it can under the circumstances. With a population of 1,300 the institution has an employee complement of 227, which must be distributed on round-the-clock shifts 7 days a week. The Federal Bureau of Prisons is presently contracting for the construction of a maximum custody institution in southern Illinois, to which I understand some of the more difficult cases will be transferred.

I asked the warden how the new sentencing legislation approved by this committee in 1958 was working. While the courts are not committing many men under the newly authorized indeterminate sentencing procedures, the courts are making increased use of the procedure which permits them to commit prisoners to Federal institutions for a 3- to 6-month period of study before a final sentence is formulated. This has substantially increased the work of the staff, for they try to provide the court with extremely full information in each case, including medical, psychiatric, and social data as well as vocational, educational, and other needs of the defendant. Also, because the courts are still committing most offenders under the old definite sentencing system, the institution is still faced with the problem of handling inmates who have extremely disparate sentences although they may have substantially similar backgrounds and offenses.

After the briefing in the warden's office we visited the dining room and kitchen, the social service offices, the educational department, the hospital, the chapel, the library, segregation cell, and dormitory quarters, the maintenance shops, the furniture refinishing shop, the woolen mill, and the farm. I was impressed by the attractive architecture of the penitentiary, and it served to demonstrate that a prison does not need to be grim, forbidding, and repellent. The buildings are as nearly fireproof as modern architecture can make them. Construction is of reinforced concrete frame, with brick walls backed by concrete blocks which are left unfinished on the interior to present a pleasing and artistic touch.

The variety of the educational program was particularly extensive and included courses at all levels from the beginning grade up to and including some college subjects. Attendance at the school is not compulsory except for those who are functionally illiterate, but about half the population is engaged in some type of educational or vocational training work. The school is open 5 evenings a week under the supervision of the education staff. Both personnel and inmate teachers are used. The library has a particularly attractive setting, and I was impressed at its size and organization.

The chapel has an atmosphere that harmonizes greatly with its purposes, and it is equipped with interchangeable altars for the various faiths. It is open at all times.

The hospital is well-equipped, and I would say that it compares favorably with most hospitals of similar size in the free community. However, the penitentiary has only one psychiatrist, and it is apparent that for the many personality problems in its inmate population more psychiatrists are needed.

Unlike some of the prisons I have visited Terre Haute has individual cells for a major proportion of its population; the cell units that I visited seemed remarkably clean and sanitary. In my conversation with Warden Markley I learned that most inmates appreciate the privacy of an individual cell. This type of housing is also an asset to the penitentiary for the control of a relatively unstable and youthful population.

The industrial activities of the prison appear to furnish a most desirable type of training. The furniture refinishing shop provides an economical service to the Government, and the finished items, which look like new furniture, bear evidence of the training skills acquired by the inmates assigned to this activity. The machinery and operations of the woolen mill appeared to be complex for a prison industry, and the products were of high commercial quality despite the

fact that none of their inmate workers had any previous training in this work before their commitment to Terre Haute.

Terre Haute has one of the largest farms in the Federal prison system. Of the 2,700 acres comprising the prison reservation, about 2,000 acres are under cultivation. Buildings and grounds occupy about 120 acres, and the balance is made up of roads, walks, pastures, and some areas of wooded or otherwise untillable land. Generally the farm crews constitute about 15 to 20 percent of the total population. More than one-third of the institutional requirements for fresh vegetables and fruit is produced on the farm, and it produces nearly 100 percent of its meat requirements. For the minimum custody inmates assigned to the farm a new dormitory is under construction. This building, which would have cost about $1 million if constructed by commercial contract, will cost slightly more than $600,000 with the use of inmate labor.

FEDERAL REFORMATORY, CHILLICOTHE, OHIO

At Chillicothe we also met in the warden's office for a briefing session before touring the institution. Chillicothe now has the largest concentration of Federal Youth Corrections Act cases of any institution in the Federal Prison Service, a total of 694. This represents 55 percent of the population, as compared with 30 percent 2 years ago, I was told. The change in the composition of the population from those serving predominantly adult sentences to those serving youth sentences has gradually changed the mission of the reformatory. The average age of commitments is 20.9 years; the offenders with regular adult sentences and juveniles serve an average of 18 months and the youths an average of 20 months.

I learned from Warden Walter Jacquot and his Associate Warden A. E. Pontesso, that although the youth cases are generally not as sophisticated or as criminally oriented as those receiving adult sentences, they usually come from deplorable home backgrounds characterized by neglect and indifference. Usually they have little or no work experience and have built up a pattern of failure since early childhood—failure in school, failure in a work situation, failure in the military service, and failure to establish worthwhile, wholesome interpersonal relationships.

With the foregoing in mind Warden Jacquot sees the staff's job as one of carefully planning a series of successful experiences in line with the individual's capabilities so that he may gain a self-concept that will enable him to compete with individuals in a free society. This requires a careful evaluation of his weaknesses and a planned institutional program that will enable him to correct his deficiencies in every area. The first step seems to be to motivate the individual to improve himself, and here the indeterminate features of the Youth Act provide the greatest possible motivation for change. Improving himself through the pursuit of academic studies, vocational training, and a generally improved attitude toward his fellows and toward his supervisors follow naturally once he has made up his mind that his release depends on the effort he makes toward self-improvement. Goals set by the classification committee must be met before he can be considered for release, and the Youth Division of the U.S. Board of Parole furnishes complete cooperation in enforcing this policy.

We were shown the three types of quarters at Chillicothe—cell house, open dormitory, and room dormitory, preferred by inmates in the order listed, and Warden Jacquot explained how the inmate earned better quarters and assignments. After the initial 30-day admission and orientation period the inmate goes automatically to a post orientation unit, and from that point he must earn his promotion to better quarters until he reaches an honor unit with additional privileges. The quarters officer is responsible for recommending quarters change and this procedure encourages a cooperative relationship between the officer and his charges. Upon inspecting the quarters I found them neat and clean.

For about an hour we attended a classification committee meeting, were furnished copies of the admission studies of those inmates scheduled to be classified, and were able to follow the discussion of the committee members concerning recommendations for programing. I was especially impressed with the efforts made to establish realistic goals for each individual classified. Also, the caseworkers as well as other committee members took the time to outline patiently each man's program and to explain the reasons for custody and work assignments.

The reformatory has an interesting vocational training activity, the airplane mechanics school, and Mr. R. O. Smith, its principal, conducted us through it. The school, he told us, has maintained a fairly constant enrollment of about 60 students for the past 20 years. During that period about 1,300 young men have been trained to meet Federal Aviation Agency standards. Ninety percent of those receiving FAA licenses are employed by the aviation industry upon release. Although the school appears to be a relatively expensive training program, the potential cost is substantially reduced by acquiring surplus planes, engines, and equipment from the Air Force. For example, the school recently acquired an H–19 helicopter from the Air Force. In my opinion, Chillicothe's airplane mechanics school is one of the finest training programs that I have seen in a penal institution.

The chair factory, a unit of Federal Prison Industries, Inc., is a very businesslike operation. I learned from its superintendent, Mr. Arthur E. Bogan, that the factory produced 5,318 chairs in July of this year.

We visited most of the vocational training areas of the institution. Training registered under the Ohio State Apprenticeship Council is provided on a full-time basis in several shops, including the machine, plumbing, auto mechanics, sheet metal, electric, cabinet, paint, and brick shops. Trainees attend classes in related training for 2½ hours a week in order to master the mathematics, blueprint reading, and other subjects allied to their specific trade training. The reformatory also offers training in welding, and on-the-job training is furnished to men in the cooking and baking school. In addition, the various construction crews and maintenance details such as laundry, clothing room, landscape, orderlies, janitors, file clerks, typists, and so forth, provide excellent training for the men, although these are not officially designated as vocational or on-the-job training. Since many inmates cannot be trained in highly skilled trades, these maintenance assignments serve to help them develop good work habits and find their own levels of employment.

The approved apprentice program in 17 separate trade areas which meet the requirements set up by the U.S. Bureau of Apprenticeship and the Ohio State Apprenticeship Council mean that the inmate receives something concrete in the way of recognition for his accomplishments and assurance that the training he receives will be accepted at face value by employers after his release. It also serves as a valuable guide to the treatment staff in evaluating the effectiveness of the vocational training program. Excluding the airplane mechanics school, there are about 300 inmates active in the vocational training program.

Day school classes were in session when we visited the school. Compulsory day school is primarily for near illiterates and those who need refresher courses in grammar and junior high school subjects in order to qualify for formalized training programs. Night school gives those inmates with the background, capability, and interest an opportunity to earn high school credits. The school is State approved and is chartered under the name Sherman High School. Each year from 30 to 50 students earn high-school graduate diplomas. Total enrollment in night school is about 250.

Upon inspecting the dining room I picked up a few interesting facts about feeding 1,260 hungry young men from Food Administrator Ray Bethel. For example, each inmate consumes 6.8 pounds of food per day, which is about one-third above the national average. To serve a spaghetti dinner like the one served to us in the dining room that day took 400 pounds of spaghetti and 800 loaves of Italian bread. Average consumption of bread per day in addition to hot rolls, biscuits and other bakery products runs one-half loaf of bread per day per inmate. The total cost per day per inmate, including farm costs, averaged about 52 cents. This low figure was attained in large part by efficient farm production, which also provided employment and training for about 85 rural-type youths.

FEDERAL CORRECTIONAL INSTITUTION, ASHLAND, KY.

Upon reaching the Ashland institution we talked to several members of the staff in the office of Warden Richard J. Heaney. We learned that the role of the institution had changed in the 20 years since it had received its first commitments in 1940. The physical facili-

ties were originally planned for adult offenders, many of whom served relatively short terms for violations of the Internal Revenue liquor laws. The treatment and training needs for this group of offenders were relatively simple, and hence space for education and vocational training activities were limited. These deficiencies became marked when in 1953 it was decided that Ashland would serve as the diagnostic training and treatment center for Youth Corrections Act commitments from the courts in the eastern half of the United States. Since 1953 the mission of the institution has continued to change. In June 1957 the institution held 424 Youth Act commitments, but this figure had dropped to 245 by August 1, 1960. In place of the somewhat older youth offenders the institution now has 258 of the older juveniles, many of whom have serious emotional problems. These younger offenders present a greater challenge for institutional treatment and training and make the need for improved facilities more urgent.

The first step in the institution's long-range plan of development is to build a new education library building joined to the main corridor. I am personally hopeful that this building will contain space for hobbycraft activities, for my experience in the boys' camp I founded at Coloma, Wis., suggests that this type of activity is extremely helpful in working with difficult youngsters. Once the new education building is completed, the staff will then return the present improvised education center to its original purpose as a dormitory. An additional room-type security dormitory would also be valuable in controlling the more difficult youths.

Ashland has a new chapel, and I was impressed with the fact that all of the construction—conversion of a dining room bay—and the fabrication of the accessories was done by the youthful inmates under the supervision of the staff. The institution has two chaplains—Catholic and Protestant—on full-time duty, as had the other two institutions we visited, and they conduct weekly and special worship services, religious education classes and choirs, besides doing a great deal of personal counseling.

The training the youths receive in the maintenance shops seems to me a realistic way of equipping them for worthwhile jobs in the community. We also visited the vocational training shops in the industries building, where training is given in auto mechanics, welding, and woodworking and where a number of youths are assigned for preliminary vocational evaluation.

We sat in for a short time on the classification committee meeting and observed the manner in which the committee handled the cases of one inmate who had been committed under the new observation and study procedure and another whose program was being reevaluated. The problem in the first case, which was sent to Ashland for pre-sentence examination, seemed to be how to motivate the young car thief to participate in the educational and vocational training program in the event of his commitment to a prison institution. It illustrated quite well the need for everyone within the institution to work together: the psychiatrist, the chaplain, the caseworker, the quarters officer and the work supervisor, each having an important part to play in the youth's treatment and training program. The committee recommended a Youth Act commitment, which would guarantee his supervision and control for a period of 6 years with parole eligibility at any time that he might earn it. This was the way I had hoped the new procedure would work, for it has been my observation that the courts need the advice of the institution staff in imposing sentences.

The other case was a young man who had been at Ashland for 17 months. During this time he had received his general educational development certificate; he had been trained to be reasonably proficient in a number of construction skills; he had participated in the religious educational program and the choir; he had taken an active part in the junior chamber of commerce chapter—sponsored by the local junior chamber of commerce—and he had advanced to minimum custody and honor quarters. After reviewing these reports the committee recommended that he be given an early parole hearing.

The institution has the same problem as so many other similar institutions elsewhere. In the 20 years since it was constructed the city of Ashland has been growing up around it. It is usually desirable that this type of institution be located at least a short distance removed from densely settled communities. However, the community takes a great interest in the institution and the warden encourages this community support. The Kiwanis Club and other organizations frequently visit the institution. When a small fire occurred in the industrial unit the night before my visit the city fire department assisted in putting it out. The institutional athletic teams play games in the community with outside teams. While the location of the institution so near the community might be expected to be an inducement for escapes by the youthful inmates, the escape rate is quite low.

As a result of my visits to the three Federal institutions I had to conclude that a remarkably fine job was being done in the light of the relatively limited resources of funds, manpower, and facilities. It appeared to me from sitting in with the classification committees of the three institutions that the new sentencing procedures approved by this committee in 1958 are working out well. The cases being committed for observation and study are receiving particularly thorough handling, and the extensive information this new procedure provides the courts should do much to ease the burdensome problem of sentencing for the courts, particularly in the more complex cases.

In summary, I visited these Federal institutions not so much to inspect them but to learn about them. I found them characterized by an exceptionally high level of management. I earnestly recommend to my fellow Congressmen that they take a greater interest in their Federal prisons. Their visits, I am sure, would be as instructive as mine have been.

URBAN RENEWAL IN THE DISTRICT OF COLUMBIA

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New Jersey [Mr. THOMPSON] is recognized for 30 minutes.

Mr. THOMPSON of New Jersey. Mr. Speaker, it is becoming increasingly clear that the present urban renewal program in the District of Columbia is in very great trouble.

The Reverend Robert G. Howes recently made a study of urban renewal in the Nation's Capital, a study which was commissioned by the National Conference of Catholic Charities. He testified on April 26, 1960, before subcommittee No. 2 of the Committee on the District of Columbia of the House of Representatives. At that time he said that—

> The present direction of urban renewal in the District of Columbia is most unfortunate from the point of view of the District which has the dimensions of disaster from the point of view of urban renewal elsewhere in the country.

The Senate District of Columbia Committee recently ordered a staff investigation of Washington's multimillion-dollar redevelopment program; and this week, on August 29 members of the Committee on the District of Columbia of the House of Representatives called for a study of the urban renewal program.

It is to be hoped that this study will be searching and thorough.

The urban renewal agencies of the District of Columbia have cleared a 500-acre tract in Southwest Washington with Federal funds, and so far have succeeded in having built there a high-rise apartment house with very expensive and costly rentals.

What happened to the people who lived there, and what concern has been shown for their welfare? We know that one day the bulldozers moved in, and these fine people had to move out. Many of these families have moved in with other families in other sections of the Nation's Capital—so that many one-family homes are now occupied by several families. This has helped to spread the blight.

Having failed in Southwest Washington, the planning and urban renewal agencies have embarked on an ambitious urban renewal program in Northwest Washington known as the Adams-Morgan urban renewal project. Here their plan calls for the destruction of a fine residential neighborhood on Lanier Place and the substitution of a parking lot for the fine homes on the street.

To find out what happens to the people involved in these urban renewal programs I turned to the testimony of the Reverend Robert G. Howes before the Committee on the District of Columbia; and I include it here as part of my remarks in the hope that it will thereby

be made available to those who will study the city's urban renewal programs:

STATEMENT OF THE REVEREND ROBERT G. HOWES, DIOCESE OF WORCESTER, MASS.

Father HOWES. My name is Rev. Robert G. Howes. I'm a priest of the Diocese of Worcester, Mass. I'm a graduate student of city and regional planning at the Massachusetts Institute of Technology, author of a staff study on urban renewal in Southwest Washington, D.C., known as "Crisis Downtown," which I believe the committee has a copy of. If the committee doesn't have it, I would be glad to provide it.

I am speaking this morning with the approval of the auxiliary bishop of Washington and I am speaking also in the framework of reference of this church study which was commissioned by the National Conference of Catholic Charities.

I think it must be said in the beginning—I am paraphrasing now—that our interest in urban renewal continues in Southwest Washington to be an interest in the human aspects of renewal.

My testimony is long because we feel that the present direction of urban renewal in the District of Columbia is most unfortunate from the point of view of the District which has the dimensions of disaster from the point of view of urban renewal elsewhere in the country, which I am sure you gentlemen know much more than us is a burning topic. What happens in urban renewal in Southwest Washington we are convinced is of much more than local significance. The first Federal urban renewal grant in the Nation went to the Redevelopment Land Agency of the District of Columbia for urban renewal in Southwest Washington.

Again I paraphrase. I skipped.

Monograph 3 of the "Comprehensive Plan for Washington" issued by the National Capital Parks and Planning Commission in June of 1950 noted:

"The Congress has indicated that it regards the District of Columbia as a pilot example for the Nation as a whole in the application of the Housing Act of 1949. This applies to both public housing and redevelopment projects. Typical solutions for both programs should thus be sought."

Another indication of the national notice that was visited upon this project in Southwest Washington, is cited from the fact that one of the major urban renewal cases in the country, *Berman* v. *Parker*, which was decided in the context of Southwest Washington's situation is the lead article in the 1953 fall issue of the Journal of the American Institute of Planners:

"Perhaps no urban district in the United States has been so widely discussed over the past year as the Southwest Survey Area of Washington, D.C. The interest of planners, architects and others has been nationwide. They think of Washington as a symbol of good planning, a model for other communities. Successful planning and redevelopment in the shadow of Capitol Hill could very well promote urban planning and redevelopment everywhere."

Again omitting much, as urban renewal gropes its way through these first difficult years of its existence, the lessons of urban renewal under the very nose of the Congress in the Nation's Capital are not lost on planners and politicians across the country. It is essential, then, that the purposes of the Congress in setting up the urban renewal program should be realized in southwest Washington.

What were those purposes? There is time here but for the briefest of reviews. Mr. William Slayton, who is still active, I believe, in the urban renewal situation in Washington said in Law and Contemporary Planning in the summer of 1954 that it required only the briefest survey of the testimony taken prior to the Housing Act of 1954 which created urban renewal to know that the purpose of the Congress in setting up the urban renewal program was primarily a housing purpose, a social purpose.

There is other testimony included in our text.

Launched and annually financed as part of housing legislation, there is no room for doubt that in the mind of the Congress urban renewal was meant to have a major housing orientation. Private desires to the contrary, the Federal urban renewal program was created as part of the specific National Housing Policy.

And what has happened subsequently? Again, omitting much. On the 23d of June, 1958 the then Administrator of Housing and Home Finance Agency, Mr. Albert E. Cole, who formerly, I think, met with some of you gentlemen, made this very significant statement to the National Housing Conference here in Washington. This statement, I submit, has been quoted repeatedly around the country and in church I am sure we are going to see that it is quoted again. I think it sums up perfectly the tragedy of southwest Washington:

"Urban renewal was not created because of the needs of the city, but because of the needs of the citizen. I suspect that if you went about the country asking various people what urban renewal is all about, you would get a lot of different answers. You would be told that urban renewal is intended to save downtown business, or to clear up traffic congestion, or to restore worn-out areas to the tax rolls, or to create the City Beautiful, or to get rid of unsightly slum buildings.

"All of these things are worthwhile dividends of an urban renewal program. But none of them are the things that initially impelled the Nation to launch first the slum clearance and urban redevelopment program and later to broaden it into urban renewal. This program came into being because of people. It took account not just of the economic costs, but even more of the social cost of decaying neighborhoods and urban communities. This is what most of us used to talk about when urban renewal was starting. You don't hear much of that kind of talk anymore, and I think that's disturbing. As we get more and more involved in the demanding and complicated undertakings that urban renewal entails, we seem to have less time for the people whose hopes we are trying to fulfill."

In such a context, gentlemen—and again I beg your pardon for stretching the context, but we are dealing with a pilot project of something that is of vital importance to the urban areas of the Nation and something which will, I have no doubt, be debated in the very near future on the floors of Congress as it has been repeatedly in the recent past—in such a context, reports from urban renewal cities in various sections of the country have been highly disturbing. Instead of providing housing where the need is greatest, time and again accusations have been raised by responsible civic observers that this in fact is what is going on:

First, public participation requirements of the "workable program" do not seem to extend to the accommodation of serious civic dissent.

Second, plans originally designed to meet housing need are changed in the process of renewal to spell out greater densities, higher rents, and, presumably, increased profits.

Three, relocation, despite bulky reports and plans, is not in reality living up to the substantive requirement of the "workable program."

Four, the interest of the private entrepreneur weighs heavier than the interest of the community as a whole, more so even than the interest of the citizens displaced from the project area.

Again I shall omit a number of references.

Mr. ABERNETHY. They will be included in the record.

Father HOWES. Yes, sir.

I do not, of course, claim infallibility for each of the judgments that are in the record, but have not been stated this morning. I do say they are highly significant. The statements include references to Mr. Lewis Mumford, Jane Jacobs, Prof. Herbert Gans of the Institute of Urban Studies at the University of Pennsylvania, Charles Abrams, the former executive secretary of the National Housing Conference, Lee F. Johnson. Hardly, I think, unimportant witnesses. I do suggest that the Nation's pilot urban renewal project in Southwest Washington needs to be viewed in precisely such a context as they provide. I am concerned with how urban renewal went in Southwest Washington as a human experience.

Did it help meet the housing need of the District where that need was the greatest? Did it honestly involve the citizens of the District in its evolution in terms of long-range planning? Has renewal in southwest Washington operated to advantage of the commonwealth, and I speak as John Ihlder did many years ago in terms of the District of Columbia as a whole, not as just one part of it, to the advantage of the commonwealth rather than the private interests?

"Crisis Downtown" details the original proposals for southwest Washington. I shall not repeat them here except to remind the committee that these proposals back in the early part of this renewal process were specifically rejected by those in charge of District renewal.

These proposals called for a heavy upgrading of southwest Washington. They are now, it seems to us, being brought in by the back door when they were rejected at the front door of District planning.

I shall not repeat here the full testimony of "Crisis Downtown" except to quote to you the statement of the National Capital Planning Commission to the District of Columbia Commissioners on October 24, 1952. Again, this is completely in the context of the great District houser whose inspiration, post mortem, has been great upon us, Mr. John Ihlder, who said much the same thing. This is what the NCPC told the Commissioners in 1952:

"It is completely unrealistic to propose that the lower income population of southwest Washington be displaced to be housed"—in Mr. Ihlder's term—" 'elsewhere'. Locations 'elsewhere' simply are not to be found in sufficient quantity and near enough to places of employment to meet this vital requirement of most low-income families."

And what the Redevelopment Land Agency itself stated in its relocation plan for southwest Washington area, project area B, submitted to the District Commissioners on the 16th of January 1953—this is the RLA itself, whose Executive Secretary tells us only too recently, well, of course, it's impossible to put these poor people on valuable downtown land.

"The Agency is convinced that housing of this type"—you remember, gentlemen, that one-third of the rental housing in area B was to be at a $17 per month per room limit—

"The Agency is convinced that housing of this type can and will be constructed in area B. Private low-rent housing constructed under these provisions will be an important addition"—this is the RLA itself; not the opposition—"will be an important addition to the reservoir of housing available for families to be displaced. * * * Many families temporarily rehoused early in the undertaking of this project or whose dis-

placement occurred during the later stages can be taken care of in new housing within the project area."

Instead, the facts are only too eloquent, the situation in Southwest Washington has become so tragic that even the Urban Renewal Administrator himself, Mr. David M. Walker, chose the city of Washington on October 1, 1959, last year, to make one of the most drastic comments that has ever been made on the subject of the Federal urban renewal program. Mr. Walker made his remarks to the Potomac Chapter of the National Association of Housing and Redevelopment Officials whose recent national president was the executive secretary of the Redevelopment Land Agency. Mr. Walker said after his study of Washington, and take a trip to Southwest Washington if you want to see what Mr. Walker was speaking of:

"If urban renewal becomes a program with public housing down at one end and luxury and semiluxury housing down at the other, leaving out a whole gray area in between,"—says the Urban Renewal Commissioner—"this program can go no place but into disrepute, and there it belongs."

On July 17, 1959 we addressed the District Commissioners for the National Conference of Catholic Charities and we said at that time:

"Before this rent ceiling is lifted"—the proposal was to eliminate the $17 per month proviso for one third of the housing in area B—"Before this rent ceiling is lifted careful thought should be given to the result, a strange sort of creature in the midst of the Nation's Capital, his head in the clouds of upper income and"—to quote the redevelopers—" 'gracious living,' his feet in the solid earth of public housing and nothing in between."

Before the District Commissioners in a public hearing on plans for what was then known as the Northwest Washington project, Rev. C. Shelby Rooks, speaking for the Washington Urban League, on July 29, 1959 made the same point:

"The announced objectives for Southwest all included housing for every income group.

"But what has actually happened? Housing there, either built or proposed, is either public housing or luxury and near luxury housing, with a vast desert between."

Is it too much to hope that the Urban Renewal Commissioner himself had read some of the testimony before the District Commissioners in the care of Southwest Washington?

The rest is in the record. Not only has the Redevelopment Land Agency raised densities and eliminated need housing in Southwest Washington, but the serious prospect has been raised that much the same thing may be under way at what was called last fall when the Archdiocese of Washington protested it through the director of Catholic Charities, the Northwest renewal project. The excuse is pleaded that downtown land is too valuable for the poor people to live on it. Surely, in a democratic society, such an argument will not stand long.

The excuse is pleaded that in fact the majority nonwhite displacement has been accommodated in decent, safe, and sanitary housing, to use Mr. Ihlder's term again, "elsewhere." If this is the case, then Washington has found a solution to the problem which frets every major city in the Nation. If this is the case, then there is not overcrowding in other sections of the District, there is not social friction which caused one of the national magazines recently to focus rather unfavorably on the District of Columbia, there is not location of displacees in far-out housing where shopping and transportation become major difficulties. The excuse is pleaded that—and gentlemen, this has been pleaded to my face by those responsible for renewal in the District of Columbia—residents of the project area have no title to the land. But, surely, their title in a need housing situation is at least as great as the title of the out-of-town redeveloper and his "gracious-living" prospects.

Clearly, whether its relocation has been adequate or not, the Redevelopment Land Agency has created two ghettoes in Southwest Washington: one for the rich and the nearly rich, and one for the very poor. It has, I submit, not solved Washington's own housing problem. Certainly, as time goes on and urban renewal moves across the face of the District, displacement into other slum areas from the Southwest will complicate the picture. I daresay, from what I have been reading in the Washington papers, this has already complicated the picture. Without any doubt, as a pilot example, Southwest Washington has failed the Nation when it comes to the primary purpose of the entire Federal urban renewal program; namely, to meet the housing needs of our citizens.

The second human question: Were the residents of the District honestly involved in the renewal experience? At the initiation of the experience the Executive Secretary of the Redevelopment Land Agency said in the Journal of the AIP, and reference is here:

"The (Redevelopment) Land Agency has maintained that the planning of southwest Washington should be by the democratic process, that the ideals, desires, and aspirations of the citizens of Washington should be permitted to have a strong influence on the plan itself."

Once again there is not time for a lengthy inquiry. Suffice it to note that at point after point in the southwest Washington urban renewal experience objection was raised by responsible civic groups within the District. There is no evidence available to us that such objection seriously ever influenced renewal thinking, much less renewal action.

As is only too well known, the District of Columbia does not have an elected government. Neither does it have political parties. In the absence of such, citizens of the District express themselves through various local civic and social organizations. Two of the more universal of these organizations are the Citizens Association and the Civic Association. I remind you gentlemen strongly of the resolution which was passed by the Federation of Citizens Associations of the District of Columbia. This is not the Southwest Citizens Association, the District Federation of Citizens Associations, on the 12th of June 1958:

"Whereas the redevelopment project in the southwest section of the Capital City is now in its fifth year and is considered to be a pilot project for other cities in the United States and"—this is significant—

"Whereas the policies and procedures in effect in the administration of this program have resulted in hardship, injustice, and inequity being inflicted upon many of the former residents of the southwest, some of whom have also suffered financial loss, as well as physical and psychogenic illness.

"*Resolved,* That the District of Columbia Federation of Citizens Associations urgently requests congressional investigation (to present) repetition of deficiencies revealed in the southwest project." In the Washington Evening Star for December 15, 1959, this news item appeared:

"The Southwest Civic Association"—this is the other group—"the Southwest Civic Association last night assailed the Redevelopment Land Agency and others for their failure to provide adequate relocation of families uprooted by their programs. Though no formal motions were passed, the temper of the discussion clearly indicated the group's ill feeling toward several aspects of current slum clearance activities. Referring to the RLA as a showpiece and stating that it 'disregarded the people entirely,' Mr. Calhoun (civic association president, Mr. Leon S. Calhoun) said 'When redevelopment is carried on this way, it can't come to a good end.' "

Time and again the Washington Housing Association, the Metropolitan Washington Chapter of the National Association of Social Workers, the Washington Urban League, the Washington Board of Trade, the archdiocese of Washington have appeared before public hearings to protest various important aspects of the District urban renewal program.

I skip again.

By no stretch of the imagination, in such a context, can Washington's southwest urban renewal experience be said to have been a popularly engineered achievement. Here again, as a pilot project, there is the dimension of disaster in this fact for urban renewal projects throughout the Nation.

In terms of the District's own future, and in terms of future urban renewal projects in other cities, how does southwest Washington stand? Still, as before, the emphasis is human, not fiscal. Statistics and charts, in southwest Washington, as elsewhere, can be deceptive. Figures from the southwest, for instance, show impressive plus totals on the side of some physical improvement after relocation. Renewal's earliest objective is almost always the most rundown area of the city. In such a circumstance, it is relatively easy to spotlight physical betterment in the lot of those displaced. But as renewal moves along into sections less blighted and as the total housing supply decreases at certain income levels, things may not be so bright.

Urban renewal is not a one-night stand; it's pretty much of a continuing operation. We are not in any way saying that more indoor bathrooms and better stoves and firmer plaster for the first batch of relocatees are unimportant. What we are saying is that renewal needs to be estimated in depth and in length. It is far more important to judge how the first urban renewal project meets the basic problems of housing, public relations and general human values than to sit back simply with separate statistics and conclude from a column of figures nicely placed and colorfully frameworked that all is well. Even fiscally, while it can quite easily be demonstrated, and has been demonstrated in Washington, that more direct tax revenue is forthcoming from new construction in the project area than came from previous slums and that the tax drain consequent upon a poor housing section of the city is in fact eliminated by demolition, realism compels us to assess against this increased expenditures in other slum areas and an eventual fiscal explosion when there's just no place left for these displaced lower income families to crowd into. In short by ignoring the problem of need housing, urban renewal in Southwest Washington has no more solved that problem than does the ostrich solve his problem of privacy by sticking his head in the Sahara. It remains. It is, if anything, aggravated by a nonhuman renewal bias. Sooner or later it will return to haunt any city which allows itself to be sold a bill of fiscal goods, a bill which in itself as I have just indicated is of extremely dubious ultimate worth.

My conclusion from all this is simple. Urban renewal in Southwest Washington has not met the clear paramount purpose of the Federal urban renewal program. In the process, even though it is my feeling that the real issues have not been clearly presented to the citizens of the District, responsible civic opposition all along the line expressed in the only method open to those citizens of the District of Columbia has not been honestly accommodated. Besides, there remains a strong suspicion that the private interests in Southwest Washington urban renewal weighed at least as heavy as the common good.

I want to get one more quotation in. I have just two more paragraphs and then I'm through.

This particular quotation I think is extremely significant with regard to the private interests. If we were speaking as civic persons we could add to this statement and if the committee wishes we may, but this for now, Conrad Wirth of the National Capital Planning Commission put his finger, we think, on something pretty significant when he remarked in December 1955. These words, I suspect, and the testimony of Mr. Hannan will bear even greater significance. I quote Mr. Wirth:

"Pressures are strong and constant for haste and for immediate action on this proposal or that blueprint. These pressures are very great and they often come from the most unexpected places. Experts, with skills in the realms of concrete and currency * * * these special skills are usually accompanied by a vast knowledge of ways and means of bypassing those whose interests and vision extend beyond the immediate project into which concrete can be poured."

There is a decisive need at this time for a change in the direction of the District's urban renewal program. I speak still, be it emphasized, to the human aspects of that effort. In the peculiar situation of the District of Columbia, those who represent its citizens should be given enlarged powers of control to insure that the interests of all District citizens will in fact be promoted. But the solution to this problem goes deeper, and this you gentlemen would perhaps be interested in pursuing at another time.

"Crisis Downtown" called for "greater and more continuous substantive supervision of renewal * * * at the Federal level." I repeat that plea today with the added urgency of another year of studying these matters in the planning school, one of the best in the country, if I may be pardoned a little chauvinism. Here at the threshold of the HHFA and, more significantly, of the Congress itself is a most critical situation. Had the stated Federal purposes in setting up the urban renewal program been rigidly applied to the Redevelopment Land Agency from the beginning, this situation might never have arisen. Southwest Washington, as we wrote the Federal Urban Renewal Administrator, Mr. David M. Walker, last September, might well have been a "beacon of hope" to those of us in other metropolitan areas who have been seriously disturbed by renewal's failure to contrive needed housing. For the survival of the program itself, and I cannot stress this point sufficiently—I am not an opponent of urban renewal—for the survival of the program itself there is need for heavy self-purgation at the present time. I urge again that Federal controls over urban renewal be increased on the substantive level. If this does not happen, if for want of more coherent Federal direction this program continues to limp from one controversy to another in city after city, who can foresee the ultimate consequences?

One thing is now and forever certain in Southwest Washington, as elsewhere: the pyramids of Egypt were built with the sweat of slaves; our shining new cities cannot and must not be built on the suffering of our less fortunate citizens.

* * * * *

On the 17th of July last, I appeared before the Commissioners of the District of Columbia to speak at a public hearing on urban renewal in Southwest Washington as representative of the National Conference of Catholic Charities. I said at that time:

"The vocabulary of urban renewal has become an integral part of our national language. The fact of urban renewal has in city after city confronted neighborhoods and whole communities with new problems and profound perplexities. It is in the context of this flux and turmoil that we appear here today. We are not, as churchmen, primarily concerned with concrete and bulldozers. It is not our wish nor our purpose to enter into technical discussion of urban politics or urban economics. We are concerned with the human aspects of upheaval in downtown, USA. We are concerned with proper relocation practices, with justice and charity in the administration of these gigantic changes, with the commonwealth as more important than any particular interest. It is in the context of this concern and keenly conscious of the far-reaching complexities of present urban renewal method that we appear here today."

Since then, under the editorship of myself and Rt. Rev. Msgr. John O'Grady, secretary of the conference and veteran Catholic houser, the National Conference of Catholic Charities has published "Crisis Downtown," a study for church guidance of the modus operandi of urban renewal in Southwest Washington. I speak now in the context of that study, in the framework of 2 years' study of city planning at MIT, and, it must be strongly emphasized, in the same terms of reference as those I have just cited above vis-a-vis our statement of July 17 last.

What happens in urban renewal in Southwest Washington, I am convinced, is of much more than local significance. Were it otherwise and we as a national church organization would never have entered the picture. The first Federal urban renewal grant in the Nation went to the Redevelopment Land Agency of the District of Columbia for urban renewal in Southwest Washington. *Berman* v. *Parker*, a classic case in urban renewal chronology, was decided by the U.S. Supreme Court in the fall of 1954 in the context of Southwest Washington. By the simple fact of its position as National Capital but, more significantly, by the repeated decision of renewal personnel all along the way, Washington, D.C., has been put forward as a major urban renewal example to the rest of the country. Monograph 3 of the "Comprehensive Plan for Washington" issued by the National Capital Parks and Planning Commission in June of 1950 noted (p. 39):

"The Congress has indicated that it regards the District of Columbia as a pilot example for the Nation as a whole in the application of the Housing Act of 1949. This applies to both public housing and redevelopment projects. Typical solutions for both programs should thus be sought."

In the 1953 fall issue of the Journal of the American Institute of Planners, the lead article (by Robert F. Wrigley, Jr.) read:

"Perhaps no urban district in the United States has been so widely discussed over the past year as the Southwest survey area of Washington, D.C. The interest of planners, architects, and others has been nationwide. * * * They think of Washington as a symbol of good planning—a model for other communities. * * * Successful planning and redevelopment in the shadow of Capitol Hill could very well promote urban planning and redevelopment everywhere" (p. 189).

In January of 1957, the then Administrator of the Housing and Home Finance Agency, Mr. Albert E. Cole, called southwest Washington "a dramatic demonstration of urban renewal * * * a signpost and symbol for the rest of the country." In April of 1958, President Eisenhower messaged participants in ground-breaking ceremonies for the first new construction in Southwest Washington: "The Nation's Capital can lead the way in restoring hope and strength to areas of likely deterioration in the great cities of our land." There is further evidence, but the pattern is perhaps already clear. As urban renewal gropes its way through the first difficult years of its existence, the lessons of renewal under the very nose of the Congress in the Nation's Capital are not lost on planners and politicians across the country.

It is essential, then, that the purposes of the Congress in setting up the Federal urban renewal program should be realized in Southwest Washington. What were those purposes? There is time here but for the briefest of reviews. Opening the hearings of the U.S. Senate Banking and Currency Committee from which emerged urban renewal back in 1954, Senator HOMER CAPEHART, chairman, stated (p. 1):

"This committee is very concerned on how and to what extent this bill will help the ordinary wage earner and low-income person to acquire better living accommodations and a better environment in which to bring up their families. Every member of this committee is also concerned with the problem of helping to provide good and decent housing for our Negro citizens and other minority groups. Too long have these groups been on the outside of a good housing program, and before I vote for any provisions in this bill, I shall have to be satisfied that a substantial volume of better housing will be provided for them."

To the same hearings, Senator PAUL DOUGLAS, long a champion of the basic idea of redevelopment in our troubled urban areas, remarked (p. 93):

"When we got the original (urban redevelopment) bill through Congress, it was the intent that a considerable proportion of those displaced were to be rehoused in the areas which were cleared * * * (I am distressed) by the new uses which you are developing for these areas, not to house low-income groups but to house those in upper income groups or higher income groups and for business purposes."

Housing and Home Finance Administrator Albert E. Cole told the committee (pp. 93, 94):

"Having in mind all of the program * * * we certainly intend to and will carry out to the best of our ability that objective; namely, that upon redevelopment the needs of these people in low incomes must be given a preference."

Said Commissioner of the Federal Housing Administration, Guy Hollyday (p. 77):

"Low-income families * * * are being forced to move. * * * Unless they are adequately housed, the problem of overcrowding and blight is not solved, it is just moved from one part of the city to another."

Launched, and annually financed, as part of housing legislation, there is no room for doubt that in the mind of the Congress it was to have a major housing orientation. Private desires to the contrary, the Federal urban renewal program was created as part of the specific national housing policy, namely to facilitate via government aid "the production, at lower costs, of housing of sound standards—adequate housing for families with incomes so low that they are not being decently housed—reduction of the costs of housing." As part of a larger mechanism, it is entirely true to contend that urban renewal could not of itself do the whole housing job. Nevertheless, the fact remains clear and constant—urban renewal was expected to do something. Federal moneys were to be poured into our cities and private enterprise was to be invited to participate in the effort not only to raise up shining towers of luxury living downtown and to redress the tax base but, primarily, to improve the housing conditions of our people. Speaking to the National Housing Conference on June 23, 1958, here in Washington, the then Administrator of HHFA, Albert E. Cole put the case extremely well:

"Urban renewal was not created because of the needs of the city, but because of the needs of the citizen. I suspect that if you went about the country asking various people what urban renewal is all about, you would get a lot of different answers. You would be told that urban renewal is intended to save downtown business, or to clear up traffic congestion, or to restore wornout areas to the tax rolls, or to create the city beautiful, or to get rid of unsightly slum

buildings. All of these things are worthwhile dividends of an urban renewal program. But none of them are the things that initially impelled the Nation to launch first the slum clearance and urban redevelopment program and later to broaden it into urban renewal. This program came into being because of people. It took account not just of the economic costs, but even more of the social cost of decaying neighborhoods and urban communities. This is what most of us used to talk about when urban renewal was starting. You don't hear much of that kind of talk anymore, and I think that's disturbing. As we get more and more involved in the demanding and complicated undertakings that urban renewal entails, we seem to have less time for the people whose hopes we are trying to fulfill."

In such a context, reports from urban renewal cities in various sections of the country have been disturbing. Instead of providing housing where the need is greatest, time and again accusations have been raised by responsible civic observers that this in fact is what is going on:

(a) The public participation requirement of the "workable program" does not seem to extend to the accommodation of serious dissent.

(b) Plans, originally designed to meet housing need, are changed in the process of renewal to spell out greater densities, higher rents, and, presumably, increased profits.

(c) Relocation, despite bulky reports and plans, is not in reality living up to the substantive requirement of the "workable program."

(d) The interest of the private entrepreneur weighs heavier than the interest of the community as a whole, more so even than the interest of the citizens displaced from the project area.

I shall not take the time of this committee to detail the charges. One or two comments must suffice. Said Lee F. Johnson, then executive vice president of the National Housing Conference, in "Housing Yearbook, 1955" (p. 14):

"Slum clearance and urban renewal are not self-contained programs. They can never get off the ground until there are enough low-rent and medium-rent dwellings to rehouse displaced slum dwellers and all who wish to escape slum environments. As presently practiced, slum clearance intensifies slum conditions instead of eliminating them."

Charles Abrams, veteran New York houser and professor, told the U.S. Senate Committee on Banking and Currency, May 14, 1959:

"This urban renewal program while it does help cities get rid of slums, has developed into a device for displacing the poor from their footholds to make way for higher rental dwellings which those displaced cannot afford. Thus, the lowest income family remains the forgotten family, though it is still the most home needy in the American family circle."

Speaking of the operation of title I (renewal redevelopment) in New York City, longtime urban sociologist Lewis Mumford said recently:

"I regard the present application of title I as a betrayal of its original intention. It is now employed as a method of giving aid to builders and investors who have no need for Government aid, whereas its original purpose was to help reduce slum densities which had created the high values the land now brings."

Jane Jacobs, editor of Architectural Forum, was even more blunt in her commentary on the subject:

"Title I in its very nature is a track for the gravy train. It hands great chunks of the city over to officially anointed barons, makes city rebuilding and city commerce into a monopolistic setup for the favored few. Whether their motives are pure or greedy is beside the point. It simply doesn't work. There is not a title I project in the entire United States which has revitalized its surrounding city. Title I just pushes the problems of the city from one place to concentrate them in other places and makes them worse in the process."

Writing of Boston's West End renewal project in the February 1959 issue of the Journal of the American Institute of Planners, Prof. Herbert J. Gans, of the Institute of Urban Studies at the University of Pennsylvania pulls no punches:

"American redevelopment planning so far has proceeded on the assumption that relocation is secondary to redevelopment. Thus, great pains are taken with planning for clearance and reuse of the site, but plans for the present occupants of the site are treated as byproducts of the redevelopment proposal. The real cost of relocation is paid in various ways by the people being moved out. Under present conditions the redevelopment of American cities is economically possible only because of the hidden subsidies provided by the residents of the area to be cleared."

In 1958, the Philadelphia Housing Association published a survey of relocation in the city covering a period from May 1955 to April 1957. It concludes (p. 2): "Only 3 out of 10 displaced families moved to satisfactory housing. Seven out of ten moved to housing below housing code standards."

I do not, of course, claim infallibility for each of these judgments. I do say they are highly significant. I do suggest that the Nation's pilot urban renewal project in Southwest Washington needs to be viewed in precisely such a context as they provide.

Again, I am concerned with how renewal went in Southwest Washington as a human experience. Did it help meet the housing need of the District where that need was greatest? Did it honestly involve the citizenry of the District in its evolution? In terms of long-range planning, has it operated to advantage of the commonwealth rather than the private interest?

"Crisis Downtown" details the original proposals for Southwest Washington. I shall not repeat here, except to emphasize what the National Capital Planning Commission told the District Commissioners on October 24, 1952: "It is completely unrealistic to propose that the lower income population be displaced to be housed elsewhere. Locations elsewhere simply are not to be found in sufficient quantity and near enough to places of employment to meet this vital requirement of most low-income families." And what the Redevelopment Land Agency itself stated in its relocation plans for Southwest Washington area B, submitted to the District Commissioners as of January 16, 1953: "The Agency is convinced that housing of this type, i.e., rentals of $17 per month per room, can and will be constructed in area B. Private low-rent housing constructed under these provisions will be an important addition to the reservoir of housing available for families to be displaced. Many families temporarily rehoused early in the undertaking of this project or whose displacement occurred during the later stages can be taken care of in new housing within the project area."

Instead, the facts are only too eloquent, the situation in Southwest Washington has become so tragic that even the Urban Renewal Administrator himself, Mr. David Walker, chose Washington, D.C., as the location for one of the most drastic comments which has ever been made on the entire renewal program. Said Mr. Walker to the Potomac Chapter of the National Association of Housing and Redevelopment Officials on October 1, 1959, 1 month after we had completed our study of Southwest Washington:

"If urban renewal becomes a program with public housing down at one end and luxury and semiluxury housing down at the other, leaving out a whole gray area in between, this program can go no place but into disrepute—and there it belongs."

On July 17, 1959, urging the District Commissioners not to abandon the principle of lower middle income in Southwest Washington, we had pleaded:

"Before this rent ceiling is lifted careful thought (should) be given to the result—a strange sort of creature in the midst of the Nation's Capital, his head in the clouds of upper income and 'gracious living,' his feet in the solid earth of public housing and nothing in between."

Before the District Commissioners in a public hearing on plans for Northwest Washington, Rev. C. Shelby Rooks, speaking for the Washington Urban League, on July 29, 1959, made the same point:

"The announced objectives for Southwest all included housing for every income group * * * But what has actually happened? * * * Housing there, either built or proposed, is either public housing or luxury and near-luxury housing, with a vast desert between."

The rest is in the record. Not only has the Redevelopment Land Agency raised densities and eliminated need housing in Southwest Washington but the serious prospect has been raised that much the same thing may be under way at what was called last summer, when the archdiocese of Washington protested it through the director of Catholic Charities, the Northwest renewal project. The excuse is pleaded that downtown land is too valuable for the poor people to live on it. Surely, in a democratic society, such an argument will not stand long. The excuse is pleaded that in fact the majority nonwhite displacement has been accommodated in decent, safe and sanitary housing. If this is the case, then Washington has found a solution to a problem which frets every major city in the Nation. If this is the case, then there is not overcrowding in other sections of the District, social friction and location of displacees in far-out housing where shopping and transportation become major difficulties. The excuse is pleaded that residents of the project area have no title to the land. But, surely, their title in a need housing situation is at least as great as the title of the out-of-town redeveloper and his gracious-living prospect.

Clearly, whether its relocation has been adequate or not, the Redevelopment Land Agency has created two ghettoes in Southwest Washington one for the rich—the nearly rich, one for the very poor. It has, I submit, most probably not solved Washington's own housing problem. Certainly, as time goes on and urban renewal moves across the face of the District displacement into other slum areas from the Southwest will complicate the picture. Without any doubt, as a pilot example Southwest Washington has failed the Nation when it comes to the primary purpose of the entire Federal urban renewal program; namely, to meet the housing need of our citizens.

Second human question. Were the residents of the District honestly involved in the renewal experience? Early in the process, the director of the Revelopment Land Agency opted for democracy in the program of urban renewal for the District. Said John Searles (Journal of the American Institute of Planners, winter 1954, p. 38):

"The (Redevelopment) Land Agency has maintained that the planning of Southwest Washington should be by the democratic process—that the ideals, desires and aspirations of the citizens of Washington should be permitted to have a strong influence on the plan itself."

Once again, there is not time here for a lengthy inquiry. Suffice it to note that at point after point in the Southwest Washington urban renewal experience, objection was raised by responsible civic groups within the District. There is no evidence available to us that such objection seriously influenced renewal thinking, much less renewal action. But suppose we listen to some of the voices.

As is only too well known, the District of Columbia does not have an elected government. Neither does it have political parties. In the absence of such, citizens of the District express themselves through various local civic and social organizations. Two of the more universal of these organizations are the Citizens Association and the Civic Association. On June 12, 1958, the Federation of Citizens Associations of the District of Columbia adopted this resolution:

"Whereas the Redevelopment Project in the Southwest Section of the Capital City is now in its fifth year and is considered to be a pilot project for other cities in the United States and,

"Whereas the policies and procedures in effect in the administration of this program have resulted in hardship, injustice, and inequity being inflicted upon many of the former residents of the Southwest, some of whom have also suffered financial loss, as well as physical and psychogenic illness,

Resolved, That the District of Columbia Federation of Citizens Associations urgently requests congressional investigation * * * (to prevent) repetition of deficiencies revealed in the Southwest project."

In the Washington Evening Star for December 15, 1959, this news item appeared (p. B–10). "The Southwest Civic Association last night assailed the Redevelopment Land Agency and others for their failure to provide adequate relocation of families uprooted by their programs. Though no formal motions were passed, the temper of the discussion clearly indicated the group's ill-feeling toward several aspects of current slum clearance activities.

"Referring to the RLA as a showpiece and stating that it 'disregarded the people entimely' Mr. Calhoun (Civic Association President Mr. Leon S. Calhoun), said 'when redevelopment is carried on this way, it can't come to a good end.'" Speaking for the District chapter of the National Association for the Advancement of Colored People, President Rev. E. Franklin Jackson on September 30, 1959, accused the redevelopers of building "for whites alone" and urged his associates to "tell the Redevelopment Agency and the Commissioners that they are creating a breeding ground for the very conditions (i.e. of crime and delinquency), they seek to eliminate and correct." Time and again, likewise, the Washington Housing Association, the Metropolitan Washington Chapter of the National Association of Social Workers, the Washington Urban League, the Washington Board of Trade have appeared before public hearings to protest various aspects of the District renewal programing. The last president of the Southwest Citizens Association, with a long record of public protest, told us this past summer: "We could never get any definite word of the planning. The first thing we knew, often, was when we saw a map in the newspaper. The (RLA) staff was largely inexperienced. It came in with little knowledge of the community. We had a constant quarrel with the caliber of men they sent in and with the way they did their work. I don't think any of them knew where they were going from month to month * * * the arrogance of these people." On August 2, 1959, that stout renewal watchdog of the Washington Post, Robert C. Albrook, wrote:

"Misleading official talk—whether well-meaning, unintentioned, deliberate or otherwise—ought not to be repeated about the Northwest Second Precinct renewal program. * * * Good logic, economics and sound planning undoubtedly support the concept that land uses in the downtown central city area ought to be upgraded. * * * But the community no longer can afford to fool itself that this is correcting the real problems of slums. That problem is human. Clearly, redevelopment as practised so far—publicly in Southwest and privately in Georgetown—is not the answer to this problem."

By no stretch of the imagination, in such a context of question, can Washington's Southwest urban renewal experience be said to have been a popularly engineered achievement. Here again as a pilot project, there is place for very serious doubt.

In terms of the District's own future and in terms of future urban renewal projects in other cities, how does Southwest Washington stand today? Six years ago, veteran District of Columbia houser John Ihlder warned (Journal of the American Institute of Planner, Winter 1954, p. 38):

"L'Enfant's plan, by omission, has plagued Washington with notorious inhabited alleys * * * Do the Southwest redevelopment plans * * * take account of the community as a whole, or are they designed to 'upgrade' only the Southwest with little consideration for effects upon other sections of the city? * * * Where are these displaced people to go? The official city plan gives no evidence. What effect will their removal have in 'downgrading' other sections of the city? Will it be analogous to that of the alleys that supplemented the L'Enfant plan?"

Still as before the emphasis is human not fiscal. Statistics and charts, in Southwest Washington as elsewhere in the country, can be deceptive. Figures from the Southwest, for instance, show impressive plus totals on the side of physical improvement after relocation. Renewal's earliest objective is almost always the most rundown area of the city. In such a circumstance it is relatively easy to spotlight physical betterment in the lot of those displaced. But as renewal moves along into sections less blighted and as the total housing supply decreases at certain income levels, things may not be so bright. Late in December 1959 Boston City Councillor Gabriel F. Piemonte was interviewed by the Christian Science Monitor with regard to urban renewal in Boston. Here is an excerpt from the report of that interview:

"'I am disgusted with the shortsightedness of the Boston Redevelopment Authority for failing to provide needed safeguards to insure that middle-income and low-income housing will be built in current renewal project areas,' Mr. Piemonte says. 'The whole purpose of legislation granting slum clearance aid was to create better housing conditions * * *. Originally one of the main purposes of this (West End Renewal) project was to provide middle-income housing,' he says. 'But what is happening now? We have a group of upper income and luxury apartment buildings' * * *. Mr. Piemonte receives many letters of complaint from families which must move from areas designated for redevelopment—with nowhere to go but other 'blighted neighborhoods.' Many of the families have had to move twice within recent years as the growth of redevelopment projects seemed to dog their steps, Mr. Piemonte says."

In Washington as in Boston and elsewhere in the urban area of the Nation, we must learn to look far ahead. Urban renewal is not a one-night stand, it's pretty much of a continuing operation. We are not in any way saying that more indoor bathrooms and better stoves and firmer plaster for the first batch of relocatees are unimportant. What we are saying is that renewal needs to be estimated in depth and in length. It is far more important to judge how early renewal meets the basic problems of housing, public relations, and general human values than to sit back simply with separate statistics and conclude from a column of figures that all is well. Even, fiscally, while it can quite easily be demonstrated that more direct tax revenue is forthcoming from new construction in the project area than came from previous slums and that the tax drain consequent upon a poor housing section of the city is eliminated by demolition, realism compels us to assess against this gain increased expenditures in other slum areas and an eventual fiscal explosion when there's just no place left for displaced lower income families to crowd into. In short by ignoring the problem of need housing, urban renewal in southwest Washington has no more solved that problem than does the ostrich solve his problem of privacy by sticking his head in the Sahara. It remains. It is, if anything, aggravated by a nonhuman renewal bias. Sooner or later it will return to haunt any city which allows itself to be sold a bill of fiscal goods, a bill which in itself as I have just indicated is of dubious ultimate worth.

My conclusion from all this is simple. Urban renewal in southwest Washington has not met the clear paramount purpose of the Federal urban renewal program. In the process, even though it is my feeling that the real issues have not been clearly presented to the citizens of the District, responsible civic opposition all along the line expressed in the only method open to those citizens has not been honestly accommodated. Besides, there remains a strong suspicion that the private interests in Southwest Washington urban renewal weighed at least as heavy as the common good. Perhaps Conrad Wirth of the National Capital Planning Commission put his finger on something pretty significant when he remarked back in December of 1955:

"Pressures are strong and constant for haste and for immediate action on this proposal or that blueprint. These pressures are very great and they often come from the most unexpected places. Experts with skills in the realms of concrete and currency * * * these special skills are usually accompanied by a vast knowledge of ways and means of bypassing those whose interests and vision extend beyond the immediate project into which concrete can be poured."

There is a decisive need at this time for a change in the direction of the District's urban renewal effort. I speak still, be it emphasized, to the human aspects of that effort. In the peculiar situation of the District of Columbia, those who represent its citizens should be given enlarged powers of control to insure that the interests of all District citizens will in fact be promoted via the urban renewal program. But the solution goes deeper than this.

Crisis Downtown called for "greater and more continuous substantive supervision of renewal * * * at the Federal level." I repeat that plea today. Here at the threshold of the HHFA and, more significantly, of the Congress itself, is a most critical situation. Had the stated Federal purpose in setting up the urban renewal program been rigidly applied to the Redevelopment Land Agency from the beginning, this situation might never have arisen. Southwest Washington, as we wrote the Federal Urban Renewal Administrator, Mr. David M. Walker, last September, might well be a beacon of hope to those of us in other metropolitan areas who have been seriously disturbed by Renewal's apparent failure to contrive needed housing. For the survival of the program itself, I urge again that the Federal controls over urban renewal be increased on the substantive level. If this does not happen, if for want of more coherent Federal direction the program continues to limp from one controversy to another in city after city, who can foresee the ultimate consequence?

One thing is now and forever certain in Southwest Washington as elsewhere. The

Pyramids of Egypt were built with the sweat of slaves. Our shining new cities cannot and must not be built on the suffering of our less fortunate citizens.

AGREEMENT ON THE USE OF THE INDUS RIVER

Mr. JUDD. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. JUDD. Mr. Speaker, we hear so much about the things that do not go well in various places around the world under our mutual security program that it is worth while once in a while to call attention to the successes, which are far more numerous.

One of the most remarkable achievements in this decade is the decision by the Governments of Pakistan and of India, after long difficulties and apparently hopeless obstacles, to resolve amicably their difference over the division and use of the waters of the Indus River Basin. They are to sign on September 19 an agreement to use the waters of these various rivers for the benefit of both.

Last fall President Ayub Khan of Pakistan went to India in person to talk with Prime Minister Nehru. Prime Minister Nehru is now going in person to Karāchi to sign this agreement which is the first step toward strengthening that great subcontinent which has been a prime target of the Communists all these years—and, of course, will remain so.

Sometimes we hear it said, Look at all the money we have put into such-and-such a country and it has weakened or gone down. The suggestion generally is that we should give up because of a loss or setback here or there. But the Communists do not quit when some project of theirs goes wrong. At one time they almost had Italy. They failed to get it, but they are still working to get Italy. At one time they were on the verge of gaining control in Greece. They failed as the result of the Greece-Turkey assistance program from the United States. But the Communists are still working to get Greece. At one time it seemed almost certain they would win in France. They failed, but they are still working on France.

In Iran, they were within a hair's breadth of getting control during the Mossadegh period. They failed; Iran turned even more strongly to the free world. But the Communists work as hard as ever against the Iranian Government. They do not quit when they have a defeat. They redouble their efforts.

They started the war in Korea and they were defeated, but they are still working to achieve their objective, one way or another. The Huks in the Philippines at one time seemed almost unbeatable. They were pretty nearly destroyed. But there is a remnant and it still works on. The same is true in India. They got control of one province for a time, were turned out of power, but they are working as hard as ever to come back.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. JUDD. I yield.

Mr. STRATTON. Mr. Speaker, the gentleman said a moment ago, I believe, that the Communists were defeated in Korea. I just wanted to make sure that I had understood correctly the remarks of our colleague, because I think that is a fairly remarkable admission from a gentleman who speaks frequently for his party on the matter of foreign policy.

Mr. JUDD. The Communists were defeated in Korea, but tragically we did not go ahead to take the victory. That is precisely what I said and what I have said for 10 years, here and in many other places. I shall be glad to document that for the benefit of the gentleman, if he wants me to do so.

My point is that along with our few failures thus far we ought also to call attention to the many successes that have been achieved by patient, imaginative, constructive efforts on the part of leaders of good will, plus friendly efforts by other countries in the free world. This agreement by the two countries which were in great difficulty in south Asia is a dramatic illustration.

Frequently, you hear people speak of the great subcontinent containing India and Pakistan with surprise or even complaint that there is not complete unity. But what do they expect? If you think of India and Pakistan as one great peninsula projecting off the southern border of Eurasia, just as Europe, excluding the Soviet Union, is another great peninsula, projecting off the western border of Eurasia, then you note, that the Indian Peninsula has more land than the European Peninsula. It has more people than the European. It has more languages than the European Peninsula. It has more races than the European. It has more religions than the European. The problems of India and Pakistan are enormously more complicated than are those of Western Europe.

We do not expect the countries of Western Europe to achieve unity all at once. Yet we tend to expect that in Asia. The miracle is that despite the almost insurmountable obstacles, these two new countries, India and Pakistan, while determining to be free and independent and to develop self-government, have worked on until now the world is about to see the fruition of one of the great cohesive movements in history, and in the face of so many divisive forces at work everywhere.

The resolution of the Indus Basin problem is momentous—the greatest event of its kind that ever happened. There should be praise for the statesmanship of Prime Minister Nehru and President Ayub and their representatives who arrived at the necessary compromises which made agreement possible.

I want to pay tribute, also, to Mr. Eugene Black, President of the World Bank, and Mr. Cliff, Vice President of the World Bank, and their representatives, under whose calm and expert "good offices," reconciliation between these two great countries has begun. It shows what can be done when there is the will from within and proper assistance from without.

There should be praise for the far-sighted interest on the part of friendly countries and the Bank in promoting the financing which will make effective the construction of the works called for in the settlement.

This Congress deserves some of the praise for a diplomatic and international triumph through its action relative to the Indus contained in the mutual security legislation.

Not the least in expressing heartfelt thanks to all concerned will be the 40–50 million people in the Indus Basin whose livelihood will be preserved and enhanced.

For more than 4,000 years of recorded history the Indus Basin has witnessed the ebb and flow of civilization between central Asia and the plains of India. Hindu and Mongul invaders alike crossed it on their way south. During all this time the Indus River Basin was the breadbasket of the Punjab in undivided India. Irrigation canals installed under the British made it the greatest irrigation system in the world.

With the partition of India in 1947 this ancient river system was divided between the two newly independent states of India and Pakistan. With control of the upstream waters of all but one of the main rivers of the system in the hands of one of the countries—India—a dispute immediately broke out regarding use of the waters. On some occasions the controversy became so bitter, so violent, that war itself was threatened. Energies which might better have been used on constructive tasks, such as development, were unproductively absorbed.

Briefly, the plan devised by the World Bank provides that India should have the use of the waters of the three eastern rivers—the Beas, the Ravi, and the Sutlej—and that the downstream irrigated areas, formerly supplied with waters from these three rivers, should in the future be supplied with water from the three western rivers—the Indus, the Jhelum, and the Chenab—through a series of diversion and link canals. The plan also provides for hydroelectric installation, storage areas, and drainage improvements to assist in controlling salinization of irrigated lands in Pakistan. Under it, too, India will be enabled to complete and operate her ambitious Rajasthan Desert irrigation plan. The whole system will provide by far the largest irrigation system in the world.

About 14 million acre-feet of water will be transferred by these link canals for irrigation use on approximately 4.3 million acres of crops in Pakistan. There will be additional water for roughly 5 million more acres of cropland in Pakistan, and the water to be made available to India will irrigate about 4 million acres there. The plan also calls for installation of hydroelectric power in west Pakistan.

It is estimated that the total cost of the system of works to achieve the planned results will be on the order of

$1 billion. This is way beyond the capacity of India and Pakistan to finance. And in fact beyond the capacity of any other country to provide. The World Bank evolved a plan to make available this sum and has obtained assurances from friendly governments of their readiness to help. These friendly governments are Australia, Canada, Germany, New Zealand, and the United Kingdom, as well as ourselves. In addition India and Pakistan are contributing sums within their resources and the World Bank is also making loans. The Bank's plan provides that all funds required to meet the cost of the plan shall be turned over to an Indus Basin Development Fund to be administered by the Bank.

So, in addition to the skill exercised in bringing India and Pakistan together on a treaty, we also have the rare accomplishment of establishing a multilateral financing arrangement.

Prime Minister Nehru has announced that he will be going to Karāchi on September 19 to sign the Indus Treaty with President Ayub. At the same time the friendly countries, including, of course, ourselves and the Bank, will sign the Indus Basin Development Fund Agreement and it is expected that a Development Loan Fund loan, as a part of our assistance, and an International Bank for Reconstruction and Development loan, both loans to Pakistan, will be signed at the same time. Thus will be put together at one time and in one place all the necessary actions to implement the settlement.

I salute India, Pakistan, the World Bank, and the several friendly governments who are cooperating in this gigantic effort to feed people, produce economic development, build good relations, and promote freedom and peace in south Asia and the world.

The SPEAKER. The time of the gentleman from Minnesota [Mr. JUDD] has expired.

The Chair recognizes the gentleman from Texas [Mr. ROGERS].

TO AMEND THE HELIUM ACT OF SEPTEMBER 1, 1937

Mr. ROGERS of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert: "That this Act may be cited as the 'Helium Act Amendments of 1960.'

"SEC. 2. The Act entitled 'An Act authorizing the conservation, production, and exploitation of helium gas, a mineral resource pertaining to the national defense, and to the development of commercial aeronautics, and for other purposes', approved March 3, 1925 (43 Stat. 1110), as amended, is amended to read as follows:

"'That this Act may be cited as the "Helium Act".

"'SEC. 2. As used in this Act:

"'(1) The term "Secretary" means the Secretary of the Interior;

"'(2) The term "person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, or State or political subdivision thereof; and

"'(3) The terms "helium-bearing natural gas" and "helium-gas mixture" mean, respectively, natural gas and gas mixtures containing three-tenths of 1 per centum or more of helium by volume.

"'SEC. 3. (a) For the purpose of conserving, producing, buying, and selling helium, the Secretary is authorized—

"'(1) to acquire by purchase, lease, gift, exchange, or eminent domain, lands or interests therein or options thereon, including but not limited to sites, rights-of-way, and oil or gas leases containing obligations to pay rental in advance or damages arising out of the use and operation of such properties; but any such land or interest in lands may be acquired by eminent domain only when the Secretary determines (A) that he is unable to make a satisfactory agreement to acquire such land or interest in land, and (B) that such acquisition by eminent domain is necessary in the national interest;

"'(2) to make just and reasonable contracts and agreements for the acquisition, processing, transportation, or conservation of helium, helium-bearing natural gas, or helium-gas mixtures upon such terms and conditions, and for such periods, not exceeding twenty-five years, as may be necessary to accomplish the purposes of the Act, except that the Secretary shall not make such contracts and agreements which shall require payments by the Government in any one fiscal year aggregating more than the amount which shall be establish initially in an appropriation Act and which may be increased from time to time in appropriation Acts, or if the Secretary—

"'(A) determines that the national interests require the conservation of certain helium or require certain helium-bearing natural gas or certain helium-gas mixture for the production or conservation of helium, and

"'(B) determines that he is unable to acquire such helium, helium-bearing natural gas, or helium-gas mixture upon reasonable terms and at the fair market value,

he is authorized to acquire by eminent domain such helium and so much of such helium-bearing natural gas or helium-gas mixture as is necessarily consumed in the extraction of such helium after removal from its place of deposit in nature and wherever found, or the temporary use of such helium-bearing natural gas or helium-gas mixture for the purpose of extracting helium, together with the appropriate interest in pipelines, equipment, installations, facilities, personal or real property, including reserves, easements or other rights necessary or incident to the acquisition of such helium, natural gas, or mixture, but the condemnation of any such helium, helium-bearing natural gas, or helium-gas mixture, shall be effected in the same manner and following the procedures established in section 8(a) of this Act, the just compensation for such condemnation to be measured by terms and prices determined to be commensurate with the fair market value, and in the temporary use of any helium-bearing natural gas or helium-gas mixture for the purpose of extracting helium the Secretary shall cause no delay in the delivery of natural gas to the owner, purchaser, or purchasers thereof, except that required by the extractive processes;

"'(3) to construct or acquire by purchase, lease, exchange, gift or eminent domain, plants, wells, pipelines, compressor stations, camp buildings, and other facilities, for the production, storage, purification, transportation, purchase, and sale of helium, helium-bearing natural gas, and helium-gas mixtures; and to acquire patents or rights therein and reports of experimentation and research used in connection with the properties acquired or useful in the Government's helium operations;

"'(4) to dispose of, by lease or sale, property, including wells, lands, or interests therein, not valuable for helium production, and oil, gas, and byproducts, of helium operations not needed for Government use, except that property determined by the Secretary to be 'excess' within the meaning of section 3(e) of the Federal Property and Administrative Services Act of June 30, 1949 (60 Stat. 378; 40 U.S.C. 472(e)), as amended, shall be disposed of in accordance with the provisions of that Act; and to issue leases to the surface of lands or structures thereon for grazing or other purposes when the same may be done without interfering with the production of helium; and

"'(5) to accept equipment, money, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private.

"'(b) Any known helium-gas-bearing land on the public domain not covered at the time by leases or permits under the Mineral Lands Leasing Act of February 25, 1920, as amended, may be reserved for the purposes of this Act, and any reservation of the ownership of helium may include the right to extract, or have extracted, such helium, under such rules and regulations as may be prescribed by the Secretary, from all gas produced from lands so permitted, leased, or otherwise granted for development, except that in the extraction of helium from gas produced from such lands, it shall be extracted so as to cause no delay, except that required by the extraction process, in the delivery of gas produced from the well to the purchaser or purchasers thereof at the point of delivery specified in contracts for the purchase of such gas. If any reserved rights of ownership and extraction of helium are not exercised before production of any helium-bearing natural gas or any helium-gas mixture, the Secretary is authorized to acquire such helium in accordance with section 3(a)(2) of this Act.

"'(c) All contracts and agreements made by the Secretary for the acquisition of helium from a private plant shall contain a provision precluding the plant owner from selling any helium to any purchaser other than the Secretary at a price lower than the lowest price paid by any Government agency for helium acquired from any private plant under any contract entered into pursuant to this section and outstanding at the time of such sale.

"'SEC. 4. The Secretary is authorized to maintain and operate helium production and purification plants together with facilities and accessories thereto; to acquire, store, transport, sell, and conserve helium, helium-bearing natural gas, and helium-gas mixtures, to conduct exploration for and production of helium on and from the lands acquired, leased, or reserved; and to conduct or contract with public or private parties for experimentation and research to discover helium supplies and to improve processes and methods of helium production, purification, transportation, liquefaction, storage, and utilization: *Provided, however,* That all research contracted for, sponsored, cosponsored, or authorized under authority of this Act shall be provided for in such a manner that all information, uses, products, processes, patents and other developments resulting from such research developed by Government expenditure will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be available to the general public: *And provided further,* That nothing contained herein shall be construed

as to deprive the owner of any background patent relating thereto to such rights as he may have thereunder.

"'SEC. 5. (a) Whenever the President determines that the defense, security, and general welfare of the United States require such action, the Secretary shall issue such regulations as he deems necessary for the licensing of sales and transportation of helium in interstate commerce after extraction from helium-bearing natural gas or helium-gas mixtures. Thereafter it shall be unlawful for any person to sell or transfer helium in interstate commerce except in accordance with such regulations or pursuant to the terms of a license issued by the Secretary, or in accordance with the terms of a contract or agreement with the Secretary entered into pursuant to this Act. For the purpose of this section, the term "helium" shall mean helium, after extraction from helium-bearing natural gas or helium-gas mixtures, in a refined or semirefined state suitable for use.

"'(b) Each license shall be issued for a specified period to be determined by the Secretary, but not exceeding five years, and may be renewed by the Secretary upon the expiration of such period. No such license shall be issued to a person if in the opinion of the Secretary the issuance of a license to such person would be inimical to the defense and security of the United States. No such license shall be assigned or otherwise transferred directly or indirectly except with the consent or approval of the Secretary in writing. Any such license may be revoked for any material false statement in the application for license, or for violation or a failure to comply with the terms and provisions of this Act, the regulations issued by the Secretary pursuant thereto, or the terms of the license.

"'(c) In issuing licenses under this section, the Secretary shall impose such regulations and terms of licenses as will permit him effectively to promote the common defense and security as well as the general welfare of the United States. The licensing authority herein granted shall be used solely for the purpose of preventing the transportation or sale of helium for end uses determined by the Secretary to be nonessential or wasteful, and any determination that any end use is nonessential or wasteful shall be published in the form of general regulations applicable to all transportation or sales of helium.

"'(d) Whenever Congress or the President declares that a war or national emergency exists, the Secretary is authorized to suspend any license granted under this Act if in his judgment such suspension is necessary to the defense and security of the United States, and he is further authorized to take such steps as may be necessary to recapture or reacquire supplies of helium.

"'SEC. 6. (a) The Department of Defense, the Atomic Energy Commission, and other agencies of the Federal Government, to the extent that supplies are readily available, shall purchase all major requirements of helium from the Secretary.

"'(b) The Secretary is authorized to sell helium for Federal, medical, scientific, and commercial uses in such quantities and under such terms and conditions as he determines.

"'(c) Sales of helium by the Secretary shall be at prices established by him which shall be adequate to cover all costs incurred in carrying out the provisions of this Act and to repay to the United States any deposit in the Treasury, together with interest as provided in subsection (d) of this section, the following:

"'(1) Within twenty-five years from the date of enactment of the Helium Act Amendments of 1960, the net capital and retained earnings of the helium production fund (established under section 3 of this Act prior to amendment by the Helium Act Amendments of 1960), determined by the Secretary as of such date of enactment, plus any moneys expended thereafter by the Department of the Interior from funds provided in the Supplemental Appropriation Act, 1959, for construction of a helium plant at Keyes, Oklahoma;

"'(2) Within twenty-five years from the date of borrowing, all funds borrowed, as provided in section 12 of this Act, to acquire and construct helium plants and facilities; and

"'(3) Within twenty-five years from the date of enactment of the Helium Act Amendments of 1960, unless the Secretary determines that said period should be extended for not more than ten years, all funds borrowed, as provided in section 12 of this Act, for all purposes other than those specified in clause (2) above.

"'(d) Compound interest on the amounts specified in clauses (1), (2), and (3) of subsection (c) which have not been paid to the Treasury shall be calculated annually at rates determined by the Secretary of the Treasury taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to the investments authorized by this Act, except that the interest rate on the amounts specified in clause (1) of subsection (c) shall be determined as of the date of enactment of the Helium Act Amendments of 1960, and the interest rate on the obligations specified in clauses (2) and (3) of subsection (c) as of the time of each borrowing.

"'(e) Helium shall be sold for medical purposes at prices which will permit its general use therefor; and all sales of helium to non-Federal purchasers shall be upon condition that the Federal Government shall have a right to repurchase helium so sold that has not been lost or dissipated, when needed for Government use, under terms and at prices established by regulations.

"'(f) All moneys received under this Act, including moneys from sale of helium or other products resulting from helium operations and from the sale of excess property shall be credited to the helium production fund, which shall be available without fiscal year limitation, for carrying out the provisions of this Act, including any research relating to helium carried out by the Department of the Interior. Amounts accumulating in said fund in excess of amounts the Secretary deems necessary to carry out this Act and contracts negotiated hereunder shall be paid to the Treasury and credited against the amounts required to be repaid to the Treasury under subsection (c) of this section.

"'SEC. 7. The Secretary of Defense and the Chairman of the Atomic Energy Commission may each designate representatives to cooperate with the Secretary in carrying out the purposes of this Act, and shall have complete right of access to plants, data, and accounts.

"'SEC. 8. (a) Proceedings for the condemnation of any property under section 3 of this Act shall be instituted and maintained pursuant to the provisions of the Act of August 1, 1888 (25 Stat. 357; 40 U.S.C. 257), as amended, and sections 1358 and 1403 of title 28 of the United States Code, or any other Federal statute applicable to the acquisition of real property by eminent domain. The Acts of February 26, 1931 (46 Stat. 1421; 40 U.S.C. 258a–258e), and October 21, 1942 (56 Stat. 797; 40 U.S.C. 258f), shall be applicable to any such proceedings. Wherever the words "real property", "realty", "land", "easement", "right-of-way", or words of similar meaning, are used in such code provisions or Acts relating to procedure, jurisdiction, and venue, they shall be deemed, for the purposes of this Act, to include any personal property authorized to be acquired hereunder.

"'(b) In the event of disposal under section 3(a)(4) of this Act of any property acquired by eminent domain pursuant to this Act, the former owner or successor in interest of the rights therein shall have the preferential right to reacquire such property on terms as favorable as those terms whereby disposition may be made under such section.

"'SEC. 9. The Secretary is hereby authorized to establish and promulgate such rules and regulations, as are consistent with the directions of this Act and are necessary to carry out the provisions hereof.

"'SEC. 10. (a) The provisions of the Administrative Procedure Act of June 11, 1946 (60 Stat. 637; 5 U.S.C. 1001–1011), as amended, shall apply to any agency proceeding and any agency action taken under this Act, including the issuance of rules and regulations, and the terms "agency proceeding" and "agency action" shall have the meaning specified in the Administrative Procedure Act.

"'(b) In any proceeding under this Act for the granting, suspending, revoking, or amending of any license, or application to transfer control thereof, and in any proceeding for the issuance or modification of rules and regulations dealing with the activities of licensees, the Secretary shall grant a hearing upon the request of any person whose interest may be affected by the proceeding, and shall admit any such person as a party to such proceeding. Any final order entered in any such proceedings shall be subject to judicial review in the manner prescribed in the Act of December 29, 1950 (64 Stat. 1129; 5 U.S.C. 1031–1042), as amended, and to the provisions of section 10 of the Administrative Procedure Act.

"'SEC. 11. The provisions of the Natural Gas Act of June 21, 1938 (52 Stat. 821; 15 U.S.C. 717–717w), as amended, shall not be applicable to the sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to the separation of such helium from the natural gas with which it is commingled, whether or not the provisions of such Act apply to such natural gas, and in determining the rates of a natural gas company under sections 4 and 5 of the Natural Gas Act, as amended, whenever helium is extracted from helium-bearing natural gas, there shall be excluded (1) all income received from the sale of helium; (2) all direct costs incurred in the extraction, processing, compression, transportation or storage of helium; and (3) that portion of joint costs of exploration, production, gathering, extraction, processing, compression, transportation or storage divided and allocated to helium on a volumetric basis.

"'SEC. 12. (a) The Secretary is authorized to borrow annually from the Treasury and credit to the fund established under section 6(f) of this Act such amounts as may be authorized in the initial Appropriation Act and which may be increased from time to time in Appropriation Acts and as are necessary to carry out the provisions of this Act and contractual obligations hereunder.

"'(b) For the purpose of this section the Secretary may issue to the Secretary of the Treasury notes, debentures, bonds, or other obligations to be redeemable at the option of the Secretary before maturity in such manner as may be stipulated in such obligations. The Secretary of the Treasury is authorized and directed to purchase any obligations issued by the Secretary under authority of this section and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which

securities may be issued under the Second Liberty Bond Act, as amended, are extended to include any purchases of obligations of the Secretary hereunder.

" 'SEC. 13. Whoever willfully violates, attempts to violate, or conspires to violate, any provision of this Act or any regulation or order issued or any terms of a license granted thereunder shall, upon conviction thereof, be punished by a fine of not more than $5,000 or by imprisonment for not more than two years, or both, except that whoever commits such an offense with intent to injure the United States or with intent to secure an advantage to any foreign nation, shall upon conviction thereof, be punished by a fine of not more than $20,000 or by imprisonment for not more than twenty years, or both.

" 'SEC. 14. Whenever in the judgment of the Secretary any person has engaged or is about to engage in any act or practice which constitutes or will constitute a violation of any provision of this Act, or any regulation or order issued or any term of a license granted thereunder, any such act or practice may be enjoined by any district court having jurisdiction of such person, and proper proceedings to this end may be instituted under the direction of the Attorney General of the United States.

" 'SEC. 15. It is the sense of the Congress that it is in the national interest to foster and encourage individual enterprise in the development and distribution of supplies of helium, and at the same time provide, within economic limits, through the administration of this Act, a sustained supply of helium which, together with supplies available or expected to become available otherwise, will be sufficient to provide for essential Government activities.

" 'SEC. 16. The Secretary of the Interior is directed to report annually to the Congress on the matters contained in this Act.

" 'SEC. 17. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby.

" 'SEC. 3. The amendment made by this Act shall become effective on March 1, 1961.' "

Amend the title so as to read: "An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare of the United States."

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

AMENDMENT OF TITLE V OF THE AGRICULTURAL ACT OF 1949, AS AMENDED

Mr. GATHINGS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12759) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert "That section 509 of the Agricultural Act of 1949, as amended, is amended by striking 'June 30, 1961' and inserting 'December 31, 1961'."

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

Mr. BAILEY. Mr. Speaker, I reserve the right to object until I have asked some pertinent questions.

The SPEAKER. The Chair asked if there is objection, and any gentleman always has the right to object.

Mr. BAILEY. I have no intention of continuing my right to object if I can have some reasonable answers to some questions I desire to ask.

This is the so-called Mexican labor bill, is it not?

Mr. GATHINGS. Yes, it is.

Mr. BAILEY. I understand the Senate has cut down the extension of that legislation to approximately 6 months.

Mr. GATHINGS. Six months, yes.

Mr. BAILEY. May I inquire the expiration date that is on the books now?

Mr. GATHINGS. It expires on June 30, 1961.

Mr. BAILEY. Why the necessity of bringing it up when the law does not expire until June 30, 1961? All this Senate amendment does is continue it 6 months.

Mr. GATHINGS. It is a 6-month extension.

Mr. BAILEY. These Mexican laborers you are bringing in are exempt from the income tax and social security tax. You bring most of them in under contract and they are paid 50 cents a day. The testimony in the hearings on the migrant labor bill shows that at that price you can produce tomatoes in the southern part of California and sections of Texas and ship them to New Jersey and sell them more cheaply than those who grow them in fields right next to the Campbell Soup Co. can produce them.

Mr. GATHINGS. The gentleman does not mean they come over here and work for 50 cents a day.

Mr. BAILEY. The majority of the contractors pay 50 cents an hour, and the same kind of labor in New Jersey and New York is paid 80 to 85 cents an hour.

This bill should be sent to the Labor Committee where it belongs, because it is purely a labor proposition. It belongs in the Labor Committee, but it has been handled in the Agriculture Committee. If I can have the assurance that in the future it will be handled by the Labor Committee, I will withdraw my objection.

Mr. GATHINGS. I have nothing to do with that. That is out of my authority or jurisdiction. That is left up to the Speaker or the Parliamentarian of the House.

Mr. SISK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from California.

Mr. SISK. I believe the gentleman was on the floor at the time the gentleman from New York [Mr. SANTANGELO] gave his report on the review of this program, was he not?

Mr. BAILEY. Yes. I remember the gentleman's comments on it when the bill came up.

Mr. SISK. I think the gentleman will agree with me that the gentleman from New York had some reservations at the time this bill was considered.

Since that time he has made a survey of this entire program. I want to say the gentleman did find some abuses, but basically I think the report, and I believe my friend, the gentleman from West Virginia, will agree with me, indicated that a great many of the charges made against this program were unfounded and were not completely fair. I would hope the gentleman from West Virginia would at least permit us this 6 months' extension for this reason, the people who grow the crops, particularly the food crops, find it necessary if they are to be able to plan for the year ahead. The present program expires on June 30. That means the crops which will be started in this coming year will not be able to be harvested if there is no assurance of some labor supply. With this additional 6 months, it will guarantee that the farmers of the country who are handling, as I say, particularly, the food crops, an opportunity to go ahead with the assurance that they have those crops harvested. Of course, at the present time I appreciate the objections and concern of my friend from West Virginia. As he knows, he and I share concern for our domestic workers and the great many unemployed people in this country, but at the same time we do have problems in certain areas with the harvesting of these crops and, as I say, I hope my good friend will see his way clear to go along with us at least for this 6 months' extension.

Mr. BAILEY. I will say to the gentleman from California that my inclination is to withdraw my objection, but I want you to know you are not going to be back here at the expiration of your 6 months extension demanding to make this type of lousy legislation a permanent proposition, as you proposed in your original bill this year, and then cut it down to 2 years, and now it is cut to 6 months. Again, I say it is lousy legislation which cannot be justified, in view of the situation of these farm people out there. You know I tried to handle the matter under the minimum wage bill by bringing these large agricultural units under the minimum wage bill, but I did not get to first base with it and I know of no other way, and I call it to your attention that you cannot continue this kind of legislation without my objection.

Mr. Speaker, in order not to hold up the House I withdraw my reservation of objection, but you are going to hear from me next year.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas [Mr. GATHINGS]?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

ANNEXATION OF REAL PROPERTY BY CITY OF WYANDOTTE, MICH.

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 383) to au-

thorize the annexation of certain real property of the United States by the city of Wyandotte, Mich., with amendments of the Senate thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

On page 2, after line 4, insert:

"SEC. 3. Nothing in this Act shall prevent the Secretary of the Interior from establishing a National Migratory Bird Refuge on the Federal lands referred to in this Act and the closing of these lands and water areas adjacent thereto to the taking, pursuit, or capture of migratory birds, if the Secretary of the Interior considers such action necessary in carrying out responsibilities of the United States pursuant to international treaties and implementing statutes. The Secretary is further authorized to cooperate and enter into agreements with the city of Wyandotte for the recreational use of these lands where not inconsistent with the purpose for which the refuge is established."

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

AUTHORIZING EXCHANGE OF PROPERTY WITHIN SHENANDOAH NATIONAL PARK, VA.

Mrs. PFOST. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 3399) to authorize the exchange of certain property within Shenandoah National Park, in the State of Virginia, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentlewoman from Idaho?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior may accept title to approximately 37.44 acres of land within the authorized boundaries of the Shenandoah National Park, said land fronting on United States Highway Numbered 211 and being more particularly described as follows:

Beginning at park monument H–8, thence with the park boundary line the following courses and distances: north 51 degrees 57 minutes, east 2,242.0 feet to park monument H–9; south 26 degrees 40 minutes, east 51.0 feet to park monument H–10; south 32 degrees 40 minutes, east 340.0 feet to park monument H–11; south 11 degrees 35 minutes, east 190.0 feet to park monument H–12; south 41 degrees 26 minutes, east 329.0 feet to park monument H–13; thence crossing Pass Run south 57 degrees 00 minutes 36 seconds, west 1,871.32 feet to a marked white oak tree near the northeast edge of the fire road on top of Piney Mountain, thence north 58 degrees 36 minutes, west 771.16 feet to the point of beginning.

In exchange for the aforesaid land the Secretary is authorized to convey on the basis of approximately equal values a parcel of park land containing 38.58 acres, being more particularly described as follows:

Beginning at park monument P–153, a point in the center of Route 666, Virginia Department of Highways, thence with the park boundary line the following courses and distances; north 66 degrees 27 minutes, west 345.0 feet to park monument P–152; north 41 degrees 08 minutes, east 705.0 feet to park monument P–151; north 63 degrees 01 minutes, west 302.0 feet to park monument P–150; north 30 degrees 38 minutes, east 1,110.0 feet to park monument P–149; south 74 degrees 36 minutes, east 443.0 feet to park monument P–148; north 41 degrees 33 minutes, east 109.0 feet to park monument P–147; south 69 degrees 50 minutes, east 668.0 feet to the center of the said Route 666; thence leaving the courses of the park boundary line and following the alinement of said Route 666 for the following courses and distances; south 36 degrees 26 minutes, west 436.0 feet; south 33 degrees 45 minutes, west 398.0 feet; south 29 degrees 39 minutes, west 388.0 feet; south 13 degrees, 55 minutes, west 100.0 feet; south 04 degrees 16 minutes, west 70.0 feet; south 32 degrees 37 minutes, west 49.0 feet; north 89 degrees 45 minutes, west 43.0 feet; north 66 degrees 43 minutes, west 50.0 feet; north 89 degrees 26 minutes, west 100.0 feet; north 73 degrees 39 minutes, west 78.0 feet; north 84 degrees 11 minutes, west 45.0 feet; south 72 degrees 08 minutes, west 100.0 feet; south 43 degrees 17 minutes, west 50.0 feet; south 30 degrees 57 minutes, west 73.0 feet; south 47 degrees 22 minutes, west 70.0 feet; south 65 degrees 32 minutes, west 68.0 feet; south 80 degrees 05 minutes, west 130.0 feet; south 51 degrees 40 minutes, west 118.0 feet; south 66 degrees 51 minutes, west 36.0 feet; to the point of beginning.

The bill was ordered to be read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

CONVEYING PROPERTY TO CITY OF BISMARCK, N. DAK.

Mrs. PFOST. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1663) directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentlewoman from Idaho?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress asembled, That in order to clear the title to the property hereinafter described the Secretary of the Interior is authorized and directed to convey by quitclaim deed, without consideration, to the city of Bismarck, North Dakota, all right, title, and interest of the United States in and to the following described tract of land, together with all buildings and other improvements thereon, situated in the city of Bismarck, North Dakota:

Part of the southeast quarter of section 5, to township 138, range 80, beginning at the southeast corner of such section, thence due west for 1,786 feet, thence north 25 degrees and 46 minutes west a distance of 1,122.5 feet, thence north 66 degrees and 39 minutes west a distance of 454.9 feet, thence north 33 degrees and 22 minutes west a distance of 679 feet, thence north 25 degrees and 24 minutes west a distance of 610 feet, thence around a 30-degree 49-minute curve to the right a distance of 374.4 feet, thence due east 66 feet south of the quarter line of such section 5 a distance of 1,103 feet, thence due south a distance of 1,214 feet, and thence due east a distance of 1,220 feet, and thence due south a distance of 1,360 feet to the point of beginning.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

U.S. ARMY MUSEUM

The SPEAKER. The Chair recognizes the gentleman from Missouri [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3846) to establish a National Armed Forces Museum Advisory Board of the Smithsonian Institution, to authorize expansion of the Smithsonian Institution's facilities for portraying the contributions of the Armed Forces of the United States, and for other purposes.

The Clerk read the title of the bill.

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Missouri if this will provide for any new buildings.

Mr. CANNON. It provides for the expansion of the facilities of the Smithsonian Institution to cover the area which for 2 years a commission has been considering, with a view to the establishment of a U.S. Army Museum. The museum was suggested by the President. After extensive consideration it has been decided to recommend instead the expansion of the facilities of the Smithsonian Institution to serve the purpose.

Mr. GROSS. The gentleman assures the House that this will not require—and I have read the bill carefully, and I find no prohibition, you understand, against the building of a new structure—the gentleman from Missouri is assuring the House that this new museum will not require a new building. Is that correct?

Mr. CANNON. I assure the gentleman that absolutely no structure can be erected anywhere for any purpose without Congress providing money through an appropriation bill.

Mr. GROSS. That is quite different.

Mr. CANNON. There is no provision here for money for the erection of a building.

Mr. GROSS. That is quite different, because your bill reads:

There are hereby authorized to be appropriated to the Smithsonian Institution such sums as may be necessary for the purposes of—

And there is no prohibition in the bill against the construction of a brandnew building anywhere within the District or in the adjacent area.

Let us get this straight one way or the other. Either you can build a new building or you can build an addition to the Smithsonian Institution. Which is it?

Mr. CANNON. It is neither. It is merely an authorization.

Mr. GROSS. Mr. Speaker, I am not prepared with an amendment. I do not like to oppose this bill, but I do not believe that we are warranted in going ahead here with a new big Smithsonian building to be constructed, I do not think we ought to build a brandnew building.

This ought to go into the Smithsonian Institution or some structure already erected.

Mr. Speaker, I must object because I have no amendment prepared to prohibit the building of a new building.

MEMBERS OF THE U.S. GROUP OF THE NORTH ATLANTIC TREATY PARLIAMENTARY CONFERENCE

The SPEAKER. Pursuant to the provisions of section 1, Public Law 689, 84th Congress, the Chair appoints as members of the U.S. Group of the North Atlantic Treaty Parliamentary Conference the following members on the part of the House: Mr. HAYS, Mr. SMITH of Mississippi, Mr. DENTON, Mr. ANFUSO, Mr. COAD, Mr. CANFIELD, Mr. CORBETT, Mr. FRELINGHUYSEN, and Mr. BARRY.

CEREMONY IN CONNECTION WITH RAISING OF THE FIRST FLAG OVER EAST CENTRAL FRONT OF THE CAPITOL

The SPEAKER. The Chair desires to announce that a brief ceremony will be held on Friday, September 2, 1960, at 10 a.m., in connection with the raising of the first flag over the extended east central front of the U.S. Capitol. Members and their staffs are cordially invited to attend this ceremony.

PROTECTION OF AGENCIES FORMED UNDER INTERSTATE COMPACTS FROM UNWARRANTED FEDERAL INTRUSION

Mr. CURTIS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the the RECORD, and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CURTIS of Massachusetts. Mr. Speaker, I am introducing a bill (H.R. 13269) to protect an agency formed under an interstate compact to which Massachusetts is a party from unwarranted Federal investigation or regulation. It relates to the New England interstate water pollution control compact, to which congressional assent was given by an act of July 31, 1947, 61 Stat. 682.

The need for this bill results from the assertion of Federal jurisdiction over the Port of New York Authority, an agency formed under an interstate compact. The Constitution requires the consent of Congress to an interstate compact, and that consent usually contains a clause reserving the right of Congress to alter, amend, or repeal its consent.

Such reservation was made both in the case of the New England interstate water pollution control compact and in the case of the compact setting up the Port of New York Authority.

A committee of the Congress undertook an investigation of the Port of New York Authority. It based its right of investigation principally on the grounds that the consent of the Congress to the compact creating the agency had been necessary, and that the Congress had reserved the right to alter, amend, or repeal its consent. It argued that if the Congress had the right to alter, amend, or repeal its consent to the compact, it must necessarily have the right to investigate operations under the compact in order to determine whether it should exercise such right.

This right of investigation was challenged by the two States, but was upheld by the Congress, and three officers of the Port of New York Authority were found in contempt of the Congress for failure to produce documents demanded by the committee.

On August 22, 1960, just prior to the House debate on the citations for contempt, the Governor of New York sent a telegram to a Member of Congress reading in part, as follows:

> We are therefore faced with an assertion of Federal power to control State and municipal agencies which would wrench our system of government from its established foundations. As Governor Rockefeller and Governor Meyner put it in their joint directives on June 25, 1960, to the port authority "the subpena at issue appeared to us and our legal advisers to constitute a novel intrusion by the Federal Government into areas reserved by the Constitution to our respective States, and to constitute a precedent which could subject various agencies of State government throughout the Nation to be similarly answerable to Federal authority."

I made an argument in support of the above view in the debate regarding the citations for contempt. It appears on page 17322 of the CONGRESSIONAL RECORD.

The same principle relied on to justify the investigation of the Port of New York Authority seems applicable to other agencies formed under interstate compacts as to which the Congress reserved the right to alter, amend, or repeal its consent.

The bill which I am filing seeks to protect the commission which operates under the New England interstate water pollution control compact from the application of this principle. It amends the act which granted the consent of Congress to this compact by changing the section reserving the right of Congress to alter, amend, or repeal its consent.

That section, which is section 4 of the act, now reads: "The right to alter, amend, or repeal this Act is expressly reserved."

In its amended form it will read:

> The right to alter, amend, or repeal this act is expressly reserved, except that nothing in this section shall be construed to confer on the United States any right to investigate or regulate any act performed under this compact.

This change disavows any Federal rights of investigation which are claimed to flow from the reserved right to alter, amend, or repeal the congressional consent. That is its only effect, as it refers only to rights arising under this one section, and will have no effect on any rights which the Federal Government may have under the Constitution or other statutes.

The Federal Government is of course properly concerned with some State operations, where for example the use of Federal funds is involved, and the bill which I am filing will not affect any such situation. And neither it nor the compact will impair the rights or jurisdiction of the United States over the waters which are the subject of the compact. Those rights are specifically reserved in the act granting the consent of Congress to the compact.

One reason for choosing the New England Interstate Water Pollution Control Compact as the subject of this bill was the fact that the New England Interstate Water Pollution Control Commission recently wrote me a letter expressing apprehension over the legal developments incident to the investigation of the Port of New York Authority. The letter reads as follows:

> DEAR CONGRESSMAN: The New England Interstate Water Pollution Control Commission is an agency of the New England States and New York State administering an interstate compact for the control of pollution of regional waters.
>
> We are cognizant of and view with concern recent efforts to impose Federal control over the operations and internal management of agencies established under interstate compacts.
>
> H.J. Res. 615 now pending in the present Congress would assert Federal jurisdiction contrary to the purposes and intent of approved interstate compacts, and its adoption would establish a precedent detrimental to Federal-State and interstate relations.
>
> We are further aware of the proposal to use contempt citations against officials of an interstate agency for refusing to submit its files on internal administration to a congressional committee. Certainly Congress should not act on any citation for contempt of interstate agency officials until judicial clarification of congressional powers in this matter is ascertained.
>
> Sincerely yours,
>
> ———— ————.

I believe that the apprehension of the commission is justified, and that action must be taken to guard against Federal intrusion of State agencies formed under interstate compacts. The operations contemplated under the New England interstate water pollution control compact are State operations. The fact that instead of being conducted by one State, they are conducted cooperatively by several States does not change that fundamental fact.

The Federal Government should no more seek to investigate the agency of the States operating under this compact than it should to investigate the operations of the Massachusetts Department of Public Works.

The rights of Federal investigation claimed with regard to the Port of New York Authority are inimical and prejudicial to the whole interstate cooperation movement fostered by the Council of State Governments, and which has encouraged the formation of interstate compacts.

One purpose of the emphasis on interstate cooperation was to find a way of avoiding the constant growth and concentration of Federal power, and to make provision for the States to assume responsibilities and act effectively in matters of local interest as to which State cooperation was desirable.

The President's Commission on Intergovernmental Relations favored the use of interstate compacts, saying:

Through regional compacts interstate cooperation can minimize the need for regional administration by the National Government.

Commissions on interstate cooperation have been formed in many States to encourage this development. It was my privilege to serve for 6 years on the Massachusetts Commission on Interstate Cooperation, and I have long been concerned with interstate compacts.

As a member of that commission, and as a member of the committee on the judiciary of the Massachusetts Legislature, I had to do with the initiating of interstate compacts; and as a member of the House Committee on the Judiciary here, I have been concerned with the approving of interstate compacts by the Congress.

In none of these connections did I ever hear it suggested that a right of the Federal Government to intervene in operations under interstate compacts would arise either as a result of the requirement of congressional consent, or as a result of the reserved right of Congress to alter, amend, or repeal its consent.

I submit that it was never thought of or intended that such a right would so arise, and that the effort made by the bill which I am filing to prevent such a result is constructive and in the public interest.

This bill is being filed near the end of the session. But its filing may yet serve a useful purpose, as the bill will be printed and be available for consideration by interested parties during the interval between the sessions of the Congress. A similar bill can be filed in the next Congress.

Massachusetts is a party to other interstate compacts as to which similar bills could be filed, but at this time I am filing only this one bill.

Many other States are of course parties to a great many interstate compacts as to which the same questions arise which are dealt with in the bill which I am filing. I suggest the need for this type of legislation to those Members who may, as a result of the investigation of the Port of New York Authority, be concerned as to the integrity of agencies operating under interstate compacts to which their States are a party.

The need for this bill is also indicated by an excellent editorial in the Boston Herald of August 30, 1960. It finds that the investigation of the Port of New York Authority has raised a serious challenge to States rights. I include this editorial as part of my remarks:

UNITED STATES VERSUS TWO STATES

The Port of New York Authority is a billion-dollar creation of New York and New Jersey under a congressional grant for an interstate compact. Many in the two States believe it has got too big for its breeches, that it is building bridges, tunnels, and airports, that pay, and neglecting more important community needs that don't pay, like public transportation. Many wonder if this half-public, half-private body has arrogantly assumed to itself the destiny of the country's biggest metropolitan area.

But that, we submit, is a problem for New York and New Jersey. It is not a problem for the United States.

Yet the chairman of the authority, Austin J. Tobin (salary, $60,000), and two other officials have been cited by the House for contempt for failing to produce on subpena the intimate internal details of its operations. A large mass of materials including minutes of meetings revealing the nature and extent of the authority's operations was produced by Mr. Tobin and others, but this did not satisfy Representative CELLER, chairman of the Antitrust Subcommittee of the House, who insisted on all the authority's records.

Representative CELLER insists that Congress must have all the records in order to determine if the authority is living within the terms of the interstate compact. The Washington Post and Times Herald agrees.

We do not agree.

What Congress did in granting the compact between New York and New Jersey was to approve a joint operation by the two States. The information that the authority supplied was enough to show whether the terms of the compact had been exceeded.

How the operations were conducted within the terms of that compact is the business only of the two States. Mr. CELLER, in seeking confidential memorandums and purely internal information was intruding into details beyond the scope of Congress.

This is material such as Congress cannot demand from the President or from any executive department of the National Government. To demand it from the creature of two State governments is even less justifiable.

The Port of New York Authority differs in no essential way from the Boston Port Authority except that two States instead of one fathered it.

The Governors of New York and New Jersey have flatly denied the right of Congress to intrude.

Governor Meyner, of New Jersey, has pointed out that the authority officials took seven packingcases of information down to Washington for the subcommittee, but "apparently the subcommittee was more interested in establishing a record to hold these people in contempt."

Whether the two States have adequately supervised the operations of the authority is much open to question. But the possible dereliction of the States does not validate the entrance of the Congress.

Massachusetts has entered into 10 Congress-approved compacts with other States, including such matters as Connecticut River and Merrimack River flood control, New England higher education, New England water pollution, and the return of parolees and probationers. If Mr. CELLER has his way, the confidential interior operations of these agencies must be laid open to Congress on demand, even though it is doubtful if the Legislature could command such data against the refusal of the Governor.

Mr. CELLER has raised a serious challenge to States rights.

THE HONORABLE GRAHAM A. BARDEN, OF NORTH CAROLINA

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, our courageous colleague, GRAHAM BARDEN, is voluntarily retiring from Congress. I have cherished his friendship for many long years. We attended law school together at the University of North Carolina in the days before World War I, and from that time until now we have been closely associated with each other. We actually started our active service in this House on the same day, but because I had been elected in a special election I became his senior in service. For more than a quarter of a century we have served together here in this House. I know him well.

GRAHAM BARDEN, by his intelligent devotion to duty, his unswerving fidelity to truth, his great integrity, and by the honest and courageous manner in which he has discharged the many functions of high office, has distinguished himself in the service of his country and has won the love and affection of his colleagues. GRAHAM BARDEN'S character is the tower of his strength. His work here has far surpassed his wages. He has earned the right to live the rest of his life as he pleases. He has achieved greatness and because of his achievements he will be long remembered. I have not only enjoyed my associations with this great and good man, but I have likewise enjoyed the friendship of his lovely wife and the members of his family and I shall miss all of them when we return for the convening of the next session.

May Heaven light his pathway and may the Lord bless and keep him.

Mr. Speaker, I yield to the gentleman from California [Mr. HIESTAND].

Mr. HIESTAND. Mr. Speaker, I want to take this opportunity to join the distinguished gentleman from North Carolina [Mr. COOLEY] in paying tribute to our chairman today but to be a former chairman, the very able gentleman from North Carolina, GRAHAM BARDEN. He has been an inspiration to all of those on the Committee on Education and Labor for many years; to me certainly for the time I have been on the committee. His example might well be followed by almost any chairman, with his exemplary fairness, patience, and yet firmness in carrying out the will of the committee. I salute him not only as a friend but as a great statesman.

Mr. COOLEY. I thank the gentleman. I now yield to the gentleman from North Carolina [Mr. BONNER].

Mr. BONNER. Mr. Speaker, it gives me a great deal of pleasure to join the dean of the North Carolina delegation in paying tribute to one of North Carolina's most outstanding sons, the gentleman from North Carolina [Mr. BARDEN]. GRAHAM BARDEN before coming to Congress was a successful attorney at New Bern, N.C., and an outstanding member of the bar of the State of North Carolina. He was judge of the court in Craven County, N.C., and was elected to the 74th Congress. As the gentleman from North Carolina has stated and as we all know, he is a fearless, outstanding leader. Though many may have disagreed with GRAHAM BARDEN, he was always fair in his conduct and operation in the handling of legislation. The State of North Carolina is very proud of his service in the Congress, and it is my opinion and I think the opinion of the people of North Carolina that in the retirement of GRAHAM BARDEN they have lost a great statesman in the Congress

of the United States. He could have stayed here indefinitely had he run for reelection. There is no shadow of doubt but what he would have been sent back to the Congress. I have a personal admiration for him, and I hope that he and his family enjoy the happy days that I am sure he will have in his retirement. But, knowing him as I do, I know he will not retire, because he will be active in civic, religious, and other affairs in his home town and in the State of North Carolina. I shall miss his association here in the House.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. WHITENER].

Mr. WHITENER. Mr. Speaker, I appreciate my colleague and the dean of our delegation, the gentleman from North Carolina [Mr. COOLEY], yielding to me in order that I, along with him and the others here, may undertake to express my appreciation of the work and the service of our mutual friend, the gentleman from North Carolina, GRAHAM BARDEN, who recently announced his retirement as a Member of the Congress.

I know of no citizen in North Carolina who enjoys the universal respect of his people in a greater measure than does GRAHAM BARDEN. He is, to be sure, a loyal and outstanding son of the Tar Heel State. In the words of the toast of our State, I think that we may say that GRAHAM BARDEN truly represents the expression in that toast that in the land of the longleaf pines the weak grow strong and the strong grow great. Certainly all agree that GRAHAM BARDEN is a great man.

His service in this House, his service as judge of the courts of his area, his service as a member of the general assembly of North Carolina were in each instance covered with the sort of performance which gives his constituents the proper grounds for being proud and appreciative of him. I personally appreciate the many kind acts that he has done for me as a Member of this body. His attitude of not being a dominating individual as far as his colleagues from North Carolina are concerned but one of great concern and one of understanding will remain as one of the fondest memories that I have in my association with him. As he returns to the beautiful home that he has on the Trent River just out of New Bern, N.C., and to live there among his friends and neighbors, including some of my relatives, I want to say to him that Mrs. Whitener and I look forward to seeing him on many occasions in the future, and we wish for him and his lovely wife and family all of the happiness which their outstanding service to their State and Nation entitles them to enjoy.

Mr. COOLEY. Mr. Speaker, I yield to the distinguished gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I thank the gentleman from North Carolina for yielding to me.

Last spring it was my great pleasure to make the presentation of the George Washington Award of the American Good Government Society to the Honorable GRAHAM BARDEN, of North Carolina. The remarks I made then I meant and I mean them now.

GRAHAM BARDEN came to the Congress of the United States just a few months before I did. I got here a few days late in the 74th Congress. He was here for the beginning of that Congress and I got to know him shortly after. He sat on the Democratic side of the aisle and I sat on the Republican side. But through years we became great friends.

It became my happy privilege to be in that home of which some have spoken on the Trent River down in New Bern, N.C. And so I know something about GRAHAM BARDEN and the people who live in his community. I know something of the great affection they hold for him, an affection and a regard that impelled them to return him to the Congress of the United States time after time after time. And may I say, as some have said before me, that had he chosen to remain a Member of this body he would continue to be with us here. But he chose to retire. Because he has made that choice I certainly wish him well, as I do his wife and his fine family. Certainly he deserves the best that this country can give.

I know, of course, that many in this body at times disagreed with the stands that GRAHAM BARDEN took. Sometimes I disagreed with him. Sometimes I agreed with him. But there was one thing about GRAHAM BARDEN everyone always knew, and that is, that what he believed in he was ready to stand for, ready to make his stand known in the debates here on the floor of the House of Representatives.

Even those—and I say this advisedly—even those who disagreed with him most violently, on occasion, would yet grant to him complete sincerity of conviction, the highest degree of integrity and a firm belief that GRAHAM BARDEN always said and did exactly what he believed.

I am sorry that GRAHAM has elected to leave us. We could well use his services here in the Congress of the United States in the years ahead as we have used them in the years that have gone by.

But I trust he will come back to see us often, because I for one, as I am sure is true of every Member of this body, will be only too happy to have him among us again.

Mr. COOLEY. Mr. Speaker, I yield to my colleague from North Carolina [Mr. LENNON].

Mr. LENNON. Mr. Speaker, the fall of the gavel in ending the 86th Congress, brings to a close the distinguished legislative careers of a great many very able and distinguished Members of this body. There are two men from North Carolina who fall in that category, the Honorable GRAHAM A. BARDEN, and the Honorable CARL T. DURHAM. These two men are entirely different in their personalities. Both had long and distinguished records of public service in the State of North Carolina before they came to Washington. Nothing that could be said here this evening would point out to any of you who have known them for a long time the attributes and character of these two men. With their friends and personal acquaintances and in their personal dealings and in their social life they were as soft as velvet, but in the hard decisions that had to be made from time to time they could be and they were as hard as tempered steel itself.

I cannot believe that any man who has come to our great body from our beloved State of North Carolina at any time in history has had more courage, more raw courage, than GRAHAM A. BARDEN. I believe if the thinking people of America would turn to the record of this great man during his tenure of service here, if they would see and understand what I believe to be the facts, they would know that time and again he has been the man who has stood against those who would go beyond what he believes the constitutional concept of government is. Yet he has been the friend of all those who would let him be friendly.

Certainly in the field of education and in the field of labor law no man is better known in America than GRAHAM A. BARDEN. I say frankly and I believe most of those who are within the sound of my voice will agree with me that few men in this body have contributed more to the understanding of labor reform laws and education. He believed in both.

CARL T. DURHAM is one of the most beloved characters of any of our Members. He came to Washington less than 25 years ago, but during that time he has become known as a great authority in the field of atomic power. Serving as chairman and vice chairman of the great Joint Committee on Atomic Energy he has contributed much in this field.

It is certainly a great honor to me and a personal privilege to be permitted to stand here tonight and pay respect to these two great North Carolinians. We will miss them, but they will continue, I believe, in North Carolina, the great fight they waged on the floor and in the legislative committees of Congress. Their voices still will be heard here in one way or another.

Mr. COOLEY. Mr. Speaker, I now yield to the majority leader, the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, I join my colleagues from North Carolina and the minority leader, and others, in paying tribute to a great American and an outstanding legislator. GRAHAM A. BARDEN always impressed everyone he met as being first a gentleman. He impressed everyone he met as being a man of strong convictions, a man who legislated in accordance with his convictions. He impressed everyone with his intellectual honesty.

He is a man who has been devoted to duty. He has given untiringly of his time in connection with his work in committee and in the performance of his duties on the floor of the House. I have a profound respect for GRAHAM BARDEN. As I said on a previous occasion, referring to another colleague of ours, while we did not always agree, I have a profound respect for him because I knew that he is intellectually honest. GRAHAM BARDEN is a man possessed of intellectual honesty. He leaves this body voluntarily. He has many years of life ahead

of him. Knowing him as we do, we know that he will not lead an inactive life, but will lead a very active one in whatever pursuits he may engage in in the years that lie ahead. I value very much the friendship that exists between GRAHAM BARDEN and myself, and I shall always treasure it. To GRAHAM and to Mrs. Barden and their loved ones I wish every happiness and success in the years that lie ahead.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Speaker, it is with somewhat mixed emotions that I rise to join my colleagues on the floor of the House, not only my colleagues from the State of North Carolina, but from other States as well, in paying a public tribute to GRAHAM BARDEN. I am delighted to have the opportunity of testifying in public to the very high regard I have for this distinguished North Carolinian, but am saddened at the thought that he is retiring from public life and that his great talents for leadership and as a legislator will no longer be available to the people of his district, the State of North Carolina, and our country.

I knew "HAP" BARDEN personally long before I came to Congress, and our relationships have always been cordial and friendly. Our wives have also been close friends for many years and they have been especially close to each other since we are neighbors in the same apartment house here in Washington.

Of all the people I have had the privilege of being associated with during my almost 8 years in Congress, "HAP" BARDEN stands out in my mind as one of the most outstanding. We have just heard the distinguished majority leader describe him as a man of strong convictions. I concur in that appraisal but would go one step beyond it and say that he is one man who has demonstrated over the years that he has the courage of his convictions. I have seen him on the floor of this Chamber stand by those convictions despite enormous pressures brought upon him to recede from them. When the history of this period has been written, I predict that the record will show that few Members of Congress have left a deeper imprint upon this body than GRAHAM BARDEN.

"HAP" as he is affectionately known by his friends, voluntarily leaves the service of his district, his State and his country. I have no doubt that he could have remained here indefinitely had he chosen to do so. But after having fought the good fight here, he now longs to return to the more peaceful and placid life he enjoys so much on the banks of the Trent River down in eastern North Carolina. As he does so and begins to live again among his family and friends in that community, I join all of his friends here in this body in extending to him and to his family my very kindest regards and sincere good wishes for long life, good health, and a full measure of happiness in the years that lie ahead.

Mr. COOLEY. Mr. Speaker, I yield to my friend, the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Speaker, when I first came to the Congress in January 1943, I was assigned to the Committee on Education.

Its chairman, and the first under whom I was privileged to work, and from whom I learned a very great deal, was GRAHAM BARDEN. I do not know of any one person in the House who made a deeper impression on me personally. He had such a solidness, such courage and rocklike firmness when he had thought a thing through and decided what he believed to be the right position. But with the firmness was an unfailing kindliness, a sensitiveness to the problems and respect for the views of a new member of his committee.

In recent years our work here has not brought us so closely together, but I have never failed to be impressed by his presentation of his position on any issue—his directness, his honesty, his clarity. So, although our relationship has not been as intimate as I would have liked because his chief responsibilities and mine have generally been in different lines, there has been a special feeling of friendship for him—more like that of a son looking up to a father, or a follower looking up to a guide—in the relationship between GRAHAM BARDEN and myself.

I join with his host of friends in paying tribute to him today for the tremendous contributions he has made in the field of education. The first bill on which I worked in the House, and under his guidance, was the Vocational Rehabilitation Act which bears his name. Some were opposed to doing anything in this field that would take the Federal Government into education the least bit. Others favored steps that would have meant practically Federal control. But GRAHAM BARDEN said: "No, let us do the right thing, let the Federal Government do what it should to get the best program of vocational rehabilitation without going beyond the bounds of its proper role and responsibility. I am grateful for all I learned from him during these 18 years. I join in wishing him and his family every good thing in the years to come.

Mr. COOLEY. Mr. Speaker, I yield now to my colleague from North Caroline [Mr. FOUNTAIN].

Mr. FOUNTAIN. Mr. Speaker, I am grateful for the privilege of joining my colleague, the gentleman from North Carolina [Mr. COOLEY] and others in the House, in expressing my sincere regrets that our distinguished and able colleague, the gentleman from North Carolina [Mr. BARDEN] has decided to retire from this great body. I am happy to join in the many fine tributes which have been paid this great American, not alone by Members of this House, but by countless numbers throughout the land. North Carolina and the Nation are losing a great and dedicated public servant.

When "HAP" BARDEN announced his decision to retire from this body and return to the community life of his hometown, all of North Carolina was grievously shocked. It was an unpleasant surprise, for his people wanted him to remain here. In fact, for a while they felt that he was letting them down. It took them some time to become reconciled to the fairness of his decision to himself, his lovely wife and family. Before being satisfied about his decision, however, countless numbers of our people urged him to change his mind and seek reelection. The entire North Carolina delegation and more than 100 others in this great body, individually and collectively, did the same thing. They knew that once GRAHAM BARDEN, after careful deliberation on any matter, made up his mind, he was not likely to change it. Nonetheless, in this instance their interest in the welfare of our Nation prompted them to try.

Like many other dedicated public servants North Carolina has sent to this great body "HAP" BARDEN had the esteem and the respect not alone of his own constituency but of thousands upon thousands of people throughout the country who even when they disagreed with him admired his unexcelled courage and intellectual honesty. No one ever had any doubt about where GRAHAM BARDEN stood in a given situation. When he analyzed a situation and made up his mind, there was no question about where he stood.

"HAP" BARDEN was and always will remain a friendly man. The name "HAP," given to him by friends many years ago, is a tribute to his great quality of friendliness. In his work here he was very frank, sometimes too frank for his own popularity in some areas, but in his frankness those of us who know him caught the spirit of his great convictions and his determination to stand by them at all cost. One thing in particular which impressed me about "HAP" BARDEN—sometimes seemingly a small thing but an important one—was his keen understanding of human nature. He could not and will never be fooled by anyone. In my opinion, this quality of seeing beyond the words of those with whom he dealt, together with his great qualities of understanding and love for his fellow man, enabled him to be the great legislator that he was. I wish I had time to give you a true picture of the esteem in which he is held by the people of his district. However, I am sure you know it from having known him. In addition to the many fine qualities to which I have referred and which others have already described, "HAP" BARDEN has a great sense of humor. This quality enabled him to express himself in righteous indignation against the desecration of any principle for which he stood without incurring the wrath of understanding opponents who knew him. This body will sorely miss "HAP" BARDEN. In our limited social gettogethers here in Washington we will also miss his lovely and charming wife whose personality and loving devotion have been to him a tower of strength through all of his public experience.

I therefore want to join others who have spoken here in the early hours of the morning in expressing the sincere hope that "HAP" and his lovely wife, "Aggie," will have in their retirement from the hustle and bustle of the difficult and trying experiences here in Washington an abundance of good health, happiness, and enduring friendships wherever they may be and in whatever they may undertake together during the years that lie ahead. If she could be here this morning, I am confident that Mrs. Fountain would join me

in my simple expressions of love and devotion for this great couple.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. KEARNS].

Mr. KEARNS. Mr. Speaker, as the ranking member of the Committee on Labor, and having served with GRAHAM BARDEN for 14 years on that distinguished committee, I would like to refer to him as the "Old Pro." I will never forget when we had the Landrum-Griffin bill up for consideration, when he took the floor we had a standing ovation for him, and I remember yielding him 25 minutes of my time on this side so he could make that last speech to put over the bill.

I will tell you something else. Whether you are Democrats or Republicans there will be very few men who ever come to the Congress, or who ever leave the Congress, who will be as highly respected as GRAHAM BARDEN.

On July 1, the day before Congress recessed for the national conventions, I had the members of my side of the committee, and some of our distinguished congressional leaders from both sides of the aisle, as well as members of the White House staff, over to my office for a little party in honor of GRAHAM. At that time our side of the committee gave me their signatures for a stainless steel tray which I had made and which I personally delivered to the chairman this morning in his office. The inscription on the tray, following the signatures, reads as follows: "Members of the committee who appreciated the privilege and good fortune of working with this distinguished American who served his country so well and who had their utmost respect and support."

So to GRAHAM BARDEN may I say, "You are going fishing, but we are going to be fishing for another man like GRAHAM."

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. TAYLOR].

Mr. TAYLOR of North Carolina. Mr. Speaker, as the junior member of the North Carolina delegation and the junior Member of this Congress, I wish to endorse the remarks made by my colleague. I feel honored to have served for even a few weeks with Mr. GRAHAM BARDEN.

For more than a quarter of a century he has served his district and his Nation in a very outstanding manner. I wish for him and his wife many years of happiness and many more years of useful public service.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Texas [Mr. ROGERS].

Mr. ROGERS of Texas. Mr. Speaker, I am greatly honored to have the opportunity to express my deep feeling of friendship for GRAHAM BARDEN. I have never known a man for whom I held a higher regard. I am indeed happy that it was my lot in life to have been afforded the opportunity to meet and know this man and his lovely wife and family. His many kindnesses and courtesies, which were so badly needed when I first came to the Congress, will never be forgotten. In fact, I can never think of the Congress of the United States without thinking of GRAHAM BARDEN. To me, he is the true exemplification of an indispensable element of representative government. Much more could be said on the merits of this great American, and it is most difficult to sum up in a few words the things that ought to be said. However, if I were required to make such a brief summation, I would say, "GRAHAM BARDEN is the kind of man that you like for your children to know."

I wish for GRAHAM, his lovely wife Agnes, and their children and grandchildren all the happiness in the world.

Mr. COOLEY. I yield to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Speaker, it is my purpose and my privilege to pay my own tribute to GRAHAM BARDEN.

Mr. BARDEN was chairman of the Education and Labor Committee for 4 of the 6 years during which I was privileged to serve on that committee. I have never known a man to be more fair, more zealous and more of a mind to do the right thing at all times than is GRAHAM BARDEN.

He is not only a mentor under whom I was proud to work, but he is also a friend whose friendship and approbation I value very highly.

This is a man who epitomized manhood itself, and in his character and in his makeup may be found most of the good things which we prize as human beings and as members of the human race. He has strong, but well-considered viewpoints. Because of his faith in the principles he holds dear, he always speaks with a certain ring of truth which makes him one of the most persuasive of men.

I am sorry that he is leaving the Congress. He will be sorely missed, and he will never be adequately replaced. However, I am glad, in a way, that he will be able to spend the time that he desires to spend in his beloved North Carolina with his fine wife, his family, and his grandchildren, and to enjoy the fruits of the work and also the results of that work which he has earned so richly. So, as he leaves the halls of the Congress, I say to him, and I say this on behalf of myself and Mrs. Rhodes, that he knows he has friends here who will never forget him and who always will be available for any service that he may desire to call upon us to perform.

Mr. COOLEY. Mr. Speaker, in conclusion, concerning our friend GRAHAM BARDEN, I want to say that I happen to know that more than 100 Members of this body urged him to reverse his decision and to remain here and to continue in the service of his country. But, as pointed out by our colleague, the gentleman from North Carolina [Mr. FOUNTAIN], when GRAHAM BARDEN makes up his mind, he makes up his mind. There is not enough pressure to be brought to bear upon him to remain here. I think he was invaluable. He was worthy of the confidence of his constituents and the love and the affection of the Members of this Congress.

Mr. Speaker, I ask unanimous consent that all Members desiring to do so may extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, no Member's retirement from this body in history has caused more profound regret throughout the entire United States than that of GRAHAM BARDEN. The Nation recognized in GRAHAM BARDEN one of the greatest, most courageous and fearless national leaders of modern times. GRAHAM BARDEN's love for the man who labors by the sweat of his brow was demonstrated a thousand times by acts and legislation which prevented his unfair exploitation by pressure groups and selfish interests. GRAHAM BARDEN's devotion to the cause of real education and the freedom of education is one of the highlights of this national era. GRAHAM BARDEN's integrity, leadership, and forthrightness will always be a personal inspiration to me. Mrs. Dorn shared GRAHAM BARDEN's love for his beloved University of North Carolina, and she joins me in wishing for him and his fine family many, many years of happiness.

Mr. KITCHIN. Mr. Speaker, the time has come to bid farewell to GRAHAM A. BARDEN as his retirement from the House of Representatives approaches. Some months ago when my colleague and warm personal friend issued the announcement that he would retire at the end of this session of the Congress, I had hoped, but in vain, something would occur that would change his mind and that he would agree to remain with us. Of course, I knew that he wanted to go home to New Bern but there was so much pressure from his fine constituency for him to reconsider, that I thought he might possibly give in to their desires.

Mr. Speaker, time does not permit nor is my vocabulary adequate to pay due tribute to an outstanding statesman—"HAP" BARDEN. HAP's retirement from this House leaves a void that probably will never be filled. He came to the Congress almost 26 years ago and he has rendered unfailing service to the people of the Third District of North Carolina. His retirement from public life brings to a close a legislative career that began in the North Carolina Legislature and reaches its peak with his distinguished service in the House of Representatives. He has occupied not only a most important position of leadership in this body, but a warm and affectionate spot in the hearts of all his colleagues. There have been many occasions when he has been opposed by his colleagues on both sides of the aisle regarding issues and legislation but never without obvious respect and admiration for his sincerity and ability. It has been said often in jest that HAP has the most even temper of any Member of the House of Representatives—always mad. This, of course, is not true. Underneath his rugged exterior he possesses one of the kindest and most sympathetic dispositions I have ever known. While HAP would never knowingly hurt anyone, he would certainly never dodge a legislative fight. No man in the Congress has been more firmly

dedicated to his legislative duties, and he has gained an outstanding reputation as a fearless leader.

In the 4 years that I have had the privilege of serving the Eighth District of North Carolina in the House of Representatives, I have been close to HAP BARDEN. Mrs. Kitchin and I have enjoyed the friendship of HAP and his charming wife Agnes, and proudly count them among our close and dearest friends.

In the retirement of my colleague and fellow North Carolinian the Nation loses an outstanding public servant, and I shall indeed miss him. HAP BARDEN will leave behind him a record of accomplishments, without taint or blemish, and the people of North Carolina and America are justly proud of his record.

Mr. LIBONATI. Mr. Speaker, I can honestly say that the Honorable GRAHAM ARTHUR BARDEN, the distinguished Democratic chairman of the Committee on Labor and Education, is one of the most valuable legislators in the Congress.

He was dominant in the exercise of the prerogatives of the powers of his office. Although many may disagree with his position on major legislation relative to education and labor, none can deny that he was solid in his antagonism to liberal legislation affecting education and labor. I personally like a person who is unswerving in matters that he or she feels honestly are not good for the citizenry of the Republic although I personally disagree with his position on the legislation.

Congressman BARDEN maintained his own views regardless of the opposition.

There are times when potent leadership must be assertive in its opposition. It is like a supreme guidance to travel slow and meditatively. It may delay progressive thinking but not necessarily destroy what eventually will come to pass. A slowdown sometimes is constructive in the finality of the passage of operative law.

This soldier, lawyer, and legislator gave invaluable services to his Nation. His retirement is a real loss. He was pointed in his understanding of legislative problems. He was honest and laborious in everything that he considered a legislative prerogative. We will miss our good friend who always sought the leveling influence of compromise in the areas of legislation that he felt were contributory to the welfare of our Nation.

We of the Illinois delegation, in honest desire, wish that in his retirement he enjoys the best of life's offerings—health and happiness to be enjoyed with his fine family.

The Nation, the State of North Carolina, and the citizens of our great Republic have lost a patriot and statesman whose absence will be noted in the Halls of the Congress. We, your colleagues, will sadly note your absence. God bless you and yours. We bid you Godspeed.

Mr. ALEXANDER. Mr. Speaker, it was with deep regret that I learned that my good friend and colleague, the Honorable GRAHAM A. BARDEN was voluntarily retiring from this distinguished body. We know him better as "HAP," since his jolly nature and happy disposition earned him that nickname. His fearlessness and his friendship have been a source of strength to me.

He has contributed an outstanding service to his district, our State, and the Nation since he began his service in the Congress.

After serving admirably in the U.S. Navy during World War I he attended the University of North Carolina, earning his LL.B. degree. While at the university he was an outstanding football player.

During his prominent career he taught school, practiced law, and served several terms as a judge of recorder's court of Craven County, before being elected to represent Craven County in the North Carolina General Assembly. He distinguished himself as a member of the North Carolina General Assembly by his ardent support of public schools; and gained such widespread and favorable attention he found no difficulty in winning a seat in the 74th Congress. He has been reelected to each succeeding Congress. Very early in his congressional career he was appointed to the House Committee on Education, later becoming chairman of that important committee, now known as the Committee on Education and Labor. He also served as chairman of the House Committee on Libraries.

Mr. BARDEN has had a prominent role in many acts of legislative importance in the fields of labor and education. One of his most outstanding accomplishments was in the preparation of legislation which expanded the vocational education program throughout the Nation. This has provided many the opportunity to train in vocation service. This act bears his name with that of Senator George. Another act he has highly instrumental in was the Barden-La Follette Act, which makes vocational training possible for all types of physically handicapped people.

Congressman BARDEN was also active in the passage of the Taft-Hartley bill. And was also a leader in the passage of the Landrum-Griffin bill which was designed to control corruption in the unions.

"HAP" has never been a quitter; he has always displayed that rare quality known as courage; and is possessed of common sense. Of him it can be said that he has given faithful and distinguished service.

His retirement is a loss not only to the people of North Carolina but also to our entire Nation. Indeed, he will be greatly missed.

But while his retirement is our loss, I hope he will gain much from his well-earned rest, relaxation, the joys of spending more time with his devoted family, and many pleasant hours spent fishing.

I wish "HAP" and his lovely family many, many years of good health and contentment and hope they will come back often to see us.

Mr. MCMILLAN. Mr. Speaker, I certainly would not want to leave Washington without expressing my regrets over the fact that my colleague and personal friend, GRAHAM BARDEN, has decided to retire from Congress. The Nation and entire world, in my opinion, has suffered a great loss by Mr. BARDEN's decision to retire from the Congress of the United States. He has always been a tower of strength and has prevented more obnoxious legislation from passing the House than any other Member of Congress since I have been a Member of this great body. He is one of the leading exponents of constitutional government in the United States and its seems that that vintage is getting very scarce in his country. I have witnessed on numerous occasions, Mr. BARDEN's influence in preventing legislation from being enacted that would have completely circumvented our Constitution and would have placed in the hands of the Federal Government powers which were intended by our Founding Fathers to remain in the hands of the individual State governments. I certainly can understand why Mr. BARDEN has decided to retire as it is certainly no pleasure to serve on a committee or in any body where the cards are stacked against you. I know GRAHAM BARDEN has had an uphill fight since the day he was selected as chairman of the House Education and Labor Committee in order to at least preserve a part of the Constitution and prevent us from having a total Central Government.

He was responsible to a great extent for the passage of the Taft-Hartley Act, a law which if properly administered. would curtail a number of the terrible strikes we have witnessed here in this country during the past few years. He was also the tower of strength in the passage of the Landrum-Griffin bill which also if properly administered would at least do something to curb the activities of some of our power-drunk labor leaders.

I certainly do not believe in stacking any committee with any group whether they be liberal or conservative, to the extent that a chairman cannot properly administer the affairs of the committee. In fact, I think the Ways and Means Committee, who has jurisdiction of selecting Members to serve on the individual legislative committees, should consult with the chairman before they assign any new Member to a committee, as the chairman is responsible for the type of legislation that is reported from his committee, and he should be given some preference as to who is assigned to his committee.

I wish for Mr. and Mrs. Barden good health and happiness during their retirement years and hope I will have an opportunity to join him on several fishing trips at a future date.

Mr. MCINTIRE. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to say that as one travels down the pathway of life, he is sometimes privileged to meet rare and truly brilliant personalities.

Such a personality is GRAHAM A. BARDEN, a colleague with whom it has been a real honor to serve in the Congress of the United States.

Mr. BARDEN will no longer be with the House of Representatives, having determined to pursue the course of private

life. As he leaves this Chamber, one is quickly led to think of the high quality and fine character of this man, an individual whose great ability, firm convictions, and high principles make him, in effect, shine forth like a bright light.

During the 9 years that I have served in the House of Representatives, the Honorable GRAHAM A. BARDEN has served as an example for me, for one becomes completely convinced that in emulating a man of this sterling nature he spontaneously enhances his own nature. Firm of fiber as he is, he epitomizes the grand quality of those stalwarts who have gone before him, of those men in our Nation's history who activated those principles which functioned to make this country truly great.

It is my earnest wish that more men of his quality will come to the Halls of the Congress.

I shall always cherish the privilege that has been mine in serving in the Congress with Mr. BARDEN. May his future years harbor a bounty of health and happiness, for through his dedicated service he has earned a heavy harvest of reward.

He has been a man competent to the struggle, possessed of a perseverance born of deep faith in what he considered right. Great, then, is his reward, for he reaps the satisfaction that comes only to those who have labored hard, fought a fair fight, and adhered unflinchingly to principle.

Wherever GRAHAM A. BARDEN walks, he will have my admiration for a companion.

Mr. SCOTT. Mr. Speaker, during my short service in Congress I have had one experience that stands high among the most pleasant ones of my entire life, the privilege and honor of becoming acquainted and associated with many Members of the U.S. Congress. Among these I regard my esteemed colleague, Hon. GRAHAM A. BARDEN, as outstanding in several respects, for his strength of character, courage, ability, and dedication to the causes he believes are just and right.

Long occupying a position of great power and influence as chairman of the House Committee on Education and Labor, he did not use his position as a weapon of domination and abuse but rather as a medium of great service to his country and to his people.

The real measure of a man may often be discovered by his reaction to power and authority vested in him. GRAHAM BARDEN'S career and record in Congress reveal that he has understood that authority is always accompanied by responsibility and that power may become tyranny without wisdom. Again and again during his long congressional career he has demonstrated his deep wisdom, keen sense of responsibility, dedication to the causes he believed to be right, and has stood steadfastly by his convictions in the face of many partisan political pressures.

I regret to see this my respected and esteemed friend retire from Congress, but I wish for him and his good and lovely wife many, many happy years in quiet and peaceful retirement among the scenes and among the people they love so much.

RETIREMENT OF THE HONORABLE CARL DURHAM

Mr. COOLEY. Mr. Speaker, our beloved colleague, CARL DURHAM is voluntarily retiring from Congress. During his long service here he has won the love, affection, and esteem of his colleagues. He has made a record of which his loved ones, his friends, and his constituents can be justly proud. He has at all times been worthy of the confidence of the people he has so well and ably represented and by the simplicity of his life and the kindliness of his manner, and by his great devotion to duty, he has endeared himself to all of us. For many long years he has been a dedicated and a devoted public servant and he has made many grand contributions to the welfare and the happiness of the people of his district, State, and Nation. He is taking kindly the counsel of the years and gracefully surrendering the things of youth and the great burdens of high office and is going home to the people he loves and to the people who love him. CARL DURHAM has always been gentle and kind and thoughtful. Actually, as much as I shall miss him, I am delighted that he has made the great decision to be kind to himself and to fish and to hunt and to live just like he wants to live. He leaves this hall with the love and affection of every Member of this House. As chairman of the Joint Committee on Atomic Energy, he has learned a lot about the world in which we live and about the dangers that are lurking in the days ahead. In magnificent fashion he has discharged every duty which has been assigned to him and has proven himself to be a great American.

While CARL DURHAM is leaving us and retiring from Congress, he will never actually retire. I am certain that he will always be available and will give to his country the benefit of his sound advice and counsel.

Our good wishes go with him, may God bless and keep him.

I yield now, Mr. Speaker, to my colleague from North Carolina [Mr. BONNER].

Mr. BONNER. Mr. Speaker, CARL T. DURHAM and I came together to the 76th Congress. I had known CARL for many years previous to that time. He is a graduate of the University of North Carolina. He served his profession of pharmacist entirely at Chapel Hill, N.C. In all probability, he was counselor to more students that attended the University of North Carolina than any other man who ever lived or resided for any period of time in Chapel Hill.

As the dean of our delegation has said, he was a gentle person. He was able; faithful to the trust imposed in him here. He always enjoyed the work of the Committee on Armed Services and the Joint Committee on Atomic Energy. He now returns to the mellowness of the university, the campus, the town of Chapel Hill, and to the surrounding area where he will enjoy life in the outdoors, because he is a lover of nature. As has been said, he enjoys hunting and fishing. He will smoke his pipe in peace.

I wish him many, many enjoyable days throughout the remainder of his life, for it can be truly said, when you look at the composition of the House of Representatives and see the many types of men reflected, that CARL smoked his pipe and enjoyed the fellowship here and the respect of the membership of the House and of those who knew him personally. I shall always remember the pleasant companionship of this fine friend. I wish him happiness, to which he is so justly entitled.

Mr. COOLEY. Mr. Speaker, at this time I yield to our colleague from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Speaker, I am happy to join my colleagues from North Carolina, and from other States as well, in paying a public tribute to CARL DURHAM as he voluntarily retires from Congress. As the distinguished gentleman from North Carolina who just preceded me said, CARL DURHAM lived for many years before coming to Congress in that quiet and peaceful village of Chapel Hill where is located the University of North Carolina.

I first came to know CARL DURHAM at Chapel Hill many years ago when I was a student there. The warm friendship I formed with him at that time has continued down through the years. When I came to the House in the 83d Congress, he was among the first of the older Members to extend to me the right hand of fellowship. This friendship has never been marred by a single incident and I have profited greatly from it, not only because of the personal nature of it but because I felt that I could rely upon him for guidance and counsel in the area of his special legislative interest.

As has already been so well said, CARL DURHAM has rendered outstanding service to our country in the important positions he has held here in the House, as a member and Chairman of the Joint Committee on Atomic Energy, and as a member of the important Committee on Armed Services. The people of his district can ill afford to lose the services of this outstanding Congressman but he has well earned the rest he now claims for himself. He can go back to that quiet little village of Chapel Hill and enjoy the remaining years of what I hope will be a long life in the full realization that he has contributed his fair share to the progress, the development, and the security of our country.

CARL DURHAM is a quiet, gentle person and during the many conversations I have held with him over the years I have never heard him speak harshly about any man. I doubt if he has an enemy in the whole wide world, and this is something that can be said about very few men who have been active on the political scene. As he takes leave of this body, I know he will carry with him the affection, esteem, and high regard of the Members on both sides of the aisle.

As CARL DURHAM surrenders his important position here on the national scene and enters upon his retirement, I

wish for him all of the good things of life and express the hope that it may be a long one and that the years ahead will be filled with happiness.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. Mr. Speaker, I appreciate this opportunity to pay a few words of tribute to two great North Carolinians who are retiring from the Congress, CARL T. DURHAM and our good friend, GRAHAM A. BARDEN. I have known both of these men for 22 years. While we have been of different political faiths, I have learned to respect them very highly.

Throughout the years I have served on the Rules Committee, each of these wonderful legislators, and they have been great legislators, have appeared before our committee many times representing their respective committees. The greatest tribute that I can pay to both these gentlemen is the fact that whatever they might say before our committee was always taken by us as being the exact truth. Never once did either gentleman every try to misrepresent any bill or any feature of it. Both were absolutely honest and frank in their explanations of the measures that came under their jurisdiction. It became a saying within the Rules Committee that when GRAHAM A. BARDEN or CARL T. DURHAM asked for a rule on a bill they were entitled to receive it promptly. We could depend on everything they said, and everything they did. Our committee always had great confidence in their knowledge and their honesty of purpose. Never once have they been other than men of the highest character and the greatest political and moral courage, as well as exceptionally able legislators. So it is a pleasure for me to join in the so well deserved tributes that are being paid to each of these men.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE. Mr. Speaker, I am glad to have the opportunity to join with my colleagues of North Carolina and other Members of the House in paying this well deserved tribute to one of the finest men I have had the privilege of knowing, CARL T. DURHAM.

I have had the privilege of knowing CARL since I first came to the House in the 79th Congress. Coming here at that time, it was my good fortune to be assigned to the old Military Affairs Committee. CARL T. DURHAM was one of the leading members of the committee at that time. He had several assignments as a subcommittee chairman. I remember one of them was on strategic materials. I was assigned to his subcommittee. We formed a close friendship in those days.

Later on, in the first session of the 79th Congress, by legislative act the Joint Committee on Atomic Energy was set up. I was fortunate then to be among those selected as members of the joint committee. CARL T. DURHAM was one of those original members. As he leaves the joint committee which he has headed as chairman and vice chairman under a system of rotation between the House and the Senate he will leave only two original House Members on that committee.

I served also on the House Armed Services Committee with CARL for a period of 14 years. I served on his subcommittee of the House Armed Services Committee. For the past 6 years I have been the vice chairman of the subcommittee headed by Mr. DURHAM. So it has been a great privilege and a pleasure to me to have had this close association with such a good, kind, and considerate man. I have learned much through my association with CARL T. DURHAM. Frequently I went to him for advice and counsel. He was a true gentleman. He was a great legislator. I want to wish him well in his retirement. It is a well-deserved retirement. He accepted it as his own decision. He could be of great service for many long years in the House of Representatives, but he is entitled to the rest he now seeks, and I join with his colleagues and his friends in wishing him well in his retirement.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Washington [Mr. WESTLAND].

Mr. WESTLAND. Mr. Speaker, it has been my privilege to be associated with CARL DURHAM during the past 2 years as a member of the Joint Committee on Atomic Energy. This may seem like a short time nevertheless I felt I got to know CARL DURHAM quite well and I count him as a friend even though this period was all too brief. During that time and in the counsels of the joint committee, I learned to respect this man and to respect his views. As one other gentleman from North Carolina [Mr. BONNER] has previously stated, CARL DURHAM sort of smoked his pipe in peace and used his brain power to the benefit not only of the Joint Committee on Atomic Energy but to the benefit of the public and the world at large. CARL DURHAM is an asset, I believe, a great asset to the Congress of the United States, to the Joint Committee and to the welfare of this Nation. Some of us have already said that Carl has complete mental integrity and honesty. This I thoroughly confirm. Although we are of different parties, CARL DURHAM and I have much in common and it has been a privilege to see the man in action, to see him quietly and decisively analyze problems that came before the committee and to hear him make his speech or his short talk on the subject at hand. That talk generally was rather decisive, and I might say the room was quiet when CARL DURHAM spoke, for his words were well worth listening to. Someone has also said CARL DURHAM is an outdoor man. I found we had a mutual interest in the game of golf about which we spoke frequently. I believe CARL DURHAM leaving this Congress is a real loss, for his counsel will be missed. But, I too wish him the best of luck as he goes into retirement from the Congress a well deserved period of enjoyment.

Mr. COOLEY. Mr. Speaker, I yield to our distinguished majority whip, the gentleman from Oklahoma [Mr. ALBERT].

Mr. ALBERT. Mr. Speaker, I am happy to have this opportunity to join in this tribute to this good and lovable man. The word "gentleman" in reference to CARL DURHAM carries with it more than a mere parliamentary connotation, because if there ever was a gentleman in every sense of the word in this or any other body, it was this gentleman from North Carolina. Few Members have served this Congress, few have served this generation as well as the gentleman from North Carolina [Mr. DURHAM]. When he has spoken on atomic energy matters, or defense matters, every Member of the House gave him the kind of attention that the substance of his message always deserved.

Mr. Speaker, I join all other Members in regretting that these two great North Carolinians and outstanding Americans, CARL DURHAM and GRAHAM BARDEN, have chosen to retire from this body. The great State of North Carolina has sent many imminent men to this House, including my own chairman, Mr. COOLEY, who now occupies the well of the House. Among North Carolina's most eminent men are the gentlemen to whom we pay this tribute today. We wish them many happy and useful years in the life that lies before them.

Mr. COOLEY. Mr. Speaker, I yield to the distinguished minority whip, the gentleman from Illinois [Mr. ARENDS].

Mr. ARENDS. Mr. Speaker, to all the fine things that have been said here about these two outstanding North Carolinians, GRAHAM BARDEN and CARL DURHAM, I just utter hearty "Amen" of understanding.

It has been my privilege to serve better than 20 years with each one of these men, and to know them well. I am truly sorry they are leaving Congress. I am sorry they are leaving because they are fine, intellectual, outstanding individuals whom we will not only miss personally, but we will miss their valuable service in this great body.

I probably knew CARL DURHAM a little more intimately than I did GRAHAM BARDEN due to the fact that we worked together on the old Military Affairs Committee for many years and then the House Armed Services Committee. In the many, many times I have been with him in committee and on the floor of the House it has always interested me to almost see CARL'S mind functioning as it did, trying to get to the root of all the problems that confronted the committee and then finally come out in his own particular way with an analysis of the situation as he saw it, very clear, very concise, and very pointed. He was thorough in his approach to these important problems, and I listened to him with profit. He was sound. He was constructive. He was objective. He was the type of fellow one could properly call a friend, and I am proud to call him my friend.

I have repeatedly said of service in this great body, that one of its richest rewards is that we become acquainted with outstanding individuals such as these two Members from North Carolina who are going to retire.

Along with many other colleagues on both sides of the aisle, I join in wishing that they may enjoy all the fine things they have long wanted to do. I wish for

them the best in all the years to come. I am proud of my friendship with these two great men.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Speaker, I have mixed emotions when I think of our friend and colleague, Hon. CARL T. DURHAM, leaving us. I am happy for him to have a well-deserved rest, but am well aware of how keenly he will be missed.

CARL DURHAM is completing his 11th term as a most able Representative of the Sixth District of North Carolina.

When I came here 8 years ago as a freshman Congressman his wise counsel and warm friendship meant much to me. I still value most highly his guidance and his friendship.

His competence and loyalty have been felt on the Joint Committee on Atomic Energy, where he served with distinction as its chairman. He is also a highly valued member of the Armed Services Committee.

CARL DURHAM is a most effective Member of Congress in a quiet, unassuming way. He has always gotten along exceptionally well with his fellow Members; is much admired and deeply respected. He has been an outstanding Member of Congress, a credit to the district he represents, the State of North Carolina, and our country. He will be sorely missed.

I wish him happiness and good health as he returns to North Carolina to enjoy life in leisure.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. FOUNTAIN].

Mr. FOUNTAIN. Mr. Speaker, there is little of genuine substance that can be added to what has already been said about our distinguished colleague CARL DURHAM, who like our great friend "HAP" BARDEN, has made the decision to retire from public life to return to his fine home in the beautiful and restful community of Chapel Hill, N.C., the seat of the oldest State university in America.

However, I would feel that I had made a great omission if I did not seize upon this opportunity to join the dean of our delegation, the distinguished gentleman from North Carolina [Mr. COOLEY], and others, in paying my personal tribute to this true friend and great public servant. The same things which many of us have said about "HAP" BARDEN are applicable to CARL DURHAM, except in a different sort of way. Like "HAP" BARDEN, CARL DURHAM is a man of great courage and conviction. He simply has a different type of personality and way of expressing himself. He is a kind and gentle man, always friendly and never forgetting the limitless possibilities in other men with whom he deals.

CARL DURHAM is a man of great vision and learning. He grew up in an atmosphere of intellectual curiosity. In addition to his own personal efforts, the spirit of the community in which he lived was a part of him and his life in the Congress.

CARL DURHAM, like "HAP" BARDEN has been a friend of mine since I came to this body as a freshman in 1953. On many occasions, I have called upon him for help and advice in connection with matters affecting the people of the district which I represent, matters concerning which he had peculiar knowledge and background because of his long years of experience on the Armed Services Committee. He never turned me down. Even when at times it was obvious that our efforts would be in vain, he never said no. He cooperated fully with the sympathetic understanding which means so much to new and younger Members of this body. Yes, CARL DURHAM was and always will be a friend of man. In his retirement, North Carolina and the Nation are losing another great and dedicated public servant who, like "HAP" BARDEN, has been a statesman of the first order. The loss of men like these would be frightening to us if we did not know of the caliber and competence of their worthy successors whom you will meet next January. At the same time, all of North Carolina knows that CARL DURHAM, after more than 20 years of faithful and devoted public service on the part of the people of his district, State, and Nation, has earned the right to spend the remainder of his life in his home community among his close personal friends there. I have frequently heard him say how much he looked forward to doing certain things which time here never seemed to permit—the little things, the simple things which really count and bring happiness.

You know, the remainder of us in the North Carolina delegation will feel the loss of these two great men, "HAP" BARDEN and CARL DURHAM, probably more than anyone else. We have depended upon them, and upon the dean of our delegation, Mr. COOLEY, who will still be with us, for leadership in their respective fields and in so many areas in which we are naturally interested. Their wisdom and understanding will not be with us on the immediate scene. Our decisions will be more difficult; but we can take consolation in the fact that the spirit of these two men is still here and that their great convictions and courage will be a source of inspiration and incentive in our continued efforts here, should the people of our respective districts see fit to return us.

It is hard to find words to express one's feelings when our friends leave our midst, particularly when they have meant so much to us. Words just never seem adequate for an occasion such as this, but at least we know how we feel.

In concluding this personal tribute to CARL DURHAM, this man of great stature, I want to join his many friends in wishing for him during the years that lie ahead an abundance of the very best things in life—good health, happiness and a continuation of enduring friendships. If Mrs. Fountain could be here in person, I am confident that she would join me in everything I have said, except in her way, she could probably say it better.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, some weeks ago when I read in the newspapers that CARL DURHAM had announced he was not going to seek reelection, I made remarks about him on the floor of the House on that occasion. As a matter of fact, my remarks were made in an effort to try to prompt a grassroots urge from the people of his district that would influence CARL to be a candidate again.

CARL DURHAM is one of the outstanding Members of this body. He has wielded a powerful influence in the deliberations of this body, particularly in the field of national defense and in the field of atomic and nuclear energy. There is no Member of this body who has contributed more to the national defense of America than has CARL DURHAM, and no man has contributed more toward progress in the field of atomic energy and nuclear energy than has this great American, this son of North Carolina.

I join with my North Carolinian friends in the House and the other friends of CARL DURHAM in wishing for him every happiness for many years to come.

Mr. DORN of South Carolina. Mr. Speaker, I wish to join my colleagues in paying tribute to CARL DURHAM. We will miss his presence here on the floor but this House and this Nation and indeed the whole free world are much better off today for his untiring efforts here in behalf of freedom. Mrs. Dorn joins me in wishing for CARL DURHAM and his family much continued success and every happiness.

Mr. KITCHIN. Mr. Speaker, as we approach adjournment of this session of the Congress, I am saddened by the fact that two able and patriotic sons of North Carolina are retiring from this body at the end of the year. My beloved colleague, the Honorable CARL DURHAM, of the Sixth Congressional District of North Carolina, has served his constituents with great distinction for 22 years. He has played a vital role as chairman and vice chairman of the Joint Committee on Atomic Energy in the development, use, and control of atomic energy, and today is a ranking member of the House Armed Services Committee.

I, of course, regret CARL'S decision to retire but I respect his reasons for doing so, and now as he returns to North Carolina, may he have the time to do some of the things he has wanted to do for many years but which have been precluded by the pressures of official congressional duties.

It has been my privilege to serve with him on the House Armed Services Committee and I deeply appreciate the advice and counsel which he has given me from time to time since I arrived on the Washington scene. In this association, I have come to know and admire his outstanding qualifications.

In going back to Chapel Hill to join his friends and loved ones, I am sure that CARL will not lose interest in public affairs and I feel North Carolina will continue to receive the benefit of his wise counsel gained through long legislative experience.

I wish for CARL DURHAM in his retirement many years of good health and happiness as a reward for the outstanding service he has rendered our Nation.

Mr. COOLEY. Mr. Speaker, I ask unanimous consent that all Members

who desire to do so may have the privilege of extending their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina [Mr. COOLEY]?

There was no objection.

Mr. COOLEY. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. WHITENER].

Mr. WHITENER. Mr. Speaker, the words said by the majority leader in reference to his reaction to the announcement of the retirement of our distinguished friend, Hon. CARL DURHAM, constitutes, I am sure the feeling of most of us who know and love this outstanding North Carolinian.

As has been well said here, Mr. DURHAM was adviser and counselor to many thousands of students at the University of North Carolina over a period of many years that he served in that community in an unselfish manner, which was so typical of the man whom we honor here this evening. CARL DURHAM to me is one of the most gentlemanly men that I have ever known. Within the past few days he has again manifested that spirit as he brought here to Washington the young gentleman who was recently nominated by the Democratic Party as the candidate for his seat in the House of Representatives. I had the privilege of meeting with this young man on several occasions, and his heart was full of appreciation for the fatherly interest which our friend, CARL DURHAM, had shown to the gentleman in helping him to orient himself as he moves forward during the future years of service as successor to Mr. DURHAM. I join with all who have so eloquently expressed their appreciation for the life and works of our friend, CARL DURHAM, in wishing for him a complete happiness as he returns to the quiet life of Chapel Hill and the life of the nimrod and the hunter in North Carolina.

Mr. KILDAY. Mr. Speaker, it is with sincere regret that I have learned that our colleague and my friend, the Honorable CARL DURHAM, has decided to retire from the House of Representatives.

Mr. DURHAM and I came to the Congress together in 1939.

Shortly thereafter, Mr. DURHAM was assigned to the Committee on Military Affairs, of which I was also a member. We continued on the Committee on Military Affairs until the establishment of the Committee on Armed Services in 1947.

We have both continued to serve side by side on the Committee on Armed Services until the present time.

In addition, for a period of 10 years I served with Mr. DURHAM on the Joint Committee on Atomic Energy, of which he has had the distinction of serving as Chairman and Vice Chairman.

It has been my privilege, therefore, to have been intimately associated with this distinguished American throughout his career in the Congress of the United States.

During his congressional service, Mr. DURHAM has been closely connected with all phases of national defense policies. But in all of his legislative assignments and responsibilities, he has been a faithful Member who has discharged his duties wisely, faithfully, and consistently.

As chairman of important subcommittees of the Committee on Armed Services, he has done much to promote and assure the security of our Nation and the free world.

Mr. DURHAM stands out in the Congress of the United States as the leading authority on the stockpiling of vital and strategic materials so essential to our security. His foresight in this important area of national defense has contributed greatly to our security position.

My best wishes for happiness and contentment go with this distinguished, soft spoken, wise American as he leaves this body to go into retirement.

Mr. SMITH of Mississippi. Mr. Speaker, I want to join in the tributes being paid CARL DURHAM, an outstanding American statesman who has contributed so much to the successful implementation of American atomic policies as well as to the other broad fields of military security.

Few men have had such wide respect for their legislative specialties. Any position which CARL DURHAM took in the field of atomic energy was bound to be one of great logic.

All of us in the House in addition know CARL DURHAM as a gentle and kind person who has inspired the respect and affection of us all.

Mr. McMILLAN. Mr. Speaker, I take great pleasure in saying a few words in behalf of my good friend, Dr. CARL DURHAM, who was sworn in as a Member of Congress on the same date and the same hour as I was in 1939. Dr. DURHAM will be greatly missed by not only the Members of Congress but by the people throughout the United States, as he was one of the leading members of the House Armed Services Committee and was an authority on atomic energy.

I have thoroughly enjoyed Dr. DURHAM's friendship during the 22 years we have served as Members of the House of Representatives, and will look forward to seeing him often during his retirement.

I wish for him all the happiness and good health possible during these years of retirement.

Mr. TAYLOR of North Carolina. Mr. Speaker, I would like to join my colleagues in paying honor and expressing esteem for Representative CARL DURHAM. I was not permitted to serve with him very long as he is now leaving this body and I have been a Member for only a few weeks. However, I have been an admirer of Mr. DURHAM for many years.

During a long span of public service, he has demonstrated integrity, from which he has never wavered. He has given a full measure of his time and energy and talents to the duties of his office. He has aided in keeping this country strong and free. I wish for CARL DURHAM many more years of happiness and useful public service.

Mr. FISHER. Mr. Speaker, I sincerely regret that our distinguished colleague from North Carolina, the Honorable CARL DURHAM, has found it desirable to retire voluntarily from the House of Representatives.

Having served with him here for 18 years, during about half of that time on the House Committee on Armed Services, I have learned to respect and admire Mr. DURHAM. Few men are better informed on subjects in which they have specialized. In the field of atomic energy and in the military field, CARL DURHAM is an expert. That knowledge has been invaluable to him in connection with legislation dealing with these subject matters.

CARL DURHAM leaves behind him a legacy of distinguished service to his country. I join with his many friends in Congress in extending to him and his family best wishes for happiness and good health during the years ahead.

Mr. SCOTT. Mr. Speaker, prior to coming to Congress, I was not acquainted with CARL DURHAM, but many of my friends who did know him invariably spoke of him as being about the finest gentleman you ever saw. During the 4 years I have been privileged to know and be associated with him, I have come to that identical conclusion. On every occasion, under all circumstances, he is a gentleman in every sense of the term. No Member of the House is held in higher respect and esteem by those who know him than CARL DURHAM.

It has been said, "Gentility is neither in birth, wealth, manner, nor fashion—but in the mind. A high sense of honor, a determination never to take a mean advantage of another, an adherence to truth, delicacy, politeness toward those with whom we have dealings, are its essential characteristics." CARL DURHAM has all of these characteristics and has maintained them through the performance of his trying duties in one of the most important, influential, and sensitive positions in the Congress as chairman of the Joint Committee on Atomic Energy.

No Member of Congress whom I have known has approached the performance of his duties more conscientiously or with a deeper sense of personal responsibility than CARL DURHAM. In the histories that will be written of this period there will certainly be a chapter devoted to the use and development of atomic energy. CARL DURHAM's name will as certainly be listed high among those whose good common sense, courage, and vision made immense contributions to the wonders of this, the atomic age.

I join my colleagues in expressing regret that CARL has seen fit to retire and in wishing him many years of happy retirement in an atmosphere more restful and peaceful than that in which he has labored so long and so well.

RETIREMENT OF SENATOR O'MAHONEY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. Mr. Speaker, on this eve of adjournment of the 86th Congress, I want to take this opportunity to pay tribute to Wyoming's senior Senator, JOSEPH C. O'MAHONEY, who is retiring after 25 years of service to his State and to the Nation.. Senator

O'MAHONEY, or Senator JOE, as he is affectionately known in the State of Wyoming, first came to Cheyenne, Wyo., in 1916 as editor of the Cheyenne State Leader. In 1917 he came to Washington as Secretary to Senator John B. Kendrick. His devotion to the Congress is evidenced by the fact that by choice and prerogatives of seniority he now occupies the same suite of offices that he came to when he served Senator Kendrick. After this service, he returned to Wyoming to practice law. In 1933, with the Democrat victory, he was singled out and appointed First Assistant Postmaster General of the United States. In November 1933, on the death of Senator Kendrick, he was appointed to fill the vacancy. Since that time he has served four full terms and one short term, over a quarter of a century in the Senate of the United States.

I must frankly state that I have never worked to elect Senator JOE to the U.S. Senate, but as a Republican, I have admired him.

Mr. Speaker, Senator O'MAHONEY is a man of great conviction. What he believes in he fights for all the way. After he thinks things out he does what he thinks is right.

I remember, for myself, his opposition to the so-called packing of the Supreme Court. He stood steadfast in that case for what he believed, in spite of partisan political pressures.

I may say that it has been my privilege to serve as the sole representative of the State of Wyoming in this body for the past 6 years, and may I say just as I have said on many occasions, both privately and publicly in the State of Wyoming during that time, because I have felt it so deeply, this: On many basic issues we have differed, and differed widely, but our differences were genuine, and I am sure that we were both motivated by what we thought was best for the country. But, when it came to something for the State of Wyoming or for the area we represented, particularly in the State of Wyoming, never could I have found a more kindly, guiding, helpful individual than Senator O'MAHONEY. Not once in the 6 years that I have served here have I ever called upon him for assistance in regard to a bill pertaining to our State that that help was not forthcoming immediately. Often were the times I called on him for assistance because I have always served in the minority and because of his close and long friendship with the majority leader and with the Speaker of this body, and at all times he responded. He is dedicated to our State and to those things that go to improve it, and the living memorials that he leaves in the State of Wyoming, the things that are good and will be good for the future are too many to even mention on the floor of this House. I can think of no greater tribute than to say that Senator O'MAHONEY was a strong adversary and a stanch ally. You would like to have him on your side under any circumstances.

On six occasions, as I have mentioned, over the past 25 years, Senator O'MAHONEY has submitted himself to the supreme test in the State of Wyoming, the judgment of the people of our State; and in each case he was given their favorable and resounding verdict by being elected to the United States Senate.

I have known his wife, Agnes, well. In the city of Cheyenne her name is revered and she has a host of friends. Both the Senator and Mrs. O'Mahoney have been in ill health. I hope that his being relieved of some of his arduous duties will have a therapeutic effect for both of them. Speaking for myself and for their host of friends in Wyoming I wish them well and Godspeed and the best of everything, which I am sure will be theirs.

Senator O'MAHONEY has written on the statutes of the United States a memorial that will live forever, to which I cannot add. He will always be remembered for his great service to Wyoming and to the Nation, and, I might add, to the world.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. THOMSON of Wyoming. I yield to the majority leader.

Mr. McCORMACK. Mr. Speaker, I join the gentleman from Wyoming in the tribute he has paid to Senator JOE O'MAHONEY. I first met JOE O'MAHONEY when he was Assistant Postmaster General and throughout the years there has been a close and continuing friendship between us.

JOE O'MAHONEY is a man of strong convictions. He is a real, a sincere progressive. Like myself, he believes that government, in practical operation, operates to serve the weak. The strong do not need it. That does not mean that he felt that government in practical operation should destroy the strong, but he felt that in practical operation the strong, not needing it, government must operate to serve the weak. And by that, I refer to social security, unemployment compensation, attacking monopolies, fighting for the best interests of the small and independent businesses, always on the side of legislation to meet abuses and strengthen the family life of our country, and thereby our country itself.

JOE O'MAHONEY is a man of broad and understanding views. His relationship with his fellow men is one of understanding. He has been truly one of the great legislators of the period of time in which I have served in the Congress of the United States.

Mr. Speaker, he has suffered much in recent months, even in the past several years. He has performed his duties under great physical difficulty. But the grim determination of this man is evidenced by his adherence to duty even under great physical pain and difficulty.

JOE O'MAHONEY leaves the halls of Congress with the knowledge that the legislative life of our country has been enriched and improved upon as a result of his service in the U.S. Senate. I wish for JOE O'MAHONEY and his loved ones every happiness in the years that lie ahead.

HON. TOBY MORRIS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ALBERT. Mr. Speaker, among the beloved and distinguished Members of this body who will not return to the next Congress is our colleague from Oklahoma, my longtime personal friend, TOBY MORRIS. TOBY and I were first elected to this House in the 1946 election and served together in the 80th Congress. TOBY represented at that time the Sixth District of Oklahoma, and he represented it continuously until after the 1950 decennial census when our State was redistricted. As a result of the 1950 census Oklahoma lost two seats in the House. Thereafter the Sixth and Seventh Oklahoma Districts were consolidated into one district, so that the present Sixth District is almost a combination of the two former districts, the Seventh District having been represented by a former colleague, Mr. Wickersham, who will serve in the next Congress.

In the recent Oklahoma primary election, Mr. MORRIS carried his own part of the district, the old Sixth District area, by an overwhelming majority. He carried the county in which he was reared, Cotton County, Okla., by about 4 or 5 to 1. He carried the county in which he now lives, one of the largest counties in the State, Comanche County, by 4 or 5 or 6 to 1. The difference between the two candidates in that election was less than 500 votes out of more than 80,000 votes, each carrying his own old district. Had it not been for the redistricting of Oklahoma, TOBY would have served continuously in this body ever since his first election without any question of doubt, because he always has carried that part of the district 2, 3, and 4 to 1.

TOBY MORRIS has had a fine career as a Member of this body and as a member of the bench and bar of Oklahoma. Before he came to the House of Representatives he had served for many years as a district judge, which is the trial court of general jurisdiction in Oklahoma. He had an enviable record of having been reversed by the appellate courts of Oklahoma as few times as any judge who ever served in our State from any district. He was an eminent jurist indeed.

Every Member of this House knows how well TOBY MORRIS has served his district, his State and his country. As a member of the Committee on Armed Services and as a member prior to that time of the Committee on Interior and Insular Affairs, his service has been distinguished and outstanding. Few men can boast a more distinguished record of service in the House. None can boast greater fidelity to his trust.

Mr. ANDERSON of Minnesota. Mr. Speaker, will the gentleman yield?

Mr. ALBERT. I yield.

Mr. ANDERSON of Minnesota. I merely want to say that I have never known a finer gentleman than TOBY MORRIS of Oklahoma. It is going to be a distinct loss to the House of Representatives to see him leave this body.

Mr. ALBERT. I thank the gentleman.

Mr. Speaker, I yield to my colleague, the gentleman from Oklahoma [Mr. BELCHER].

Mr. BELCHER. Mr. Speaker, I join with my colleagues from Oklahoma in paying tribute to one of the finest friends I have in the House of Representatives. Although TOBY MORRIS was a great district judge prior to the time he came to the Congress and I was practicing law in Oklahoma, I never had the privilege of trying a case before him. But upon coming to the Congress 10 years ago, he and I became close friends. TOBY is a friendly man. He is easy to be friends with. I do not know of a single Member in this House of Representatives who has as many friends as he has and is as well respected as TOBY. I certainly believe he is one of the hardest working, sincere, and consicentious Members I have ever known in the House. I wish for TOBY and Mrs. Morris a very happy and successful retirement.

Mr. ALBERT. Mr. Speaker, I yield to my colleague, the gentleman from Maine [Mr. MCINTIRE].

Mr. MCINTIRE. Mr. Speaker, I, too, join in expressing the pleasure that has been mine and Mrs. McIntire's in getting acquainted with Mr. and Mrs. Toby Morris. We are apartment neighbors and it has been a real pleasure to us. Serving here in the House of Representatives with TOBY has given me a further opportunity to observe his diligent work in relation to his district and to the problems that come before this body. I have enjoyed his personal friendship and I quickly join with those who have expressed themselves with regard to their acquaintanceship with TOBY. It has been their pleasure to know him longer than have I and Mrs. McIntire and I join in extending our very best wishes to TOBY and Mrs. Morris, wishing them many, many years of health and happiness in the years that lie ahead.

Mr. ALBERT. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. EDMONDSON].

Mr. EDMONDSON. Mr. Speaker, Washington is going to miss TOBY MORRIS and Mrs. Morris. Many of us here in the House will miss his wonderful counsel and his warm friendship. I do not believe I have ever met a man in public life who is more fearless or more courageous in his championship of causes in which he believes than TOBY MORRIS, of Oklahoma. I never met a man who had greater love of humanity, a more sociable nature, or greater kindness in his general makeup than TOBY MORRIS, of Oklahoma. He is a man who loves to tell a story and to hear a good story. You can always enjoy the humor of TOBY MORRIS in conversation, and I do not believe in the many times we have visited and exchanged stories that I ever heard him say an unkind thing about any human being. I do not believe I ever heard him say anything with malice in it about anyone.

I do not know, either in my experience here in the House or elsewhere of any person who has a keener interest in the law and in the lawmaking process than Congressman TOBY MORRIS, of Oklahoma. To many of us he will be missed, and I want to join my colleagues in wishing to him and to Mrs. Morris a happy time on their return to Oklahoma.

Mr. ALBERT. Mr. Speaker, I yield to the gentleman from Arkansas [Mr. TRIMBLE].

Mr. TRIMBLE. Mr. Speaker, I want to join with my colleagues from Oklahoma and others in paying tribute to this great man, a man of ability and great intellect. These qualities he brought to bear in service to his country. He is courageous, and like a sturdy oak of the old windswept prairie, it is a comfort to have him on your side.

TOBY, we wish for you in the years that lie ahead all the happiness that you and your family so richly deserve.

Mr. WOLF. Mr. Speaker, will the gentleman yield?

Mr. ALBERT. I yield.

Mr. WOLF. I would just like to say as a freshman Member who came here 2 years ago that some of the soundest advice I have received came from TOBY MORRIS in the very first days. He was a good and loyal friend and I have called on him many times. There is a tear in my eye as I say goodby to him.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ALBERT. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. STEED].

Mr. STEED. Mr. Speaker, it has often been said that anyone can be a good winner, but that it takes a real champion to be a good loser. I know that my colleagues feel as I do as we have seen TOBY MORRIS demonstrate here lately that a real champion can accept the adversity of a defeat.

One of the great privileges and pleasures I have had since I came here has been to serve as a fellow representative from the great State of Oklahoma with TOBY MORRIS. I have never known a man who had greater courage of conviction and sincerity of purpose in his work in the public service in Congress. I cannot help but feel that his passing from this scene will be a greater loss to his district, to the State of Oklahoma, and to the Nation than it is to him. I join with our other colleagues in wishing for him the best of everything in the years that lie ahead.

Mr. ALBERT. Mr. Speaker, in summary, may I say of TOBY MORRIS that we all appreciate his fine work and his intellect, but one thing more I must mention—his great heart. He has a big heart that encompasses all mankind, a heart that has compassion for all mankind and especially for the underprivileged. He has also a strong and courageous heart, the courage of his convictions even irrespective of political consequences. He was a beloved Member of this House. His friends are legion. We all wish him and his lovely wife, Laura Morris, the richest blessings of life in the years ahead.

Mr. MCCORMACK. Mr. Speaker, I take this opportunity to express my friendship and admiration for the Honorable TOBY MORRIS. Mr. MORRIS has served his country with exceptional skill and devotion as a Member of the House of Representatives. He is one of the outstanding Americans of this trying period. It has been my pleasure to know and work with the gentleman for nearly 14 years. His service in this body and on the Committee on Armed Services has been constructive and of a nature to occupy a prominent place in the annals of our country when the history of this period is written.

Mr. MORRIS was born in Granbury, Hood County, Tex., in 1899, moving with his parents to Comanche County, Okla., in 1906, and to Cotton County, Okla., in 1913. During the First World War he enlisted, at the age of 18, in the U.S. Army, serving successively as private, corporal, and sergeant with the 110th Combat Engineers, attached to the 35th Division, from October 1917 to May 1919.

Back at home, he studied law in his father's law office and was admitted to the bar in 1920. He served his county as court clerk from 1921 to 1925, and as prosecuting attorney from 1925 to 1929. From 1929 to 1937 he engaged in the private practice of law in Walters, Okla., and from 1937 to 1946 he was district judge of the 21st judicial district of Oklahoma.

Ever alert to the needs of his community, State, and Nation, Mr. MORRIS has been active in the Red Cross, Boy Scouts, Salvation Army, Community Chest, Rotary Club, Veterans of Foreign Wars, and American Legion. He is a past post commander of the American Legion.

TOBY MORRIS is one of the soundest gentlemen I have ever met. As a legislator, he is a man who has always tried to render public service that contributed to the welfare and progress of the people, not only of his district and State, but of the entire United States. It has been my pleasure to develop a friendship with him, a friendship that I value very much and that I shall always cherish.

TOBY MORRIS is not only a great legislator and a great friend but also a great American. He is a man whose associations with his fellow men are an inspiration for all others to follow.

I could mention many contributions made by our friend but his outstanding record as a Member of this House speaks for itself. We shall all miss him very much, and we wish him every happiness and success in the years that lie ahead.

Mr. O'HARA of Illinois. Mr. Speaker, when I came to the Congress in 1949, TOBY MORRIS was my next-door neighbor on the sixth floor of the New House Building. In the climate of that association ripened a friendship that has been very dear to me. TOBY MORRIS has made a mighty contribution to the Congress. He has won and held the esteem and the affection of his colleagues on both sides of the aisle. I have never heard a Member of the House say anything about TOBY MORRIS that did not reflect admiration of his integrity, his keen ability, his fairness, and the gentle

qualities of a warm heart. Knowing TOBY MORRIS has enriched my life, and I have the faith that for such as he the good Lord of us all has in store an abundance of blessings multiplied.

Mr. WRIGHT. Mr. Speaker, the first political speech of which I have any clear recollection was one made by TOBY MORRIS. The year was 1934, and I was a boy of about 11, living in Duncan, Okla. I still can remember the vigorous figure of the young man who was TOBY MORRIS earnestly expressing his views of the needs of our Nation. TOBY was that year a candidate for Congress, and, as I recall, his candidacy was not at that time successful.

One of the things I have come to admire so greatly about TOBY MORRIS, however, is the dogged determination with which he approaches any task which he firmly believes to be right. This same trait caused him to persevere, when probably a lesser man would have capitulated, until twice on separate occasions his devotion has been recognized and rewarded by his constituency for two different stretches of congressional service.

I remember also the trait of deep honesty and uncompromising principle which has characterized TOBY'S service here. While I have known one branch of his family rather intimately in Texas, I came to know TOBY after we both began to serve here.

He has never flinched in the face of popular demand, if he believed a course of action to be right for his country.

So to TOBY MORRIS I join my colleagues in wishing all that is good and gracious, all that is fine and true, for he richly deserves it.

Mr. COAD. Mr. Speaker, I would like to say to all of the Members of the House that TOBY MORRIS has been a real friend to me. Not only to me has he been a friend, but I have observed TOBY MORRIS, as he has circulated among the membership. He has wide counsel and a great understanding of the problems of our time. I can say that TOBY MORRIS is a stanch supporter of the American farmer. During the years I have served in the House of Representatives, TOBY MORRIS and I have had many conversations together and many meetings in our offices—some lasting almost to midnight to try to work out the perplexing problems facing the American farmer. I certainly want to pay tribute to him as a great American, as one who is able to foresee the problems that are facing our people, and as one who acts forthrightly to deal with the problems confronting us. I think he has been a great Member of the House of Representatives and I am sure, if he so chooses, the time and the opportunity will come when he can return here.

Mr. SMITH of Mississippi. Mr. Speaker, I want to join in the tributes being paid TOBY MORRIS. He has been a friend to all of us who have served with him in the House, and it has been a genuine pleasure to know someone who has such a friendly feeling for all.

TOBY MORRIS has always conscientiously served in the best interest of the people of his district and the Nation. We shall greatly miss him in the coming Congress.

Mr. PHILBIN. Mr. Speaker, because of the vicissitudes of politics, which seem at times to become more and more unpredictable, our esteemed and beloved friend and colleague, Congressman TOBY MORRIS, of Oklahoma, is again leaving the House.

It has been my very high privilege to serve, not only in the House for some years with him, but also on the House Armed Services Committee.

This most able, distinguished and gracious gentleman from Oklahoma is a trained and experienced lawyer and judge, who has always brought legal learning, sound judgment, great ability, idealistic dedication, and unexcelled patriotism to our deliberations.

A sincere and great American with whom the interest of our country always comes first, TOBY MORRIS is especially respected and admired for his mastery over legal questions, and particularly his deep knowledge of constitutional law, which time and time again he is called upon with telling effect, to enlighten and guide Members of the House and committee. He is a recognized authority on defense and related questions coming before our committee.

TOBY MORRIS has been a very conscientious, able, patriotic Congressman and a very dear friend to many Members of this body.

I personally deeply cherish his friendship and I am most grateful to him, especially for the solid and most valuable contributions which he made to my committee.

TOBY MORRIS has endeared himself to all of us. He will always remain in our hearts and minds as a fine and noble Christian gentleman, loyal to his friends, able and effective in his work, and unselfishly devoted to the cause of our great country.

I am sure that all of the Members of the House join with me in wishing Congressman MORRIS and his family every measure of success and happiness in the future.

THE HONORABLE LEE METCALF AND THE HONORABLE LEROY H. ANDERSON

Mr. SISK. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SISK. Mr. Speaker, I take this opportunity to pay tribute to two very fine friends of mine who are completing their services in the House of Representatives today. I have had an opportunity to serve with both of these gentlemen on a committee. One of them, particularly, sat by my side for a number of years on the Committee on Interior and Insular Affairs. I refer to my very good friend, a man who has helped me a great deal in my service, LEE METCALF, of Montana, and his colleague, LEROY ANDERSON, of Montana, both of whom are completing their service at least for the time being in the House of Representatives. I particularly wish to express my deep gratitude and my personal appreciation for the help that LEE METCALF rendered to me on my arrival in Washington some 6 years ago. It was my pleasure to be assigned to the Committee on Interior and Insular Affairs and to sit just below him on that committee. LEE was a man and has been a man throughout his service during my years here who has been very devoted not only to his constituents and the people of his district but to his State and to our Nation. He is a man who has very strong convictions. When LEE had made up his mind on a given subject or a given issue, he stood steadfast regardless of those who might be opposing him or regardless of the odds that might be against him. Certainly I know that the type of service he rendered to our committee and to the House will be long remembered by the people, his constituents, of the great State of Montana.

Of course, it is my hope that he will continue to serve his State and his Nation in the other body where he is at the present time seeking a position.

With reference to his colleague and my very good friend, LEROY ANDERSON, I want to also say I had the opportunity to serve with LEROY on the Committee on the Interior and Insular Affairs where during the past 2 years he has rendered outstanding service on that committee, having filled a spot that was vacated at the time that LEE moved over to the Committee on Ways and Means.

He has been devoted in his attention to the needs of his constituents, he has been particularly concerned and interested about matters affecting the Indian tribes in the State of Montana and throughout the West. He has been particularly interested also in irrigation and reclamation and water development which are so vital to the great State of Montana. He has been a great deal of support for me and for others who have from time to time sought projects which were needed in developing the water and the national resources of our western area.

So I take this opportunity for a few moments to pay tribute to these two great men.

Going back for a moment to my good friend, LEE METCALF, his service on the Ways and Means Committee has been outstanding from the very fine things I have heard said about him in and during his service on that committee. I am sure he will continue that outstanding work in the other body starting with the 87th Congress.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. SISK. I yield to the distinguished gentleman from Oklahoma [Mr. EDMONDSON], a fellow member of the Committee on Interior and Insular Affairs.

Mr. EDMONDSON. I am very pleased that my colleague, the gentleman from California [Mr. SISK], has brought to the attention of the House the fact that it is about to lose the services of these two distinguished westerners. I have had the pleasure of serving with both of them; have come to know them both

well, to admire both of them, and I know that in the departure of Congressman METCALF and Congressman LEROY ANDERSON we are losing two stalwarts and two good public servants. I believe I know Congressman METCALF a good deal better than I know his colleague, because we came to the House together in the 83d Congress and enjoyed together the fellowship of the 83d Club. I have been deeply impressed by his conscientiousness, by the long and tireless hours that he devotes to public service, and by the way in which he fights for causes, which are often very difficult to serve and to put across in this body. If the Indian people of the United States have a better friend in the Congress of the United States than LEE METCALF of Montana, I do not know who that man is. If the miners of America have a better friend than LEE METCALF, I do not know who he is. In fact, if the working people in general of the State of Montana and the entire Nation have a stronger, truer friend in these Halls than LEE METCALF, of Montana, I would like to hear his name. It has been an inspiration to serve with him, and I am confident that he will be returning to Washington when January comes around and that we will have the opportunity to serve with him and to be associated with him for many years to come as a servant of the people in the Halls of the Congress.

Mr. SISK. I thank the gentleman for his kind remarks. Certainly in the retirement of the entire Montana delegation which, of course, was composed of these two gentlemen, those of us who particularly have been intimately associated and worked with them shall miss them, but we will be looking forward to hearing many good things from them in further service to their State and to their Nation.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and I further ask unanimous consent that other Members desiring to do so may extend their remarks regarding the retirement of the two great, distinguished gentlemen from the State of Montana in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HON. EDNA SIMPSON

Mrs. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mrs. CHURCH. Mr. Speaker, when the next Congress convenes in January it will be the first time in nearly 2 decades that there will not be a Simpson from Illinois on the roster of the House. I rise tonight once more to pay tribute to an illustrious Congressman who served his country well, but particularly as he would want me to do, to pay tribute also to the gracious lady who succeeded him, with reluctance, with difficulty because of her sorrow, but with dedication and brilliance. Quiet, beautiful of spirit as well as of mien, determined to do her best for her district, she has, during her 2 years of service, grown in strength, grown in stature, at least in our appreciation of her stature, and lent a spirit of understanding and friendliness to this whole House. She has built an admirable record of service on her two committees; House Administration and Interior and Insular Affairs.

No one can ever forget her courage, and no one could ever say that she could be pressured into any action against her convictions. She has shown discretion. I repeat that she has shown brilliance. But to all of us she has given a constant warm memory for a man whom we loved here, and a reason for loving her, too.

And, Mr. Speaker, I think she would not find it remiss if I put in the RECORD of the House that she is probably the only Member from any district who has ever served a full term, without ever addressing either the Speaker or her colleagues, or letting her beautiful, soft voice be heard. Without so doing, moreover, she has seen that every need of her district has been met.

We hail EDNA SIMPSON tonight. We are glad that she served with us. We know how proud her husband would be of her. And we bear witness that she has served her district and her country with distinction.

Mr. ALBERT. Mr. Speaker, will the gentlewoman yield?

Mrs. CHURCH. I am delighted to yield.

Mr. ALBERT. Mr. Speaker, may I add my small voice to the very eloquent address which the distinguished gentlewoman has made with respect to our lovely, lovable colleague. I had the honor of serving with her late distinguished husband, Sid Simpson, on the Committee on Agriculture for many years. He was one of our outstanding Members. I have also counted it a privilege, indeed, to serve as a colleague of Mrs. SIMPSON during her service in the House.

Mrs. CHURCH. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I ask unanimous consent that all Members have 5 days within which to extend their remarks in the RECORD at this point.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. ALLEN. Mr. Speaker, our industrious and greatly admired colleague, EDNA SIMPSON, is voluntarily retiring from Congress. During her short service in the Congress of the United States she has won the love, affection, and esteem of her colleagues, both Democrats and Republicans. No Member's retirement has caused more regret than that of EDNA SIMPSON. Her integrity, honesty, and reliability will be an inspiration to all that have had the privilege of serving with her and those who follow.

For many years I had the honor to serve in this body with her late husband, Sid Simpson. Like him, she has served the 20th District of Illinois, the State, and Nation with distinction.

We of the Illinois delegation wish that in her retirement she enjoy health and happiness.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mrs. GREEN of Oregon (at the request of Mr. ULLMAN), for an indefinite period of time, on account of illness.

To Mr. AUCHINCLOSS (at the request of Mr. HALLECK), for August 31, on account of illness.

THE SUGAR ACT

Mr. PORTER. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, while we are waiting here to be informed about the Senate action, I would like to point out that the extension of the Sugar Act, which was done yesterday, was done by unanimous consent. There was no discussion at all. Many of us were not conscious of the particular terms of it or that it was coming up at that time. It is my hope that when the Senate bill is sent over here——

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield.

Mr. FLOOD. Mr. Speaker, I hope that under the circumstances my friend will defer what I know would be a very interesting commentary until the chairman of the House Committee on Agriculture is present.

Mr. PORTER. I was seeking merely to establish a few factual preliminaries for what I trust will develop into an interesting debate, if not at this early hour in the morning, then later today.

Mr. FLOOD. I was just expressing the hope that the gentleman will not anticipate the chairman of the House Committee on Agriculture in a very delicate situation at later than 3 o'clock in the morning.

Mr. PORTER. Mr. Speaker, I see that the bill has arrived from the other body so I yield back the balance of my time.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress.

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes.

The message also announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 13062. An act to amend the Sugar Act of 1948, as amended.

PARLIAMENTARY INQUIRY

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HALLECK. Would it be in order for a unanimous-consent request to be made to send the bill that has just come from the Senate to conference?

The SPEAKER. That would be up to the gentleman from North Carolina [Mr. COOLEY].

Mr. HALLECK. In other words, if he submitted a unanimous-consent request to send the matter to conference, that could be considered subject to an objection?

The SPEAKER. It could be.

CITIZEN BAND OF POTAWATOMI INDIANS OF OKLAHOMA

Mr. HALEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7990) to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments as follows:

Strike out all after the enacting clause and insert: "That the Secretary of the Interior is authorized and directed to convey to the Citizen Band of Potawatomi Indians of Oklahoma, all right, title, and interest of the United States in and to approximately 57.99 acres of land more particularly described in section 2 of this Act, subject to the right of the Absentee Shawnee of Oklahoma, Sac and Fox of Oklahoma, Kickapoo of Oklahoma, and Iowa Tribe of Oklahoma to use the Potawatomi community house that may be constructed and maintained thereon. The title of the tribe thereto shall be subject to no exemption from taxation or restriction on use, management or disposition because of Indian ownership.

"SEC. 2. The property referred to in the first section of this Act is more particularly described as follows: Lot 1 (northwest quarter of northwest quarter) and north half of lot 2 (north half of southwest quarter of northwest quarter) and the part of the north half of the southeast quarter of the northwest quarter laying west of the east right-of-way line of Oklahoma State Highway Numbered 18, all in section 31, township 10 north, range 4 east of the Indian meridian, in Pottawatomie County, Oklahoma, and containing 57.99 acres more or less.

"SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission."

Amend the title so as to read: "An Act to provide for the conveyance of certain land of the United States to the Citizen Band of Potawatomi Indians of Oklahoma."

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. FEIGHAN, for 5 minutes, today, and to revise and extend his remarks.

Mr. CANFIELD, for 15 minutes, today.

Mr. HALPERN, for 10 minutes, today.

Mr. WOLF (at the request of Mr. McCORMACK), for 5 minutes, today.

Mr. LIBONATI (at the request of Mr. McCORMACK), for 1 hour, today, and to revise and extend his remarks.

Mr. THOMPSON of New Jersey (at the request of Mr. McCORMACK) for 30 minutes, today, and to revise and extend his remarks and include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. McCORMACK, and to include extraneous matter and tables.

Mr. COLMER and to include a speech by the distinguished gentlewoman from Michigan [Mrs. GRIFFITHS].

Mr. BERRY in two instances and to include extraneous matter.

Mr. TABER to revise and extend his remarks, and to include certain tables.

Mr. QUIE, during his remarks on S. 2917, the dairy price support bill, and to include tables.

Mr. ALFORD to extend his remarks in the RECORD and to include an article.

Mr. CLEM MILLER in one instance and to include extraneous matter.

Mr. LAIRD to revise and extend his remarks on S. 2917 and include some charts.

Mr. McCORMACK, and to include extraneous matter.

Mr. GILBERT.

Mr. FASCELL.

Mr. BRADEMAS.

Mr. PRICE in two instances, in each to include extraneous matter.

Mr. BONNER to extend his remarks in the RECORD and give a report of the activities of the Merchant Marine Committee during this session of Congress.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1689. An act to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy and for the training and development of leaders in a total political war; to the Committee on Un-American Activities;

S. 3901. An act to authorize the erection of a memorial in the District of Columbia to Gen. John J. Pershing, to the Committee on House Administration; and

S. Con. Res. 115. Concurrent resolution to print additional hearings on S. Res. 94, relating to the compulsory jurisdiction of the International Court of Justice, to the Committee on House Administration.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Adminstration, reported that that committee had examined and found truly enrolled bills of the House of the following title, which were thereupon signed by the Speaker:

H.R. 3313. An act to amend section 200 of the Soldiers and Sailors Civil Relief Act of 1940 to permit the establishment of certain facts by a declaration under penalty of perjury in lieu of an affidavit, and for other purposes;

H.R. 4826. An act for the relief of Arthur E. Collins;

H.R. 6597. An act to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes;

H.R. 6871. An act to amend title III of the Public Health Service Act, to authorize project grants for graduate training in public health and for other purposes;

H.R. 7758. An act to improve the administration of oversea activities of the Government of the United States, and for other purposes;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia; and

H.R. 12326. An act making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1066. An act to revise the boundaries and change the name of Fort Donelson National Military Park, and for other purposes;

S. 1214. An act to amend the Act of March 11, 1948 (62 Stat. 78), relating to the establishment of the De Soto National Memorial, in the State of Florida;

S. 1870. An act to provide for examination, licensing, and for regulation of practical nurses, and for practical nursing education in the District of Columbia, and for other purposes;

S. 2131. An act to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia approved May 25, 1954, as amended;

S. 2575. An act to provide a health benefits program for certain retired employees of the Government;

S. 2633. An act to amend the Foreign Service Act of 1946, as amended, and for other purposes;

S. 3416. An act to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958;

S. 3648. An act to authorize the Commissioners of the District of Columbia on behalf of the United States to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District.

S. 3835. An act to authorize the District of Columbia Civil War Centennial Commission to plan and carry out in the District of Columbia civic programs in commemoration of the one hundredth anniversary of the Civil War; to authorize the Commissioners of the District of Columbia, the Secretary of the Interior, and the Secretary of Defense to make certain property of the District and of the United States available for

the use of such Commission; to authorize the said Commissioners to make certain regulations and permit certain uses to be made of public space, and for other purposes; and

S. 3867. An act to exempt from taxation certain property of the National Guard Association of the United States in the District of Columbia.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 3313. An act to amend section 200 of the Soldiers and Sailors Civil Relief Act of 1940 to permit the establishment of certain facts by a declaration under penalty of perjury in lieu of an affidavit, and for other purposes;

H.R. 4826. An act for the relief of Arthur E. Collins;

H.R. 6597. An act to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes;

H.R. 6871. An act to amend title III of the Public Health Service Act, to authorize project grants for graduate training in public health, and for other purposes;

H.R. 7758. An act to improve the administration of oversea activities of the Government of the United States, and for other purposes;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia; and

H.R. 12326. An act making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes.

RECESS

The SPEAKER. The Chair declares the House in recess until 12 o'clock noon today.

Accordingly (at 3 o'clock and 37 minutes a.m.) the House stood in recess until 12 o'clock noon, Thursday, September 1, 1960.

EXTENSIONS OF REMARKS

Jets—Aid to Latin America

EXTENSION OF REMARKS
OF
HON. DANTE B. FASCELL
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. FASCELL. Mr. Speaker, recent events in Latin America have focused new attention on the Caribbean, Central, and South America.

More and more Americans are becoming increasingly aware of their economic difficulties. We are also recognizing the tremendous economic interdependence which almost inextricably binds us.

A modern-day miracle is making its helpful contribution in solving at least a part of the problem of our southern friends.

The helper? Jet speed. The faster you can get from here to there, the more people are going to take the trip.

This proposition, proven by scientific studies, looms large today as a potent factor in bolstering the economies of numerous Latin American countries. For today is the jet age, and a 575-mile-an-hour jetliner gets people from here to there 40 percent faster than ever before.

Thus comes the obvious conclusion: Where the jets go, more people are going. The nearly 1 million U.S. visitors who traveled to the Caribbean, Central, and South America in 1959 spent almost $200 million in the area.

Even a 20-percent increase in this travel, which experts predict the jet airliners can easily generate, would mean an extra $40 million poured directly into the economic bloodstream of those countries this year.

Proof that reduced travel time brings increased travel is compiled in a survey made by Pan American World Airways, pioneer carrier which has been serving virtually all of Latin America for three decades.

As further proof, three Caribbean resorts whose air facilities enabled them to be among the first spots to welcome jet service last year recorded impressive travel gains.

In Puerto Rico, which Pan American has made the jet capital of Latin America with some 62 jet flights a week currently, travel figures practically shot off the chart under the impetus of the faster, more luxurious service. Puerto Rico's visitor count zoomed from about 270,000 in 1958 to a staggering 331,000 last year. Similarly, the number of visitors to Nassau rose from 178,000 to 264,000, and Jamaica shot up from 170,000 to 191,000.

Jet speeds combine with the changing work pattern of U.S. employees to provide even brighter prospects for Latin American vacation spots. "The paid vacation of from 2 to 4 weeks has become almost universal in the United States," the Pan American survey notes. "This circumstance would appear propitious for an increase in vacation travel to more distant points." This is especially significant in view of the fact that the survey found approximately 52 percent of the clipper travelers were vacation travelers.

And as a final bright note, the traveling public has obviously taken instantly and enthusiastically to jet travel everywhere on all airlines.

Ukrainian Congress Committee of America—A Tribute on Its 20th Anniversary

EXTENSION OF REMARKS
OF
HON. JAMES A. BURKE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. BURKE of Massachusetts. Mr. Speaker, this year we commemorate the 20th anniversary of the Ukrainian Congress Committee of America. It is fitting that we salute the leaders of this organization from the floor of Congress, for their service to Ukrainians and to the United States has been very valuable.

One of the great problems facing new Americans is the difficulty of adjusting to a completely new national environment. The Ukrainian Congress Committee has played an important role in helping our new Ukrainian citizens adjust to their new country. It has served as something of a bridge between the old country and the new, the old way of life and the new. In so doing, it has kept alive some of the finest traditions of the Ukrainian people which have found their place solidly in our American civilization. However, the greatest contribution of this organization has been to keep alive in Americans their dedication to freedom everywhere by their insistence upon freedom for the Ukraine.

Ukrainians everywhere, America salutes you.

Six Outstanding Conservatives

EXTENSION OF REMARKS
OF
HON. THOMAS B. CURTIS
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. CURTIS of Missouri. Mr. Speaker, there appeared in the New York Times magazine an article entitled "A Conservative Sets Out His Credo" by BARRY M. GOLDWATER. In this article he names six outstanding conservatives and sets forth his reasons for listing them. I desire to include this portion of the article from the New York Times magazine of July 31, 1960, which lists the six outstanding conservatives named by Senator GOLDWATER with his reasons:

SIX OUTSTANDING CONSERVATIVES NAMED BY GOLDWATER, WITH HIS REASONS

Roosevelt: This man displayed his conservative bent by recognizing the lessons of history which showed that the proper use of power could preserve peace in the world.

Hoover: This conservative President showed to the world the intense interest of the conservative in the problems of his fellow men. His whole life has been a dedication to the solution of these problems.

BYRD: Senator BYRD, being a true conservative, recognizes the obvious lessons of history which tell us that no individual, business, or government can forever spend money that is not at hand.

WILLIAMS: I could include Senator WILLIAMS for the same reasons I have discussed in Senator BYRD's case, but, in addition, Senator WILLIAMS recognizes that history has taught us that dishonesty in government creates contempt for the government. And he has devoted a great part of his career to ferreting out dishonesty where it exists.

Kirk: Professor Kirk's writings are probably the clearest ever done on the conservative philosophy and I list him because a reading of his works will give a person an immediate understanding of what conservatism means.

ALGER: I have selected Congressman ALGER because he typifies a new and young group of conservative politicians who know that we must study the past if we are to make progress in the future. That is the one point on which all conservatives agree. That is why none of them wants to try the mistakes of yesterday in the solving of the problems of tomorrow.

Twentieth Anniversary of Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. CLIFFORD P. CASE
OF NEW JERSEY
IN THE SENATE OF THE UNITED STATES
Wednesday, August 31, 1960

Mr. CASE of New Jersey. Mr. President, there are some 2½ million Americans of Ukrainian ancestry in this country. This fall the Ukrainian Congress Committee of America is marking the 20th anniversary of its founding.

I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the text of a letter I have written on this occasion to Prof. Lev E. Dobriansky, who, for more than a decade, has led the Ukrainian Congress Committee.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 31, 1960.

Prof. LEV E. DOBRIANSKY,
Chairman, Ukrainian Congress Committee of America, Inc., Georgetown University, Washington, D.C.

DEAR PROFESSOR DOBRIANSKY: On the occasion of the 20th anniversary of the founding of the Ukrainian Congress Committee of America this fall, I want to express to you the sorrow and anguish I feel, in common with the members of your committee, at the continuing plight of the Ukraine under Russian Communist domination. The committee which you have led for more than a decade has helped to insure that all Americans remember our stake in the aspirations of other peoples for freedom and respect for the dignity of man.

It may be that the Iron Curtain is now more perforated than it was in the era of Joseph Stalin and that the repressive policy of the Soviet Union toward its national minorities is somewhat lessened. But the fact remains that the Soviet Union is a ruthless totalitarian state which has not changed its nature or policies in any essential respect.

As one who joined in sponsoring the Senate resolution last year to establish Captive Nations Week, I would like to note again your tireless efforts and devoted service on behalf of its successful establishment and annual observance. Freedom-loving Americans, whatever their national backgrounds, are indebted to you and to all those who serve with you in the cause of human freedom.

Sincerely,

CLIFFORD P. CASE,
U.S. Senator.

A Message to the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. HARRIS B. McDOWELL, JR.
OF DELAWARE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. McDOWELL. Mr. Speaker, the year 1920 saw the end of the Ukrainian National Republic. Less than 3 years of independence were granted to the people of the Ukraine when their state was crushed by Russian troops and the last free Ukrainian forces were compelled to flee the country. The flame of freedom which had flickered so long in the breasts of the Ukrainians—and had burned brightly for so short a time—was once again nearly extinguished.

Twenty years later, in 1940, at the First Congress of Ukrainian-Americans in Washington, D.C., the Ukrainian Congress Committee of America was formed. In the years between 1920 and 1940 the Ukrainian people suffered the oppressive tyranny of Communist rule. When the Red army was conquering the Republic its troops followed their usual policy of killing, raping, and generally terrorizing the population. In 1930 the order for compulsory collectivization of the land was put into effect accompanied by the forceful dispossession of the peasants. Two years later an artificial famine, instigated by the Russians, caused the death of approximately 5 million Ukrainians. During the 1930's also, the Moscow purge trials found their counterpart in similar purges of Ukrainian artists, writers, intellectuals, and even Communist Party members. Finally, in the years 1937 to 1939 the infamous massacre of Vinnitsa took place. Under the supervision of Nikita Khrushchev, First Secretary of the Communist Party of the Ukraine, and known to the people of the country as the "Hangman of Ukraine," over 10,000 Ukrainians were brutally killed and buried in mass graves.

In the 20 years since 1940 when the Ukrainian Congress Committee was formed, Soviet atrocities have not lessened. During World War II Russian partisans ravaged the countryside and robbed and murdered the population. At the end of the war Soviet troops once again occupied the country liquidating in the process the Ukrainian Insurgent Army (UPA) which fought so gallantly against Hitler. Since 1946 the Ukrainian Catholic Church has been suppressed, thousands of Ukrainian youth resettled in the wastes of Siberia, and the general oppression of the people continued.

There is, however, one great difference between the period before 1940 and the 20 years that have elapsed since then. The Ukrainian Congress Committee has brought all the facts of Russian brutality into the light of day. It has shown Americans that the U.S.S.R. is not a monolithic unity as the Russians claim but rather a grouping of many nations under Moscow's iron heel. All is not smooth sailing in the Soviet Union if thousands of people must be liquidated because of their opposition to the regime. Khrushchev's true nature was pointed out by the committee long before the free world saw him in the light of Hungary. This accomplishment of the Ukrainian Congress Committee cannot be overestimated. We are engaged in a struggle with communism which is mainly an ideological one. It has long been said of Americans that we are a sleeping giant. We awake slowly but once awakened, move quickly. In the present life-and-death contest between democracy and Soviet dictatorship we can no longer afford the luxury of sleeping late. It is for this reason that we owe such a great debt of gratitude to the committee. It is necessary that we be constantly reminded what communism is and what fate awaits those who are conquered by it. We must know our enemy in order to vanquish him. This is the unique educational contribution of the Ukrainian Congress Committee for which I wish to thank and congratulate all its members on this 20th anniversary.

Ohio's Library Needs

EXTENSION OF REMARKS
OF
HON. WALTER H. MOELLER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. MOELLER. Mr. Speaker, in the debate over the passage of S. 2830 to extend the Library Services Act for 5 years several of my colleagues from Ohio argued that Ohio had adequate library service and that the intangibles tax which supports Ohio libraries was so productive that it was unnecessary to extend the act, citing $21,261,612 as the amount spent for libraries.

However, the distribution of this amount does not support the contention of my Ohio colleagues. On the contrary it points up how great is the need for assistance in many rural areas of the State.

Sixteen million dollars or 75 percent of that total, went into the nine metropolitan counties in which are situated the cities of Cleveland, Cincinnati, Columbus, Toledo, Dayton, Akron, Canton, Youngstown, and Lorain.

Nineteen million dollars or 90 percent of the total, went into the above counties and adjacent industrial counties containing such cities as Warren, Hamilton, Lima, Ashtabula, Springfield, Salem, Mansfield, Steubenville, Newark, and others.

Thus 31 counties received $19 million or 90 percent of the total library income in 1959; 57 counties had to exist on 10 percent of the total or approximately $2,200,000.

What does this mean to the libraries in some of these 57 counties?

Adams County had a total of $6,526 on which to operate two libraries in the county, located in the communities of Peebles and Manchester. This is not enough to hire one librarian and rent a building, to say nothing of buying books, which is the library's reason for existence; yet this amount had to be divided among two libraries. How could such a library or libraries even begin to think of buying a bookmobile to serve the small towns and rural areas in the county? A bookmobile itself costs $15,000 to purchase and another $15,000 annually to operate.

How could a county like Carroll in northeastern Ohio with a library income of $17,713, get an additional $30,000 to establish bookmobile service? If it received 100 percent of the tax collection in that county, which it didn't, there wouldn't be enough to do this.

How could Union County in central Ohio with a library budget of $27,000, which you might consider adequate, pick up an additional $30,000 to start bookmobile service?

Monroe County in 1959 had a total intangibles collection of $10,509. How much library service will that provide? Noble County had a collection of $6,170, of which only $4,000 could be spared for the library. Pike County had a total of $6,333, not much better. Vinton County had $4,417. The library there received 100 percent of the tax collection, which sounds wonderful, but it still is only $4,417.

Most of Ohio's libraries are small. Of the 270 tax-supported libraries in the State 51 have an annual budget of less than $5,000; 93 less than $10,000; 123 less than $15,000; 144 less than $20,000; 161 less than $25,000. Personnelwise, 191 libraries have 5 or less employees; 231 libraries have 10 or less employees. Only 39 have more than 10.

Less than 1,000 books each year are added by 117 libraries; less than 2,000 books are added by 181 libraries.

Many libraries in Ohio are handicapped in their efforts to provide basic library services. Consequently many residents of rural areas still have sadly inadequate library service. A great many have none at all.

Hail to the Ladies of Hadassah

EXTENSION OF REMARKS

OF

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. HALPERN. Mr. Speaker, hail to the Ladies of Hadassah.

Welcome to New York. May their convention be an outstanding success and their visit to Gotham thoroughly delightful.

I refer, Mr. Speaker, to the forthcoming 46th National Convention of Hadassah, the Women's Zionist Organization of America, being held in New York from September 11th through the 14th at the Waldorf-Astoria Hotel.

The greeting extended herewith, I am sure, reflects the good wishes of all of us in this Congress of the United States to these wonderful women on this significant occasion.

Most of us in Congress are proud to have among our constituents the dedicated, public-spirited ladies who comprise the membership of Hadassah.

For more than four decades, these dedicated women, who number more than 318,000 in some 1,290 chapters throughout the United States and the Commonwealth of Puerto Rico, have been in the forefront of civic and community programs, and have energetically participated in such significant areas as youth activities, education, and cultural and humanitarian causes.

Founded for the purposes of conducting health work in Palestine, now Israel, and of fostering Jewish ideals in the American-Jewish community, and strengthening the principles of democracy, Hadassah not only carries on the previously mentioned activities in the United States, but maintains and operates a network of medical institutions and educational programs in Israel.

Through participation and leadership in numerous community activities throughout the Nation, Hadassah members have contributed immeasurably to the enhancement of American spiritual and moral values. Foremost among their objectives have been the advancement of the principles of freedom and human rights and the promotion of greater human understanding.

They have proposed a broad-scale health-for-peace program, under which the most advanced know-how in public health training, medical research and the application of effective resources for warring on the scourges of mankind, would be shared with the less fortunate peoples of the world.

In Israel, Hadassah's activities have been centered upon medical, educational and youth programs and include, among other things, the maintenance of health welfare stations, support of child guidance, school hygiene and dental service clinics, and, participation in a land reclamation program. Among its most outstanding achievements have been its maintenance of hospitals, a nurses training school, and vocational rehabilitation centers.

The idealism and energetic efforts of Hadassah to bring to Israel the most modern medical care facilities, educational opportunities and public health institutions have contributed immensely to the vitality of that nation as democracy's outpost in the Near East.

Organized on a voluntary basis, this outstanding group of women has financed and supported these magnificent contributions through dedicated volunteer work.

Mr. Speaker, I would like to point out that it is particularly fitting and memorable that the convention is dedicated this year to the 100th anniversary of the birth of Henrietta Szold, under whose wisdom and initiative Hadassah was organized in New York in 1912. Her life and work will be highlighted throughout the convention and plans will be made for the celebration of the Henrietta Szold Centennial Year, commencing in December.

The achievements of Miss Szold, whose vision and energy provided the impetus for much of Hadassah's progress, will be highlighted. One of her phrases, "Make my eyes look to the future", uttered to an artist while posing for a bust a few days before her death, will constitute the theme for the convention.

Miss Szold's life was devoted to the health and well-being of the people in the Holy Land and of Jewish immigrants to America. She was a great welfare worker and an even greater humanitarian and was the originator of the education, child guidance, and social welfare concepts now practiced so abundantly in Israel. She was designated as one of the 100 great American women of the century. Her memory is revered universally today, and her interests were the primary function of Hadassah from the day it was founded.

The zeal and fidelity with which the members of Hadassah have pursued these objectives was exemplified in the dedication, on August 3 last, of the magnificent. new Hadassah-Hebrew University Medical Center near Jerusalem. This memorable occasion, which will be a "showcase" depiction at the convention, will be one of the thrilling features of the gathering.

I know my colleagues from New York City join with me in extending warm welcome to the ladies of Hadassah, and salute them as they meet for their annual convention. May their stay be pleasant and may they return often.

Mr. Speaker, again I say—"Hail to the Ladies of Hadassah!"

Weaver's Annual Report

EXTENSION OF REMARKS

OF

HON. PHIL WEAVER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. WEAVER. Mr. Speaker, every year I have made an effort to keep my friends and neighbors in the First Congressional District completely informed as to the activities of the Congress. I have from time to time made special reports which have been universally greeted with favor.

Once again this year I am making such a report to my constituents which, under leave to extend my remarks, I now place in the RECORD:

WASHINGTON, August 31, 1960.—The 86th Congress is now history—so, let's look at the record:

Defense: We are the most powerful nation on earth and we'll remain that way. We have built a well-balanced, flexible and retaliatory force to keep the peace.

Economy: We wound up the fiscal year with a $1 billion surplus. Prospects are bright for an even better surplus next year.

Socialist trends: Although still strong among the "big spend" boys, much of the socialistic legislation was blocked.

Farm problem: The big failure of the 86th Congress. The leadership refused to work for a sound solution to the problem.

DEFENSE POSTURE

As a member of the Appropriations Subcommittee on Defense I have concentrated for 2 years on the effort to build a balanced, flexible defense program geared to keeping the peace.

Bombers: Still the backbone of our retaliatory force. We have a fleet of heavy bombers capable of delivering a devastating nuclear blow anywhere in the Communist empire—ready around the clock.

Missiles: Already squadrons of Atlas ICBM's are operational; Titan soon to be in the operational category; Minuteman, highly mobile and therefore less vulnerable from attack, is well ahead of schedule; Polaris has passed its tests and the first missiles will be on station with the fleet this fall. We'll have close to 50 of these missiles at sea by spring. Intermediate missiles backing up our "at home" force we have shorter range missiles stationed abroad, near Communist borders, capable of dealing severe blows to selected targets.

Intelligence: Always a risky business, our intelligence agents have been able to paint a truer picture of Soviet capabilities. We are ahead of the Soviets in military matters. They have some interesting gadgets and have made some spectacular propaganda splashes. But responsible leaders of both parties agree we are stronger. Democrat GEORGE MAHON of Texas, chairman of the Committee on Defense Appropriations has this to say: "We have a greater overall striking ability than the Soviet Union. This Nation is stronger than any nation in the world today."

BUDGET ECONOMY

The big-spend boys were in the saddle as the 86th Congress got under way, but a determined effort by the Republican minority backed up by the potent Presidential veto helped to hold the line against bigger government, more inflation. However, the pressure is still there.

Supporters of big-spend and giveaway programs such as subsidies for airports, schools, socialized medicine, area redevelopment, and urban renewal are still fighting.

If we want the Federal Government to be all-powerful, all-supporting, they have the proposals. If all the spend-ourselves-rich bills had been passed, it has been estimated our annual budget would be in excess of $125 billion and you would foot the bill.

LABOR REFORM

In one area, the cleanup of some underworld elements in labor, the 86th Congress made real progress. Enactment of the Landrum-Griffin bill will go down in history as a great step forward.

The bill was enacted after years of investigation, months of hearings that developed a sordid story of corruption, vice, and undue political pressure by some in the labor movement. Enacted into law last year, the cleanup drive has already begun.

But the Hoffa-Carey crowd is still a potent force. Many will recall that AFL–CIO Vice President James Carey wrote an open, threatening letter to everyone who supported sound labor-management reform legislation. I was the recipient of one of those letters. I am proud to have been among those who stood up to be counted in favor of good legislation to protect the rank and file of labor.

SOCIALIST TREND

There is a saying that in Washington they have more solutions than the country has problems. Every local problem becomes a national crisis and they turn to Uncle Sam for a solution—always a costly one and always involving more government, a bigger bureaucracy.

The billion-dollar emergency housing proposal is an example; private builders are keeping abreast of the housing needs; never in history have so many owned their homes, and yet, there are those in the House and Senate who want the Government to expand in this field, and to finance directly home buying and homebuilding.

This would mean Government control and absolute standardization. Every home in America would look exactly alike. We would become one gigantic collective housing development.

NEGLECT OF FARMERS

The Democrats have a 2-to-1 margin in both the House and the Senate and control all of the committees of the Congress, and yet they were unable to come up with a reasonable, fair, and just solution to the farm problem.

Several proposals were made including the old Brannan plan in new clothing. Only one major farm bill, a modified wheat program, came out of the House Agriculture Committee and northern Democrats teamed up to kill it. The Senate passed a wheat bill which would have cut both acreage allotments and support prices.

There are several reasons why sound farm legislation cannot be written under the prevailing circumstances.

Sectionalism: In the Senate, the four ranking Democratic members of the Agriculture Committee are from the Deep South; are interested in sugar, peanuts, tung nuts, cotton, and tobacco. Peanuts are one of the support crops and are involved in setting parity payments and, in a literal sense, the price support level depends on the size of baseball crowds. In the House, the top nine Democrats on the committee come from the South. The chairman is a tobacco farmer. Therefore it is difficult to generate enthusiastic support for wheat or grain crops.

Partisanship: Unfortunately our farm citizens have been the victims of political maneuvering of the most cynical kind.

There are those in Congress who obviously prefer a political issue to a solution. Proposal after proposal went down the drain or into pigeonholes. Senate Majority Leader LYNDON B. JOHNSON, when listing "must" legislation after reconvening of Congress, pointedly ignored the farm problem. The Democratic presidential nominee has a solid Benson voting record. Every sound program has been watered down until nothing workable remains.

I personally have introduced or supported a number of major and workable proposals; the wheat marketing bill, industrial use of surpluses proposal, payment in kind, the Weaver farm plan.

Any one of these proposals would help ease the farm situation. As always I stand ready to cooperate with anyone in Congress who advances constructive proposals along these lines.

RESOURCE DEVELOPMENT

This Congress has seen major advances for two vitally important resource development and protection projects. Construction has begun on Red Willow Dam. Construction funds for Salt-Wahoo have been included this year. I was happy to head up the presentation to the House Appropriations Committee on both projects in 1959 and 1960.

Mr. Speaker, I was this year highly honored by the Civic Affairs Associates, Inc., by receiving a certificate of merit. This group represents a conservative point of view and believes in freedom of Americans, both in the economic and political sense.

That certificate is signed by Mr. Alex Akerman, Jr., vice president-secretary, and Mr. Biehl P. Clarke, president, and it reads as follows:

Certificate of merit for service in behalf of economic and political freedom. The Honorable PHIL WEAVER, Congressman from Nebraska, has demonstrated by his voting record that he is an advocate of economy in government, limited government, free enterprise, economic growth with stability, and equality under the law. On key rollcall votes during the 86th Congress, as selected by the Free Citizen's Voting Record, Congressman WEAVER scored in the top 20 percent of the House of Representatives in his support of these principles of sound and forward-looking government. In recognition thereof, the board of directors of the Civic Affairs Associates, Inc. awards this certificate of merit.

By the Board of Directors, August 19, 1960.

ALEX AKERMAN, Jr.,
Vice President-Secretary.
BIEHL P. CLARKE,
President,
Civic Affairs Associates, Inc.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. STEVEN B. DEROUNIAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. DEROUNIAN. Mr. Speaker, on the occasion of the 20th anniversary of the Ukrainian Congress Committee of America, I am happy to have this opportunity of saluting the 2½ million Americans of Ukrainian descent.

The domination of the formerly independent countries behind the Iron Curtain by the Soviet Union is of continuing concern to the United States. The Ukraine was the first and largest of these independent countries to be taken into the Soviet Union in 1920. Since that time the Ukraine has been stripped forcibly of its culture, the profits of its economy, and many of its most talented citizens—of practically everything except an apparently undying desire for freedom and self-determination, kept alive by such organizations as the Ukrainian Congress Committee of America that speaks for its enslaved people in the Ukraine. This fall the Ukrainian Congress celebrates the 20th anniversary of its efforts in educating the American public of the desires of the captive nations for independence from Soviet rule.

Although the Ukraine lost its independence in 1920, the Ukrainian Congress keeps us informed of recent atrocities of the Soviet Union and attempts at revolt in the Iron Curtain countries. The present Soviet Government, led by Khrushchev, "The Hangman of the Ukraine," has continued an oppressive policy as it did in the 1920's and 1930's. Instead of mass slaughters, purges, and artificial famines, "silk glove" methods of subjection are used. A vast apparatus

of subverters, infiltrators, and informers is active both within and without the Soviet Union. A man will not necessarily be sent to a slave labor camp, although they still exist; he will be deprived of his job or arbitrarily decided against in a court. An action, whether truly subversive or not, will be reported by a fellow worker. It is necessary that the Soviet Government be less conspicuous in these tyrannical objectives, while Khrushchev tries to establish a favorable impression of the Communist system throughout the world. Nevertheless his tactics are equally as effective as the strong-arm methods of Stalin 10 and 20 years ago. It is sometimes easy to be deceived by the master salesman, Khrushchev. I take pride in congratulating the Ukrainian Congress for working ardently to prevent the United States and the world from falling under his spell.

Congressman Moore To Tour District

EXTENSION OF REMARKS
OF
HON. ARCH A. MOORE, JR.
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. MOORE. Mr. Speaker, as this session of the Congress draws to a close, I am sure that perhaps more than at any other time all of us are looking forward to the opportunity to return to our respective States and to visit and talk with the people whom we have the honor to represent here in the Congress.

This would seem to be particularly true this year for the reason that this recessed session of the Congress had initially generated great hope in the minds of the people that we would give serious consideration to a number of pieces of legislation that remained to be acted upon when we adjourned for the national party conventions in July of this year. This recessed session has been a failure in that regard, and it is for the best interests of the country that we adjourn and return to our States to make our peace with the people we represent.

The First Congressional District of West Virginia is a very short trip by air from Washington and during these past 2 years, as well as since coming to the Congress, I have made every effort to spend as much time in my district among the people I represent even while the Congress was in session. So many times this necessitated flying out and flying back on the same night while always returning to my district on Friday and Saturday for the purposes of holding district office hours in my district office in Moundsville, W. Va.

This has permitted me to better help and assist the people in my district and has made me better acquainted on just how the folks back home feel on particular legislative issues. It has also served to bring the people of the First Congressional District and their Congressman closer together.

Since first being elected to the Congress in November 1956, I have followed one fundamental rule; that is that I attempt to carry out the duties of my office in such a manner that as a Congressman I was easily accessible to the people I represented; rather than come to Washington and forget the people that had elected me. It was and still is my sincere desire to bring the office of the U.S. Congressman closer to the people. As a direct result of this pledge, I have made a great number of personal appearances and speeches in the seven counties which I represent. Very rarely do I accept a speaking engagement outside my Congressional District even though ofttimes I am requested to go to various other parts of the country. It has been my practice to the best of my ability and physical endurance to be a full-time representative for my people.

In keeping with another established practice, I wish to announce that I am making final preparations for my annual visit to a number of communities in the First Congressional District. I have made arrangements for office space in various courthouses and post offices and other civic buildings where it will be convenient to meet and privately discuss problems with individuals who might want to see me. Individuals who for one reason or another I have not had an opportunity to talk with and who might have problems in which I as their Congressman, might be of assistance. In preparation for this annual visit, I am, therefore, looking forward to adjournment as a time when I might make myself completely available to my constituents in their own hometowns.

The following schedule has been arranged and in each instance the time shown is the local time in that particular community where constituents and friends may have the opportunity to meet and talk with me privately on matters of personal, community, or State concern:

September 22, Thursday: Hancock County, 10 a.m. to 12 noon, city building, Chester; 1:30 p.m. to 4:30 p.m., courthouse, New Cumberland.

September 23, Friday: Hancock County, 10 a.m. to 4:30 p.m., post office building, Weirton.

September 26, Monday: Brooke County, 9:30 a.m. to 4:30 p.m. courthouse, Wellsburg.

September 28, Wednesday: Ohio County, 9:30 a.m. to 4:30 p.m., post office building, Wheeling.

September 30, Friday: Wetzel and Marshall Counties, 9:30 a.m. to 12 noon, city hall, Cameron; 1 p.m. to 4 p.m., Bank of Hundred, Hundred.

October 3, Monday: Wetzel County, 9:30 a.m. to 12 noon, courthouse, New Martinsville; 1:30 p.m. to 4:30 p.m., city hall, Pine Grove.

October 5, Wednesday: Taylor County, 9:30 a.m. to 4:30 p.m., post office building, Grafton.

October 6, Thursday: Marion County, 9:30 a.m. to 5 p.m., courthouse, Fairmont.

October 10, Monday: Marion County, 9:30 a.m. to 12 noon, post office, Farmington; 1:30 to 4:30 p.m., city hall, Rivesville.

Until such time as we reconvene in January, it is my intention that my district office in Moundsville will remain open to the general public 6 days a week and as a result of this, I have scheduled no courthouse visits for Moundsville, but my constituents from that area are invited to bring any problems that they may have at any time to me personally in my district office.

These visits in the various cities and towns are as informal as we can possibly make them, and workers, businessmen, and housewives are urged to drop by for a chat. No appointments are necessary and all persons are welcome to come as "they are" to see and visit with their Congressman. I hope the tour this year will be as successful as it was last year when we had several hundred people each day stop by our "mobile" office to let me know their feelings on various matters.

As I have stated, my district office, located in the Mercantile Bank Building in Moundsville, is open 6 days a week to serve the residents of the First Congressional District. When I am out of the office on official business, there is always a competent member of my staff available to answer questions or assist persons with their problems. I always welcome having my friends call upon me whenever my services might be of particular assistance.

The Record of the 86th Congress—Report to the People of the Fourth District of Wisconsin

EXTENSION OF REMARKS
OF
HON. CLEMENT J. ZABLOCKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. ZABLOCKI. Mr. Speaker, at the end of each congressional session, I have reported to the people of my district on my votes and actions as their Representative in Congress.

The report which I am submitting today deals with the record of the 86th Congress. It outlines the major issues considered by our National Legislature since January 1959 when this Congress first convened. It also contains a tabulation of my votes and positions on all major bills.

I believe the voters have the right to know how their Congressman represented them in Washington. For this reason, I have prepared these reports annually, had them printed at my own expense, and made them available to the residents of the Fourth District.

In addition, I have kept my constituency informed of my actions through newsletters, radio and television reports, and periodic visits to the district while Congress was in session. I have tried to represent my district to the best of my ability, and to give a full account of my work in Congress. I hope that my efforts and position on issues will meet with the approval of the people who have sent me here to represent them.

THE 86TH CONGRESS

The 86th Congress convened on January 7, 1959. Its first session lasted until September 15, 1959. I remember that date vividly because, after an all-night session of Congress, I had to rush to New York to be present at the opening session of the United Nations General Assembly. It was my privilege to serve as U.S. delegate to that 14th General Assembly, and to represent our Nation at that world forum.

The 2d session of the 86th Congress began on January 6 of this year and is ending tonight.

In the course of these 2 sessions, the 86th Congress, led by Democratic majorities in the House of Representatives and in the Senate, established a constructive record of legislative achievement. I will list it in a detailed table appended to this report.

First, however, I would like to make this observation: President Eisenhower's prediction that the Democratic-controlled 86th Congress would engage in a "cold war of partisan politics" was never realized. The Democratic majorities in Congress did not waste their time on partisan bickering. They set about doing their work, keeping the interests of the people and the security of our Nation uppermost in mind.

As a matter of fact, on a number of issues important to the Nation, the President received more support from the Democrats in Congress than he did from the members of his own political party.

THE ATTITUDE OF THE ADMINISTRATION

The reverse, however, was not often true. A number of needed and constructive Democratic-sponsored bills either ran headlong into a Presidential veto, or were stopped in their tracks by a threat of a veto. Proposals to advance a solution to the problem of chronic unemployment and economically depressed areas, to promote home ownership and stimulate lagging home construction, to clean up the polluted waters of our Nation, to provide adequately for the medical care needs of our elder citizens—these and other bills belong to the category of legislation stymied by the present administration's recalcitrant attitude toward the human needs of our Nation.

SOME SOLID CONGRESSIONAL ACHIEVEMENTS

Nevertheless, the Democratic majorities in the 86th Congress were able to bring forth some solid legislative achievements.

Important advances were made in the field of labor legislation through the enactment of a major bill to curb abuses and racketeering in the field of labor-management relations, and through the preparation of the groundwork for the enactment next year of an effective minimum wage bill.

The first-mentioned bill was not perfect by any means. Certain corrective and improving amendments are needed, and I certainly hope that they will be enacted by the next Congress. I believe that there is considerable support for such amendments.

Further, the 86th Congress pioneered in approving legislation to provide for some of the medical care needs of our elder citizens, by removing—in accordance with the proposals I made as early as 1953—the age 50 requirement for the payment of disability benefits under the Social Security law, and by making several other important improvements in that law.

The enactment of legislation to safeguard each citizen's right to vote, the updating of veterans' benefits, the provision of health benefits and salary adjustments to Government employees, the strengthening of our national defense, and the introduction of a multilateral approach in some phases of our foreign policy programs, were among the numerous solid accomplishments of the 86th Congress.

EXECUTIVE LEADERSHIP WANTING

There are some fields, however, in which the Congress is not designed to provide leadership to our Nation. Policy decisions and new programs in those instances must come, under our Constitution, from the Chief Executive and his administration. National defense and foreign policy are foremost in this category. In these fields, Congress can modify, approve or reject Executive plans—but the leadership has to come from the executive branch of our Government.

This is so because only the Chief Executive has all of the information, the facilities, and the responsibility under the Constitution to initiate policy decisions and programs in these areas.

And it is precisely in these fields that Executive leadership has been found wanting.

NATIONAL DEFENSE AND SECURITY

During 1959 and the first 8 months of 1960, Congress appropriated over $80 billion for our national defense and security. This was more than one-half of our entire national budget for the 2-year period, and exceeded the President's requests by approximately $1 billion.

In spite of this tremendous expenditure of money, many Representatives and national leaders have repeatedly pointed out that our defense effort is not keeping up with the critical demands of our times.

There is no question that our defense is stronger today than it was 2 years ago, but so also is the Soviet capability to strike a lethal blow against our Nation. The evidence available shows that the Communists are still ahead of us in the field in which their striking power is concentrated, the field of intercontinental missiles, of space satellites, and the like.

And, on our part, we are not closing that gap fast enough.

There is also ample evidence that money is being squandered by our military services while many of our national defense needs go unmet. This is the area in which the record of the present administration is most disappointing. One would imagine that, with a lifetime of military experience behind him, the President would have been able to carry out the much-needed reorganization of our Military Defense Establishment, and to command enough public support to do that job well. Yet little, if anything, has been done in that direction.

Neither the reorganization laws enacted by Congress, nor the congressional exposure of waste in military procurement, have been of much help in remedying the situation. The Executive has made virtually no progress in unifying our defense forces, in eliminating duplication, in providing for better planning, in introducing more thorough inspection of military procurement, and in eliminating waste.

INTERNATIONAL AFFAIRS

The situation in the field of foreign affairs is also less than satisfactory.

The present administration has been coasting to a large extent on programs devised by earlier Democratic administrations and supported—at times for lack of anything better—by Democratic majorities in Congress. Some of these programs were devised to meet conditions existing 10 or 20 years ago. They lack maximum effectiveness and efficiency today.

The administration's attitude over the past 2 years seems to have been "Let's just keep on going, and rush to Congress for more money whenever our lack of foresight and planning blow up in our face."

Unfortunately, money alone cannot solve world problems. Further, many Democrats in Congress who have supported the administration on foreign affairs legislation are getting tired of being asked to appropriate more money every time a problem develops abroad. This is no way for the United States, the leader of the free world, to conduct its foreign policy.

The 86th Congress has been successful in correcting some—but certainly not all—of the shortcomings in this field.

First, it tightened up the administrative controls on the expenditure of money under our foreign policy programs. It established the office and approved the appointment of a comptroller to oversee the mutual security program. It placed numerous specific restrictions on the disbursement of funds under this legislation. It continued careful and thorough investigations of administrative practices and policy decisions in the field of foreign relations.

Further, the 86th Congress injected new emphasis into our international undertaking by approving U.S. participation in the International Development Association, intended to provide assistance, on multilateral basis, to the underdeveloped countries, and by establishing the Inter-American Development Bank.

LEGISLATIVE LEADERSHIP FOLLOWS

These are only a few of the major achievements of the 86th Congress.

The table which I am submitting with this report lists many more bills which were considered or approved by this Congress. The disposition of each bill, and my vote or position on it, are shown in the table.

I want to add that it has been a great honor for me to represent the 4th District of Wisconsin in the 86th Congress. It is my hope that my record on the issues will meet with the approval of my constituents.

Rollcall record of Congressman CLEMENT J. ZABLOCKI, 86th Cong.

	Total roll and quorum calls	Rollcalls	Not voting	Quorum calls	Absent on quorum calls [1]
1st sess.	162	78	0	84	1
2d sess.	206	93	0	113	3

[1] Absence on quorum call does not necessarily mean a legislative day's absence.

Voting record of Congressman CLEMENT J. ZABLOCKI, 86th Cong.

Stand	Issue	Status
	NATIONAL DEFENSE AND INTERNAL SECURITY	
Voted for	Defense Department appropriations: $39,000,000,000 in 1959, $40,000,000,000 in 1960	Became law
Voted for	Extension of the draft law until July 1, 1963	Became law.
Voted for	A 3-year extension of the Renegotiation Act to provide for recovery of excessive profits on defense contracts	Became law.
Voted for	Legislation to strengthen control of quality of officer personnel of Regular Army, Navy, and Air Force	Became law.
Voted for	Bill to provide for State cooperation in atomic energy activities, particularly in field of peaceful uses	Became law.
Voted for	Authority for National Aeronautics and Space Administration programs: $485,300,000 in 1959, $970,000,000 in 1960	Became law.
Voted for	Authority for Atomic Energy Commission programs: $229,900,000 in 1959, $211,400,000 in 1960, including power reactor plants for the Antarctic.	Became law.
Voted for	Construction program of modern naval vessels: $110,000,000 in 1959, $157,900,000 in 1960	Became law.
Voted for	Construction projects at military installations and bases, in United States and abroad: $1,200,000,000 in 1959, $1,100,000,000 in 1960	Became law.
Voted for	Change in Criminal Code to permit prosecution for espionage committed outside the United States	Died in Senate.
Voted for	Legislation to authorize Secretary of State to deny passports to persons furthering international communism	Died in Senate.
Voted for	Legislation to clarify term "organize" as used in Smith Act to make it apply to continuing Communist activities	Died in Senate.
Voted for	Bill to expedite procedures for review and execution of deportation orders against undesirable aliens	Died in Senate.
Voted for	Legislation to broaden provisions of Foreign Agents Registration Act	Died in Senate.
	INTERNATIONAL AFFAIRS	
Voted for	Improvement and continuation of the mutual security program, including technical cooperation, military assistance, and other programs.	Became law.
Voted for	U.S. participation in the International Development Association to provide multilateral assistance to underdeveloped countries	Became law.
Voted for	H.R. 5 to provide tax incentives to encourage investment of private capital in underdeveloped countries	Died in Senate.
Voted for	Payment to American nationals of war damage claims from enemy-alien vested funds	Died in Senate.
Voted for	Lump-sum payment from vested enemy-alien funds for relief and rehabilitation of needy victims of Nazi persecution	Died in Senate.
Voted for	Admission of approximately 5,000 immigrants as part of international effort to promote resettlement of remaining European refugees	Became law.
Voted for	Legislation to authorize U.S. Government to enter into international cooperative program in health research, training, and planning	Became law.
Sponsored	Resolution authorizing appointment of U.S. Citizens Commission to explore prospects of closer unity among NATO nations at a NATO convention.	Adopted.
Voted for	Resolution to authorize U.S. participation in International Bureau for Protection of Industrial Property, pursuant to a treaty	Became law.
Sponsored	Zablocki resolution calling for restoration of freedom to the captive nations	Approved by House.
Sponsored	Zablocki resolution opposing the admission of Red China to the U.N.	Approved by House.
Sponsored	Humphrey-Zablocki resolution relating to the promotion of peace through reduction of armaments	Died in House.
Voted for	Establishment of and U.S. participation in an Inter-American Development Bank	Became law.
Voted for	Adjustment in U.S. subscription to the International Monetary Fund and to the International Bank for Reconstruction and Development.	Became law.
Voted for	A 3-year extension of the President's authority to implement terms of the International Wheat Agreement	Became law.
Voted for	Legislation giving preferential immigration status to relatives of citizens and permanent residents of the United States	Became law.
Voted for	Resolution authorizing President to designate week following July 4 as Captive Nations Week for prayer for freedom of people behind Iron Curtain.	Became law.
Favored	Resolution urging international agreement for suspension of nuclear weapons tests under proper safeguards	Adopted in Senate.
Voted for	Legislation granting President's request for special assistance to Latin America	Became law.
	GOVERNMENTAL REORGANIZATION	
Voted for	Admission of Hawaii to the Union as the 50th State	Became law.
Voted for	Legislation to facilitate orderly transition of Alaska from territorial to statehood status	Became law.
Voted for	Bill to restore authority of Administrator of Rural Electrification Administration to approve or disapprove loans	Vetoed by President.
Voted for	Establishment of permanent Advisory Committee on Intergovernmental Relations to help solve problems between Federal, State and local governments.	Became law.
Voted for	Amendment to Communications Act to exempt news-type programs from "equal time" requirement for political candidates on radio-TV.	Became law.
Voted for	Public Buildings Act of 1959, to coordinate and establish Federal policy governing construction and maintenance of Government buildings.	Became law.
Voted for	Amendment to Communications Act to limit "equal time" provisions for duration of 1960 campaign to major party candidates	Became law.
Voted for	Amendment to Communications Act to fix penalties for acceptance of "payola" and other abuses	Became law.
Favored	Legislation to require regulatory agencies to establish procedures to protect against improper influences	Died in House.
Voted for	Extension of the "antikickback" law now covering cost-plus contracts to apply also to all negotiated Government contracts	Became law.
Favored	Legislation to strengthen Federal elections law governing campaign contributions and expenditures	Died in House.
Voted for	Legislation to restrict number of negotiated contracts and require more competitive bidding in military procurement	Died in Senate.
Voted for	1960 civil rights statute to safeguard voting rights of every American citizen	Became law.
Voted for	Salary revision for postal and classified Government employees	Became law.
Voted for	1 year's extension of President's authority to propose Government reorganization plans to Congress	Died in Senate.
Favored	Legislation providing for appointment of public defenders in U.S. district courts	Died in House.
Favored	5-year program of payments to State and local governments in lieu of taxes for Federal lands; thorough review of this problem	Died in House.
Voted for	Resolution providing for creation of Commission to plan national observance of 175th anniversary of our Constitution (for 1964)	Became law.
Voted for	Strict accounting for moneys expended by Congressmen and congressional investigating committees; making such reports available to public.	Became law.
	NATIONAL ECONOMY	
Voted for	Federal loans, training assistance and other aids to stimulate industrial redevelopment in economically depressed areas	Vetoed by President.
Voted for	Increase in minimum wage and extension of coverage to retail concerns operating in 2 or more States	Died in conference.
Voted for	Emergency Home Ownership Act, to authorize Treasury to purchase FHA and VA-insured mortgages to stimulate home construction.	Died in Senate.
Favored	The Housing Act of 1960	Died in Rules Committee.
Voted for	Reduction of the cabaret tax from 20 percent to 10 percent	Became law.
Voted for	Legislation to curb undemocratic and racketeering practices in labor-management relations	Became law.
Voted for	Approval of President's request to raise permanent limit on national debt by $2,000,000,000, provide temporary additional raise in ceiling.	Became law.
Voted for	Bill to raise interest rate on savings bonds up to 4¼ percent to compare with high rates paid large investors on Treasury bonds	Became law.
Voted for	In 1959, a 1-year extension of corporate and excise tax rates; bill provided for repeal, in 1960, of telephone and transportation taxes	Became law.
Voted against	In 1960, continuation of telephone, transportation, and certain other excise and corporate tax rates	Became law.
Voted for	The Self-Employed Retirement Act, to allow tax deductions to professional self-employed persons for limited pension plan contributions.	Died in Senate.
Voted for	Bill to permit personal income tax deduction for all medical expenses incurred by taxpayer in care of dependent parent over 65	Became law.
Voted for	Temporary 1-cent increase in Federal gasoline tax to help finance interstate highway construction	Became law.
Voted for	Federal grants, through fiscal year 1963, for primary and secondary highway systems, and their urban extensions	Became law.
Voted for	Extension, until June 30, 1961, of the Airport Act and continuation of Federal aids, on 50–50 matching basis, for airport improvements.	Became law.
Voted for	Increase from $500,000,000 to $725,000,000 in the lending authority of the Small Business Administration	Became law.
Voted for	Amendments to the Small Business Investment Act to facilitate extension of credit to small business concerns	Became law.
Voted for	Amendment to Clayton Antitrust Act to strengthen enforcement of antimonopoly statutes	Became law.
Voted for	Authority to permit Federal Reserve Board to lower reserve requirements of member banks, expand money supply	Became law.
Voted for	Legislation limiting holding company control of savings and loan associations	Became law.
Sponsored	Resolution calling for thorough investigation of factors causing inflation and program to combat inflationary trends	Pending.
Voted for	Requirement that bank mergers have approval of Federal Reserve Board, Comptroller of Currency, or FDIC, to assure against monopoly.	Became law.
Voted for	Stopgap Housing bill approved before adjournment on Sept. 1, 1960	Became law.

Voting record of Congressman CLEMENT J. ZABLOCKI, 86th Cong.—Continued

Stand	Issue	Status
	VETERANS AND SERVICEMEN	
Voted for	Bill authorizing $100,000,000 for direct housing loans to veterans	Became law.
Voted for	Revision of the veterans' pension system, increasing non-service-connected pensions, based on need, for veterans, providing benefits to widows of World War II veterans, and making other changes.	Became law.
Voted for	Grants to aid totally disabled veterans to acquire specially equipped housing	Became law.
Voted for	Legislation providing for control of estates of incompetent veterans	Became law.
Voted for	A 2-year extension of the veterans' home and business loan program	Became law.
Voted for	Waiving payment of premiums on national life insurance policies for certain totally disabled veterans	Became law.
Voted for	Bill to permit conversion or exchange of national life insurance policies to a new, modified plan	Died in Conference.
Voted for	Education and training benefits for children of veterans who died of service-connected disability after Jan. 1, 1955	Became law.
Voted for	Provision of additional compensation for disabled veterans with more than 3 children	Became law.
Voted for	Program of educational, home purchase, and rehabilitation benefits for veterans with more than 180 days of active duty after Jan. 31, 1955.	Became law.
Voted for	Bill to equalize retirement and retainer pay of Armed Forces personnel who did not benefit under the increase of May 1958	Died in Senate.
Voted for	Restriction on the employment of retired commissioned officers of Armed Forces by defense contractors	Died in Senate.
Voted for	Bill authorizing involuntary retirement after 20 years' service of Air Force and Army officers who fail to meet requirements for promotion 3 or more times.	Became law.
Voted for	Additional compensation for certain disabled veterans (H.R. 7211)	Became law.
Voted for	Provision of services of optometrists to veterans with service-connected eye conditions	Became law.
Favored	Authority to permit certain veterans to continue vocational rehabilitation courses until completed	Died in Senate.
Voted for	Provision of incentive pay for service on nuclear-powered submarines	Became law.
Voted for	Amendments to the Reserve Officer Personnel Act to equalize promotion opportunity in various branches of Armed Forces	Became law.
Voted for	Legislation to provide a $100-a-month pension to holders of Congressional Medal of Honor	Died in Senate.
Voted for	5-year extension of the period during which families of veterans have preference for admission to public housing projects	Died in Senate.
Voted for	Legislation to authorize posthumous award of appropriate medals to the four chaplains	Became law.
	AGRICULTURE	
Voted for	A 2-year extension of the Agricultural Trade Development and Assistance Act for sale of surplus farm commodities abroad	Became law.
Voted for	Legislation proposing wheat referendum: 25-percent reduction in planting acreage, and 90 percent of parity price supports; or, removal of acreage controls and drop supports to 50 percent of parity.	Vetoed by President.
Voted for	Reduce wheat acreage allotment by 20 percent, fix supports at 85-percent parity; or, remove all production controls, allow supports to drop to feed-grain level.	Defeated in House.
Voted for	Reduce wheat acreage allotment by 25 percent, fix supports at 75 percent of parity provide payments for land withdrawn from active production.	Defeated in House.
Voted for	A 2-year extension of the Bankhead-Jones Farm Tenant Act authorizing refinancing of loans on family-size farms	Became law.
Favored	Establishment of a Commission on Problems of Rural Counties and Smaller Communities	Died in House.
Voted for	Extension, to Mar. 31, 1961, of the Sugar Act; giving President authority to cut and readjust Cuba's quota	Became law.
Voted for	Requirement that marketing quotas for rice be established when total supply exceeds normal	Became law.
Voted for	Establishment of an Agricultural Research and Development Commission to find and promote new industrial uses of farm products	Died in conference.
Voted for	Improvement of administration of Secretary of Agriculture's authority over loans to farmers and ranchers	Died in Senate.
	NATURAL RESOURCES	
Voted for	Increased effort in combating water pollution with Federal grants to local governments for construction of needed facilities	Vetoed by President.
Voted for	$500,000 appropriation to begin thorough study of water pollution problem in lower Lake Michigan and Great Lakes	Became law.
Voted for	Legislation increasing rental fees for oil and gas leases on public lands	Became law.
Voted for	Establishment of an Office of Coal Research to find new uses for coal, encourage production and conservation	Became law.
Voted against	Increased diversion of water from Lake Michigan through the Chicago Sanitary Canal	Died in Senate.
Voted for	Administration of national forests on basis of multiple use and sustained yield of products	Became law.
Favored	Expanded and accelerated program of conversion of sea water and other saline water to beneficial uses	Died in House.
Favored	Granting consent of Congress to the Great Lakes compact	Died in House.
Voted for	Legislation to authorize Federal cooperation with educational institutions and private organizations in research and training programs on fish and wildlife resources.	Became law.
Voted for	Omnibus rivers and harbors bill, for flood control and navigation works projects	Became law.
Voted for	Legislation authorizing issuance of permits for prospecting for phosphate on public lands	Became law.
Voted for	Bill authorizing the TVA to issue revenue bonds to finance additional power facilities within the area it serves	Became law.
	SOCIAL SECURITY, HEALTH, AND WELFARE	
Voted for	Social Security Act Amendments of 1960, removing the age 50 requirement for payment of disability benefits, providing medical care assistance to the aged under federally approved State plans, and improving various other provisions of the social security law.	Became law.
Voted for	Omnibus housing bill of 1959, increasing FHA loan authority by $8,000,000,000, reducing downpayment requirements, providing grants for urban renewal, and containing other provisions.	Became law.
Voted for	Extension of the Voluntary Home Mortgage Credit program to aid buyers in smaller communities to find financing	Became law.
Voted for	A 2-year extension of the life of the Civil Rights Commission	Became law.
Voted for	Extension of benefits under the Temporary Unemployment Compensation Act to jobless whose State payments expired before Apr. 1, 1959.	Became law.
Voted for	Increase in benefits under Railroad Retirement and Unemployment Compensation Acts	Became law.
Voted for	Increased maximum expenditures under the special school milk program	Became law.
Voted for	A 5-year extension of programs for training public health personnel and advanced training of professional nurses	Became law.
Voted for	A 4-year extension of the Federal air-pollution control program and $5,000,000 a year for research projects and technical assistance to local health authorities.	Became law.
Voted for	Health insurance program for Federal employees	Became law.
Voted for	A 3-year program of aid to school districts for school construction	Died in Rules Committee.
Voted for	Increased Federal contribution to land-grant colleges for resident teaching grants	Became law.
Favored	Limited Federal assistance to local communities and nonprofit agencies to combat juvenile delinquency	Died in Rules Com.
Voted for	Health benefits program for retired civil service workers	Became law.
Voted for	Study of effects of automobile exhaust fumes on public health; requires report to Congress in 2 years	Became law.
Voted for	Establishment of national register of persons whose automobile drivers' licenses have been revoked	Became law.
Voted for	Authorizing Post Office to seek court orders to curb use of mails for distribution of obscene and/or fraudulent matter	Became law.
Favored	Establishment of Youth Conservation Corps to work in national forests	Died in House.

Federal Schools Subsidies

EXTENSION OF REMARKS

OF

HON. PHIL WEAVER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. WEAVER. Mr. Speaker, one of the most insidious proposals made during the 86th Congress was the attempt to steal from the American people their right to control their own educational facilities and turn it over to a high-priced bureaucracy in Washington. Fortunately for the American people this bit of chicanery was blocked by the men and women in this Congress who still believe as I do that the people themselves should control their own future and that a government subsidy means government control.

I believe the school aid bill as proposed this year was a bad one. The measure would have taken away control of school construction and handed it over to the Department of Health, Education, and Welfare in the name of a national emergency which does not actually exist.

Mr. Speaker, I will concede that there are areas in this country where there is a shortage of classrooms and teachers. However, these areas are relatively few in number and the problems can be solved at the local—or at worst, the State—level. I say at worst advisedly because I do not think schools should be controlled at the State capital any more than I think they should be controlled in Washington. Education is a problem for the people themselves to handle and one which they alone are capable of handling in a truly democratic manner and with the best interests of everybody kept uppermost in mind.

As far as Nebraska is concerned, I would like to point out that the Federal aid program would have, in actuality, placed us deeper in the hole. The program was designed—or so it was claimed—to help those States which have small populations and small tax bases. Actually, Nebraska would have gotten a couple of million dollars out of the program while New York was getting some $26 million. By comparison Nebraska would have been further and further behind New York.

This type of legislation involves what is known as matching funds. In other words, to take part we have to put up half the money and supposedly "get as a gift" half of the money from Uncle Sam. The truth is that we put up all the money, both the local contribution and the national contribution. The trouble is that instead of dealing through an elected school board at the local level we have to add the costs of supporting a massive Federal bureaucracy.

All in all, for the people of Nebraska, this is bad legislation. No matter how you cut it, it still comes out a trifle ripe and unsavory.

For these reasons I have opposed this legislation from the very beginning and I still oppose it.

Dedication of Headquarters Building of National Association of Life Underwriters

EXTENSION OF REMARKS
OF
HON. STROM THURMOND
OF SOUTH CAROLINA
IN THE SENATE OF THE UNITED STATES
Wednesday, August 31, 1960

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD, my remarks on the forthcoming dedication of the new headquarters building for the National Association of Life Underwriters:

There being no objection, the address was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR THURMOND

The National Association of Life Underwriters will dedicate its new headquarters building at 1922 F Street NW., Washington, D.C., on September 11, 1960. The association was founded in 1890 by 105 courageous individuals to combat the evils then rampant in the life insurance business. From that time to the present day, it has devoted itself to the improvement of ethical practices in the life insurance business and to the education of the public concerning the advantages of life insurance. During the past year, under the leadership of a true southern gentleman from Columbia, S.C., President William S. Hendley, Jr., the membership reached an alltime high of more than 78,000 members. As an association composed solely of fieldmen, the national body has always led the way in agents' activities and has stood as the spokesman and adviser of the life underwriters of America. In addition, the association has always stood for the principles upon which this country was founded—such as thrift, industry, individual initiative, economy, and a sound fiscal policy. As one of the oldest trade associations in the United States I salute the National Association of Life Underwriters on its 70th year of achievement and welcome it to its new permanent home here in Washington.

Congressman Kowalski Cites Interdependence of Management and Labor

EXTENSION OF REMARKS
OF
HON. STANLEY A. PROKOP
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. PROKOP. Mr. Speaker, earlier this week, our Connecticut colleague, Hon. FRANK KOWALSKI, delivered a penetrating and thoughtful address to the 1960 Legislative, Political, and Educational Conference of the Connecticut State Labor Council, AFL–CIO, at Hartford, Conn.

The interdependence of management and labor is brought out strikingly by Mr. KOWALSKI in this address.

Under unanimous consent, I bring to the attention of the House the text of this address by Congressman KOWALSKI:

ADDRESS BY CONGRESSMAN FRANK KOWALSKI, 1960 LEGISLATIVE, POLITICAL, AND EDUCATIONAL CONVENTION, CONNECTICUT STATE LABOR COUNCIL, AFL–CIO, HARTFORD, AUGUST 29, 1960

My political philosophy is rooted in the firm belief that people—their needs and aspirations—are the most important concern of government at every level.

It is on the basis of this philosophy that I have made my decisions and cast my votes in Congress. My goal has been to represent, not any special group, but all the people of Connecticut.

In our complex modern society, no man, no group can be an island, aloof and apart from other men and other groups. Legislation that affects one segment of our economy necessarily affects other segments.

The impact of every law that affects business and industry, for instance, is felt to some degree by every worker.

I have worked hard for the working men and women of this country and my State in particular, because I believe in the great social programs which are so badly needed. But, I am also pleased to report to you, as representatives of organized labor in Connecticut, that I have worked hard for industry and business in our State. I have done this because I am convinced that by doing so, I was working in the best interest of our economy as a whole.

With this in mind, last year I initiated legislation to curb the tragic growth of interstate tax barriers. My bill, H.R. 7715, which was designed to stop the taxing of the income of industry in our State by other States, was the first piece of legislation in this field. The enactment of my original proposal into law helped not only Connecticut industry and business, but served to protect your jobs.

During the past 2 years, I have been visited by many representatives of business and industry from Connecticut seeking my help to secure defense contracts. Impressed by these visits, I found that during the years 1956, 1957, and 1958 primary defense contracts in our State dropped from $1¼ billion to $900 million and finally in 1958 to about $800 million. In other words, while the six Republican Congressmen and the two Republican Senators sat on their big fat hands during these years, Connecticut lost almost a half a billion dollars in defense orders. Oh, the military budget remained about the same, Connecticut defense orders went to other States. This loss of contracts cost the working men and women of Connecticut about 30,000 jobs. I am proud to report to you that I have been successful in helping Connecticut plants to secure defense contracts and by doing this I have helped our working people.

The problem of foreign competition has been of great concern to some of our industries in Connecticut. It's easy to criticize the administration on this point, but the solution of this problem is not readily apparent. There are many complicating factors. For example, in 1959 exports from the United States totaled $16.3 billion; our imports amounted to $15.2 billion. We exported $1.1 billion dollars worth of goods more than we imported. In Connecticut alone in 1956 (which are the latest figures I have) our exports amounted to $280 million and provided employment for 20,000 workers. We have to import if we want to export, but we can destroy our industries in the process.

Establishment of realistic import quotas is one approach to this problem. I have worked hard in this regard and am happy to report with considerable success. International Silver of Meriden, for example, was threatened with destruction by import of flatware from Japan. Quotas on flatware saved the situation.

In this connection, on the recommendation of Connecticut businessmen, I urged the Secretary of State to include in the U.S. delegation to GATT (world organization to study import-export arrangement next month in Europe) representatives of industry and labor. I consider foreign competition one of our most serious problems and pledge my time and energies to it.

I cite my concern over these problems of industry and business, and I have mentioned some of my activities in behalf of the business community, mainly to prove my point that ours is an interlocking economy, in which we all have an important stake.

I am frank to say that I am seriously concerned about the present state of our national economy. Despite the insistence of Madison Avenue publicists that Utopia is already here, there is much evidence to the contrary and there are ominous signs of even more alarming things to come.

During the recent presidential primary campaigns, many Americans were made uneasily aware, for the first time, of the plight of such areas as West Virginia. The President's veto of the depressed areas bill, a bill which I was proud to cosponsor, cannot hide the fact that many areas of our country are still plagued by unemployment and poverty.

There should be no complacency over the state of our economy when the Nation's steel industry is working at only 50 percent of capacity, when railroads such as the New Haven have become a national disgrace, when living costs have moved steadily upward despite solemn pledges to the contrary that we were given 8 years ago, and when millions of our fellow-Americans able and willing to work are without jobs.

These tragic facts are all the more calamitous when it is realized that the United States should be exerting every possible effort to meet the economic threat offered by the Soviet Union. There is evidence that the Soviet Union, working full blast, is today producing as much steel as we are.

Just last week, a Yale economist, Associate Professor Raymond Powell declared that the growth of the Soviet economy will continue to outstrip ours in the years ahead. He pointed out, as have other economic experts, that Russia's rate of industrial expansion in recent years has been more than double that of the United States.

The Soviet threat will grow still more dangerous unless America gets dynamic, aggressive leadership. A report to the Joint Economic Committee of Congress last year on the lag in the growth rate of our economy said flatly: "The blame must fall primarily upon the Federal Government."

Industry must be encouraged to grow and expand. Such encouragement can come only from strong leadership in the White House, a leadership which will reverse the trend whereby the rate of increase in our gross national product has been allowed to drop from the 4.6 percent a year of the Truman administration to the 2.4 percent of the Eisenhower years.

Nor is it our economy alone that requires new leadership. Great social problems have been neglected or given only cursory attention. The challenge which they pose must be met if America is to keep its rendezvous with destiny.

We like to think of the United States as first and foremost in every field; so it may startle you when I say that we are 50 years behind some European countries in social programs.

We need, for example, a Federal program of medical aid for our older citizens under the social security system. Just recently we who believe in such a program lost a battle in Congress, but I promise you we have not lost the war.

I shall fight harder than ever for a Forand-type program, and I am firmly convinced that this November the American people will declare themselves by their ballots as overwhelmingly in favor of such a program.

We need a Federal program of aid to education. There must be Federal assistance to the States, not only for school construction but for teachers' salaries.

We should have a Federal program of loans and scholarships, to insure that every qualified young American can have a full education. We must provide assistance to our colleges and universities so that they will not have to turn away qualified applicants.

We need a broadened program of housing and urban renewal, to remove the blight of slums from our cities and to assure the right of every family to a decent home.

We must build housing for our senior citizens at costs which will permit them to live in dignity on their reduced pensions and retirement incomes.

We need civil rights legislation that will guarantee to every American, in the North as well as in the South, the right to live his life in freedom, equality, and dignity. We need strong leadership from the White House to guarantee him his right to vote, the right of his children to attend first-class schools as first-class citizens, and the right of every member of his family to full citizenship, with all its benefits and privileges.

We need an end to punitive legislation—whether it be directed against labor or management. I have been condemned in some quarters because I voted all the way against the Landrum-Griffin bill which was adopted last year. I was right in my vote. I would vote the same way if the issue were before the Congress again today. I cannot in conscience support any legislation designed to punish one part of society because such punishment seems the popular thing at the moment.

We need new minimum wage legislation. But this is not enough. What about the older workers, those over 45 years of age who cannot get jobs because they are too old? What about the handicapped and those forced to work in jobs not covered by a minimum wage? Well, my views on these questions are crystal clear. It is my fixed opinion that there can be no discrimination because of age; that every man in this Nation is entitled to an opportunity for a job; that every American who is willing to work must be paid a living wage. The employer in our competitive society, however, will say, "But if I am to survive in business I am entitled to a dollar's worth of work for a dollar's pay." I agree, and so there must be provided appropriate incentives to encourage the employer to hire an older worker, to hire the handicapped, and to pay these workers a living wage. I suggest one incentive might be to give the employer a percentage rebate on his income tax for employing our older workers and our handicapped. If I am returned to Congress, I shall introduce such legislation.

I am also proud to tell you that I have recently introduced legislation which is designed to give our working men and women the right to employment with the company for which they work when a plant moves to a new location in the United States. I deplore the practice of some managers to refuse job priorities to their workers when the company moves to another State or new community. I promise that I shall fight for this legislation. Most important, we must bring management and labor together, under White House leadership, for study and discussion of mutual problems. One problem that should be receiving such attention at this time is that of automation, and its effects in the years ahead.

No, we have not reached utopia yet. Still facing us are problems which are vast and awesome. The new frontier which Senator JACK KENNEDY has laid out for us offers a tremendous challenge.

With strong leadership, and with unshakable determination, we can solve these problems. Let it not be said that when the challenge came, we did not meet it. Let us dedicate ourselves to new effort, for America and for mankind, toward a finer and a better life for all.

In a new and fighting leadership—inspiring each of us to work for economic strength and social justice—lies our hope for the future and all it can mean to America and the world.

Memorial Day Should Be on Monday

EXTENSION OF REMARKS
OF
HON. JOSEPH W. BARR
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. BARR. Mr. Speaker, today I introduced a resolution which would establish Memorial Day on the last Monday of May. This has been a pet project of one of our great Indianapolis citizens, Mr. C. Walter McCarty. "Mickey," as he is affectionately known in Indianapolis, has argued for many years that there is a tendency to regard Memorial Day as merely a holiday for recreation when it falls within the middle of the week. He also goes ahead to argue that if Memorial Day always fell on Monday, then patriotic and religious services could be observed on Sunday, and still give the average taxpayer an opportunity for recreation.

I agree with Mr. McCarty that the Nation would have an opportunity to return to the original meaning of Memorial Day if it were established that this holiday would always fall on Monday. This year I returned to Indianapolis for the Memorial Day services, and Memorial Day did fall on Monday. It seemed to me that the city and its patriotic and religious organizations did have a chance to slow down and think about the real significance of Memorial Day. The services were by far the most impressive that I have seen for many years.

We live in a busy and hard-working society. But surely all of us can take time at least once a year to think of the debt that we owe the men and women who have given their lives for this country.

Next week the Nation will celebrate Labor Day. Labor Day always falls on Monday, and the Nation has followed a policy of combining a weekend of recreation with the time for paying tribute to the men and women who work for a living. I certainly agree that this country should set aside a Monday to memorialize the men and women of our labor force. I also contend that an equal amount of respect should be paid to the people who died for this country.

Travel Abroad by the Foreign Affairs Committee

EXTENSION OF REMARKS
OF
HON. ROBERT B. CHIPERFIELD
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. CHIPERFIELD. Mr. Speaker, one of the most difficult jobs confronting the Committee on Foreign Affairs is keeping track of how well the mutual security program operates in order that any deficiences may be called to the attention of those responsible for the administration of the program for appropriate action and that when necessary legislative remedies may be provided.

The full development of information relating to mutual security operations is ordinarily accomplished during the course of hearings before the Foreign Affairs Committee or its subcommittees. Leads as to matters to be followed up during hearings are developed primarily from field observations made by members of the committee and the committee staff during visits to countries receiving U.S. assistance.

COMPLETION OF PLANS AND COST ESTIMATES

A case in point involves projects for the construction of factories, land development and other major undertakings which were observed by visitors to countries, particularly in Asia, to have become bogged down, that is, U.S. money had been set aside to finance such projects but even after the elapse of 2 or 3 years the actual construction work was not making visible progress. An analysis by the Foreign Affairs Committee developed the fact that the basic trouble was that at the time when U.S. officials and a foreign government agreed that a particular construction project should be carried out, U.S. funds were set aside—obligated—for that purpose. After the agreement the two Governments then undertook to make surveys,

draw plans, prepare detailed cost estimates, and the recipient country to enact necessary enabling legislation. Frequently the recipient country got cold feet with respect to the project after it had explored fully what it would cost and what the impact on local interests would be.

After exploring and analyzing this situation the Committee on Foreign Affairs took the initiative in writing into the Mutual Security Act section 517, "Completion of Plans and Cost Estimates, which requires that before mutual security funds can be obligated for a project, engineering and financial plans, together with detailed cost estimates, must have been completed.

INSPECTOR GENERAL AND COMPTROLLER

Another example of the results of observation by Foreign Affairs Committee members in countries where the mutual security program is in operation has been the establishment of the Office of the Inspector General and Comptroller. Members of the Foreign Affairs Committee have found in their contacts with U.S. officials who are engaged in carrying out mutual security operations in foreign countries that these officials are often very frank in pointing out deficiencies in the program. Rather than there being a conspiracy of silence to hide mistakes, there are usually a number of Americans connected with the program in every country who recognize waste and inefficiency when it exists and who are sincerely desirous of having it corrected. Frequently these people have in the past pointed out the shortcomings of program operations to their superiors. Unfortunately there has been difficulty in getting this type of information into the hands of top level officials where appropriate corrective action can be taken.

In order to provide a channel for getting such information to senior officials responsible for the mutual security program and to establish an organization capable of following up indications of waste and inefficiency the Foreign Affairs Committee last year took the initiative in establishing the Office of the Inspector General and Comptroller, reporting directly to the Under Secretary of State who has overall responsibility for the mutual security program.

If it had not been for field observation by committee members who found that criticisms of the program initiated by Americans employed in the program were not getting through to the proper officials in Washington, this action would not have been taken.

OVERPROGRAMING OF MILITARY ASSISTANCE FUNDS

Probably the most spectacular example of this kind occurred in 1956 when the Foreign Affairs Committee took the lead in reducing the Executive request for an appropriation for military assistance by $1 billion. There were loud cries that this action would wreck the program and that the committee was acting in a most irresponsible manner. The next year, however, the Pentagon reported that it had, as a result of its own reevaluation of the entire military assistance program, cut the program back not only by the $1 billion required by the Congress, but an additional $500 million.

This was a case where the observations of Foreign Affairs Committee members of the overprograming of military assistance preceded the recognition of the true facts by the top officials in the Pentagon.

Take a personal example. I have been a member of the Committee on Foreign Affairs for 22 years. For many years I have had a particular interest in Latin American affairs and was formerly Chairman of the Inter-American Affairs Subcommittee and am now ex-officio ranking Republican member of that subcommittee. During the period of the Communist-controlled government in Guatemala under Arbenz I was disturbed with the force of communism in this hemisphere. When Castella Armas' forces overthrew the Communist Government I advocated assistance to Guatemala to keep it in the free world column.

In the fall of 1957 I was selected to undertake a study mission to several countries in Latin America to determine the strength and potentiality of communism in that part of the world and also to determine if we were spending too much money for military assistance and not enough for economic purposes in that area.

I selected Franklin J. Schupp, staff consultant on the Committee on Foreign Affairs and who is also consultant for the Inter-American Affairs Subcommittee, to accompany me on this mission. Mr. Schupp has had considerable experience—having been a member of the U.S. Intelligence Division in that area during World War II. He speaks Spanish fluently.

Through our efforts, especially because of Mr. Schupp's experience and contacts, as soon as we arrived in Venezuela we immediately began to obtain valuable information as to Communist activities in South and Central America. As we went further north we found serious trouble brewing. We relayed all this information not only to the chairman of the Foreign Affairs Committee but also to the proper officials in Washington.

Just recently I was interviewed concerning this trip by a writer whose sole purpose was to smear Members of Congress who had traveled abroad. Because of the secret nature of the information we obtained I did not mention this phase of the trip to him or tell him who we saw or what we did. Nor under the circumstances did I feel obligated to discuss the second purpose of our trip or furnish him a personal travelog as to where we stayed or what we did, etc.; nor did I tell him that on this trip I spent considerably more than $800 of my own money.

As a result he wrote a very critical article which implied we were not justified in making the trip and it had no official purpose. I answered these unwarranted charges and other erroneous statements in the press the day after his article appeared.

As to the second objective of our trip we found very serious criticism of the large amounts of money we were spending for military purposes. It was felt that in some instances it was not being used for internal security but was being used frequently to keep dictators in power.

We also found there was a great need for more economic aid in such fields as health, sanitation, education, and agriculture.

All this we reported back to our chairman and discussed our findings with members of the Subcommittee on Inter-American activities. We found general agreement in that committee as to our findings.

Later, under the very able leadership of the chairman of the subcommittee, ARMISTEAD SELDEN, JR., a report was issued recommending less military spending. Military expenditures in the area have been limited and there is now pending a bill for $600 million for economic loans for this area which may be passed by the Congress before we adjourn.

From my personal experience I have found that it is of the utmost importance when we have the responsibility for the mutual security program that we follow through and find out just how the money is being expended.

The Foreign Affairs Committee has set up a subcommittee for the specific purpose of investigating and reviewing the mutual security program. I am a member of that subcommittee.

The Foreign Affairs Committee is one of the three committees that has been authorized by the Congress to request from the House Administration Committee money for this purpose.

It is my judgment these investigations have saved hundreds of millions of dollars to the taxpayers, which is a thousandfold more than the expenses incurred by Members on these trips.

Voting Records of South Dakota Congressman on REA Issues

EXTENSION OF REMARKS

OF

HON. GEORGE S. McGOVERN

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. McGOVERN. Mr. Speaker, a few months ago, the gentleman from South Dakota [Mr. BERRY] placed in the CONGRESSIONAL RECORD the voting tabulations of several organizations that score the voting records of Members of Congress. Mr. BERRY'S insertion covered his and my voting record as tabulated by these certain organizations.

Since the electrification of farms and ranches in South Dakota is very vital to the people of our State, I believe that it would be helpful to have printed in the CONGRESSIONAL RECORD the evaluation of votes affecting REA that have been cast by members of the South Dakota delegation. The National Rural Electric Cooperative Association is a nonpartisan highly respected organization with

which some of our most distinguished South Dakota REA leaders are affiliated. This organization with the authorization of its board of directors compiles and evaluates the voting record of all Members of Congress so that interested citizens may know whether their Congressmen are voting for or against the best interests of rural electrification.

Below is the compilation of the National Rural Electric Cooperative Association for Members of Congress from South Dakota who are seeking election this year:

	Total REA votes	Favorable REA votes	Unfavorable or missed REA votes	Percentage of favorable REA votes
Congressman BERRY (elected 1950)	37	15	22	40
Congressman MCGOVERN (elected 1956)	18	18	0	100
Senator MUNDT (elected Senate 1948)	48	17	31	35

Let's Keep the Record Straight on the Saline Water Program

EXTENSION OF REMARKS
OF
HON. BEN F. JENSEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. JENSEN. Mr. Speaker, on Thursday, August 25, 1960, the senior Montana Member in the other body took issue with the plank in the 1960 Republican platform which pledged "continued Federal support for Republican initiated research and demonstration projects which will supply fresh water from salt and brackish water resources."

He objected to the claim that these research and demonstration projects had been Republican initiated, stating:

The saline and brackish water program was first proposed by the Democratic Senator JOSEPH C. O'MAHONEY on March 19, 1949.

In connection with this saline water program the 1960 Democratic platform has this to say:

We will support and intensify the research effort to find an economical way to convert salt and brackish water. The Republicans discouraged this research, which holds untold possibilities for this whole world.

The reference to Republican discouragement of this saline water research is completely false. An even more flagrant untruth was included in the 1956 Democratic platform, as follows:

The program of obtaining a large new source of fresh water supply from salt water has begun by the Democratic Party but has been allowed to lapse by the Eisenhower Republican administration. It will be resumed and accelerated.

As that great Democrat Al Smith often said: "Let's look at the record."

As to who first proposed the saline water program, the CONGRESSIONAL RECORD shows that while the senior Wyoming Member of the other body may have been the first to introduce a saline water bill in the other body, he was antedated by Republicans, Fletcher, Phillips, and McDonough in the House of Representatives. Mr. Fletcher introduced a saline water bill, H.R. 5777, on March 9, 1948; Mr. MCDONOUGH introduced a saline water bill, H.R. 6031, on March 29, 1948; and H.R. 3650 on March 21, 1949; Mr. Phillips introduced a saline water bill, H.R. 265, on January 3, 1949. No affirmative action was taken by the Congress on any saline water bill in the Democratic controlled 81st Congress.

In the 82d Congress, also Democratic controlled, the first saline water bill to be introduced was H.R. 6 by Mr. Phillips, a Republican, on January 3, 1951. Other saline water bills introduced in that session were H.R. 7 by McKinnon, of California, a Democrat; S. 5 by the senior Wyoming Member of the other body on January 8, 1951, H.R. 6578, a so-called clean committee bill by Mr. ENGLE on February 14, 1952. Mr. Phillips and Mr. McKinnon also introduced revised saline water bills, H.R. 6704 and H.R. 7185, respectively. House hearings were held on these five House bills. The saline water bill, H.R. 6578, was passed by the House on June 2, 1952.

When the saline water bill was brought up in the other body on June 21, 1952, the House bill, H.R. 6578, was made the order of business in lieu of S. 5, which was indefinitely postponed. A South Dakota Republican Member of the other body moved that all after the enacting clause be stricken from H.R. 6578 and his amendment or bill be inserted. The other body approved the Case amendment and the House accepted the amendment. The bill was signed into law on July 3, 1952.

It can be seen from this record that the initial saline-water authorization bill as passed by the Congress was a bill written and introduced in the other body by a Republican.

Of course, authorization of a saline-water program means nothing if funds are not provided to implement it. Let us again look at the record to see who was responsible for obtaining the initial funds to implement or start the saline-water program.

Three and a half days before adjournment of the 82d Congress, Department of Interior representatives appeared before the Senate Appropriations Committee of the other body with a request that $400,000 be allowed to initiate the saline-water program. The Democratic chairman of that committee refused to even hear testimony on the matter. Here is what he said:

I cannot imagine anything more important than being able to take the salt out of ocean water. Of course, it is important. It requires a great deal more time than we have to consider. That is my opinion. We cannot do that in the last 3½ days.

And again:

Under those circumstances, you should give our committee a little more than 3½ days. We will hear you in January.

When the supplemental appropriation bill came up on the Senate floor on July 3, 1952, it was the same South Dakota Republican Member of the other body that presented and obtained approval of an amendment providing for $125,000 to initiate the saline water program.

The record also shows that when the Case proposal was made on July 3, 1952, the senior Wyoming Member of the other body, who was given unwarranted credit by the senior Montana Member of the other body for having been the first to introduce a saline water bill, actually opposed the granting of the initial funds to initiate the saline water program—saying that it should go over to the new Congress in January 1953.

Let us look at the record with regard to the Democratic claim in their 1956 platform that the saline water program has been allowed to lapse by the Eisenhower Republican administration, and in their 1960 platform, that Republicans discouraged this research.

Here is the record of the funds requested, appropriated, and obligated for the saline water program since its inception in fiscal year 1953:

SALINE WATER RESEARCH AND DEVELOPMENT

	Budget request	Appropriated	Obligated
Fiscal year 1953	$400,000	[1] $125,000	$172,548
Fiscal year 1953 supplemental	50,000	[2] 50,000	
Fiscal year 1954	400,000	400,000	398,445
Fiscal year 1955	400,000	400,000	398,258
Fiscal year 1956	600,000	600,000	596,364
Fiscal year 1957	600,000	[3] 550,000	509,963
Fiscal year 1958	1,159,000	[3] 725,000	724,986
Fiscal year 1959	1,369,400	[3] 1,182,960	[4] 1,241,968
Fiscal year 1960	1,355,000	1,755,000	1,714,040
Fiscal year 1961	1,355,000	1,355,000	
Fiscal year 1961 supplemental	500,000	400,000	

DEMONSTRATION PLANT PROGRAM

Fiscal year 1960	300,000	300,000	1,583,932
Do	1,550,000	1,550,000	
Fiscal year 1961	2,040,000	2,040,000	

[1] Of the $125,000 appropriated by the Democratic controlled 82d Cong. at the insistence of Republican Senator Case, only $5,755.45 was obligated as of Dec. 31, 1952, all for administrative purposes. The first research contracts, totaling $35,000, were recorded as obligations on Jan. 31, 1953, after the Eisenhower administration took office.

[2] Requested and approved in 1953 under the Eisenhower administration.

[3] Appropriations shown reflect reduction of Eisenhower budget request by Democratic-controlled Congress.

[4] Includes $63,000 of reappropriated unobligated balances of prior years.

It is apparent from the above tabulation that less than $10,000 was obligated for the saline water program under the Democratic administration and it was all for administrative expenses. The first obligation for the actual research and development phase of the program did not take place until January 31, 1953, after the Eisenhower administration had taken office.

It is also of note that in 1957, 1958, and 1959, the Democratic controlled Congresses reduced the appropriation for the saline water research and development program below the budget request of the Eisenhower administration. Certainly it will be clear, to anyone who reads the record, that the Democratic performance on the saline water program is completely at variance with their platform statements.

Mr. Speaker, I have been a member of the Subcommittee for Interior Department Appropriations for the past 18 years. As an ardent supporter of this saline water program from its inception, I felt it necessary during the House Appropriations Committee hearings on the Interior Department appropriation bill for fiscal year 1958 to call attention to the lack of truth in the 1956 Democratic platform reference to the saline water program. It just was not true that the program had been allowed to lapse under the Eisenhower administration, in fact the exact opposite was true, and I felt the record should be cleared. The people are entitled to the truth when these false claims are made by the Democrats. That is why I have here again spoken out on the subject.

The people are entitled to have the facts.

Twentieth Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. WILLIAM E. MILLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. MILLER of New York. Mr. Speaker, the record of Soviet conquest and suppression is a long one and the freedom-loving nations which have been ground to pulp under the spiked heel of Russian imperialism are numerous.

It is paradoxical in this year of 1960, while the global ambitions of the Communists take on renewed vigor, that the subjugated peoples within the Russian periphery outnumber their masters and yet are unable to obtain the freedom for which they have struggled so tirelessly.

The sadistic slaughters of Hungary, Poland, and East Germany still are fresh in the world's mind, but the rape of those other nations who fell before the Red onslaught in earlier conquests somehow have been obscured by the three subsequent wars involving troops of most of the civilized and uncivilized world. Many of us are inclined to forget that long before these Soviet outrages shocked the West, millions of other peoples had sacrificed their lives and liberties to this relentless and barbaric conspiracy.

We sometimes overlook the fact that many nations were engulfed by the Soviet hordes so long ago that their names now are unfamiliar. Few today recall that Kirghiz, Kazakh, Tadzhik, Turkmen, Uzbek, Azerbaijan, Idel-Ural, Cosackia, and Byelorussia are formerly free countries whose 63 million people now are enslaved by communism.

The names of Estonia, Latvia, and Lithuania are more familiar because they were comparatively recent conquests and we know of Georgia because it was the birthplace of Joseph Stalin.

But the largest of all these captive nations, Ukrainia, is thought of by most Americans only as a historic part of Russia itself. The 42 million survivors of Russia's genocidal decimation of the Ukraine today constitute the largest population bloc among nations engulfed by the Soviets and is approximately half as large as that of Russia itself.

This fall, Mr. Speaker, the Ukrainian Congress Committee of America, which is made up of Americans of Ukrainian descent or birth, will observe its 20th anniversary and I think it fitting that we and the rest of the Nation pay tribute to these people who have suffered so much and so long under communistic oppression.

Few peoples in history have kept the spirit of independence alive so long under such adverse conditions as the Ukrainians. As most of us here are aware, the present lord of the Kremlin, who denounced our President and demanded an apology from him for the U–2 flights, reached his lofty position as head of the Communist world by literally walking over the bodies of Ukrainians he had slaughtered.

I shall not describe here the countless murders carried out on Nikita Khrushchev's orders in the Ukraine, but shall say that hundreds of thousands of men, women, and children were wiped out and that parks and playgrounds have been built by the Russians atop the mass graves in which many of them were buried.

Despite the enormity of the persecution they have suffered at Soviet hands—Ukrainian people at home and abroad consistently keep alive the flame of freedom with which they someday hope to touch off the fire of liberation.

Those Ukrainians who have been fortunate enough to escape from behind the Iron Curtain and settle in this country as well as those of Ukrainian ancestry who were born here are dedicated to this exacting battle for independence.

The Ukrainian Congress Committee, in spearheading this effort in America, has set an example unsurpassed by any other nationalistic group.

The congress is primarily an educational medium and disseminates information about communism. Most of its material is gathered from those among its membership who actually have witnessed these Russian atrocities and the development of communism.

Ukrainian Congress Committee

EXTENSION OF REMARKS
OF
HON. ANCHER NELSEN
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. NELSEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to bring to the attention of the American people the 20th anniversary of the Ukrainian Congress Committee of America. On this occasion I wish to felicitate its chairman, Dr. Lev E. Dobriansky; its policy board, among whom is Prof. A. A. Granovsky, of the University of Minnesota; and its membership of 2½ million Americans of Ukrainian ancestry dedicated to the never-ceasing struggle against Soviet despotism.

Their efforts have not been solely aimed at the liberation of their beloved Ukraine, a land of a rich and renowned culture, a land of great fertility, of abundant mineral resources, and fast-flowing rivers. The efforts of the committee have also encompassed the painstaking exposition of the facts of Soviet brutality in all the dozen non-Russian nations caught in the web of Russian imperialism.

Through the 20 years of its history, the Ukrainian Congress Committee of America has nurtured hope in the breasts of those afflicted by Communist persecution. It has given solace and encouragement to those with loved ones in those unfortunate areas. And it has shown the American people the value to our national security of these captive nations and how their cause and their fight is also our cause and our fight.

The tasks of the committee have been well done, the spirit imbuing the committee a patriotic one. One can sincerely wish for the successful continuation and speedy accomplishment of its objectives.

Congressman Gilbert's Annual Report

EXTENSION OF REMARKS
OF
HON. JACOB H. GILBERT
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. GILBERT. Mr. Speaker, this is my first report to the people of the 23d District of New York, whom I have the honor to represent in the Congress of the United States, as I took office as their Representative on March 11, 1960. I wish to tell them of my efforts in connection with legislation beneficial to them, as well as to sum up for them the work of the 2d session of the 86th Congress.

The Democratic Party has always had the best interests of the people at heart; urgent needs of the vast majority of our citizens have been recognized and understood, and programs formulated and fought for, to help them and to correct injustices. The Republican Party has not changed; the favored few are still the chief concern of the Republicans. The President's promises regarding civil rights, housing, Federal aid to education, aid for our elder citizens, to name a few, remain unfulfilled. I am certain that under a Democratic President, who would exert real leadership, we shall be able to show a greater record of achievement in behalf of the people of our country.

Although much has been accomplished by the 86th Congress, much remains undone; the progressive and liberal program, which most of my Democratic colleagues and I favored, was violently opposed in every instance by the coalition of southern Democrats and Republicans, and many of the bills passed fell far short of the goals that had been

set. The threat of a Presidential veto was ever present when bills for the general welfare of the people were considered. When we consider these obstacles, and the difficulties which had to be overcome, the Democratic record in Congress is one of hard work and achievement, although I had hoped for greater results.

CIVIL RIGHTS

I arranged to be specially sworn in as a Member of Congress immediately after election, and before my certificate of election was received in Washington, as the bitter battle on civil rights was being waged. I was anxious to take part in the debate and to have the opportunity to cast my vote in favor of a strong civil rights bill. At the time the bill was finally passed, I stated:

To those of us who will not rest until every vestige of discrimination has been wiped out, the bill as passed is a grave disappointment, and we feel many regrets over the lost provisions of the bill. At best, we have passed only moderate legislation; it is merely a short step forward, and a great distance still lies ahead toward our goal of complete equality for all.

Some satisfaction can be felt in our victory for equality in one of the fundamentals of our democracy—the voting booth. The voting referee system withstood every major assault, and if properly enforced, it promises to give the Negro free access to the polls for the first time since the days of the Reconstruction.

Powerful opposition prevented enactment of many provisions which would have been extremely helpful to those now subjected to discriminatory practices; one of these provisions included FEPC principles relating to Government contracts.

Our joy in the victory we have achieved for civil rights today is overshadowed by our losses, but we have reason to believe that the day is not too far distant when all our citizens will enjoy true equality. I, for one, pledge my untiring efforts for the benefit of all those who suffer under the scourge of discrimination.

On the day I took office, I introduced bills to prohibit discrimination in employment, to withhold Federal aid from schools which discriminate between students by reason of their race, color, religion, ancestry; an anti-poll tax bill; an antilynching bill; a bill to prohibit Federal funds to be used in housing where discrimination exists; to prohibit segregation of passengers because of race or color; to prohibit certain acts involving importation, transportation of explosives with intent to destroy or damage communal buildings.

I shall continue to fight for effective civil rights legislation until all the evils of discrimination based on race, color, religion, which still exist in our Nation, have been completely destroyed.

PAY RAISE FOR POSTAL AND CLASSIFIED FEDERAL EMPLOYEES

As a member of the House Committee on Post Office and Civil Service, I had the opportunity to work for the highest possible pay increase for postal and classified employees. I maintained that an increase of at least 9 percent would have to be granted if the employees were to be given adequate help. They had been suffering real hardships for years; they were struggling under the burdens of ever-increasing living costs and high taxes. I was happy when our committee took favorable action on the bill providing for the 9-percent increase.

Thereafter, when it appeared that there would be an unconscionable delay in bringing the pay increase bill before the House for action, a petition was placed on the Speaker's desk to discharge the Committee on Rules from further consideration of the bill. Although I was engaged in a serious primary contest in my congressional district, I made a special trip from New York to Washington for the sole purpose of signing the discharge petition, and then returned immediately to New York to continue with my arduous campaign schedule. I felt it was imperative for Congress immediately to take favorable action in behalf of the employees.

Again, because of strenuous opposition and the threat of a Presidential veto, a compromise was necessary, and an increase of 7½ percent was agreed upon. I was compelled to go along with the compromise figure, for this was better than nothing. The bill passed. The President, as usual impervious to the sad plight of the workers, vetoed the measure—and I was happy to vote to override the veto. Those of us who have the welfare of the workers at heart were successful, and had the strength to override, so that our postal and Federal employees were assured of a pay raise which would to some extent alleviate their hardships.

MEDICAL CARE FOR THE NEEDY AGED

Until the Congress has the benefit of strong leadership, which would be shown by a Democratic President, there will be no comprehensive, adequate plan to meet the medical needs of our senior citizens. Medical and hospital care for the elderly must eventually be devised as part of the time-tested social security insurance system.

I am grieviously disappointed in the bill which was finally passed. This is a "pauper's oath" type of medical care. Responsibility is placed on the States and this means that the entire program will be unwieldy and totally inadequate. It is believed that many States will adopt the programs, and equally, many will not. There is no guarantee that our elderly citizens will get any help at all in many instances.

Several excellent plans were proposed, but defeated, and it was discouraging to have to accept a plan which, while it will do no harm, will not do much good, and falls far short of my expectations.

The Forand bill would have provided the necessary assistance, and I introduced a bill identical with the Forand bill, in the House, to indicate my strong support.

I shall continue to give of my best efforts to the end that the situation will be corrected and our senior citizens given adequate help, as soon as it is possible to secure passage of a good, effective medical aid bill.

ADDITIONAL IMPORTANT LEGISLATION

I am in favor of increasing the minimum wage to at least $1.25 and extending coverage to millions who are not protected under the present law. I introduced legislation to effect this purpose. Unfortunately, Congress did not take final action on this legislation. I confidently look forward to its passage early in 1961.

The housing shortage remains acute and our efforts to pass effective housing legislation this year have proved futile. Great numbers of Americans still merely exist in substandard dwellings; those in the low and middle income brackets must rely on the Federal Government for help. The present program covering public housing units must be greatly expanded also to care for elderly persons and single persons. The Republicans have scuttled the effective public housing program as originally provided for by the Democrats.

I am keenly disappointed that we have been unsuccessful in our efforts to secure final passage of the vitally needed Federal aid to education and school construction bill. It is deplorable that we have ignored the sad plight of our public school system. The youth of our Nation are the future of our Nation. The shortage of at least 140,000 classrooms throughout the United States and the great shortage of teachers combine to cheat 10 million children of the school facilities and education which are their right.

I introduced a bill to provide for Federal grants and contracts to carry out projects with respect to techniques and practices for the prevention, diminution, and control of juvenile delinquency, and for the training of personnel. Juvenile delinquency has reached terrifying proportions throughout our Nation. Our young people are our hope in the years ahead; on them will fall the burden of the preservation of our democracy. It is incumbent upon the Federal Government to recognize its duty and obligation to our young people; investments of necessary funds, time, and effort must be made now to help our youth; there is a crying need for more research on causes and prevention of delinquency. This Congress has also been denied the opportunity to vote on this necessary legislation.

Our immigration laws must be liberalized. I introduced a bill to supersede the present law, known as the McCarran-Walter Act, for it is discriminatory, unfair and undemocratic.

I also introduced numerous bills to liberalize present social security laws; to lighten the taxload; to repeal excise taxes; to assist our veterans; to provide for retirement of Federal employees after 30 years service at full annuity.

Adequate defense of our Nation remains one of our primary concerns and its attendant problems require much of our time and effort in the Congress. To maintain our leadership in this atomic and space age challenges our best efforts and study, and the consideration of these programs is time-consuming. Our mutual security program has my support. Under this law, foreign aid in the military, technical cooperation, and economic brackets is extended to many countries throughout the world, including the new nations of Ghana, Libya, Nigeria, and Israel, to name a few.

I am sorry that space limitations prevent my discussing in detail all legislation and subjects important to my constituents. I trust that this report will explain, to some degree, what I have

tried to accomplish and what progress has been made by the 86th Congress. I am proud to be a Member of this great legislative body and assure my constituents that I shall continue to work for their best interests.

BRONX CONGRESSIONAL OFFICE

I maintain a congressional office at 1004 East 163d Street, telephone Ludlow 9–7280, which is open daily. I invite my constituents to call there and discuss any requests or problems they may have. I am pleased to have them write me at my Washington office and give me the benefit of their views regarding legislation. A warm welcome awaits those who call at my Washington office, 1723 New House Office Building, when they visit the Capitol.

Efforts To Obtain the Support of President Eisenhower and Vice President Nixon for the Preservation of the Historic Buildings Near the White House Were Without Success, Citizens Committee Declares; Senator Kennedy's Bill Would Save Buildings for Cultural Purposes

---

EXTENSION OF REMARKS

OF

HON. HARRIS B. McDOWELL, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. McDOWELL. Mr. Speaker, some 30 national and local organizations representing millions of Americans rallied to save the historic buildings near the White House: the Dolly Madison house, the Benjamin Tayloe house, and the great Belasco Theater which had very deep connections with America's cultural life.

Among the organizations fighting to save these great buildings was the General Federation of Women's Clubs with 5 million members; the National Federation of Music Clubs with 600,000 members; the National Music Council with 1,228,000 members; the American Federation of Musicians with 270,000 members; and the Central Labor Council, AFL–CIO, of Greater Washington. The support of the 15 million member AFL–CIO for the preservation of these historic buildings is assured because of the strong support given to this cause by the American Federation of Musicians and the Central Labor Council, AFL–CIO.

On July 13, 1960 the Citizens Committee To Save Lafayette Square in the Nation's Capital reported to one and all that efforts to obtain the support of President Eisenhower and Vice President NIXON for the preservation of these historic buildings were without success.

The Committee declared:

Efforts to obtain the support of President Eisenhower for the preservation legislation were unavailing.

It would appear that the only remaining hope is intervention by a new administration next year. There is indication that the General Services Administration will not be ready to start razing the buildings for perhaps 2 years, giving us time for an all-out effort next year with the new administration.

Senator JOHN F. KENNEDY introduced a splendid bill, S. 3280, on March 24, 1960, to preserve and maintain the Dolly Madison house, the Benjamin Tayloe house, and the Belasco Theater for historical, cultural, and civic purposes.

In introducing this bill Senator KENNEDY said:

There is pending before the Public Works Committee a plan to locate the Court of Claims in Lafayette Square. This means that many of the historic buildings now fronting that square will be torn down. The Dolly Madison house, the Benjamin Tayloe house, and the Belasco Theater have long served as an inspiration to generations of Americans who have visited their Capital City. Certainly, before any irrevocable action is taken to destroy these buildings to provide a site for a courthouse, other sites should be investigated.

New York City's famed Carnegie Hall was recently saved through the efforts of a committee of distinguished citizens who were able to interest Mayor Robert Wagner and Gov. Nelson Rockefeller in preserving this great cultural institution.

In Chicago the famed Garrick Theater, built in 1892, the same decade the Belasco Theater and Carnegie Hall were built, was saved recently through the efforts of a citizens committee headed by Mayor Richard J. Daley, of Chicago. Involved in the efforts of Chicago citizens to save for cultural purposes one of the city's great theaters was a court decision. Judge Donald S. McKinlay decided that private owners of a property such as the Garrick Theater can be forbidden to destroy such property on grounds of esthetics. In support of his decision, Judge McKinlay cited a 1954 Supreme Court decision which unanimously upheld the power of the District of Columbia to include in a slum-clearance project the destruction of a department store that was in no way a slum building. The Supreme Court held that District of Columbia authorities had the right to decide that the District of Columbia should be beautiful as well as sanitary and could consider artistic values in deciding what should be destroyed and what should be saved.

I include as part of my remarks the July 13, 1960, report of the Citizens Committee To Save Lafayette Square in the Nation's Capital; the text of a broadcast by the distinguished concert manager, Patrick Hayes; and the text of S. 3280, introduced by Senator JOHN F. KENNEDY.

The material follows:

1960 REPORT OF THE CITIZENS COMMITTEE TO SAVE LAFAYETTE SQUARE IN THE NATION'S CAPITAL

Belatedly, we wish to report on the status of the fight to save the old buildings on the east side of Lafayette Square.

Some 30 national and local organizations rallied to the cause in cooperation with the citizens committee.

The first effort to obtain hearings before the Senate Public Buildings and Grounds Subcommittee, before which legislation was pending, succeeded in that hearings were granted and held on May 23.

Proponents—supporters of the pending bills to save the buildings and to restore the Belasco—made a completely overwhelming argument for the record. The only substantial opposition came from Marvin Jones, chief judge of the Court of Claims, and Eugene Worley, chief judge of the Court of Customs and Patent Appeals, who argued that the site was needed for a building for them for convenience and that to switch to another site would cause too great a delay in construction of a needed court building.

At the hearings and in the behind-the-scenes maneuverings, they were greatly assisted by Judge Jack Martin, Court of Customs and Patent Appeals, who is a former administrative assistant of President Eisenhower (and the late Senator Taft) in charge of congressional liaison.

The opponents of the preservation legislation were taken by surprise when General Services Administration Franklin Floete, responding to the new pressure which had been built up in opposition to razing the east side of the square, testified that there was another, and perhaps better, site for the courthouse.

However, despite Mr. Floete's surprise move to accommodate our desires and despite the very convincing showing at the hearings, the Senate Public Works Committee voted to authorize the courthouse construction on Lafayette Square. Only when their vote was announced after a secret meeting was it revealed that Mr. Floete had been secretly forced to produce still another prospectus, putting the courthouse back on Lafayette Square.

It was clear that the lobbying effort of two or three of the opponents of the preservation legislation, namely the judges and their friends in Congress and in the administration, had succeeded in reversing Mr. Floete's recommendation and in forcing approval of the site for Judge Jones.

Efforts to obtain the support of President Eisenhower and Vice President NIXON for the preservation legislation were unavailing.

It would appear that the only remaining hope is intervention by a new administration next year. There is indication that the General Services Administration will not be ready to start razing the buildings for perhaps 2 years, giving us time for an all-out effort next year with the new administration.

Recommendation: It is urged that every effort be made following the inauguration in January to get the ear and the understanding of the new President. If he wishes, he can refuse to spend the money authorized for the new courthouse which the congressional committees have approved.

Acknowledgement: The committee and its officers wish to acknowledge with deep gratitude the highly intelligent and dedicated effort which has been made by people too numerous to list in the effort to save Lafayette Square. Only an invincible combination of behind-the-scenes politics and official apathy have robbed you of success to date. Certainly the absence of success is no measure of the devotion and effort brought to this problem by the many supporters of this committee.

The committee also wishes to thank and to acknowledge the help of Senators JOHN SHERMAN COOPER, EDMUND S. MUSKIE, EUGENE J. MCCARTHY, and ERNEST GRUENING, and of Congressmen FRANK THOMPSON and HARRIS B. MCDOWELL, JR., who made every possible effort in our behalf before and after the Public Works Committee's vote. Thanks go also to the Washington Post and Times Herald and the Evening Star for their fine editorials and their numerous news columns which supported us completely.

CARL LEVIN,
Chairman.
HOBART A. SPALDING,
Vice Chairman.
MARIE A. HURLEY,
Secretary.

BROADCAST BY PATRICK HAYES, WGMS, AUGUST 28, 1960, WOODWARD & LOTHROP

Good afternoon. They did it out in Chicago. They did the unexpected and the wonderful. They saved an old empty building from being torn down for esthetic reasons alone, because it is an historic landmark, a theater, rich in memories, still attractive to the eye. The theater and building are known as the Garrick, built in 1892, 1 year after Carnegie Hall was built. It is a combination office building and theater, and in the heyday of show business it was one of Chicago's leading legitimate theaters. In recent years the theater was used only for motion pictures, and not too successfully, and the offices upstairs were occupied by tenants.

The march of progress in Chicago has produced a master plan for a huge downtown center which will involve tearing down a few blocks of old buildings, some of them tremendous in size, to make way for the new and even bigger buildings. The Garrick is just across the street from one side of this proposed complex of buildings, and its real estate and parking potential are obvious—tear down the Garrick, build a new and bigger building, including substantial parking facilities. This is the modern, downtown, march of progress.

The owners of the Garrick applied some time ago for a wrecking permit from the city of Chicago. A citizens committee, headed by Mayor Richard J. Daley himself, intervened. The permit was refused by the city. The owners took the matter to court, seeking an action that would force the city of Chicago to grant the wrecking permit. This is where matters stood a few weeks ago when we commented on this Garrick situation, bearing in mind always the Belasco situation here in Washington. Last Tuesday Judge Donald S. McKinlay gave his decision, after a personal inspection of the premises and long reflection on the law involved. He decided that an architectural landmark can be saved, that a wrecking permit can be denied, that owners of a property such as the Garrick can be forbidden to destroy it even though they own it—and esthetic reasons alone suffice as a basis for his decision. The Garrick had been declared an architectural landmark in 1958 by the appropriate city commission.

There is a lot involved here, which might affect similar situations across the country. Judge McKinlay pointed out that what he was doing was essentially a new interpretation of a municipality's police power. He said that a clear legal right to a wrecking permit is not an absolute right when the public esthetic interest is involved. I think we should all pause here and say "Hallelujah." Judge McKinlay says that the public esthetic interest can come first in the march of progress.

In support of his decision, Judge McKinlay cited a 1954 Supreme Court decision which unanimously upheld the power of the District of Columbia to include in a slum clearance project the destruction of a department store that was in no way a slum building. He said that the Supreme Court held that District authorities had the right to decide that the District should be beautiful as well as sanitary and could consider artistic values in deciding what should be taken and what left. Are you listening, members of the Citizens' Committee To Save Lafayette Square? A judge out in Chicago is giving you the answers, from a case right here in the District of Columbia, on which he based his decision to save the Garrick in Chicago.

The Garrick case deals with the same values, artistic and esthetic values, but differs in that it upholds the power of a city to deny a private owner the right to destroy his own property. Judge McKinlay was frank to say he knew of no similar case. Lawyers for the owners promptly said that the decision would be appealed to the Illinois Supreme Court. That decision will be one to watch for. Meanwhile, it is more than encouraging to realize that there are a few Athenians among us in positions of influence. To return to the Chicago story of the Garrick Theater, and bearing in mind that the Belasco Theater here on Lafayette Square is in jeopardy, it is ironic to note that in Chicago a court saved the Garrick, while here a courthouse may lose us the Belasco.

S. 3280, INTRODUCED BY SENATOR JOHN F. KENNEDY

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Public Buildings Act of 1959 is amended by adding at the end thereof the following new sections:

"SEC. 18. The Administrator is authorized to conduct a joint study together with the National Capital Planning Commission and the Commission of Fine Arts, for the purpose of determining the feasibility of constructing, near the Supreme Court of the United States, adequate facilities to house the Court of Claims, the Court of Customs and Patent Appeals, and the Tax Court of the United States. As soon as practicable after the date of enactment of this section, the Administrator shall submit a report on the results of such study, together with such recommendations as he may deem advisable, to the Committees on Public Works of the Senate and House of Representatives.

"SEC. 19. In keeping with the national policy of protecting and preserving historic American buildings and sites for the inspiration and benefit of the people of the United States, the Administrator shall preserve and maintain the Dolly Madison House, the Benjamin Tayloe House, and the Belasco Theater, on Lafayette Square in the District of Columbia, for historical, cultural, and civic purposes. The Administrator is authorized and directed to restore the Belasco Theater to a condition at least equal to its condition at the time it was acquired by the Federal Government. The National Park Service, and the District of Columbia Recreation Department, shall advise and assist the Administrator in the restoration and management of the Belasco Theater as a municipal art center."

Quaboag Settlement Towns Observe 300th Anniversary

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. PHILBIN. Mr. Speaker, of all congressional districts represented in the 86th Congress the Third Congressional District of Massachusetts, which I have the great honor and privilege to represent, will have achieved a most impressive record of noteworthy anniversary observances by several communities within its borders, a record that cannot be surpassed or even approached by other districts which do not possess the rich historic associations of these charming Massachusetts communities.

During the first and second sessions of this Congress, now in its closing days, it has been my good fortune to direct the attention of the House to historic anniversary observances in my district, observances of prominent dates going back to the very beginnings of this great land. A little less than a year ago in this House, I lauded the outstanding communities of Princeton and Westminster on the occasion of their 200th anniversary celebrations.

Earlier this year, the House took official recognition of the 300th anniversary of the city of Marlboro, another community in my district, by adopting unanimously my resolution, House Resolution 535, extending congratulations and expressing the appreciation of the Federal Government to the citizens of Marlboro for their splendid services to the Nation during the past 300 years.

A few days before the recess of Congress, early in July, it was again my good fortune to bring to the attention of the House another noteworthy anniversary in my district—that marking the 175th anniversary of Gardner, that great progressive community of northern Worcester County. The same week, I directed the attention of the House to the 225th anniversary of Upton, another lovely outstanding community in my district.

Today, Mr. Speaker, I am indeed pleased and proud to bring to the attention of the House the 300th anniversary of the settlement of Quaboag Plantation in my district. From this early settlement came the town of Brookfield which in turn gave rise from land within its original boundaries to the present day prosperous and progressive communities of Warren, West Brookfield, North Brookfield, East Brookfield, and New Braintree.

Joining with the mother town of Brookfield, these communities will formally celebrate the 300th anniversary of the settlement of Quaboag Plantation with a 3-day program of festivities to be held next month on September 16, 17, and 18.

These six communities with remarkable records of achievement were all settled by pioneer colonists in the very earliest days of American history. Families residing in these towns today can trace their beginnings to these early settlers who helped to carve American civilization out of the wilderness and forge the great tradition, eventful history and proud heritage which have made our Nation what it is today among the peoples of the world.

Communities sprung from the Quaboag Plantation have played a vital and important role in the historic beginnings of this Nation and the townspeople of West Brookfield, which is the original settled part of Quaboag, take pride in the fact that the Constitution of the United States reflects the early draft of the Massachusetts constitution written in that town by one of its distinguished citizens, that great Revolutionary patriot, Judge Jedediah Foster.

A leading member of the Provincial Congress during 1774 and 1775, Judge Foster after whom Foster's Hill was named—the site, incidentally, of a historical pageant next month during the anniversary celebration in West Brookfield—was elected in 1779 by the town of Brookfield as a delegate to the Massachusetts State convention called for the sole purpose of forming a new constitution. This convention appointed him to

the drafting committee and town tradition says that while John Adams rendered valuable aid on the same committee, it is actually Judge Foster who drafted the constitution in the form finally adopted.

This draft was written in Judge Foster's hand in the Foster homestead on Foster's Hill, local historians assert.

Massachusetts takes pride in the fact that its State constitution, more than any other, was copied by the Federal Convention in framing the Constitution of the United States.

A statement appearing in the Boston Gazette of November 9, 1779, lends credence to the contention of the townspeople that Judge Foster's role in the drafting of the constitution was far greater than that of John Adams. This report states that Judge Foster's death was hastened by the long and arduous time he spent laboring on the new constitution.

Historians will continue their research on this vital point in the years to come, but there is no dispute, Mr. Speaker, on the fact that this Massachusetts State constitution to which Judge Foster contributed so much was the model of the Constitution of the United States.

This Massachusetts landmark in self-government saw these doctrines spelled out for the first time in any written constitution of the world: the separation of the three judicial, legislative and executive powers, the modification of the veto power so that it could be overruled by two-thirds of each legislative house, the express dictum that revenue bills should originate in the lower house with the power of amendment by the upper house, the writ of habeas corpus and other provisions no less vital to human dignity and freedom from oppressive powers of the State.

Thus did the little community of Brookfield, whose name is so descriptive of its natural features in this pleasant, gently rolling New England countryside, contribute so much to constitutional government throughout the world.

Judge Foster died before his great work was ratified by the people of his State. While on a mission to Fort Ticonderoga, he suffered a chill during a crossing of Lake Champlain in an open boat. He never recovered from this illness and died at the age of 55 on October 17, 1779.

Two of his sons, Dwight and Theodore, later served as U.S. Senators at the same time representing the States of Massachusetts and Rhode Island, respectively.

The histories of these six outstanding communities—the four Brookfields, New Braintree and Warren—are truly inspiring accounts of the lives of great men and women and the sacrifices they made in building a strong Nation. It is not even possible in the brief time available to me to recite the highlights and accomplishments of these communities because the separate history of each town abounds with feats of great courage during pioneer days and incidents which touch upon the growth and progress of our land.

The history of Brookfield goes back to 1660 when the first settlers arrived from Ipswich to make their homes in what is now West Brookfield. This was the land of the Quaboags, a branch of the Nipmuc Tribe of Indians. The nearest white settlement was 30 miles away. These early settlers had received the approval of the general court for a land grant described as Ipswich New Plantation, an area some 6 square miles near the so-called "Quoboag" ponds, but Indian troubles prevented these settlers from fulfilling the grant's stipulation that 20 families settle there within 3 years. In later petitions, dated 1667, 1670, and 1673, the growth of the settlement is recorded so that by the winter of 1673 the town was properly organized.

Douglas Edward Leach in his scholarly work, Flintlock and Tomahawk, describes the early Quaboag settlement as follows:

> Here on a hilltop overlooking the forest for miles around, lay the tiny frontier village of Brookfield, otherwise known as Quaboag. A comparatively new settlement, this village in 1675 contained perhaps 20 families all told. In addition to being a farming community, Brookfield was important as a stopping point on the Long Path which ran from the vicinity of Boston across Massachusetts to Springfield on the Connecticut River. Indeed scarcely a town in all of Massachusetts could claim the distinction of being more isolated than Brookfield.

Savage Indian raids in 1675 devastated the small settlement and it is only in 1686 that the resettlement of Brookfield started with pioneers coming from Marlboro, Springfield, Suffield, and Hadley to build anew in what had become again an area of desolate wilderness.

Brookfield grew slowly since the times were troubled. There was the constant threat of Indian warfare and the few perilous periods of uneasy peace did not further the settlement of frontier settlements far removed from their neighbors.

Despite the hazards, Brookfield continued to grow. Town records show that several Brookfield men fought in the War of the Austrian Succession during 1744 to 1748, notably at Louisbourg, then known as the French Gibraltar at Cape Breton. Many more fought in the French and Indian wars of 1754 to 1763 where Brookfield men gained valuable military experience.

Revolutionary War records show that in 1773 Brookfield "was ready to assist, and in every legal and proper way, maintain its rights and liberties." On April 19, 1775, two companies of minutemen marched from Brookfield for Boston and the town furnished several hundred men for service, including senior officers who first learned to fight in the French and Indian wars.

While formally incorporated as a town in 1848, West Brookfield is the original settled part of the original Brookfield. Within its borders is the original town burial ground. Many of the events attendant to the 300th anniversary exercises will take place in West Brookfield.

A famed old hostelry there is Ye Olde Tavern, which is reported to be the second oldest inn in Massachusetts. Originally built in 1760, it has been in continuous operation and has entertained such notables as Gen. George Washington, Jerome Bonaparte and his bride.

West Brookfield has many historic associations with the early growth of the Nation. It was the home of the Merriam family, famed publishers of Webster's Dictionary, and first publication of this noted work took place in West Brookfield. The Merriams in 1876 endowed the town library which still bears the family name.

The incorporation of North Brookfield as the second precinct of Brookfield took place on March 28, 1750. The State legislature approved its incorporation as a separate town on February 28, 1812.

North Brookfield engaged in the early manufacture of shoes. The industry grew to the point that about 1,000 workers were engaged in this work by 1875.

East Brookfield is the newest of the Brookfield towns, the State legislature approving its incorporation as a separate town on March 24, 1920.

Warren was founded as the town of Western on January 16, 1741, of land taken from Brookfield, Brimfield and what records describe as the "easterly part of what was Kingfield." It later was named after the great patriot, Gen. Joseph Warren, when it became evident that the name of Western would conflict with the town of Weston in the eastern part of the State. It was decided to change from Western to Warren in 1834.

In pioneer days, its main industry was agriculture but the waters of the Quaboag were soon used as early as 1793 by grist mills. By 1837, cotton and woolen mills were established along the Quaboag.

The name of New Braintree, formed from the original Quaboag plantation, originates from old Braintree, Mass., whose residents were granted land which became Braintree Farms and eventually New Braintree.

New Braintree was set apart as a town on January 31, 1751, taking in Braintree Farms and parts of Brookfield and Hardwick. On August 23, 1775, the legislature made the district a town.

Mr. Speaker, the communities of the original Quaboag Plantation will mark the 300th anniversary of the founding of the original settlement on Foster Hill with appropriate ceremonies on September 16, 17, and 18.

Foster Hill is named after Judge Jedediah Foster. I have already touched upon his outstanding work in drafting the Massachusetts constitution. Foster Hill was the site of Judge Foster's home where he had his law office and where he worked on the original draft of the State constitution.

It can be said that Foster Hill saw the birth of the historic Constitution of the United States and it is most appropriate that Congress grant official recognition to the founding of the first settlement of this historic spot. That is why I am introducing an appropriate resolution extending felicitations of this House to those Massachusetts towns which have sprung from the Foster Hill settlement 300 years ago.

Foster Hill and the environs are truly places of great historic importance and

interest. The original Boston Post Road passes over Foster Hill. It is along this highway that Benjamin Franklin, while serving as Assistant Postmaster General, personally measured the miles and helped drive the stakes where workmen came later to set the milestones. Today an unbroken line of 11 such milestones are cared for by the citizens of the original Quaboag Plantation.

On Foster Hill are such history-laden places as Indian Rock, the site of the Fortified House, the well where Major Wilson was shot, the site of the first and second meetinghouses, the first burial ground and the Whitefield Rock from which George Whitefield, celebrated evangelist who was one of the founders of Methodism, preached on October 16, 1740, during his first trip to America.

The Quaboag Historical Society has placed suitable granite markers at these seven historic spots on Foster Hill, which is a mecca for visiting historians and writers seeking material on colonial days. In addition, the society has engaged in considerable research activity throughout the area for many years. Members of the group took the initiative in 1910 in formulating and carrying out the successful program commemorating the 250th anniversary of Quaboag Plantation.

The Quaboag area is the birthplace of such famous Americans as Lucy Blackwell Stone, the noted reformer and prominent advocate of woman's rights. Born at West Brookfield on August 18, 1818, she is remembered for her organizing abilities and staunch stand for woman's rights. She helped to organize the American Women's Suffrage Association and served as president until 1872.

The great Connie Mack, outstanding figure of the baseball world, was born at East Brookfield on December 22, 1862. He grew up in an atmosphere where baseball was greatly encouraged and became early in life a capable and skillful player, so much so that he was recruited for play in the big leagues to become one of the most solid, dependable men of organized baseball as well as one of baseball's most celebrated and famous managers and leaders.

George M. Cohan, the famed American actor, author, and producer, while born in Providence, looked upon North Brookfield as his home and spent his boyhood in the Quaboag area where he received his early religious, family, and school training.

At an early age he began writing plays and popular songs, besides appearing on the legitimate stage and doing comedy roles in vaudeville.

He wrote and produced many plays and musical revues and appeared as an actor in most of them. Many Americans hold fond memories of such Cohan productions as "Forty-five Minutes From Broadway," "Get-Rich-Quick Wallingford," "Seven Keys to Baldpate," "The Song and Dance Man," and "American Born." Among his many song hits was "Over There," which was the favorite of two continents during World War I.

In his autobiography, Cohan describes his happy days in the Brookfields where he grew up and later spent many vacations.

Cohan, the only actor to receive a Congressional Medal, was noted for his sincerity, sense of honor, and fairness as well as for his kind nature and charity. He befriended many stage folks during his lifetime and was ever ready and willing to extend a helping hand to show people on the way up or to those unfortunates "at liberty" between jobs. He gained the reputation of never turning away an appeal for help whether from the high or the lowly.

The contributions of such men as Connie Mack and George M. Cohan have been so great that they will never be fully evaluated. They were men of honor, achievement, and greatness who will continue to be an inspiration to American youth for years to come.

Mr. Speaker, elaborate community programs will herald the 300th anniversary of Quaboag Plantation during the 3-day observance commemorating the settlement of this area on the weekend of September 16, 17, and 18.

Exactly 50 years ago the 250th anniversary celebration attracted some 15,000 people to West Brookfield and it is expected that this number will be doubled for the impressive program arranged for this year's observance.

Under plans arranged by a committee of leading citizens from each town, which is headed by Dr. Louis E. Roy of West Brookfield, the opening day program will be devoted to local homecoming observances in the various communities. These local programs will be followed on Saturday, September 17, with a major celebration to take place in West Brookfield, the highlights of which will be a parade and historical pageant.

The closing of the Quaboag observance will be held on Sunday with religious commemorative services in the various churches in all of the towns.

Dr. Roy and his committee, made up of members designated by the boards of selectmen of the original Quaboag settlement towns, have been working for more than a year to arrange an observance which should long be remembered by townspeople and the many visitors who will be attracted to the area.

West Brookfield, the original location of the Quaboag settlement, was selected by this committee as the site for the main observance of the 300th anniversary ceremonies because Foster Hill was the original plot on which the early settlers staked their claim 300 years ago. During the 250th anniversary celebration, an Indian battle was reenacted on Foster Hill and this year the historical pageant will take place at this site.

It is interesting to note, Mr. Speaker, in this respect that the Richardson family of West Brookfield, owners of a farm on which Foster Hill is located, is again making available this historic site for an anniversary celebration. The following note of appreciation appears in the official program for the 1960 celebration:

At this time when we gather for this 300th anniversary with our friends and guests from far and wide, we are aware that this broad area of Foster's Hill, once the scene of a great experiment in community living, is now the private property of the Richardson family. Indeed we are mindful that this has been true for 101 years.

We pause, then, to consider the remarkable fact that a single family has offered its land area three times for a historic celebration; once in 1860 for the 200th anniversary of Quaboag Plantation; a second time in 1910 for the 250th; and now for the 300th in 1960. This is "open house" on a grand scale. This, in itself, is historic.

The historic pageant to be given on Foster Hill will have a 200-member cast under the direction of Gordon V. Bennett. The pageant-drama, entitled "The Book of Quaboag," was written by Mrs. Mildred McClary Tymeson of West Boylston with the assistance of the pageant committee, which formulated ideas and thoughts upon which the pageant is based. Members of the pageant committee are Miss Marguerite C. McKelligett of Warren, chairman, and the Misses Mary F. Leach and Britta D. Jeppson.

The pageant will portray the growth of democracy as seen in the history of the Quaboag Plantation with many of the events depicted having actually taken place on Foster Hill where the production will be staged.

Taking part in the pageant will be members of the Improved Order of Red Men, Lassawa Tribe of East Brookfield, and the Degree of Pocahontas, who will portray Indians and their squaws, the Daughters of the American Revolution and the Grange. The pageant is in three acts, the first opening with a scene set in 1659 and ending with a spectacular Indian war and fire. The second act opens in 1775 and covers the Revolutionary War period.

The final act is set in 1960 and depicts the growth of the area and hopes of the Quaboag community for the future.

The opening event in the Quaboag celebration will take place on September 9 when a coronation ball will choose "Miss Quaboag" from the queens of the various communities in the plantation who will reign during the entire celebration period.

On September 16, each town will register former residents and hold homecoming programs in the evening. A full day of events will take place on September 17 at West Brookfield, beginning with a 2-hour parade with floats, bands and marching units. The Eighth Air Force is furnishing a band for the parade and will also give a helicopter and jet salute to the Quaboag communities during the parade. Doll and antique carriage parades will also be held during the day.

A firemen's muster will be held in the afternoon and a square dance is scheduled for the evening on the town common. The day's events will conclude with a fireworks display on Foster Hill.

The parade committee with Milton C. Richardson as chairman has been working to make the parade one of the largest ever to be conducted in western Worcester County. Among the units registered are more than 60 floats, 12

bands, and 17 fire department and civil defense units. Included will be an old-time steam calliope, old cars, stagecoaches, high bikes and small cars.

Units going back to colonial and Civil War days will participate, including the Whitcomb Rangers in colonial military dress complete with muskets, and the Massachusetts 9th Light Battery, which goes back to the Civil War, will parade, complete with its horse-drawn cannon and cavalry.

Assisting Mr. Richardson for the parade events are Lee Boyce of Brookfield, parade marshal, Raymond Clark of West Brookfield, assistant marshal, Mr. and Mrs. Edward Shumate, youth groups, Mr. and Mrs. Raymond Burke, military units, Mr. and Mrs. Ernest DeAngeles, baby and doll carriage events, and Paul Walker, old time transportation.

In addition to the pageant on Sunday afternoon, September 18, there will be water ski events by the Lake Wickaboag Ski Club and tours of historic homes in the area from 5 to 8 p.m.

In honor of the 300th anniversary celebration, the Tri-County Coin Club of Warren is sponsoring a commemorative medal made of bronze and measuring one and a quarter inches in diameter which has attracted wide interest among collectors. One side bears the seal of the town of Brookfield showing Ayer's Tavern on Foster Hill where early pioneers spent 3 days under siege fighting off marauding Indians. The other side has the seal of the Tri-County Coin Club, an outline of Worcester, Hampshire, and Hampden Counties circled with a wreath.

Dr. Louis E. Roy is serving as celebration chairman for the West Brookfield activities. He is also chairman of the executive committee, which has been working for more than a year to make this year's anniversary a success. The executive committee is made up of the chairmen heading local celebrations in the Quaboag towns participating in the 300th anniversary events. These chairmen are Richard C. McNeaney of East Brookfield, Horace L. May of Brookfield, John S. Irish of North Brookfield, William N. Wright, Sr., and Karl P. Meacham of Warren, cochairmen, and John S. Grazier of West Brookfield, secretary.

Assisting Dr. Roy and his executive committee are the following chairmen of the various events and activities of the Quaboag anniversary observance:

Programs, Wright and Henry J. Burt, of Brookfield, editor; advertising, Charles F. Ballou, of West Brookfield; parade, Milton C. Richardson, West Brookfield; essay contest, Miss Mary F. Leach, Brookfield; finance committee, John S. Irish; publicity, Stedman B. Howard; good coordination, Mrs. Donald Graveline, Warren; safety, Horace L. May, Brookfield; grounds, Milton C. Richardson; square dance, Louis E. Roy; commemorative book, John Grazier; reception, Robert DeWitt Lane, East Brookfield; commemorative stamp, Mrs. Ruth Thompson, and old costumes, Mrs. Fred Smith.

These and many other public spirited citizens of the Quaboag towns have worked out a truly impressive program for the entertainment of their neighbors and friends and the many visitors from communities near and far who will be attracted to West Brookfield for the anniversary celebration. As it can be seen, Mr. Speaker, the program which has been arranged for this outstanding event, while comprehensive is simple and dignified. It is in keeping with the cherished and long remembered programs which took place during the 200th and 250th anniversary observances in this same community. Those are memorable celebrations which will be relived again this year in the Quaboag Plantation towns.

Mr. Speaker, in recognition of this 300th anniversary of the settlement of Quaboag Plantation, I am introducing a special resolution extending greetings and felicitations of the House to the towns of Brookfield, West Brookfield, North Brookfield, East Brookfield, Warren and New Braintree, all in my congressional district, on the occasion of this outstanding anniversary.

I know that my colleagues will be pleased to join with me in paying tribute to these outstanding communities which make up the original Quaboag Plantation. These communities, like most New England towns, owe their origins to the bitter sacrifices and hard work of their pioneer founders.

These early settlers were a devout and patriotic people. Among their first acts when establishing new settlements was the erection of places of worship. Next followed the establishment of meeting houses, schools, and libraries. In silent testimony to their industry, bitter travail and heavy labors are the famed rows of stone walls which abound in the New England countryside. From this rock-strewn soil and rugged hills, these pioneers wrung a hard-earned living for themselves and their families.

Yes, Mr. Speaker, these pioneers have left our Nation with a tradition, a way of life, a civilization which live to this day in the heritage which is so fortunately ours.

As I have said at the outset of my remarks, I know of no other congressional district in this land that can boast areas so rich in historic interest and historical contributions as the Quaboag towns and the other communities in my district which celebrated noteworthy anniversaries this year. I am exceedingly proud to represent these magnificent American communities in the Congress and am highly privileged to hail, salute, and congratulate the towns of the Quaboag Plantation on the occasion of the 300th anniversary of this pioneer settlement.

Under leave to extend my remarks I include the text of my resolution at this point in the RECORD:

Whereas the year 1960 marks the 300th anniversary of the settlement of Quaboag Plantation in Massachusetts, which later became the towns of Brookfield, West Brookfield, North Brookfield, East Brookfield, Warren, and New Braintree; and

Whereas from the time of settlement in 1660 the people of these communities have figured conspicuously in the founding and growth of this Nation; and

Whereas the observance of the 300th anniversary of the settlement of Quaboag Plantation is being celebrated with impressive community ceremonies, large public gatherings and widespread participation of Massachusetts citizens; and

Whereas Brookfield, West Brookfield, North Brookfield, East Brookfield, Warren, and New Braintree are progressive communities rich in historic interest, distinguished for their fervent civic spirit, and faithfully devoted to American institutions and ideals; and

Whereas these communities are well known for their patriotic contributions to these United States and noted for their famous sons and daughters who distinguished themselves in many fields of endeavor and in many facets of American civilization; and

Whereas the observance of the 300th anniversary of the Quaboag Plantation will be celebrated with impressive exercises in the various communities and a joint celebration in West Brookfield on Foster Hill named after Judge Jedediah Foster, one of the principal authors of the Massachusetts Constitution which formed the basic pattern of the Constitution of the United States: Now, therefore, be it

Resolved, That the House of Representatives extends its greetings and felicitations to the people of Brookfield, West Brookfield, North Brookfield, East Brookfield, Warren, and New Braintree, Mass., on the occasion of the 300th anniversary of the founding of the settlement of Quaboag Plantation and the House of Representatives further expresses its appreciation for the splendid services rendered to the Nation by the citizens of these communities during the past 300 years.

Ukrainian Congress Committee of America

EXTENSION OF REMARKS

OF

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. DELANEY. Mr. Speaker, I feel it is a privilege to be able to pay tribute to the Ukrainian Congress Committee of America, which, this fall, will celebrate its 20th anniversary.

This organization, which represents some 2½ million dedicated Americans of Ukrainian ancestry, has given, and continues to give, valuable service in exposing certain myths about Soviet Russia and in proposing concrete ways and means to defeat Moscow in the cold war.

When we think of captive nations, we are apt to think only of Hungary, Poland, Czechoslovakia, Rumania, and other countries not within the geographical boundaries of Soviet Russia. All too often we forget that within the Soviet Union itself are at least a dozen captive nations, each with its own history and its own culture.

Of these, the Ukrainian Nation, with over 215,000 square miles, is the largest in area, and with some 40 million people, is the largest in population.

Because of their fierce spirit of independence and undying love of freedom the Ukrainians have been made to suffer

the most cruel persecutions that the Reds could devise. We remember the horrible Moscow-made famine of 1932 and 1933, in which millions of people died, the mass murder at Vinnitsia in 1937, and the vast purges and deportations carried out under the personal direction of Khrushchev in the late 1930's and after the German retreat in 1943.

Despite these unspeakable cruelties, the Soviet tyrants have not been able to extinguish the spirit of the Ukrainian people, and it is in this spirit that the Ukrainian Congress Committee of America carries on the fight to win the liberation of captive nations throughout the world.

A Bill To Amend Certain Sections of the Sugar Act of 1948

EXTENSION OF REMARKS
OF
HON. PAUL G. ROGERS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. ROGERS of Florida. Mr. Speaker, today, I introduce, for appropriate reference a bill to amend certain sections of the Sugar Act of 1948.

This measure is designed primarily to allow for the progressive expansion and growth of the domestic sugar industry and makes extensive changes in the theory and procedure of the quota provisions of the Sugar Act.

My purpose in introducing this bill at this time is to allow the Department of Agriculture, Members of Congress, and the House Agriculture Committee ample opportunity during the interim to study and comment on this extensive departure from the current methods of prorating quotas under the Sugar Act.

Present unsettled conditions prevailing in some of the areas which supply sugar for U.S. consumption have had a chaotic effect on the stability of the sugar industry, not only domestic but foreign as well. I feel that in the interest of stability, Congress should make the extension of the Sugar Act one of the first orders of business next year and I think it advisable that all points of view be explored before action is taken on this important legislation.

Briefly, I would like to summarize the changes this proposal would make in the present law.

First. The Sugar Act and related provisions of the Revenue Code are extended through the calendar year 1964.

Mr. Speaker, there are a number of reasons why the Sugar Act should be extended for a 4-year period.

Protection such as that afforded by the Sugar Act is essential to the continued existence of the domestic sugar-producing industry. Assurance of the continuance of such protection is vital to forward planning by the domestic industry.

Farmers must plan their cropping and rotation practices in advance. Four years is only one cropping cycle in the domestic beet area. Most of the sugar produced from 1961-crop beets will not be marketed until 1962 and a part of it will probably be marketed in 1963.

Four years is the approximate life of a single planting of cane in the mainland cane area.

Four years covers only two cuttings or approximately one-half the life of a single planting of sugar cane in Hawaii.

Four years, although covering four cuttings in Puerto Rico, represents only one-half the life of a single planting of cane.

The value of our sugar farms, factories, and refineries is well over a billion and a half dollars. More than $100 million must be spent each year to improve agricultural practices and to replace and modernize farm and factory equipment.

These huge investments are vital to the continued efficiency of the domestic sugar-producing industry. A short extension of the act would increase the element of risk and thereby endanger the future efficiency of the domestic sugar-producing and processing industry.

In addition, hundreds of thousands of workers are employed on farms and in factories producing and processing sugar crops. It is manifestly unfair to these workers to require them to live in a constant state of uncertainty through short-term extensions of the Sugar Act.

Second. Any changes in foreign quotas which are made after the enactment of this bill are to be made on the following basis:

Each foreign area has a quota base which is equal to the quota it would receive under existing law on the basis of a determination of domestic consumption of 9,400,000 tons. Each foreign area will receive such pro rata share of any increase, from any level and whenever occurring, as is necessary to bring its quota up to its quota base but its quota cannot exceed its quota base. Its quota base can be changed only in the event of the unexcused failure of a foreign area to market its quota, in which case the Secretary may decrease the quota base of the short area and increase the quota base of other foreign areas pro rata by the amount of the short fall.

Third. Any change in domestic quotas are to be made as follows:

In the event of any decrease in the consumption determination, from any area and whenever occurring, domestic and foreign quotas alike will be cut pro rata. In the event of any increase, foreign areas will share with domestic areas, but only to the extent necessary to bring their quotas up to their quota bases, after which the initial increase will go pro rata to the domestic areas.

Fourth. Domestic area deficits will be allocated first to other domestic areas, with any amount that domestic areas taken as a whole are unable to fill to be reallocated to foreign areas.

Fifth. Foreign area deficits will be allocated pro rata to domestic and foreign areas alike, with any amount that domestic areas taken as a whole are unable to fill to be reallocated to foreign areas.

Sixth. Under this bill, the President has the authority throughout the extension of the act to set the Cuban quota at any amount not exceeding what would otherwise be required. The difference, if any, is to be treated as a deficit pursuant to section 204, subsection (c) of the proposed bill.

This provision is similar to the one now in effect which empowers the President to deal with situations in which the national interest or the supplies for domestic consumers might be jeopardized.

Mr. Speaker, as I indicated at the outset of my remarks, the broad objective of this bill is to permit the progressive expansion of the domestic sugar industry not by changing the quota bases of our foreign suppliers but rather by affording to domestic beet and cane sugar producers the increase occasioned by the growth of the American sugar market.

It also provides a measure of stability to both foreign and domestic sugar producers by permitting them ample time for the advance planning so necessary to their efficient operation.

I feel that the approach embodied in this bill is fair and entirely consistent with the broad objectives of the Sugar Act. I realize that this session is rapidly growing to a close and that there will not be time for extensive study of the provisions of this proposed legislation. I am hopeful, however, that the Congress and the Department of Agriculture will consider this approach over the interim so that this important matter can be acted on early next session.

The text of the bill reads as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202 of the Sugar Act of 1948 is amended to read as follows:

"PRORATION OF QUOTAS

"SEC. 202. (a) The quota and quota base for the Republic of the Philippines shall be 980,000 short tons, raw value, in compliance with section 211 of the Philippine Trade Act of 1946.

"(b) The quota base for Cuba shall be 3,119,655 short tons, raw value.

"(c) The quota bases for foreign countries other than the Republic of the Philippines and Cuba shall be—

Country:	*Short tons raw value*
Peru	95,527
Dominican Republic	81,457
Mexico	64,809
Nicaragua	14,026
Haiti	7,015
Netherlands	3,731
Taiwan	3,624
Costa Rica	3,616
Panama	3,624
Canada	631
United Kingdom	516
Belgium	182
British Guiana	84
Hong Kong	3

"(d) The quota bases for domestic sugar producing areas shall be—

Area:	*Short tons raw value*
Domestic beet sugar	2,043,480
Mainland cane sugar	628,799
Hawaii	1,140,461
Puerto Rico	1,192,499
Virgin Islands	16,261

"(e) Whenever a determination or revision (referred to in this subsection as a 'new determination') is made (pursuant to section 201) of the amount of sugar needed to meet the requirements of consumers which differs

from the determination or revision (referred to in this subsection as the 'old determination') previously made, the Secretary shall revise the then existing quotas (referred to in this subsection as the 'old quotas') by promulgating new or revised quotas (referred to in this subsection as 'new quotas') as follows:

"(1) If the new determination is less than the old determination, the new quota for any area under subsections (b) through (d) shall be equal to the product of its old quota multiplied by the quotient of the new determination less the Philippine quota divided by the old determination less the Philippine quota.

"(2) If the new determination is greater than the old determination, then—

"(A) The new quota for any area under subsection (b) or (c) shall be equal to the lesser of—

"(i) the product of its old quota times the quotient of the new determination less the Philippine quota divided by the old determination less the Philippine quota, or

"(ii) its quota base.

"(B) The new quota for any area under subsection (d) shall be equal to the product of its old quota times the quotient of the new determination less the sum of the new quotas for areas under subsections (a) through (c) divided by the sum of the old quotas for areas under subsection (d).

"(3) The Secretary may adjust the quota for any area by an amount not exceeding 10,000 tons, but the total of such adjustments shall not exceed 25,000 tons at any one time, and for the purposes of establishing or revising quotas pursuant to paragraphs (1) and (2), no such adjustment may be taken into account.

"(4) The allocation of any deficit pursuant to section 204 shall not change the quota of any area for the purposes of this subsection, but any change in the quota of any area made pursuant to subsection (f) of this section shall change the quota and quota base of such area for all purposes.

"(f) Whenever in any year any foreign country with a quota or proration thereof of more than ten thousand short tons fails to fill such quota or proration by more than 10 per centum and at any time during such year the world price of sugar exceeds the domestic price, the quota or proration thereof for such country for subsequent years shall be reduced by an amount equal to the amount by which such country failed to fill its quota or proration thereof, unless the Secretary finds that such failure was due to crop disaster or force majeure or finds that such reduction would be contrary to the objectives of this Act. Any reduction hereunder shall be prorated in the same manner as deficits are prorated under section 204."

SEC. 2. Section 204 of the Sugar Act of 1948 is amended to read as follows:

"PRORATION OF QUOTA DEFICITS

"SEC. 204. (a) The Secretary shall from time to time determine whether, in view of the current inventories of sugar, the estimated production from the acreage of sugarcane or sugar beets planted, the normal marketings within a calendar year of new-crop sugar, and other pertinent factors, any area will be unable to market the quota for such area.

"(b) If the Secretary determines, pursuant to subsection (a), that any domestic area will be unable to market its quota, he shall allocate the amount of the deficit so determined to the other domestic areas in proportion to the quotas then in effect for such areas. The Secretary shall reallocate the amount by which he determines that any domestic area will be unable to fill its allocation under this subsection to other domestic areas on such basis as he may determine, and shall reallocate to foreign areas, on such basis as he may determine, the amount by which he determines that domestic areas taken as a whole will be unable to fill such deficit.

"(c) If the Secretary determines, pursuant to subsection (a), that any foreign area will be unable to market its quota, he shall allocate the amount of the deficit so determined to all other areas having quotas under section 202 in proportion to the quotas then in effect for such areas. The Secretary shall reallocate the amount by which he determines that any domestic area will be unable to fill its allocation under this subsection in the same manner as is required for reallocation under subsection (b). The Secretary shall reallocate to foreign areas, on such basis as he may determine, the amount by which he determines that any foreign area will be unable to fill its allocation under this subsection.

"(d) In making any allocation or reallocation of a deficit pursuant to this section, the Secretary is authorized, in his discretion, to vary from the amount otherwise required to be allocated to any area by an amount not exceeding 10,000 tons, but the net total of all such variances shall be zero."

SEC. 3. Subsection (b) of section 408 of the Sugar Act of 1948 is amended to read as follows:

"(b) Notwithstanding the provisions of title II of this Act, the President may determine or redetermine the quota for Cuba, in any amount not greater than that otherwise required pursuant to title II, at any time and from time to time prior to January 1, 1965. Any such determination or redetermination shall become effective immediately upon publication in the Federal Register of the President's proclamation thereof. The Secretary shall allocate or reallocate any difference between the Cuban quota as so proclaimed by the President and the Cuban quota as otherwise required by title II in the same manner as is prescribed by section 204 for allocation and reallocation of deficits."

SEC. 4. Section 412 of the Sugar Act of 1948 is amended to read as follows:

"TERMINATION OF ACT

"SEC. 412. The powers vested in the Secretary by this Act shall terminate on December 31, 1964, except that the Secretary shall have power to make payments under title III under programs applicable to the crop year 1964 and previous crop years."

SEC. 5. Sections 4501(c) and 6412(d) (relating to the termination and refund of taxes on sugar) of the Internal Revenue Code of 1954 are amended by striking out "September 30, 1961" in each place that it appears therein and inserting in lieu thereof "June 30, 1965".

Our Ballistic Missile Program

EXTENSION OF REMARKS

OF

HON. LESLIE C. ARENDS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. ARENDS. Mr. Speaker, in October of 1956 Soviet Russia launched sputnik with the usual propaganda dramatics to be expected from the Communists. There then followed many utterances of people in positions of responsibility critical of our missile program. For the most part, this criticism represented nothing more or less than self-serving conclusions for political purposes.

As the ranking member of the House Committee on Armed Services, having legislative jurisdiction over our defense organization and program, I determined that the Congress and the country should have the facts. At that time I initiated an objective study of our missiles program from its very inception. In the RECORD of January 20, 1958, I inserted a memorandum embodying the results of this study. Again in 1959 I initiated a further study of the program and prepared a memorandum on my findings. This was inserted in the RECORD of February 1, 1960, by our distinguished Senator from Illinois [Mr. DIRKSEN].

With a view to making certain that we always have the facts, not mere speculation or preconceived conclusions without foundation in fact, I initiated a further study to bring this whole matter up to date. The following is a memorandum which sets forth the factual history with respect to ballistic missiles:

BALLISTIC MISSILES [1]—A HISTORY

INTRODUCTION

Major military weapons never spring forth full-blown overnight. The first operational B–17 took a decade to develop. The B–29 and B–52 are likewise the outgrowth of years of effort.

Similarly with modern rocketry. Though in America it began 17 years ago, it turned seriously to long-range ballistic missiles only 7 years ago.

Not until fiscal year 1953 were expenditures in any 1 year on long-range ballistic missile programs even as much as a million dollars.

Since 1953 these programs have advanced with impressive speed. Today they involve the expenditure of 10 times as much each day as was spent in all of fiscal year 1952.

In the early postwar years military studies slowly advanced American ballistic missile knowledge. Propulsion, guidance, heating and weight problems appeared very difficult. Their solution obviously was costly. Yet, the level of effort remained low and sporadic. Moreover, critical data controlling warhead weights were unknown. Until 1953 the operational feasibility of long-range ballistic missiles seemed far distant to those in authority. As a result, these programs were deemed unworthy of major effort. To be sure, one such program, the forerunner to Atlas, was started as long as 14 years ago, in 1946, but it died 3 years later in the 1949 defense cutbacks. The program was reviewed in 1951 but even then only as a component development effort.

From World War II to 1953, due partly to skepticism as to the practicality of long-range ballistic missiles and due also to emphasis on strategic bombers, our missile effort, such as it was, went mainly into such air defense missiles as Nike-Ajax, Terrier I, and Falcon. Some short-range ballistic missiles and some relatively slow nonballistic aerodynamic type long-range missiles did receive some support. Corporal and Redstone are examples of the former and Snark and Navaho of the latter. Long-range ballistic missile efforts, however, were held down to low-support studies.

Viewed in retrospect, therefore, it is hardly remarkable that as of 1960, 15 years after World War II, American long-range rocketry is in some respects matched or surpassed by the Soviets. That result was foreordained by years of low-priority attention and lack of funds while the Soviets evidently were advancing their rocketry full blast.

What is remarkable is how rapidly the intercontinental ballistic missile (ICBM) and intermediate range ballistic missile (IRBM) programs of the United States have advanced in less than 6 years. The speed

[1] Intercontinental and intermediate range.

of this advance in so short a period augurs well for the Nation's security. It is convincing testimony to the competence of our scientists and engineers.

YEARS 1942–46

The year 1942 marks the beginning of our World War II rocket program. The work was principally on solid propellants, which burn like cigarettes within the rockets. It was carried forward with military support, by the Office of Scientific Research and Development. From it evolved our World War II artillery rockets, air-to-surface rockets, rocket boosters for airplanes, other special rocket motors, and our first serious efforts to propel rockets with liquid fuels. During the summer of 1945 this work produced the Army Wac Corporal, a rocket fueled by nitric acid and aniline.

When World War II ended, the Allied Nations placed scientific teams in Germany to analyze that nation's technical accomplishments in rockets and missiles. A number of the best German scientists and engineers were induced to go to Russia and to the United States. The United States, however, pressed this effort less aggressively than the Soviets.

In the latter part of 1946 the Russians identified other scientists and technicians associated with German missile programs. Hundreds of them were removed to Russia. German research facilities and production plants were stripped of machinery, instruments, blueprints, and missiles or missile components. These two were shipped to Russia. Thus the Russians were able to exploit German missile technology. The indoctrination of Soviet scientists and technicians was thereby facilitated, and they acquired faster the know-how to bring uncompleted German ideas to practical realization.

The advantage the Soviets achieved due to their early decision to develop and extend this German missile technology is evident.

YEARS 1946 TO 1950

This period is one of halting, low-level efforts on long-range ballistic missiles.

In 1946 several potentially useful programs had been started. As captured V–2 rockets were used up, the development of American designed and produced rockets began.

For instance, the Army arranged in 1946 to rebuild the V–2's. In the so-called "Bumper" program, the V–2 was converted into a first-stage booster rocket. It carried a second rocket, the Wac Corporal, which in turn carried scientific instruments to high altitudes. Maximum speed attained during these later tests was about 5,200 miles per hour—maximum altitude, about 250 miles. The standard V–2 performance was 3,600 miles an hour and 100 miles maximum altitude.

The year 1946 marked also the Air Force's first attempt on the ICBM. The program, known as the MX–774 at Convair, was intended to advance long-range rocket techniques. It turned out, however, to be rather short lived. The defense slashes of 1949 terminated this program. For the next several years Convair used corporate funds to carry on MX–774 weapons studies at low financial levels.

In 1946 the Air Force also established the Snark and Navaho programs. These were long-range, airplane-type guided missiles, not the ballistic type. However, from the liquid propellant rocket booster to be used with Navaho grew the high thrust liquid propellant engines for today's Atlas, Thor, and Jupiter.

Also in the late 1940's the Navy developed the first version of its Viking, a high altitude scientific research rocket.

YEARS 1950 TO 1953

The development of the Army's Redstone, a 200-mile tactical ballistic missile, was begun in 1950. Not until 1953 was the first Redstone missile fired, a flight test that was only partially successful. Much of the information obtained from this and subsequent Redstone firings was applied to the Jupiter when that program was initiated in late 1955.

In the design of long-range ballistic missiles, weight is critical. Generally speaking, it takes about 200 pounds of launching weight to place 1 pound of warhead on a target several thousand miles away. Because the first atomic warheads weighed 9,000 pounds, clearly a major reduction was required in nuclear warhead weight for missile use.

During the 1946–53 period the Atomic Energy Commission embarked on a program of atomic weapon improvement which resulted in lighter and higher yield nuclear warheads.

It was on January 31, 1950, that development of thermonuclear weapons was permitted to go beyond low-priority studies in the United States. On that date the President directed the Atomic Energy Commission to proceed with this development.

However, during this entire period the significance of warhead improvement was not applied to the problem of long-range ballistic missiles. For this and other reasons, long-range ballistic missile development languished. The warhead problem, therefore, became one of the central factors in the delay of American progress on such missiles. During this slack period in the United States, the Soviets appear to have gone full speed ahead with their own long-range ballistic missile programs.

In October 1950, Mr. K. T. Keller, president of Chrysler Corp., was appointed Defense Department Director of Guided Missiles, with authority to institute a Manhattan-type project for missiles. However, after analysis of the missile programs, Mr. Keller decided against a Manhattan-type project on the grounds that it would take a year to institute such a program. In 1953 Mr. Keller was asked to remain with the new administration. He resigned late that year at his own behest.

Missile feasibility studies started in 1949 by the Rand Corp. were completed in the fall of 1950. These studies confirmed the military worth of long-range ballistic missiles. Subsequently, in January 1951, the decision was made by the Air Force to resume studies of the MX–774 weapon, redesignated Atlas. This program however was given only a long-term, low priority objective—that of determining whether a large 5,000-mile ballistic rocket was then technically feasible. Six months later, in June 1951, the Atlas project was formally reactivated.

On June 16, 1953, Secretary of Defense Charles E. Wilson ordered a review of the guided missile program to identify and eliminate duplication. He stated that "a continuous effort should be made to standardize on one missile for production and use by all military departments, wherever, within the employment limitation of each type of missile, standardization appears to be practicable." As a part of this review a group of civilian scientists headed by Dr. John von Neumann was requested to review the strategic missile programs. It was later known as the Strategic Missiles Evaluation Committee.

Between fiscal years 1951 and 1953 the ICBM program grew from a half million to $3 million per year.

YEAR 1954

The Strategic Missiles Evaluation (Von Neumann) Committee reported in February the highly significant possibility of achieving a major technological breakthrough on warhead size and expressed its conviction that other technical problems associated with the development of ICBM's could be resolved in a period of a few years. The Committee also recommended the formation of a special management organization to assure early ICBM availability.

As for technical factors, the Von Neumann Committee recommended that the ICBM project be completely reoriented to take advantage of the advancing warhead technology, thus permitting relaxation of guidance tolerances and propulsion requirements. The Committee also noted the potential desirability of an IRBM.

Nine days later the Assistant Secretary of Air Force (R. & D.) approved the broad reorientation of the program recommended by the committee.

Accordingly, the Air Force set up a group to study the Von Neumann report and define the organizational realinement required to accelerate the ICBM. From June through August major management and procedural changes were placed into operation. A streamlined organization under the Air Force Research and Development Command was set up. It was known as the Western Development Division (WDD) and became an autonomous group responsible for directing and coordinating the effort toward primary objectives. Under the command of Brig. Gen. B. A. Schriever, Atlas became WDD's basic mission.

During the Castle tests in the Pacific through the period of March to May 1954, the feasibility of developing a smaller lightweight, high-yield thermonuclear weapon was proven, thus confirming the soundness of the Von Neumann's Committee recommendations.

YEAR 1955

By spring the Atlas program was expanding rapidly. The $3 million program in fiscal year 1953 had grown to $14 million in fiscal year 1954, to $161 million in fiscal year 1955.

In February the Killian Committee (Technological Capabilities Panel) recommended that concurrently with the ICBM effort, an IRBM program be initiated to develop a missile of 1,500-mile range.

In June the Scientific Advisory Committee (formerly the Strategic Missile Evaluation Committee) recommended that two ICBM's be developed concurrently in order to assure earliest attainment of an operational capability. In September the President approved assignment of the highest priority to the ICBM research and development program. The same month the Titan ICBM project was established in supplementation of the Atlas program to provide the desired multiple approach.

In November the Secretary of Defense approved the formation of the Defense Ballistic Missile Committee and ordered organizational changes in the military departments to handle the ICBM and IRBM programs. At the same time he approved a program of two 1,500-mile intermediate range missiles subsequently named Jupiter and Thor. The Jupiter was to be launched either from land or sea. It was intended that Thor would be based upon experience already gained in the Atlas program, while Jupiter would be based on experience gained by the Redstone Arsenal team from the V–2 and Redstone missiles.

The Secretaries of Army, Navy, and Air Force at once implemented the new organizational program.

The Air Force placed its ICBM and Thor programs under the already established Air Force Ballistic Missile Division initially called the WDD.

A joint management committee was established by the Army and Navy for the Jupiter program. The Navy created the Office of Special Projects and assigned to it responsibility for the technical development of the sea-based IRBM. As a corollary to the Jupiter program, which employed a liquid propellant, the Navy also began studies of a

solid propellant version to reduce shipboard logistical problems.

Five hundred and fifteen million dollars of Defense funds were reserved to carry out these programs. In December the Secretary of Defense presented to the President and his advisers the new organizational alinement and the long-range missile programs. The President then assigned the highest priority to these programs.

YEAR 1956

On January 20, in order to assure a common interchange of technical information, as well as provide competent guidance for all the programs, the Scientific Advisory Committee was transferred from the Air Force to the Office of the Secretary of Defense. On the same date this committee presented certain recommendations to assure that the long-range ballistic missile programs would proceed at maximum speed. The office of a special assistant for guided missiles to Secretary of Defense was established, first with Dr. Murphree and later Mr. Holaday occuying this key position.

In February, the Army activated the Army Ballistic Missile Agency at Huntsville, Ala., under the direction of Brig. Gen. J. B. Medaris.

In September, the Jupiter C, a multistage test vehicle, was fired. It went 3,300 statute miles, rose to 680 statute miles, and reached a maximum velocity of 13,000 miles per hour. During the same period the Air Force X–17 re-entry test vehicle flight tests clearly demonstrated that the reentry problem was solvable.

In October, the Scientific Advisory Committee recommended initiation of a new, smaller, solid-propellant IRBM with improved capability of being launched from a submarine.

In November, the Secretary of Defense reviewed Service responsibilities for operational use of the IRBM. He assigned responsibility for operational deployment of land-based IRBM's to the Air Force and ship-based IRBM's to the Navy. Also in November the development of the Polaris (solid propellant) IRBM program (including six submarines) was approved by the Secretary of Defense, and the Navy was authorized to terminate its participation in the Jupiter program.

The next month, following Navy withdrawal from the Jupiter program, separate Army and Navy Ballistic Missile Committees were established under the chairmanship of the respective Service Secretaries.

YEAR 1957

In August the estimated operational capability date for Atlas was changed from March 1959 to June 1959. In December an accelerated program of 9 squadrons of 10 missiles each was approved. The Titan, alternate to Atlas, program was reduced from 4 to 2 test missiles per month and the completion date for the first operational squadron was set back. During this period it was decided to discontinue the Navaho airplane-type missile project which had become obsolescent because of the progress in the development of long-range ballistic missiles.

The President, in October, reaffirmed the highest national priority for both Jupiter and Thor systems to obtain an IRBM capability at the earliest practicable date and provide for continuance of both missiles until one proved successful. The Army was authorized in November to produce the Jupiter at a rate of five missiles per month. Four Jupiter 15-missile squadrons were to be established with the operational date of the first squadron to be December 1958.

Also to be operational in December 1958 was the first squadron of Thor, with three more 15-missile squadrons scheduled for a later date.

The decision was made to launch Polaris missiles from submarines only.

Nearly $1.4 billion was spent on ICBM and IRBM programs in fiscal year 1957.

YEAR 1958

Flight tests proved the performance of the Atlas guidance system, and the integrity of the airframe. Among the successful test flights in the development series, one Atlas was placed in earth satellite orbit in December. Other flights demonstrated the operational radio-inertial guidance system.

A schedule was approved for four squadrons of Titan in hardened bases. Components of the missile system were delivered, and a few of them tested.

Research and development of Minuteman were begun. Minuteman is to be a solid propellant, three-stage ICBM and will carry a nuclear warhead up to 5,500 nautical miles. It will be guided by a self-contained, all-inertial system.

Flight tests of Thor, Jupiter, and Atlas revealed a problem in the failure of certain components of the turbopump assembly used to pump propellants into the main engine. The difficulties were isolated and corrective modifications developed. Later flight tests verified success of the modifications.

The first Royal Air Force students entered training in the United States under USAF instruction in May in accordance with Government-to-Government agreements for the RAF to man and command all Thor units in the United Kingdom. During the year, the Thor guidance system was improved, permitting an average impact accuracy better than that originally specified and by the last of the year Thor was meeting its production schedule with operational missiles being shipped to England for deployment.

The initial increment of the first Jupiter squadron was ready for deployment in December. Consideration was given to deploying them to Italy.

The President, in November, approved a nine-submarine Polaris program. The initial operational capability date of the first Polaris submarine was advanced to late 1960. Later it was again advanced to early 1960, with four more following at 3-month intervals.

Congress appropriated $90 million for the Minuteman program in excess of the amount in fiscal year 1959 President's budget. This amount was applied against the fiscal year 1960 program (i.e., approved for utilization beginning July 1, 1959).

Congress also appropriated $609 million over the President's budget for Polaris; the President released $309 million of this on December 23 for development and for conversion of a surface ship to a tender for submarines and for a sixth nuclear-powered ballistic missile launching submarine.

The total spent in fiscal year 1958 was more than $2 billion.

YEAR 1959

Flights of the operational prototype Atlas which began in April had little initial success and the planned date for achieving a limited operational capability was changed from June to September. Considerable effort was devoted to determining the causes of the malfunctions that resulted in the explosion of four out of five Atlas missiles launched before June 30, and how to correct them. Since June 30, causes of the malfunctions have been corrected and the first launch by the all-military team on September 9 at Vandenberg Air Force Base was successful. A plan to improve the system's survivability and provide a faster reaction time was approved. Beginning with the third squadron, the complexes, each with three missiles and three launch positions, will be about 18 nautical miles apart, and, to shorten missile launching time, all squadrons from the third on will have individual missile launchers. Beginning with the fifth squadron, each missile will be dispersed to a separate firing point.

At Vandenberg, the first complex of three soft launch sites for the Atlas missile became operational in September 1959. This is a unique complex and is scheduled to phase out of the ballistic missile effort to support the Samos and Midas satellite programs as more Atlas squadrons become operational.

Progress to date on the Titan resulted in approval of an increase in the number of squadrons from 4 to 11. Each squadron will have 10 missiles. The first six squadrons will be organized into three complexes, each with three launchers, and the missiles will have radio-inertial guidance. The complexes will be about 18 nautical miles apart. In the 7th through 11th squadrons, the 9 launchers will be at least 18 miles apart and guidance will be all-inertial.

Prototype Minuteman missiles were fired from silo launchers, verifying the feasibility of launching Minuteman missiles from underground launchers of the silo type.

The total planned Thor force was reduced from nine squadrons to four, all deployed in England. In January it became evident that the construction, installation, checkout, and modification effort in England would require more time and personnel than was originally planned. This caused about a 4-month delay in turning over the first squadron to the RAF. In June, RAF–USAF representatives drafted preliminary procedures for declaring the U.S. squadrons "satisfactorily operational" in conformance with a governmental agreement.

The operational version of the ablating nose cone for Jupiter was flown on all missiles fired this year and has proved to be completely satisfactory. Two operational type nose cones were recovered with all their payloads in perfect condition. One of these carried biomedical experiments in support of National Aeronautics and Space Administration programs. A site for two Jupiter squadrons was selected in southern Italy. Each squadron of 15 missiles will be deployed in 5 sites, with 3 missiles at each, all launchers to be more than 11 nautical miles apart.

All major objectives of the Polaris program to date have been achieved. The launching system for the first Polaris submarine, the U.S.S. *George Washington*, passed its tests. The launcher for the next submarine class entered development; it will accommodate the 1,200-mile missile as well as the 1,500-mile missile planned for 1962. The first Polaris submarine was launched in June and is being completed. The sixth submarine will have several improvements, one being a greater operating depth. On July 1, contracts were let for the seventh, eighth and ninth submarines. The first submarine will probably become fully operational in late 1960 and the remainder will follow at 3- or 4-month intervals.

In 1959, Congress appropriated $85 million for Atlas and $87 million for Minuteman in excess of the amounts included in the fiscal year 1960 President's budget. These amounts were approved for utilization in the fiscal year 1960 programs (i.e., beginning July 1, 1959).

On June 24 the President released $300 million Polaris money (the remainder of the $609 million mentioned earlier) for obligation in fiscal year 1960 for the seventh, eighth and ninth Polaris submarines.

YEAR 1960 THROUGH AUGUST 23

The second Vandenberg complex of three soft launch sites for the Atlas missile, which will become operational toward the end of 1960, is to be used primarily for crew training.

The Atlas program was delayed during 1960 by labor disputes. The effect of these delays on the Nation's overall strategic missile posture will not be very significant because of the soft nature of these first squadrons.

The planned number of Atlas squadrons has been increased to 13. Nine of these squadrons will be hard, that is, they will be protected so that their ability to fire will not be affected even by a near miss of a nuclear weapon. The successful developmental flight tests included one of 9,000 miles. During the past year an all-inertial guidance system for the Atlas missile was flight tested and achieved the specified accuracy. This system will make it possible to give the later Atlas squadrons greater dispersal and shorter reaction time and will eliminate the radar elements which are vulnerable to the effects of enemy weapons and electronic countermeasures.

Tests of the Titan weapon system indicate that the causes of the previous failures have been remedied. It is expected that this weapon system will attain operational capability on schedule.

Much of the development was on the advanced Titan system. Features of this missile include noncryogenic storable fuels, an all-inertial guidance system, and increased range. An in-silo launch capability permits reduction in exposure time and improves the reliability of the system.

During 1960 the planned force level was increased to 14 squadrons, the last 8 of which will be equipped with the advanced missile. The first Titan squadron is programed to be operational by the end of next year (1961).

The Minuteman program proceeded essentially on schedule with the critical problem of propulsion being effectively solved. Tests of the mobile concept began in June 1960 on trains manned by Air Force crews. It is expected to become operational about the summer of 1962.

The number of Thor squadrons to be activated was reduced from five to four, late in 1959. These four squadrons have been turned over to the Royal Air Force of England.

A firm, long-range, combat training launch schedule has been developed for the Thor program with the Royal Air Force. The launches will take place at Vandenberg Air Force Base, Calif.

The Jupiter R. & D. firing program was completed on February 4, 1960. The Jupiter construction program in Italy is proceeding according to schedule.

The Turkish Armed Forces have agreed to accept the Jupiter weapon system in a joint effort to implement NATO strategic planning.

On July 20, 1960, the last major test milestone prior to operational deployment was passed when two Polaris missiles were launched from the U.S.S. *George Washington* (SSBN 598) while submerged and went over 1,000 miles to the target area.

There is now no doubt that the first two Polaris submarines will deploy as scheduled toward the end of 1960. Other submarine construction is proceeding on schedule. Fourteen submarines are fully funded and long leadtime items for five additional submarines have been approved.

Development of a Polaris missile with a range of about 2,500 miles is now under consideration. The additional range will be made possible by a more efficient propellant and by lighter engine cases, nozzles, and guidance components.

Early in 1960 the development of an air-launched ballistic missile, Skybolt, was announced. Launched from airborne bombers of the B–52 type, the Skybolt will be designed to follow a ballistic trajectory above the atmosphere and strike a predetermined target over 1,000 miles away.

Among the many advantages of such a weapon system are its ability to remain aloft on an alert status within relatively close range of an aggressor; and, through its ability to remain hidden, to formidably discourage surprise attack plans.

The Skybolt is programed to become operational in 1964.

The President asked for and got all the funds that could be effectively used at this time for maximum acceleration of these programs in fiscal year 1961. The amounts available for these programs are:

	Billion
Atlas	$1.1
Titan	1.0
Minuteman	0.7
Polaris	1.3
Total	4.1

SUMMARY

Today and for the near future, our deterrent and retaliatory capabilities depend largely on the ability of current Air Force and Navy jet bombers to survive enemy attack on the ground and in the air and to deliver nuclear weapons. However, with passage of time, potential enemies' ability to destroy jet bombers on the ground and in the air may be improving faster than the jet bombers' ability to survive, thus weakening their deterrent qualities. Therefore, in 1955 we gave highest priorities to our IRBM and ICBM programs.

The Atlas, our first ICBM, started in 1946, canceled in 1949, begun again at low priority in 1951, accelerated in 1954, finally became operational in 1959. This missile is the beginning of the ballistic missile phase of deterrence. We can strike a large portion of the earth with 5,500 nautical mile range Atlas missiles launched from this country. On the other hand, potential enemies have Atlas-type missiles also and our Atlas missiles are vulnerable to surprise attack by them. Therefore, we are hardening and dispersing our newer Atlas-launching sites and developing other ICBM's, Titan and Minuteman, which will be in even harder sites. Titan was begun in 1955 as a backup in case Atlas failed. Minuteman, a smaller, solid-propellent, three-stage rocket was begun in 1958. The newer missiles, widely dispersed will be capable of launching on shorter notice, so that some of them could be launched before enemy missiles destroy the sites, assuming we got sufficient warning.

The least vulnerable deterrent seems to be our Polaris-launching submarines, because they are hard to find. Polaris, begun in late 1956, will be operational late in 1960 with the availability of the first submarine.

Thor and Jupiter were approved in late 1955 and they were available for deployment about 3 years from the development initiation date. These land-based IRBM's supplement the deterrence of ICBM's and Polaris.

From an expenditure of one-half million dollars in fiscal year 1951, programs for IRBM's and ICBM's will exceed $3 billion in the current fiscal year. Missile programs in the research stage quickly overtake and obsolete those in production. Therefore programs are designed so as to meet current needs without stockpiling missiles that will soon be outdated. Furthermore our scientific and technical talents are being taxed to the fullest on existing and scheduled missile programs. The evolutionary stages of missile development and the utilization of technical manpower make it unfeasible and uneconomical to pour more money and men into "crash programs" that tend to disrupt the sound and orderly missiles program now projected to give the United States full deterrent power.

Department of Defense obligational program for missile systems,[1] fiscal years 1946–60

[Millions of dollars]

Fiscal year	IR/ICBM programs	Other surface-to-surface missile programs	All other missile programs	Grand total, all missile programs
1946 and prior	2	19	51	72
1947		20	38	58
1948	.3	36	45	81
1949	.1	45	53	98
1950		65	69	134
1951	.5	185	598	784
1952	.8	239	818	1,058
1953	3	403	760	1,166
1954	14	336	717	1,067
1955	159	398	911	1,468
1956	526	387	1,368	2,281
1957	1,401	603	2,502	4,506
1958	2,150	639	2,391	5,180
1959 (total)	2,946	685	3,269	6,900
1960 (total)[2]	3,303	509	3,173	6,985
1961 [2]	3,424	383	3,155	6,962

[1] Program data reflected in this table cover the development and capital costs involved in missile programs, i.e. the cost of bringing missile systems to operational status plus the costs of procuring missiles and related equipment for operational purposes. These data include all procurement, construction, and research and development programs directly associated with missile programs. These figures do not include military pay, operation and maintenance costs for operational missile units and sites, and include only those shipbuilding and aircraft costs directly associated with providing missile capability.

[2] Fiscal year 1960 data are preliminary estimates; fiscal year 1961 data represent projected programing on Feb. 19, 1960.

NOTE.—Estimates are subject to revision due to program adjustments.

Area Army Reserve Program at Amherst USAR Center

EXTENSION OF REMARKS

OF

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. DULSKI. Mr. Speaker, on July 28, 1960, I had the privilege of reviewing the activities of the area Army Reserve program at the Amherst USAR Center, 100 North Forest Road in Williamsville, N.Y.

Lt. Col. Ellsworth C. Davis, Buffalo subsector commander, presented the overall picture on area reserve facilities, and Col. Walter S. Walls, commanding officer of the 338th General Hospital, a Buffalo Reserve unit, explained the role of the professional man in the Reserve program.

In a discussion of the General Hospital's 2-week training program at Camp Drum, N.Y., where it operated a field-type hospital under tentage, I realized that with the ever-present threat of war and surprise attack which exists today, the military preparedness of our country depends more than ever before upon the readiness of our Reserve Forces. I feel very strongly that the Army Reserve must be maintained in a state of training that will allow it to be ready for employment in an emergency with the least possible delay. Based on what I saw of this training in my immediate area, I feel that this program is being maintained at a maximum level at the present time, and

that the individuals participating are making a worthwhile and patriotic contribution to the Nation's preparedness.

I also had occasion to observe the awarding of a commendation ribbon to Maj. Don T. Edgmon, Regular Army adviser to the Reserve program, for his outstanding performance of duty in Korea, by Col. Dennis J. McMahon, commander of the northern New York sector. Major Edgmon also received a letter of appreciation from headquarters, Republic of Korea Army, signed by Yo Chan Song, lieutenant general, Chief of Staff.

Social Security Legislation

EXTENSION OF REMARKS
OF
HON. PHIL WEAVER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. WEAVER. Mr. Speaker, there is a growing problem having to do with the care of the elderly citizens of our country who have spent a useful life and who have now reached the time when they, by rights, should be able to relax and enjoy their declining years.

All too often these remaining years are not pleasant ones. The inroads of age have often so weakened the body that it becomes prey to disease.

To combat these ailments incident to age is an expensive business. Doctors' fees have gone up—due largely to the fact that they must have more and more equipment and equipment is becoming more and more expensive. Hospital bills, too, are becoming more costly. Here, too, the need for new equipment and the expense of nursing and other assistance have increased costs. Naturally, medical bills reflect some of this increase.

It is conceded by all that the costs of medical care have gone up for the aged as these costs have gone up for everyone.

Many proposals have been made relative to this situation. Perhaps the most famous in recent years has been that introduced by my good friend and colleague, Hon. AIME FORAND. Known as the Forand bill, this legislation stirred up a great deal of interest throughout the Nation during the 86th Congress. It stirred up, too, a great deal of bitter opposition.

Recognizing the need for assistance to the elderly, I was nevertheless very much opposed to the compulsory socialized medicine feature of the Forand bill. I am still very much opposed to this compulsory medical care program.

For one thing, dramatic progress has been made by the insurance industry of this country along these lines. Only a few years ago it was impossible to get medical insurance for those over 65. Now, there are a score of companies offering this type of medical insurance. These programs have met with instant approval and are doing well.

I also do not like the idea of the Federal Government through the Department of Health, Education, and Welfare dictating to any individual which doctor he or she should see and how much he or she should be charged. This smacks to me of "big brotherism" of the worst type.

Finally, I think that the problem as it now exists is not a permanent one. As insurance companies take up more and more of the load the need for public assistance in this field will become less and less.

For these reasons the State-Federal partnership program which we adopted here appealed to me as it did to a great many others on both sides of the aisle.

I am glad that we are moving in the humanitarian direction of assisting the people who need assistance. I am equally glad that it is being done by the States and will be controlled by the States and not the Federal bureaucracy.

Opening Battle Lost for Social Security Medical Aid Program—But Fight for Objective Will Go On

EXTENSION OF REMARKS
OF
HON. FRANK KOWALSKI
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. KOWALSKI. Mr. Speaker, we who believe in a social security program of medical aid for our senior citizens may have lost a battle this past week but we have not lost the war.

I, for one, intend to carry on the fight until we have enacted into law the kind of program that the overwhelming majority of the American people want.

It is significant that when the Senate acted on the Anderson-Kennedy amendment, which would have established an insurance-type program of medical care for the elderly, under the social security system, only one Republican Senator voted for it.

When that vote came up, where was the vaunted "new Republicanism"? Where were the so-called Republican liberals?

It is significant also many of the very arguments which have been used against the social security approach to the problem of medical aid for senior citizens are the selfsame arguments that were used against the Social Security Act itself when it was adopted a quarter of a century ago.

The plan for medical aid under social security is being called socialistic by its bitter opponents; it is called regimentation. In 1936, the Republican National Committee referred to social security as a counterfeit insurance policy. Would it dare make such a charge today, after 25 years during which it has proved to be one of the greatest pieces of legislation ever adopted in America?

Mr. Speaker, the social security approach to medical aid for senior citizens is a sound, practical approach. It would utilize governmental machinery already established and whose worth is proved by 25 years of successful experience. It would not involve the huge subsidies to private interests which the President advocated in his program. And, above all, it would not involve the obnoxious means test.

To those who believe that we need an insurance-type program, it is heartening to find that the New York Times has editorially reaffirmed its support of the social security approach to this problem.

It is heartening, too, to find that the people of America are supporting us in this fight. This support comes not alone from senior citizens, but from Americans of all ages. The people, Mr. Speaker, want a medical care program under Social Security, and the voice of the people will be heard.

Operation Veracity

EXTENSION OF REMARKS
OF
HON. NEWELL A. GEORGE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. GEORGE. Mr. Speaker, in the closing days of the Congress, a number of my friends on the other side of the aisle undertook an operation they termed "veracity."

Subsequently, experts in various fields were assigned homework in order that they could come prepared with statements to be read into the RECORD. Seldom were Democratic Members given an opportunity to reply to the baseless and untrue charges with respect to the Democratic platform.

Considering platforms, Mr. Speaker, there is a great difference between the Democratic and the Republican. History establishes the fact that the Democratic platform lists objectives which members of our party conventionally strive to attain.

On the other hand, any close observer of the administration during the past 7 years and 8 months most certainly knows that the Republican platform is nothing more than window dressing and that promises made by the Old Guard of the GOP are completely disregarded after the votes are counted.

In my newsletter of August 25 I gave a few concrete examples of the insincerity of the Republican leaders now in charge of the administration. Mr. Speaker, under unanimous consent, I include this letter as part of my remarks:

An impressive legislative program faced the House as it reconvened following the party conventions. The countdown is slow, however, as the House awaits action by the Senate. Those who are striving to enact needed legislation are forced to deal with pseudo-statesmen who sponsored a civil rights bill containing no major advances knowing full well that it could not receive serious consideration before Congress adjourns. They will not succeed in fooling the people—especially those of their home States of Pennsylvania and New York. It is

cheap and cruel to use the civil rights issue as a legislative blockade in an attempt to stifle needed legislation.

To date, this Congress has passed 676 measures which are now public law. An additional 38 bills scheduled for the law books failed of enactment because of a Presidential veto.

Area redevelopment: Yesterday—less than 2 months ago—a second veto of a redevelopment bill to assist depressed areas took place. Today special emphasis is placed on such a measure by the administration and it is one of 21 recommended for congressional action at this abbreviated recess session.

Agriculture: Yesterday bills passed by the Congress were vetoed which would have raised farm income, curtailed production, and reduced the existing surplus. Today the administration criticizes the farmers for growing more surpluses and urges congressional action. While farm income has been dizzily dropping, the taxpayers' investment in surplus commodities has risen to $8,700 million.

Water: Yesterday a public works appropriation bill which would have stepped up the Nation's flood control and water conservation programs was vetoed. Yesterday, also, the water pollution control act met a veto. Today the administration, through the Surgeon General, states flatly that the construction of water supply and pollution control facilities has lagged far behind national needs and that the United States is headed for a water crisis unless we do a much better job with our water resources.

Education: Yesterday threats of a veto confused the issue and different approaches were taken in aid to education measures by the House and Senate. Today the Department of Health, Education, and Welfare estimates that in Kansas, alone, there will be an increase of nearly 50,000 children in school by 1963. Two thousand more teachers and as many classrooms will be needed solely for the additional number of students. With almost a 9 percent increase in students, the cost cannot be absorbed from current State and local tax revenue.

Politics in reserve: Yesterday the bank discount rate was 4 percent. Today—since last July—it has been lowered by the Federal Reserve Board to 3 percent. Recently lending power has been increased by pumping reserves into commercial banks through the purchase of Government securities by the Federal Reserve Board and by a reduction in reserve requirements. All this action in an election year—and in the interest of our economy it should have taken place long ago.

A Statement Concerning a Bill To Provide Compensation for Disability or Death Resulting From Injury to Employees in Employment Which Exposes Employees to Radioactive Material, and for Other Purposes

---

EXTENSION OF REMARKS

OF

HON. HERBERT ZELENKO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. ZELENKO. Mr. Speaker, the industrial use of radioactive materiels continues to increase dramatically in the United States, and consequently the number of workers will continue to increase from the present thousands to a far more substantial and significant proportion of the total working force as the years go by.

The problem of radiation hazards in industrial safety is unique. Many workers are today, and many more will be tomorrow, exposed to varying degrees of radiation in their day to day work.

Fifty years of experience in workmen's compensation within the United States makes brilliantly clear the fact that our State governments will be unable to protect workers from the hazards of radioactive materiel. Neither in the areas of adequate benefits, medical care, rehabilitation, nor in administration will the States provide adequate protection to workers injured from exposure to radioactive materiel.

Where the States have been unable to meet their responsibility, the Federal Government has assumed its obligation. Many years ago the Congress of the United States extended the protection of workmen's compensation to the longshoremen through the Longshoremen's and Harbor Workers' Compensation Act because the States were unable to do so. In the same manner workers who are exposed to radioactive materiels should be extended protection under Federal law.

This bill is presented to the Congress in order to meet our present responsibility to workers exposed to radiation. The bill is modeled from the Longshoremen's and Harbor Workers' Compensation Act. However, because of the unique problems created by radiation exposure, the substantive sections of the Longshoremen's and Harbor Workers' Compensation Act have been substantially rewritten to meet the need.

On the other hand, the administrative sections of the Longshoremen's and Harbor Workers' Compensation Act have been adopted in toto because they would, first, utilize the experience of the present personnel; and second, give us an administration of this new program at the least cost to the U.S. Government.

Section 2 of the bill makes use of the definitions from the Longshoremen's and Harbor Workers' Compensation Act which on the whole would apply, but redefines injury and radioactive materiel.

Section 3 sets up a presumption. This is undoubtedly the most important change required in law to meet the unusual effects of persons exposed to radiation. Where ordinary diseases of life can be causally related to exposure to radiation activity, it is imperative that a method of determination of causal relations be presumed in law since medical science is unable to distinguish the exact cause of the disease. To do less is to deny compensability to all claims where the injury results from an ordinary disease occupationally caused by exposure to radiation. Like all legal presumptions, section 3 is rebuttable.

Section 4, section 5, and section 6 follow the Longshoremen's and Harbor Workers' Compensation Act. Section 7(a) sets up a waiting period of 3 days with full compensation if the disability lasts for more than 14 days. This is the recommendation of the International Association of Industrial Accident Boards and Commissions. Section 7(b) fixes the maximum amount of benefit payments at 90 percent of the average weekly wage of all employment covered by the act and further provides that it be corrected annually to the nearest dollar by the Secretary of Labor.

Section 8 provides for an employer panel of a reasonable number of competent physicians. However, the Deputy Commissioner is extended the authority to determine the reasonableness of the size of the panel and that the panel include the professional competence necessary to compete with the specialized and extraordinary treatment needed for care.

Section 9 deals with the compensation for disability. Because of the unusual nature of radiation injury, disability is treated differently from the Longshoremen's and Harbor Workers' Compensation Act. Temporary total disability is treated simply as a wage loss, and the maximum weekly payment is fixed at 90 percent of the employee's average weekly wage but not to exceed the maximum amount fixed by the Secretary of Labor. Section 9(b) deals with temporary partial disability and provides a weekly payment of 90 percent of the difference between the average weekly earnings of the employee before the injury and the average amount which he is earning or is able to earn in suitable employment thereafter. Here, however, the disability, though partial, is only temporary with no permanent effects. Where the disability is permanent, the impairment of the wage-earning capacity of the workman shall be estimated from the nature and degree of the injury and his compensation or other periodical payment shall be for the lifetime of the employee.

However, the maximum amount may not exceed the maximum amount fixed by the Secretary of Labor. Most important, the Deputy Commissioner may make an evaluation based upon his estimation of the employee's fitness to continue the employment in which he was injured or to adapt himself to some other suitable occupation. Subsections 5 and 6 of section 9 conform with the Longshoremen's and Harbor Workers' Compensation Act.

Section 10, dealing with compensation for death; section 11, dealing with the determination of pay; section 12, dealing with the guardian for minors or incompetents; and section 13(a), dealing with notice of injury or death all conform with the Longshoremen's and Harbor Workers' Compensation Act.

Section 14(a), which pertains to the time limitation for filing of claims, has been written to meet the needs of injury induced by radiation. Its main feature is that the statute of limitations for filing a claim shall not become operative until 1 year after the person claiming benefits knew or by exercise of reasonable diligence should have known of the existence of such impairment and its causal relationship to his employment and that he incur a loss of wages or has an impaired capacity to earn.

The remainder of the bill conforms to the language of the Longshoremen's and Harbor Workers' Compensation Act. It has been repeated because it was intended if amendments were made to the

Longshoremen's and Harbor Workers' Compensation Act that the Congress should deal with them separately from those dealing with injury by radiation.

Section 38 provides that the administrative sections of the Longshoremen's and Harbor Workers' Compensation Act when amended shall apply equally to the proposed bill. This was done because the administrative features of both laws should be in conformity and improvements to one would equally be improvements to the other. It is on the whole with the substantive features that amendment and separation from the Longshoremen's and Harbor Workers' Compensation Act was felt necessary.

While jurisdiction for overall legislature on compensation matters involving industrial workers lies within the Committee on Education and Labor, the radiation hazards in industry has been the subject of study by the Joint Committee on Atomic Energy and the Research and Development Subcommittee of that group, headed by our distinguished colleague, the Honorable MELVIN PRICE, held extensive hearings to explore the possibility of Federal legislation. I wish to acknowledge that the legislation I have introduced today has its origins in the findings of the Joint Committee on Atomic Energy. I am pleased to announce that Congressman PRICE will join me in cosponsoring this bill.

A Deserving Tribute

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. BAILEY. Mr. Speaker, as this session draws to a close I would like to compliment a Member of this Congress for his hard work and diligent service not only to the Congress but to the people of his district—Congressman JOHN H. DENT, of the 21st District of Pennsylvania.

He came to the Congress less than 3 years ago and has made an outstanding record on the Committee of Labor and Education, Subcommittee of Labor Standards, and as a conferee on important legislative enactments. It has often been said that experience is the best teacher. This is so true in the case of Congressman JOHN H. DENT. He has had better than a generation of experience and leadership in the legislative halls of his State, where he served for over 22 years—17 of these years as the Democratic floor leader in the State senate.

Few, if any, public servants in Pennsylvania have equaled the record he has carved out as both a leader in the senate and as a Member of this Congress.

The legislative work experience and seniority are two of the most important factors. To know what to do and to have the seniority to back up the know-how is important to the people of any district and to the State from which the Member comes. As we all know, the southern Members of Congress control most of the committees simply because of seniority. Congressman DENT has pointed out time and time again that because of the northern Members not being given the support for continued service in Congress that their constituencies have to pay higher taxes and more taxes and receive less from the National Treasury than the constituency of many of the Southern and Western States.

Congressman DENT has pointed out that the recently passed medical aid bill for the aged, despite all of his efforts and those of us who thought to the contrary, was made a part of the relief system of this country, there are States that receive as much as 80 percent contribution toward the cost of this aid whereas Pennsylvania only receives 50 percent.

This is true in all forms of handouts from the Federal Government—public works, defense spending, stream and river development, power projects, aid to education proposals, relief, welfare, and on and on. Equality in taxes and equality in service can only be had by continuing in Congress men who have the know-how and fight and will work for fair and equitable treatment for their respective States and districts.

No man in Congress fights harder than JOHN H. DENT for his district and his people. His ability to handle himself in debate is well known and recognized by every Member on the floor. His reports to all the people are hard hit and factual. Many Members of Congress read them with keen interest. He seldom misses a session of Congress and then only because of committee meetings or sickness.

Time and time again—from his very first week in the Congress of the United States—he has pointed out the weakness of the Reciprocal Trades Agreements, never giving an inch in his determination to protect the jobs of his constituency. There is no question but what his clarion voice has been heard and has awakened the conscience of many of the Members of this Congress who are lately coming to realize the impact of foreign importation from low standard countries of the consumer goods that are replacing American workmen daily and shutting down American production facilities.

His speeches in the RECORD on glass, rubber, sporting goods, residual oil and the many other products that have felt the heavy hand of import strangulation have rallied many Members of Congress to his side and his fight to reevaluate our position in world trade and foreign aid.

Congressman DENT is, by no stretch of the imagination, an isolationist, but no man can deny the sincerity of effort to help our neighbors without reducing American standards of life.

In the next few months a new session of Congress will be convened and every facet of American life, whether it be the farmer, the manufacturer, small businessman, the laborer, or the soldier, he will be able to count on the efforts of Congressman JOHN H. DENT in his continuing fight for American prosperity and world peace.

I am proud to be a Member of this Congress and happy to have served and to have known JOHN H. DENT, a great public servant.

Federal-State Relations

EXTENSION OF REMARKS
OF
HON. FLORENCE P. DWYER
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mrs. DWYER. Mr. Speaker, during the period in which he has been chairman of the Subcommittee on Intergovernmental Relations of the House Government Operations Committee, our distinguished colleague, the Honorable L. H. FOUNTAIN, has established a national reputation as an authority in the field of Federal-State-local relations.

On June 28, 1960, Congressman FOUNTAIN spoke before the 52d annual meeting of the Governors' conference at Glacier National Park, Mont. His address, which I include as an extension of my remarks, reflects his common sense, his wisdom and his deep understanding of this important and complex subject. I commend it to our colleagues.

The address follows:

FEDERAL-STATE RELATIONS

(Address by Congressman L. H. FOUNTAIN, Democrat, of North Carolina, at the 52d annual meeting of the Governors' conference, Glacier National Park, Mont., June 28, 1960)

I appreciate this opportunity to participate in your discussion this morning on the subject of Federal-State relations. I deem it a high privilege and a great honor to be asked to speak before such an imposing assemblage of our Nation's chief executives as are gathered here amid the beautiful surroundings of Glacier National Park on the occasion of your 52d conference.

More than a century ago that wise and penetrating foreign observer, De Tocqueville, sensed the importance of the American Federal system to the vitality of our democratic political institutions.

In his classic, "Democracy in America," published in 1835, De Tocqueville wrote:

"The Federal system was created with the intention of combining the different advantages which result from the greater and the lesser extent of nations; and a single glance over the United States of America suffices to discover the advantages which they have derived from its adoption.

"In great centralized nations the legislator is obliged to impart a character of uniformity to the laws which does not always suit the diversity of customs and of districts; as he takes no cognizance of special cases, he can only proceed upon general principles; and the population is obliged to conform to the exigencies of the legislation, since the legislation cannot adapt itself to the exigencies and the customs of the population, which is the cause of endless trouble and misery. This disadvantage does not exist in confederations. Congress regulates the principal measures of the National Government, and all the details of the administration are reserved to the provincial legislatures. It is impossible to imagine how much this division of sovereignty contributes to the well-being of each of the States which compose the Union. In these small communities, which

are never agitated by the desire of aggrandizement or the cares of self-defense, all public authority and private energy is employed in internal amelioration. * * * It is generally believed in America that the existence and the permanence of the republican form of government in the New World depend upon the existence and the permanence of the Federal system."

This commentary, I submit, is as valid today in its general principles as in de Tocqueville's day. In the Federal principle we have an admirable political concept well suited to the conditions of a country as large and diverse as ours. This extraordinary political invention of the Founding Fathers has weathered the tests of time and adaptability to changing conditions.

The clear-cut division of functions between the States and the National Government, while appropriate in the early days of the Republic, in time gave way to a sharing of certain responsibilities in response to the advent of new economic and social conditions. Various methods of intergovernmental cooperation, like the grant-in-aid and the tax credit device, were found to assure the continued workability of our Federal structure. The challenge is now ours to discover practical methods for further strengthening the Federal system to better serve contemporary America and future generations.

Political inventiveness is sorely needed if we are to deal successfully with the newer problems of government, such as those associated with the growth of metropolitan complexes. We can no longer safely rely exclusively on existing methods of intergovernmental cooperation. Here State government has a major responsibility—and a great opportunity—to contribute to the solution of metropolitan area problems. Effective State leadership in meeting this challenge would constitute incontrovertible evidence of the vitality of State government.

It has been said that the extension of Federal legislation into program areas traditionally a State responsibility has come about because of inactivity on the part of the States. While true in part, this is far too simple an explanation for a very complex situation. Unquestionably, the States can and must be more responsive to public needs if they are to occupy the position of equality which is rightfully theirs in the Federal structure.

It is not merely a question of shoring up the States to preserve in actuality as well as in theory the division of powers. The Federal Government needs help. With the demands of national defense, international relations, and space exploration increasingly requiring more of the Federal Government's energies, it is only logical that the States should equip themselves to assume more responsibility for domestic programs.

Even in the traditional service areas, the numerous tasks confronting the States and their local governments are tremendously important and demanding today. Permit me to cite but one example—education.

In Jefferson's words: "If a nation expects to be ignorant and free in a state of civilization, it expects what never was and never will be." With great international and domestic problems confronting the Nation today, education is more than ever before the key to world peace and our very survival.

History offers ample evidence that democracy cannot flourish where a people are uneducated, politically inactive, or fail to understand their binding common interests.

What, then, are the necessary conditions for a satisfactory educational system?

It is not necessary, or probably desirable, that all teachers be paid the same salary scales throughout the country—so long as the salaries paid teachers are adequate to attract the best qualified persons to this extremely important profession. It is not necessary that all schoolbuildings be built according to the same specifications—so long as these buildings are safe and efficient and we have adequate school facilities to accommodate the student population. It is not necessary that the curriculum from one school district to the next be as alike as the products of an automated assembly line—so long as our schools are providing the essentials for active participation in a highly industrialized democratic society, and beyond that, seek to challenge our children to develop their minds to the fullest extent of their potential.

No, centralization and uniformity are neither essential for nor will they necessarily produce the excellence which our Nation must attain in education and other public programs. But a centralized program sometimes becomes a necessary expedient for satisfying public needs when those who have the primary responsibility wait too long to take effective action. It is axiomatic that the less we solve public problems at the State and local levels, the more such problems will be dealt with at the national level. Whether we like it or not (and I am one of those who doesn't), the consequence will almost surely be a further concentration of power in the Federal Government if the States and localities neglect their responsibilities. Let us never forget that the Members of Congress and the President are elected by the same people who elect State and local officials. If the needs on the local and State levels are not met, most assuredly these same people will call upon the President and especially the Congress for action.

While it is true that some States have pioneered in recent years with imaginative programs for dealing with matters such as broadening employment opportunities, special housing needs, and temporary disability insurance for workers, the States have not done all that they might for meeting public problems falling within their competence. It is most encouraging that the council of State governments annually takes stock of many of the matters requiring the attention of the State governments in its program of "Suggested State Legislation." State accomplishment in response to those suggestions, however, is not equally encouraging.

I am reminded in this connection of several outstanding examples of State legislative leadership demonstrated earlier in the century.

We are all aware that workmen's compensation laws were enacted by all of the States on their own initiative and, significantly, this remains a field in which there is no apparent pressure for Federal participation. (However, it might be noted parenthetically that some of these State programs are badly out of date and in need of considerable improvement.) The State of Wisconsin in 1932 led the way with an unemployment compensation plan which served largely as the model for Federal legislation 3 years later. And a number of States contributed to the development of the public assistance programs upon which our Federal grant legislation was patterned.

Unfortunately, the notion is still widely held that Government services are of a fixed kind and amount which remain constant as our economy grows. Many Government activities, on the contrary, are intimately related to economic growth and technological progress, both as a consequence and a stimulant.

Witness, for example, the new regulatory problems created by the use of atomic energy and the use of powerful chemical pesticides which contribute so mightily to agricultural productivity. Such advances in technology increase our consumable private income but are not without their social costs. So, too, the growth and concentration of population in metropolitan centers necessitates proportionately larger Government expenditures to cope with the resulting problems of water supply, air and water pollution, traffic congestion, and commuter transportation.

When difficult problems arise, the solution is not to turn back the clock to some romanticized golden age of the past. Nor is there so easy a solution as sending these problems to Washington on the grounds that the Federal Government has access to the more productive tax sources. The need, rather, is for all units in our Federal system to go forward with imagination, initiative, and determination in dealing with the complex problems of our time.

Much remains to be done, not only in anticipating and planning for emerging governmental responsibilities, but also in dealing effectively with older problems. Certainly, the States have before them a tremendous opportunity to strengthen themselves through constitutional revision and appropriate legislation aimed at facilitating effective and responsible government at the local level. As a very minimum, the States should enlarge the home rule powers of local governments to an extent commensurate with their administrative capabilities and their fiscal needs and capacities.

It is my firm conviction that we must have strong local self-government in this country if we are to preserve our Federal system. Monopoly is no more desirable in government than it is in science or industry. The free competition of ideas and a broad base of participation in the political affairs of the Nation are indispensable ingredients of democracy.

Throughout our history, we Americans have demonstrated a genius for adapting our political institutions to new conditions and new problems, although the time lags have sometimes given cause for concern. Unencumbered by slavish adherence to rigid political dogmas, while steadfastly devoted to the heritage of our democratic ideals, we have been a Nation of political pragmatists. This national trait is pointedly reflected in Grover Cleveland's famous remark: "It is a condition and not a theory which confronts us."

With the active support of your organization, the Federal Government last year created a permanent Advisory Commission on Intergovernmental Relations. In view of the fact that the President has entrusted the leadership of the Commission to a very able gentleman who needs no introduction to this conference, I am all the more hopeful that the Commission will become an important and constructive force in helping to plot a sound and orderly course for the future development of intergovernmental activities.

I believe deeply in our Federal form of Government and in the desirability of preserving and strengthening this remarkable political institution; but there are no easy solutions or automatic mechanisms for doing so. Constant vigilance and hard work are the price we must pay for democratic institutions.

It is my sincere hope that in the decade of the 1960's we will see an era of close and rewarding cooperation among the levels of Government—Federal, State, and local—and a resurgence of State leadership in governmental affairs.

While I have this chance, permit me to conclude by striking just one other brief note in the presence of you, whose leadership and statesmanship will play such an important part in determining the future destiny of our beloved Nation and of generations yet unborn. As was pointed out in your very thought-provoking and stimulating discussion yesterday morning, beyond any question, we are living in dangerous times testing whether our Nation or any other nation so conceived and so dedicated shall long endure.

Consequently, in this hour while the world is in a turmoil and the redemption for governments and mankind is being worked out

in so many mysterious ways; and while we are engaged in a deadly, devastating contest over the integrity of the individual versus the authority of the State, which will determine whether the philosophy of Jesus Christ or the philosophy of communism shall prevail. I believe with all my being that it is wise and necessary for all of us, in public and in private life, to call upon the Master Architect of the Universe for more faith in Him, for a better understanding of His magnificent purpose in our lives, and for a greater courage and determination to carry out the many glorious, though difficult, tasks which both He and the people of America have committed to our care.

In words written by Franklin Delano Roosevelt, but never uttered by him before his death: "The only limit to our realization of tomorrow will be our doubts of today."

Gen. Robert L. F. Sikes: Citizen, Soldier, Legislator

EXTENSION OF REMARKS
OF
HON. PAUL G. ROGERS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. ROGERS of Florida. Mr. Speaker, today I had the pleasure of attending a luncheon in honor of our friend and colleague, ROBERT L. F. "BOB" SIKES, of Florida. This luncheon was given by the Reserve Officers Association to honor BOB SIKES in recognition of his long years of devoted service to the U.S. Army and the Army Reserve and to celebrate his promotion to the rank of brigadier general.

All of Florida is proud of this accomplishment of the dean of our delegation who has served with such distinction and honor for 20 years in Congress. His great interest in the building and strengthening of the armed services of our country is well known to the Members of this body, particularly because of his effective service on the House Appropriations Committee concerned with the defense of our Nation. As one of Florida's outstanding citizens and legislators BOB SIKES has now added another feat to his accomplishment of service and I know I can speak for all of my colleagues not only from Florida, but from both Houses of the Congress when I say "Congratulations, General SIKES."

The luncheon was presided over by John T. "Jake" Carlton, executive director of the Reserve Officers Association of the United States, who has and is doing a magnificent job in helping to keep the U.S. Army Reserve as a ready and active force. Following are remarks made by the national president of the Reserve Officers Association, Maj. Gen. Carl T. Sutherland, U.S. Army Reserve, and the remarks of the former national president, Maj. Gen. STROM THURMOND:

MESSAGE FROM THE NATIONAL PRESIDENT ON THE OCCASION OF LUNCHEON IN HONOR OF R. L. F. SIKES, A BRIGADIER GENERAL OF THE U.S. ARMY RESERVE

Please express to General SIKES my deep regret that I cannot be present with you today as ROA pays tribute to him, recognizing his great achievements as a citizen-soldier as well as a nationally recognized leader in the Congress. BOB SIKES for many years has been one who has exhibited great capacity for leadership and his new estate prepares him for broader service in the years to come. We are proud of him. As national president of ROA, I am especially pleased to pass to him the honor of again serving as ROA's legislative advisory chairman. Knowing BOB SIKES as I do I am confident that he will respond willingly to this call for service. My best wishes to you all on today's happy occasion.

CARL T. SUTHERLAND,
Major General, U.S. Army Reserve.

BOB SIKES has served national defense far beyond the call of duty in three elements of his activity.

First, he has taken seriously his duties as a Reserve officer and has carried forward his own personal training in order to make himself best qualified in his field. That achievement we particularly recognize today.

Second, as a Member of the Congress and a key member of the Appropriations Committee he has by diligent application to his duty become one of the best informed men in the Congress on military matters. Against this broad background he has contributed to the sound military strength we have today. We know also that he has gained his achievements in this field frequently against great odds. But fighting against odds neither dismays nor deters a man like BOB SIKES.

And third, and perhaps most important, BOB SIKES has combined his efforts in three roles: as citizen, as soldier, and as legislator to contribute to a substantially greater public understanding of our military needs as well as a better working relationship between the civilian components and the Regular services. In a true sense BOB SIKES has served the one Army concept and in so doing has encouraged development of a similarly satisfactory relationship between the Reserves and the Regular services. All of these have made our national defense forces more effective today than at any time in a peacetime period. We, therefore, honor him today for what he is and for what he has done and for what he now stands ready to do in the future.

STROM THURMOND,
Major General, U.S. Army Reserve.

Hon. Dean P. Taylor

EXTENSION OF REMARKS
OF
HON. LEO W. O'BRIEN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. O'BRIEN of New York. Mr. Speaker, in these closing hours of the 86th Congress, I want to pay my respects to the Honorable DEAN P. TAYLOR, of Troy, who has represented the 31st District of New York in this House for 18 years.

Mr. TAYLOR is not a candidate for reelection, although he could have had renomination and reelection without any doubt.

He has earned surcease from his labors in Congress, but as the Representative of the 30th District, which borders his, I deeply regret his decision.

Politics is not unknown in this august Chamber and there were occasions when DEAN TAYLOR and I were on opposite sides on some of the perplexing national problems which confronted us.

But, Mr. Speaker, when it came to matters for the common good of the area we represented, we worked as a team.

It was easy to work with Mr. TAYLOR. He is a gentleman of the first rank, kindly, tolerant, and understanding. In his retirement, the Capital District of New York will lose an able champion. I wish him well in the days ahead as do his countless friends in Washington and elsewhere.

Paul Cunningham, Gifted ASCAP Leader

EXTENSION OF REMARKS
OF
HON. PHILIP J. PHILBIN
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. PHILBIN. Mr. Speaker, the music world and the Nation were shocked and deeply saddened just recently to learn of the unexpected passing of Paul Cunningham, late distinguished president of the American Society of Composers, Authors, and Publishers, ASCAP, and at the time of his death director of public affairs of that great American organization.

Mr. Speaker, it was my melancholy duty on Wednesday, August 17, to serve as an honorary pallbearer at the funeral services of this dear friend, celebrated by a solemn high requiem mass at St. Patrick's Cathedral in New York City.

Among other honorary pallbearers on this sad occasion were representatives of the U.S. Senate, well-known composers, members of the broadcasting industry and of the music publishing firms, the American Legion, the legal profession, and prominent figures of the entertainment world, including ASCAP President Stanley Adams, Morton Downey, Paul Whiteman, Nick Kenny, Meredith Willson, Harry Woods, Frank Weldon, and the longtime collaborator with Oscar Hammerstein II, the great American composer, Richard Rodgers.

A successful songwriter in his own right, possessed of impressive talents, Paul Cunningham unselfishly devoted much of his life to the betterment and improvement of the lot of songwriters and musical artists.

There was an endearing warmth and joviality in the personality of this great man, a magnetic charm, appealing sincerity, and easy sense of humor that captured the hearts, tenaciously held the affections of a multitude of friends, and drew the admiration of a legion of people in every part of the country.

His vital exuberance and faith and assurance in his cause inspired optimism and won for him the confidence and support, not only of his fellow professionals, but of people in every walk of American life, from Members of Congress to humblest citizens in the byways and highways of America.

There was a depth of understanding and sincerity in Paul Cunningham's makeup, a quality of loyal dedication, an unbounded faith in the rightness of his aims and objectives that won for him the ready cooperation of his fellows.

Only a broad, big man of genuine ability, quiet patience, charity in his heart, and sheer determination could succeed as he did, in bringing and keeping together the ofttimes discordant elements of the popular musical world.

More than a devout spirit of dedication was required for this difficult task. Rare, diplomatic talents, knowledge of human nature, a bright, clear mind and exceptional ability to keep conflicting and divergent interests and elements solidly lined up behind the greater cause, were of the essence of his responsibility and achievement.

Above all, untiring and indefatigable efforts, and exhausting, energetic work, were required to carry forward his brave, well-conceived crusade for the songwriter, and to answer the many appeals for his sage advice and unstinted assistance.

Paul Cunningham died with his boots on, worn and exhausted by his seemingly never-ending labors. Unwilling to spare himself, he worked and fought to the very end to further and advance the cause of the people and the profession he loved and in that sense he was a true martyr to his high ideals and their cause.

Many very distinguished Americans have preceded him in the leadership of ASCAP, but none could ever exceed him in sincere dedication or in mobilizing behind the worthy cause of ASCAP, such complete understanding, unity and public support.

Paul Cunningham will go down in the illustrious history of ASCAP and his times as a superb creative talent and a forceful, tactful and diplomatic crusader, who brought better understanding between the members of his own organization and inculcated better, more realistic and sympathetic appreciation of the objectives of ASCAP than ever before into the hearts and minds of the Congress and the American people.

ASCAP and the songwriters of America owe to Paul Cunningham—tireless leader, inspiring crusader, brilliant and beloved interpreter of men—a very great debt for his long-sustained, unselfish and selfless devotion to its aims and aspirations.

The Congress is deeply indebted to him for bringing to our midst a keener and deeper comprehension of the serious problems of songwriters and composers and the great injustice being done to many of them by oldtime, outmoded discriminatory national laws that should and must be changed if fairness, impartiality and justice is to be done.

The best service any of us can render to the enduring memory, and noteworthy contributions of Paul Cunningham is to continue to strive for his ideal of justice for all American composers.

I am sure that his distinguished successor as president of ASCAP, the able and popular Mr. Stanley Adams, will carry on the great traditions of this famous society.

In his struggles and travail, anxieties and sacrifices, there was one great sustaining force that stood out above all others in the life of Paul Cunningham and that was the love, loyalty, devotion, and help of his life partner and beloved wife, Florrie, who survives him. Through every trial and tribulation, and there were many in the long, busy life of this inspiring and beloved man, this good, devoted woman stood beside him at all times with a fortitude and love that knew no bounds to lift his spirit and to give him the strength, inspiration, and courage to carry on his work with unabating and ever-increased vigor.

As a Representative in the Congress of the Commonwealth of Massachusetts, which even before it joined with the other Colonies to form a new Nation was foremost as a cultural leader in the New World, I wish to add my humble tribute to this great worker in the musical vineyard. Paul Cunningham's valiant battles in Washington and elsewhere, on behalf of his musical colleagues and fellow writers, will not be in vain, but will stimulate renewed efforts and final victory.

He has left a great gap in the ranks of music's leadership. It will be a fitting perpetuation of the memory of this distinguished gentleman of song when the Nation finally provides, both at the Federal and State level, adequate protection for the musical property of all creators, and sufficient guarantees that they will continue to create works of genius, to the everlasting gratitude of all Americans.

Florrie is now alone with her memories of a kind, generous, and devoted husband and a respected and beloved public figure who won the heart of America. Better than anyone, she knew and understood the loving, charitable nature and deep spiritual qualities of this gifted leader. She best understood his innate modesty, his self-effacing humility, his implicit faith in his God.

And she best observed as a daily living reality the stirring example of the broad humanity of Paul Cunningham, his love of country and his love of his fellow men, regardless of race, color, or creed.

Paul Cunningham was my dear friend; he was a dear, loyal friend to very many people. We cherished and loved him in life, and now we sorrowfully join in mourning his passing from the American scene where he achieved so nobly and so well. We pray devoutly, as we believe truly, that the good Lord will keep and cherish him in his heavenly home.

Mr. Speaker, under unanimous consent, I include in the RECORD as part of my remarks, the New York Times account of Mr. Cunningham's passing:

[From the New York Times, Aug. 15, 1960]

PAUL CUNNINGHAM OF ASCAP WAS 70—SOCIETY PRESIDENT, 1955–58, DIES—LYRICIST FOR "I AM AN AMERICAN," "TRIPOLI"

Paul Cunningham, a songwriter and director of public affairs of the American Society of Composers, Authors, and Publishers, died yesterday of a heart attack in his home at 60 Sutton Place South. His age was 70.

Mr. Cunningham wrote the lyrics for several hundred songs, including "I Am an American," "The Shores of Tripoli," and "Please Take a Letter, Miss Brown."

From 1955 to 1958, he was president of ASCAP. He was named to its board of directors in 1945.

Born in New York, Mr. Cunningham received a bachelor of arts degree from Manhattan College in 1914. He then worked for a music publishing company as a singer and staff writer. For several years, he and his wife, the former Florence Bennett, played in vaudeville as Cunningham and Bennett.

Among the other songs on which he collaborated were "Have a Smile for Everyone You Meet," "Coronation Waltz," "All Over Nothing at All," "That's How I Believe in You," and "You Can't Make a Fool Out of Me."

Also "Piggy Wiggy Woo," "Hats Off to MacArthur," "Four Buddies," and "From the Vine Come the Grapes."

Last year, Mr. Cunningham was appointed by President Eisenhower to serve on the advisory committee of Washington's proposed National Cultural Center.

He leaves his wife.

Treasury Use of Advance Refunding Authority

EXTENSION OF REMARKS
OF
HON. FRANK IKARD
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, August 31, 1960

Mr. IKARD. Mr. Speaker, I would like to call the attention of the Members to recent use by the Treasury of authority granted under legislation passed in September 1959.

The Members will recall that H.R. 9035, which became law as Public Law 86–346, authorized the Secretary of the Treasury to designate certain exchanges of Government securities, referred to as "advance refundings," as nontaxable exchanges. There were only seven votes cast against H.R. 9035 on passage.

The first use by the Treasury of this authority under Public Law 86–346 was to permit exchanges of the accrual-type series E savings bonds for the series H bonds, which pay interest semiannually, with postponement of the income tax due on the accrued E-bond interest until final cashing or maturity of the H-bonds. Such exchanges are especially attractive to our retired citizens who are desirous of obtaining current interest income rather than a lump payment at maturity. Between January 1, when such exchanges were first authorized, until August 25, the shifts from E- to H-bonds totaled $231 million.

With respect to marketable securities, the Treasury's first use of the new authority was last June, when almost $4 billion of a topheavy $11 billion bond issue coming due in November 1961 was shifted to 1964 and 1968. This operation has somewhat reduced the problems involved in handling the maturity issue in November 1961. Moreover, the June operation clearly demonstrated that advance refunding can be a useful debt management technique.

Mr. Speaker, I bring this matter to the attention of the House because of the crucial importance of sound debt management in our economy. Unless our debt is managed in a sound manner, we will severely complicate the problem of achieving a maximum sustained rate of economic growth and preventing a rise in the cost of living. Moreover, debt

management, along with sound fiscal and monetary policies, is part of the framework of domestic financial policies that must support a U.S. dollar in which people both at home and abroad will have confidence.

Advance refunding, which the Congress approved last year by passage of H.R. 9035, is a highly technical subject. However, informed students of debt management agree that our public debt is today too short in maturity, and they also agree that advance refunding is a promising technique for achieving some lengthening of the debt.

The fact that the marketable debt is too short in maturity is indicated by the heavy proportion of short-term maturities—almost 80 percent come due within 5 years, as contrasted with only 50 percent in 1946. If effective steps are not taken to extend the debt, Treasury debt operations will occur more frequently and in much larger amount. This will tend to keep the Government securities market in a state of disturbance and also complicate the flexible application of monetary policies. Moreover, a constantly shortening debt involves other dangers; in particular, the shorter the maturity of the debt, the closer to money it is. Consequently, a big buildup in short-dated debt involves some of the same dangers as an excessive buildup in the money supply.

Granted that debt lengthening is at this time an important objective, how best achieve it? Experience has shown clearly that it is very difficult to sell large amounts of long-term bonds for cash. As was pointed out to the Committee on Ways and Means last year, there is competition for long-term funds from Government-guaranteed and aided debt—such as FHA and VA mortgages—from State and local government securities, the interest on which is exempt from Federal income taxes; and from business flotations of securities. Although some people might argue that the Treasury could sell huge amounts of long-term bonds when interest rates are low, and apparently save interest in the process, this technique is unacceptable. This is because interest rates fall to their low points only in recessions, and heavy sales of long-term Government bonds at that time would run the risk of absorbing savings that would otherwise go into residential construction, business expansion, and State and local government projects. This would impair chances of business recovery and probably intensify the recessionary pressures.

Advance refunding, although a relatively new technique, affords a highly useful and practicable device for achieving some much-needed lengthening of the public debt without disturbing the economy. Under this approach, long-term investors who hold Government bonds that were once long-term but are now drawing closer to maturity, would be offered the opportunity to exchange into new long-term issues. Inasmuch as an advance refunding would be merely a switch of one security for another, it would not disrupt the market as would large issues for cash, nor would it absorb new savings that could support economic growth and expansion.

If the Treasury sold, say, $3 billion of new 25-year bonds for cash, I am advised it would have to pay at least 4 percent, and probably considerably more. But the same amount of debt extension could probably be handled through advance refunding with an increase of perhaps about 1 percent on the interest rates paid on certain outstanding bonds now carrying a 2½ percent rate. That is, holders of some of the 2½ percent bonds maturing between 1965 and 1972 would be offered the privilege of exchanging for new 20- to 30-year bonds. In return for agreeing to extend their holdings some 15 to 25 years, these holders would get, and properly so, a rate of about 3½ percent instead of the 2½ percent they are now getting. As a practical matter, no one would be willing to extend debt for such a period without earning a suitable interest return.

In this way the Treasury, simply by agreeing to pay 3½ percent instead of 2½ percent, achieves some meaningful and highly beneficial lengthening of the debt, but with a minimum of impact on the economy and on our financial markets.

One point that some people seem to have overlooked is that the 2½-percent bond, from the standpoint of the market, is not a 2½-percent bond at all. These securities are selling in price from a little less than 89 cents on the dollar up to about 95 cents on the dollar. Their true interest return in the market today is not 2½ percent, but varies from about 3.35 percent to 3.75 percent. Thus, what the Treasury would trade with the investor is a new security whose yield in the market will be comparable to the yield on outstanding Government securities of similar maturity.

This is a desirable market transaction, in which an investor agrees to extend his investment for a considerable period, in exchange for a somewhat higher interest return. All parties to the transaction gain—the investor, by getting a more competitive interest return; the Treasury, by achieving a more manageable debt structure; and the American people, as a result of better debt management.

The basic principle of advance refunding is not new; in fact, it was used, successfully, in 1951. At that time, holders of almost $20 billion of 2½-percent bonds maturing in 1972 were offered the privilege of exchanging into new nonmarketable, 2¾-percent bonds maturing in 1980.

Annual Convention of the Squires & Constables Association of Pennsylvania, Inc., Clearfield, Pa., August 30, 1960

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. VAN ZANDT. Mr. Speaker, Clearfield, Pa., in my congressional district was the site of the 1960 convention of the Squires & Constables Association of Pennsylvania, Inc., on August 29 through 30.

The arrangements for the convention were made by the convention chairman, R. P. Neal, of Clearfield, assisted by Justice of the Peace Charles McClure, of Curwensville, Pa. One of the features of the convention program was the annual banquet attended by public officials and the delegates and their wives. It was my privilege to deliver the banquet address on the subject, "Law, Order, and Justice—At Home." The address follows:

LAW, ORDER, AND JUSTICE—AT HOME

(Address by JAMES E. VAN ZANDT, Member of Congress of the 20th District of Pennsylvania, at the annual convention of the Squires & Constables Association of Pennsylvania, Inc., Clearfield, Pa., August 30, 1960)

It is always a pleasure for me to speak to constituents of mine, and to other citizens of the State of Pennsylvania.

Tonight I am particularly fortunate to be able to address you not only as citizens of Pennsylvania, but also as officials of our local governments.

Being in Congress for as long as I have—some 20 years now—so much of one's time is taken with national and international problems, it is most important that we should be reminded every now and then of the workings of government on the State and local levels.

Frankly, you have given me a splendid opportunity to do this—and especially in the hometown of your popular first vice president, Mr. R. P. Neal, of Clearfield, Pa.

There is no better reminder of the importance of local government, it seems to me, than the very name of your organization—the Squires and Constables Association of Pennsylvania.

The word "constable" is taken from two Latin words—"comes stabulum"—the companion or master of the stables.

Well over a thousand years ago the constable was the most important official of government. When nations were often no larger than our average size county of today, the constable was the keeper of the horses—the cavalry. He was the chief military man for the count or lord of the shire. It was his duty to maintain law and order among the people of that county.

Today the duties of a constable are not very different from those of a constable at the time of King Alfred or King Edward the Confessor.

It is true: You no longer have to ride herd on a Robin Hood in Sherwood Forest, you do not have to keep bowstrings tight, nor sharpen arrows. You no longer have to chase highwaymen on horseback nor ride circuit throughout the county.

But whatever the means you use your job is the same—the maintenance of law and order in the locality in which you were elected to office.

Besides constables you other members of this association are called squires. Squire, the law dictionary tells us, is a short form of "esquiree," which in ancient times was defined as "a title of dignity next above gentleman." That title, "squire," was recognized by our own Supreme Court of Pennsylvania in the case of *Call* v. *Foresman*, decided in June 1836. The court said in that case: "* * * the import of the word 'esquire' or 'squire' is, in popular parlance of which the court will take notice, precisely the same as that of 'justice.'"

Thus your title "squire" means two things: "Gentlemen"—which you surely are—and "justice"—which you certainly

must be. You are the "conservers of justice" in your respective bailiwicks.

The office of the justice of the peace, like that of constable, goes deep into antiquity—to the formation of England into one united country and into the earliest stages of the formation of what we know as the common law—the basis of our own system of law—equity and justice.

Indeed, much of our early common law—which is still law today—began, I have no doubt, at the bench of a county justice of the peace whose name is lost in history, but whose decisions remain important to and binding on us today.

In order to be prepared for this occasion—I set out to determine just what the duties are of constables and justices of the peace. That was a colossal task, believe me.

I found a remarkable little book, called "Dill's Constables Guide in Pennsylvania," which details hundreds of duties the constable must perform.

Then I found one entire volume, and part of another, containing two complete titles of the Pennsylvania Code of Law which describes the many and varied duties of Pennsylvania justices of the peace and constables.

These functions would take all night to enumerate—let alone discuss. Indeed, Frederic W. Maitland, writing in 1885, practically despaired of his task to set forth the many jobs which you officers are required to do. "Long ago," he said, "lawyers abandoned all hope of describing the duties of a justice in any methodic fashion, and the alphabet has become the one possible connecting thread." Only by using an alphabetical system was he at all able to bring any semblance of order to his task.

But I do not have to tell any of you what your duties are. You know that they touch practically every facet of the lives of people and every activity—public or private—in your community. You know also that you have civil and criminal responsibilities of every conceivable description. You know and respect—as all men do—that every squire and every constable is charged with, in his community, the maintenance of law and order and the preservation of justice.

As citizens of Pennsylvania we, like every citizen of every community, have a certain amount of civic pride and an awareness of the desirability and the necessity of helping that community grow and prosper within the framework of law—order and justice.

It is, of course, the duty of every man so to conduct himself through the principles of good citizenship—that his immediate locality might prosper and grow. But the special task of guaranteeing that this might be accomplished is yours.

You have sought the opportunity to make your contribution to the community through election to the public office which you hold. As citizens we look to you for the accomplishment of these ends. Past experience tells us that our trust in you has been well placed.

The name of your organization contains another key word. That word is "association." The term "association" means a combining or a drawing together.

You have entered this organization in order to raise and discuss common problems, the solution to which will greatly enhance the effectiveness of your job in your locality.

Applied to justices of the peace and constables, "association" has yet another meaning. It demonstrates very well that the tasks of each—constables and justices of the peace—are inseparable. They dovetail with one another. The work of squires and constables cannot be separated. We cannot have one without the other. Law and order serves no purpose at all unless it is maintained in a just manner—by giving to each man his due.

Worded a little differently, your organization is "the maintenance of law and order associated with the preservation of justice."

Now the name of your association raises a question: Squires and Constables of Pennsylvania Associated—for what purpose? Your purpose, I suggest, is the noblest cause which any man can serve. That cause is the pursuit of peace. In the towns, cities, and counties in which you work your job is the maintenance of the public peace through the proper administration of justice.

Peace and good order on the local level create an atmosphere in which the proper functioning of government may be pursued on each of the larger levels of society. The elected positions which you hold are the very basis, the foundation, upon which all governmental activity must rest in order that a productive, prosperous, and peaceful world might be achieved.

The world does not rest easy today. We are not engaged in a shooting war, but the largest portion of our Government financing and the greatest attention of the Federal Government is devoted to an effort to prevent war by maintaining our country in the strongest possible position.

But simply because we have not drawn battle lines, and are not dropping or dodging atomic bombs, does not mean that we are at peace.

There is no peace for the people in the Congo. There is no peace in Tibet. There is no peace in Cuba. Indeed, there is little else but tension, apprehension, and grief.

In every one of these instances these disastrous events began with the breakdown of local government. The improper administration of law and order and justice at home was the initial cause of the ferment resulting in these difficult situations.

Thousands of people from Tibet have been driven from their homes. Property of all kinds has been confiscated in Cuba, with no attempt being made to pay the owners even part of its worth.

The new independent government of the Congo collapsed before it began operations. Because there was no strength in local administration.

These things do not appear to have any great immediate concern to us here in Clearfield, Pa., tonight. I say it does not appear to be of concern to us. But, indeed, it affects us greatly.

Four hundred years ago it mattered little to the American Indians if Spain and England had a naval battle in the English Channel. It didn't make any difference to Europeans if the Sioux and Blackfoot Indians had a fight on the Great Western Plains. Indeed, they weren't even aware of it.

But now the world is a different place. It does make a difference to the continuation of life and the pursuit of happiness as we know it if a child is starving in the interior of India, or if the grass hut of a Congolese is burned and the family in it obliged to flee.

The world is now a little place and the misfortunes of all people affect all others. If all these things affect us, or tend to disturb our daily lives, what must be done to remedy the situation?

The answer to that question lies in the very fact that you are squires and constables. It lies in the successful accomplishment of your commission. As we said before—you are charged with the maintenance of law and order, you are the guardians of justice, the preservers of the peace.

The world community is simply the sum total of many smaller societies, the basis of which is the family and the local community, the small town and the county.

There can be no peace throughout the world unless there is first peace at home. The human body is not a properly functioning organism unless each of its parts is well. One bad apple destroys the barrel.

Use whatever example you wish, the same argument applies to all human society. Peace for all men will be attained only when peace comes to every man. And peace can come to the world at large only when it is realized by each small group of people in local communities throughout the world.

That is your job. Your job is the maintenance of law and order—and the preservation of justice at home. This job properly done—and that depends entirely upon each of you—is both necessary and sufficient to ensure peace in the world.

William Shakespeare asked the question: "What's in a name?" Certainly, it seems to me, the name of your organization, Squires and Constables Association of Pennsylvania, has in it at least part of the answer to the age-old search by man for peace.

I read recently a one-verse poem which appeared in Poetic Justice in 1947. It pertains to justices of the peace, and it goes like this—

"I'm important in the county;
I'm a justice of the peace
And I disbelieve defendants
When they contradict the police."

That little verse illustrates, I think, just one of the many difficulties which your job entails—the very hard job of determining what, in a given set of circumstances, is the just decision to reach.

It also illustrates, however, that the determination of justice is your job, and in order that it be done properly we can listen with careful attention to the Roman emperor, Justinian, who said 2,000 years ago, "Justice is the constant and perpetual will to allot to every man his due."

The positions which you squires and constables hold under the laws of the State of Pennsylvania are local in nature. Your jurisdictional boundaries are, relatively speaking, small. The people over whom you have authority are few, and the direct effect of your official duties does not extend beyond your municipality or your county.

But in a larger sense the effects of your labors and the proper conduct of your office extend far beyond your town, your city, or your county.

As the very basis of justice through law and order you are, indeed, the cornerstone upon which the greatest hopes and dreams of all mankind rest—peace in all the world.

Ukrainian Congress Committee of America

EXTENSION OF REMARKS

OF

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. CUNNINGHAM. Mr. Speaker, later this year a significant anniversary will be celebrated throughout the Nation—the 20th anniversary of the Ukrainian Congress Committee of America.

This committee has been a leader in the battle against the wiles and insidious methods of the Soviets. We in Congress have often turned to this group for information and discussion about the captive nations behind the Iron Curtain.

I would feel remiss indeed if I did not pay my respects to this organization and pay sincere tribute to its work these past 2 decades. The road ahead is difficult to see, but we know that with guidance

from above, the right of every man to be free will be guaranteed.

The way may be long, but we will march together toward dignity and peace for men everywhere.

The San Joaquin County, Calif., Medical Society

EXTENSION OF REMARKS

OF

HON. JOHN J. McFALL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. McFALL. Mr. Speaker, under unanimous consent I would like to insert in the RECORD today a few remarks about what I consider to be one of the most progressive, social-minded medical societies in the country. It is a society in which I have great pride.

Throughout the United States and around the clock, physicians are continuously rendering medical care to those in need of their services. Individually, the physician's responsibility does not stop with rendering medical care to his patients. His spare time is taken up with continued postgraduate education, active participation in civic affairs, and with the socioeconomic aspects of medicine.

The physician's individual social conscience and his desire to adequately respond to the broad aspects of public service to which his profession is dedicated finds its expression in the policies and actions of his local county medical society. My county medical society is the San Joaquin Medical Society of California and covers the counties of San Joaquin, Calaveras, and Tuolumne.

My medical society is not large—at least by California standards. Its membership is 225 and the society has kept growth through the years with the exploding population in that area of California.

In reviewing the accomplishments of San Joaquin Medical Society it is impossible to find a program established by the society that did not, in a major part, stem from public need or desire. Dr. C. A. Luckey, president of the society, refers to this public awareness as being "patient oriented." My society has an emergency call system which guarantees the availability of a physician 24 hours a day. It has an established public service committee to which patients may bring their grievances. The society has a code of cooperation with all news media in order to enhance the accurate reporting of all medical news. The society is active in matters pertaining to school health, encouragement of adequate hospital beds, and nurse's recruitment. It has established a poison control information center in an attempt to cut down on the number of accidental deaths from poisoning. It operates a community blood bank which serves 26 hospitals in 5 counties with all of their blood needs.

To continue to recite the various public service activities that have become so much a part of county medical societies throughout the United States does not, however, set my county medical society apart.

The main reason for my pride in my county medical society is its leadership in the field of socioeconomic problems of medicine, and equating medical care to the patient's ability to pay, and in guaranteeing medical care for all regardless of the patient's ability to pay.

All of us are familiar with the tremendous strides being made by prepaid medical care programs in the United States. As early as 1952 the San Joaquin County Medical Society began a detailed study of prepayment and came up with three conclusions:

First. That the local medical profession must assume a position of leaderfession should sponsor adequate prepaid medical care programs that are as broad as possible in their coverage.

Second. That the local medical profession should sponsor adequate prepaid medical care programs agreeing to accept adequate fees as full payment thereby giving patients the certainty of coverage and the predictable costs that they desire. This sponsorship should be available to all service plans, insurance carriers, and all other prepaid medical care programs including those financed by governmental funds.

Third. That the local medical profession must assume responsibility and leadership in the area of "quality control." This is done in San Joaquin County by medically reviewing all claims so as to evaluate the type of medical care being given and to correct deficiencies by education or disciplinary action.

Realizing these purposes, on March 1, 1954, the physicians of the San Joaquin County Medical Society set up a separate corporation called the Foundation for Medical Care of San Joaquin County. Ninety-seven percent of the active physicians of the medical society are members of the foundation. This corporation is designed specifically to study the problems of bringing medical care within the reach of the population of this area, regardless of their ability to pay.

The standards established by the foundation for medical care give voluntary prepaid medical insurance plans a realistic criteria upon which to base their policies. It helps to improve the type of coverage offered in these policies and, in general, raise the standard of prepaid medical care contracts. A person seeking this type of coverage has, under the foundation's plan, the certainty of coverage which he so desperately seeks.

One of our most important foundation concepts is based upon the belief that most physicians are willing to adjust fees downward for people with low incomes. The foundation believes that a great deal of medicine's predicament is due to the inability of doctor and patient to get together on their financial arrangements; that is, both are reticent about discussing it. Because of this reticence, an administrative mechanism that sets up guideposts is needed. The foundation has, therefore, established a fee schedule which represents an accumulation of usual fees for this area. By and large, these fees represent what is actually being charged. Above this schedule, the doctors will not go. Any adjusting of the schedule is downward.

At the present time the San Joaquin Foundation for Medical Care sponsors 65 programs underwritten by 14 insurance companies and the Blue Shield Plan of California. Approximately 20 percent of the residents of San Joaquin County are covered by these programs.

One of the newest programs to come under foundation sponsorship is one in which the foundation has dealt directly with the Federal Government in establishing a comprehensive prepaid medical care plan for employees of the Federal Government. My medical society's foundation plan is 1 of 40 different health benefit plans approved by the Bureau of Retirement and Insurance of the U.S. Civil Service Commission under Public Law 86–382 signed into effect September 28, 1959. Sixteen counties in California participate in this program through the San Joaquin Foundation for Medical Care. All of these counties have foundations for medical care patterned after the parent organization in San Joaquin County. Their cooperation with the San Joaquin Foundation for Medical Care in its contract with the Federal Government allows the foundation's comprehensive program to be available to approximately 80,000 Federal employees and their families in the 16 California counties. Over 3,000 physicians and surgeons are now participating members of these various foundations. For the purpose of the record, let it be shown that the other California counties are San Diego, Orange, Riverside, San Bernardino, Kern, Tulare, Kings, Fresno, Merced, Madera, Stanislaus, Tuolumne, Calaveras, San Joaquin, Santa Clara, and Sonoma.

More than anyone else, Dr. Donald C. Harrington of Stockton is responsible for the establishment of the San Joaquin Foundation and for its vigorous growth during its first years. Dr. Harrington is the president of the San Joaquin Foundation for Medical Care and has been since its establishment in 1954. Dr. Harrington has been quoted as saying that the foundation's Federal employees contract is the most comprehensive prepaid medical care program ever offered in the great Central Valley of California. The foundation's Federal program operates on the service concept and with one or two minor exceptions gives complete coverage for all physicians' services. Surgery is covered in full as are the services of the assistant surgeon, anesthesiologist, radiologist, and pathologist.

Consultations with all specialties are covered without charge to the patient.

Extensive out-of-hospital coverage is provided for each Federal employee enrolled in the program. The program stresses early diagnosis as the best preventive medicine and covers such items as examinations and well-baby visits.

Before us in this Congress has been the difficult problem of providing medical care for those in the old-age groups. As we conclude this session, it is unresolved, but in my opinion, the next Congress must present an adequate solution to the people.

I am proud of this forward-looking group of physicians who are blazing new trails for bringing care to more people, for whom the organizational methods of yesterday are not good enough but who are willing to face and help solve today's problems with initiative, courage, and original thinking. They are acutely aware of the specific problems of bringing medical care to our older people for which this Congress has sought and is seeking an adequate solution. While they and I may not entirely agree on every issue, I am proud to know we can depend on their advice and assistance in arriving at a solution to the medical care problem that will be equitable to all segments of our population.

Four Steps to a Stronger Agriculture

EXTENSION OF REMARKS
OF

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 31, 1960

Mr. QUIE. Mr. Speaker, one of our most difficult domestic problems centers on the rural area of America.

As a farmer myself, I present my views today—not in an attempt to add to the growing literature of partisan bickering on the subject, but in a sincere effort to contribute to an earnest public study of a problem which affects not only agriculture but the economic well-being of all America.

It seems to me that those who discuss the farmers' problems have a twofold responsibility: A responsibility to examine the root causes and current aspects of the problem, and a responsibility to recommend steps for our Nation to follow to eliminate the causes and solve the problem.

Only by meeting these twin responsibilities will a discussion on the farm problem contribute to its solution.

Acknowledging these responsibilities, let us begin by surveying the dimensions of American agriculture.

U.S. FARM PEOPLE ARE THE STRENGTH OF OUR AGRICULTURE

The true dimensions are as vast as the spirit of our Nation's farm people.

This is because, first of all, agriculture is people.

Farming is more than just an industry. It is more than just another way to earn a living. It is a way to live a life.

The tremendous achievement of agriculture in this country is not a tribute to machines. It is a tribute to the mastery over machines by people who, dedicated to life on the land, have provided our Nation with the greatest outpouring of food and fiber the world has ever seen.

American farm people are the strength of our agriculture.

They are also a vital resource for our country in the cold war.

Today the United States is tooling up for an intensified production duel with the Soviet Union. The goal is not only top production honors, but world prestige for our philosophy of freedom. That is why this competitive race is important.

But, if Americans want to become encouraged over their country's economic power, they should consider the record of our agriculture. In no other area of activity does America prove its superiority over other nations, and other systems, more than in the field of agriculture.

The victory for America is so lopsided as to be almost embarrassing.

One American farmer produces enough to feed and clothe 20 people. In contrast, one Russian farmer produces enough to feed and clothe only three, or at the most, four people.

This victory for U.S. agriculture reflects not only the incomparable skill and mastery of the farmer over his great trade. It illustrates the fact that American abundance in food production is a great resource and must be put to the best uses.

For, American production has been, and must continue to be, an invaluable tool for peace in the cold war. Guns and nuclear weapons may deter aggression, but food for hungry stomachs and clothes for shivering backs win adherents for freedom—and adherents are needed to turn the balance in the cold war in freedom's favor.

If farm production has accomplished all this—and if it carries the potentiality for further achievements—is production itself the farm problem?

The answer is "No." Production in itself is not the farm problem. Far from it. Our farm production is a blessing which presents us with the moral challenges to devote our overabundance to the best possible use for ourselves and others.

What is the farm problem?

The problem is this:

Our Nation's farmers are not, generally speaking, receiving an adequate return for their management, investment, and labor. It is ironic but true: The very people who have placed modern agriculture at the service of America, the very people who have built agriculture as a giant potentiality for peace—our farm people—are themselves not sharing as they should in our Nation's prosperity.

This is the farm problem.

Every full-scale problem is surrounded in some way by misconceptions. This is true of the farm problem.

One misconception is typified by the complaint we hear from some quarters that the American farmer himself has produced the farm problem.

Nothing could be further from the truth. The farm problem is not farmer caused. The responsibility lies elsewhere. Far from causing the problem, the farmer has been victimized by it.

Another misconception is that the farm problem only concerns farmers. This, also, is untrue. The farm problem affects everyone. America is an economic unity. Trouble for one economic segment means trouble for the entire economy.

Now, if we have discussed the heart of the farm problem, what are the root causes of that problem?

I believe there are four main causes, four central reasons why farmers are not receiving adequate returns for their labor. Let me list them.

First. Government-stored commodities are depressing prices.

Second. Production from the land continues greater than demand.

Third. Farmers' costs have increased greater than their gross income.

Fourth. Farmers' bargaining power has not been fully developed.

What course should the Nation take to remove the causes of the problem?

First, let me point out what course the Nation should not take.

This is the course of partisan politics—the course which, in 1960, may be the path of least resistance.

Our political parties should not try to outpromise themselves or each other. They should not engage in a duel of accusations at the expense of agriculture.

This means that our parties and our candidates should not try to treat the symptoms but the illness itself. A variety of politically sponsored "aspirin tablets" or sedatives should not be administered to agriculture.

Political barbs and partisan accusations should be allowed to lie idle. On one hand there has been a great effort in the current campaign to blame the Secretary of Agriculture, who has administered our farm laws for the past 7½ years, for all the troubles that beset agriculture. On the other hand, there has been a strenuous counter effort to blame Democratic-controlled Congresses for not passing remedial legislation to help agriculture.

Nothing can come of these accusations but a crop of trouble for agriculture.

Instead, let us try to solve agriculture's problem as coolly and objectively as we can.

To do this, we must label some current prescriptions for agriculture as exactly what they are—sedatives and tranquilizers.
